## Calendar: 2012-2013

### Fall 2012

Monday	Aug 27	Classes begin
Monday	Sep 3	Labor Day, classes DO meet
Friday	Oct 12	Fall Break Begins, (No Classes; university offices open)
Sunday	Oct 14	Fall Break Ends
Saturday	Nov 17	Thanksgiving Holiday begins
Sunday	Nov 25	Thanksgiving Holiday ends
Wednesday	Dec 12	Classes end
Thursday	Dec 13	Reading Day
Friday	Dec 14	Exams begin
Thursday	Dec 20	Exams end
Friday	Dec 21	Fall Commencement Ceremonies (University and Graduate)

### Spring 2013

Monday	Jan 21	Martin Luther King Day. No Classes; University Offices Closed.
Tuesday	Jan 22	Classes Begin
Saturday	Mar 9	Spring Break begins
Sunday	Mar 17	Spring Break ends
Wednesday	May 8	Classes end
Thursday	May 9	Reading Day
Friday	May 10	Exams begin <sup>1</sup>
Wednesday	May 15	Exams end
Thursday	May 16	Senior Day
Friday	May 17	University and Graduate Commencement Ceremonies
Saturday	May 18	Spring Commencement (College Ceremonies)

### Summer I 2013

Monday	May 27	Memorial Day Holiday, No Classes
Tuesday	May 28	Classes Begin
Thursday	Jul 4	Holiday, No Classes
Friday	Jul 5	Classes end
Saturday	Jul 6	Exams begin
Monday	Jul 8	Exams end

### Summer II 2013

Tuesday	Jul 9	Classes begin
Thursday	Aug 15	Classes end
Friday	Aug 16	Exams begin

Saturday	Aug 17	Exams end
----------	--------	-----------

Approved, University Council, 4/2/2007

<sup>1</sup>Saturday Exams

## Calendar: 2013-2014

### Fall 2013

Monday	Aug 26	Classes begin
Monday	Sep 2	Labor Day, classes DO meet
Friday	TBA**	Fall Break Begins
Sunday	TBA**	Fall Break Ends
Saturday	Nov 23	Thanksgiving Holiday begins
Sunday	Dec 1	Thanksgiving Holiday ends
Wednesday	Dec 11	Classes end
Thursday	Dec 12	Reading Day
Friday	Dec 13	Exams begin
Thursday	Dec 19	Exams end
Friday	Dec 20	Fall Commencement Ceremonies (University and Graduate)

\*\*Per University Policy, Fall Break dates will be announced following scheduling of all Fall university activities (approximately March 2013)

### Spring 2014

Monday	Jan 20	Martin Luther King Day. No Classes; University Offices Closed.
Tuesday	Jan 21	Classes Begin
Saturday	Mar 8	Spring Break begins
Sunday	Mar 16	Spring Break ends
Wednesday	May 7	Classes end
Thursday	May 8	Reading Day
Friday	May 9	Exams begin <sup>1</sup>
Wednesday	May 14	Exams end
Thursday	May 15	Senior Day
Friday	May 16	University and Graduate Commencement Ceremonies
Saturday	May 17	Spring Commencement (College Ceremonies)

### Summer I 2014

Monday	May 26	Memorial Day Holiday, No Classes
Tuesday	May 27	Classes Begin
Thursday	Jul 3	Classes End
Friday	Jul 4	Holiday, No Classes
Saturday	Jul 5	Exams begin
Monday	Jul 7	Exams end

### Summer II 2014

Tuesday	Jul 8	Classes begin
Thursday	Aug 14	Classes end
Friday	Aug 15	Exams begin
Saturday	Aug 16	Exams end

## Purpose and Mission of the University

*Virginia Polytechnic Institute and State University, a publicly supported, comprehensive, land-grant university, serves the Commonwealth of Virginia, the nation, and the international community by generating and disseminating knowledge in the humanities, arts, social sciences, scientific, and professional disciplines through instruction, research, and extension. Inspired by its motto, "Ut Prosim" (That I May Serve), the university instills within each member of the university community an appreciation of the values and obligations of productive citizenship and the responsibilities of leadership while promoting personal and intellectual development. Its scholastic programs are accessible to all who demonstrate academic merit to gain entrance. To achieve this mission, it will identify and build on strengths across the university, forge innovative and mutually productive relationships with industry and government, manage resources efficiently, and establish a clear identity as a forward-thinking, high-quality institution that systematically guides and evaluates its future.*

## Athletics, Intramurals, and Recreational Facilities

Virginia Tech has a diverse and highly active athletic program for men and women students in intercollegiate, intramural, and extramural sports. The athletic program is recognized as one of the most successful in the nation because it is geared to meet the needs of all students interested in physical and recreational sports activity.

The university has extensive and modern athletic and recreational facilities, including: Cassell Coliseum, an indoor arena seating 10,052; Lane Stadium, seating 66,233; a fully equipped recreation gymnasium, including War Memorial Pool; Rector Field House; Burrows-Burleson Tennis Center; English Baseball Field; outdoor tennis courts; the Pete Dye River Course of Virginia Tech and Virginia Tech Golf Course; Johnson/Miller Track Complex; Thompson Field for Soccer/Lacrosse; Tech Softball Park; a pond for ice skating in the winter; and the South Recreation Field Area for outdoor sports.

Virginia Tech's athletic varsity teams compete at the Division I level of the National Collegiate Athletic Association (NCAA). The university participates in the Atlantic Coast Conference for all varsity sports. Athletic scholarships are available in the following intercollegiate sports:

baseball (men) basketball (men and women) football (men) golf (men)	lacrosse (women) soccer (men and women) softball (women) swimming/diving (men and women)	tennis (men and women) indoor/outdoor track/cross country (men and women) volleyball (women) wrestling (men)
--	---	---

The following extramural sports clubs also are available: baseball (men's), basketball, bowling, clay target, crew, cricket, cycling, fencing, golf, women's field hockey, gymnastics, ice hockey, lacrosse, rugby, soccer, softball (women's), snow skiing, triathlon, volleyball, water polo, and water skiing.

Virginia Tech offers a wide range of intramural and recreational programs for men and women including the following sports: basketball, billiards, bowling, chess, dodgeball, flag football, hearts tournament, racquetball, golf , innertube water polo, kickball, soccer, softball, swimming, table tennis, tennis, team darts, volleyball, and wallyball, wiffleball.

## The Cadet System

The Virginia Tech Corps of Cadets is one of only two programs in the United States offering a corps of cadets within a large public university.

[The Corps of Cadets](#), a militarily structured organization, offers many leadership development opportunities to both male and female students. The Rice Center for Leader Development offers a minor in leadership studies. (Contact Colonel Dave Miller, Director, [540/231-9455] for additional information on the center.)

The Corps is supervised by the Commandant of Cadets, who establishes overall policies and methods of operation for the Corps. The cadet commanders and staff officers are responsible for implementation of policies and procedures.

Membership in the Corps involves a 24-hour-a-day commitment. Members wear a distinctive Virginia Tech cadet uniform and live in designated cadet residence halls. Both cadets and non-cadets are part of one student body, attend the same classes, and are organized into one student government. Cadets participate in all university activities, including athletics, social events, and cultural programs. Membership in the Cadet Regimental Band, the "Highty-Tighties," is restricted to cadets. Although many benefits are available through participation in one of the three ROTC programs offered at Tech, a student does not have to enroll in an ROTC program to be a member of the Corps of Cadets.

## Career Services

Career Services, a unit of the Division of Student Affairs, works with students of all academic levels and all majors to assist with the following:

1. Making career decisions and plans. Whether students are trying to decide on an academic major or a career field, Career Advisors on staff are ready to assist.
2. Gaining career-related experience while in school. Increasingly, employers expect students to have experience in their chosen field before graduation. In addition to administering the Co-operative Education and Internship Program (detailed below), Career Services provides hundreds of internship job listings through their on-line resume database and job listing service, Hokies4Hire.
3. Determining post-graduation plans – which typically involves seeking full-time employment or applying to graduate or professional school. Career Services offers a full range of services related to educating students about the job search process. Through the Hokies4Hire system, students have access to job listings and opportunities to connect with employers through the On-Campus Interviewing Program. Additionally, the Office of Health Professions Advising is located within Career Services and is dedicated to assisting students who are interested in continuing their education to pursue a health related occupation.

Information about all of Career Services' resources, services and programs –including an events calendar –is located at [www.career.vt.edu](http://www.career.vt.edu).

To meet with a career advisor to discuss any of these topics, students can schedule an appointment by calling 540/231-6241 or visit Career Services during walk-in hours, Monday –Friday, noon –3:00pm. Career Services is located in the Smith Career Center on the corner of Washington Street and West Campus Drive.

[TOP](#)

## Cooperative Education/Internship Program

The Co-op/Internship Program is an academic program that provides students the opportunity to combine real world work experience with classroom theory. It involves one or more semesters of paid or unpaid, full-time work, and is a partnership among the student, Career Services, the academic department, and the employer. Gaining career-related experience gives the co-op/internship student the opportunity to test career goals, defray the costs of a college education, and gain an important edge in the full-time employment market.

The Cooperative Education/Internship Program Orientation is required of all students who plan to enroll in the Co-op/Internship Program. Seminars are scheduled throughout the year and are designed to walk prospective co-op and internship students through the process of enrollment in the Co-op/Internship Program. Please call (540) 231-6241 or visit <http://www.career.vt.edu/coop-intern/> to find out more.

### Requirements for participation in the Co-op/Internship Program:

1. Students must maintain a cumulative GPA of 2.0.
2. Students can begin work the summer after their freshman year, at the earliest. Transfer students must have completed at least one semester and earned a GPA of at least 2.0 at Virginia Tech.
3. The co-op/internship opportunity must be a full-time opportunity.

### Additional Notes:

1. The Co-op/Internship Program is open to any student in any major.
2. The Graduate School administers the graduate Co-op/Internship Program.
3. Although the majority of participants in the Co-op/Internship Program are Engineering and Business majors, any student in any major is welcome to participate.
4. To see where our current students are working, visit <http://www.career.vt.edu/scripts/CICurrentEmployers/CurrentEmployers.asp>

[TOP](#)

## Counseling Center, Thomas E. Cook

The Cook Counseling Center provides individual, group, couples counseling, crisis intervention, psychiatric care, and referral to qualified community practitioners. The Center offers workshops and outreach presentations to the campus community on a variety of topics, including stress management, relaxation skills training, and study skills assistance. The professional staff members are also able to consult with parents, faculty, staff and the entire university community. Emergency services are available after regular office hours by calling (540) 231-6557.

The Counseling Center's diverse clinical and administrative staff is made up of a number of caring and experienced, mental health professionals. Its services are covered by payment of the student health fee. An appointment can be made by calling (540) 231-6557 or stopping by the office located in 240 McComas Hall or the satellite office located in 107 East Eggleston Hall.

## **Dean of Students Office**

The mission of the Dean of Students Office is to foster a welcoming community for all students. The office supports the transition to college life, leads the response to student emergencies, and serves as a voice for student concerns within the broader community and serves as the primary point of contact for Hokie parents.

Members of the Dean of Students staff are available to meet with students on a walk-in basis, although appointments are appreciated. For more information or assistance, contact the Dean of Students Office at 109 E. Eggleston Hall, (540) 231-3787, or [dean.students@vt.edu](mailto:dean.students@vt.edu)

- Advocacy for all students
- Emergency response for students and parents
- New Student Programs, including Orientation, Hokie Camp, and Hokie Hi.

## **Division of Student Affairs**

The Division of Student Affairs at Virginia Tech encompasses vital departments dedicated to providing a rich co-curricular experience and essential student services. Virtually every aspect of a student's life outside the classroom is represented through its departments.

The division strives to create environments, programs, and services that support the university's teaching and learning focus and its mission to 'expand personal growth and opportunity, advance social and community development, foster economic competitiveness, and improve the quality of life.'

The Division of Student Affairs consists of the following departments: Career Services, Cook Counseling Center, Corps of Cadets, Cranwell International Center, Dean of Students Office, Fraternity and Sorority Life, Housing and Dining Services, Multicultural Programs and Services, Recreational Sports, Residence Life, Schiffert Health Center (including Campus Alcohol Abuse Prevention Center), Services for Students with Disabilities, Student Activities, Student Conduct, and University Unions.

Each of the division's programs provide ethical, social, and civic leadership for all students. One of the greatest responsibilities of the Division of Student Affairs is to prepare Virginia Tech students to be ethical leaders in an ever-changing society.

A detailed statement of the rights and responsibilities of students is contained in the University Policies for Student Life.

## **First-Year Experience**

The intent is to engage students through first-year experiences that provide curricular and co-curricular learning opportunities designed to foster their abilities to

- problem solve,
- explore and use information appropriately and effectively, and
- integrate ideas and experiences and apply them to new learning situation within and beyond campus.

These intellectual and practical skills are foundational to students' development into lifelong learners. Each first-year experience will include meaningful curricular and co-curricular opportunities for students to develop their problem-solving, inquiry, and integrative learning skills in a technologically-rich environment.

## **The Honor Code and Honor System**

The Honor Code is the university policy which defines the expected standards of conduct in academic affairs. The Virginia Tech Honor Code embodies a spirit of mutual trust and intellectual honesty that is central to the very nature of the university and represents the highest possible expression of shared values among the members of the university community.

The fundamental beliefs underlying and reflected in the Honor Code are: that trust in a person is a positive force in making that person worthy of trust, that every student has the right to live in an academic environment that is free from the injustices caused by any form of intellectual dishonesty, and that the honesty and integrity of all members of the university community contribute to its quest for truth.

The functions of the Honor System are to communicate the meaning and importance of intellectual honesty to all students of the university; to articulate and support the interest of the community in maintaining the highest standards of conduct in academic affairs; and to identify, sanction, and educate those who fail to live up to the stated expectation of the university community with regard to these standards. (Please see the "[Academics](#)" section of this catalog for details relating to the Honor Code and System.)

## Information Technology

Information Technology supports computing and communications including voice and data communications, instructional technologies, administrative processing, software support, high performance research computation, and individual help and tutorials. The website [www.computing.vt.edu](http://www.computing.vt.edu) is a guide to specific services and support.

The data network provides rapid access to email, class materials, library databases, and to the Internet for every resident in university housing. Wireless network access is available in most academic and administrative spaces across campus. Wireless facilitates mobility across the campus and, in conjunction with the university computer requirement for laptops, tablet computers, and software, is used in the classroom setting to improve the effectiveness of teaching and learning.

Virginia Tech is committed to using information technology to enhance teaching and learning and works to ensure that teaching faculty members have the ability to use information technology effectively. The award-winning Faculty Development Institute provides faculty members with the ability to employ emerging technologies effectively. Information Technology supports learning experiences through the online Scholar course management system, online course evaluations, and support for video production and distribution for both on-campus and distance learning classes. The required undergraduate student software bundle and other instruction-related software are offered at favorable pricing to students.

Direct support to students in information technology is provided through the 24x7 help resource, 4Help ([www.4help.vt.edu](http://www.4help.vt.edu)). InnovationSpace ([www.is.vt.edu](http://www.is.vt.edu)) offers free equipment loans to students, including HD video cameras, digital still cameras, and audio recorders; on-site use of video and audio editing software; and opportunities to learn more about software. Computer labs offer additional options for collaboration and for access to highly specialized software. Each student is provided an email account and access to file space for storage or websites.

My VT ([www.my.vt.edu](http://www.my.vt.edu)) provides secure access to personal information, including course materials, one's own contact information, and billing and account information. Security of this and other information is overseen by the Information Technology Security Office ([www.security.vt.edu/](http://www.security.vt.edu/)), protected through careful maintenance of strong passwords and online credentials, and incorporated into development of new applications.

Information Technology facilitates research through high performance networks and high performance computing, as well as through on-going professional development support, acquisition of specialized research software, and collaborative research.

For more on the Information Technology organization, see [www.it.vt.edu](http://www.it.vt.edu).

## Living and Dining On-Campus

### Housing and Residence Life

Housing and Residence Life provides facilities and services for more than 9,300 students who live in the residence halls on campus.

Residence halls vary in size and shape, and students may live in traditional rooms, hotel-style rooms, or suites, in single-sex or coeducational halls. Staff members promote the academic success and personal growth of residents through community development, peer advising, involvement, student advocacy, programming, and policy enforcement.

Each residence hall is staffed with student resident advisors, who are responsible for community development, programming, and behavioral conduct, with assistance from student management or professional staff. In addition, the Residence Hall Federation (RHF) focuses on improving the quality of residence hall living and implementing educational social programs for the resident communities. All residence hall students are automatically members of the RHF. Numerous leadership opportunities are available within this student organization.

All first-year students live on campus unless they fall into one of the following categories: those living with parents or other relatives, those who are married and living with their spouses, veterans of at least six months of military service, or those who are at least 21 years old. Written requests for exceptions to this policy should be directed to Housing and Residence Life, New Hall West, Suite 144 (0428).

Campus housing is also available, but not guaranteed, for other students. There is a random-selection process held each spring to allocate residential space to non-first-year students who apply to live on campus.

### Dining Services

Numerous dining options are available for both on-campus and off-campus students, as well as for faculty, staff, and campus visitors. All campus residents choose a Major, Mega, or Premiere Flex Plan. Off-campus students may select one of six dining plans or participate in the Dining Dollars debit card program.

Dining at Virginia Tech is anything but traditional. The award-winning dining program specializes in preparing diverse menus in innovative, exciting venues:

- Taking traditional dining to the next level, D2 combines all-you-care-to-eat dining with the variety of an international marketplace and includes a shop dedicated to vegetarian and vegan specialties.
- Deet's Place is a gourmet coffee, ice cream, and pastry shop, complete with award-winning coffee beans roasted in-house.
- DXpress is perfect for a quick snack on the run, such as biscuits, burgers, and pizza by the slice.
- Hokie Grill & Co. features national brands Chick-fil-A, Pizza Hut, and Cinnabon®, in addition to Blue Ridge Barbecue, grab-n-go sandwiches, snacks, and a soup, salad, and fruit bar.
- Owens Food Court consists of 12 specialty shops serving international and American favorites, including carved-to-order meats, a soup and salad bar, burgers, pastas, Philly cheese steaks, tacos, and a venue that serves exclusively local, organic, or sustainably produced foods.
- Squires Student Center's Food Court offers pizza, pasta, calzones, and salads at Sbarro® and distinctive bakery items, upscale sandwiches, and signature soups at Au Bon Pain®.
- Turner Place in Lavery Hall offers a variety of convenient options to the academic side of campus. It houses franchises for Jamba Juice, Bruegger's Bagels, and Qdoba Mexican Grill alongside five upscale original venues serving sushi, crepes, gelato, teppanyaki, southern steakhouse fare, and much more.
- West End Market features wood oven-baked pizzas, grilled steaks, seafood, homemade pastas, freshly baked pastries and breads, and more—prepared right before your eyes.

[TOP](#)

## Location

The campus is located in Blacksburg, Virginia, about 38 miles southwest of Roanoke, Virginia. To reach the campus from Interstate 81, take Exit 118-B (Christiansburg) onto U.S. Rt. 460 West. Remain on 460 West to Virginia Tech. Take the Virginia Tech exit (314 East/Southgate Drive) off U.S. 460.

[Detailed directions to Virginia Tech](#)

[Campus Map](#)

## McNair Scholars Program

The Ronald E. McNair Post-Baccalaureate Achievement Program (McNair Scholars Program) is designed to encourage and prepare low-income, first-generation college students and those from groups currently underrepresented in graduate education to pursue doctoral study. Students selected as McNair Scholars will have opportunities to explore graduate education in an environment of encouragement and close support. In addition, Scholars will learn to set high academic, personal and professional goals and will get individual assistance in achieving their goals. The program offers seminars and other scholarly activities that focus on undergraduate research and graduate education, as well as guided academic and career support, a summer research experience, faculty mentorship, and effective preparation for graduate school.

Scholars attend an academic seminar series entitled, "Pathways to the Ph.D.," that is designed to:

- Assess students' academic and career skills and interests;
- Learn about the steps in the research process;
- Prepare for graduate school by researching and visiting graduate schools; and
- Learn about the graduate school application and funding processes.

Scholars also have the opportunity to participate in a paid, 10-week summer research experience at Virginia Tech that includes a myriad of support and enrichment activities, including:

- Classes to develop their research interests;
- Guided research project under the tutelage of a VT faculty member;
- Preparation for the graduate school application and funding process;
- Research presentations;
- Networking opportunities; and
- Gearing Up for Graduate School Seminars – Verbal and Quantitative Skill Building.

The Virginia Tech McNair Scholars Program is funded through grant from the United States Department of Education. Additional information is available at the McNair Scholars Program website, <http://www.mcnair.vt.edu>.

## MEDEX Overseas Evacuation Program

An overseas emergency evacuation program is available to faculty, staff, students and their families who may travel overseas either on business or pleasure. MEDEX provides emergency services outside your home country. Included are

- locating appropriate medical care
- evaluation and close monitoring of treatment - management of emergency medical evacuation and repatriation (transport of mortal remains)
- coordination of direct claims payments to providers
- verification of your insurance to facilitate hospital admission - continuous contact with family, physicians, and employer assistance with interrupted travel plans resulting from an emergency situation
- assistance replacing lost or stolen medications
- emergency message transmittal services
- emergency international transfer of funds
- assistance in locating lost or stolen passports
- multilingual language services in emergency situations
- coordination centers and phone numbers throughout the world

MEDEX is already a part of the Virginia Tech medical insurance offered to full-time students attending the university. For further information on MEDEX services or the student medical insurance program, contact Risk Management at telephone 540/231-7439.

## Multicultural Academic Opportunities Program

The Multicultural Academic Opportunities Program (MAOP) is an academic success community founded in 1993 that provides scholarships to undergraduate and graduate students; structured academic support; mentoring; and opportunities for research. MAOP is a selective program that is open to all students who demonstrate a clear commitment to the pursuit of academic excellence and are interested in the promotion of diversity in an ever closer global community. Through partnerships with various departments at Virginia Tech, other college and university peers, governmental, private, and non-profit institutions, MAOP participants are supported with academic guidance and financial support.

MAOP is committed to providing Undergraduate and Graduate Scholars with an academically challenging and comprehensive program that facilitates degree completion. The specific goals of MAOP are to:

- Increase the diversity of students who apply to, enroll, and graduate from Virginia Tech;
- Provide access and opportunity for low-income, first-generation college students to enhance their chances of success;
- Provide academic, professional and personal support programs for participants;
- Enlist the support of committed faculty members to provide exceptional research opportunities for Scholars;
- Provide support for student organizations consistent with the MAOP mission, such as MANRRS (Minorities in Agriculture, Natural Resources, and Related Sciences);
- Nurture a genuine collaboration with MAOP partners at other institutions and in business, industry, and state and federal government who share our goals and commitment to increasing diversity and student achievement at Virginia Tech; and
- Function as a visible and responsive student-centered program that increases and supports a broad understanding of diversity within the university community.

MAOP carries out these goals through the "MAOP Family" programs and a host of related activities. Programs and activities serve students from the pre-college level through the doctorate with a continuum of financial, academic, emotional, and social support, and research opportunities.

## Parking Regulations

All vehicles, including motorcycles and scooters, parked on the Virginia Tech campus must be registered with the Parking Services Office and must display a university parking permit. Semester, summer, and daily parking permits are available and an appropriate fee is charged for each permit. Visitors are required to display a visitor permit, which is available at the Virginia Tech Visitor Information Center. For more information about parking or to request a parking regulations handbook, visit [www.parking.vt.edu](http://www.parking.vt.edu), or call 540-231-3200.

## Alternative Transportation

The Alternative Transportation Program offers several options for commuter students to get to class without the hassles of parking permits and searching for parking spaces through the Commuter Alternatives Program (CAP).

CAP has two programs to fit your commuting needs.

- Carpool Program: Carpooling saves you money on parking and gas, and it's the closest thing you can get to RESERVED PARKING on campus.
- BB&W is available to commuter students who use alternative transportation methods as their primary means of commuting to campus. Examples include riding the Blacksburg Transit or SmartWay buses, bicycling, and walking. By registering for BB&W, you will receive 15 half price daily parking passes.

Bicycles can be registered for free through Parking Services at [www.parking.vt.edu](http://www.parking.vt.edu).

For more information about commuter alternatives visit [www.facilities.vt.edu/tcs/alternative](http://www.facilities.vt.edu/tcs/alternative) or call 540-231-0248.

## The ROTC Program

The Reserve Officer Training Corps Programs conducted at Virginia Tech are available to cadets and are offered by the Army, Navy/Marine Corps, and the Air Force. All students participating in ROTC are required to be members of the Corps of Cadets. Details about courses offered, as well as available scholarships and stipends, can be found in the department listings under the College of Liberal Arts and Human Sciences; ROTC (Army), ROTC (Navy/Marine Corps), and ROTC (Air Force). Upon successful graduation from Virginia Tech and completion of the ROTC program, the student is commissioned as an officer in either an active or reserve component of the Armed Forces. The total ROTC credits applied toward degree requirements varies by major and ranges from four to 24. All credits count as free electives. Consult your course advisor for information on ROTC credits which may be used within your major.

Students interested in additional details should contact the professor of military science for Army ROTC, the professor of naval science for Naval/Marine Corps ROTC, or the professor of aerospace studies for the Air Force ROTC program.

### General Rules Governing the Cadet Lifestyle

All Virginia Tech students are eligible to join the Cadet Regiment and participate in the cadet lifestyle. Cadet student status is a prerequisite for participation in any of the ROTC programs.

**Physical Standards:** The Department of Defense has prescribed physical standards for formal enrollment in the ROTC programs. Cadets not physically qualified for an ROTC program may remain in cadet status as members of the Corps of Cadets.

**Cadet Regulations:** Cadets are expected to adhere to the Cadet Honor Code and abide by all cadet regulations, directives, policies, and procedures of the Corps, as well as the rules governing civilian students.

The following summary gives the prospective cadet an understanding of the nature of his or her obligation as a cadet:

1. Cadet officers and non-commissioned officers are responsible to university authorities for the activities of the cadets under their supervision and are given the authority to discharge their responsibilities.
2. Cadet residence halls are coeducational with controlled visiting privileges for non-residents and mandatory quiet study periods.
3. Alcoholic beverages are prohibited in the cadet residence halls.
4. Cadets are required to wear the cadet uniform to classes and cadet functions.
5. Cadets are required to live in a designated cadet residence hall unless married and living with a spouse.
6. Second-semester freshmen and upperclassmen in the corps may request a change to civilian status at any time. First-semester new cadets may not leave the corps and change to civilian status until the last day to drop a class without penalty (after six weeks of class). All students are encouraged to make status changes (from cadet to civilian lifestyle or vice versa) in conjunction with the beginning or end of an academic semester.

See [Academics](#) section for details on the ROTC course credits which apply toward degrees.

### Services for Students with Disabilities

Admission to Virginia Tech is based on requirements outlined in the application and in the undergraduate and graduate catalogs. Admission decisions are made without regard to disabilities. All applicants to the university are reviewed through the same admission procedure.

Virginia Tech is committed to ensuring that all qualified individuals with disabilities have the opportunity to take part in educational and employment programs and services on an equal basis. To be eligible for services, students with disabilities must identify themselves and present professional documentation to the Services for Students with Disabilities (SSD) office. Documentation should be recent, relevant, comprehensive, and, where appropriate should contain test scores and interpretation. If the original documentation is incomplete or inadequate to determine the extent of the disability or reasonable accommodations, the university has the discretion to require additional documentation. Any cost incurred in obtaining additional or initial documentation is borne by the student. Until appropriate documentation is provided, the SSD office cannot support the student's request for services. Faculty members are not expected to provide services unless students present verification of accommodation needs from the SSD office.

## Student Centers and Activities (formerly University Unions and Student Activities)

Through Student Centers and Activities, you can get involved with student activities, clubs and organizations, your student unions, leadership development, leisure and recreation, and student employment. These units within the Division of Student Affairs complement the academic program and enrich the quality of student life at Virginia Tech. Student Centers and Activities provides programs and experiences that promote educational, cultural, recreational, social, and personal growth. Student learning through involvement is the major focus, and is achieved in partnership with and is complementary to the academic mission of the university. An environment for co-curricular learning is created through planned programs and services in the areas of leadership, program advising, program entertainment, student organization advisement, and student organization finance. Student Centers and Activities strives to assist students in developing an appreciation for diversity, responsibility for self-learning, critical thinking, and pragmatic skills to become life-long learners, productive citizens, and community leaders.

**The Black Cultural Center and Multicultural Center** can be found on the first floor of Squires. This center hosts educational lectures, programs, and displays celebrating the diversity of the university community.

**Campus Programs** is made up of the offices of Student Organizations and coordinates student organization funding, registration, and support for more than 700 student groups. Campus Programs supports Virginia Tech Union, the largest student programming board, in providing events, activities, and programs for the university community. The Campus Programs office also coordinates all Homecoming activities.

### Clubs and organizations

There are more than 700 officially listed student organizations at Virginia Tech. Each student organization has a different focus, and each operates under student leadership. All Virginia Tech students are encouraged to find an organization that matches their interests. The website below links you to a searchable student organization database so you can find the right organization for you. Search VT Student Organizations at [https://banweb.banner.vt.edu/ssb/prod/hzsk.org.P\\_DisStuOrgs](https://banweb.banner.vt.edu/ssb/prod/hzsk.org.P_DisStuOrgs)

**Event Services** facilitates and enhances programming for the Virginia Tech community by assisting and consulting in the planning and support of events. The Event Planning Office fosters an educational environment that provides student organization members and departmental representatives with coordination of events, event scheduling, information on liability and risk management issues, standard procedure and protocol, and referrals to Production Services and the Squires Ticket Office.

**Leadership Development** supports and expands upon each student's curricular contributions at Virginia Tech. We create leadership education, training, and development offerings that give students the opportunity to cultivate skills, build networks, and grow as global citizens. Student learning through involvement is our major focus.

**The Perspective Gallery** presents art exhibitions by diverse artists working in a variety of media and styles. Visitors can view work of local and regional artists, nationally recognized artists, and artisans from around the world. Receptions and special events allow the public to meet and talk with the artists. Perspective Gallery is located on the second floor of Squires Student Center. Admission is always free. You can also enjoy works in the permanent collection, located throughout the public areas in Squires and Johnston Student Centers, the Graduate Life Center, and Cranwell International Center.

**Virginia Tech Off-Campus Housing, or VTOCH**, provides students with resources, programs, and services to assist with their off-campus housing needs. VTOCH's comprehensive searchable online database is consistently the most visited Virginia Tech website. VTOCH maintains information on local apartments, realtors, transportation, and issues affecting renters today. VTOCH hosts two housing fairs each year so students can get up close and personal with rental options and roommate fairs so students can make connections with others to share living expenses.

## RECREATION

- **The BreakZONE Recreation Center** is the place to go to relieve the stress of classes and tests! The BreakZONE sponsors competitive leagues, on-site skills classes, and open play in a variety of activities. An expanded line-up includes pool tables, bowling lanes, table tennis, foosball, DDR, and video games. Students, faculty, staff, and guests can enjoy testing their skills while relaxing with friends in an alcohol-free, club-like atmosphere. Check out the new EndZONE Lounge in BreakZONE. BreakZONE also sells snacks and beverages. The recreation center sponsors competitive leagues, on-site skills classes, and open play in a variety of activities. Get in the ZONE!

## STUDENT CENTERS

- **Squires** (located off Alumni Mall) and **Johnston Student Centers** (located behind Burruss Hall) are hubs of activity for the university community. They serve as formal and informal meeting places for students, student organizations, and the larger university community. Facilities include meeting rooms, conference rooms, ballrooms, and theaters. Plenty of comfortable space welcomes

students. Services such as banking and ATMs can be found in these student centers, as well as a variety of dining options and a student printing center. Many departments call Squires Student Center home. We house Multicultural Programs and Services, the music department, student media, student organization offices, the Black Cultural Center, and Legal Services. Students, faculty, staff, and guests are free to use Squires or Johnston, to meet with friends, study, attend activities and events, or just hang out.

## Student Health Services and Insurance

### University Student Health Services

University Student Health Services provides general ambulatory health care to students throughout the year. Students who have paid their health fee (included as part of the university's comprehensive fee) and submitted a health history form are eligible for services. A team of physicians, nurse practitioners, physician assistants, certified college health nurses, and licensed practical nurses manages most common illnesses and injuries. X-ray, laboratory, and pharmacy services are available on site.

### Student Medical Insurance Coverage

The university has contracted with an insurance carrier to offer group health coverage for all full-time students at Virginia Tech. For details on levels of coverage and specific limitations, please contact the Student Medical Insurance office at 540/ 231-6226. Medical insurance is mandatory for all international students with F-1 or J-1 visas at a minimum of \$50,000 accident and sickness coverage. Medical insurance is mandatory for all College of Veterinary Medicine students at a minimum of \$100,000 accident and sickness coverage. All international students must provide written verification from their insurer that they have equal or better coverage meeting the minimums as set by the University (as outlined on the waiver form and mailed with insurance packets), or they must purchase the university-sponsored plan or another student health insurance plan meeting or exceeding the University outlined minimum levels. Review of insurance policies and completion of the waiver form must be done by the students insurer at the students request. Once the waiver is fully completed by the students insurer the university will determine if the insurance coverage meets the outlined minimum requirements.

### Student Health History

Each student entering Virginia Tech must furnish a health history form, completed by a home physician, for the University Student Health Services. The form will be available online to applicants who accept the offer of admission. Failure to meet Health Services standards may result in dismissal from the university. Information is available at <http://www.healthcenter.vt.edu>.

[TOP](#)

## University at a Glance

Since its founding as a land-grant college in 1872, Virginia Tech has grown to an enrollment of about 30,000. With approximately 200 degree programs and close to \$400 million in research expenditures each year, Virginia Tech offers the widest range of degree choices in Virginia and is the state's leading research institution.

The university offers 65 bachelor's degree programs through its seven undergraduate academic colleges: the College of Agriculture and Life Sciences, the College of Architecture and Urban Studies, the Pamplin College of Business, the College of Engineering, the College of Liberal Arts and Human Sciences, the College of Natural Resources, and the College of Science. On the postgraduate level, the university offers about 150 master's and doctoral degree programs through the Graduate School and the Virginia-Maryland Regional College of Veterinary Medicine.

Undergraduates study under the tutelage of the best minds of the university with about 90 percent of lecture classes taught by university faculty members, not part-time instructors or graduate students. Faculty members and students, including undergraduates, are also involved in more than 3,500 research projects in fields ranging from biotechnology to urban planning.

As a leading research institution, it's not surprising that the university has become a world-class leader in computing, information, instructional, and communications technology. That technology is permeating just about every aspect of the university, including its instruction, research, and outreach activities. It is dramatically changing how the university operates, how it teaches, how its students learn, and the reach and impact it has around the state, nation, and world.

## University Exemplary Departments

University Exemplary Department Awards recognize the work of departments that maintain, through collaborative efforts of dedicated colleagues, exemplary teaching and learning environments for students and faculty.

## University Facilities

Virginia Tech has more than 125 campus buildings, research laboratories, the Corporate Research Center, an airport, 2,600-acre main campus in Blacksburg, and a 1,700-acre research farm in Montgomery County.

Among the university's major on-campus facilities are: Carol M. Newman Library, with over 2 million volumes; The Inn at Virginia Tech and Skelton Conference Center offers conference space, ballroom and 147 hotel rooms and suites, Cassell Coliseum (seating 10,000); Lane Stadium (seating 63,459); and a communications network that provides voice, video, and computer data transmission to offices, classrooms, laboratories, and dormitory rooms; a teleport of satellite dishes for receiving and transmitting; and a computing and communications complex providing the university community with access to information systems and resources worldwide. Adjacent to campus is the Virginia Tech Corporate Research Center, which employs about 2,200 and offers businesses the opportunity to establish close working relationships with the university.

Major off-campus facilities include: the Center for European Studies and Architecture in Switzerland; the Virginia Tech/University of Virginia Northern Virginia Center in Falls Church; the Virginia Tech Roanoke Center; the Hotel Roanoke and Conference Center; public radio station WVTF in Roanoke; the Marion duPont Scott Equine Medical Center in Leesburg; the Washington-Alexandria Center of the College of Architecture and Urban Studies; a dozen agricultural experiment stations; and six 4-H centers throughout the state.

[TOP](#)

## University Libraries

The University Libraries consist of the Carol M. Newman Library and three branches: Art and Architecture, Veterinary Medicine, and the Resource Service Center located in Falls Church, Virginia. Their online services are available 24/7.

The University Libraries belong to the Association of Research Libraries and are the innovators of numerous systems and procedures in use in many other libraries. They hold over 2.2 million bound volumes; 6.2 million microforms, 25,000 videos, films, cassettes and recordings; 7,000 print journals; and 136,000 maps. They provide access to over 23,000 electronic journals and 61,000 electronic books.

The University Libraries' home page is your entry point to the whole range of library services and resources. From on- or off-campus, library users can ask reference questions, initiate many transactions including Interlibrary Loan requests, access Addison (the on-line catalog) or over 200 of online databases in all disciplines, and access a wealth of online journals and other full-text resources.

Each of the libraries has an Information/Help desk staffed by people who can help you locate and use resources appropriate for your

information needs. Each academic department has its assigned librarian who knows the discipline and its literature and has experience in helping students. Getting to know this person early on is an important step towards enjoying success in the library.

The Special Collections Department houses major research collections including the Archives of American Aerospace Exploration, the International Archive of Women in Architecture, Railroad Archives, and the Culinary History Collection. In addition there are a large number of collections related to the Civil War.

For users with disabilities, there is a Special Services Room in Newman Library equipped with adaptive software and hardware.

For additional information on what is available, check out <http://www.lib.vt.edu/>, come by for a self-guided tour, or stop by one of the Information/Help desks.

## Academic Credentials

Academic preparation for Virginia Tech is best achieved by continued formal study of academic or college preparatory subjects. Consequently, it is recommended that required and elective academic units be evenly distributed throughout the high school years. Specifically, it is recommended that a minimum of seven (7) academic units be completed during the last two years of high school with at least three (3) academic units completed each year in the most rigorous academic programs available.

Each application is evaluated holistically. Primary criteria are: rigor of academic program, grades in academic courses, and standardized test (SAT or ACT) performance. Other criteria include alumni of Virginia Tech pipeline or TRiO program participation, special talents, first-generation college attendee, interest in the Virginia Tech Corps of Cadets, legacy, leadership and service, major, ethnicity, residency, disciplinary record, and responses to personal statements and (optional) guidance counselor reference. (While letters of recommendation are not required, if an applicant chooses to send one letter of recommendation, it must accompany the high school transcript.) For the 2012 fall semester, those offered admission had a middle 50th percentile of GPAs of 3.75-4.22) and a middle 50th percentile of combined SATs (critical reading and math) of 1160-1340. Competitive freshman applicants will have A/B+ grades in a rigorous curriculum and strong SAT or ACT scores. Students who opt to take only the ACT also should take the ACT writing test.

Students who intend to compete in intercollegiate athletics are also required to meet all NCAA and ACC requirements for admission.

Prospective music students must schedule an audition with the music department. Applicants who wish to request an audition should contact the department head by January 1 of the senior year in high school.

## Undergraduate Admission

Prospective students and their families are welcome to visit the campus any time the university is in session. The Office of Undergraduate Admissions is open Monday-Friday from 8:00 a.m. to 5:00 p.m. and on many Saturdays from 8:30 a.m. to noon. Admission information sessions and student-led walking tours are offered regularly; reservations should be made in the 'Visit Virginia Tech' section at [www.admiss.vt.edu](http://www.admiss.vt.edu) for up-to-date schedule information. Virginia Tech neither requires nor schedules personal interviews for undergraduate admission.

Information on undergraduate admission may be obtained by contacting:

Office of Undergraduate Admissions

Virginia Tech  
Blacksburg VA 24061

**Phone:** 540/231-6267

**Fax:** 540/231-3242

**E-mail:** [vtadmiss@vt.edu](mailto:vtadmiss@vt.edu)

**Web:** <http://www.admiss.vt.edu>

## Admission, Freshman Process

When applying for admission as a freshman, the applicant must send the following materials to the Office of Undergraduate Admissions prior to the above deadlines:

1. Official application and application fee (non-refundable): \$60 for freshmen, transfer, and non-degree students; \$70 for international

students.

**Please note:** we expect students to apply online at [www.admiss.vt.edu](http://www.admiss.vt.edu).

2. An official or unofficial copy of the secondary school record (transcript), including grades on all work through the junior year.
3. A list of the courses in which the applicant is, or will be, enrolled as a senior. The applicant's record through the first semester of the senior year is also reviewed in the freshman admissions process. Mid-year grade reports should be sent to the Office of Undergraduate Admissions as soon as available.
4. Official scores on the SAT or the ACT.
5. Students who are homeschooled or graduating from a non-accredited high school are encouraged to present either two SAT Subject Area test scores in math and a second area of study to be chosen by the applicant OR grades in two community college courses including one math course
6. Discharge certificate (DD214) if the applicant is a veteran.

NOTE: Applicants are expected to create guest account access to their online status page to monitor receipt of required supplemental materials, as instructed by e-mail after submitting their applications.

An **Early Decision Option** is available for students with strong qualifications who are committed to attend Virginia Tech. Those interested in Early Decision must choose that option on the application form and submit all required credentials by November 1. All Early Decision applicants are notified of their admission status by December 15. Early Decision applicants may be offered admission, deferred to the regular applicant pool, or denied admission. (Students denied admission under Early Decision are no longer admissible to Virginia Tech and should not reapply for Regular Decision for the same term.) Applicants deferred to the regular decision pool will receive unbiased consideration during this admission process. Early Decision is a binding agreement in which applicants agree to apply only to Virginia Tech under an Early Decision option and, if offered admission, submit the matriculation deposit by January 15. This does not mean that Early Decision applicants cannot apply to other institutions as regular-decision applicants, but rather that Virginia Tech is their first choice and, if offered admission under Early Decision, they will withdraw applications to other institutions, and accept the Virginia Tech offer.

Freshman applicants applying for Regular Decision must submit a completed application by January 15 and will receive a notification of the admission decision by April 1. If offered admission, the applicant will receive an official offer letter, instructions to apply online for housing, and instructions to download the state-required health history form. Virginia Tech subscribes to the National Candidate's Reply Date of May 1 for freshmen offered admission for the fall semester.

## Admission, International Applicants Process (Undergraduate)

International applicants for undergraduate admission are generally considered out-of-state students for tuition purposes and should apply using the Application for International Admission. International student applicants must meet all freshman or transfer requirements, as previously outlined. International freshman applicants must submit SAT or ACT scores. In addition, international students whose native language is not English must document proficiency in the English language by submitting a TOEFL (Test of English as a Foreign Language) score or IELTS (International English Language Testing System) score. Official copies of all scores must be submitted to the Office of Undergraduate Admissions.

The TOEFL or IELTS is required of all applicants who are not native speakers of English, in addition to all foreign students with visas, except those raised or schooled in Australia, Canada, Great Britain, Ireland, Jamaica, or other countries in which English is the language of instruction. A TOEFL score of at least 550 on the paper-based TOEFL test, at least 207 on the computer-based TOEFL, or a score of 80 (with no subscore below 16) on the Internet-based test is required. Students taking the IELTS must obtain a score of at least 6.5 to be considered for admission to Virginia Tech. Achieving the minimum score is no guarantee of admission. Transfer applicants who have completed two semesters or terms of a non-ESL English composition course with above-average grades at an accredited U.S.-based college or university are not required to submit TOEFL or IELTS scores.

Non-English transcripts and documents must be submitted in their original form, accompanied by a certified English translation. Unofficial documents and documents without accompanying English translations will not be accepted.

International transfer students must submit a syllabus of university study. This description of each course or subject studied (including textbook used and author) must be submitted in English or accompanied by a certified English translation of the syllabus. Applications without this information cannot be considered. All university-level work completed outside the United States must be evaluated by a professional educational credential evaluation service. (A listing of credential evaluators is linked on the online international application.) No financial aid is available for international students at the undergraduate level. All undergraduate international applicants must certify that they have sufficient funds to pay for their education at Virginia Tech prior to being issued an I-20 or IAP-66.

All international students holding F-1 and J-1 visas must purchase health and accident insurance.

The [Cranwell International Center](#) provides a full range of services to international students at Virginia Tech. Such services include an orientation program especially designed to meet the needs of new international students, as well as immigration counseling and counseling for personal and financial problems. The center also coordinates a variety of cross-cultural programs designed to facilitate interaction between American and international students.

## Admission and Applying as a Non-Degree-Seeking Student (Undergraduate)

Virginia Tech makes every effort to provide educational opportunities to individuals who are not seeking a degree from the university, but who wish to continue their education by taking courses at Virginia Tech for college credit or, in some cases, degree credit. Such students include, but are not limited to, highly qualified high school juniors, students enrolled in other colleges or universities, and senior citizens. Non-degree applicants must be in good standing from all previously attended educational institutions with no serious disciplinary infractions. Students will not be competitive for admission if their most recent work is below a 2.0 or their cumulative GPA is below a 2.0.

Students who enroll at Virginia Tech under this program may not be considered candidates for degrees unless they apply formally for regular undergraduate or graduate admission. At that time, minimum requirements must be met and the applicant's academic and disciplinary record at Virginia Tech and all other colleges and universities attended would be reviewed within the context of the current competition for regular admission.

### Applying as a Non-Degree-Seeking Student

When applying as a non-degree-seeking student, the applicant must send the following materials to the admissions office:

1. Official application for admission as a non-degree-seeking student, plus a \$60 application fee (non-refundable). (Please note: We expect students to apply online at [www.admiss.vt.edu](http://www.admiss.vt.edu).) Summer-only students should apply at [www.summer.vt.edu](http://www.summer.vt.edu).
2. While test scores normally are not required for non-degree-seeking students, they are required of high school students. High school students must be at the junior level or beyond, rank in the top 10 percent of their class with SAT scores of at least 1300 (minimum 620 critical reading, 600 math), and have written permission from a high school official to take a specific class. Such students cannot take a course that duplicates one offered at their high school.
3. A letter explaining the purpose of attending Virginia Tech as a non-degree-seeking student. In some cases, the Admissions Committee may request an interview.
4. Unofficial transcripts from all colleges and/or universities attended.

Non-degree seeking students may apply online at [www.admiss.vt.edu](http://www.admiss.vt.edu). The application should be submitted by the published deadline for the term selected (April 15 for Summer Session I, June 1 for Summer Session II, August 1 for Fall), as noted at [http://www.admiss.vt.edu/apply/non\\_degree/dates\\_deadlines.php](http://www.admiss.vt.edu/apply/non_degree/dates_deadlines.php). If accepted, the applicant will receive an official notice of admission via e-mail along with other related forms.

### Restrictions on Non-Degree-Seeking Students

1. Students who have been denied admission to Virginia Tech as freshmen or transfer students for the same term will not be eligible for reconsideration as non-degree-seeking students.
2. Non-degree-seeking students will be able to register on a space-available basis only. Until the deadline for adding classes, such students may be required to drop a class if the number of degree-seeking students exceeds the number of available spaces in a particular class.
3. Non-degree-seeking students will be permitted to attempt up to 30 hours at Virginia Tech, not to exceed 11 hours in any one term during the academic year or 5 hours in either summer school term.
4. Non-degree-seeking students are required to maintain an overall GPA of at least 2.0 for continued enrollment.
5. Non-degree-seeking students are not eligible for financial aid, scholarships or on-campus housing.
6. Students who have previously been enrolled at Virginia Tech may not reapply as non-degree-seeking students. Former students who left the university in good standing may register for classes through Hokie SPA (<http://www.hokiespa.vt.edu>).

### Admission (Undergraduate), Transfer Process

Admission is offered on a competitive basis to transfer applicants with the strongest academic records, as long as space is available in their chosen fields of study.

Competitive applicants have a GPA of 3.0 or better. In majors where applications exceed available space, the competitive GPA will be considerably higher. The majors in the School of Design, which include architecture, industrial design, interior design, and landscape architecture, are not available for transfer applicants. The most important factors considered for admission are: completion or substantial progress toward completing prerequisite courses -- particularly freshman English, math and science appropriate for the intended major; and overall GPA in college course work.

Applicants from accredited colleges and universities, including applicants from Virginia community colleges who have completed two full academic years and have received an associate's degree in the University Parallel College/Transfer Program, must (1) have completed all entrance requirements, or their equivalents, in their college developmental program; (2) have a minimum GPA of "C" (2.0 on a 4.0 scale) in all previous college work attempted; and (3) be in good standing with all colleges or universities attended. The applicant's overall grade point average and the quality of the student's former academic program are critical factors in admissions considerations. Most transfer applicants

who are offered admission have a minimum GPA of 3.0 (on a 4.0 scale). Prospective applicants from the Virginia Community College System will find information about guaranteed admissions agreements at <http://www.admiss.vt.edu/apply/transfer/articulation.php>.

Transfer applicants must send the following application materials to the Office of Undergraduate Admissions:

1. Official application and application fee (non-refundable): \$60 for freshmen, transfer, and non-degree students; \$70 for international students.

**Please note:** we expect students to apply online at [www.admiss.vt.edu](http://www.admiss.vt.edu).

2. Unofficial or official transcripts covering all college-level course work, through the last term enrolled. (To be cleared for final admission, applicants who have accepted the offer of admission must provide the admissions office with final official transcripts from all colleges previously attended.)
3. A list of the courses in which the applicant is currently enrolled.
4. Official and complete secondary school record, showing all grades and date of graduation. Transfer students must also meet minimum requirements set forth for high school students.
5. Discharge certificate (DD214) if the applicant is a veteran.

NOTE: Applicants are expected to create guest account access to their online status page to monitor receipt of required supplemental materials, as instructed by e-mail after submitting their applications.

Completed applications are considered and decisions are made by the Admissions Committee. If offered admission, the applicant will receive an official notice of admission and related forms.

Transfer applications for summer/fall admission are due February 15, and will receive notification of the admissions decision by May 1. Students offered admission must respond to the offer by June 1. If space is available, transfer applications for spring admission are due October 1, decisions are mailed by November 15, and responses are due December 15.

## Advanced Placement

Through Advanced Placement examinations administered in May of each year by the College Entrance Examination Board, students receiving required scores may be considered for advanced placement credit in certain subjects in which they show proficiency. Final determination of credit will be made after the test results have been evaluated by the university. Students must have scores sent directly to the Office of the University Registrar at Virginia Tech (school code 5859) from the College Entrance Examination Board. If scores were not directed to the University Registrar at the time of the examination, contact the College Board at (888) 308-0013.

Credits allowed for advanced placement are shown as transfer hours on Hokie SPA. These credits, not to exceed 38 semester hours, are counted as hours passed when considering academic eligibility. A student may decline advanced credit only during the first semester of enrollment at Virginia Tech. Refer to the Office of the University Registrar's website at [http://www.registrar.vt.edu/registration/tests\\_for\\_credit.php](http://www.registrar.vt.edu/registration/tests_for_credit.php) for information and to view the AP Credit Table. Questions about Advanced Placement credit should be directed to the Office of the University Registrar at [registrar@vt.edu](mailto:registrar@vt.edu).

[Advanced Placement Credit Table](#)

## Advanced Standing

Advanced standing refers to an arrangement that permits a student to be placed in a course without having completed the normal prerequisites. Credit may be awarded for specific courses based upon grades achieved in specific external tests and/or achievements.

Advanced standing without credit will be allowed for satisfactory completion of one to five years of study in a foreign language in a secondary school.

Advanced standing with credit will be allowed for exceptional performances on certain tests and/or achievements in mathematics, English, the International Baccalaureate program, or the terminal year at selected international secondary schools. Credit will not exceed 38 semester hours.

Credit by examination, not to exceed 12 semester hours, will be allowed by special examination where exceptional command of a subject is demonstrated.

Advanced Standing based on completion of any College-level Examination Program (CLEP) exams is granted at the discretion of the individual departments.

## Applying to Graduate School

Students interested in working toward an advanced degree at Virginia Tech should contact the Graduate School for an application (<http://www.graduateschool.vt.edu>).

### Undergraduate students enrolling in Graduate Programs or courses

Virginia Tech offers the opportunity to outstanding undergraduate students (Seniors/Juniors) nearing the end of their bachelor's degree program to enroll and receive credit for coursework taken to apply toward a future graduate program. Seniors with a GPA of 3.0 or better may apply to be admitted to the Dual Student Status for their last semester to take graduate-level courses. Juniors with a GPA of 3.3 or better may apply for admission in the Accelerated Undergraduate/Graduate Degree Program to take graduate courses during the senior year. Please check with your department to check for specific admissions requirements. Information about these programs is available on the Graduate School website (<http://www.graduateschool.vt.edu>)

### Taking graduate-level courses

Undergraduate students wishing to enroll in graduate-level courses may do so. You should review any restrictions listed for the course in the Timetable of classes and speak with the faculty member teaching the course to obtain permission. Please note that enrollment in a graduate-level course will not allow you to receive graduate credit for the course if you become a master's or doctoral degree-seeking student without first being admitted to either the Dual or Accelerated Undergraduate/Graduate Degree Program.

[TOP](#)

## Applying to Summer Sessions

Virginia Tech offers two summer sessions of approximately six weeks each. Credit courses on other than the regular time schedule, including intensive courses for teachers, are also offered. The summer sessions program features a comprehensive offering of courses and special programs, including online courses, study abroad programs, and a few undergraduate courses in Northern Virginia.

Enrolled Virginia Tech students, as well as visiting students, are invited to participate in summer sessions. Enrolled students follow the same registration procedure for summer courses as they would for fall and spring. New or visiting students may enroll in summer sessions in either a degree or non-degree status. Such students should visit [www.summer.vt.edu](http://www.summer.vt.edu) for information. Entering freshmen and transfer students should contact the Office of Undergraduate Admissions to be cleared for summer entry. Freshman applicants wishing to change term of entry to summer should e-mail [appchange@vt.edu](mailto:appchange@vt.edu). Entering graduate students should contact the [Graduate School](#).

On-campus housing is available in the summer. For more information, contact 540-231-6207 or [housing@vt.edu](mailto:housing@vt.edu), or go to [www.housing.vt.edu](http://www.housing.vt.edu).

Summer students have access to most university academic, athletic, and recreational facilities and programs, including the Horticulture Gardens and miles of cycling and walking trails. In addition, the [Summer Arts Festival](#) provides free movies, concerts, and exhibits.

Additional information is available at [www.summer.vt.edu](http://www.summer.vt.edu).

[TOP](#)

## Entrance Tests

Freshman applicants are required to take the SAT or ACT. (Students who opt to take only the ACT also should take the ACT writing test.) The SAT or ACT should be taken by the December test date of the senior year in high school or earlier, as scores are considered in the admissions application process. Information on these tests may be obtained from high school guidance directors or principals, or by writing directly to the College Entrance Examination Board, Princeton, New Jersey, or the ACT program in Iowa City, Iowa. The tests are given at centers in Virginia, in all other states, and in many foreign countries. The applicant should arrange to have all test scores sent directly to the admissions office by the testing agency or high school. Virginia Tech's CEEB number for reporting test scores is 5859. The ACT code is 4420.

Students who are homeschooled or graduating from a non-accredited high school are encouraged to also present either two SAT Subject Area test scores in math and a second area of study to be chosen by the applicant OR grades in two community college courses including one math course.

International applicants whose native language is not English, and American applicants who are English-speaking but whose native language is not English also are required to take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) test.

[TOP](#)

## Equal Opportunity/Affirmative Action Statement

Virginia Tech does not discriminate against employees, students, or applicants on the basis of age, color, disability, gender, national origin, political affiliation, race, religion, sexual orientation or veteran status. Discrimination or harassment on any of these bases is prohibited by [Policy 1025](#), "Anti-Discrimination and Harassment Prevention Policy."

The university is subject to Titles VI and VII of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Sections 503 and 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, the Age Discrimination in Employment Act, the Vietnam Era Veterans' Readjustment Assistant Act of 1974, the Federal Executive Order 11246, Virginia's State Executive Order Number Two, and all other rules and regulations that are applicable.

Those having questions or concerns about Policy 1025, any of these regulations, or related issues should contact:

Virginia Tech Human Resources; Office for Equity and Access; South Gate Center, Ste. 179 (0319); Blacksburg, VA 24061.  
(540) 231-9331

[TOP](#)

## International Baccalaureate

Virginia Tech recognizes the International Baccalaureate (IB) diploma or individual International Baccalaureate courses with advanced standing if the student scores at least a four on the International Baccalaureate higher-level examinations. The university encourages completion of the IB diploma. Students must have scores sent directly to the Office of the University Registrar at Virginia Tech from the IBO Board. If scores were not directed to the University Registrar upon completion of the diploma or certificate, refer to the IBO website at <http://www.ibo.org/ibna/graduates> for information on how to have the results sent.

The additional value of the complete IB diploma is recognized in evaluating a student's record for admission and for advanced standing with credits. Subsidiary level courses are considered for advanced standing only for students who complete the IB diploma. Up to 38 semester credit hours may be granted for those earning the IB diploma, and up to 30 semester credit hours for those without the IB diploma. Credits granted for IB courses are shown as transfer hours on Hokie SPA. These credits are counted as hours passed when considering academic eligibility.

Refer to the Office of the University Registrar's website at [http://www.registrar.vt.edu/registration/tests\\_for\\_credit.php](http://www.registrar.vt.edu/registration/tests_for_credit.php) for information and to view the IB Credit Table. Questions about IB credit should be directed to the Office of the University Registrar at [registrar@vt.edu](mailto:registrar@vt.edu).

[TOP](#)

## Orientation

**Freshmen:** All new freshmen and their parents attend a two-day summer orientation program. Students who are entering Virginia Tech in the summer or fall will receive summer orientation information shortly after they accept Virginia Tech's offer of admission.

This summer orientation program, conducted by the Student Life Office, provides students and parents with an introduction to life at Virginia Tech. Students are required (and parents are invited) to spend the night in a residence hall, eat in campus dining halls, and participate in a wide range of programs concerning campus life. During orientation freshmen will meet with college or department representatives and register for fall semester classes.

All new students also are invited to participate in HOKIE HI activities (coordinated by Student Life) scheduled during the first several days of fall semester that includes a Welcome Back Picnic in Lane Stadium the day before classes begin. The week before classes begin in the fall the corps holds an additional one-week orientation for freshmen cadets.

Freshman students who will enter Virginia Tech in the spring semester rather than in the fall are invited to attend an orientation program in January before the beginning of spring classes.

All new transfer students attend a one-day summer orientation program in July. Information is available at [www.orientation.nsp.vt.edu](http://www.orientation.nsp.vt.edu).

## Requirements, Computer

Students are required to have their own personal computer. The university annually establishes baseline specifications for each new entering class. Transfer students are subject to the requirement that was in place for students at the same class level into which they enter. Broad specifications are announced by mid-May for students entering in the fall of the next academic year. Some departments and colleges recommend a specific configuration from among the options outlined by the university. Virginia Tech requires that entering students have a laptop or tablet computer and strongly recommends that entering students obtain a computer that meets (or exceeds) the university general

specifications. If you have declared a major, check the college and department specifications. Complete information about the computer requirement can be found online at [www.compreq.vt.edu](http://www.compreq.vt.edu).

## Requirements, Minimum Freshman Entrance

A student must complete a minimum of 18 units before enrolling at Virginia Tech. One unit is equal to one academic year of study in a selected course. Students who will graduate from a program other than an accredited high school program should check the 'What do we look for' section at [www.admiss.vt.edu](http://www.admiss.vt.edu), and contact the Office of Undergraduate Admissions for additional information.

At least 14 of the 18 units must be academic or college preparatory units. Academic or college preparatory units are courses in English, language studies, mathematics, natural sciences, social sciences, and fine arts. They must be distributed as indicated below. At least a "C" average (2.0 on a 4.0 scale) is required in academic courses for the student to be considered for admission. However, because admission to Virginia Tech is competitive, those offered admission have B+/A averages.

Of the 18 required units, the following minimums must be met:

- **English** - 4 units, one in each year of high school.
- **Math** - 3 units, including algebra I, algebra II and geometry. Admission preference will be given to those who complete math beyond algebra II. A fourth unit of math is required for engineering, building construction, chemistry, computer science, mathematics, physics, and statistics majors. A fourth unit of math is strongly recommended for Pamplin College of Business majors. The fourth unit of math must include one-half unit of trigonometry and one-half unit of advanced algebra or higher mathematics. A fifth unit of math (e.g., calculus) is preferred for engineering majors.
- **Social Science** - 2 units; 1 unit must be in history.
- **Laboratory Science** - 2 units; units must be chosen from biology, chemistry, or physics. 3 units (including chemistry and physics) are recommended for engineering and for all science-related majors.
- **Additional Academic Units** - 3 units from college preparatory courses. These may be electively chosen from English, natural sciences, social sciences, history, mathematics, computer science, language studies, and fine arts. These courses must be comparable in content and purpose to other required academic or college preparatory courses.
- The remaining 4 units may be selected from any course offerings for which the high school grants credit toward graduation.

By the time they graduate from the university, students must meet a language study requirement. The minimum requirement may be met in high school by completing 2 units of a single foreign or classical language. Some majors in the College of Liberal Arts and Human Sciences and the College of Science may require 3 units. The requirement also may be met after admission by one of the following:

- Earning 6 semester hours of college-level foreign or classical language credit.
- Receiving credit by examination for a foreign or classical language.

Such credits are in addition to that number normally required for graduation.

Virginia Tech reserves the right to deny admission to students who have been dismissed or suspended for academic or disciplinary reasons or to those convicted of a felony or a serious misdemeanor impacting the safety of the university community.

[TOP](#)

## Student Health History

Each student entering Virginia Tech must furnish a health history form, completed by a home physician, for the University Student Health Services. The form will be available online to applicants who accept the offer of admission. Failure to meet Health Services standards may result in dismissal from the university. Information is available at <http://www.healthcenter.vt.edu>.

## Transfer Student Credentials, Evaluation of

Official final academic transcripts from all colleges previously attended should be submitted to the Office of Undergraduate Admissions. Courses from another institution in which a grade of "C-" or lower was earned, and courses taken on a pass/fail or audit basis, are not acceptable for transfer credit. Grades in transfer courses do not transfer or appear on a student's record at Virginia Tech, and are not included in a student's Virginia Tech GPA computation. Only grades of "C" or higher in courses consistent with those offered at Virginia Tech are certified for transfer credit. Credit will be awarded based on Virginia Tech policies.

Courses for which a student received credit by exam, Advanced Placement (AP) credit, or credit for life experiences at another university are not transferable. AP, IB and CLEP scores should be sent directly to the University Registrar at Virginia Tech from the testing services; credit cannot be awarded from high school transcripts. Refer to the Office of the University Registrar's website at [http://www.registrar.vt.edu/registration/tests\\_for\\_credit.php](http://www.registrar.vt.edu/registration/tests_for_credit.php) for contact information for testing services and to view the AP, IB, CLEP Credit Tables.

No more than 50 percent of the credits required for graduation from Virginia Tech may be transferred from two-year colleges. To receive transfer credit, official academic transcripts from all colleges previously attended should be received in the Office of the University Registrar no later than the end of the first term of the student's enrollment at Virginia Tech. Class standing will be based upon the number of credits designated as acceptable for meeting graduation requirements. All transfer credits are used in the computation of academic eligibility. An online preliminary evaluation of transfer credit is made available to transfer applicants who have been offered admission.

International transfer students are required to submit additional documentation. For a list of required documentation see <http://www.admiss.vt.edu/apply/international/checklist.php>.

Virginia Tech reserves the right to deny admission to students who have been dismissed or suspended for academic or disciplinary reasons or to those convicted of a felony or a serious misdemeanor impacting the safety of the University community.

## **Transfer Policy of Virginia Community College Students**

Per *State Policy on Transfer*, students who take their entire course work (native Virginia Community College or Richard Bland students) toward the baccalaureate degree by enrolling in transfer programs at a Virginia Community College or Richard Bland College, who graduate with associate degrees based upon a baccalaureate-oriented sequence of courses, and who are offered admission to Virginia Tech will be granted junior level status upon admission. Additionally, these students will have fulfilled the requirements of the Curriculum for Liberal Education. However, it may take such students longer than two years to complete the baccalaureate degree because of major prerequisites and other circumstances or requirements. Non-native students are those students who do not begin their college work at a Virginia Community College, or transfer credits to the Virginia Community College to complete the transfer associate degree.

Admission preference shall be given to transfer students who have completed an A.A., A.S., or A.A.S. (Associate in Arts and Sciences) at the Virginia Community College System or Richard Bland College. While some courses from the Associate of Applied Science degree from a Virginia Community College or Richard Bland College may transfer to Virginia Tech, the Associate of Applied Science degree does not transfer. Transfer students shall have the same opportunities as other students in areas of residence and dining programs, registration, and scholarships and financial aid.

## Academic Common Market Programs

Through a cooperative tuition-reduction agreement among Southern Regional Education Board (SREB) states, students from participating states may be able to arrange a waiver of out-of-state tuition charges in order to pursue a degree program at Virginia Tech that is not offered by a public institution in the student's home state. Students are eligible for in-state tuition provided that they have been officially accepted into the ACM major, certified by their home state higher education commission, and are making progress toward their ACM program. Students must maintain continuous full-time enrollment and progress toward their approved ACM program for continued eligibility.

The programs covered by the Academic Common Market are subject to change without notice. It is the responsibility of the student to inquire about eligibility. Program availability varies by state. Contact the Office of Undergraduate Admissions for a current listing. Currently Virginia Tech offers programs not available in public institutions in SREB participating states of Alabama, Delaware, Georgia, Kentucky, Louisiana, Maryland, Mississippi, South Carolina, Tennessee, and West Virginia.

Students are responsible for contacting the Academic Common Market Coordinator in their state's higher education office. The state coordinator can assist students in certifying eligibility and providing information regarding eligibility for in-state tuition at Virginia Tech. For additional information, and a list of qualifying programs, please visit [http://www.registrar.vt.edu/records/common\\_market.php](http://www.registrar.vt.edu/records/common_market.php).

## Auditing

Students are assessed the same rate for tuition and fees for auditing courses as for courses taken for credit.

## Billing Statements (E-bill)

E-Bills are processed monthly on the 15th of each month (if the 15th of the month occurs on a weekend, e-bills are processed on the Friday before the 15th). Payment is due by the 10th of the following month. (If the 10th of the month occurs on a weekend, payment will be due the following Monday.)

The initial e-bill for fall semester 2012 charges will be processed July 15, 2012 with an August 10, 2012 due date. Changes in registration, dining plans, or final room assignments may result in additional charges after e-bill is processed. The current account status is available online in the e-bill portal.

E-bills for spring semester 2013 charges will be processed December 15, 2012 with a January 10, 2013 due date.

A monthly finance charge will be assessed on unpaid prior term charges.

## Budget Tuition Plan

Virginia Tech's Budget Tuition Plan (BTP) offers a convenient method for planning and budgeting tuition, fees, room, and board. The BTP can cover all or part of the fall and/or spring semester institutional charges. This plan provides the opportunity for the student to remit payment in four scheduled bank debits per semester from a checking account. The only cost for this service is a non-refundable application fee that is due with the application. Students can join the BTP online through Hokie SPA or download the BTP Brochure & application from our website. Visit [www.bursar.vt.edu](http://www.bursar.vt.edu) for additional information.

## Bursar, Office of University

The Office of the University Bursar is responsible for the billing of tuition, fees, housing, meal and many other student and related charges.

Billing statements are electronically generated monthly for new account activity and any previous balance. The e-bill can be viewed on the student portal Hokie SPA and payment can be made by e-check or by credit card. Payment can also be made by mail or in person at the Bursar Office in 150 Student Services Building.

Students may authorize parents or others as payers on their e-bill account. Unless revoked by the student, the authorized payer receives the e-bill notification monthly and is able to view the account and make payments electronically to the student's account.

Release of Financial Information to a third party such as parent(s) and/or guardian(s) requires student authorization under the Family Educational Rights and Privacy Act (FERPA). The FERPA disclosure can be done via the Hokie SPA.

**Detailed information regarding tuition and fees, payment deadlines, customer service window hours, the Budget Tuition Plan, electronic billing and payment processes, and much more can be obtained by viewing the Bursar's website <http://www.bursar.vt.edu>.**

## Collection of Past Due Receivables for Students

Any amount owed to the university including, but not limited to, tuition, fees, room, board, loans, notes receivable, and amounts due for goods and services provided is considered a receivable to the university. A receivable becomes past due if payment is not received by the payment due date. At ninety days past due, the receivable becomes delinquent.

For currently enrolled students, the primary collection tool is the placement of a "HOLD" by the Office of the University Bursar on a student's record. This "HOLD" restricts certain student activities such as the ability to add or drop classes, receive grade transcripts, register for future academic terms, and may also result in a hold on your diploma if you are a candidate for graduation. Once established, the "HOLD" remains in place until the debt is paid in full. When a student is no longer enrolled, the collection procedures utilized for other "non-student" receivables are implemented.

Individuals who do not pay all fees and charges owed are responsible, in the event of their default or the return of a check for payment of said fees and charges, to pay a penalty fee, to pay interest at the highest rate allowed by law, and for all reasonable administrative costs, collections costs, and attorney's fees incurred in the collection of funds due the University.

Addresses must be kept current and can be changed by students as needed on HokieSPA (MyVT). Non-receipt of e-bill notification is not a valid defense for non-payment; it is the responsibility of the individual who has incurred the debt to see that the debt is discharged.

For non-students, a dunning message is included on each month's statement alerting the customer to the next collection steps that will be taken. If payment is not forthcoming within the stated period, the account and all pertinent information are forwarded to an outside collection agency for further collection efforts. In addition, the account is reported to national credit bureaus, thus affecting the debtor's credit rating.

In addition to the above measures, the university also lists the account with the Virginia Department of Taxation for set-off debt collection procedures. This means that any state income tax refund or payment processed through the State Treasurer's Office to the debtor will be reduced by the amount of the receivable owed by the debtor.

## Eligibility for In-State Student Tuition Privileges

**General Information:** Eligibility for in-state tuition privileges (reduced tuition charges) is governed by §23-7.4 of the Code of Virginia. The provisions of §23-7.4 of the Code of Virginia are set forth, defined, and discussed in the [State Council of Higher Education for Virginia's Domicile Guidelines](#). SCHEV developed these Guidelines to facilitate the consideration of uniform criteria in determining domiciliary status. §23-7.4 of the Code of Virginia places the responsibility on the student for establishing by clear and convincing evidence that s/he is eligible for the in-state tuition rate. Further, the burden is on the applicant to demonstrate by clear and convincing evidence that his/her domicile is Virginia and that s/he has abandoned any prior domicile. According to SCHEV's Guidelines, clear and convincing evidence is defined as "that degree of proof that will produce a firm conviction or a firm belief as to the facts sought to be established. The evidence must justify the claim both clearly and convincingly."

**Domicile:** Domicile refers to the "present, fixed home of an individual to which he or she returns following temporary absences, and at which the individual intends to remain indefinitely. No individual may have more than one domicile at a time." Domicile cannot be initially established in Virginia unless one actually resides, in the sense of being physically present, in Virginia with domiciliary intent, which means present intent to remain indefinitely, that is, the individual has no plans or expectation to move from Virginia. Residence in Virginia for a temporary purpose or stay, even if that stay is lengthy, with present intent to return to a former state or country upon completion of such

purpose does not constitute domicile. "Mere physical presence or residency primarily for educational purposes does not confer domiciliary status." A person shall not ordinarily be able to establish domicile by performing acts which are auxiliary to fulfilling educational objectives or which are required or routinely performed by temporary residents of the Commonwealth. The university will consider many factors when determining domicile. Among them are continuous physical residence, state to which income taxes are paid, driver's license, voter registration, motor vehicle registration, employment, property ownership, sources of financial support, military records, a written offer and acceptance of employment in Virginia following graduation, and any other social or economic relationships with the Commonwealth and other jurisdictions. The presence of any or all of these factors does not automatically result in Virginia domicile. The factors used to support a claim of entitlement to in-state privileges must have existed for a minimum of one year (12 continuous months) prior to the first official day of classes.

**Reclassification:** Students may seek reclassification of their initial tuition classification, but residence or physical presence in Virginia primarily to attend the university does not entitle students to in-state tuition rates. Domicile should be established BEFORE one enters the university. Please note that if a student enters the university classified as an out-of-state student, s/he must present clear and convincing evidence to rebut the presumption that s/he is residing in the state primarily to attend school. Students seeking reclassification to in-state status must be prepared to pay the out-of-state tuition rate unless they are notified in writing that his/her status has been reclassified to in-state according to the Code of Virginia.

**Application Deadlines:** According to §23-7.4 of the Code of Virginia, changes in domiciliary status can only be granted prospectively from the date the application is received; therefore, the deadline for submission of the complete application is prior to the first day of the term/semester for which the student seeks reclassification to in-state. Retroactive changes in status are not allowed under the Code. To ensure that students have a decision before the tuition payment deadline, please submit a complete application at least 30 days prior to the tuition payment deadline as published by the Office of the University Bursar. If additional information is requested, the applicant must provide the additional information within 30 days of the date of the letter requesting the information. Tuition refunds may be given to students who paid their tuition at the out-of-state rate but were subsequently reclassified to in-state provided that the Application for Virginia In-State Tuition Rates was submitted before the first day of the term. Qualifying students should contact the Office of Student Accounts regarding eligibility for a refund.

Contact:

**New Undergraduate or Transfer Students please contact:**

Office of Undergraduate Admissions  
201 Burruss Hall, Mail Code 0202  
Blacksburg, VA 24061  
540/231-6267

**Continuing Undergraduate Students please contact:**

Office of the University Registrar  
250 Student Services Building, Mail Code 0134  
Blacksburg, VA 24061  
540/231-6252

The regulations governing domicile are determined by state law, and are therefore subject to change. The information stated herein is not intended to be a contract between a student and Virginia Tech but is provided for informational purposes only. For additional information, please visit <http://www.registrar.vt.edu/records/residency.php>.

## Enrollment Status, Full-Time

Certification of full-time student status, for most purposes, U.S. Department of Veterans Affairs (V.A.) educational benefits, Social Security benefits, loans, scholarships, and grants, is based on the following enrollment information: official undergraduate and College of Veterinary Medicine enrollment for each regular semester must be 12 or more credit hours and official graduate enrollment for each regular semester must be 9 or more credit hours. All courses must be in the A/F option, P/F option, or equivalent credit. Please note that courses taken under the audit option do not count toward the enrollment status. Participation in the Virginia Tech Cooperative Education program, National Student Exchange program, and International Student Exchange program reflects full-time enrollment. Certification of enrollment for V.A. educational benefits will reflect only those hours considered to be progress toward the degree or educational objective. Although considered to be enrolled full-time, students who participate in the Cooperative Education program are not eligible for V.A. educational benefits or federal financial aid during the terms in which they participate in the Co-Op program.

## Fees, Cooperative Education Program

Charge for each term a student is placed in industry employment while enrolled in the Cooperative Education Program.

Fall & Spring terms	\$50.00 per term
Summer terms	\$25.00 per term

## Fees, Late Payment

The late fee charge is 10% of unpaid balance up to a maximum of \$100 per term if payment is not received by the due date on the billing statement.

## Fees, Reinstatement

Classes are dropped for non-payment of past due billed charges after the tenth day of classes for fall and spring semesters. A \$75.00 reinstatement fee is assessed to students whose class registrations are cancelled due to non-payment of fees. The \$75 reinstatement fee is in addition to the late payment fee which is 10% of unpaid balance up to a maximum of \$100 per term. Students must report to the Office of the University Bursar, 150 Student Services Building, to pay charges in full and have the hold removed from their record before the academic dean can reinstate courses. Students will be provided a memo showing payment has been made to present to the academic dean when requesting reinstatement of classes.

## Fees, Tuition

Information on Tuition and Fee costs as well as costs for room and board can be viewed on the Bursar's website [Bursar's website \(www.bursar.vt.edu\)](http://www.bursar.vt.edu).

[TOP](#)

## Medical Resignations

A student resigning for medical reasons will be charged a daily tuition rate for each day enrolled.

Resignations for medical reasons must be recommended by Schiffert Health Center or Cook Counseling Center at Virginia Tech indicating the student is unable to continue in school due to medical reasons. Schiffert Health Center or Cook Counseling Center will recommend an effective date for a medical resignation. Recommendations are forwarded to the student's academic dean. It is the purview of the Academic Dean to approve the recommendation. The Academic Fee, Technology Fee, Capital Fee and Comprehensive Fees are non refundable and no reduction will be made after the first day of classes for resignations.

## Military Withdrawals

Students called into active military duty are encouraged to communicate with their advisors, instructors, and undergraduate or graduate deans to arrange "incompletes" or rescheduling of remaining work if their orders are received near the end of a term. However, if students request a withdrawal from the university, permission is granted without punitive action as well as granting a full refund of tuition and fees. This full refund is requested regardless of the date of the action of withdrawal. Procedurally, students (or their parents or guardians) are requested to provide copies of activation orders. If orders are unobtainable (in some emergency call-ups, this is possible), the University Registrar will telephone the company commander for verbal confirmation. Further, the University Registrar will serve as facilitator of this process for any advisor, instructor, or dean seeking verification of the students' military status. Students with Federal Financial Aid should be advised that full refund of tuition will result in an immediate requirement to commence repayment of aid. Students with federal financial aid are to be given the option of full or partial refund. Students are to work with their advisors and deans in requesting reinstatement to the university.

Reinstatement: All students leaving under the military withdrawal policy are entitled to reinstatement into the same program of study. Students are directed to seek advising from their advisors or academic deans. If absent more than five years, certain majors may require re-taking of specific major courses.

Defer Initial Enrollment: Students called up for active duty may defer initial enrollment (in the same major) if:

- o The student returns to Virginia Tech after a cumulative absence of not more than five years, and
- o The student provides notice of intent to return to Virginia Tech not later than three years after completion of the period of service.

## Payment Directions

The most efficient and direct method of payment is the electronic payment accessible in the e-bill system.

If paying by mail, please make the check payable to Treasurer of Virginia Tech. Print the pdf version of the e-bill and enclose the remittance advice with your check. Mail to Virginia Tech, P.O. Box 7620, Merrifield, VA 22116-7620. When mailing payment, please do not send cash.

Scholarship checks, payments made via a banking service, correspondence, and certified or express mail must be sent to the Office of the University Bursar at 150 Student Services Building, Blacksburg, VA 24061. Please include a Scholarship Reporting Form ([http://www.finaid.vt.edu/forms/documents/1213\\_SCHNOT.pdf](http://www.finaid.vt.edu/forms/documents/1213_SCHNOT.pdf)) with all scholarship checks.

# Financial Information

## Financial Aid

- [Eligibility Requirements](#)
- [Federal Title IV Programs](#)
- [Commonwealth of Virginia Programs](#)
- [Additional Information](#)

---

Virginia Tech awards financial aid to eligible students in the form of scholarships, grants, loans, and employment. The majority of financial aid is intended for fulltime students with financial need.

To apply, entering freshmen, transfer students and returning Virginia Tech students should submit the Free Application for Federal Student Aid (FAFSA) electronically at <http://www.fafsa.gov>. The Office of University Scholarships and Financial Aid's priority deadline is March 1 for the upcoming academic year.

The priority deadline applies to all financial aid programs except the Federal Pell Grant, Federal Stafford, Federal GradPLUS and Federal PLUS Loan Programs.

Applicants for scholarships and financial aid must list Virginia Tech's institutional code number 003754 on the FAFSA for the analysis of the FAFSA to be sent to the Office of University Scholarships and Financial Aid. Eligible non-citizens must submit a copy of the alien registration card or arrival departure record each year. Students must complete and submit a new FAFSA to the federal processing agency every year to be considered for financial aid at Virginia Tech.

The electronic FAFSA application is available every year after January 1. All offers of financial aid are contingent upon receipt of anticipated federal and state funds by the university. Awards may be reduced or canceled if anticipated funds are not received. Offers of financial aid are subject to full-time enrollment and the student meeting the Reasonable Academic Progress Policy requirements.

Virginia Tech administers a comprehensive scholarship and financial aid program to support the financial need of students. More than 70 percent of Virginia Tech students receive some form of financial aid.

---

## Eligibility Requirements

To be eligible to receive aid from state and federal need-based programs, an applicant must meet the following eligibility requirements: enroll or accepted for enrollment as a degree-seeking student; be a citizen or an eligible non-citizen; submit a complete FAFSA; and meet the Reasonable Academic Progress Policy for Title IV recipients. Full-time enrollment is required for the majority of federal, state, and institutional programs. Students should consult with a financial aid counselor to determine how financial aid will be reduced for less than full time enrollment.

## Federal Title IV Programs

**The FAFSA is the application for all federal financial aid programs.**

**Federal Work-Study Program.** This federal program provides employment opportunities to students with demonstrated financial need. Eligible undergraduate and graduate students are limited to 20 hours of work per week while classes are in session. All Federal Work-Study Program jobs pay at least minimum wage.

**Federal Direct Loan Program.** This federal program encompasses Federal Stafford, Grad PLUS, and Parent PLUS Loans.

- Federal Stafford Loans are long-term; low-interest loans guaranteed by the federal government for the educational expenses of eligible students enrolled at least half-time. Repayment begins six months after the student ceases at least half-time enrollment.
- Federal PLUS Loan is available to parents of undergraduate dependent students enrolled at least half-time. Parents may borrow up to the cost of attendance minus any financial aid for which the student qualifies. You must apply at [www.studentloans.gov](http://www.studentloans.gov) and a credit check is required.
- Federal Grad PLUS Loan provides additional loan funds to graduate students that have exhausted eligibility in the Federal Stafford Loan Program. You must apply at [www.studentloans.gov](http://www.studentloans.gov) and a credit check is required.

**Federal Perkins Loans.** This federal program provides long-term, low-interest loans to students with financial need. The interest rate is a fixed 5 percent. Repayment of both principal and interest begins 9 months after a student ceases to be enrolled at least half-time.

**Federal Pell Grant Program.** Federal Pell Grants are awarded to undergraduate students with high financial need. This program is intended

to provide grant support to lower income families. Students must be pursuing a first bachelor's degree to receive the Federal Pell Grant.

**Federal Supplemental Educational Opportunity Grant.** Virginia Tech awards grants from federal funds to undergraduate students with extraordinary financial need. These funds are restricted to Pell-eligible students.

## Commonwealth of Virginia Programs

**College Scholarship Assistance Program.** This need-based grant program is administered by the State Council of Higher Education for Virginia and is funded jointly by both the federal government and state resources. Recipients are selected by Virginia Tech from among eligible undergraduate Virginia residents with high levels of financial need.

**Virginia Guaranteed Assistance Program.** Grants of up to the cost of tuition and fees are awarded by Virginia Tech from funds administered by the State Council of Higher Education for Virginia. Awards are made to selected undergraduate residents of Virginia with demonstrated financial need. Entering freshman must have a 2.5 high school grade point average and continuing students must have a 2.0 for renewal.

**Commonwealth Award.** Awards are made by Virginia Tech from funds administered by the State Council of Higher Education for Virginia to Virginia residents seeking a first bachelor's degree with demonstrated financial need. Students must maintain a 2.0 GPA for renewal of this award.

**Two-Year College Transfer Grant.** The Two-Year College Transfer Grants vary in amount up to \$1,000 and are administered by the State Council of Higher Education for Virginia. These grants are for undergraduate state residents who transfer from a community college with a 3.0 Grade Point Average (GPA) after completing an Associate's Degree at a Virginia two-year public institution. Recipients must maintain a 3.0 GPA.

**The Virginia Military Survivors and Dependent Education Program.** The Virginia Military Survivors and Dependents Education Program provides tuition and fee educational assistance for a maximum of 48 months to spouses and children of military service members killed, missing in action, taken prisoner, or who became at least 90 percent disabled as a result of military service in an armed conflict. This program was formerly named the Virginia War Orphans Education Program. To be eligible for assistance, application is made to the Virginia Department of Veterans Services.

**Academic Scholarships and Grants.** Merit based scholarships are for select undergraduate students who establish outstanding academic record, including incoming freshmen through the academic department. Please contact the academic department for additional information. USFA offers the General Scholarship application through the electronic Scholarship Gateway at <http://www.finaid.vt.edu/>.

**Athletic Scholarships.** Admission and enrollment of students who are candidates for financial aid for which athletic ability is a consideration shall be conditional upon compliance with applicable regulations of the Atlantic Coast Conference and the National Collegiate Athletic Association.

**Senior Citizens' Benefits.** On a space-available basis, in accordance with Virginia law, Virginia residents 60 years of age may register for and attend courses without payment of university fees. Senior citizens also may audit courses. Details may be obtained from the Undergraduate Admissions Office.

**Veterans Affairs Educational Benefits (GI Bill).** Applicants who wish to receive VA Educational Benefits, including assistance through the Yellow Ribbon Program should contact the Office of the University Registrar or visit [www.registrar.vt.edu](http://www.registrar.vt.edu). Application information for veterans benefits may be obtained from the nearest regional office of the Veterans' Administration. Students must enroll for a minimum of 12 credits each term to receive benefits as full-time students.

# Financial Information

- Refunds
- [Policy](#)
  - [Housing and Dining](#)
  - [Tuition](#)

## Refund Policy

The student can receive refunds from the university quickly and in the most efficient manner by having the refund deposited directly to a bank account. Living expense refunds from excess financial aid will be deposited directly to the bank account provided by the student if the student has enrolled in direct deposit. The student can enroll in direct deposit online through the Hokie SPA under the University Account information menu. If the student has not provided bank account information, refund checks will be mailed to the student's permanent address listed on Hokie SPA at the time the refund is processed. Refund checks will NOT be distributed at the Bursar's Office Customer Service windows. Requests for replacement refund checks must be in writing and will not be accepted by the Bursar's Office until 14 calendar days after the date the original check was issued and mailed.

## Housing and Dining Refunds

Students holding a residence hall contract or a board plan who leave the university during the first week of class will forfeit \$100 of their residence hall fee and \$100 of their board fee. Thereafter, the semester room charge, less \$100, will be apportioned over the first six weeks of the semester. A student who withdraws after the beginning of the seventh week of the semester will be charged the full room and board rate. Any eligible refund accrual is based on the room check-out date.

Students who purchase a declining balance dining plan will be charged a forfeiture fee of \$100 during the first week. Beginning in week two and throughout the remainder of the semester, students will forfeit the base cost and will be refunded any unused dollars in the declining balance account.

Unused Dining Dollar deposits will be refunded in total for meal plan holders. Students who have only a Dining Dollars account and not a meal plan will receive the balance of all cash deposits less a \$15 processing fee. Questions concerning adjustments to room charges should be directed to the Office of Housing & Residential Life at (540) 231-6481. Questions concerning adjustments to meal plan charges should be directed to the Hokie Passport Services at (540) 231-5121.

## Tuition and Fee Refund Policy

The refund schedules below list the possible student refund for withdrawals, resignations, and reduced course load. Students considering reducing their course load or resigning should always review examples of the calculation of any refund on the Bursar's website at [www.bursar.vt.edu](http://www.bursar.vt.edu) before actually dropping the course or resigning.

Fees are defined as the comprehensive fees (full or part time) and any laboratory or resource fee associated with a particular course. When dropping a course, please note the non-refundable nature of fees after the first week of classes. Tuition and fee refunds for resignations are based on the effective date of resignation as determined by the student's associate dean. If there is a question related to the effective date of resignation, the student should contact the associate dean of their college.

Fall and Spring Semesters	
<i>Tuition Refund Schedule for Reduced Course Loads</i>	
Semester Class Day	Student Refund
One through five	100% of Tuition and Fees
Six through eight	90% of Tuition ONLY
Nine through nineteen	50% of Tuition ONLY
Twenty through thirty-seven	25% of Tuition ONLY
After day thirty-seven	0%
<i>Tuition Refund Schedule for Withdrawals &amp; Resignations</i>	
Semester Class Day	Student Refund
One	100% of Tuition and Fees
Two through eight	90% of Tuition ONLY

**Fall and Spring Semesters:**

- All refunds will be calculated from the official date of resignation, which may not necessarily be the last day of class attendance.
- The Technology Fee, Capital Fee, Comprehensive Fees, laboratory and resource fees are non-refundable and no reduction will be made after the first day of classes for resignations and after the first 5 days of classes for reduced course loads.

Nine through nineteen	50% of Tuition ONLY
Twenty through thirty-seven	25% of Tuition ONLY
After day thirty-seven	0%

## Summer Terms

### *Tuition Refund Schedule for Reduced Course Loads*

Semester Class Day	Student Refund
One through three	100% of Tuition and Fees
Four through eight	50% of Tuition ONLY
Nine through fifteen	25% of Tuition ONLY
After day fifteen	0%

### *Tuition Refund Schedule for Withdrawals & Resignations*

Semester Class Day	Student Refund
One	100% of Tuition and Fees
Two through three	90% of Tuition ONLY
Four through eight	50% of Tuition ONLY
Nine through fifteen	25% of Tuition ONLY
After day fifteen	0%

## Summer Terms:

- All refunds will be calculated from the official date of resignation, which may not necessarily be the last day of class attendance.
- No refund will be granted for a resignation that occurred in a previous fiscal year.
- The Technology Fee, Capital Fee, Comprehensive Fees, laboratory and resource fees are non-refundable and no reduction will be made after the first day of classes for resignations and after the first 3 days of classes for reduced course loads.

## Academic Common Market Programs

Virginia Tech will no longer participate in the Academic Common Market consortium. For students entering Fall 2012, a limited number of identified majors are eligible. After Fall 2012, no majors will be identified as eligible for participation. Currently enrolled students, approved for Academic Common Market status, may continue to receive their benefits contingent on: continued full-time enrollment and progress toward their approved ACM program (not to exceed six years); maintain a 2.0 grade point average, and do not double major. Students who do not maintain full-time enrollment and are not making progress toward their approved ACM program will not receive the in-state tuition rate and may be subject to retroactive out of state tuition charges. For additional information students may contact the Office of the University Registrar, or visit [www.registrar.vt.edu](http://www.registrar.vt.edu).

## Academic Eligibility Policy

Continued enrollment at Virginia Tech is a privilege that is granted as long as the student is making satisfactory progress toward a degree, maintenance of the required minimum Grade Point Average (GPA), and compliance with all regulations stipulated in the *University Policies on Student Life*.

The minimum standard for good standing is eligibility to enroll. The required minimum grade point average is 2.00. Students on academic probation and warning are eligible for continued enrollment and good standing (absent any violations of regulations stipulated in the *University Policies on Student Life*).

**Academic Warning:** Students earning less than a 2.0 term GPA, but with a cumulative grade point average of 2.0 or higher, will be placed on academic warning without notation on the academic transcript. Students on academic warning will be required to consult with the appropriate undergraduate assistant or associate dean of their college and to sign an academic contract. Failure to complete an action plan (academic contract) may result in prohibition from future enrollment(s).

**Academic probation** is imposed when the cumulative GPA is less than 2.00; academic probation is lifted when cumulative GPA is at least 2.00. Academic performance will be reviewed at the end of each regular semester (fall and spring).

A student on **probation**:

1. may take no more than 16 credits per semester;
2. may be required (at the discretion of individual colleges) to consult with an advisor before beginning a probationary semester, and to sign an academic contract acknowledging his/her performance is not meeting university standards and stating what actions she/he is committed to taking to improve performance.

**First suspension** will be imposed whenever one of the following occurs:

1. A student on academic probation has a cumulative GPA less than 2.00 for the first 2 semesters (fall, spring) of enrollment; or
2. A student has 2 consecutive semesters thereafter with a cumulative GPA below 2.00.

**First Suspension (Fall):** A student who is placed on first academic suspension at the end of fall semester will be suspended from continued enrollment through the end of the following spring semester. **Note:** Students placed on first academic suspension at the end of fall semester are eligible to return the subsequent first summer, second summer, or fall semester.

**First Suspension (Spring):** A student who is placed on first academic suspension at the end of spring semester will be suspended from continued enrollment through the end of the following fall semester. **Note:** students placed on first academic suspension at the end of spring semester may NOT enroll in the immediately following summer session.

A student must earn a minimum 2.00 semester GPA the first semester back and raise the cumulative GPA to at least 2.00 by the end of the second semester back or earn a 2.50 GPA for every semester following the suspension until cumulative GPA is 2.00 or greater. A student will be placed on **second academic suspension** for failure to meet returning performance requirements.

**Second Suspension (Fall):** A student who is placed on second academic suspension at the end of fall semester will be suspended from continued enrollment through the end of the following fall semester. **Note:** students placed on second academic suspension at the end of fall semester may NOT enroll in the immediately following summer session.

**Second Suspension (Spring):** A student who is placed on second academic suspension at the end of spring semester will be suspended from continued enrollment through the end of the following spring semester. **Note:** students placed on second academic suspension at the end of spring semester may NOT enroll in the immediately following summer session. The same returning performance requirements apply for second suspension as for first suspension.

**Final Suspension:** A student will be permanently dismissed for failure to meet returning performance requirements after a second academic suspension.

## Accreditation

Virginia Tech is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award doctorate, masters, baccalaureate and associate degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4500 for questions about the accreditation of Virginia Tech.

- Program accreditation within the various colleges of the university as follows:

Accreditation Association of Marriage and Family Therapist  
Accreditation Commission for Programs in Hospitality Administration  
Accreditation Board for Engineering and Technology  
American Chemical Society  
American Council for Construction Education  
American Association of Family and Consumer Sciences (all undergraduate programs)  
American Psychological Association (Clinical Psychology or Ph.D. program level only)  
American Society of Landscape Architects  
American Society of Planners  
American Veterinary Medical Associations Council on Education  
Association to Advance Collegiate Schools of Business, AACSB International  
Commission on Accreditation for Dietetics Education, American Dietetics Association  
Council for Interior Design Accreditation  
Landscape Architectural Accreditation Board  
National Association of Schools of Art and Design  
National Association of Schools of Theatre (B.A. and M.F.A. degree programs)  
National Architectural Accrediting Board  
National Council for Accreditation of Colleges of Teacher Education  
National Institute of Food Technologists lists the Department of Food Science and Technology as one of 40 departments in the U.S. and Canada offering this  
Society of American Foresters  
Society of Wood Science and Technology  
Virginia State Department of Education

## Applying for Your Degree

All students must apply for a degree during the first semester of their junior year. The application for degree can be found on Hokie SPA under the Degree Menu. Once students have completed the application, they should generate a Degree Audit Report (DARS). The DARS report will help students to be fully aware of all degree requirements which remain to be completed. This report can also be generated through the Hokie Spa.

**Double Major(s):** Undergraduate students who satisfy graduation requirements for two curricula concurrently may request recognition of the second major on their transcripts (also known as "double major"); however, only the primary major will appear on the diploma. Students earning multiple majors concurrently will receive a double major certificate(s).

**Second Undergraduate Degree:** Students may earn a second bachelor's degree (and diploma) by earning a minimum of 30 additional credit hours **in residence** with a minimum 2.0 GPA on all work attempted. All specific requirements must be met for each degree program,

including attainment of the 2.0 GPA for all courses in the major. Note: threshold for total number of pass/fail hours allowed may not exceed the maximum for first degree.

Traditionally, degrees are conferred upon candidates who are present to receive them at the Commencement ceremony in May. Candidates may have their degrees conferred in absentia if they cannot be present at Commencement. To arrange for this, a candidate must indicate to the University Registrar either via Hokie SPA or in writing to be excused from the Commencement ceremony.

In addition to the traditional Commencement, other "Degree Conferral Dates" have been established for each May to May year. The degree conferral dates for fall, first summer, and second summer appear on the diplomas of qualified graduates. The degree conferral dates fall on the last day of final examinations (last day of term) for first summer session, second summer session and fall semester. Names of Graduates of Summer and Fall terms will appear in the Fall Commencement Ceremony Program only.

No commencement ceremonies are conducted at the end of the summer sessions, but graduates may attend the fall ceremony after completion of degree requirements. They may also request permission from the department to "walk through" the spring Commencement ceremony based on established departmental or college guidelines. Diplomas are not distributed.

**Completion of degree requirements** is determined after the final grade reports are available. Degrees are regarded as having been conferred on the appropriate conferral date upon determination by the University Registrar that degree requirements have been met. All course enrollments and attendance obligations must have been completed on or before the degree conferral date. University actions, such as Honor System or Conduct System penalties, will delay the awarding of the degree, the effective term of the degree and release of the diploma. Students with university actions will have their final degree conferral date moved in accordance with the completion of sanctions and/or penalties. Students who are unable to complete based on original application for degree term are responsible for moving their date of completion.

Students may resolve degree completion programs up to thirty (30) days after the degree term to retain the conferral date on the diploma. Any resolutions of degree completion following the thirty day resolution window will be conferred on the next subsequent term following resolution of the problem(s). Resolutions of degree problems include failure to submit appropriate paperwork to the university.

With the exception of spring, diplomas for all other "Degree Conferral Dates" are ordered after course work completions are established. Diplomas are distributed either by mail or in person to graduates who appear in the Office of the University Registrar, or at the next Commencement ceremony, if available.

[TOP](#)

## Combination Degrees

The bachelor's degree will be awarded to a student who has satisfactorily completed three years of undergraduate work in an appropriate curriculum and the first year of work in an accredited medical, dental, veterinary, or law school, or medical technology program (biology majors only), or physical therapy program (biology majors only), provided the student fulfills the requirements for the three-year program as follows:

- At least two of the three years of pre-professional work, including the third year, in residence at the university.
- A minimum of 90 semester hours undergraduate work, i.e. pre-professional school credit.
- Curriculum for Liberal Education requirements plus 18 of the 30 hours required in the major during the three-year, pre-professional work program. A department may require more than 18 hours of course work in the major.

## Degree Programs

Virginia Tech offers four-year degree programs leading to a Bachelor of Arts, Bachelor of Science, or Bachelor of Fine Arts degree. Also offered are five-year Bachelor of Architecture and Bachelor of Landscape Architecture programs. Virginia Tech also offers graduate work in 63 fields of study leading to master's degrees and in 51 fields leading to the doctorate. The professional doctor of veterinary medicine is offered through the Virginia-Maryland College of Veterinary Medicine, located at Virginia Tech.

## Directed and Independent Enrollment

Students develop a plan of work to reach particular objectives, obtain approval of both the department and a faculty member who will supervise the work, and work with them to arrange hours and credits.

Students must submit an official approval form prior to registration. In most cases, the student's first contact for an independent study, field study, or undergraduate research course is the department offering the course. Registration is through the student's dean's office. Special study courses are set up by the department, and the student registers through web course request. Some colleges and departments have restrictions on eligibility to register for these courses, and limit the number of hours that can be used toward graduation.

**Field Study (X964)** courses are work experiences approved by some departments and are selected to augment traditional classroom

activities. The student is evaluated on the knowledge and skills acquired as a result of the experience. Emphasis is placed on the academic and practical value of the work.

**Independent Study (X974)** courses generally involve extensive reading and tutorial sessions with the faculty supervisor and also may involve written papers. The subject of Independent Study usually is a continuation in greater depth of a topic covered in a regular course, allowing students to study topics of particular individual interest.

**Special Study (X984)** courses are designed for a group of students, rather than for a single individual. This type of course may be used to study a timely topic, one in which there is current, but not necessarily lasting, interest. It also may be used to launch an experimental course before the course is incorporated into the regular curriculum.

**Undergraduate Research (X994)** courses are individual research projects carried out by students under faculty supervision. The student defines the research topic, proposes a methodology, carries out the research, and writes a report.

## Education Abroad

Virginia Tech sponsors education abroad programs in many countries around the world. These programs provide opportunities for students in almost every discipline.

The University's Center for European Studies and Architecture (CESA) in Switzerland, provides a unique place for undergraduate students to live and study. Curriculum for Liberal Education courses and specialized programs in architecture and in business are offered at CESA. Students study for one semester in the university's center in the small town of Riva San Vitale, Switzerland, and make field trips to other European sites to complement their classroom studies. Semester long programs are also available in Punta Cana, Dominican Republic and in Lugano, Switzerland.

Semester/academic year programs are also available through exchange programs and other study abroad providers. There are over 100 universities in 40 different countries to choose from. Some of the more popular locations are Australia, France, Italy, Germany, Ecuador, and the United Kingdom, to name a few. VT students who participate in bilateral and ISEP student exchange programs pay the same tuition and fees that they would pay for a regular term at VT. Virginia Tech's summer faculty-led programs enroll the greatest number of students. Tech has summer options in more than 25 countries, ranging from Australia to South Africa, and lasting 2-8 weeks. A Virginia Tech faculty member leads each program, and students will normally be enrolled in Tech courses.

Students who plan to study abroad should discuss the transfer of credits earned with their academic dean prior to leaving the Virginia Tech campus. All credits to be transferred to Virginia Tech for use toward degree completion should be approved before they are taken. Credit must be awarded from approved internationally accredited higher education institutions. This is particularly true of courses completed in foreign universities for which there is no Virginia Tech equivalent. Students who cannot arrange credit transfer details before departure should remain in contact with their academic dean's office while they are abroad.

Most forms of financial aid may also be applied to education abroad programs, and there are several scholarships and grants available. We encourage students to contact the Office of Scholarships and Financial Aid as soon as they consider studying abroad.

For more information about education abroad opportunities, contact the Education Abroad Office at 526 Prices Fork Road, Room 131, or consult this website: [www.educationabroad.vt.edu](http://www.educationabroad.vt.edu).

## Graduation Requirements and Degree Conferrals

The approved requirements in effect for the term/year of application of degree apply. A student must complete all courses with at least a minimum 2.0 GPA for all hours attempted. In addition, a student must present an equally satisfactory record in courses attempted in the major and/or any minor. The number of credit hours required varies by major curriculum. Virginia Tech reserves the right to modify requirements in the student's program if necessary. Requirements for program's degree must be approved two years prior to their effective graduation date. The approved graduation requirements (referenced as graduation "Checksheets") appear at the University Registrar website: [http://www.registrar.vt.edu/registration/degree\\_checksheets.php](http://www.registrar.vt.edu/registration/degree_checksheets.php).

All students earning degrees from Virginia Tech must have earned a minimum of twenty-five (25) percent of the credit for their respective degrees from this institution. No more than fifty (50) percent of credit hours may be transferred from a two year institution. Students who must enroll in foreign language courses to complete admission requirements may not use the credits toward completion of the degree.

The senior year, with a minimum of 27 hours, must be completed in residence, or 27 of the last 45 hours must be completed in residence, provided that only approved courses taken *in absentia* are transferred to complete requirements. Participation in Study Abroad programs nor pre-approval for transfer credits obviate this requirement.

[Graduation with Distinction](#) (Academic Policies Governing Enrollment Section)

## Language Study Requirement

Students must meet a language study requirement either through high school enrollment or prior to receipt of the undergraduate degree. The minimum requirement may be met in high school by completing 2 units of a single foreign or classical language or American Sign Language. Some majors in the College of Liberal Arts and Human Sciences may require 3 units of a single foreign or classical language or American Sign Language. Students completing the requirement at Virginia Tech may not count the hours toward degree completion. The requirement also may be met after admission by one of the following:

1. Earning six (6) semester hours of college-level foreign or classical language credit or American Sign Language. Such credits are in addition to that number normally required for graduation in a student's program of study.
2. Receiving credit by examination for a foreign or classical language or American Sign Language. The credit by examination option is available only to students who have gained knowledge of a foreign language without the benefit of formal training. This privilege is intended to recognize informal non-academic learning experience and is **not** offered to a student who has had regular classroom instruction in that foreign language. (Contact the Department of Foreign Languages and Literatures for more information.)

[TOP](#)

## Honor Code and Honor System

The Virginia Tech Honor Code is the university policy that defines the expected standards of conduct in academic affairs. The Honor System is the university student body charged with disseminating information about the Honor Code to the university community and enforcing the Honor Code.

Violations of the Honor Code in academic affairs include, but are not limited to, the following:

1. **Cheating:** Cheating includes the actual giving or receiving of any unauthorized aid or assistance or the actual giving or receiving of any unfair advantage on any form of any academic work, or attempts thereof.
2. **Plagiarism:** Plagiarism includes the copying of the language, structure, ideas, and/or thoughts of another and passing off same as one's own original work, or attempts thereof.
3. **Falsification:** Falsification includes the statement of any untruth, either verbally or in writing, with respect to any circumstances relating to one's academic work, or attempts thereof. Such acts include, but are not limited to, the forgery of official signatures, tampering with official records, fraudulently adding or deleting information on academic documents such as add/drop requests, or fraudulently changing an examination or other academic work after the testing period or due date of the assignment.

A student who has doubts about how the Honor Code applies to any graded assignment is responsible for obtaining specific guidance from the instructor before submitting the assignment for evaluation. Any student accused of an alleged violation of the Honor Code is guaranteed certain basic rights, including being considered innocent until proven guilty. The complete "Constitution of the Honor System" is available from the Honor System Office (207 West Roanoke St.) and is posted on the Virginia Tech home page at [www.honorsystem.vt.edu](http://www.honorsystem.vt.edu).

[TOP](#)

## Pre-Professional Preparation

### Pre-Health Advising

#### Office of Health Professions Advising (OHPA)

The university maintains an office for pre-professional health advising which is located in the Smith Career Center. The services provided by OHPA are available to all undergraduate students and alumni considering a career in the health care profession.

The Office of Health Professions Advising coordinates all pre-professional health advising for students with an interest in but not limited to dentistry, genetic counseling, health administration, medicine (allopathic, osteopathic, and naturopathic), nursing, occupational therapy, optometry, pharmacy, public health, veterinary medicine, and any others. Although the vast majority of pre-health students major in a science program, any major is acceptable to health professional schools so long as certain specific admission requirements are satisfied. Thus OHPA provides advice and assists students in preparing for admission to a professional school; it is not a degree program. Students interested in a health career are encouraged to pursue a broad undergraduate study in the humanities, social sciences as well as biology and the natural sciences. Admissions requirements to identify qualified students include a competitive grade point average of 3.5/4.0 or higher, national standardized tests for each health profession (Dental Admission Test [DAT], Graduate Record Examinations [GRE], Medical College Admission Test [MCAT], Optometry Admission Test [OAT], and the Pharmacy College Admission Test [PCAT]), significant participation in volunteer and clinical health care activities, letters of recommendation/evaluation, and an interview at the professional school. Successful candidates exhibit high levels of scholastic achievement and intellectual potential as well as motivation and concern for one's fellow human being.

The office provides individual advising about careers in the health profession, preparation for application to professional schools, and the admission process. This office works collaboratively with students to assist them to gain practical experience in the health care arena through volunteering and/or working at local or regional hospitals and clinics. A limited number of students may be placed with local physicians for a

one-semester two-credit preceptorship. The Health Professions Evaluation Committee which is made up of faculty advisors and health professionals from the community, provides on-campus interviews and upon request, furnishes committee letters of evaluation.

Core course requirements vary among the accredited health professional schools but most require two semesters each of Mathematics, English, Biology (with labs), General Chemistry (with lab), Organic Chemistry (with lab), and General Physics (with lab). Other courses which may be required or recommended by schools include Cell and Molecular Biology, Biochemistry, Communication, Ethics, Economics, Microbiology, and Human Anatomy and Physiology. Students are strongly encouraged to pursue learning far beyond their major and prerequisite requirements. Resources are available in Smith Career Center for investigating the specific entrance requirements for each school, and students are strongly encouraged to make use of these services.

## **Pre-Law Advising**

Law students and lawyers come from many undergraduate backgrounds, and the skills necessary to succeed in law school and as an attorney can be developed in a variety of courses across a range of disciplines. Law schools do not treat any specific course or major as a prerequisite for admission, nor do they look with special favor on applicants who have graduated from a formal "pre-law" program. Accordingly, Virginia Tech does not offer a formal pre-law major. The university does offer a top-quality education in a large number of fields, as well as counseling about law as a career, preparing for and applying to law schools, and the law school admission process. Students are encouraged to maintain contact with the University pre-law advisors, the Office of Career Services, and others on campus with information about legal careers.

For further information on pre-law studies at Virginia Tech, including how to contact the University pre-law advisors, see the following website: <http://www.psci.vt.edu/prelaw/index.html>.

[TOP](#)

## **Restricted Majors and Programs**

Students should be aware that there are some academic majors and programs within the university that have strict entrance requirements or are in such high demand that they cannot accommodate all who wish to enter them. Administrators of these restricted programs must be selective in allowing students to transfer in from other majors within the university and in permitting second majors or minors. Students seeking entrance into such restricted programs should consult the appropriate department.

Restricted programs for internal transfers are as follows:

### **College of Agriculture and Life Sciences**

Human Nutrition, Foods and Exercise

### **College of Architecture and Urban Studies**

Architecture

Art & Art History -- Visual Communication Design; Studio Art

Industrial Design

Interior Design

### **Pamplin College of Business**

Accounting and Information Systems

Business Information Technology

Finance, Insurance & Business Law

Hospitality and Tourism Management

Management

Marketing

### **College of Engineering**

All majors

[TOP](#)

## **Selecting or Changing a Major, Double Major, or Minor**

**Undergraduate students must be enrolled in their major(s) [and minor(s)] of choice prior to the beginning of their senior year, or by the time they have 30 semester hours to complete before their graduation. Students seeking double majors must be accepted into the second major by the academic department before the university can award the second major.**

Changes from one degree program to another (i.e., changes in major) or the addition of a second major or a minor usually can be

accomplished prior to the senior year, simply by working with one's academic advisor and informing the head(s) of the department(s) and the dean(s) of the college(s) in question. A major (or second major) cannot be selected after the beginning of the senior year. (See section above on Selecting a Major.) Some departments establish specific deadlines for requesting change of major. Check the department's website for specific deadlines and required application materials.

Minors are offered by many academic departments. Refer to the section on Graduation Requirements and Degrees and to the appropriate academic department in the college chapters of this catalog to review the requirements for a minor.

Students should be aware that changes, such as changing or adding majors or minors, sometimes imply extra course work, which can delay graduation.

Twenty-five percent of the student's total hours required for degree must be taken at Virginia Tech

## **Procedures to Follow When Changing or Adding a Major or Minor**

Students should submit their applications for changing majors or adding minors two weeks prior to the start of each semester's registration period. This will allow students adequate time to assess their situations before deciding to transfer and registering for the following term.

The procedure for changing majors or adding a minor is as follows:

1. Request an "Application for Change in Curriculum" from the office of the dean of your new curriculum.
2. Follow the instructions given on the "Application for Change in Curriculum" form.

[TOP](#)

## **Selection of Studies**

The regular academic year at Virginia Tech is divided into two semesters, fall and spring. Virginia Tech also offers two summer sessions. Most courses of study require eight (8) terms (i.e., semesters and/or summer sessions) for completion of the bachelor's degree requirements. Completion of the degree requirements for those students who enroll in the Cooperative Education Program, Bachelor of Architecture Program, or Bachelor of Landscape Architecture Program requires five years.

Elective courses are chosen through consultation with the student's advisor. The dean of the college in which a student is registered has authority in such matters as substitution of courses, dropping and adding courses after deadlines, or permission to take an overload.

Students have the assistance of faculty guidance, introductory courses, and special counseling to help them choose wisely which course of study they should take. Every effort is made to assure that all courses listed under the various department of instruction will be offered. Virginia Tech reserves the right, however, to withdraw any course for which an adequate number of students do not enroll.

## **Student Responsibilities Regarding Satisfactory Progress Towards Degree**

It is the student's responsibility to satisfy all course requirements as established by the faculty teaching the courses in which s/he is enrolled. It is also the student's responsibility to be aware of all major, degree, college, and graduation requirements necessary to complete his or her degree. Students are also responsible for satisfying all university, college, and departmental requirements for progress towards degree. (See this chapter for university requirements; consult the departmental listings in this catalog for major requirements.)

[TOP](#)

## **Student Responsibilities Regarding Official Student Records**

Students are responsible for keeping and being familiar with their own records and for the accuracy of these records.

A student's failure to keep his/her address updated does not absolve the student of responsibility for matters which require notification by the university. Changes to your local address, permanent address, or parent/guardian address should be promptly updated by accessing Hokie SPA. Correct dorm addresses are established through the Student Housing Office in Eggleston Hall. If you are not sure what addresses are on file, you may check Hokie SPA for verification. Virginia Tech requires updating of local address, designation of emergency contact, opt in/out of VT Alerts, and understanding of the Student Conduct policy prior to registration.

It is the student's responsibility to check his/her current schedule of classes by accessing Hokie SPA. Errors must be corrected by the established deadline stated in the *Timetable of Classes*. Request for course(s) will result in a responsibility for payment of tuition and fees. If a student requests courses via course request or during dropadd, the student is responsible for the tuition and fees assessed unless formally resigning during the established university deadlines. It is the student's responsibility to complete and return the Withdrawal/Resignation form

by established term deadlines if choosing to disenroll for a given term.

Students are responsible for seeing their advisors during course request week so as to assure appropriate curricula planning.

## Student Success Center, The

[www.studentsuccess.vt.edu](http://www.studentsuccess.vt.edu)

(540) 231-5499

The Student Success Center supports Virginia Tech's mission to expand students' personal growth and opportunities, advance social and community development, provide outreach and support services to under-served populations, and improve the quality of life by providing holistic support to our undergraduate students through a network of programs and services that includes:

- College Transition Programs to help freshman and transfer students make a successful transition from high school to college, as well as facilitate academic and social adjustment to Virginia Tech;
- Learning Assistance Programs to help students who want to improve their academic and non-academic skills such as time management, study skills, and networking; and
- Academic Excellence Programs to help students who are already academically successful further enrich their educational experiences.

The Student Success Center strives to empower students to become life-long learners and contributing members of society, and to facilitate Virginia Tech's successful achievement of an institutional climate that is supportive of student success.

[TOP](#)

## Teacher Education at Virginia Tech

Email: [edinfo@vt.edu](mailto:edinfo@vt.edu)

Website: <http://www.soe.vt.edu>

Virginia Tech's School of Education offers programs leading to licensure in 23 fields of study. All educator preparation programs are at the graduate level. Students seeking a teaching or other educational license should consult the School of Education Office of Academic Programs website (<http://www.soe.vt.edu/oap/index.html>) for details on specific programs of interest.

The School of Education is accredited by the National Council for Accreditation of Teacher Education, and all programs are approved by the Virginia Board of Education. Graduates qualify for an educational license or endorsement in other states.

Undergraduate students who anticipate applying for a master's degree in teacher education should consult an advisor in the Office of Academic Programs ([edinfo@vt.edu](mailto:edinfo@vt.edu)) or the academic advisor in their undergraduate major. Decisions about entering graduate programs in education should be made early in the undergraduate years so that an appropriate major can be selected and required courses can be taken prior to applying for the graduate program. Seniors with a GPA of 3.0 or better may apply to be admitted to the Dual Student Status for their last semester to take graduate-level education courses. Juniors with a GPA of 3.3 or better may apply for admission in the Accelerated Undergraduate/Graduate Degree Program to take graduate courses during the senior year. Information about these programs is available on the Graduate School website (<http://www.graduateschool.vt.edu>)

Applicants for teacher education programs must submit passing scores on Praxis I: Academic Skills Assessments or acceptable scores on the SAT or ACT prior to acceptance into the School of Education. Passing scores on relevant Praxis II: Specialty Area Tests, the Virginia Communication and Literacy Assessment, and the Reading for Virginia Educators exam (for elementary education teachers) are required prior to receiving a teaching license and prior to admission for some programs. A criminal record check is required by school divisions in Virginia prior to employment.

Notable features of the teacher education program at Virginia Tech are:

- graduates with a commitment to learning and advocacy for all students
- a faculty devoted to improving education through research, teaching, and outreach
- an emphasis on science, math, and technology within a comprehensive School of Education
- graduates with expertise in content fields and related pedagogical knowledge and skills
- committed clinical supervisors in schools
- field experiences and internships in diverse school settings
- the latest instructional technologies
- a strong demand for our graduates

Applications for School of Education programs may be submitted on line through the Graduate School website: <http://www.graduateschool.vt.edu>

## Undergraduate Courses of Study

Undergraduate courses of study leading to bachelor's degrees at Virginia Tech are listed below. In addition, many options and specialties pertaining to each academic college are described in the individual [college chapters](#) in this catalog.

- **College of Architecture and Urban Studies**

- Art
- Architecture
- Building Construction
- Environmental Policy and Planning
- Industrial Design
- Interior Design
- Landscape Architecture
- Public and Urban Affairs

- **College of Agriculture and Life Sciences**

- Agribusiness
- Agricultural Sciences
- Animal and Poultry Sciences
- Applied Economic Management
- Biochemistry
- Biological Systems Engineering
- Crop and Soil Environmental Sciences
- Dairy Science
- Environmental Science
- Food Science and Technology
- Horticulture
- Human Nutrition, Foods, and Exercise

- **College of Engineering**

- Aerospace Engineering
- Biological Systems Engineering
- Chemical Engineering
- Civil and Environmental Engineering
- Computer Engineering
- Computer Science
- Construction Engineering and Management
- Electrical Engineering
- Engineering Science and Mechanics
- Industrial and Systems Engineering
- Materials Science and Engineering
- Mechanical Engineering
- Mining Engineering
- Ocean Engineering

- **College of Liberal Arts and Human Sciences**

- Apparel, Housing, and Resource Management
- Classical Studies
- Communication
- English
- French
- German
- History
- Human Development
- Humanities, Science, and Environment
- Interdisciplinary Studies
- International Studies
- Music
- Philosophy
- Political Science
- Spanish
- Sociology
- Theatre Arts

- **Pamplin College of Business**

- Accounting and Information Systems
- Business Information Technology
- Economics
- Finance
- Hospitality and Tourism Management
- Management
- Marketing Management

- **College of Natural Resources and Environment**

- Environmental Resources Management
- Fisheries Science
- Forestry
- Geography
- Meteorology
- Natural Resources Conservation
- Wildlife Science
- Wood Science and Forest Products

- **College of Science**

- Biological Sciences
- Biochemistry
- Chemistry
- Economics
- Geosciences
- Mathematics
- Physics
- Psychology
- Statistics

**Note:** Students seeking teaching licensure in English, history and social sciences (geography, political science, and economics), mathematics, chemistry, biological sciences, physics, earth science, theatre arts, music, foreign languages, and English as a second language should contact the [Center for Teacher Education](#). For elementary education, see [human development](#), or contact the Center for Teacher Education.

[TOP](#)

## University Enrollment and Academic Progress

### Registration Procedures

1. Registration for continuing students is an eight-day period (Course Request) in the middle of each semester during which currently enrolled students may request classes for the next semester. Students register for summer school (if they plan to attend) beginning in December. Students register for Fall semester during Spring semester.
  - a. Students should consult their completed Pathways Planner and review with his/her departmental advisor. Both should be aware of such considerations as the student's current GPA, the course load in hours and in effort required, pre- and co-requisites for courses so limited, the student's relationship to the eligibility schedule, and fulfillment of College and Curriculum

for Liberal Education requirements and those for major, minor, or cognate. If the student fails to meet with his/her advisor, a **hold** may be placed on their registration.

- b. When a schedule is designed, the student enters the course requests by accessing [Hokie SPA](#).
  - c. Prerequisite checking is enforced by some departments. The registration system will review the student's academic history to determine compliance with any prerequisites.
  - d. **Overloads** (more than 19 hours per semester, or 7 each summer session) require permission of the student's academic dean. The student will be scheduled for the first available 19 hours (7 in Summer) requested.
  - e. Every student must annually provide an up-to-date local address, an emergency contact, opt in/opt out of the VT Alerts system and all students must acknowledge the University Conduct Policy. Students are prohibited from registration until the requirements are updated in the student record system.
  - f. The student's **current class schedule** may be printed by accessing Hokie SPA; the student is then responsible for verifying that he/she is in fact enrolled in the courses and sections he/she has been attending.
2. Approximately three weeks after the close of registration week, course request results are available and may be printed by accessing [Hokie SPA](#). The web class ticket will include detailed information regarding sections which are full, conflicting, withdrawn, or restricted which explains why these sections were not added to the student's schedule. See item number six (6) below for details about why a student's course selections are sometimes ignored, or why a student's schedule might be purged or held from registration.
  3. Students may adjust their schedules on a space available basis using web DROPADD, an electronic schedule adjustment program. Students should consult with their advisors before making any changes except those for convenience (usually time). 1000-level Mathematics and English courses, because of the high demand, currently have restrictions on section changes. As a rule, any student who drops a 1000-level English or Math course via Hokie SPA or department will not be allowed to force-add another 1000-level English or Math course that term. A student should be aware that dropping below full-time status (12 semester hours) may jeopardize financial aid, campus housing, and degree completion. Some courses may drop students if not attending the first class. Refer to the comments section of the course in the *Time Table of Classes*.
  4. A **Force-Add** form permits admission to a class **over** the desired enrollment threshold, but not over room capacity. This request is submitted via a "force-add" form **available in the department offering the course**, and requires the instructor's (or, in some departments, departmental) permission. **Requests for force-adds are processed by the department offering the course.** **Caution: The force-add transaction permits enrollment in courses with conflicting times.**
  5. Responsibility for **Payment of Tuition and Fees**: all students who initiate enrollment either by course request or by dropadd are responsible for the payment of assessed tuition and fees. Only the submission of an official withdrawal or resignation removes the student from any fee responsibility. Failure to attend class(es) or to submit appropriate university paperwork is not a justifiable reason for removal of assessed fees retroactively.
  6. **Late Adds and Drops Adjustments** to a student's schedule after the last date to carry out a specific transaction (see Hokie SPA for deadline dates) require permission of his/her own academic dean. Thus, a Business major wishing to late-drop an English course requires approval from the College of Business, not that of Liberal Arts and Human Sciences. A late-drop request based on mental or physical illness requires a recommendation from Student Health Services. Faculty cannot add or drop students from their rolls.
  7. **Purged and Held Registrations** Failure to pay tuition bills by a posted deadline (usually by the end of the 2nd week of classes) may result in the student's schedule being **purged** (removed from the system). A schedule may be **held** (made inaccessible to department staff, as well as to students using DROPADD, thereby precluding transactions of any type) for nonpayment of fees other than tuition (e.g., parking tickets), for Honor Code violations, for academic ineligibility (due to department and/or academic suspension), or for failure to make progress toward a degree. This last hold is imposed by the student's dean, while all other holds are imposed by other offices. The student should check with the office imposing the hold, as only that office is authorized to remove the hold. **The Office of the University Bursar processes all billing for tuition and fees; contact the Office of the Bursar if you have questions about your bill or do not receive a bill.**

## Family Educational Rights and Privacy Act of 1974, Buckley Amendment (FERPA)

### Annual Notification of FERPA Rights:

To comply with the provisions of the Family Educational Rights and Privacy Act of 1974 (as amended), Virginia Polytechnic Institute and State University will not release education records or personally identifiable information contained therein, other than directory information, without the student's written consent.

Directory information at Virginia Polytechnic Institute and State University includes:

- student's name
- local and permanent address(es)
- telephone number(s)
- major field of study (including second majors, minors, etc.)
- whether a student is currently enrolled
- enrollment status (full-time, half-time, etc.)
- class (freshman, sophomore, etc.)
- academic level (associate, undergraduate, graduate, professional)
- anticipated date of graduation
- certification of application for degree
- dates of enrollment
- degree(s) earned, including date, honors and level of distinction
- participation in officially recognized activities and sports
- weight and height of members of athletic teams
- Electronic Theses and Dissertations (ETD)

Directory information will be withheld upon the written request of the student. Such prohibition against release generally does not extend to record requests from other school officials at this institution who have an educational need to know, state and federal education authorities, courts or accrediting organizations. Questions concerning this policy may be referred to the Office of the University Registrar.

---

## FERPA Disclosure

Due to the laws covering confidentiality, it is a violation of the regulations for anyone to release non-directory information (grades, course enrollment, class schedule, standing) about any student to anyone without permission from the student. The Family Educational Rights and Privacy Act (FERPA) requires the student to authorize the university prior to release of any academic record information to a third party. Completion of the online form (Hokie SPA) allows the student to approve disclosure of his/her academic record information to parent(s) and/or guardian(s) via an assigned "Pass Code". University officials must request the pass code prior to the release of any requested information. The disclosure will remain valid until the student removes the authorization.

Tax Dependent? The Commonwealth of Virginia requires Virginia's colleges and universities to release academic record information to parents of tax dependent students. This requirement is allowable within the guidelines of FERPA. If the student is a tax dependent of his/her parent or guardian, please denote that information by checking "YES" in the question column, "Are you a Tax Dependent?" on the online FERPA disclosure form (Hokie SPA). Students are informed of any release of information prior to disclosure.

---

## Notification of Rights under FERPA

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. These rights

include the following:

1. The right to inspect and review the student's education records within 45 days of the day the University receives a request for access. Students must submit to the Office of the University Registrar written requests that identify the record(s) they wish to inspect. The university official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.
2. The right to request the amendment of the student's education records that the student believes are inaccurate or misleading. They should write the University official responsible for the record, clearly identify the part of the record they want changed, and specify what is inaccurate or misleading. If the University decides not to amend the record as requested by the student, the University will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.
3. The right to consent to disclosures of personally identifiable information contained in the student's education records, except to the extent that FERPA authorizes disclosure without consent. One exception which permits disclosure without consent is disclosure to school officials with legitimate educational interests or concerns of health and safety. A school official is a person employed by the University in an administrative, supervisor, academic or research, or support staff position (such as health staff); a person or company with whom the university has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Visitors; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.
4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by Virginia Tech to comply with the requirements of FERPA. The name and address of the office that administers FERPA is:

Family Policy Compliance Office  
U.S. Department of Education  
400 Maryland Avenue, SW  
Washington, DC 20202-5920  
<http://www.ed.gov/policy/gen/guid/fpco/ferpa/index.html>

Students may also file a complaint with the University Registrar:

Wanda Hankins Dean  
250 Student Services Building  
Blacksburg, Virginia 24061-0134  
(540) 231-7951

**The Family Educational Rights and Privacy Act** indicates that students and former students should be granted the opportunity to change their names on education records upon the production of evidence showing that the name has changed. The following procedure applies to requests for changes to the name appearing on a student's education record:

- Complete Request for Change in Name form in the Office of the University Registrar
- Provide a photocopy of a Social Security card that reflects the new name and a valid drivers license or other form of photo identification
- Provide a photocopy of a birth certificate, marriage certificate or license, divorce decree, court order, or naturalization papers including certificate number, petition number, and registration number

Please note that all documentation used in support of this request should reflect the name for which you are requesting the change.

**The Privacy Act of 1974 (U.S. Public Law 93-579, Sect. 7)** requires that the university notify students that disclosure of a Social Security number is voluntary unless employed by the university or receiving federal financial aid. Pursuant to the 2003 State Code of the Commonwealth of Virginia, no student identification card may display the social security number as an identifier. Effective with students entering Fall 2003 and beyond, a generated identification number will be utilized as the default unique identifier. This generated number will be nine digits in length and will begin with the number, "9", nine. The generated student identification is defined as personally identifiable information by federal legislation, FERPA (Family Educational Rights and Privacy Act) (U.S. Public Law 93-579, Sect. 7), and is prohibited from disclosure except to education officials with legitimate educational interest.

For students who entered Virginia Tech prior to Fall 2003, the social security number was the default student identification number. Effective with the entering class of Fall 2003, a nine digit generated identifier is assigned to each student. Use this identifier when the student identification number is requested by a university official. Important note: disclosure of the social security number may be required by different university offices if required by the Code of the Commonwealth of Virginia or Federal statute.

Virginia Tech policy requires annually the collection of specific demographic data for each student: local mailing address, emergency contact entry or emergency contact confirmation, VT Alerts Opt In or Opt Out action, and review of the Virginia Tech Student Conduct Policy. Students will be prohibited from registration until the information is provided.

---

## Missing Person Contact

Student(s) may denote a specific third party as emergency contact as primary in cases of missing person(s). Visit Hokie SPA, choose the Hokie Plus menu, add 'new emergency contact'. In the pull down selection for relationships, choose "Missing Persons Contact". In case of such an emergency, the University will first contact the missing person designee before any alternate emergency contact(s).

- 

### AP, IB, Cambridge Exam

Virginia Tech awards AP, IB, Cambridge Exam equivalencies after faculty review of content and applicable Virginia Tech credit. In accordance with state policy, Virginia Tech accepts credit from [Advanced Placement](#), [International Baccalaureate](#), and Cambridge Exam based on annual faculty and university program review.

### Credit by Examination

Credit, not to exceed 12 semester hours, may be allowed by special examination where exceptional command of a subject can be demonstrated in lieu of formal course work. This privilege is not available to a student who has previously audited or enrolled in the course, or has previously attempted credit by examination in the course. If credit by examination is deemed appropriate, the offering department shall have full responsibility for determining the type of examination to be given and what constitutes a passing grade.

Credit established by examination may not be used to satisfy the in-residence requirements for graduation. No grades or quality credits will be assigned.

There is a per-credit fee for the examination. The current fee is \$10.00 per credit hour and is subject to change at the beginning of an academic year. Only currently enrolled undergraduate students are eligible for special examinations allowing university credit. Official approval must be obtained from the head of the department offering the course.

### Credit for ROTC Courses

In some majors, not all ROTC courses may be applied toward a bachelor's degree. Students should consult their approved major checksheet for specific information on which courses will count toward their degree.

### Credit Hour System

Virginia Tech uses the credit-hour as its unit of credit in the semester calendar system. Course descriptions under the departments of instruction (in the chapters on the various colleges) indicate the number of credits received per term.

### Dean's List

Undergraduate students who attempt at least 12 credit hours with all credits graded on the A-F option and who earn a 3.4 GPA for either spring or fall semester will be included on the Dean's List for that term. The Deans' Lists are not compiled for summer sessions. Any notifications or certificates indicating inclusion on the Dean's List for a particular term are issued by the student's academic dean.

### Examinations

Final examinations are held at the close of each term according to a schedule established by the university. An instructor may not change the date or time of a final exam without the approval of the dean of the college. Students may request permission from their college dean to reschedule a final exam if they have conflicting exams or if they have three final exams in 24 hours. Otherwise, permission to reschedule a final exam is granted by the dean only in very unusual circumstances. Deferred final exams may be authorized only by the student's academic dean or by the Schiffert Health Services.

### Re-examinations of Final Exams

Re-examination of one final exam is available only for students who are candidates for degree in the same term as the final exam.

After a term is over, a re-examination in one course in which the final grade earned is C- or below may be authorized if the student was enrolled in the course during the final term of his or her senior year and if a satisfactory re-examination in the course will qualify the student for graduation. The student must make the re-examination request to the dean and must complete the exam as soon as possible after the first examination.

For the student to be granted a re-examination, approval is required by the instructor, the student's department head, and the student's academic dean. In determining the validity of the student's request, consideration is given to class performance and completion of assigned work. The University Registrar provides verification of compliance with the requirements of this policy.

## Grade Appeal Procedure

As Per University policy, the assignment of a grade is the sole prerogative of the instructor of the class. It is incumbent on the instructor to establish the criteria for grading in the syllabus that is distributed at the beginning of the term. All grades are to be based on established grading criteria and not on personal conduct or opinions unrelated to academic standards. An individual student may not do extra work to raise his/her grade. If a student feels that a grade has been calculated incorrectly or has been assigned in a prejudiced or capricious manner, the student should discuss the matter with the instructor. If discussion between the instructor and the student cannot resolve the issue, the student should appeal to the department/division head. In the unusual circumstance that resolution does not occur at the departmental/divisional level, the student may appeal to the college dean who will attempt to reconcile the matter by whatever mechanism seems most appropriate for that college and for that case. A grade appeal must be made by the student as soon as possible but no later than the end of the student's subsequent term of enrollment after the grade in question has been assigned.

## Grades and Grade Points

The academic achievement of a student in a specific course is rated as follows:

Letter Grade	Grade Points for each hour	
A (Excellent)	4.0	<ul style="list-style-type: none"><li>• A grade of "I" (incomplete) may be given when the requirements of a course other than the final examination have not been completed due to illness or extenuating circumstances beyond the student's control. The "I" grade is the prerogative of the instructor.</li><li>• To remove an "I" grade, lecture course requirements must be satisfied during the student's first subsequent term of enrollment, and laboratory course requirements must be satisfied prior to the end of the first term during which the course is offered and the student is enrolled. Incomplete and "X" grades are automatically converted to "F" if requirements are not fully satisfied during the period of time allowed.</li><li>• An "NR" grade is assigned automatically by the system when a student is enrolled for a class and no other grade is assigned by the instructor. The "NG" is intended to be a grade distinguishable from those initially assigned by the instructor and thus to indicate clearly the origin of the grade.</li><li>• "W" Grade: Courses from which a student withdraws under the terms of the policy, will appear on their transcript with a "W" grade, but will not count in the GPA hours nor in any GPA calculations. The "W" signifies that this policy was invoked and does not reflect the rationale for its use. The reasons for use remain the student's purview.</li><li>• Grade Point Average (GPA) is computed by dividing the total number of quality credits earned by the total number of hours attempted at Virginia Tech, except courses passed on a Pass/Fail basis and courses with an "X" (Continuing Course). "NG" grades are computed as "F" grades in determining GPA. The GPA is unaffected by the "I" grade, unless or until the "I" is converted to an "F" for failure to complete the course requirements within the allotted time. All courses repeated count in the calculation of the grade point average unless changed to Pass/Fail per policy.</li><li>• Repeated Courses: A student may not repeat courses in order to improve his or her grade average where a grade of "C" or higher has been earned. An assigned grade of "A-D" for the second occurrence will be changed to a grade of "P" whenever a graduation analysis (DARS report) detects a repeated course with a "C" or better grade. Repeating a course where the course is "C-" or below, both instances of the graded course will be computed in the grade point average.</li></ul>
A-	3.7	
B+	3.3	
B (Good)	3.0	
B-	2.7	
C+	2.3	
C (Fair)	2.0	
C-	1.7	
D+	1.3	
D	1.0	
D- (Barely Passing)	0.7	
F (Failure)	0.0	
I (Incomplete)	---	
NG (No Grade)	---	
NR (Not Reported)	---	
P (Passing)	---	
RP (Repeated Course)	---	
S (Satisfactory/credits only)	---	
W (Course Withdrawn)	---	
X (Continuing Course)	---	

## Grades, Midterm

Midterm grades are produced for freshmen and transfer students whose first term of enrollment is fall semester. Beginning Fall 1996, students whose first term of enrollment is summer will also receive a midterm grade report during fall semester. "Satisfactory" is given for work earning a grade of C or better and "unsatisfactory" is given for work earning a grade of C- or below. The midterm grade is not part of the student's permanent academic record and is only intended to be an early indication of the student's progress.

## Graduation Requirements, Grade Hours Passed or Completed Toward

The "total credits" figure on the displayed grade report is not necessarily the same as the total hours (often referenced as hours passed) required for completion of the degree (not all credit hours are effective toward graduation requirements). Students are responsible for verifying required hours for completion by reviewing their degree analysis (DARS) with their advisor.

Listed below are a few examples of typical situations yielding "pass" hours which must be subtracted to determine the total credits useful toward graduation requirements:

1. Transfer and/or advanced placement credits that have been subsequently duplicated by courses at Virginia Tech.
2. Credits earned at Virginia Tech that have been duplicated by repeating courses or taking courses ruled to have duplicating credit.
3. Transfer credits allowed from a two-year college that are in excess of one-half of the total credit hour requirement for the curriculum.
4. Credits for **Physical Education Service Activities** courses (now listed under HNFE), which exceed a total of two, the maximum allowed toward a bachelor's degree.
5. Credits for military science that exceed the total specified by the college for the student's curriculum.
6. Credits on the pass/fail grading system that exceed 12 credit hours allowable exclusive of pass/fail only courses.
7. Credits for courses that do not count towards the degree, (e.g. UNIV 1004 College Success Strategies).

## Obsolete Academic Records, Evaluation of

Under the "Obsolete Academic Records Policy," former Virginia Tech students returning to the university after an absence of at least five years may request in writing to have their academic records evaluated by the appropriate academic dean. Such transcripts will be evaluated in the same manner that transfer student transcripts are considered; credits will be allowed only for those courses appropriate for the degree. The grades for these allowable courses will not be factored into the student's GPA, but all courses will remain part of the student's permanent record.

## Pass/Fail Grading System

A limited pass/fail (P/F) grading system is available to encourage students to enrich their academic programs and explore more challenging courses outside their majors, without the pressures and demands of the regular grading system. The P/F grading option is available to all undergraduates who have completed a minimum of 30 credit hours at Virginia Tech and have a cumulative GPA of 2.0 or above. These restrictions do not apply to courses that are only offered P/F. **No required course or course used for the Curriculum for Liberal Education may be taken on a "P/F" basis (unless only offered on a P/F basis).**

Under the pass/fail system students are allowed to attempt twelve (12) credit hours in their degree program on a pass/fail basis exclusive of courses only offered pass/fail. Students enrolled in five-year designated programs (College of Architecture and Urban Studies) may attempt twelve (12) credit hours or ten percent of the total hours required for the degree whichever is greater. Courses offered pass/fail only are not included in the twelve total hours allowable under the pass/fail system. Additional degree programs may not be used to increase the number of pass/fail credits that a student is permitted to use toward any degree. No more than two courses per term may be taken P/F, excluding physical education activity courses and required courses offered on a P/F basis only.

Under the P/F grading system, a "P" is granted for earning a "D" or better in the course; otherwise, an "F" is given. A "D-" is a failing grade under the P/F option. The "P" or "F" is recorded on the student's transcript and credit is given if the course is passed. If the course is failed, the "F" is considered equivalent to an "F" received under the "A-F" grading system and is included in calculation of the grade point average (GPA). Once credit is received for a course taken under the P/F system, the course cannot be repeated under the "A-F" grading system.

**Any course to be taken under the P/F option should be designated as such upon request for the course.** The student may change grading options to P/F until the drop deadline and to A-F until the deadline for resigning without penalty.

## Study Week

Study week refers to the last three calendar days of classes for each semester. All written work, with the exceptions noted below, should be assigned so that it can be graded and returned during a regularly scheduled class meeting of the term. In-class hour-long examinations or other major in-class written assignments or tests shall not be given during study week. The exceptions for undergraduate courses are:

1. Dates for turning in term papers and project reports may be set at the discretion of the instructor, provided that the student is not to be held responsible on the final examination for the subject matter therein.
2. In laboratory courses or other courses that do not warrant a final examination during the examination period, an examination, if required by the department and/or instructor, may be given during the last regularly scheduled laboratory or class period.
3. Regularly scheduled final examinations, when special permission has been granted by the dean of the appropriate college.

Graduate courses also have specific exceptions which may differ from those for undergraduate courses. Contact the Graduate School for details.

## Transfer Credits

Enrolled students in good standing at Virginia Tech must receive pre-approval from their academic dean's office to transfer credit to Virginia Tech. Pre-approval from the academic dean does not guarantee transfer of the course if the student has duplicate credit in the approved course. Students must review their degree requirements (viewing DARS) to assure credits are degree applicable. Students who have been placed on academic or judicial suspension by the University are not eligible to transfer credit for terms of enrollment that coincide with their suspension term(s).

The rules below govern the transfer of credit on a university level. Some colleges at Virginia Tech have additional policies and procedures regarding transfer credit. Students are responsible for consulting with the academic dean's office in the appropriate college to discuss their plans to transfer credit, and to request information on the college's specific policies and procedures regarding transfer.

1. Courses for transfer must be taken at an accredited college or university.
2. Courses must be college-parallel, not terminal courses in a vocational program.
3. Only courses with a "C" grade or better will transfer. Note: A "C-" will **not** transfer.
4. Credits will **not** transfer for students who are classified as non-degree-seeking students.
5. Course equivalencies will be determined by the Office of the University Registrar.
6. Credit hours transfer; grades do not transfer.
7. No more than 60 (sixty) semester hours may transfer from the Virginia Community College System (VCCS).
8. Of the last 45 semester hours before graduation, a maximum of 18 semester hours may be transfer hours.
9. Many colleges and universities will require a letter of good standing from Virginia Tech before they will enroll a student from another university who wishes to transfer credits back. Virginia Tech students can request this letter certifying their good standing by completing a "Request for Certification" form in the Office of the University Registrar.
10. Upon completion of the course(s) and posting of grades, students are responsible for requesting that an official transcript be sent directly to the Office of the University Registrar at Virginia Tech as soon as possible, but not later than two semesters after the work is completed.

## Withdrawal Grade Policy

The policy is intended to assist undergraduate students who find themselves enrolled in undergraduate level courses for which they are insufficiently prepared, or for those who initially enroll in majors that they subsequently change. Presidential Policy 196 allows currently enrolled students to designate a grading option of "CW" to a course. Courses with this option are not gradable but remain on the academic transcript with the letter grade of "W". A maximum of six (6) credit hours of undergraduate level coursework may be dropped beyond the normal six-week drop deadline date during a student's undergraduate academic career at Virginia Tech subject to the following stipulations:

1. Students must formally request to apply the W Grade option to a course by the Friday of the last full week of the classes of each term. The deadline appears in the deadlines listing of the online *Time Table of Classes*.
2. Courses with the new grade mode of "W" will appear on the transcript with a "W" grade, but will not count in the GPA hours nor in any GPA calculations. The "W" signifies that this policy was invoked and does not reflect the rationale for its use. The reasons for use remains the student's purview.
3. There are no refunds of tuition and fees as a result of application of the policy. However, utilization of this grade option policy may affect Reasonable Academic Policy requirements for continued receipt of federal financial aid. Students are urged to consult with their financial aid advisor.
4. A student decision to invoke this policy is irrevocable and unappealable.
5. Application of the W grade option may not be employed to reduce or obviate any penalty otherwise accruing to students under the University Honor System. Previously processed W grade options will be voided if the course is penalized per an Honor System action.
6. Students may request a W grade option change for any course, irrespective of the evaluation earned in it up to the point of their request for withdrawal. However, if a registration hold exists at the time of application of this policy, the student must take action to remove the hold within five (5) working days of the application or the request will be voided. Students are responsible for resolving their registration holds with the appropriate university office.
7. Students already enrolled when this policy takes effect who have exercised their option to use the previously existing Freshman Rule shall not be eligible to use this policy.

To exercise this option, interested students should see their academic advisor to obtain a course withdrawal form and submit it to their designated departmental representative and academic dean for approval.

## Curriculum for Liberal Education (CLE) at Virginia Tech

### Why We Have It (Statement of Purpose)

As a vital component of undergraduate education at Virginia Tech, the Curriculum for Liberal Education (CLE)—required of all undergraduates—empowers our students with a broad base of knowledge and transferable skills. Liberal Education provides students the opportunity for rigorous intellectual encounters with enduring human challenges and important contemporary problems, through wide-ranging exposure to multiple disciplines and ways of knowing,

Through the study of the Sciences, Mathematics, Social Sciences, Histories, Languages and the Arts, the CLE is designed to foster and develop intellectual curiosity and critical thinking; strong analytic, communication, quantitative, and information literacy skills; the capacity for collaboration and creative problem solving; the ability to synthesize and transfer knowledge; intercultural knowledge and understanding; and ethical reasoning and action. The CLE seeks to create the conditions for growing creative and intellectual engagement; civic, personal, and social responsibility; and lifelong learning.

### What Students Will Gain

A liberal education offers 21st century students the foundations of what they need to live and thrive as citizens in a globally engaged democracy, a knowledge-intensive economy, and a society where new ideas and understandings are essential to progress. The success of today's college students in their communities, workplaces, and across their lifetimes depends upon a complex and transferable set of skills and capacities. In their lives and in their careers, our students must be prepared to grasp complex problems, develop a global perspective on the diversity of human experience and knowledge, respond to changing demands, and articulate innovative responses and solutions. Today's students are very likely to change jobs and even careers several times over the course of their lives; and certainly, their roles and responsibilities in their families and communities will change and evolve over their lifetimes as well.

The breadth of a rigorous liberal education combined with the depth of specialized study in the student's primary academic discipline(s) --and evidenced in a demonstrated capacity to adapt and transfer knowledge, skills, and responsibilities to new settings and questions--is essential to the education of the whole student and sets the stage for a lifetime of learning and growth.

### Curriculum for Liberal Education (CLE) Areas of Study

Because the Curriculum for Liberal Education is a "living curriculum,"there will be some changes from year to year. Courses added to the CLE offerings are generally available to students immediately after being approved. Some CLE requirements are phased in over a multi-year period. Thus, it is essential that students continue to consult with their advisors. Please visit the CLE homepage at <http://www.cle.prov.vt.edu/> for more information, and for the *Curriculum for Liberal Education Guides*.

### Areas of Study

1	Writing and Discourse	6 credit hours required
2	Ideas, Cultural Traditions, and Values	6 credit hours required
3	Society and Human Behavior	6 credit hours required
4	Scientific Reasoning and Discovery	6 or 8 credit hours required
5	Quantitative and Symbolic Reasoning	6 credit hours required
6	Creativity and Aesthetic Experience	1 or 3 credit hours required
7	Critical Issues in a Global Context	3 credit hours required
**Students should consult with their advisors about specific college or departmental requirements in these areas.		

### Area 1: Writing and Discourse

6 credit hours (2 courses) selected from first-year writing courses. Students who entered the university prior to Fall 2005 and maintain continuous enrollment until graduation must meet the previous Writing Intensive (WI) requirement. Students should consult with their advisor.

Area 1 requirements reflect the centrality of discourse in the larger intellectual community. Our first-year writing courses introduce students to the interrelated and shared modes of verbal communication that are distinctive to college life - argument, interpretation, analysis, and metaphor and whose various usages substantially delineate what it means to become broadly educated. These beginning courses should be

thought of as the springboard for further writing and discourse throughout the undergraduate curriculum, especially in the disciplinary concentration.

In order to enable students to meet the aims both of liberal education and of professional preparation, we include writing in many courses throughout the university, even if it may not be the main intellectual skill emphasized in the course.

Students are encouraged to seek out courses that offer frequent opportunities for writing and related forms of discourse, both for the enhanced learning these courses can offer and for also their benefit to the student in terms of professional preparation. Many courses in the Curriculum for Liberal Education build upon the writing and verbal skills that are the direct goal of Area 1 by including a significant writing component and by encouraging the achievement of excellence in communicating ideas and knowledge.

Formerly, the CLE required writing-intensive (WI) courses to support the development of students' writing skills across the undergraduate career. To better facilitate and broaden this goal, the requirement evolved into a departmental requirement for Visual, Spoken and Written Expression (ViEWS). Development of these competencies may be fostered through specific courses in the major, courses outside the major, and/or previously designated WI courses.

Students may meet the first year writing requirement in one of three ways:

- A. By successful completion of the two-semester sequence, ENGL 1105-1106 or COMM 1015-1016;
- B. By successful completion of ENGL 1106 (for students who are exempted from ENGL 1105 based on standardized test scores and high school class rank). Students who successfully complete ENGL 1106 at Virginia Tech in the first enrollment with a C- or better receive pass/fail credit for ENGL 1105.
- C. By successful completion of ENGL 1204H (for students who meet English Department Honors standards or University Honors standards). Honors students who successfully complete ENGL 1204H at Virginia Tech in the first enrollment with a C- or better receive pass/fail credit for ENGL 1105.

**Other information:** Virginia Tech accepts ETS Advanced Placement credit for the freshman writing sequence

## **Area 2: Ideas, Cultural Traditions, and Values**

6 credit hours (2 courses) selected from approved CLE courses

Every student should be introduced to some of the ideas, cultural traditions, and values that have shaped the human world we now inhabit. An educated person sees the present in connection with the past, and understands that presently prevailing values and meanings derive from the creative thought and action of men and women who have preceded us. A study of influential texts, ideas, representative works of art and technology, and the development of cultural traditions begins to free the student from the superficial fads of the moment and from narrow provincialisms. By examining some of the enduring ideas about human nature and achievement past and present, the individual gains a greater degree of self-knowledge and is better able to formulate worthwhile aims and commitments.

Courses in this curricular area take the human condition and human values as their main focus, while dealing with a range of subject matters: philosophy, literature and communication, history, religion, the arts, and technology. Most of these courses deal with some aspect of Western cultural experience in its numerous varieties. Relatively neglected dimensions of this experience such as the experience of women and minorities will be acknowledged and dealt with, both as an integrated aspect of many existing courses and in separate courses which focus directly upon these dimensions. The foreign language courses approved for Area 2 study the literatures of other countries in their cultural contexts. Moreover, since we are living increasingly in a global cultural context, courses are included that introduce the student to formative non-Western ideas, arts, and traditions as well.

See the *Curriculum for Liberal Education Guides* for a listing of approved CLE courses in each Area of Study.

## **Area 3: Society and Human Behavior**

6 credit hours (2 courses) selected from approved CLE courses

Human beings are not only participants in the world of human culture; we are also observers of it. The cultivation of systematic approaches to the study of humanity is one of the great achievements of the human intellect. Every student should therefore be introduced to the sciences of society and human behavior, a goal that can be accomplished through several avenues: through the study of psychology; through the study of social structures such as government, family, community, or economy; or through more wide-ranging examination of social patterns and processes. Such studies may examine past as well as present, non-Western as well as Western societies.

Courses in this curricular area are best characterized by their methods of study and theoretical frameworks. They look for regularities in human behavior rather than giving primary attention to the unique or non-repeatable aspects of life. If not quantitative, they tend at least to be descriptive. When varied human values and allegiances nevertheless make their appearance within these disciplines, they do so more as objects to be investigated than as commitments to be honored.

See the *Curriculum for Liberal Education Guides* for a listing of approved CLE courses in each Area of Study.

## **Area 4: Scientific Reasoning and Discovery**

6 credit hours of lecture (2 courses); 2 credit hours of related laboratory (2 labs)\* selected from approved CLE courses

\*Please note: Students should consult with their advisor as to what are the CLE Area 4 requirements in their specific college or department.

For many students at Virginia Tech, acquiring detailed knowledge of one or more of the natural sciences is essential. But for all students, a liberal education involves the study of what science is, of how it can be conducted, of what it can and cannot tell us about the world. Without scientific study and the experience offered by a laboratory, students perceive only vaguely how and why science functions as a crucial standard for rational knowledge and inquiry in modern life. The study of a science engages the student in analysis and deduction as well as empirical experimentation -- that is, in scientific reasoning and discovery.

The impact of the natural sciences and technology on our globally interdependent world is one of the most important realities we face as we enter the 21st century. The science courses in the Curriculum for Liberal Education have a special role in educating students about the critical relevance of scientific knowledge to the potentialities and dilemmas of our natural and social environments.

See the *Curriculum for Liberal Education Guides* for a listing of approved CLE courses in each Area of Study.

### **Area 5: Quantitative and Symbolic Reasoning**

6 credit hours (2 courses) selected from approved CLE courses

Like writing, mathematics is essential to intellectual inquiry in many areas. It is a basic language of the natural and social sciences and has become a useful tool for research in the humanities. The technological uses of mathematics and related forms of symbolic analysis are of tremendous significance to human society. Furthermore, the history of quantitative and symbolic reasoning as an intellectual discipline is linked with philosophy, the arts, and other aspects of human culture. Thus, a broad education must include these forms of reasoning, both as skills and as central modes of human thought. Mathematics, statistics, and certain areas of computer science and philosophy can all contribute to broadening a student's knowledge of quantitative and symbolic reasoning.

A diagnostic formula and testing procedure has been derived to predict readiness for Engineering/Science Calculus at Virginia Tech. A precalculus course, Math 1015, has been developed for those students who need further preparation. You can obtain information about the math diagnostic test from your advisor.

Many departments throughout the university have specific math sequence requirements. Be sure to check with your advisor about the requirements for your program.

See the *Curriculum for Liberal Education Guides* for a listing of approved CLE courses in each Area of Study.

### **Area 6: Creativity and Aesthetic Experience**

1 or 3 credit hours selected from approved CLE courses. Students in the College of Science and most majors in the College of Liberal Arts and Human Sciences must take (1) 3-credit-hour course. Students should consult with their advisors about specific college or departmental requirements.

The arts contribute significantly both to the experience and the interpretation of human life. Creativity and aesthetic response criss-cross the boundaries between intellectual ideas, the imagination, and actual design. Moreover, the arts are always intimately linked with the material culture of a society -- its modes of production and design -- as well as with its values and ideas. Thus, the arts can be studied and experienced in a variety of ways: as "high culture", as a means of tracing the history and ideas of particular societies, and as an active process of creative design and expression in many different physical forms. The metaphorical and intuitive thought processes that are essential to making and experiencing works of art are woven into many other human cultural and creative activities. Thus, the arts have an important role to play in broadening our sensibilities. Most artistic media include a highly public dimension -- concerts, exhibitions, performances, publications, public installations, and the built environment -- in which the creative works of artists, designers, and their collaborators are accepted or contested as meaningful elements of the larger social fabric. A guided exposure to the arts can provide a valuable framework for continued appreciation of, and participation in, the arts beyond college.

See the *Curriculum for Liberal Education Guides* for a listing of approved CLE courses in each Area of Study.

### **Area 7: Critical Issues in a Global Context**

3 credit hours (1 course) selected from approved CLE courses

Global interdependence is a powerful fact of life as we enter the 21st century. The dilemmas and possibilities humankind faces cannot be effectively addressed by any single culture or group of people acting alone. An awareness of critical issues of the day is thus an essential extension of liberal education and prepares students to respond thoughtfully to the complex world in which they live. As a state institution of higher education, Virginia Tech has a responsibility to prepare students to react creatively and constructively to the social, international, intercultural, and environmental challenges that confront the Commonwealth and the world.

The university requires that undergraduates take at least one course that deals in a substantial way with major issues of critical importance

for the larger global society. Courses that satisfy this requirement can be taken in any area of the curriculum, including the major, the Curriculum for Liberal Education, or electives. Students may select from a wide range of courses that focus on major international and intercultural issues in contemporary world affairs, including such areas as politics, the management of conflict, the roles of economic competition and cooperation, demographic issues, and the emerging world order. Many science courses in Area 7 will examine global issues associated with environmental decline and restoration. Some engineering courses study the role of technology as a major force in shaping the cultural and economic conditions of human societies. Other courses include comparative or cross-disciplinary examinations of cultures, societies, and belief systems, including those of developing countries. Other courses examine the social and personal implications of cultural, racial, and gender-based differences. Whatever the topical focus of the course, all Area 7 courses utilize interdisciplinary approaches in which a number of relevant factors - historical, ethical, technological, cultural, and/or scientific -- are brought to bear on the issues being studied.

See the *Curriculum for Liberal Education Guides* for a listing of approved CLE courses in each Area of Study.

Please note, there are some differences among colleges and departments as to which Curriculum for Liberal Education courses students should take to fulfill their CLE Areas of Study. Please consult your advisor and the [\*Curriculum for Liberal Education Guides\*](#).

- 

## Appeals

Under extenuating circumstances, the student's academic dean may present, on behalf of the student, appeals for re-admission and other exceptions to academic eligibility policies to the Virginia Tech Academic Appeals Committee. Students presenting appeals based on medical reasons must request recommendations from the Student Health Evaluation Committee. Students may appeal other academic decisions made by their college associate dean to the college dean.

## Auditing Courses

A student may enroll as an auditor in any class other than laboratory classes and studio courses, with the permission of both their academic advisor and the class instructor. The lecture portion of laboratory-linked courses and courses with computation periods may be designated as eligible for audit at the request of the academic department head (of the course in question) and on the approval of the student's academic dean. Auditors may not add or drop an audit option after the last day to enter classes. Students will not be allowed to register for credit in any course previously audited. Students may not unofficially attend class(es).

## Class Level

A student must have received credit for at least 30 hours to be classified as a sophomore, at least 60 hours to be classified as a junior, and at least 90 hours to be classified as a senior.

## Course Prerequisites (University Policy on)

Many course offering departments enforce prerequisite checking at registration. The automated system checks the student's academic history and/or current enrollment for verification of compliance. Students without the required prerequisite will be prohibited from enrolling. On occasion, students are permitted to take courses without having the specified prerequisites only upon obtaining the consent of the instructor. Students who enroll in a course for which they clearly have not satisfied the prerequisites or equivalent or obtained the appropriate permission may be dropped from the course. Deliberately false statements testifying to the satisfaction of prerequisites constitute a violation of the honor code. Students have the right to appeal a decision about prerequisites to the head of the department offering a course. Students should recognize that 3000 and 4000 level courses assume a certain level of academic maturity and general background regardless of the stated prerequisites. The course instructor can be consulted regarding the implications of this expectation for a specific course.

## Enrollment, Semester Hour

Minimum full-time enrollment for undergraduate and associate degree students is 12 hours per semester in regular A-F option or P/F option. For each summer session, the minimum is 5 hours. Audit hours are not used in establishing minimum full-time enrollments.

**Full-time enrollment for graduate students is 9 hours or more in regular A-F option, P/F option, or equivalent credit. For each summer term, the minimum is 3 hours.** Neither the payment of full fees nor compliance with maximums established as a condition of employment or appointment is a basis for deviation from the definition above.

## Graduation With Distinction

Graduating with distinction is an honor bestowed on those who earn a 3.4 or higher and who complete no less than 60 hours at Virginia Tech. Distinction is denoted on the diploma and on the transcript. Levels of distinction are:

1. Students with a cumulative GPA of 3.8 or greater are graduated ***Summa Cum Laude***.
2. Students with a cumulative GPA of 3.6-3.7999 are graduated ***Magna Cum Laude***.

3. Students with a cumulative GPA of 3.4-3.5999 are graduated **Cum Laude**.

Grade Point Averages are not rounded in qualifying a student for distinction. In computing eligibility for graduation with distinction, only undergraduate level work attempted at Virginia Tech will be used. Students may not use hours earned at Virginia Tech as an associate, professional, or graduate level as part of the 60 semester hours required to earn distinction. The notation of distinction on the diploma and on the transcript is independent of the notation of a degree in honors, if applicable. (See section on "[The Honors Program](#)" for information about graduating *in honors*.)

### Limits on Acceptable Credits for Degrees

Not more than 6 credit hours earned from extension courses, radio courses, television courses, and intensive courses (e.g. taken while in active military service, etc.) will be accepted for undergraduate degree credit. Thirty-eight hours of advanced placement credit and/or international baccalaureate and/or Cambridge International Examination credit may be accepted towards the undergraduate degree.

### Readmission through the University Registrar or Academic Dean

Formerly enrolled students who have greater than the 2.0 GPA overall may seek readmission via web course request form if they are eligible to return. Students returning from academic suspension should consult their academic dean's office for readmission procedures. (These procedures vary from college to college within the university.)

Formerly enrolled students, not in good academic standing who stop enrollment or resign for personal reasons, and later complete course work at another college or university are required to submit their transfer transcripts to certify good standing at all institutions. Academic standing and student conduct at other institutions are considered in the deliberation for approval for readmission.

Formerly enrolled students in good academic standing who resign for personal reasons, do not continue enrollment at Virginia Tech, and later complete course work at another college or university are required to submit their transfer transcripts to their academic dean prior to or during their first term of re-enrollment.

### Registration, Requirements for

**Demographic Information:** Virginia Tech policy requires annually the collection of specific demographic data for each student: emergency contact entry or emergency contact confirmation, and VT alerts Opt In or Opt Out action.

**Local Mailing Address:** Virginia Tech policy requires the updating of a student's local mailing address to reflect the local residential address while enrolled in school.

**Conduct Policy:** Students must annually acknowledge the Virginia Tech's Student Conduct policy on Arrests and Convictions. The University enacted policy requiring all students, regardless of academic level or campus, to report any arrests, convictions, and/or protective orders to the university.

**VT Alerts:** Students must opt in or opt out of the Virginia Tech alert system annually.

Students will be prohibited from registration until the above information is provided.

**Missing Person Contact:** Student(s) may denote a specific third party as emergency contact as primary in cases of missing person(s). Visit Hokie SPA, choose the Hokie Plus menu, add 'new emergency contact'. In the pull down selection for relationships, choose « Missing Persons Contact ». In the case of such an emergency, the university will first contact the missing person designee before any alternate emergency contact(s).

### Resignations

A student may resign without academic penalty by completing an official Virginia Tech resignation form on or before the published resignation deadline for each term. The student can request this resignation form from either the University Registrar's Office, the University Registrar's website, or the academic Dean's Office. The student's grade report and permanent record will show that he/she was enrolled for the term and that he/she resigned on the specific effective date.

A student who resigns after the stated deadline without written authorization for resignation-without-penalty by the respective academic dean will receive automatic "F" grades in all courses in which the student is enrolled. The transcript will carry the notation, "Suspended by committee action for unauthorized resignation," and the hours for which "F" grades were received will be included in the cumulative GPA for both academic eligibility and graduation requirements.

In the case of authorized resignations after the deadline, grades will not be assigned, and the academic dean will determine the student's academic status (whether or not he/she is eligible to return) based on the student's previous record.

### Satisfactory Progress

University policy requires that all students meet the following minimum criteria to be certified as making satisfactory progress toward a degree.

1. Have an overall grade point average at or above that specified in the academic eligibility schedule (determined at the end of the Spring semester).
2. Upon having attempted 36 semester credits (including transfer, advanced placement, advanced standing, credit by examination, and freshman rule hours), students must have passed at least 12 semester credits of Curriculum for Liberal Education requirements.
3. Upon having attempted 72 semester credits (including transfer, advanced placement, advanced standing, credit by examination, freshman rule hours), students must:
  - I. have passed at least 24 semester credits of Curriculum for Liberal Education requirements;
  - II. be enrolled in a degree-granting program; and
  - III. be certified at the close of the academic year by their department as making satisfactory progress toward a degree, based upon pre-established minimum criteria from departmental checksheets.
4. Upon having attempted 96 semester credits (including transfer, advanced placement, advanced standing, credit by examination, and freshman rule hours), students must have an in-major grade point average of 2.0 or above.

Colleges and departments may impose additional requirements. It is the student's responsibility to become familiar with the requirements of his or her college.

### **Transfer Work while on Suspension**

A student may not receive credit for course work taken at another college or university during any period in which the student has been placed on suspension by Virginia Tech for academic or disciplinary reasons.

### **Undergraduates Taking Graduate Courses**

Undergraduate students may enroll in graduate-level course work in the senior year, provided they have an overall GPA of 3.0 or above and the written approval of the department head and the Graduate School. To enroll in graduate-level course work, the undergraduate student must apply to the Graduate School as a dual registrant. Each term that a student is dually enrolled, he or she must fill out a form in the University Registrar's Office to indicate which courses are being counted for undergraduate credit and which for graduate credit. If graduate courses are used to satisfy undergraduate degree requirements, they cannot be used to satisfy any advanced degree requirements at Virginia Tech. Students may not concurrently have dual status while enrolled in an Undergraduate Dual status.

Graduate courses may not be taken without prior written approval from the Graduate School.

#### Accelerated Undergraduate/Graduate Degree status

High achieving and talented seniors may apply for Accelerated status. The minimum admission requirements are:

- o An advisor for the proposed accelerated program
- o Listing of courses for use on the plan of study
- o Minimum grade point average of 3.3
- o Some programs may include additional requirements

The Accelerated Undergraduate/Graduate Degree status allows students with specific qualifications to allow certain courses to count toward both the undergraduate and graduate degree:

- o No more than twelve (12) credit hours may be used
- o All courses must be at the 4000 level or higher
- o No more than six (6) credit may be used at the 4000 level.
- o A grade of B or higher must be earned in each course. No courses may be taken pass/fail.

### **125 Percent Rule for In-State Tuition**

The Code of Virginia establishes rules for eligibility for in-state tuition for all students enrolled at public institutions in the Commonwealth of Virginia. Section 23-7.4:F of the Code of Virginia further requires undergraduate students to maintain progress toward the degree to comply with continued eligibility for in-state tuition. Students with entry dates Fall 2006 and after may not exceed attempted hours that total 125% of the minimum credit hours needed for a specific degree program and retain in-state tuition eligibility. Students exceeding 125% will be assessed a surcharge for each semester of continued enrollment after exceeding the credit hour threshold. For the purpose of this state law, all credits attempted (Virginia Tech and Transfer) are used in the calculation of the percentage. The requirement does allow the subtraction of credits awarded for Advanced Placement, Advanced Standing, International Baccalaureate, and Credit by Exam from the attempted totals. Important resources to assist you so as to avoid the credit hour surcharge are:

- Undergraduate Degree Hours and 125% Tuition Credit Hour Threshold Table ([http://www.registrar.vt.edu/registration/125\\_percent\\_table.php](http://www.registrar.vt.edu/registration/125_percent_table.php))
- Credit Hour Surcharge Costs, Virginia Tech Bursar (<http://www.bursar.vt.edu/tuition>)  
Click on "surcharge" link. Please note that the Excess Credit Hour Tuition surcharge is per credit hour. To calculate the total surcharge for a term, multiply the surcharge amount per credit hour by the number of credit hours enrolled (up to 12 credit hours per semester; 5 credit hours per summer term).
- [State Code of Virginia, Section 23-7.4:F](#)

Students with declared second majors and minors: the total credits additional required for earning of the second degree and/or minor will be added to the total prior to computing the 125 percentage. For example, as student's first degree requires 120 hours. The second degree requires 30 additional hours. The 125% will be computed based on 150 hours.

## Changes in Catalog Information

- **Caution:** The course offerings and requirements of Virginia Tech are under examination and revision continually. This catalog presents the offerings and requirements in effect at time of publication, but in no way guarantees that they will not be changed or revoked.
- The regulations and policies may change to meet new needs or as legislation is approved. Such changes are published in the President's Policy Memoranda.
- The policies and regulations that appear in this catalog are not meant to form a contract or to constitute an offer of one. Current information may be obtained from the following:
  - *Undergraduate Admission Requirements:* **Director of Admissions.**
  - *Course Offerings:* **Academic departments offering the course(s) in question.**
  - *Degree Requirements:* **Office of the University Registrar, head of major department, or academic dean of the college.**
  - *Fees and Tuition:* **Office of the University Bursar.**

## Course Numbering System

The first digit in course number designations denotes the year in which the course ordinarily is found in the curricular outlines or "checksheets," which are available from the major department or academic advisor. The second and third digits make the course number unique within a department. The fourth digit is 4 if the course is a one-term terminal course, 5 if the course is the first term in a sequence, and 6 if the second term in a sequence. As a general rule, courses with 0 as the first digit do not carry university credit. Agricultural Technology courses, however, are an exception.

## Cross Listed Courses

Courses that are cross listed between departments may not be counted twice toward meeting graduation requirements. No credit will be allowed for a course taken that duplicates subject matter in a course for which credit already has been received. Cross listed courses are indicated in the title line of course descriptions; for instance, REL 3454 is listed as follows:

- 3454 (PHIL 3454): PHILOSOPHY OF RELIGION

The first number is the Religion course number, while the number in parentheses indicates that the course is cross listed with Philosophy.

## Graduate Courses Listings

Information regarding graduate courses (5000 and above) may be found in the [Graduate Catalog](#).

## Prerequisite Notations and Requirements

Students are permitted to take courses without having the specified prerequisites only upon obtaining the consent of the instructor. Students who enroll in a course for which they have not clearly satisfied the prerequisites or equivalent, or obtained the appropriate permission, may be dropped from the course. Deliberately false statements testifying to the satisfaction of prerequisites constitute a violation of the honor code. Students have the right to appeal a decision about prerequisites to the head of the department offering a course. Students should recognize that 3000 and 4000 level courses assume a certain level of academic maturity and general background regardless of the stated prerequisites. The course instructor can be consulted regarding the implications of this expectation for a specific course. Students must consult with the instructor if they wish to use the Pass/Fail option in a course for which they do not have the prerequisites.

Students should note prerequisite and corequisite requirements as stated in the course descriptions. Courses in a series may be taken independently where the series of course numbers is separated by commas (e.g., 3135, 3136), in the catalog listing. Where the series of course numbers is connected by hyphens (e.g., 4135-4136), the first course is prerequisite for the next one.

## Tables

The numbers on the right hand side of tables listed under certain departments denote the number of hours the class meets each week during the term and, in parentheses, the number of credits allowed for the course. A listing such as 3(3) means that the course meets three hours each week and three credits are earned.

**For further information:** 540/231-8440

The University Academic Advising Center serves the university community in several ways. First, it administers the University Studies program for new undergraduate students who want to explore a variety of degree programs before they commit to one particular major. Students who enter Virginia Tech as University Studies students are not limited to pursuing a specific major in their first year. With the guidance of a professional academic advisor students research the full range of degree programs related to their interests and design programs of study that meet graduation requirements while providing the academic flexibility to pursue whichever degree program they ultimately choose. Second, the Advising Center assists new students who intend to reapply to competitive admission majors. Advisors work with these students in developing programs of study that meet the established criteria for admission into to their chosen major. For both of these student populations the University Academic Advising Center serves as both the college and department, providing administrative services, dean's office services, and academic advising until the students enter a specific major.

## University Studies

University Studies is a major but it is not a degree program. University Studies offers a structured advising program that provides students with the necessary support and strategies to investigate and compare academic disciplines so that they can make informed decisions about the degree programs they will pursue. Students can explore any major available at the university while completing course requirements toward a baccalaureate degree. To ensure that students graduate in a timely manner, University Studies requires all students to enter a specific degree program by the time they have earned 60 credits toward graduation (approximately the end of the sophomore year) or have attempted 72 hours.

## Restricted Majors

University Studies students can pursue any major offered at the university; however, students should be aware that some majors are competitive for internal transfer. These programs have established specific criteria and application procedures that students must fulfill in order to be considered for internal transfer into the major. In general, these criteria require students to demonstrate proficiency in designated core courses and, for some programs, in introductory major courses before they are eligible to apply. University Studies students enter and graduate from these restricted programs each year; however, since there is no guarantee of acceptance to these programs, students are encouraged to investigate alternative majors even as they prepare to enter a restricted program.

[TOP](#)

## Restricted Programs for Internal Transfers:

### College of Agriculture and Life Sciences

Human Nutrition, Foods and Exercise

### College of Architecture and Urban Studies:

Architecture  
Art and Art History - Visual Communication Design; Studio Art  
Industrial Design  
Interior Design

### Pamplin College of Business:

Accounting and Information Systems  
Business Information Technology  
Finance, Ins. & Business Law  
Hospitality and Tourism Management  
Marketing  
Management

### College of Engineering:

All majors

Academic advisors in the University Academic Advising Center are familiar with the internal transfer criteria and procedures for all restricted programs and will assist students in fulfilling these requirements.

[TOP](#)

## Curriculum for Liberal Education

All undergraduate students at the university, regardless of their majors, are required to fulfill general education course requirements in English, mathematics, science, social science, humanities, etc. There is a standard set of these courses, the [Curriculum for Liberal Education \(CLE\)](#), that all degree programs incorporate in their graduation requirements.

In general, CLE requirements are completed in the freshman and sophomore years. Some majors are flexible with regard to which CLE courses can be used to fulfill degree requirements; other majors designate specific CLE course selections. Academic advisors assist University Studies students in selecting courses that apply toward as many of the majors a student is considering as possible. Thus, students fulfill degree requirements for graduation while they are exploring majors and are usually able to graduate on time.

### Typical First Year Program

First Semester	Second Semester
Mathematics	First-Year Writing
Natural science (lab-if required by intended major)	Mathematics
Social science	Natural science (lab-if required by intended major)
Humanities/elective	Social science
	Humanities/elective/major specific course

For University Studies students, as for most students at the university, the first year is primarily devoted to fulfilling Curriculum for Liberal Education requirements. Of course, University Studies' students' programs of study vary depending upon the major or majors they are considering. Specific course selections are determined in individual consultation with an academic advisor.

## Graduation Requirements

The requirements to graduate in a specific major are determined by the department and college conferring the degree. In general, students are required to have a minimum 2.0 overall grade-point average and a minimum 2.0 grade-point average in their major in order to graduate. The number of credit hours required for a baccalaureate degree varies from 120 to 136 hours, depending upon a student's major and degree program.

## The Honors Program

Students with exceptional intellectual and creative abilities are encouraged to participate in the University Honors program. Through honors sections of regular courses, honors seminars, and independent study opportunities, the Honors Program offers students unique and challenging intellectual experiences. Entering students are invited to participate in the Honors Program if they 1) have a cumulative score of 1350 or above on the Scholastic Aptitude Test (SAT) (critical reading and mathematics) or a minimum ACT composite score of 30, and 2) have a cumulative GPA of 3.80 (as reported on their high school transcript). Current Virginia Tech students may apply to participate in the program if they have a 3.60 cumulative GPA or better (grade-point average) while enrolled as full-time and have at least four semesters remaining before they graduate.

## **Dean's List**

University Academic Advising Center students who demonstrate academic excellence are named to the Academic Dean's List and are awarded a Dean's List certificate. Students must be enrolled in a minimum of 12 graded hours (A-F) and must achieve a 3.4 GPA or higher in the fall or spring term to qualify.

## **Pre-Professional Advising**

Students who want to enter professional schools but who have not yet chosen an undergraduate major will find that the university offers a variety of degree programs that provide excellent preparation for advanced training in professional fields. Though some professional programs, such as medicine, dentistry, and veterinary medicine, require students to complete a minimum number of credit hours at the undergraduate level in chemistry, biology, mathematics, etc., professional schools do not dictate that students pursue specific undergraduate majors. Some examples of undergraduate majors that are frequently chosen as preparation for professional training appear below, but a student can pursue almost any undergraduate degree and be competitive for admission to a professional program.

## **Education Abroad**

Opportunities to study at institutions in other countries are available to all qualified students, regardless of their major. Study abroad offers students a unique opportunity to learn about other cultures and peoples while earning college credit. Students who intend to participate in an overseas study experience should discuss their intentions with their advisor early in their academic career.

## University Honors Program

In keeping with the university's commitment to provide educational opportunities consistent with the ability of the individual student, Virginia Tech invites a select group of students to enroll in Honors. University Honors provides a combination of special sections of regular courses, honors seminars and colloquia, tutorials, independent study, and undergraduate research. Honors courses enable students of superior academic talent to be challenged to their full intellectual capacity. The honors faculty includes Alumni Distinguished Professors, University Distinguished Professors, and members of the university's Academy of Teaching Excellence. University Honors represents a combination of study within departments and course work cutting across departmental lines. The program is designed both to broaden and deepen the student's intellectual life.

### Participation

Incoming freshmen are invited to apply for University Honors on the basis of their standardized test scores and high school records. Transfer students and continuing Virginia Tech students who achieve a GPA of 3.60 or greater are invited to apply. Students remain in the program on the basis of their continued high academic performance and the pursuit of one of five honors diplomas.

### Course Selection

Course selection is not necessarily tied to the student's major field of study.

Lower division honors students may participate in honors reading groups, honors colloquia and honors sections of regular courses. Normally, honors sections of regular academic courses are offered in biology, political science, history, economics, chemistry, English, mathematics, and psychology. Occasionally, honors sections are offered in other subject areas as well.

### Honors Diplomas

An honors diploma is a designation to the undergraduate diploma. One University Honors diploma would not suffice at a University such as Virginia Tech. We have created five Honors options for the students eligible for Honors.

Degree	Description
Commonwealth Scholar	Considered to be a viable diploma option for transfer students entering University Honors late in their college career.

Scholar in Health Studies	Created for students desiring to enter a career in a health related field gained in connection with the minor in Medicine and Society.
Honors Scholar	The baseline diploma for Honors students who do not complete an Honors thesis.
In Honors	For students desiring to enter graduate school or professional school immediately following graduation and are interested in undergraduate research. Thesis required.
Honors Baccalaureate	The most rigorous diploma available to University Honors students. Designed to prepare students for graduate or professional school immediately following graduation. Thesis required.

Throughout the course of an Honors student's career there are several benchmarks for obtaining the various diplomas. Following the freshman year, students declare their diploma intention. Progress towards the diploma is reported annually. As a senior, University Honors students order their honors diplomas.

## Graduation Requirements

- University Honors students must maintain a cumulative grade point average of 3.50 or higher.
- University Honors students must meet all the requirements determined by the department of one major and college conferring the degree.
- University Honors students must complete all expectations for one University Honors degree.

## Honors Advising

Each University Honors student is assigned a staff member in the Honors office for Honors advising once he/she has declared candidacy for a University Honors diploma.

Additionally, departmental Honors Advisors work specifically with University Honors students. These departmental Honors Advisors act as an extension of the University Honors office to help students with exceptional advanced opportunities within their chosen field of study.

Advising for major national scholarships like Rhodes, Marshall, and Fulbright Scholarships are available through University Honors for all Virginia Tech students.

## Honors Communities

There are opportunities for Honors students to become part of one of the Honors communities: Hillcrest hall and the Honors residential college.

The Hillcrest community is home to 109 students and is housed in Hillcrest Hall. The Honors residential college is located in Ambler Johnson Hall and is home to 317 students along with Faculty Principals in residence. Both communities are composed of students from all majors and levels, freshmen through seniors.

While students are encouraged to apply for the communities, Honors residence is not a requirement. Many Honors students also participate in Living Learning Communities offered throughout the University.

## Undergraduate Course Descriptions

### 2004H: CAREERS IN MEDICINE

This class is designed to help students thinking of a career in healthcare investigate some of the many professional tracts and careers available. Representatives from some of the professional schools and professionals will present different career paths that are available to students interested in health care. The class will also cover some of the issues in biomedical ethics, health policy, how to prepare for admission test (such as MCAT, DAT, etc.), how to finance professional school, and the "nuts and bolts" of the application process. (1H,1C)

### 2974H: INDEPENDENT STUDY

Variable credit course.

### 2984: SPECIAL STUDY

Variable credit course.

### 2984H: SPECIAL STUDY

Variable credit course.

### 3004H: HONORS COLLOQUIA SERIES

Topics vary by semester, check Honors webpage for current and upcoming offerings. (2H,3C)

3954H: STUDY ABROAD

Honors Section Variable credit course.

4974H: INDEPENDENT STUDY

Variable credit course.

4984: SPECIAL STUDY

Variable credit course.

4984H: SPECIAL STUDY

Variable credit course.

4994H: UNDERGRADUATE RESEARCH

Variable credit course.

## Overview

The College of Agriculture and Life Sciences provides an education in the science and business of life. Basic life sciences and animal, plant, and food sciences – not to mention environmental sciences, human health and nutrition, and economic development – are just some of the choices available to you as an undergraduate major. If your ultimate goal is to apply to professional schools such as veterinary medicine, physical therapy, dentistry, pharmacy, and graduate, you will want to explore the excellent pre-health preparation offered in many of the college's majors. Excellent faculty and academic advisors are eager to work with you. You will also find more than 30 student organizations and nationally-competitive teams in the college. The college offers the educational environment and learning experiences graduates need in order to develop skills for addressing the challenges facing society and the world today. You may work beside scientists in their laboratories or participate in internships with business or industry.

## Undergraduate Programs

The undergraduate program in the college is organized into majors designed for students with widely different interests. These majors permit the student to achieve a satisfactory degree of specialization while providing the fundamentals necessary for continuing professional growth after graduation.

Undergraduate majors offered:

Agribusiness	Biochemistry	Food Science and Technology
--------------	--------------	-----------------------------

Agricultural Sciences	Crop and Soil Environmental Sciences	Human Nutrition, Foods and Exercise
Agricultural Technology (associate degree)	Dairy Science	Landscape Contracting
Animal and Poultry Sciences	Environmental Horticulture	Applied Economics Management
Environmental Sciences		

Minors Offered:

Agribusiness Management	Entomology	International Agriculture
Agricultural and Applied Economics	Environmental Economics, Management and Policy	International Trade and Development
Animal and Poultry Sciences	Environmental Science	Leadership and Social Change
Civic Agriculture and Food Systems	Equine Science	Crop and Soil Environmental Sciences
Food Science and Technology	Dairy Science	Horticulture

Freshman students may enter the college with the designation LFSC (Life Sciences, Undecided). Upon completion of the freshman year, a college major should be selected.

See College of Engineering for Biological Systems Engineering.

[TOP](#)

## Residential Leadership Community

The Residential Leadership Community is a themed housing leadership program in which students study leadership while living in a cohort environment. The RLC strives to incorporate the best practices from both philosophies of academia and student activities. The RLC teaches comprehensive historical and social leadership theories and strives to develop communication, time-management, organizational skills, and group skills specific to individual students' majors and career goals through academic and experiential learning. The RLC is founded on a strong sense of purpose to build leaders that are socially responsible, educated in theory, demonstrate leadership accountability, and who grasp a deep understanding of effective leadership behaviors.

## Curriculum for Liberal Education and College Core Requirements

A description of the Curriculum for Liberal Education may be found in the Academics chapter of this catalog or on the Curriculum for Liberal Education website (<http://www.cle.prov.vt.edu/>). College specific requirements related to the Curriculum for Liberal Education (CLE):

### Area 1: Writing and Discourse

- Placement may reduce the minimum credits required in freshman English but does not change the total credits required for graduation.

### Area 3 - AAEC 1005/1006

- Majors in the Department of Biochemistry and Human Nutrition, Foods and Exercise are exempt from this requirement and may use other approved courses to satisfy Area 3 of the University requirement.

### Area 4: Scientific Reasoning and Discovery

- Most majors require eight credits each of chemistry and biology with laboratories. Refer to departmental check sheets for exceptions.

### Area 6: Creativity and Aesthetic Experience

- Satisfactorily complete a one credit hour course approved for the university Curriculum for Liberal Education.

Students who plan to transfer to Virginia Tech and major in the College of Agriculture and Life Sciences after two years of community or junior college enrollment are encouraged to complete as many of the curriculum for liberal education courses as possible before they transfer.

## The Honors Program

The University Honors Program is available to students in the College of Agriculture and Life Sciences. These programs provide an enriched environment for qualified students who are highly motivated and possess outstanding scholastic ability. Specific requirements for the three possible honors degrees are available from the honors program and participating departments.

## Deans List

An undergraduate student who attempts at least 12 credit hours graded on the A-F option and who earns a 3.4 GPA for either spring or fall semester will be included on the online Dean's List for that term. Please note: Student will not appear on the online Dean's List if they are listed in the system as confidential or if they do not have an active permanent address. Questions about omissions from the online list should be directed to the Office of the University Registrar.

## Pre-Professional Advising

Pre-health advising (e.g. pre-dentistry, pre-medicine, and pre-veterinary) is coordinated through the Office of Health Professions located in Career Services.

## Honor Societies

**Phi Beta Kappa** – Phi Beta Kappa is the oldest and most prestigious honor society dedicated to recognizing excellence in the liberal arts and sciences. Students in the College of Agriculture and Life Sciences who have exhibited outstanding academic ability in eligible coursework may be eligible for selection to Phi Beta Kappa.

**Phi Kappa Phi** - Phi Kappa Phi has chapters on nearly 300 select college and university campuses in North America and the Philippines. Membership is by invitation only to the top 10 percent of seniors and graduate students and 7.5 percent of juniors. Faculty, professional staff, and alumni who have achieved scholarly distinction also qualify. The Society's mission is "To recognize and promote academic excellence in all fields of higher education and to engage the community of scholars in service to others."

**Gamma Sigma Delta** - Gamma Sigma Delta is an organization having as its objectives the advancement of agriculture in all its phases, the maintenance and improvement of the relations of agriculture and related sciences to other industries, and the recognition of the responsibilities of those engaged in all aspects of agriculture to humankind. Our Society seeks to encourage high standards of scholarship and worthy achievements in all branches of the agricultural and related sciences as well as a high degree of excellence in the practice of agricultural pursuits.

## Scholarships

A number of scholarships are available for outstanding students enrolled in the College of Agriculture and Life Sciences. Descriptions and deadlines are available on the Scholarships and Financial Aid website.

## Undergraduate Research

Research opportunities and experiencing the excitement of discovery can play an important part in undergraduate training in science. College of Agriculture and Life Sciences departments offer diverse research opportunities in which students may choose to participate. Individuals interested in undergraduate research should contact faculty members in the departments where they wish to conduct research.

## International Study Opportunities

The Academic Programs Office in the college, in cooperation with the Office of International Research and Development, offers several avenues for students both in and outside the college to gain international knowledge and experience. These study opportunities allow students and faculty to become aware of and develop basic knowledge of food, fiber, and environmental issues in the world. Specific activities include study abroad programs and courses, international internships, formal student exchange programs, seminars and workshops on campus, and courses in the college which focus on international topics. In addition, the minor in International Agriculture is available which involves selecting 18 credit hours of study from a selected list of courses. Students wishing to explore this minor should contact the Office of Academic Programs in the college. All of the departments in the college offer education abroad opportunities and students wishing to explore these opportunities should contact the coordinating advisor in their department.

## Career Advising

Career advising is available from a number of sources. The university offers centralized career services and on-campus interviewing. The College of Agriculture and Life Sciences works with employers interested in hiring students with degrees from the college and organizes employer panels and information sessions. Every major has a departmental career advisor who specializes in guiding students from their field

towards career success.

Career Services offers each student a FREE Hokies4Hire account. Undergraduate students who are seeking any type of career-related employment, including internships, co-ops, career-related summer employment, and permanent positions are eligible to use Hokies4Hire. You may upload your resume and apply for jobs in Hokies4Hire. These include jobs with on-campus interviews as well as job postings. Additional information may be found at <http://www.career.vt.edu/H4H-OCI/H4HIndex.html>.

## Internship, Co-op Opportunities and Enrichment Programs

Students are encouraged to participate in internship and co-op opportunities to gain relevant work experience prior to graduation. Departmental career advisors can help students identify opportunities. In some cases, students can receive credit for qualifying work experience. Enrichment studies include field station opportunities, study abroad and summer laboratory experiences outside the university.

## Agricultural Technology Program

The Agricultural Technology Program offers a concentrated academic experience for individuals pursuing an associate degree in preparation for careers in the agricultural and green industries. Students can specialize in either Applied Agricultural Management or Landscape and Turf Management. Additional information is available at the program's website at [www.agtech.vt.edu](http://www.agtech.vt.edu). The program handles its own admissions. Applications and inquiries should be addressed to: Brenda French, Admissions Coordinator, 1060 Litton-Reaves Hall (0334), Blacksburg, VA 24061, or call 540-231-7649.

## Graduate Programs

At the graduate level, the college offers educational programs leading to the M.S. and Ph.D. Complete information on these programs may be found in the [Graduate Catalog](#).

## Course Requirements for Majors

Course requirements are listed under Section I, Curriculum for Liberal Education, College and Departmental Core requirements and Section II, specific requirements by departmental option. Section II also lists restricted and free electives by option area. Students are encouraged to complete minors or double majors in other departments. All options require 120 credit hours to graduate.

### I. Curriculum for Liberal Education, College and Departmental Core (Options A-D and F)

ENGL 1105-1106: Freshman English (Area 1, Liberal Education)	6
Ideas, Cultural Traditions, and Values (Area 2, Liberal Education)	6
AAEC 1005-1006: Economics of the Food and Fiber System (Area 3, Liberal Education)	6
Scientific Reasoning and Discovery (Area 4, Liberal Education)*	8
MATH 1525-1526: Elementary Calculus with Matrices (Area 5, Liberal Education)*	6
Creativity and Aesthetic Experience (Area 6, Liberal Education)	1
Critical Issues in a Global Context (Area 7, Liberal Education)	3
ACIS 2115: Principles of Accounting*	3
FIN 3104: Introduction to Finance or ACIS 2116: Principles of Accounting (these courses not required for Community Economic Development Option; both courses required for Financial Planning Option)	3
COMM 2004: Public Speaking*	3
ENGL 3774: Business Writing*	3

### II. Requirements for Options (Area of Specialization Requirement -- 18 hours)

#### A. Agribusiness Management Option

AAEC 2434: Foundations of Agribusiness	3
AAEC 3454: Small Business Management and Entrepreneurship	3
AAEC 3504: Marketing Agricultural Products	3
AAEC: 3015 AAEC Internship	1
AAEC 3604: Agricultural Law	3
STAT 3005, STAT 3615 or BIT 2405	3
AAEC 3014: Analytical Methods in Applied Economics*	3
Restricted elective, analytical methods	3

AAEC 4514: Advanced Agribusiness Marketing	3
AAEC 4424: Agricultural Financial Management	3
AAEC 4404: Agricultural Management and Problem Solving	3
AAEC 3024: Monetary and Global Issues in Applied Economics	3
Agricultural Economics Elective Courses	12
Restricted and Free Electives	26

### ***B. Environmental Economics, Management, and Policy Option***

AAEC 2434: Foundations of Agribusiness or AAEC 2104: Personal Financial Planning	3
AAEC 3004: Ag. Production and Consumption Economics	3
AAEC 4324: Rural and Regional Development Policy 3	3
AAEC 3314: Environmental Law (Area 7, Liberal Education)	3
AAEC 3324: Environment and Sustainable Dev. Economics	3
AAEC 4314: Environmental Economic Analysis and Mgmt.	3
AAEC 3024: Monetary and Global Issues in Applied Economics	3
ENSC 3604: Fundamental of Environmental Science or CSES 3604: Fundamentals of Environmental Science	3
AAEC 3015: AAEC Internship	1
STAT 3005, STAT 3615 or BIT 2405	3
AAEC 3014: Analytical Methods in Applied Economics*	3
Restricted elective, analytical methods	2-3
Additional Option Electives	9
Restricted and Free Electives	32-33

### ***C. International Trade and Development Option***

AAEC 2434: Foundations of Agribusiness or AAEC 2104: Personal Financial Planning	3
AAEC 3004: Ag. Production and Consumption Economics	3
AAEC 3204: International Agricultural Development and Trade	3
AAEC 3324: Environment and Sustainable Dev. Economics	3
AAEC 4324: Rural and Regional Development Policy	3
AAEC 4334: Applications in Rural Development	1
AAEC 3015: AAEC Internship	1
AAEC 3024: Monetary and Global Issues in Applied Economics	3
STAT 3005, STAT 3615 or BIT 2405	3
AAEC 3014: Analytical Methods in Applied Economics*	3
Restricted elective, analytical methods	3
IS 2054: Introduction to World Politics	3
IS 2064: Global Economy and World Politics	3
Additional Option Electives	12
Restricted and Free Electives	28

### ***D. Community Economic Development Option***

AAEC 2434: Foundations of Agribusiness or AAEC 2104: Personal Financial Planning	3
AAEC 3004: Ag. Production and Consumption Economics	3
AAEC 3324: Environment and Sustainable Dev. Economics	3
AAEC 4324: Rural and Regional Development Policy	3

AAEC 4334: Applications in Rural Development	1
AAEC 3015: AAEC Internship	1
AAEC 3314: Environmental Law or AAEC 3604 Agricultural Law	3
AAEC 3024: Monetary and Global Issues in Applied Economics	3
STAT 3005, STAT 3615 or BIT 2405	3
AAEC 3014: Analytical Methods in Applied Economics*	3
GEOG 4084: Intro to Geographic Information Systems	3
Additional Option Electives	15
Restricted and Free Electives	31
*Alternative courses available to meet requirement(s). See an AAEC advisor.	

### ***E. Veterinary Business Management Option***

*Curriculum for Liberal Education, College and Departmental Core*

BIOL 1105, 1106, 1115, 1116: Principles of Biology (for Area 4)	8
CHEM 1035, 1036, 1045, 1046: General Chemistry	8
AAEC 2434: Foundations of Agribusiness	3
AAEC 3454: Small Business Management and Entrepreneurship	3
AAEC 3504: Marketing Ag Products	3
AAEC 3604: Agricultural Law	3
AAEC 4424: Agricultural Financial Management	3
AAEC 4404: Agricultural Management and Problem Solving	3
AAEC 3024: Monetary and Global Issues in Applied Economics	3
STAT 3005, STAT 3615 or BIT 2405	3
AAEC 3014: Analytical Methods in Applied Economics*	3
CHEM 2535-2536, 2545-2546: Organic Chemistry	8
PHYS 2205-2206, 2215-2216: General Physics	8
BCHM 2024: Concepts of Biochemistry	3
Area of Specialization and Free Electives	18

### ***F. Financial Planning Option***

AAEC 2104: Personal Financial Planning	3
AAEC 3015-3016: Internship in Agricultural & Applied Economics	1,1
AAEC 3104: Financial Planning for Professionals	3
AAEC 4104: Retirement Planning	3
AAEC 4124: Client Relationship Management	3
AAEC 4134: Financial Planning Applications	3
ACIS 2115- 2116: Principles of Accounting	3, 3
AAEC 4984: Financial Planning Technology and Modeling	3
ACIS 4344: Taxation for Financial Planners	3
BIT 2405-2406: Quantitative Methods	3
FIN 3055: Legal Environment of Business or AAEC 3604: Agricultural Law	3
FIN 3104: Introduction to Finance	3
FIN 3134: Finance Skills and Concepts	3
FIN 3144: Investments: Debt, Equity, and Derivative Markets	3
FIN 3204: Risk and Insurance	3
FIN 4004: Wills, Trusts and Estates	3

Restricted Electives	9
Free Electives	14-16

## Satisfactory Progress

By the end of the academic year in which the student has attempted 72 hours (including transfer, advanced placement, advanced standing and credit by examination), "satisfactory progress" will consist of 1) a grade point average of at least 2.0; 2) at least 24 credits that apply to the Curriculum for Liberal Education, and 3) 9 semester credits of departmental requirements.

[TOP](#)

## Undergraduate Course Descriptions (AAEC)

### 1005,1006: ECONOMICS OF THE FOOD AND FIBER SYSTEM

Economic principles that underlie functioning of the U.S. economy in general, and the food and fiber system in particular, are developed and applied to analysis of issues important to society. Emphasis on interrelationships of U.S. micro-economic and macro-economics policy, agriculture, and economic well being of world society in terms of availability and price of food and fiber, use of natural resources, and development of rural economics. I,II. (3H,3C)

### 1005H-1006H: ECON FOOD FIBER SYS (3H,3C)

### 1264: PEACE ECONOMICS

Introduction to economic impediments and solutions in the pursuit of world peace, including various perspectives on defining peace, the role of natural resources and ethics in regional and global development, and the actual poverty reduction programs. (3H,3C)

### 2104: PERSONAL FINANCIAL PLANNING

Survey of fundamental personal financial planning needs and decisions of young professionals. Introduction to the personal financial planning needs that special household circumstances or non-traditional household situations may precipitate. (3H,3C)

### 2244 (AHRM 2244): FOOD AND CLOTHING: CULTURAL TRADITIONS, CONFLICTS AND POSSIBILITIES

Survey of basic ideas underlying human values and cultural traditions expressed in food and clothing. Ethical perspectives in Western and Non-Western schools of thought. Application to issues involving food and clothing, such as product liability, food and clothing safety, animal rights and the use of fur, labor sweatshops, sourcing of inputs, endangered species, rain forests, consumer sovereignty, freedom and economic justice. Sophomore standing required. (3H,3C) II.

### 2424: COOPERATIVES AND THEIR IMPACT ON THE HUMAN CONDITION

An assessment of the member-owned cooperative organizational structure, including the founding Rochdale Principles (circa 1842) and how these principles and ethics are still prevalent in modern-day cooperatives. Emphasis will be on both agricultural (supply, marketing, service) and non-agricultural (employee-owned, rural electric, housing, child care, health care, crafts, credit unions) cooperatives, with special attention to the impacts on the human condition. I (3H,3C)

### 2434: FOUNDATIONS IN AGRIBUSINESS

Introduction to the primary management tools as they relate to farm production enterprises and agribusinesses. Principles and concepts of preparing farm and agribusiness financial statements and their analysis. Application of budgeting and risk management. Pre: 1005. (3H,3C)

### 2464 (REL 2464) (STS 2464): RELIGION AND SCIENCE

Exploration of the relationships between religion and science in the western tradition. Topics include: basic frameworks for relationships between religion and science in historical and cultural context; types of human knowledge and truth; similarities and differences between science and religion; evolution; ecology; and contemporary issues. (3H,3C)

### 2974: INDEPENDENT STUDY

Variable credit course.

### 2984: SPECIAL STUDY

Variable credit course.

### 3004: AGRICULTURAL PRODUCTION AND CONSUMPTION ECONOMICS

The economic principles of production. Applications to decision-making and the allocation of resources for the agricultural firm. Consumer behavior and demand for agricultural products. Pre: 1005. (3H,3C) II.

### 3014: ANALYTIC METHODS APPLIED ECON

Quantitative methods used in applied empirical economic analysis including simple and multiple regression, estimation and application of elasticity, decision analysis, economic simulations, linear programming, and risk analysis. Analysis using spreadsheets stressed. Pre: STAT 3005 or BIT 2405 or STAT 3615. (3H,3C)

### 3015-3016: INTERNSHIP IN AGRICULTURAL AND APPLIED ECONOMICS

Preparation for, and follow-up to, a practical experience in a selected agricultural, resource, or governmental enterprise, which takes place under the direct supervision of an owner, manager, or supervisor. 3015: offers the student a broad management horizon on understanding the value and the

process of setting goals and objectives, and provides methods for evaluating one's abilities, interests, and desires for making career-path choices. 3016: provides a forum for students to share work experiences, discuss human resource issues, and apply the problem solving process to a problem or concern witnessed during the internship. 3015: II; 3016: I. (1H,1C)

#### 3024: MONETARY GLOB ISS APPLIED ECON

Economics of an open economy and its impact on agricultural and natural resource markets. History of the monetary system, national accounts, balance of payments, fiscal and monetary policy, foreign exchange determinants, trade deficits, international finance, globalization and economic growth. Linkages to agricultural policy and commodity markets stressed. Pre: 1005, 1006. (3H,3C)

#### 3104: FINANCIAL PLANNING FOR PROFESSIONALS

Analysis of financial needs, from the context of the individual, household or small business owner, related to financial situation (cash management and use of debt), income taxes, risk management, retirement planning, investment planning, estate planning, and other special needs. Utilizes mathematical and computing skills. FIN students may be excused from the AAEC 2104 pre-requisite with instructor permission. Pre: 2104. Co: FIN 3134. (3H,3C)

#### 3204: INTERNATIONAL AGRICULTURAL DEVELOPMENT AND TRADE

Examination of the role of agriculture in less developed countries and how that role is affected by public policies. Topics include the dimensions of world food, population, and income problems; theories of economic development and the role of agriculture; a description of traditional agricultural systems and their evolution; components of an agricultural modernization strategy; the impacts of international trade and aid; and the effects of international development on U.S. agriculture. I Pre: 1005, 1006. (3H,3C)

#### 3314: ENVIRONMENTAL LAW

Principles of law involved in environmental issues, survey of environmental litigation, legislation and administrative rulings. Law topics include natural resources, water pollution, private land use, air pollution, toxic substance, food, drug, pesticides, and biotechnology. (3H,3C) II.

#### 3324: ENVIRONMENT SUSTAIN DEV ECON

Economics of environment and sustainable development. Topics include economic efficiency, property rights, externalities, benefit-cost analysis, economic evaluation procedures, public and private conflicts in land use, water quality, and international growth/development/environmental issues. Pre: 1005 or ECON 2005. (3H,3C)

#### 3454 (MGT 3454): SMALL BUSINESS MANAGEMENT AND ENTREPRENEURSHIP

Characteristics of small business and entrepreneurs, and their economic importance. Development and operation of a small business, including concepts and principles such as franchising, business plans, capital acquisition, venture capital, financial and administrative control, marketing, human resource and operations management. Taxation, legal, insurance and ethics in small business. Junior standing required. (Cross listed MGT 3454). I (3H,3C)

#### 3504: MARKETING AGRICULTURAL PRODUCTS

Structure of the agricultural marketing system with emphasis on factors determining farm level prices. Emphasis on how markets coordinate consumer desires and producer costs through marketing channels. Impact of market structure, grades, information, product form, and advertising on farm prices. International trade impacts on producers, consumers, agribusiness, and government. I Pre: 1005. (3H,3C)

#### 3514: AGRICULTURAL FUTURES AND OPTIONS

The role of agricultural futures and options in risk management strategies for producers and agribusiness firms and in the price discovery process. Fundamental supply-demand and technical analysis of the markets and pricing processes. Development and applications of effective price risk management strategies. (3H,3C) II.

#### 3604: AGRICULTURAL LAW

Legal problems of farm and agribusiness management. Practical application of principles of contracts, negligence, debt instruments and commercial transactions of the farm and agribusiness organization. Selected state and federal laws regulating the farm and agribusiness sector; basic animal laws including state and federal regulation of agricultural sector. I (3H,3C)

#### 3954: STUDY ABROAD

Variable credit course.

#### 4104: RETIREMENT PLANNING

Overview of planning needs, products, and strategies used by financial professionals to help businesses, small business owners, and individuals choose and implement an effective retirement plan. Must have prerequisite or permission of instructor. Pre: 3104. (3H,3C)

#### 4124: CLIENT RELATIONSHIP MANAGEMENT

Investigation of socio-psychological factors and communication/interviewing strategies that foster trust-based relationships essential to the success of financial advisors and other financial service professionals. Graduate students are expected to have completed AAEC 3104 or an equivalent course or may enroll with permission of the instructor. Pre: 2104 or 3104. (3H,3C)

#### 4134: FINANCIAL PLANNING APPLICATIONS

Integration of financial planning content in the resolution of client situations in the context of ethical and compliant workplace practices. Utilizes a case analysis approach applying financial planning processes and procedures. Graduate students are expected to have similar background from equivalent courses or professional experience or may enroll by permission of the instructor. AAEC 4344 or FIN 4004 taken simultaneously with this course can be substituted for the pre-requisites. Pre: 3104, 4104, FIN 3144, FIN 3204. Co: ACIS 4314, FIN 4004. (3H,3C)

#### 4135 (ECON 4135): INTERNATIONAL ECONOMICS

4135 International Trade: Factor mobility and commercial policy (tariffs, quotas, export licensing). Pre: ECON 3104 or ECON 2025H or AAEC 3004.

(3H,3C)

#### 4204: FOOD AND AGRICULTURAL POLICY

Examination of the role of agriculture in developed economies and how agriculture is affected by policy decisions in the public sector. Emphasis will be placed on the economic impacts of policies on the producers and consumers of agricultural products: price supports, food stamps, tariffs and quotas. I Pre: 1005, 1006. (3H,3C)

#### 4314: ENVIRONMENTAL ECONOMIC ANALYSIS AND MANAGEMENT

Quantitative methods and computer-aided tools used in the economic analysis of environmental/natural resource issues. Economic concepts and analytical tools will be applied to realistic, problem-solving situations. Topics include cost effectiveness analysis, benefit-cost analysis, economic simulations, and statistical analysis. Pre: 3324 or ECON 4014 or FOR 3424. (3H,3C) II.

#### 4324: RURAL AND REGIONAL DEVELOPMENT POLICY

Description of rural areas, their economic structure, and conditions for broad-based economic development. Emphasis on the role of markets in the development process. Introduction to tools to evaluate policies and programs, identify distributional impacts, identify appropriateness for long-term sustainable development, and analyze tradeoffs between policy goals. Alternatives to public financing in rural areas. Pre: 1005, 3004. (3H,3C)

#### 4334: APPLICATIONS RURAL DEVELOPMENT

Evaluation of policy alternatives and programs for the development of rural areas. Intensive use of analytical techniques, including spreadsheet analysis of trends and changes over time, shift-share analysis of economic change, creation of indices of distribution and poverty for rural areas, creation and use of economic base multipliers, construction, use and interpretation of input-output models. Pre: 1005, 3004. Co: 4324. (1H,1C)

#### 4344: SUSTAINABLE DEVELOPMENT ECONOMICS

Sustainable development concepts are critically explored particular emphasis on implications for domestic and international sustainable development agriculture and for economic development. Students investigate case studies illustrating problems of sustainable development and potential policy solutions. I Pre: (3324 or 3004 or ECON 4014). (3H,3C)

#### 4404: AGRICULTURAL MANAGEMENT AND PROBLEM-SOLVING

Capstone course for students interested in agribusiness management. Application of concepts, tools, and principles including management, finance, marketing, economic theory, and quantitative methods to applied agricultural decisions. Application of knowledge on selected agricultural projects that enhance team-building, written, and oral communication skills. Senior Standing required. Pre: 3454. (3H,3C) II.

#### 4424: AG FINANCIAL MANAGEMENT

Principles and concepts of preparing agricultural financial statements. Analysis of these statements following professional farm financial guidelines. Economic concepts applied to management of agricultural enterprises. Leasing, purchasing, borrowing, and lending decisions in agriculture. Agricultural applications of budget, risk management and mitigation, and loan structuring. Pre: 1005, 2434, FIN 3104. (3H,3C)

#### 4504: AGRICULTURAL PRICE AND MARKET ANALYSIS

Estimation of agricultural supply, demand, and price relationships. Determination of market potential for new products. Students identify problem, collect data, estimate statistical relationship(s), interpret results, and write research report. Use of probability distribution in marketing strategy development. I Pre: 3004, 3504, STAT 3006. (3H,3C)

#### 4514: ADVANCED AGRIBUSINESS MARKETING

Applying concepts, principles, and analytical tools in developing a marketing plan for an existing or new agricultural product or service. Students will define the market, perform competitive marketing analysis, outline market assumptions and objectives, and perform a three-year financial evaluation of the action plan. Course can be repeated once. Co: 3504 or 3004. I Variable credit course. Pre: 2434, 3504.

#### 4754: REAL ESTATE LAW

The law of real property, legal framework, law of estates in land, conveyancing, landlord-tenant and non-possessory interest in real property. Zoning, easements, restrictive covenants. Mortgages, deeds of trust, and taxation of real estate. Junior standing required. I (3H,3C)

#### 4764: REAL ESTATE APPRAISAL

Application of economic principles to the valuation and appraisal of property. Income, cost and comparable approach to value. Rural property, commercial, residential and transitional will be evaluated. Ethical and professional requirements. Variable lab credit available to meet Real Estate licensing requirements. (Course credits may vary from 3 to 5 hours.) Junior standing required. Variable credit course. II.

#### 4804 (STAT 4804): ELEMENTARY ECONOMETRICS

Economic applications of mathematical and statistical techniques: regression, estimators, hypothesis testing, lagged variables, discrete variables, violations of assumptions, simultaneous equations. Pre: 1006, (STAT 3005 or STAT 3604). (3H,3C) II.

#### 4814: FOOD AND HEALTH ECONOMICS

Microeconomics of food, nutrition, and health. Overview of nutrition, nutrition recommendations, and implications for economics based decisions. Individual and household food consumption and health production models. Farm to consumer market linkage models with nutrition and health implications Effectiveness of food and nutrition interventions and policies. Cost-benefit and cost-effectiveness analysis of health interventions. Pre-requisite: Senior Standing required. (3H,3C)

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

4994: UNDERGRADUATE RESEARCH

Variable credit course.

## Overview

The Department of Agricultural and Extension Education at Virginia Tech is committed to preparing students for success in professions that apply topical content to social settings. We offer a major in Agricultural Sciences and a minor in Leadership and Social Change. Our Agricultural Sciences graduates will meet the needs of a variety of agricultural employers. In addition, the Agricultural Sciences degree program prepares undergraduates to enter and excel in graduate and professional programs. The minor in Leadership and Social Change is of particular interest to students planning to pursue a career in non-profit organizations, including governmental and non-governmental agencies with an agenda for social justice. The Leadership and Social Change minor is associated with Virginia Tech's Residential Leadership Community.

## Agricultural Sciences Major (AGSC)

The Bachelor of Science in Agricultural Sciences is intended for the individual who wants a strong combination of breadth and depth in agricultural and related subject matter. The agricultural sciences major provides students with the opportunity to tailor curriculum by selecting two minors from a list of 18 options in the College of Agriculture and Life Sciences, the College of Natural Resources, and the Department of Biological Sciences.

The Agricultural Sciences course content possibilities include Agricultural and Applied Economics; International Agriculture; Animal and Poultry Sciences; Biochemistry; Biological Systems Engineering; Biological Sciences; Communication; Crop and Soil Environmental Sciences; Dairy Science; Entomology; Environmental Science, Fisheries and Wildlife; Food Science and Technology; Foreign Languages; Forestry; Geography; Horticulture; Human Nutrition, Foods, and Exercise; Leadership: Plant Pathology, Physiology, and Weed Science; and Wood Science. Courses specifically required for the major include Strengths Development for AGSC Careers (AEE 1004), Communicating Agriculture in Writing (AEE 3624), Communicating Agriculture in Speaking (AEE 3634), Leadership for Professionals in Agricultural Organizations (AEE 3014), and the Agricultural Sciences Seminar (AEE 4044).

For additional information about the Agricultural Sciences degree, contact the department's advising office, 231-8177, or Dr. Curtis Friedel, [cfriedel@vt.edu](mailto:cfriedel@vt.edu).

## Leadership and Social Change Minor (ILRM)

The Leadership and Social Change minor is available to students of all majors across the university. The program embraces a commitment to diversity and an agenda for social change that crosses all programs areas. The minor will be of interest to students planning to pursue a career in non-profit organizations, including governmental and non-governmental agencies with an agenda for social justice. Internships in such organizations are an extremely valuable way for students to gain work-related skills.

The Leadership and Social Change minor requirements include three core classes in leadership theory and practice and three courses from a list of restricted electives. Students in Virginia Tech's Residential Leadership Community complete two of the core classes as part of that program. Enrollment by other students is limited.

For additional information about the minor, contact 231-8177, or Curtis Friedel, [cfriedel@vt.edu](mailto:cfriedel@vt.edu). For information about the Residential Leadership Community, contact 231-4469, or Mr. Nicholas Clegorne, [clegorne@vt.edu](mailto:clegorne@vt.edu).

## Satisfactory Progress Policy

By the end of the academic year in which the student has attempted 72 hours (including transfer, advanced placement, advanced standing and credit by examination), "satisfactory progress" will consist of:

- GPA of at least 2.0
- at least 24 credits that apply to the Curriculum for Liberal Education, and
- at least 9 semester credits of departmental requirements.

[TOP](#)

## Undergraduate Course Descriptions (AEE)

### 1004: STRENGTHS DEV FOR AGSC CAREERS

Exploration of self-development and career planning related to personal talents and strengths. Special attention will be devoted to pathways for learning within the Agricultural Sciences degree program. This course is intended for students in their first year of enrollment at Virginia Tech. (1H,1C)

### 2974: INDEPENDENT STUDY

Variable credit course.

### 2984: SPECIAL STUDY

Variable credit course.

### 3004: EDUCATIONAL PROGRAMS IN AGRICULTURE

Introduction to educational programs in vocational agriculture and extension. (1H,1C)

### 3014: LEADERSHIP EFFECTIVENESS FOR PROFESSIONALS IN AGRICULTURAL ORGANIZATIONS

Designed to assist students in developing a knowledge and understanding of leadership theory and basic skills required to perform effectively in leadership positions within agricultural community situations. (3H,3C)

### 3084: AGRICULTURAL METAL FABRICATION

Introduction to metal working tools, equipment, and processes. Fundamentals of hot and cold metal working, plumbing, and welding applications, including inert gas welding processes. Junior standing or consent of instructor is required. (1H,6L,3C)

### 3624: COMMUNICATING AGRICULTURE IN WRITING

Development of communication skills necessary to deal with the general public and audiences in the food, agriculture, and natural resources fields. Emphasis on writing and on creation of a portfolio including multiple types of written communication. (3H,3C)

### 3634: COMMUNICATING AGRICULTURE & LIFE SCIENCES IN SPEAKING

Development of strategies and techniques for effective oral communication in the professions related to food, agriculture, and natural resources. Emphasis on oral, visual, and interpersonal communication, as well as on group leadership and meeting management. (3H,3C)

### 3954: STUDY ABROAD

Variable credit course.

### 4004: TEACHING ADULTS IN AGRICULTURE

Organizing classes, developing programs of instruction and teaching techniques applicable to out of school groups in Agriculture. (2H,2C)

### 4014: INTRODUCTION TO COOPERATIVE EXTENSION

An overview of the Cooperative Extension Service as it applies to agriculture. Major areas discussed include history, organization, functional areas, responsibilities of local agents, and employment in extension. (3H,3C)

### 4024: MANAGING AGRICULTURAL SUPERVISED OCCUPATIONAL EXPERIENCE PROGRAMS

Major emphasis will be given to the agricultural teacher's responsibility for supervision of the Supervised Occupational Experience Program (SOEP). The course will emphasize the ownership project, the cooperative placement project, maintaining record books, and supervising the SOEP. (2H,2C)

### 4034: METHODS OF PLANNING EDUCATION PROGRAMS FOR AGRICULTURE

Course examines the procedures involved in the development of courses, curriculum, and instructional materials for educational programs in agriculture. Pre: 3004 or 3004. (2H,3L,3C)

### 4044: AGRICULTURAL SCIENCES SEMINAR

A senior capstone course addressing issues of importance for majors in Agricultural Sciences. The course will emphasize a synthesis of research results from collected data and information on contemporary problems in agriculture and related fields and a sharing of the results. It will emphasize the development of skills in critical analysis, writing, and speaking. Pre: 3624, 3634. (3H,3C)

### 4054: INTERNSHIP IN COOP EXTENSION

Off-campus participation experience for those preparing to become extension agents in the Cooperative Extension Service. Variable credit; 6-16

credits. Variable credit course.

**4064: AGRICULTURAL MECHANICS LABORATORY MANAGEMENT**

Plan, organize, and manage secondary school mechanics laboratories. Management of the instructional program, facility, equipment, inventory, safety, liability, personnel, material control, and student/customer work. Pre: 3074, 3084. (2H,3L,3C)

**4244: METHODS OF TEACHING CAREER AND OCCUPATIONAL EDUCATION**

Developing instructional plans, delivering and evaluating instruction, and evaluating learner performance for career and occupational education. The prerequisite EDCT 4234 will be waived for Agricultural Education students. Pre: 4234. (3H,3C)

**4254: ADULT CAREER AND TECHNICAL EDUCATION**

Theory, practices, and procedures involved in planning, developing, implementing, managing, and evaluating adult education programs in Vocational and Technical Education. Completion of, or concurrent enrollment in, courses in teaching methods and curriculum required. (3H,3C)

**4304: COMMUNITY EDUCATION AND DEVELOPMENT**

Comprehensive examination of community education and development. Community/sustainable community development, strategies for mobilizing social change in/with communities. Explore participatory, popular, and community-based education from rural and urban settings. Globalization, sustainability, and social movement discourse with emphasis on agricultural, health, and food system examples. Pre: Junior standing. (3H,3C)

**4744: METHODS, MATERIALS AND PRACTICES IN INSTRUCTION**

Planning, using, evaluating classroom procedures; selection and organization of subject content and materials in vocational and technical education. Maximum credit: 6. Consent required. Variable credit course. X-grade allowed. Co: EDCT 4754.

**4754: INTERNSHIP IN EDUCATION**

Planned program of clinical practice in education under the direction and supervision of a university supervisor and a selected practitioner. Recommendation of program area and successful completion of Professional Studies required. Variable credit course. X-grade allowed.

**4884: YOUTH PROGRAM MANAGEMENT**

Organizational design of educational youth programs such as 4-H and FFA, including administrative planning, human resource development, recruitment, marketing, and budgeting. Pre: ALS 4304. (3H,3C)

**4964: FIELD STUDY/PRACTICUM**

Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

## **Undergraduate Course Descriptions (LDRS)**

**1015-1016: EXPLORING CITIZEN LEADERSHIP**

This two-semester interdisciplinary course offers an introduction to citizen leadership. 1015 explores traditional and contemporary leadership theory and competencies by comparing cultural contexts of leadership. 1016 introduces leadership praxis (action and reflection) as a method of research and service designed to continually refine leadership theory, competencies, and values. Membership in the Residential Leadership Community required. 1015: I; 1016: II (3H,3C)

**2964: FIELD STUDY**

Variable credit course.

**2974: INDEPENDENT STUDY**

Variable credit course.

**2984: SPECIAL STUDY**

Variable credit course.

**3104: THE DYNAMICS OF LEADERSHIP**

This course examines advanced leadership theories and leadership effectiveness in today's organizations. This course is restricted to students enrolled in the Residential Leadership Community. Pre: 1015. (3H,3C)

**3304: ELEMENTS OF TEAM LEADERSHIP**

The focus of this course is to enable students to develop effectiveness in leading, delegating, and communicating within a team environment. An emphasis will be placed on emotional intelligence in teams, team management, and effective team processes. This course is restricted to students enrolled in the Residential Leadership Community. Pre: 1015. (3H,3C)

**3954: STUDY ABROAD**

Variable credit course.

3984: SPECIAL STUDY  
Variable credit course.

4754: INTERNSHIP  
Variable credit course.

4964: FIELD STUDY  
Variable credit course.

4974: INDEPENDENT STUDY  
Variable credit course.

4984: SPECIAL STUDY  
Variable credit course.

4994: UNDERGRADUATE RESEARCH  
Honors Variable credit course.

4994H: UNDERGRADUATE RESEARCH  
Honors Variable credit course.

  - [Undergraduate Course Descriptions](#)
- 

## **Overview**

The Agricultural Technology Program offers a concentrated academic experience for individuals pursuing an associate degree in preparation for careers in the agriculture and green industries. Students can specialize in Applied Agricultural Management or Landscape and Turfgrass Management.

### **Applied Agricultural Management (AAM)**

- Animal Science
- Crop Science
- Agribusiness

The AAM specialty provides students with a balanced education – including courses in livestock production and agribusiness – that prepares them for diverse job opportunities.

The animal science curriculum includes courses in genetics, nutrition, reproduction, health, and management. It focuses on the biological and economic aspects of animal production and management. Soils, forages, mechanics and chemical application courses round out the AAM curriculum.

Business courses provide instruction in financial recordkeeping, professional selling, personnel management, strategic marketing, whole business planning, and information systems, focusing on strategic management and economic issues of the agricultural industry. Laboratories stress the use of modern management methods and computer applications for problem solving

### **Landscape and Turf Management (LTM)**

- Golf Course Management
- Landscape Management
- Sports Turf Management
- Horticulture Production

In the LTM specialty, students prepare for a career in the green industry — including landscape design, landscape contracting, golf course management, horticulture production and nursery management, and sports turf management. They learn about turfgrass and landscape installation, maintenance, and management.

The LTM curriculum focuses on developing well-rounded students who are in high demand by many branches of the green industry. Students learn about various types of plants, turfgrass management, soils and nutrient management, landscape design, Irrigation and drainage, and Spanish culture and language instruction.

Additional courses are offered in horticulture production, hardscaping, landscape contracting, golf and sports turf management, integrated pest management, and chemical application. Special study classes allow students to work on the Virginia Tech golf course and athletic fields and compete in national competitions. A strong core of business courses is also offered. Laboratories for each class focus on hands-on learning and expose students to a range of applied landscape and turf management skills.

## **Course Requirements for Major**

<b>Core Courses</b>	<b>Credits</b>
AT 0104: Computer Applications	3
AT 0114: Applied Ag. Math	3
AT 0144: Communication Skills	4
AT 0184: Plant Biology & Soil Science	3
AT 0194: Ag. Technology Internship	3
AT 0224: Personnel Management	2
AT 0234: Intro. to Agribusiness & Financial Management	3
AT 0414: Soils and Nutrient Management	3
AT 0424: Automated Accounting for Agriculture	1
AT 0504: Ag. Technology Survey	1
<b><i>Requirements for Applied Agricultural Management Option</i></b>	
Required Courses	9
Restricted Electives	14
Free Electives	10
<b><i>Requirements for Landscape and Turf Management Option</i></b>	
Required Courses	20
Electives	18
<b>Total Credits Required</b>	<b>64</b>

All students are required to complete an occupational internship for academic credit to provide practical experience in a work environment. The three credit internship lasts for 10 weeks and 400 hours. The internship usually occurs during the summer between the first and second year of the program. Students, in consultation with faculty members, select their own internships that may be located anywhere in the United States or abroad.

All admission offers for this program are made through the Agricultural Technology Program. Foreign language is not a requirement of this program. Recommended high school courses include English, Algebra I and Geometry (minimum), a lab science, and a computer class. Students are encouraged to pursue an Advanced or Standard Diploma from high school. Agricultural Technology students have the same rights and privileges as other students at Virginia Tech, except for membership in the Corps of Cadets and participation in NCAA sports. Selected agricultural technology courses can be transferred to a bachelor's degree program in the College of Agriculture and Life Sciences at Virginia Tech. Bachelor degree students are not permitted to enroll in Agricultural Technology courses.

## Satisfactory Progress towards Degree

Students must achieve and maintain a cumulative 2.00 GPA each semester;

All AT courses will be used in the calculation of the GPA.

## Undergraduate Course Descriptions (AT)

### 0104: COMPUTER APPLICATIONS IN THE AGRICULTURAL INDUSTRY

Provides a basic understanding of the operation and use of the micro-computer for farm/firm business management. Stresses the practical applications of Microsoft Office (word processing, spreadsheets, and database management systems, PowerPoint, and Outlook), Adobe Acrobat including PDF Annotator, and OneNote to agricultural production and financial management decisions. 2H,3L,3C)

### 0114: APPLIED AGRICULTURE MATHEMATICS

This course will provide students with a background in the mathematical methods and operations used to solve numerical problems arising in soils, dairy, horticulture, landscape, poultry, turf, crops, livestock and feeds. Students will become acquainted with terminology and equations unique to agricultural businesses and enterprises. Emphasis is placed on solving word problems. I (3H,3C)

### 0124: AGRICULTURAL MACHINERY & MECHANICS

Introduction to the operation and maintenance of internal combustion engines, field machinery, tractor and power units, and shop to include the fundamentals of gas and arc welding. (2H,3L,3C) II.

0144: COMMUNICATION SKILLS Written and oral communication skills, including business and technical writing, public speaking, and interpersonal communication. Instruction and practice in the application of communication skills for business and agriculture. Emphasis on effective use of word processing and email software. (3H,2L,4C)

**0164: INTRODUCTION TO ANIMAL SCIENCE**

Study of animal products, production methods, and management systems for beef, sheep, horses, dairy, swine and poultry. Classroom instruction, demonstrations, and hands-on experience with livestock and poultry. (3H,3L,4C)

**0174: FUNDAMENTALS OF TURFGRASS MANAGEMENT**

Turfgrass identification, morphology, adaptations, and management systems for parks, lawns, athletic fields, roadsides, and golf courses. Mowing, irrigation, fertilization, soil management, pest management, and other practices that impact turf management. Turfgrass management planning utilizing Integrated Pest Management and Best Management Practices. (3H,3L,4C)

**0184: INTRODUCTION TO PLANT BIOLOGY AND CHEMISTRY**

Basic botanical and chemical principles and their applications to sound plant production and management practices. Emphasis on practical experiences in laboratory and field settings. (2H,2L,3C)

**0194: AT INTERNSHIP**

Practical experience in a selected agricultural enterprise, under the direct supervision of owner, manager, or supervisor. Internship will be evaluated by faculty member. Written reports of work experience activities are required. Completion of at least 28 credits with a minimum GPA of 2.00 required. Variable credit course. X-grade allowed.

**0224: PERSONNEL MANAGEMENT**

Principles and practices in the recruitment, selection, and compensation of employees. Emphasis on employer/employee relationships, including incentive programs. Impacts of safety and environmental concerns on the health and well-being of agricultural employees. Pre: 0134. (1H,2L,2C)

**0234: INTRODUCTION TO AGRIBUSINESS AND FINANCIAL MANAGEMENT**

Functions of agribusiness enterprises within the U.S. economic framework. Economic systems, cooperatives, essential elements of business organization, management tools for decision-making, creating financial statements, business planning, development and analysis of budgets, investing in a business, and time value of money. Pre: 0134. (2H,3L,3C)

**0244: AGRICULTURAL LAW AND TAX MANAGEMENT**

Principles of law involved in the operation of farm and agribusinesses, emphasizing contracts, land ownership problems, legal liability, leases, tax and inheritance laws. Special topics in areas of land ownership, estates, depreciation and gift taxes of primary importance to the farm and agribusiness firm. Even years. Pre: 0134. (2H,2L,3C) II.

**0274: STRATEGIC AGRIBUSINESS MARKETING AND ENTREPRENEURSHIP**

Principles of marketing through the agribusiness industry including the strategic management of products, distribution, promotion, and pricing to improve business performance. Entrepreneurship is explored as a career alternative including methods for acquiring necessary start-up capital. Solving business problems utilizing finance and marketing tools. Pre: 0424. (2H,2L,3C)

**0284: PROFESSIONAL SELLING FOR AGRIBUSINESS**

Fundamentals of professional selling in the agricultural environment. Preparing and making sales presentations for an agricultural product. Safety and environmental concerns associated with the purchase and/or use of an agricultural product or service. Must be second year student in Agricultural Technology. Pre: 0234, 0274. (1H,2L,2C)

**0294: LIVESTOCK MERCHANDISING**

A comprehensive study of the principles and activities involved in successfully promoting and merchandising livestock. A livestock auction will be held at the conclusion of the course to provide experiences in advertising, salesmanship, facility development, sale management, and budgeting. Pre: Second year student. I (2H,2C)

**0304: MEATS AND ANIMAL PRODUCTS EVALUATION AND PROCESSING**

Principles and applications of the evaluation and utilization of animal products of beef, pork, lamb, poultry and dairy origin with emphasis on the conversion of live animals to retail cuts and processed meats and milk into dairy products. (6L,2C) II.

**0314: ANIMAL BREEDING AND SELECTION**

Fundamental principles of animal genetics applied to the genetic improvement of meat animals, dairy cattle, and horses. Emphasis on trait inheritance, performance testing, selection of replacements, and breeding systems. Must be second year student in Agricultural Technology. I Pre: 0114. (2H,2C)

**0324: LIVESTOCK REPRODUCTION**

Principles and practices of reproductive management used to maximize reproductive efficiency in dairy and beef cattle, sheep, swine, and horses. Must be second year student in Agriculture Technology. Pre: 0164. (1H,2L,2C) II.

**0334: PRINCIPLES OF ANIMAL HEALTH**

A general introduction to animal health principles of farm animal species, intended to provide an understanding of the fundamentals of disease processes and animal healthcare. The emphasis is on disease prevention and control rather than on the treatment of disease. Must be second year student in Agriculture Technology. I (2H,3L,3C)

**0354: FEEDS AND FEEDING**

Principles and practices of livestock feeding. Anatomy and physiology of ruminant and non-ruminant digestive systems. Emphasis on nutrient requirements and ration formulation. Computerized ration formulation and evaluation. (1H,2L,2C) II.

**0364: ATH FLD PRAC- FOOTBALL/SOCCER**

Learn the principles and techniques of game preparation and routine maintenance on the NCAA football and soccer fields at Virginia Tech. Students'

laboratory experience will be field work with the Virginia Tech Athletic Department staff. Focusing the football and soccer fields during the NCAA competition season. (6L,2C)

#### 0374: ATH FLD PRAC- BASE/SOFTBALL

Learning the principles and techniques of game preparation and routine maintenance on the NCAA baseball and softball fields at Virginia Tech. Students' laboratory experience will be field work with the Virginia Tech Athletic Department Staff. Focusing on the baseball and softball fields during the NCAA competition season. (6L,2C)

#### 0384: AGRICULTURAL BUILDINGS

Building materials, planning for remodeling, and construction of farm buildings and livestock facilities. Includes electricity and water requirements, maintenance, site selection, and cost effective planning. I Pre: 0114. (2H,3L,3C)

#### 0404: IRRIGATION AND DRAINAGE

Principles applied to solving irrigation and drainage problems. Emphasis placed on hydraulics, irrigation design, irrigation scheduling, and components including heads, valves, controllers, backflow prevention, wire, pipe, and fittings. Pre: 0184. Co: 0114. (2H,2L,3C)

#### 0414: SOILS AND NUTRIENT MANAGEMENT

Physical, chemical, and biological properties of soils; soils' suitability for production of a range of agricultural crops to include turfgrass and landscape plants. Properties of common liming, biosolid, manure, and fertilizer materials with emphasis on their environmental impacts. Soil and plant sampling procedures and the analysis of soil tests. Nutrient management plans. Pre: 0184. (2H,2L,3C)

#### 0424: AUTOMATED ACCOUNTING FOR AGRICULTURE

Financial management principles applied with current technology and information systems to accounting challenges. Emphasis on creating chart of accounts, daily transactions, invoices, financial statements and managing inventory. Pre: 0234. (1H,1C)

#### 0434: PEST MANAGEMENT: INSECTS, DISEASES, AND WEEDS

Identification, classification, and life cycles of economically important insects, plant pathogens, and weeds. Pest management methods: cultural practices, chemical control, biological control, host plant resistance, etc. I (3H,3L,4C)

#### 0494: DAIRY MANAGEMENT

Concepts of efficient and profitable management of modern dairy herds. Application of basic principles of business, milking, mastitis control, milk quality, herd replacements, feeding, breeding, reproduction, herd health, housing, and milk marketing management to profitable dairy farming. Pre: 0354. (2H,3L,3C) II.

#### 0504: AGRICULTURAL TECHNOLOGY SURVEY

Orientation to the Agricultural Technology program and resources available at Virginia Tech. Introduction to state, national, and international agriculture; internship requirements; and opportunities and careers in agriculture. (1H,1C)

#### 0514: CONTEMPORARY AGRICULTURAL ISSUES

A survey course designed to acquaint the student with the concerns and critical issues impacting the field of agriculture. Contemporary agricultural issues will be explored. (3H,3C) II.

#### 0544: HORTICULTURE PRODUCTION

Production of vegetable, fruit, flowering, and nursery crops, including propagation of these crops. Focus is on the culture of these commodities as alternative agricultural crops, including environmental and cultural requirements for high quality production. (2H,2L,3C) II.

#### 0554: CHEMICAL APPLICATION

Proper application of pesticides and other agricultural chemicals used in landscape and turf management and in production agriculture; including application methods, equipment calibration and configuration, occupational health and safety, and pesticide laws and regulations. Pre: 0534. (1H,2L,2C) II.

#### 0564: HERBACEOUS PLANTS

Identification, selection, requirements, and uses of herbaceous plant materials commonly found in landscapes; includes annuals, perennials, bulbs, and grasses. (1H,2L,2C)

#### 0574: WOODY LANDSCAPE PLANTS

Identification and uses of evergreen and deciduous woody plant materials common in the landscape industry; including trees, shrubs, and ground covers; proper plant selection and location in the landscape site. (1H,3L,2C) I.

#### 0594: FORAGES AND GRAIN CROPS

Principles and practices of efficient forage and small grain crop production. Establishment, maintenance, use, and nutritional value of forages will be stressed. (2H,3L,3C) II.

#### 0614: BEEF AND SHEEP MANAGEMENT

Beef cattle/sheep production and management. Emphasis on genetics, nutrition, herd health, reproduction, and marketing to optimize performance and profit. Management and flock decisions based on economic and business principles. Practical experience enhanced through laboratory activities. I Pre: 0354. (2H,3L,3C)

#### 0624: HORSE MANAGEMENT

Horse production and management. Emphasis on genetics, nutrition, herd health, reproduction, and marketing to optimize performance and profit. Management decisions based on economic and business principles. Practical experience enhanced through laboratory activities. Pre: 0354. (2H,3L,3C) II.

**0654: GOLF COURSE DESIGN AND RULES**

Principles of golf course design and rules of the game, including: evolution, fairness, progression, hazards, shot value, and safety. The United States Golf Association's rules of golf will be covered. (2H,2C)

**0664: GOLF AND SPORTS TURF MANAGEMENT**

Management of turfgrass on modified soil. Advanced management techniques and manipulation of nutrition and cultural practices to reduce plant stress or increase plant tolerance. Intensive turfgrass pest identification, life cycles, environmental conditions, and methods of effective control. Integrated pest management and best management practices. Pre: 0174, 0414. (2H,2L,3C)

**0674: SPANISH FOR THE GREEN INDUSTRY**

Dialogue-based language skills focused on vocabulary and grammatical structures common to agricultural and green industries. Includes vocabulary and contexts specific to activities in greenhouse, nursery, turf, and landscape environments. Elements of Spanish culture are included throughout the course. Pre: Prior study in Spanish is helpful but not required. (3H,3C)

**0684: LANDSCAPE DESIGN**

Principles and practices involved in the development and interpretation of landscape designs; proper selection and use of landscape construction materials and methods of construction. Introduction to utilizing computer-aided drafting. Pre: 0564. Co: 0574. (2H,3L,3C)

**0694: LANDSCAPE CONTRACTING**

Interpreting a landscape design and properly installing plant materials. Preparing bids for customers using cost accounting principles. Maintaining and renovating landscapes as well as exploring careers and business opportunities in the landscaping industry. Pre: 0564, 0574. (2H,3L,3C)

**0704: TURFGRASS CAPSTONE PROJECT**

Capstone course for the Landscape Turfgrass Management option of the Agricultural Technology program. Problem based learning course to evaluate selected turfgrass problems for stakeholders such as golf courses, athletic fields and parks and recreation departments' facility administrators. Students to look holistically at a problem and use critical thinking, experiences and knowledge from previous class work to create custom solutions. For second-year students only. (1H,4L,3C)

**0714: HARDSCAPE MATERIALS AND INSTALLATION**

Non-plant portions of landscape construction such as rock walls, paver floors, arbors, and water gardens. The course covers the materials, construction. Restricted to students in the Landscape & Turf Management option in the Agricultural Technology Program. (6L,2C)

**0904H: AG TECH HONORS SEM**

Exploration of topics in agriculture and related fields that impact and effective and efficient agricultural industry, including professional leadership skills. Special attention will be given to the collaboration and interdependency that the field of agriculture has with other segments of society, including social, political, and economics areas. May be repeated for a maximum of 3 credits and with different topics. (1H,1C) I,II.

**0974: INDEPENDENT STUDY**

Variable credit course.

**0984: SPECIAL STUDY**

Variable credit course.

## **Agriculture and Life Sciences**

**Susan S. Sumner, Associate Dean and Director of Academic Programs**

- [Overview](#)
- [Undergraduate Course Descriptions](#)

### **Overview**

The college offers interdisciplinary courses that utilize a cross-section of disciplines throughout the university, thereby providing students with greater academic exposure to current and universal problems affecting the environment, water, sustainability, food safety, and animal and human nutrition and health. Because of the complexity of subject matter, courses rely upon the diverse expertise of faculty members.

A cross-campus team of faculty, staff, students, and community partners collaborated to develop an undergraduate curriculum for a transdisciplinary and experiential-based Civic Agriculture and Food Systems (CAFS) minor. This minor provides students with knowledge and skills to identify, examine, and integrate agriculture and food system sustainability philosophies and activities into personal and professional practice.

The framework for the curriculum was developed around knowledge and core values that embody the definition of CAFS:

- food security/sovereignty
- civic engagement/democratic participation
- strong local economies
- healthy people/communities
- collaborative teaching and experiential learning

Reflecting a growing trend in higher education, the CAFS minor embodies a commitment to developing and strengthening an economically, environmentally, and socially sustainable system of agriculture and food systems that relies on local resources and serves local markets and citizens. What makes this minor unique is its commitment to serving the needs of all students using transdisciplinary approaches to curriculum development, collaborative teaching strategies, and experiential learning. It is designed to promote academic enhancement, personal growth, and civic engagement while strengthening the student's capacity to learn about civic agriculture and food systems through reflection and experiential practice to solve "real-world" problems.

The college offers interdisciplinary courses of fundamental subject matter in the departments of animal and poultry sciences and dairy science, which are not restricted to a particular animal species through courses carrying the ALS prefix. Courses carrying the ALS prefix are taught by appropriate faculty members or teams of faculty members in more than one department. Academic programs of these departments are thus strengthened by providing professional faculty expertise in essential scientific disciplines that are of equal importance to all students, regardless of their animal species preference.

### **Undergraduate Course Descriptions (ALS)**

#### **1004: AGRICULTURE, THE ARTS AND SOCIETY**

Introduction to the relationships among agriculture, society, and the arts, all of which are integral components of civilization. Pass/Fail only. (1H,1C) I, II.

#### **2204: INTRODUCTION TO CIVIC AGRICULTURE**

Introduction to the economic, social, and ecological foundations of civic agriculture. Topics include industrialization, localized food systems, and citizen participation in civic agriculture. Emphasis will be given to a range of civic agriculture models, strategies, and hands-on approaches to establish, retain and strengthen community-based food and agriculture systems. (3H,3C)

#### **2304: COMPARATIVE ANIMAL PHYSIOLOGY AND ANATOMY**

Comparative anatomy and physiology of domestic mammals and birds including cell neural, musculoskeletal, respiratory, cardiovascular, urinary, and endocrine systems. Pre: BIOL 1106. (3H,2L,4C) I,II.

#### **2404 (BIOL 2404): BIOTECHNOLOGY IN A GLOBAL SOCIETY**

Introduction to the world-wide impact of biotechnology and molecular biology, including applications to plants, animals, and microorganisms. Explores basic concepts of genetic engineering, scientific and ethical issues, and public concerns related to biotechnology. Topics include: environmental release of genetically engineering organisms, bioremediation, safety of genetically engineered food products, transgenic plants and animals, gene therapy, and genetic screening. Pre: (BIOL 1015, BIOL 1016) or (BIOL 1105, BIOL 1106) or (BIOL 1205H, BIOL 1206H), (C HEM 1015, CHEM 1016). (3H,3C) II.

#### 2504: ANIMALS IN SOCIETY

Overview of animal well-being and behavior, human-animal interactions, responsibilities to animals, animal care, behavior, disease and pain recognition and current topics concerning companion animals, domestic animals and wildlife. (2H,3L,3C) II.

#### 2964: FIELD STUDY

Variable credit course.

#### 2974: INDEPENDENT STUDY

Variable credit course.

#### 2984: SPECIAL STUDY

Variable credit course.

#### 3104: ANIMAL BREEDING AND GENETICS

Principles of genetics related to improvement of domestic farm animals. Molecular, cellular and physiological genetics, estimation of breeding values, selection, heritabilities, genetic correlations, relationships, in-breeding, heterosis, genetic abnormalities. I Pre: BIOL 1105, STAT 2004. (2H,2L,3C)

#### 3204: ANIMAL NUTRITION AND FEEDING

Characteristics, sources, digestion, absorption, and metabolism of water, carbohydrates, lipids, proteins, vitamins, and minerals. Feeding systems for livestock, poultry and companion animals. Pre: 2304, (CHEM 1036 or CHEM 1036H or CHEM 1016). (3H,3C) II.

#### 3304: PHYSIOLOGY OF REPRODUCTION

Physiological mechanisms that control and affect reproductive processes in domestic mammals, birds and other selected species. Pre: 2304. (2H,3L,3C)

#### 3404: ECOLOGICAL AGRICULTURE: THEORY AND PRACTICE

Presents an overview of historic and modern agricultural practices. Surveys the principles of ecology in the context of managed ecosystems, civic agriculture, and food systems. Explores ecologically based practices and their use in holistic and integrated agricultural systems. Pre: 2204. (2H,3L,3C)

#### 3954: STUDY ABROAD

Variable credit course.

#### 4204: CONCEPTS IN COMMUNITY FOOD SYSTEMS

Examination of the economic, political, social, and cultural issues related to community food systems development, food production and biotechnology, food sovereignty and security, and population and environmental health. Analyze models, strategies, and policies of national food systems. Pre: 2204. (3H,3C)

#### 4214: CAPSTONE: CIVIC AGRICULTURE AND FOOD SYSTEMS

Multidisciplinary, experiential community-based course focusing on civic agriculture-food systems. Work in partnership with community stakeholders to propose viable solutions to real world issues revolving around civic agriculture and food systems. Connect with communities locally, regionally or globally. Pre: 2204, 3404, 4204. (3H,3C)

#### 4404 (GEOG 4404) (NR 4404) (UAP 4404): APPROACHES TO INTERNATIONAL DEVELOPMENT

An introduction to issues relating to international development. The course will focus on areas to help students better understand the interdependencies between countries and how institutions and organizations can foster effective working relationships on global projects of mutual interest between countries. (1H,1C) I.

#### 4504: NATURAL RESOURCE CONSERVATION

Designed primarily to train elementary and secondary teachers, supervisors, and administrators in natural resource conservation. A three-week course. Emphasis is placed on soils, water, geology, forestry, wildlife, and marine life. Available for graduate credit except to agronomy, forestry, and wildlife majors. (3H,3L,4C) III.

#### 4554 (BIOL 4554): NEUROCHEMICAL REGULATION

Neurochemical transmission within the vertebrate brain will be examined. Emphasis will be placed on the chemical coding underlying the control of various behaviors and how these systems can be modified by various drugs or diet. Pre: (2304 or BIOL 3404), CHEM 2535. (3H,3C) II.

#### 4574 (BIOL 4574): SOCIAL BEHAVIOR OF BIRDS AND MAMMALS

This course examines origins, influences and implications of social behavior in a variety of avian and mammalian species. Emphasis is placed on understanding group organization and dynamics in inter and intra-species situations. Experimental data from several disciplines (e.g., genetics, physiology, biochemistry) are reviewed to demonstrate their associations with behavioral adaptive mechanisms. Avian and mammalian species living in wild, zoo, agricultural, companion and laboratory settings are discussed. Pre: 3104 or BIOL 2004, BIOL 1106. (3H,3C)

#### 4614 (NR 4614): WATERSHED ASSESSMENT, MANAGEMENT, AND POLICY

Multidisciplinary perspectives of assessment, management and policy issues for protecting and improving watershed ecosystems. Topics include: monitoring and modeling approaches for assessment, risk-based watershed assessment geographic information systems for watershed analysis, decision support systems and computerized decision tools for watershed management, policy alternatives for watershed protection, urban watersheds, and current issues in watershed management. Pre: Two 4000 level courses in environmental/natural resource science, management, engineering, and/or policy in BSE, CEE, FOR, GEOL, LAR, CSES, ENT, BIO, GEOG, AAEC, UAP or equivalent. (2H, 2C). II. (2H,2C)

**4714: GLOBAL SEMINAR**

Student-centered internet-based course including text and real-time video conferencing among students at collaborating institutions in the United States and Canada. Focus is contemporary North American environmental sustainability issues based on student-prepared case studies. Pre-requisite: Junior or Senior Standing required. (1H,1C)

**4964: FIELD STUDY/PRACTICUM**

Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

## Overview

Animal and Poultry Sciences provides individuals with a broad science-based education tailored to meet their needs and career goals. The program prepares students for careers in livestock and poultry production, agribusiness, research, and teaching. Our curriculum also provides preparation for professional schools including veterinary medicine, medical school and other health professions, graduate school, etc. This major combines education in the basic sciences of animal and poultry nutrition, genetics, and physiology with management principles as applied to the raising and merchandising of beef cattle, horses, poultry, sheep, swine, and their products. Qualified undergraduates may participate in independent studies, undergraduate research, and summer internship programs. Study abroad opportunities are also available.

Students choose among three options: production/business, science, and pre-vet. Within each option, emphases are offered in the areas of equine, livestock, and poultry. Specific requirements may be obtained from the departmental advising office (540/231-6936), by e-mail ([apsc@vt.edu](mailto:apsc@vt.edu)), or on the web at [www.apsc.vt.edu](http://www.apsc.vt.edu).

The department also offers opportunities for graduate specialization in the following fields: behavior, genetics, management, nutrition, and physiology. M.S. and Ph.D. programs are offered (see [Graduate Catalog](#)).

## Course Requirements

First Year	
<i>Fall Semester</i>	<b>(15)</b>
CHEM 1035, 1045: General Chemistry	4
BIOL 1105, 1115: Prin. of Biology	4
STAT 2004: Intro Statistics	3
APSC 1454, 1464: Intro. to An.& Poul. Sci.	4
<i>Spring Semester</i>	<b>(15)</b>
CHEM 1036, 1046: General Chemistry	4
BIOL 1106, 1116: Prin. of Biology	4

MATH 1016: College Math	3
APSC 1504: Anim. & Poul. Science Survey	1
ENGL 1105: Freshman English	3
<b>Second Year</b>	
<i>Fall Semester</i>	<b>(15)</b>
ENGL 1106: Freshman English	3
AAEC 1005: Economics of Food & Fiber Sys.	3
APSC 2004: Anim. & Poul. Sci. Seminar	1
ALS 2304: Animal Physiology & Anatomy	4
Electives*	4
<i>Spring Semester</i>	<b>(15)</b>
AAEC 1006: Economics of Food & Fiber Sys.	3
APSC 3254: Animal Products	3
ALS 3204: Animal Nutrition and Feeding	3
Electives*	6
<b>Third Year</b>	
<i>Fall Semester</i>	<b>(12)</b>
ALS 3104: Animal Breeding & Genetics	3
AAEC 2104, 2434, 3404, 3454 or MGT 3304	3
Electives*	6
<i>Spring Semester</i>	<b>(15)</b>
ALS 3304: Physiol. of Repro. in Dom. Anim.	3
APSC 4004: Contemporary Issues in the Animal Sciences	2
Electives*	10
<b>Fourth Year</b>	
<i>Fall Semester</i>	<b>(15)</b>
Choose one (or two):	
APSC 4404: Poultry Management (4)	
APSC 4414 Beef Production (4)	4
Capstone Experience	2
Electives*	9
<i>Spring Semester</i>	<b>(15)</b>
Choose one (or two):	
APSC 4424: Horse Production(4)	
APSC 4444 Swine Production (3)	
Electives*	11 or 12

**Note:** Advisors work with students to individualize the course of study.

\* Electives must include Area 2, Area 6 and Area 7 selections; 38 emphasis requirements & restricted electives approved by your advisor; and free electives.

## Satisfactory Progress

By the end of the academic year in which the student has attempted 72 hours (including transfer, advanced placement, advanced standing and credit by examination) "satisfactory progress" will consist of:

- a grade point average of at least 2.0
- passing at least 24 credits that apply to the Curriculum for Liberal Education
- passing the following:

[TOP](#)

## **Undergraduate Course Descriptions (APSC) (ALS) (FST) (BMVS)**

### **1454: INTRODUCTION TO ANIMAL & POULTRY SCIENCE**

Survey of systems of livestock and poultry production including: concepts and terminology pertaining to management and marketing; types and breeds of livestock and poultry; and an introduction to nutrition, genetics, physiology, and management of beef cattle, horses, sheep, swine and poultry. (3H,3C) I, II.

### **1464: ANIMAL AND POULTRY SCIENCE LABORATORY**

Management practices and concepts related to efficient livestock and poultry production and marketing are taught through demonstrations and hands-on experience. Co: 1454. (3L,1C) I,II.

### **1504: ANIMAL AND POULTRY SCIENCES SURVEY**

Orientation course for new or prospective students in Animal and Poultry Sciences. Explanation of the extension, teaching and research missions of the Animal and Poultry Sciences Department; academic requirements for majors and the planning of each student's curriculum; strategies for academic success; survey of career opportunities for Animal and Poultry Sciences majors. Pass/Fail only. (1H,1C) I, II.

### **1524: BEGINNING EQUITATION**

Introduction to modern forward seat equitation. No previous experience necessary. Familiarization with parts of the horse, tack, gaits. Control at walk, trot, canter, including trot work over rolling terrain. I Pass/Fail only. (4L,1C)

### **1624: LOW INTERMEDIATE EQUITATION**

Increased riding at canter and sitting trot. Control of horse over moderately difficult terrain including galloping. Beginning cavelletti work. Pass/Fail only. Pre: 1524. (4L,1C) II.

### **2004: ANIMAL AND POULTRY SCIENCES SEMINAR**

Identification of primary and secondary career objectives for Animal and Poultry Science majors; planning for completion of a capstone learning experience in the major. Identification of curricular and extracurricular activities to increase career opportunities. Improvement of professional and technical writing skills applicable to the animal sciences field. Pre: 1504. (1H,1C)

### **2104: POULTRY LABORATORY**

Anatomy and physiology of birds including species-specific specializations in anatomical structure and body composition, musculoskeletal, respiratory, reproductive, endocrine, digestive and urinary systems. Relationship of these concepts to growth and egg production. Includes handling live birds. I Pre: 1454, 1464. Co: ALS 2304. (3L,1C)

**2114: LIVESTOCK MANAGEMENT AND HANDLING** Safety in livestock handling; animal behavior; care, housing, and managerial practices related to beef cattle, sheep, and swine taught through experiential activities. Pre: 1454, 1464. (3L,1C)

**2124: HORSE MANAGEMENT LABORATORY** Principles of safe horse handling practices and applied horse management skills, taught through experiential activities. Pre: 1454, 1464. (2L,1C)

**2424: INTRODUCTION TO THE EQUINE INDUSTRY** Introduction to the horse and equine industry. Survey of breeds and conformation; breeding, management, equipment, facilities, and marketing of the successful horse operation. (3H,3C) II.

### **2464: INTRODUCTION TO COMPANION ANIMALS**

Appropriate care and resulting well-being of dogs, cats, and other animals that are used primarily for companionship and recreation require knowledge of their evolution, natural habitats, species and breed characteristics, behavior, breeding, feeding, housing and training. This course integrates these topics to promote a symbiotic human-animal relationship. Information regarding the scope and impact of the companion animal industry will be discussed along with a survey of associated careers. Pre: BIOL 1106. (2H,2C)

### **2524: INTERMEDIATE EQUITATION**

Intermediate work in horseback riding with special emphasis on development of the forward seat and skills required for jumping. Elementary dressage movements. Pass/Fail only. Pre: 1624. (4L,1C) I,II.

### **2624: BEGINNING EQUITATION OVER FENCES**

Introduction of jumping skills for the unskilled as well as review of jumping skills for experienced riders. Rider should have skills at trot and canter. Pass/Fail only. Pre: 2524. (4L,1C) I,II.

### **2824: EQUINE CONFORM & BIOMECHANICS**

Evaluation of equine conformation as related to locomotion, athletic performance and soundness. Basic understanding of breed standards, gaits, and rules and regulations pertaining to various equine sports disciplines, from both domestic and global perspectives. Investigation of current scientific literature regarding equine conformation and biomechanics. (1H,2L,2C)

### **2964: FIELD STUDY**

Pass/Fail only. Variable credit course.

#### 2974: INDEPENDENT STUDY

Pass/Fail only. Variable credit course.

#### 2984: SPECIAL STUDY

Variable credit course.

#### 3134 (DASC 3134): ANIMAL AGRICULTURE AND THE ENVIRONMENT

Environmental issues associated with animal agriculture. Nutrient contamination of water resources, odor emission from livestock farms, environmental regulations affecting animal agriculture, and management practices to reduce the impacts of livestock farms on air and water quality. (3H,3C)

#### 3214 (FST 3214): MEAT SCIENCE

Fundamentals of meat science in meat inspection, carcass evaluation, fabrication, fresh meat, processed meat and product preservation on beef, pork, lamb, poultry and seafood. Physical, chemical, physiological, and microbiological properties of meat as related to composition and quality. Fundamentals in processing techniques, product quality assurance, and food safety programs in meat industries. Pre: ALS 2304, CHEM 1036. (2H,4L,4C)

#### 3234: APPLIED RUMINANT NUTRITION

Application of basic principles of nutrition in developing rations for beef cattle and sheep. Emphasis is placed on appropriate use of forages, animal requirements, ration formulation techniques, and development of economic rations to enhance profitability. Pre: ALS 3204. (2H,2L,3C)

#### 3254: ANIMAL PRODUCTS

Products obtained from animals (meat, eggs, dairy, by-products). Effect of production and processing of food animals upon product safety and quality. Pre: ALS 2304. (2H,2L,3C) I, II. 3304: EMBRYOLOGY Normal and teratological embryology are intensively examined from ovulation through hatching or birth. Environmental, nutritional and genetic factors affecting embryogenesis. Even years. I Pre: ALS 2304 or BIOL 3404. (2H,3L,3C)

#### 3404: POULTRY EVALUATION AND SELECTION

Evaluation and grading of poultry and poultry products; selection of breeding stock; selection for egg production; factors contributing to quality. Pre: 1454. (1H,2L,2C) II.

#### 3524: INTERMEDIATE EQUITATION OVER FENCES

Establishment of sound jumping skills. Continuation of more advanced flat work. Study of hunter courses and cross country jumping. Pass/Fail only. Pre: 2624. (4L,1C) I,II.

#### 3624: ADVANCED EQUITATION OVER FENCES

Advanced methods and techniques for jumping and precision riding. Pass/Fail only. Pre: 3524. (4L,1C) I,II.

#### 3724: APPLIED EQUINE EVALUATION

In-depth analysis of equine conformation and performance. Emphasis on knowledge of breed standards, critical thinking skills, and oral justification of decisions. Equivalent experience may be substituted for the pre-requisite APSC 2824 with instructor approval. Pre: 2824. (1H,3L,2C)

#### 3754: PRINCIPLES OF LIVESTOCK EVALUATION

Selection of market and breeding animals based on subjective and objective methods of evaluation. Basic understanding of evaluation principles, form-to-function, expected progeny differences, and performance records of beef cattle, swine, and sheep. Involves accurate decision making and oral reason presentations. Pre: 1454. (6L,2C) II.

#### 3764: LIVESTOCK MERCHANDISING

A comprehensive study of the principles and activities involved in successfully promoting and merchandising livestock. A livestock auction (Hokie Harvest Sale) is held at the conclusion of the course to provide experiences in advertising, salesmanship, livestock photography, facility development, sale management, and budgeting. Pre: Junior standing or consent. I (2H,2C)

#### 3824: EQUINE BEHAVIOR AND TRAINING

Psychology and ethology of equine behavior. Application of fundamental behavioral concepts to the training of horses and modification of undesirable behavior patterns. Preparation and presentation of young horses for show and sale. Pre: 2124. (1H,3L,2C)

#### 3954: STUDY ABROAD

Variable credit course.

#### 4004: CONTEMPORARY ISSUES IN THE ANIMAL SCIENCES

Applying critical thinking and problem solving to important contemporary issues in animal agriculture and other areas of animal sciences; practice in visual, oral, and written communication. Pre: 2004. (1H,2L,2C)

#### 4054 (BCHM 4054): GENOMICS

A contemporary analysis of the development, utility and application of high-resolution methods for the study and manipulation of the complete genomes of organisms. The use of new techniques for genomic, metabolic and protein engineering (functional genomics), including high-throughput methods and nanotechnology, will be emphasized. Pre: BCHM 3114 or BCHM 4116 or BIOL 3774. (3H,3C) II.

#### 4064: ISSUES IN COMPANION ANIMAL MANAGEMENT

Comparative aspects of companion animals including physiology, anatomy, nutrition, genetics, reproduction and well-being. Normal and aberrant behaviors along with techniques of behavior modification and pharmacological intervention. Critical evaluation of current legal and ethical issues in

the companion animal industry. Limited to dogs, cats and caged birds. Pre-requisite: Junior Standing required Pre-requisites may be waived with permission of instructor. Pre: 2464, ALS 3104, ALS 2304. (3H,3C)

#### 4124: EQUINE HEALTH AND DISEASE

Application of principles needed to effectively monitor and manage equine herd health. Focus on information synthesis, situation assessment and decision-making skills to develop preventative care protocols and treat illness. Practical application of horse health care techniques for routine and minor emergency situations. Pre: ALS 2304. (2H,4L,4C)

#### 4154: ADVANCED ANIMAL GENETICS

Application of selection, mating systems, and molecular biology to genetic improvement of livestock, horses, and poultry in the United States. Description of applied breeding programs from elsewhere in the world. New findings in the inheritance of biological, disease resistance, and behavioral traits. Pre: ALS 3104. (3H,3C)

#### 4224: EQUINE EXERCISE PHYSIOLOGY

Comprehensive study of conditioning the equine athlete using the principles of exercise physiology, energetics, kinetics, and sports medicine. Anatomy and physiology as it relates to exercise, conditioning and fitness assessment; exercise intolerance; performance nutrition; and medical practices used to support equine athletes. Practical application of conditioning strategies for horses and analysis of physiological changes due to exercise. Pre: ALS 2304. (2H,4L,4C)

#### 4324: EQUINE REPRODUCTION AND NEONATAL CARE

Principles and techniques in equine reproductive physiology and endocrinology. In-depth examination of equine reproduction strategies combined with practical techniques leading to synthesis and evaluation of breeding decisions. Anatomy and physiology of the mare and stallion, estrus detection and manipulation, artificial insemination, semen handling and processing, parturition and early care of neonates will be covered. Other topics will include selection of breeding stock and mating decisions. Pre: ALS 2304. (2H,4L,4C)

#### 4404: COMMERCIAL POULTRY ENTERPRISE MANAGEMENT

Production, management, and reproduction of meat- and egg-type chickens and turkeys. Emphasis is on the application of basic poultry science principles as they relate to commercial poultry enterprises. Advanced topics of economic analysis, program management, and problem solving used in decision making processes in integrated poultry operations. Pre: 2104, ALS 3104, ALS 3204, ALS 3304. (3H,3L,4C) I.

#### 4414: BEEF AND SHEEP PRODUCTION AND INDUSTRY

Study of the commercial and purebred beef cattle and sheep industries. Principles and applications for successful and profitable beef and sheep production. Pre: 2114, ALS 3104, ALS 3204, ALS 3304. (3H,3L,4C)

#### 4424: HORSE PRODUCTION AND MANAGEMENT

Reproduction, genetics, nutrition, herd health, planning and economics of private and commercial horse farms, and current issues in the horse industry. Pre: 2214, 2424, ALS 3104, ALS 3204, ALS 3304. (3H,3L,4C) II.

#### 4444: SWINE PRODUCTION

Principles for commercial and seedstock swine production; current management practices, housing and marketing; issues and challenges in the swine industry. Experience in husbandry, research, and other management techniques obtained during laboratory. Pre: 2114, ALS 3104, ALS 3204, ALS 3304. (2H,3L,3C)

#### 4554: ADV LIVESTOCK ENTERPRISE MGMT

Application of principles needed to manage profitable and sustainable beef cattle, sheep, and swine enterprises. Use of techniques to develop and evaluate strategies resulting in sound livestock enterprise management decisions. Focus on advanced animal management protocols, enterprise analysis, resource allocation, marketing options and risk management. Pre: (AAEC 3404 or AAEC 3454), (APSC 4414 or APSC 4444). (2H,2L,3C)

#### 4624: TOPICS IN EQUINE SCIENCE

Review and critique of scientific literature related to equine science. Focus on creative and critical thinking. Principles and practice of information analysis, synthesis and evaluation through discourse and technical writing. Practical application of research and communication skills. Pre: ALS 2304. (2H,2C)

#### 4954: CAPSTONE EXPERIENCE IN ANIMAL AND POULTRY SCIENCES

Student-defined learning experience that utilizes knowledge and skills already learned to acquire new skills, synthesize information and solve problems in the animal sciences. Requires approval from the department before commencement of the experience, and a final report at its conclusion. Open to APSC majors only. Completion of 75 credits towards the APSC degree required. Pass/Fail only. Variable credit course. Pre: 2004.

#### 4964: FIELD STUDY

Pass/Fail only. Variable credit course.

#### 4974: INDEPENDENT STUDY

Pass/Fail only. Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Pass/Fail only. Variable credit course.

**Overview**

The bachelor of science in biochemistry is designed to provide students with a thorough foundation in chemistry and biology and an appreciation of how these sciences are integrated to explore the molecular mechanisms underlying biological processes. The plan of study prepares students for careers in medicine, veterinary medicine, biomedical research, agriculture, industrial biochemistry, or biotechnology. In addition, it provides the background for post-graduate studies in the life sciences or professional studies in medicine, nursing, veterinary medicine, dentistry, pharmacy, and clinical chemistry.

The department offers the undergraduate biochemistry degree in two colleges, the College of Agriculture and Life Sciences and the College of Science. Biochemistry majors complete the Curriculum for Liberal Education requirements unique to the college in which they are enrolled.

The departmental requirements for majors in either college are: mathematics (9-12 credits); physics (8 credits); principles of biology (8 credits); genetics (3 credits); general microbiology (4 credits); general chemistry (8 credits); organic chemistry (8 credits); physical chemistry (6 credits); analytical chemistry (4 credits); introduction to biochemistry (1 credit); general biochemistry (7 credits); and laboratory problems in biochemistry and molecular biology (6 credits).

To qualify for a major in biochemistry, the department requires that students maintain a minimum 2.0 grade point average (GPA) for the hours passed in all required biochemistry, biology, and chemistry courses. In addition, the department requires that a student earn a C- or better in all required biochemistry, chemistry, and biology courses.

The plan of study allows time for qualified students to participate in undergraduate research (BCHM 4994). Qualified students are strongly encouraged to initiate research activity prior to their senior year. A minimum GPA of 2.5 is required for enrollment in BCHM 4994. Students participating in undergraduate research are encouraged to present a senior thesis.

Upper-division students who qualify for the Honors Program may participate in the "in honors" degree program in biochemistry. The Honors Program and undergraduate research program include study and research with individual faculty members.

Biochemistry majors may participate in the Cooperative Education Program that alternates academic study with employment experience. Additional information pertaining to the CO-OP program is included in the "General Information" section of this catalog. Summer internships with various businesses and governmental agencies are frequently available, particularly to rising seniors.

**Biotechnology Option**

Biotechnology is the application of fundamental biochemical and molecular biological approaches to problems in agriculture, medicine,

biotechnology, energy, and environmental sciences. The faculty in biochemistry and in several other science departments have developed an interdisciplinary option for undergraduates. To complete the option, Biochemistry majors must also take BCHM 4784 (Applications in Molecular Life Science) and will graduate with a degree in biochemistry with an option in biotechnology. The option will introduce information, concepts, and techniques that are shaping the future of science and our society.

## Bioinformatics/Genomics

The department supports students' interest in bioinformatics/genomics by providing instruction and laboratory experience in those areas. Students are advised of appropriate supporting courses in computer science that may be used toward a minor in Computer Science.

The department also offers a graduate program leading to the M.S. and Ph.D.

The minimum number of credits required for the B.S. in Biochemistry is 120.

## Suggested Schedule for Biochemistry Majors

<b>First Year</b>	
<i>First Semester</i>	<b>(16)</b>
BCHM 1014: Introduction to Biochemistry <sup>1</sup>	1
CHEM 1055: General Chemistry for Majors <sup>1,5</sup>	4
CHEM 1065: General Chemistry Lab for Majors <sup>1,5</sup>	1
ENGL 1105: Freshman English	3
BIOL 1105: Principles of Biology <sup>1</sup>	3
BIOL 1115: Principles of Biology Lab <sup>1</sup>	1
MATH 1016: Elementary Calculus <sup>2</sup>	3
<i>Second Semester</i>	<b>(15)</b>
CHEM 1056: General Chemistry for Majors <sup>1,5</sup>	4
CHEM 1066: General Chemistry Lab for Majors <sup>1,5</sup>	1
ENGL 1106: Freshman English	3
BIOL 1106: Principles of Biology <sup>1</sup>	3
BIOL 1116: Principles of Biology Lab <sup>1</sup>	1
MATH 2015: Elementary Calculus <sup>2</sup>	3
<b>Second Year</b>	
<i>First Semester</i>	<b>(15)</b>
CHEM 2565: Principles of Organic Chemistry <sup>1,5</sup>	3
CHEM 2545: Organic Chemistry Lab <sup>1</sup>	1
PHYS 2205: General Physics <sup>1</sup>	3
PHYS 2215: General Physics Lab <sup>1</sup>	1
STAT 3615: Biological Statistics <sup>2</sup>	3
BIOL 2604: General Microbiology <sup>1</sup>	3
BIOL 2614: General Microbiology Lab <sup>1</sup>	1
<i>Second Semester</i>	<b>(14)</b>
CHEM 2566: Principles of Organic Chemistry <sup>1,5</sup>	3
CHEM 2546: Organic Chemistry Lab <sup>1</sup>	1
PHYS 2206: General Physics <sup>1</sup>	3
PHYS 2216: General Physics Lab <sup>1</sup>	1
Electives <sup>3</sup>	6
<b>Third Year</b>	

<i>First Semester</i>	<b>(15)</b>
BIOL 2004: Introductory Genetics <sup>1</sup>	3
BCHM 4115: General Biochemistry <sup>1</sup>	4
CHEM 2114: Analytical Chemistry <sup>1</sup> and	3
CHEM 2124: Analytical Chemistry Lab <sup>1</sup>	1
Electives <sup>3</sup>	4
<i>Second Semester</i>	<b>(16)</b>
BCHM 4116: General Biochemistry <sup>1</sup>	3
BCHM 4124: Laboratory Problems in Biochemistry and Molecular Biology <sup>1, 4</sup>	6
Electives <sup>3</sup>	7
<b>Fourth Year</b>	
<i>First Semester</i>	<b>(15)</b>
CHEM 4615: Phys. Chem. for the Life Sciences <sup>1</sup>	3
Electives <sup>3</sup>	12
<i>Second Semester</i>	<b>(15)</b>
CHEM 4616: Phys. Chem. for the Life Sciences <sup>1</sup>	3
Electives <sup>3</sup>	12

<sup>1</sup> Required course in department major.

<sup>2</sup> The departmental mathematics requirement may be satisfied by taking Math 1015-1016 and 2015 (Elementary Calculus with Trigonometry I & II) and one of the following: Math 2016, or Stat 3615 (Biological Statistics); or Math 1205-1206 (Calculus) and either Math 2016 or Stat 3615.

<sup>3</sup> Electives must include college and Curriculum for Liberal Education requirements.

<sup>4</sup> Enrollment requires "C-" or better in BCHM 4115.

<sup>5</sup> Will also accept: CHEM 1035-1036, CHEM 1045-1046, and CHEM 2535-2536.

[TOP](#)

## Progress Toward Degree

The following required courses should be completed by the end of the spring semester of the junior year for satisfactory progress toward a bachelor's degree for biochemistry majors in both the College of Agriculture and Life Sciences and in the College of Science.

BIOL 1105, 1106: Principles of Biology; BIOL 1115, 1116: Principles of Biology Lab; BIOL 2604: General Microbiology; BIOL 2614: General Microbiology Lab; BIOL 2004: Introductory Genetics; CHEM 1035, 1036: General Chemistry or CHEM 1055, 1056: General Chemistry for Majors; CHEM 1045, 1046: General Chemistry Lab or CHEM 1065-1066: General Chemistry Lab for Majors; CHEM 2535, 2536: Organic Chemistry or CHEM 2565, 2566: Principles of Organic Chemistry; CHEM 2545, 2546: Organic Chemistry Lab; PHYS 2205, 2206: General Physics; PHYS 2215, 2216: General Physics Lab.

## Undergraduate Course Descriptions (BCHM)

### 1014: INTRODUCTION TO BIOCHEMISTRY

History and evolution of biochemistry; applications of biochemistry in agricultural and life science disciplines; topical research areas in biochemistry; educational requirements and career opportunities for biochemistry majors. I Pass/Fail only. (1H,1C)

### 2024: CONCEPTS OF BIOCHEMISTRY

Short course in fundamentals of the chemistry of living systems. Introduction to major categories of biochemical substances, metabolic pathways, and principles of biochemical information transfer. (No credit for majors). Pre: CHEM 2514 or CHEM 2535. (3H,3C) II.

### 2974: INDEPENDENT STUDY

Variable credit course.

### 2974H: INDEPENDENT STUDY

Honors section. Variable credit course.

### 2984: SPECIAL STUDY

Variable credit course.

**3114: BIOCHEMISTRY FOR BIOTECHNOLOGY AND THE LIFE SCIENCES**

Survey presentation of the basic principles of biochemistry as they apply to biotechnology. Topics covered include protein structure, enzymology, cellular organization, and biochemical regulation. Special emphasis will be given to gene structure, transcription, and translation, cellular organization, and cloning, sequencing, modification and expression of recombinant DNA. Examples will be given of agricultural/medical/industrial applications of cellular and molecular biochemical knowledge. Non-majors only. I Pre: CHEM 2536. (3H,3C)

**3124: BIOCHEMICAL TECHNIQUES FOR BIOTECHNOLOGY AND THE LIFE SCIENCES**

Survey of basic biochemical laboratory techniques for students interested in biotechnology, genetic engineering, and the modern life sciences. Topics include the use of buffers, spectroscopy, enzyme assays, chromatography, electrophoresis, and immunoassays in the analysis of biological macromolecules. (Non-majors only). I Co: 3114. (2H,3L,3C)

**4034 (BMVS 4034): ENVIRONMENTAL HEALTH TOXICOLOGY**

Health effects associated with the exposure to chemicals, identifying and managing problems of chemical exposure in work places and the environment, fundamental principles of biopharmaceutics and toxicokinetics, and risk assessment. Emphasis on conceptual understanding of chemical entry into the body, biotransformation, multiple chemical sensitivity, and chemically induced diseases. Identification of nutrient interactions with environmentally induced disorders and to understand the mechanisms of such interactions and their influence on human health and welfare. Pre: BIOL 2104 or BIOL 3124, ALS 2304, BIOL 2406 or BCHM 3114 or BCHM 4115, BCHM 4116. (3H,3C)

**4054 (APSC 4054): GENOMICS**

A contemporary analysis of the development, utility and application of high-resolution methods for the study and manipulation of the complete genomes of organisms. The use of new techniques for genomic, metabolic and protein engineering (functional genomics), including high-throughput methods and nanotechnology, will be emphasized. Pre: 3114 or 4116 or BIOL 3774. (3H,3C) II.

**4074: CAREER ORIENTATION**

Examination of various career opportunities for biochemists in industry, academia, medicine and related health sciences. Introduction to resources for locating career opportunities, resume preparation and interview skills. Restricted to biochemistry majors and minors. Junior standing required. I Pass/Fail only. Co: 4115. (1H,1C)

**4115-4116: GENERAL BIOCHEMISTRY**

Metabolism and chemistry of carbohydrates, proteins, lipids, and nucleic acids with emphasis on interactions and comparative aspects of microbial, plant, and animal forms. For students in the biochemistry curriculum and other students interested in a foundation course. (Students are required to have at least a C- in both Chem 2535 and 2536 to be admitted to BCHM 4115). Pre: (CHEM 2535 or CHEM 2565), (CHEM 2536 or CHEM 2566) for 4115; 4115 for 4116. 4115: (4H,4C) 4116: (3H,3C) I,II.

**4124: LABORATORY PROBLEMS IN BIOCHEMISTRY AND MOLECULAR BIOLOGY**

Presentation of major analytical techniques of importance to biochemistry and molecular biology, including spectrophotometry, electrophoresis, chromatography. Lab study of selected principles and methods used in biochemistry and molecular biology. Pre: 4115, (CHEM 2114, CHEM 2124) or (CHEM 3114, CHEM 3124). Co: 4116. (3H,9L,6C) I,II.

**4754: INTERNSHIP**

Variable credit course.

**4784 (BIOL 4784): APPLICATIONS IN MOLECULAR LIFE SCIENCE**

Synthesis and application of biochemistry, cell biologies, genetics, genomics, physiology, immunology concepts and techniques to address medical and agricultural problems. Gene characterization and manipulation, protein-based drugs, diagnostics, vaccines, transgenic plants/animals. Analysis, critique, application of research in molecular life science. Pre: (3114, 3124, BIOL 3774, BIOL 4774) or (BCHM 4116, BCHM 4124). (3H,3C)

**4974: INDEPENDENT STUDY**

Variable credit course.

**4974H: INDEPENDENT STUDY**

## Overview

The mission of the Department of Biological Systems Engineering (BSE) is to provide the engineering expertise for a sustainable food, fiber, and bioprocessing industry in the state and throughout the world through its teaching, research and extension programs.

The teaching program in BSE offers engineering B.S., M.S., and Ph.D. programs and service courses for students enrolled in the College of Agriculture and Life Sciences and other colleges. The degree programs in BSE are administered by the College of Engineering. Therefore, the curriculum and courses offered for the B.S. in biological systems engineering are listed in the College of Engineering section of this catalog. Students interested in pursuing an undergraduate degree program in Biological Systems Engineering must first be admitted to the College of Engineering.

Service courses designed to meet the needs of students enrolled in different programs in CALS are listed in the following section. These courses generally are not taken to meet engineering degree requirements except as free electives.

## Undergraduate Course Descriptions (BSE)

---

### Courses for Non-Engineering Students

(See [College of Engineering](#) for courses for engineering students)

---

#### 2094: INTRODUCTION TO METAL FABRICATION

Introduction to metal working tools, equipment, and processes. Fundamentals of gas and arc welding. (3L,1C) I,II.

#### 2294: ANIMAL STRUCTURES AND ENVIRONMENT

Functional considerations in facilities development for production agriculture. Concepts of farmstead planning and system development emphasized. Techniques for providing production animal environment, especially for confinement facilities. Pre: MATH 1016. (3H,3C) I,II.

#### 2384: SOIL AND WATER RESOURCES MANAGEMENT

Fundamental principles involved in the management of soil and water resources are presented. Emphasis is placed on the planning and management of irrigation systems and the control of soil erosion on agricultural lands. Non-engineering students. I Pre: MATH 1016. (3H,3C)

#### 2484: ENGINE AND POWER TRAIN TECHNOLOGY

Fundamentals of the construction and operation of current internal combustion power units. Control of power utilizing clutches, transmissions, drive shafts, and differentials. Pre: MATH 1016. (2H,3L,3C) I,II.

#### 2494: AGRICULTURE POWER AND MACHINERY

The function, selection, operation, adjustment, and economic management of tractors and field machinery. Pre: MATH 1016. (3H,3C) I,II.

#### 2974: INDEPENDENT STUDY

Variable credit course.

2984: SPECIAL STUDY

Variable credit course.

4324: NONPOINT SOURCE POLLUTION

Engineering aspects of the sources and magnitudes of nonpoint source pollution, major causative factors, and control techniques. Emphasis on hydrologic factors, erosion, atmospheric deposition, adsorption and degradation of pollutants in soil, disposal of agricultural wastes, and management for the control of urban and agricultural nonpoint source pollution. Pre: CEE 3104. (3H,3C)

4974: INDEPENDENT STUDY

Variable credit course.

4984: SPECIAL STUDY

Variable credit course.

4994: UNDERGRADUATE RESEARCH

Variable credit course.

## Overview

Crop and Soil Science integrates the basic sciences—biology, chemistry, physics, and mathematics—and applies them to challenges of sustainable plant production and soil and water management. As the world's population grows toward a projected 9-10 billion people, crop and soil sciences will become increasingly important for ensuring the world's food security.

In the CSES major, students learn about plant production, genetics, and physiology; international aspects of crop production, and the science and management of turfgrasses. Students graduating with a degree in CSES will be competitive for jobs as crop consultants, crop breeders, specialists in international agriculture, soil scientists, and managers of golf courses and sports fields. The U.S. Bureau of Labor Statistics forecasts that employment of soil and plant scientists is expected to increase by 15% between 2008 and 2018, faster than the average for all occupations. Students majoring in CSES can choose from options in Agroecology, Biotechnology and Genetics, International Agriculture, Soils and Land Rehabilitation, and Turfgrass Management.

## Agroecology Option

Students in this option concentrate on the biology and increasingly complex technology of food, feed, fuel, and fiber production. Graduates typically move into industries supporting production agriculture, crop and soil consulting, farming, or into sales and managerial positions that directly and indirectly support agricultural production.

## Biotechnology and Genetics Option

Producing better quality and higher yielding crops has been a long-standing objective of crop breeders. New techniques of genetic engineering are now being brought to bear on crop improvement. Students in this option learn the newest methods of molecular biology and are well prepared for careers in research and industry.

## International Agriculture Option

The world's ever-expanding population must be fed; at the same time, we must be good stewards of the Earth's resources. Many countries have not been able to bring food production and resource conservation into balance. Students in the International Agriculture option are interested in finding simultaneous solutions to these concerns. Employment opportunities exist with various private and public agencies.

## Soils and Land Rehabilitation Option

Human impacts on the environment and good stewardship of the soil and land resources are major focuses of this option. Graduates find positions with governmental agencies and private industry. They may deal with concerns such as soil conservation, groundwater pollution, land-use planning, waste management, and reclamation of disturbed areas.

## Turfgrass Management Option

Using basic principles of the natural sciences and agricultural technology, turf managers have skills that make them highly employable in golf-course management, athletic and recreational fields, lawn maintenance services, the landscaping industry, and sod production.

## Requirements for a Major

All the curricula for the various options contain a core of courses to assist the student in developing knowledge and ability in basic sciences (biology and chemistry), computational skills (mathematics and statistics), communication skills (both writing and speaking), as well as crop, soil, and environmental sciences. A list of courses specified for each option may be obtained upon request from the department or at [www.cses.vt.edu](http://www.cses.vt.edu). In the following listing, semester hour credits are shown at the right.

Core Curricular Requirements (All Options)	
Agricultural Economics/Economics	6
Biology	6
Chemistry	8
Communications	3
Creativity and Aesthetic Experience (Area 6)	1/3
Crop and Soil Environmental Sciences	14
English (writing)	9
Ideas, Cultural Traditions, and Values (Area 2)	6
Mathematics	6
Statistics	3
Some Option-Specific Course Requirement and Electives	
Agricultural and Applied Economics (in addition to above)	0-9
Biochemistry	0-9
Biology (in addition to above)	0-18
Chemistry (in addition to above)	3-8
Crop and Soil Environmental Sciences (in addition to above)	6-21
Entomology	0-6
Geology	0-4
Horticulture	0-8
Physics	0-3
Plant Pathology, Physiology, and Weed Science	0-11
<b>Total Credits for B.S. Degree (minimum)</b>	<b>120</b>

[TOP](#)

## Requirements for a Minor

The department offers minors in crop and soil environmental sciences, turfgrass management, and wetland science. The requirements for each include CSES/ENSC 3114 and 3124 (or 3134) and 15 or 16 more credit hours selected from courses from within and outside the department. Consult the department office (240 Smyth) or web site ([www.cses.vt.edu](http://www.cses.vt.edu)) for more information on a minor.

## Satisfactory Progress

By the end of the academic year in which the student has attempted 60 hours (including transfer, advanced placement, advanced standing

and credit by examination) "satisfactory progress" will include meeting the following minimum criteria:

- having a grade point average of at least 2.0
- passing at least 24 semester credits that apply to the Curriculum for Liberal Education
- passing the following:

CHEM 1035, 1036, 1045, 1046  
CSES 1004  
CSES 3114 and 3124  
6 hours of MATH and/or STAT

- declaring an option within CSES

## Opportunities to Excel

Students with outstanding records can qualify for the Honors Program and graduate "in honors" in crop and soil environmental sciences. Other opportunities for personal and professional growth and for recognition include department-sponsored agronomy and turf clubs, membership in Alpha Zeta and Gamma Sigma Delta or other honoraries, and several scholarships. B.S. graduates are certifiable in the professional registry of the American Society of Agronomy.

Graduate courses and research opportunities lead to M.S. and Ph.D. specializations in the crop, soil, and environmental sciences. (See the [Graduate Catalog](#) for more information.)

## Undergraduate Course Descriptions (CSES)

### 1004: INTRODUCTION TO CROP AND SOIL ENVIRONMENTAL SCIENCES

An overview of crops, soils, and environmental studies. Emphasis placed on career aspects of crop science, soil science, turf management, environmental studies, and plant biotechnology and genetics. I. Pass/Fail only. (1H,1C)

### 2434: CROP EVALUATION

Identification of more than 200 crops, weeds, seeds and crop diseases. Seed testing for purity according to the rules of the Association of Official Seed Analysts. Crops graded according to the official USDA grain grading standards. (6L,2C) I,II.

### 2444: AGRONOMIC CROPS

An introduction to crop production in Virginia, presenting basic climatic, crop, and soil characteristics and their relation to cropping systems. Introduces basic mechanical, chemical, and managerial tools of crop production and examines feed quality and seed and forage storage. I. (3H,3C)

### 2564: TURFGRASS MANAGEMENT

Growth, development, adaptation, and selection of the major turfgrass species. Principles of establishment, mowing, nutrition, irrigation, cultivation, and pest control of lawns and utility turfs. Co: BIOL 1105. (2H,3L,3C) I.

### 2964: FIELD STUDY

Variable credit course.

### 2974: INDEPENDENT STUDY

Variable credit course.

### 2984: SPECIAL STUDY

Variable credit course.

### 2994: UNDERGRADUATE RESEARCH

Variable credit course.

### 3114 (ENSC 3114) (GEOS 3614): SOILS

Characterization of soils as a natural resource emphasizing their physical, chemical, mineralogical, and biological properties in relation to nutrient availability, fertilization, plant growth, land-use management, waste application, soil and water quality, and food production. For CSES, ENSC, and related plant-and earth-science majors. Partially duplicates 3134. Pre: CHEM 1036. Co: 3124. (3H,3C) I.

### 3124 (ENSC 3124) (GEOS 3624): SOILS LABORATORY

Parent materials, morphology, physical, chemical, and biological properties of soils and related soil management and land use practices will be studied in field and lab. Partially duplicates 3134. Co: 3114. (3L,1C) I.

### 3134 (ENSC 3134): SOILS IN THE LANDSCAPE

A study of soils as functional landscape components, emphasizing their physical, chemical, mineralogical, and biological properties in relation to plant growth, nutrient availability, land-use management, and soil and water quality. Primarily for FOR/FIW, LAR, and other plant/earth science related majors. May not be taken by CSES or ENSC majors. Partially duplicates 3114 and 3124. Pre: one year of introductory CHEM or BIOL or GEOS. (2H,3L,3C) II.

#### 3144: SOIL DESCRIPTION AND INTERPRETATION

Describing, classifying, evaluating, and interpreting soil and site properties in the class and field. Local field trips supplement lecture and laboratory studies. Required for students interested in attending soil judging contests. Co: 3124, 3114. (1H,6L,3C)

#### 3304 (GEOG 3304) (GEOS 3304): GEOMORPHOLOGY

Examines the variety of landforms that exist at the earth's surface. Detailed investigation of major processes operating at the earth's surface including: tectonic, weathering, fluvial, coastal, eolian, and glacial processes. Field excursion. Pre: GEOG 1104 or GEOS 1004 or GEOS 2104. (3H,3C)

#### 3444 (HORT 3444): WORLD CROPS AND CROPPING SYSTEMS

An introduction to world crops, their primary regions of production, the factors that determine where they are grown, and their economic importance, and how they are used in the human diet. Describes the various factors that can be managed to improve crop yields. Examines present and potential systems of farming for improved crop production in the major climatic and soil ecosystems of the world. Junior standing required. (2H,3L,3C)

#### 3564: GOLF AND SPORTS TURF MANAGEMENT

Principles of turfgrass science and culture required for successful establishment and management of intensely utilized fine golf and sports turf surfaces. Taught odd years. Pre: 2564. (3H,3C)

#### 3614 (ENSC 3614): SOIL PHYS HYDRO PROPERTIES

Soil physical and mechanical properties and the physical processes controlling soil water retention and flow in agronomic and natural settings. Grain size distribution, weight-volume relationships, specific surface, electrical charge density, consistency, stress, compaction, rainfall runoff, water retention, steady/non-steady water flow in saturated/unsaturated soil, infiltration, bare soil evaporation, and soil water balance. Pre: (3114, 3124) or (GEOS 3614, GEOS 3624). (3H,3C)

#### 3634 (ENSC 3634): PHYSICS OF POLLUTION

Physical processes that control the fate of pollutants in our land, air, and water resources. Types and sources of pollutants, physical processes in the soil-water-atmosphere continuum controlling the dispersion and deposition of pollutants, the movement of pollutants, including radionuclides, by surface and subsurface water flow in soils, and physics of disturbed soils. I. Pre: 3114, PHYS 2206, MATH 2016. (3H,3C)

#### 3644 (ENSC 3644): PLANT MATERIALS FOR ENVIRONMENTAL RESTORATION

Overview of ecological principles related to re-vegetation and restoration of disturbed sites. Function and species requirements of plants in stabilizing disturbed areas including mines, rights-of-way, constructed wetlands, and for the remediation of contaminated soils. I Pre: BIOL 1106. Co: 3114. (3H,3C)

#### 4004: SENIOR SEMINAR

The job market, placement, and professional ethics within crop and soil environmental sciences, and consideration of topics of current interest in the major. Majors only. Senior standing required. I. (1H,1C)

#### 4134: SOIL GENESIS AND CLASSIFICATION

The form and dynamics of soil bodies across the landscape; soil-forming factors and processes; state factor analysis as a predictive tool to explain the evolution of unique soils across the terrain; diagnostic horizons and other important pedagogical features used in Soil Taxonomy; history and development of soil classification systems. Taught even years. Pre: 4124. (3H,3C) II.

#### 4144: PLANT BREEDING AND GENETICS

Genetic variation in plants and its importance in plant breeding, and comparisons of theories and procedures in breeding of self-pollinated versus cross-pollinated plants. Taught even years. (2H,3L,3C) II.

#### 4154: SOIL AND GENESIS AND CLASSIFICATION LAB

Describe and classify unique soil properties and horizons. Observe, describe, and evaluate their processes of formation, chemistry, and related site properties in the lab and field. Local and regional field trips reinforce laboratory studies. This is an experiential learning course, complementary to CSES 4134. Pre: (3114, 3124) or 3134. (3L,1C)

#### 4164 (BIOL 4164) (CEE 4164) (ENSC 4164): ENVIRONMENTAL MICROBIOLOGY

Ecology, physiology, and diversity of soil and aquatic microorganisms; incorporates the significance of these topics within the context of environmental applications such as bioremediation, wastewater treatment, control of plant- pathogens in agriculture, and pollution abatement in natural systems. The laboratory portion of the course will stress methodology development, isolation and characterization of microorganisms from natural and engineered systems, and examination of the roles of microorganisms in biogeochemical cycling. Pre: BIOL 2604. (2H,3L,3C) II.

#### 4214: SOIL FERTILITY AND MANAGEMENT

Soil productivity and nutrients required for crop growth; fertilizer sources and nutrient reactions in soil; methods of fertilizer nutrient placement in major tillage systems; and interpretation of soil tests and plant analyses for determining crop nutrient requirements. I. Pre: 3114. (3H,3C)

#### 4224: SOIL FERTILITY AND MANAGEMENT LABORATORY

Determination of essential elements for plant growth in soils and plants. Techniques for obtaining representative soil and plant samples. Comparison of soil test methods and interpretation of results and instrumentation utilized in analytical work. I. Co: 4214. (3L,1C)

#### 4314 (ENSC 4314): WATER QUALITY

Provide comprehensive information on the physical, chemical, biological, and anthropogenic factors affecting water quality, fate and transport of contaminants in water, water quality assessment and management, and current water quality policies. Pre: (ENSC 3604 or BIOL 4004), MATH 2015, BIOL 1105, BIOL 1106, CHEM 1035, CHEM 1036. (3H,3C)

**4324 (ENSC 4324): WATER QUALITY LABORATORY**

Teach students a variety of laboratory chemical and biological techniques for water quality analysis. Complementary to ENSC/CSES 4314. Pre: CHEM 1046. Co: 4314, ENSC 4314. (3L,1C)

**4334 (FOR 4334): PRINCIPLES AND PRACTICE OF AGROFORESTRY**

Biological, social, economic, and technical aspects of agroforestry, training and technology transfer techniques, and application of forestry and agriculture principles. Roles of animals and fish, trees, and agricultural crops in agroforestry systems. Community involvement in planning and implementation of agroforestry projects. I. (3H,3C)

**4344: CROP PHYSIOLOGY AND ECOLOGY**

Developmental and ecological processes important in cropping situations: seed physiology, root and canopy development, flowering, water stress, energy flow, competition; emphasis on physiological adaptations, limitations to yield, and yield-optimizing strategies. (3H,3C) II.

**4444 (ENSC 4444): MANAGED ECOSYSTEMS, ECOSYSTEM SERVICES, AND SUSTAINABILITY**

Description and interactions of climate, soils, and organisms within intensively managed ecosystems used to produce food, fiber, bio-energy, fresh water, recreation, cultural, and other ecosystems services essential for human well-being. Ecological concepts applied to agricultural, grassland, and urban/turf ecosystems. Ecologically based principles for sustainably managed ecosystems. Regional and global significance of managed ecosystems in context of sustainable food systems, and the Millennium Ecosystem Assessment. Pre-Requisite: Junior or Senior Standing required. Pre: 3114, 3124. (3H,3C)

**4544: FORAGE CROP ECOLOGY**

Species adaptation interrelated with soil, climatic, and biotic factors as associated with establishment, production, utilization, and nutritional value of forages. Pre: ALS 3204. (3H,3C) II.

**4564: INTEGRATED MANAGEMENT OF TURF SYSTEMS**

Requires students to develop an integrated turf management plan for a case-study golf course, athletic field complex, sod farm, or commercial lawn care operation. A significant part of this plan will be in agronomic programming, material selection, application schedules, and budgeting. Prerequisite and senior standing are required. Pre: 3564. (2H,2C) II.

**4594 (CEE 4594): SOIL AND GROUNDWATER POLLUTION**

Application of mathematical models for chemical movement in soils and groundwater to evaluate soil and groundwater pollutant behavior; discussion of pollution remediation technologies; design of subsurface monitoring networks; case studies in soil and groundwater pollution; applications to landfills, waste spills, septic drain-fields, pesticide/fertilizer leaching, and other problems of environmental concern. Pre: MATH 2224, (GEOL 4114 or CEE 4314). (3H,3C) I,II.

**4644: LAND-BASED SYSTEMS FOR WASTE TREATMENT**

Soils as a medium for waste treatment; potential for environmental degradation from biological elements and chemicals added to soils; development of land-based treatment and utilization systems for solid and liquid wastes; issues and concerns relating to large-scale applications of municipal and industrial wastes to land. Taught odd years. (3H,3C) II.

**4734 (CHEM 4734) (ENSC 4734): ENVIRONMENTAL SOIL CHEMISTRY**

Chemistry of inorganic and organic soil components with emphasis on environmental significance of soil solution-solid phase equilibria, sorption phenomena, ion exchange processes, reaction kinetics, reduction/oxidation reactions, and acidity and salinity processes. I Pre: 2114, 3124, CHEM 2514 or CHEM 2535, CHEM 2114, MATH 2015. (3H,3C)

**4754 (CHEM 4754) (ENSC 4754): INSTRUMENTAL ANALYSIS FOR AGRICULTURAL AND ENVIRONMENTAL SCIENCES**

Theory and principles of common analytical instruments and their applications to agriculture and environmental science research. Topics include atomic absorption and emission spectroscopy, spectrophotometric methods (UV, visible, luminescence, and automation), chromatography, ion-selective electrodes, and microwave digestion. Infrared spectroscopy, atomic ratio and molecular mass spectroscopy, nuclear magnetic resonance will also be included. Provides hands-on experience with modern analytical instruments. Prerequisites or graduate standing required. Pre: (CHEM 2114, CHEM 2124) or (CSES 3114, CSES 3124) (3H,3L,4C) II.

**4774 (ENSC 4774): RECLAMATION OF DRASTICALLY DISTURBED LANDS**

Remediation, rehabilitation, and re-vegetation strategies for lands disturbed by mining, construction, industrialization, and mineral waste disposal. Disturbed site characterization and material analysis procedures. Regulatory and environmental monitoring frameworks for mining sites and other disturbed lands. Prediction and remediation of water quality impacts from acid drainage. Pre: 3114 or GEOS 3614 or ENSC 3114 or CSES 3134 or ENSC 3134 or CSES 3304 or GEOG 33 04 or GEOS 3304. (3H,3C)

**4854 (ENSC 4854): WETLAND SOILS AND MITIGATION**

Wetland soils as components of natural landscapes: biogeochemistry, hydrology, geomorphology, hydric soil indicators, and classification. Soil and hydraulic factors important to wetland delineation and jurisdictional determination. Mitigation of wetland impacts with emphasis on restoration and creation. Constructed wetlands for water treatment. Odd years. I Pre: 3114 or 3134 or 3304. (3H,3C)

**4964: FIELD STUDY**

Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

4994: UNDERGRADUATE RESEARCH  
Variable credit course.

## Overview

The purpose of the dairy science program is to offer students the opportunity to prepare themselves for a wide variety of careers by developing both their technical and interpersonal skills. We offer a challenging yet flexible curriculum that can be individualized to meet the educational needs and interests of each student, counseling to assist each student in designing individual programs, and extracurricular activities to enhance development of interpersonal skills.

Students may select from three curricula: Dairy Enterprise Management; Biotechnology/Pre-veterinary; and Dual Emphasis. All options provide students with the opportunity to acquire a broad education in the sciences, social sciences, economics, mathematics, and communications while learning the basic principles of dairy enterprise management.

## Dairy Enterprise Management Option

This is the most flexible curriculum, with at least 30 credits of electives. Suited to students with an interest in various fields of dairy production (herd manager, farm manager), allied agri-business industries (feed, artificial insemination, equipment), agricultural communications, public relations, extension, breed fieldperson, and a variety of other positions. Graduates in this option have also gone on to careers in college instruction, elementary school instruction, bank investment management, feed sales, and milk marketing, to name a few.

## Biotechnology/Pre-Vet Option

This option is recommended for students who plan to continue into veterinary college or other graduate or professional schools, or who plan a career in quality control, laboratory work, or research and product development. It provides an excellent base in chemistry, mathematics, physics, biology and biochemistry for advanced study in many areas.

## Dual Emphasis Option

This is the most popular option and is recommended for students who plan to concentrate in more than one academic area as they prepare for future careers. Common minors and double majors that students may earn while completing their Dairy Science degree requirements include Agricultural Economics, Animal and Poultry Sciences, Biology, Computer Science, and Crop and Soil Environmental Sciences, Spanish, Communications, Professional Writing, etc.

## Opportunities to Excel

Dairy science students may elect to dual major or minor in animal science, agricultural economics, or any of many other departments. Students are also encouraged to actively participate in extracurricular clubs, judging teams and a dairy management team.

Active participation in research projects in lactation, genetics, nutrition, nutrient management, and management provide qualified students valuable research experience with departmental scientists as well as part-time employment opportunities. These opportunities are available to students in all options and enhance their preparation for advanced study and provide a better understanding of the research process.

The dairy science honors program offers outstanding students the opportunity to enrich and broaden their academic programs. Honors students work closely with individual faculty members in choosing honors classes, colloquia, independent study, and research projects. Graduation "in honors" requires successful completion of university honors requirements, a comprehensive oral examination, and an honors thesis.

Graduate programs of study leading to the M.S. and Ph.D. also are offered (see [Graduate Catalog](#)).

## Course Requirements

The curricula for the various options contain a core of courses to assist students in developing knowledge and ability in natural sciences (biology and chemistry), computational skills (math and computer science), writing and communication (English, communications, and seminars), as well as animal physiology and production, nutrition and genetics, farm finance, food science and dairy sciences. A list of courses specified for each option may be obtained upon request from the department. In the following listing, semester hour credits are shown at the right.

<b><i>Dairy Science Major (not all required)</i></b>	<b><i>credits</i></b>
DASC 1574/Introduction to Dairy Science	1
DASC 2474/Dairy Science & Industry	2
DASC 2484/Dairy Cattle Evaluation	3
DASC 3274/Applied Dairy Nutrition	3
DASC 3474/Dairy Information Systems	3
DASC 4475-4476/Dairy Enterprise Mgt.	6
DASC 4174/Applied Dairy Genetics	3
DASC 4304/Applied Reproduction	2
DASC 4074/Professional Development	3
DASC 4374/Physiology of Lactation	3
DASC 4384/Mammary Immunology	3
DASC/ALS 4994/ Undergrad Research	variable
ALS 2304/Animal Phys. & Anatomy	4
ALS 3104/Animal Genetics	3
ALS 3204/Animal Nutrition	3
ALS 3304/Physiology of Reproduction	3
<b>Total:</b>	<b>41</b>

<b><i>Math &amp; Natural Sciences</i></b>	
Chemistry	6-8
Mathematics & Statistics	6
Biology	8
Microbiology	4
<b>Total Credits:</b>	<b>24-26</b>
<b><i>Social Sciences &amp; Humanities</i></b>	
Agric. Economics or Economics	6
English	6
Humanities, Global, Creativity	10
<b>Total Credits:</b>	<b>22</b>

<b>Elective credits (minimum):</b>	<b>28-30</b>
<b>Total credits for graduation:</b>	<b>120</b>

## Requirements for Minor in Dairy Science

Requirements include DASC 2474 (2 cr.), DASC 3274 (3 cr.), DASC 4374 (3 cr.), and eleven additional credits in DASC elective.

## Satisfactory Progress

After completion of 72 semester credits (including transfer, advanced placement, advanced standing and credit by examination, "satisfactory progress" will include the following:

- completion of 24 semester credits in any area of the Curriculum for Liberal Education
- completion of 9 semester credits in required in-major courses

## Undergraduate Course Descriptions (ALS)

### 1004: AGRICULTURE, THE ARTS AND SOCIETY

Introduction to the relationships among agriculture, society, and the arts, all of which are integral components of civilization. Pass/Fail only. (1H,1C) I, II.

### 2204: INTRODUCTION TO CIVIC AGRICULTURE

Introduction to the economic, social, and ecological foundations of civic agriculture. Topics include industrialization, localized food systems, and citizen participation in civic agriculture. Emphasis will be given to a range of civic agriculture models, strategies, and hands-on approaches to establish, retain and strengthen community-based food and agriculture systems. (3H,3C)

### 2304: COMPARATIVE ANIMAL PHYSIOLOGY AND ANATOMY

Comparative anatomy and physiology of domestic mammals and birds including cell neural, musculoskeletal, respiratory, cardiovascular, urinary, and endocrine systems. Pre: BIOL 1106. (3H,2L,4C) I,II.

### 2404 (BIOL 2404): BIOTECHNOLOGY IN A GLOBAL SOCIETY

Introduction to the world-wide impact of biotechnology and molecular biology, including applications to plants, animals, and microorganisms. Explores basic concepts of genetic engineering, scientific and ethical issues, and public concerns related to biotechnology. Topics include: environmental release of genetically engineering organisms, bioremediation, safety of genetically engineered food products, transgenic plants and animals, gene therapy, and genetic screening. Pre: (BIOL 1015, BIOL 1016) or (BIOL 1105, BIOL 1106) or (BIOL 1205H, BIOL 1206H), (CHEM 1015, CHEM 1016). (3H,3C) II.

### 2504: ANIMALS IN SOCIETY

Overview of animal well-being and behavior, human-animal interactions, responsibilities to animals, animal care, behavior, disease and pain recognition and current topics concerning companion animals, domestic animals and wildlife. (2H,3L,3C) II.

### 2964: FIELD STUDY

Variable credit course.

### 2974: INDEPENDENT STUDY

Variable credit course.

### 2984: SPECIAL STUDY

Variable credit course.

### 3104: ANIMAL BREEDING AND GENETICS

Principles of genetics related to improvement of domestic farm animals. Molecular, cellular and physiological genetics, estimation of breeding values, selection, heritabilities, genetic correlations, relationships, in-breeding, heterosis, genetic abnormalities. I Pre: BIOL 1105, STAT 2004. (2H,2L,3C)

### 3204: ANIMAL NUTRITION AND FEEDING

Characteristics, sources, digestion, absorption, and metabolism of water, carbohydrates, lipids, proteins, vitamins, and minerals. Feeding systems for livestock, poultry and companion animals. Pre: 2304, (CHEM 1036 or CHEM 1036H or CHEM 1016). (3H,3C) II.

### 3304: PHYSIOLOGY OF REPRODUCTION

Physiological mechanisms that control and affect reproductive processes in domestic mammals, birds and other selected species. Pre: 2304. (2H,3L,3C)

### 3404: ECOLOGICAL AGRICULTURE: THEORY AND PRACTICE

Presents an overview of historic and modern agricultural practices. Surveys the principles of ecology in the context of managed ecosystems, civic agriculture, and food systems. Explores ecologically based practices and their use in holistic and integrated agricultural systems. Pre: 2204. (2H,3L,3C)

#### 3954: STUDY ABROAD

Variable credit course.

#### 4204: CONCEPTS IN COMMUNITY FOOD SYSTEMS

Examination of the economic, political, social, and cultural issues related to community food systems development, food production and biotechnology, food sovereignty and security, and population and environmental health. Analyze models, strategies, and policies of national food systems. Pre: 2204. (3H,3C)

#### 4214: CAPSTONE: CIVIC AGRICULTURE AND FOOD SYSTEMS

Multidisciplinary, experiential community-based course focusing on civic agriculture-food systems. Work in partnership with community stakeholders to propose viable solutions to real world issues revolving around civic agriculture and food systems. Connect with communities locally, regionally or globally. Pre: 2204, 3404, 4204. (3H,3C)

#### 4404 (GEOG 4404) (NR 4404) (UAP 4404): APPROACHES TO INTERNATIONAL DEVELOPMENT

An introduction to issues relating to international development. The course will focus on areas to help students better understand the interdependencies between countries and how institutions and organizations can foster effective working relationships on global projects of mutual interest between countries. (1H,1C) I.

#### 4504: NATURAL RESOURCE CONSERVATION

Designed primarily to train elementary and secondary teachers, supervisors, and administrators in natural resource conservation. A three-week course. Emphasis is placed on soils, water, geology, forestry, wildlife, and marine life. Available for graduate credit except to agronomy, forestry, and wildlife majors. (3H,3L,4C) III.

#### 4554 (BIOL 4554): NEUROCHEMICAL REGULATION

Neurochemical transmission within the vertebrate brain will be examined. Emphasis will be placed on the chemical coding underlying the control of various behaviors and how these systems can be modified by various drugs or diet. Pre: (2304 or BIOL 3404), CHEM 2535. (3H,3C) II.

#### 4574 (BIOL 4574): SOCIAL BEHAVIOR OF BIRDS AND MAMMALS

This course examines origins, influences and implications of social behavior in a variety of avian and mammalian species. Emphasis is placed on understanding group organization and dynamics in inter and intra-species situations. Experimental data from several disciplines (e.g., genetics, physiology, biochemistry) are reviewed to demonstrate their associations with behavioral adaptive mechanisms. Avian and mammalian species living in wild, zoo, agricultural, companion and laboratory settings are discussed. Pre: 3104 or BIOL 2004, BIOL 1106. (3H,3C)

#### 4614 (NR 4614): WATERSHED ASSESSMENT, MANAGEMENT, AND POLICY

Multidisciplinary perspectives of assessment, management and policy issues for protecting and improving watershed ecosystems. Topics include: monitoring and modeling approaches for assessment, risk-based watershed assessment geographic information systems for watershed analysis, decision support systems and computerized decision tools for watershed management, policy alternatives for watershed protection, urban watersheds, and current issues in watershed management. Pre: Two 4000 level courses in environmental/natural resource science, management, engineering, and/or policy in BSE, CEE, FOR, GEOL, LAR, CSES, ENT, BIO, GEOG, AAEC, UAP or equivalent. (2H, 2C). II. (2H,2C)

#### 4714: GLOBAL SEMINAR

Student-centered internet-based course including text and real-time video conferencing among students at collaborating institutions in the United States and Canada. Focus is contemporary North American environmental sustainability issues based on student-prepared case studies. Pre-requisite: Junior or Senior Standing required. (1H,1C)

#### 4964: FIELD STUDY/PRACTICUM

Variable credit course.

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

[TOP](#)

### **Undergraduate Course Descriptions (DASC)**

#### 1574: INTRODUCTION TO DAIRY SCIENCE

The scope of the dairy science undergraduate program is presented. Preparation for careers in dairy production and related industries. May be taken only by new freshmen and transfer students. I (1H,1C)

#### 2474: DAIRY SCIENCE AND INDUSTRY

Science, technology, and business associated with production, processing, and marketing of milk and milk products. Biology of dairy cattle with emphasis on genetics, reproduction, lactation, and nutrition. Management of dairy herds. (2H,2C) II.

**2484: DAIRY CATTLE EVALUATION**

Critical appraisal of dairy cattle conformation and experience in linear trait scoring, linear trait relationships to profitability, competitive judging; written and oral justification; organization and conduct of shows and contests; showmanship. (6L,2C) II.

**2964: FIELD STUDY**

Variable credit course.

**2974: INDEPENDENT STUDY**

Variable credit course.

**2984: SPECIAL STUDY**

Variable credit course.

**3134 (APSC 3134): ANIMAL AGRICULTURE AND THE ENVIRONMENT**

Environmental issue associated with animal agriculture. Nutrient contamination of water resources, odor emission from livestock farms, environmental regulations affecting animal agriculture, and management practices to reduce the impacts of livestock farms on air and water quality. (3H,3C)

**3274: APPLIED DAIRY CATTLE NUTRITION**

Application of basic principles of nutrition in developing rations for dairy herds. Emphasis is placed on appropriate use of forages, ration formulation techniques, development of profitable rations, and ration delivery. I Pre: ALS 3204. (3H,3C)

**3474: DAIRY INFORMATION SYSTEMS**

Development, function, and use of dairy information systems including computerized performance testing programs for dairy cattle improvement and dairy herd management. Pre: 2474. (3H,3C)

**4074: PROFESSIONAL DEVELOPMENT**

This is a capstone course addressing issues of importance in the dairy industry and society in general. The course will emphasize the use of writing to promote critical thinking, evaluation and problem solving, and developing and presenting persuasive arguments. Instruction will be provided on selecting, securing, and succeeding in careers (career choices, resumes, application letters, interviewing, etc.) (3H,3C) I.

**4174: APPLIED DAIRY CATTLE GENETICS**

Application of genetic principles to dairy cattle improvement. Setting goals for genetic improvement, characteristics of traits included in selection, current methods of estimating breeding values, the role of artificial insemination and breed associations in genetic improvement, cattle genetics. Pre: ALS 3104. (2H,3L,3C) II.

**4304: PRINCIPLES & PRACTICES OF BOVINE REPRODUCTION**

Principles and techniques in reproductive physiology and herd management related to health, record keeping, estrus detection and synchronization, and ultrasonography. Ovarian function and superovulation, semen handling, artificial insemination and pregnancy detection are also considered. Pre: ALS 2304. (1H,3L,2C) I.

**4374: PHYSIOLOGY OF LACTATION**

Anatomy of the mammary gland and physiology of lactation in domestic and laboratory mammals with emphasis on dairy cattle. Mammary gland health and factors affecting lactation. Principles and techniques in dairy herd milking management. Pre: ALS 2304. (2H,3L,3C) II.

**4384: MAMMARY IMMUNOLOGY**

This course is designed to provide students with basic knowledge of immunology as related to diseases of the mammary gland. Concepts of mammary gland immunity, disease etiology, immunopathology, diagnosis and therapy will be covered with a focus on ungulate species. Host pathogen interactions, solving problems, writing intensive, literature search. Pre: ALS 2304, ENGL 1106. (3H,3C)

**4475-4476: DAIRY ENTERPRISE MANAGEMENT**

Decision strategies for modern dairy businesses. 4475: Emphasis on relationships of enterprises and techniques for evaluation of business alternatives, efficiency of production, and profit. Use of microcomputer software to support management decisions. 4476: Concentration on herd replacements, personnel, facilities and issues of management associated with rapidly changing national and international markets, environmental regulations, and computer applications. Group projects and hands-on management of university dairy herd. Pre: 2474 or AAEC 3404 for 4475; 4475 for 4476. 4475: (3H,3C) 4476: (2H,3L,3C)

**4964: FIELD STUDY**

Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

## Entomology

<http://www.ento.vt.edu>

### Loke T. Kok, Head

**Professors:** R. D. Fell; D. A. Herbert, Jr.; L. T. Kok;  
D.E. Mullins; D. G. Pfeiffer; S. M. Salom; P. B. Schultz; P. J. Semtner;  
J. R. Voshell, Jr.; R. R. Youngman; M. J. Weaver

**Associate Professors:** J.C. Bergh; C. C. Brewster; T. P. Kuhar; D. M. Miller;  
S. L. Paulson

**Assistant Professors:** Z. N. Adelman; T. D. Anderson; K. M. Myles; I. V. Sharakhov

- [Overview](#)
- [Undergraduate Course Descriptions](#)

---

## Overview

Entomology is both a basic and an applied science which deals with the study of insects and their effects upon the health, economy, and welfare of humankind.

The department offers graduate programs leading to the M.S.L.F.S. (thesis or non-thesis) and Ph.D. (see [Graduate Catalog](#)). The departmental teaching, research, and extension programs are closely coordinated with those of other departments.

Insects are important as agricultural, health, and aesthetic pests and as beneficial organisms which serve as pollinators, biological control agents for pest populations, and as components of natural ecosystems. While entomologists have only scratched the surface in the study of insects and related arthropods, their research has yielded great benefits to humankind. Examples include reductions in human diseases transmitted by insects and the leadership shown by entomologists in the development of integrated pest management principles and procedures.

## Undergraduate Course Descriptions (ENT)

### 2004: INSECTS AND HUMAN SOCIETY

An appreciation of the past, present and future role of insects with human society. Includes how to identify common insects and other arthropods, the effects of insects on human history; diseases transmitted by insects and their worldwide impact; insects and their influence on our language, literature, and the arts; management of pests of plants, animals, and its effects on environmental pollution; and practical information of how to recognize and manage important insects and arthropods, such as termites in houses and fleas on animals. (3H,3C) I,II,III,IV.

### 2254: BEES AND BEEKEEPING

An introduction to honey bee biology, the social organization of the honey bee colony and to modern apiculture, including the use of bees for pollination. Topics on beekeeping include equipment, how to get started, and colony management practices. (2H,2C) II.

**2264: BEES AND BEEKEEPING LABORATORY** A laboratory course which examines the principles and practices of modern apiculture as they relate to honey bee biology. An emphasis is placed on students gaining practical field experience in modern management techniques. Co: 2254. (3L,1C) II.

### 2974: INDEPENDENT STUDY

Variable credit course.

### 2984: SPECIAL STUDY

Variable credit course.

### 3014 (BIOL 3014): INSECT BIOLOGY

Insect biology provides an introduction to the science of entomology. The course covers the diversity of insects, their biology and behavior, the importance of insects and insect control programs in agriculture, and the effects that insects have had on human history and culture. Laboratory (3024) is optional. I Pre: (BIOL 1005, BIOL 1006) or (BIOL 1105, BIOL 1106) or (BIOL 1205H, BIOL 1206H). (2H,2C)

### 3024 (BIOL 3024): INSECT BIOLOGY LABORATORY

Taxonomy and ecology of insects commonly encountered. Identification of all orders and many common families. Ecological attributes of each taxon, including food, habitat, life cycle, and behavior. An insect collection is required. I Pre: (BIOL 1005, BIOL 1006) or (BIOL 1105, BIOL 1106) or (BIOL 1205H, BIOL 1206H). Co: 3014. (1H,3L,2C)

**3254 (BIOL 3254): MEDICAL AND VETERINARY ENTOMOLOGY**

An introduction to the roles of insects and other arthropods in the direct causation of disease in humans and animals, and as vectors in the transmission of disease organisms. The epidemiology and replication cycles of vector-borne pathogens with major medical and veterinary importance will be examined. Information will be provided on the biology and behavior of disease vectors and external parasites, and on the annoying and venomous pests of humans and animals. Mechanisms of control will be discussed. Pre: (BIOL 1005, BIOL 1006) or (BIOL 1105, BIOL 1106) or (BIOL 1205H, BIOL 1206H). (3H,3C) II.

**3264 (BIOL 3264): MEDICAL AND VETERINARY ENTOMOLOGY LABORATORY**

Taxonomy and anatomy of insects and arthropods of medical and veterinary importance. Examination of feeding behavior and ecology. Emphasis on the mechanism of injury or pathogen transmission by each group. II. Pre: (BIOL 1105, BIOL 1106) or (BIOL 1005, BIOL 1006) or (BIOL 1205H, BIOL 1206H). Co: 3254. (3L,1C)

**4254: INSECT PEST MANAGEMENT**

Principles of insect pest management with application to the major insect pests found in Virginia. Pest management involves the utilization of all effective control practices in a program which is ecologically and economically efficient. This course is intended for all students with an interest in efficient agricultural production and in reducing losses to our most diverse competitor. One year of General Biology required. (2H,3L,3C) II.

**4264 (PPWS 4264): PESTICIDE USAGE**

An interdisciplinary study of pesticides used in urban and agricultural environments. Topics studied will include: classification, toxicology, formulation, application techniques, safety, legal considerations, environmental impact, and research and development of new pesticides. Pre: CHEM 2515 or CHEM 2536. (2H,3L,3C) II.

**4354 (BIOL 4354): AQUATIC ENTOMOLOGY**

Biology and taxonomy of insects and other macroinvertebrates most commonly encountered in freshwater environments. Selected aspects of biology, such as habitat, feeding, locomotion, and life history. Identification of individual taxa, mostly at family and genus level. Significance of these organism in aquatic ecology, pollution monitoring, and natural resource management. Pre: (BIOL 1005, BIOL 1006), (BIOL 1015, BIOL 1016) or (BIOL 1105, BIOL 1106, BIOL 1115, BIOL 1116). (3H,3L,4C)

**4484 (BIOL 4484) (FIW 4484): FRESHWATER BIOMONITORING**

Concepts and practices of using macroinvertebrates and fish to monitor the environmental health of freshwater ecosystems. Effects of different types of pollution and environmental stress on assemblages of organisms and underlying ecological principles. Role of biological studies in environmental regulation. Study design, field and laboratory methods, data analysis and interpretation, verbal and written presentation of results. Pre: (BIOL 2804), (BIOL 4004 or BIOL 4354 or ENT 4354 or FIW 4424 or FIW 4614). (3H,3L,4C)

**4974: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

## Environmental Science

<http://www.ensc.vt.edu/>

Thomas L. Thompson, Department Head

Coordinating Counselor and Career Advisor:

M. J. Eick (231-8943; [eick@vt.edu](mailto:eick@vt.edu))

- [Overview](#)
- [Water Resources Option](#)
- [Land Resources Option](#)
- [Plant Resources Option](#)
- [Course Requirements for a Major](#)
- [Requirements for a Minor](#)
- [Satisfactory Progress](#)
- [Opportunities to Excel](#)
- [Undergraduate Course Descriptions](#)

## Overview

This program brings the basic sciences to bear on many crucial concerns about the environment. The environments of particular interest are terrestrial and wetland ecosystems and associated land and water resources. Specific concerns include environmental protection, pollution prevention and remediation, land-use planning, waste management, ground- and surface-water quality, reclamation and remediation of disturbed or contaminated sites, and minimizing human impacts on the environment.

The Environmental Science curriculum is multidisciplinary and strongly science and technology oriented. The basic sciences and computational skills are at the core of each of the major's three options, but specific requirements make each option unique. The curriculum prepares graduates for immediate entry into environmental careers as well as for graduate specializations. The U.S. Bureau of Labor Statistics forecasts that employment of environmental scientists and specialists is expected to increase by 28% between 2008 and 2018, much faster than the average for all occupations.

The three concentrations, or curricular options, within the major and example of the career opportunities within each are as follows:

## Water Resources Option

The emphasis in this option is on fresh water systems and resources, although there are obvious connections to estuarine and marine settings. Both surface- and ground-water quality may become degraded as a result of human activities. Those processes, their consequences, and solutions are the focus of this option. Students in this option are entering careers in the areas of regulation, remediation, and environmental protection.

## Land Resources Option

This option develops an understanding of many of the complex biological, chemical, economic, geological, and soil factors that affect land use decision-making. Because our strategy of handling waste is often to "dump it in a hole", this curriculum also deals with issues of waste management and environmental clean-up. The graduates in this option find employment with various governmental agencies and in the private sector.

## Plant Resources Option

This option provides a track for students seeking environmental careers that build on their interest in plant sciences. Plants are used in a variety of ways to solve environmental problems. For example, reclamation of disturbed areas often involves establishing and managing adapted vegetation. Plants are important components of wetlands, which provide a number of important environmental functions and values. Plants are also used to remove pollutants from the soil or water.

## Requirements for a Major

Students must complete all of the core requirements listed below plus the additional requirements for at least one of the three options.

<b>Math, Technology, and Natural Sciences Core</b>	
BIOL 1105,1106: Principles of Biology	6
CEE 3104: Intro to Environ. Engineering	3
CHEM 1035,1036,1045,1046: General Chem., Lab	8
CHEM 2114,2124: Analytical Chem., Lab	4
CHEM 2535,2545: Organic Chem., Lab	4
CSES 1004: Intro Crop and Soil Environ. Sciences	1
CSES/ENSC 3114,3124: Soils, Lab	4
ENSC 3604: Fund. of Environ. Science	3
CSES/ENSC 3634: Physics of Pollution	3
ENSC/CSES/CHEM 4734: Environ. Soil Chem.	3
CSES/ENSC 4854: Wetland Soils and Mitigation	3
ENSC 4004: Senior Seminar	1
GEOG 4084 or GEOG 4354 or FOR 4114 or BSE 4344: Intro GIS or Intro Remote Sensing or Info Tech Nat Res Mgt or GIS for Engineers	3
GEOS 4804: Groundwater Hydrology	3
MATH 1016,2015,2016: Elementary Calculus with Trig. I/II	9
PHYS 2205: General Physics	3
STAT 3615: Biological Statistics	3
<b>Humanities, Writing, and Social Sciences Core</b>	
AAEC 1005,1006: Econ.Food & Fiber Sys.	6
ENGL 1105,1106: Freshman English	6
Creativity and Aesthetic Experience (CLE Area 6)	1/3
Ideas, Cultural Traditions, and Values (CLE Area 2)	6
<b>Additional Requirements: Water Resources Option</b>	
BIOL 2604,2614: Gen. Microbiology, Lab	4
BIOL 4004: Freshwater Ecology	4
BIOL/CEE/CSES/ENSC 4164: Environmental Microbiology	3
CSES/CEE 4594: Soil/Groundwater Pollution	3
CSES 4644: Soils for Waste Treatment	3
FIW 4614: Fish Ecology	3
BIOL 4014: Environmental Toxicology	2
BIOL/ENT 4354: Aquatic Entomology	4
CSES/GEOG/GEOS 3304: Geomorphology	3
<b>Additional Requirements: Land Resources Option</b>	
BIOL 2604, 2614: Gen. Microbiology, Lab	4
CSES 4134: Soil Genesis & Classification	3
CSES/CEE 4594: Soil and Groundwater Pollution	3
CSES 4644: Soils for Waste Treatment	3
GEOS/CSES/GEOG 3304: Geomorph.	3
GEOS 2104: Elements of Geology	3
UAP 4374: Land Use & Environment: Planning & Policy	3
CEE 4174: Solid and Hazardous Waste Management	3
CSES 4444: Advanced Crop Management	3
CSES/CEE/ENSC/BIOL 4164: Environmental Microbiology	3

<b>Additional Requirements: Plant Resources Option</b>	
BIOL 2304: Plant Biology	3
FOR 2314: Forest Biology and Dendrology	2
BIOL 2804, 3114: Ecology, Lab	4
BIOL 3204: Plant Taxonomy	3
ENSC 3644: Plant Materials for Environmental Restoration	3
PPWS 3505, 3514: Plant Physiology & Environment, Lab	4
CSES 4214,4224: Soil Fertility, Lab	4
CSES/ENSC 4774: Reclamation of Drastically Disturbed Lands	3
FOR 2324: Dendrology	1
CSES 4444: Advanced Crop Management	3
<b>Minimum total credits (all options)</b>	<b>120</b>

## Requirements for a Minor

The Environmental Science program also offers a minor. The requirements include CSES/ENSC 3114 plus 3124 (or CSES/ENSC 3134) and CSES/ENSC 3604 and 14 to 15 more hours selected from a set of 23 courses. See [www.ensc.vt.edu](http://www.ensc.vt.edu) or visit 240 Smyth Hall for more information about a minor in environmental science.

## Satisfactory Progress

By the end of the academic year in which a student has attempted 60 hours, "satisfactory progress" will include:

1. declaring an option within ENSC
2. passing the following:

BIOL 1105, 1106  
12 hours of CHEM  
ENSC 3604  
CSES/ENSC 3114 and 3124  
9 hours of MATH and/or STAT

## Opportunities to Excel

Students with outstanding records can qualify for the Honors Program and graduate "in honors" in environmental science. Other opportunities for personal and professional growth and for recognition include the department-sponsored Environmental Student Organization, membership in Alpha Zeta and other honoraries, and several scholarships designated for majors. Faculty members often offer undergraduates opportunities to become involved in a variety of environmental research projects. Many employers seek environmental science majors for internship and co-op positions.

## Undergraduate Course Descriptions (ENSC)

### 1015-1016: FOUNDATIONS OF ENVIRONMENTAL SCIENCE

Interrelationships between human activities and the environment; emphasis on biological, chemical, and physical principles that govern the flow of energy, materials, and information among physical, ecological and human systems. (3H,3C)

### 1115-1116: FOUNDATIONS OF ENVIRONMENTAL SCIENCE LABORATORY

Lab component for ENSC 1015 and 1016. Selected experiments illustrate principles and concepts relating to environmental science. Co-requisite ENSC 1015 (for ENSC 1115) and ENSC 1016 (for ENSC 1116). Co: 1015 for 1115; 1016 for 1116. (3L,1C)

### 2964: FIELD STUDY

Variable credit course.

### 2974: INDEPENDENT STUDY

Variable credit course.

### 2984: SPECIAL STUDY

Variable credit course.

### 3114 (CSES 3114) (GEOS 3614): SOILS

Characterization of soils as a natural resource emphasizing their physical, chemical, mineralogical, and biological properties in relation to nutrient availability, fertilization, plant growth, land-use management, waste application, soil and water quality, and food production. For CSES, ENSC, and related plant- and earth-science majors. Partially duplicates 3134. Junior standing. Pre: CHEM 1036. Co: 3124. (3H,3C) I.

**3124 (CSES 3124) (GEOS 3624): SOILS LABORATORY**

Parent materials, morphology, physical, chemical, and biological properties of soils and related soil management and land use practices will be studied in field and lab. Partially duplicates 3134. Co: 3114. (3L,1C) I.

**3134 (CSES 3134): SOILS IN THE LANDSCAPE**

A study of soils as functional landscape components, emphasizing their physical, chemical, mineralogical, and biological properties in relation to plant growth, nutrient availability, land-use management, and soil and water quality. Primarily for FOR/FIW, LAR, and other plant/earth science related majors. May not be taken by CSES or ENSC majors. Partially duplicates 3114 and 3124. Pre: one year of introductory CHEM or BIOL or GEOS. (2H,3L,3C) II.

**3604: FUNDAMENTALS OF ENVIRONMENTAL SCIENCE**

Interrelationships between human activities and the environment; provides national and global perspective; emphasis is on the physical, chemical, and biological principles and processes that are essential to an understanding of human-environment interactions; the role of energy in human and natural systems; environmental legislation and human behavior. I Pre: BIOL 1105 or CHEM 1035. (3H,3C)

**3614 (CSES 3614): SOIL PHYSICAL AND HYDROLOGICAL PROPERTIES**

Soil physical and mechanical properties and the physical processes controlling soil water retention and flow in agronomic and natural settings. Grain size distribution, weight-volume relationships, specific surface, electrical charge density, consistency, stress, compaction, rainfall runoff, water retention, steady/non-steady water flow in saturated/unsaturated soil, infiltration, bare soil evaporation, and soil water balance. Pre: (CSES 3114, CSES 3124) or (GEOS 3614, GEOS 3624). (3H,3C)

**3634 (CSES 3634): PHYSICS OF POLLUTION**

Physical processes that control the fate of pollutants in our land, air, and water resources. Types and sources of pollutants, physical processes in the soil-water-atmosphere continuum controlling the dispersion and deposition of pollutants, the movement of pollutants, including radionuclides, by surface and subsurface water flow in soils, and physics of disturbed soils. I Pre: (CSES 3114, PHYS 2206, MATH 2016). (3H,3C)

**3644 (CSES 3644): PLANT MATERIALS FOR ENVIRONMENTAL RESTORATION**

Overview of ecological principles related to revegetation and restoration of disturbed sites. Function and species requirements of plants in stabilizing disturbed areas including mines, rights-of-way, constructed wetlands, and for the remediation of contaminated soils. I Pre: BIOL 1106. Co: CSES 3114. (3H,3C)

**4004: SENIOR SEMINAR**

Professional ethics within environmental science; critical consideration of topics of current interest in environmental science. Senior standing required. Restricted to ENSC majors. I (1H,1C)

**4114 (CSES 4114): SOIL PHYSICS**

Application of the principles of physics and mathematical analysis to the study of soils. Covers the physical nature and properties of soil solids, basic soil mechanics, physical state of water in soils, infiltration and movement of water in soils, mass transport in soil solutions, soil gases and soil aeration, heat and heat transfer in soils. I Pre: CSES 3114, PHYS 2205, MATH 2015. (3H,3L,4C)

**4164 (BIOL 4164) (CEE 4164) (CSES 4164): ENVIRONMENTAL MICROBIOLOGY**

Ecology, physiology, and diversity of soil and aquatic microorganisms; incorporates the significance of these topics within the context of environmental applications such as bioremediation, wastewater treatment, control of plant- pathogens in agriculture, and pollution abatement in natural systems. The laboratory portion of the course will stress methodology development, isolation and characterization of microorganisms from natural and engineered systems, and examination of the roles of microorganisms in biogeochemical cycling. Pre: BIOL 2604. (2H,3L,3C) II.

**4314 (CSES 4314): WATER QUALITY**

Provide comprehensive information on the physical, chemical, biological, and anthropogenic factors affecting water quality, fate and transport of contaminants in water, water quality assessment and management, and current water quality policies. Pre: (3604 or BIOL 4004), MATH 2015, BIOL 1105, BIOL 1106, CHEM 1035, CHEM 1036. (3H,3C)

**4324 (CSES 4324): WATER QUALITY LABORATORY**

Teach students a variety of laboratory chemical and biological techniques for water quality analysis. Complementary to ENSC/CSES 4314. Pre: CHEM 1046. Co: CSES 4314, 4314. (3L,1C)

**4444 (CSES 4444): MANAGED ECOSYSTEMS, ECOSYSTEM SERVICES, AND SUSTAINABILITY**

Description and interactions of climate, soils, and organisms within intensively managed ecosystems used to produce food, fiber, bioenergy, fresh water, recreation, cultural, and other ecosystems services essential for human well-being. Ecological concepts applied to agricultural, grassland, and urban/turf ecosystems. Ecologically-based principles for sustainably managed ecosystems. Regional and global significance of managed ecosystems in context of sustainable food systems, and the Millennium Ecosystem Assessment. Pre-Requisite: Junior or Senior Standing required. Pre: CSES 3114 or CSES 3134. (3H,3C)

**4734 (CHEM 4734) (CSES 4734): ENVIRONMENTAL SOIL CHEMISTRY**

Chemistry of inorganic and organic soil components with emphasis on environmental significance of soil solution-solid phase equilibria, sorption phenomena, ion exchange processes, reaction kinetics, redox reactions, and acidity and salinity processes. Pre: CSES 3114, CSES 3124, CHEM 2514 or CHEM 2535, CHEM 3114, MATH 2015. (3H,3C) I.

**4754 (CHEM 4754) (CSES 4754): INSTRUMENTAL ANALYSIS FOR AGRICULTURAL AND ENVIRONMENTAL SCIENCES**

Theory and principles of common analytical instruments and their applications to agriculture and environmental science research. Topics include atomic absorption and emission spectroscopy, spectrophotometric methods (UV, visible, luminescence, and automation), chromatography, ion-selective electrodes, and microwave digestion. Infrared spectroscopy, atomic ratio and molecular mass spectroscopy, nuclear magnetic resonance will also be included. Provides hands-on experience with modern analytical instruments. Prerequisites or graduate standing required. Pre: (CHEM 3114, CHEM 3124) or (CSES 3114, CSES 3124). (3H,3L,4C) II.

**4774 (CSES 4774): RECLAMATION OF DRASTICALLY DISTURBED LANDS**

Remediation, rehabilitation, revegetation strategies for lands disturbed by mining, construction, industrialization, and mineral waste disposal. Disturbed site characterization and materials analysis procedures. Regulatory and environmental monitoring frameworks for mining sites and other disturbed lands. Prediction and remediation of water quality impacts from acid drainage. Pre: CSES 3114 or ENSC 3114 or GEOS 3614 or CSES 3134 or ENSC 3134 or CSES 3304 or GE OG 3304 or GEOS 3304. (3H,3C)

**4854 (CSES 4854): WETLAND SOILS AND MITIGATION**

Wetland soils as components of natural landscapes: biogeochemistry, hydrology, geomorphology, hydric soil indicators, and classification. Soil and hydrolic factors important to wetland delineation and jurisdictional determination. Mitigation of wetland impacts with emphasis on restoration and creation. Constructed wetlands for water treatment. Odd years. I Pre: 3114 or 3134 or CSES 3304. (3H,3C)

**4964: FIELD STUDY**

Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

## Overview

Food science benefits consumers every day with healthier diets, better tasting affordable foods, and increased food safety. In the Department of Food Science and Technology, you really do get to play with your food! Food Science is an exciting area that applies a blend of basic sciences such as biology, chemistry and physics with microbiology, biochemistry, mathematics and engineering to improve the taste, nutrition and value of the world's food supply. The Food Science and Technology curriculum includes hands-on experiences that supports classroom instruction with practical applications and creative opportunities for product development.

Demand for Food Science and Technology graduates has never been greater. Practically 100% of Virginia Tech's Food Science and Technology graduates have jobs in product development, research, sales and marketing, quality assurance, production management, analytical and technical services and regulatory affairs at graduation. Food processing is the largest industry in the United States. This industry employs nearly 2 million people and accounts for more than 16 percent of the country's gross national product. In a recent survey of U.S. Food Science programs, Virginia Tech ranked 6th nationally in placing Food Science B.S. graduates into graduate or professional schools.

The Virginia Tech Department of Food Science and Technology is the only food science department in Virginia. The program is recognized by the national Institute of Food Technologists (IFT) as having curricula and options that meet the "IFT Undergraduate Education Standards for Degrees in Food Science." Students enrolled in these programs are eligible to apply for IFT Scholarships. The Virginia Tech Food Science Club is a student chapter of the national IFT organization and one of several departmental clubs (New Product Development and College Bowl teams) that permits students to meet professionals in the food industry, develop leadership skills and enhance their educational experience. Students have excellent opportunities for internships as an additional way to explore different facets of the food industry.

Our building is home to a 5,000 square-foot processing area, a pilot-scale dairy processing area, a fully-equipped research winery, a cutting-edge high-pressure processing area as well as laboratories modernly equipped for chemical, physical and microbiological analysis. Due to the department's success and growth we will be expanding in 2014 to the new Human and Agricultural Biosciences Building (HABB1) facility to be shared with Biological Systems Engineering. The new facility, located across the street from our present building, will provide the department with additional laboratories, pilot plant, taste panel and kitchen facilities, conference rooms, graduate student research spaces and faculty and staff offices. Our faculty and staff received over \$3 million in sponsored research funding last year.

In the Department of Food Science and Technology you may receive a Bachelor of Science in one of three options.

The Department also offers a minor, as well as a double-major option in Food Science and Technology to students in all other colleges of the university. Students completing the science option requirements will also be prepared for graduate schools and professional schools of pharmacy medicine, dentistry and veterinary medicine. Food Science and Technology students have the opportunity to participate in

stimulating undergraduate research projects and internships.

## Satisfactory Progress

After having attempted 72 semester credits (including transfer, advanced placement, advanced standing and credit by examination and freshman rule hours), "satisfactory progress" will include:

- having passed at least 24 semester credits of Curriculum for Liberal Education requirements
- having passed 9 semester credits in the selected option

## Undergraduate Course Descriptions (FST)

### 2014: INTRODUCTION TO FOOD SCIENCE

Fundamentals for food science and technology. Integration of basic principles of food safety, human nutrition, food spoilage, and sensory evaluation with the appropriate technology of food preservation and processing. (2H,2C)

### 2104: DAIRY PRODUCTS SENSORY EVALUATION

Study of sensory attributes of milk and dairy products important in evaluation and judging product quality. Consideration of production and processing methods affecting milk and dairy product quality as determined by organoleptic evaluation. Training in different sensory techniques for use in dairy products manufacturing and quality control. Consent required. I (3L,1C)

### 2544 (HNFE 2544): FUNCTIONAL FOODS FOR HEALTH

Introduction to functional foods (foods with additional value beyond basic nutrition) including development of functional foods, novel sources, and traditional foods with value-added health benefit; regulatory issues; and media messages. (3H,3C)

### 2974: INDEPENDENT STUDY

Variable credit course.

### 2984: SPECIAL STUDY

Variable credit course.

### 3114 (HORT 3114): WINES AND VINES

Principles and standard practices of wine grape production, processing, and sensory evaluation for students with a professional interest in premium table wines. Junior standing and consent required. (2H,2L,3C)

### 3124: BREWING SCIENCE AND TECHNOLOGY

Study of chemical reactions important in brewing of beer and hard cider. Effects of variations in malting, mashing, and other processing steps on characteristics and quality of beer; fruit sugar, acid and fermentation impacts on cider composition and quality. Investigation of reactions that cause flavor deterioration. (3H,3C)

### 3214 (APSC 3214): MEAT SCIENCE

Fundamentals of meat science in meat inspection, carcass evaluation, fabrication, fresh meat, processed meat and product preservation on beef,

pork, lamb, poultry, and seafood. Physical, chemical, physiological and microbiological properties of meat as related to composition and quality. Fundamentals in processing techniques, product quality assurance and food safety programs in meat industries. Pre: ALS 2304, BIOL 2604, CHEM 1015. (2H,4L,4C)

#### 4014: FOOD PROD DEVELOPMENT

Application to the food industry of principles and standard practices of research and product development; functionality of food ingredients; students will work in teams to design and develop a new food product. I Pre: 4604. Co: 4504, 4405. (3H,3C)

#### 4024: PRINCIPLES OF SENSORY EVAL

Principles of sensory evaluation including theory, sensory physiology and psychology, experimental methods, applications, and statistical analysis. (3H,3C)

#### 4405,4406: FOOD PROCESSING

Basic principles, unit operations, and equipment involved in the commercially important food processing methods and unit operations; materials and containers used in food packaging; food laws, regulations, and standards. Pre: BIOL 2604 for 4405; 3304 for 4406. 4405: (3H,3L,4C) 4406: (1H,3L,2C)

#### 4504: FOOD CHEMISTRY

Consideration of the chemical constituents of foods with emphasis on their role in determining the nutritive value, functional properties, storage characteristics and acceptability of fresh and processed foods. Pre: CHEM 2536, BCHM 2024. (3H,3C)

#### 4514: FOOD ANALYSIS

Sampling techniques and theory and practice of chemical and physical methods of food analysis for determination of food composition; application of analytical methods to quality control and food law regulation problems. Pre: 4504. (2H,3L,3C)

#### 4524: FOOD QUALITY ASSURANCE

Functions of quality control departments in monitoring safety and quality of food as well as compliance with government regulations. Description of federal regulatory agencies. Development of specifications, food standards and critical control points. Selection of analytical methods. Acceptance sampling and control charts. Microbiological quality control. Pre: 4405, 4604, STAT 3616. (3H,3C)

#### 4534: FOOD CHEMISTRY LAB

Investigation of functional properties of proteins, carbohydrates, and lipids in processed foods including effect of environmental conditions; solubility, foaming ability and textural properties of proteins, carbohydrate crystallization, ability of polysaccharides to form gels and pastes, lipid absorption and tenderization, characterization of a natural-occurring enzyme. Co: 4504. (3L,1C)

#### 4604 (BIOL 4604): FOOD MICROBIOLOGY

Role of microorganisms in foodborne illness and food quality, spoilage, and preservation. Control and destruction of microorganisms in foods. Pre: BIOL 2604, BIOL 2614. (3H,3L,4C)

#### 4634: EPIDEMIOLOGY FOODBORNE DISEASE

Overview of causes, transmission, and epidemiology of major environmental, food, and water borne diseases. Outbreak and sporadic detection, source tracking and control of pathogens. Overview of the impact of foodborne outbreaks on regulatory activities at the national and international level. Co-requisite: Enrollment in either FST 4604 or BIOL 4674 Co: BIOL 4674, 4604. (3H,3C)

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

## Overview

Horticulture is a broad and diverse field involved with producing and utilizing a multitude of specialized plants. Benefits of this industry to all people are both physical and emotional. Horticulturists provide the fruits and vegetables so important to good nutrition. Horticulturists also improve the human environment, through both beautification and conservation, by providing the ornamental plants and designs utilized to enhance aesthetics within and around the home, workplace, and other areas. Thus, while the field is based on a biological and agricultural science foundation, across the range from organic to molecular biology, there is ample opportunity for individuals also oriented toward business, social science, art, education, and international development.

The horticulture curriculum is fully individualized in consultation with a course advisor. Following the freshman year of core courses, students begin their personal programs of study in one of four options.

## Landscape Contracting Option

This program encompasses all components of the landscape services industry, including both exterior and interior landscapes. Additional study in ornamental plants, turf, and business supplement development of a single or combined concentration in landscape design, installation, and/or maintenance. Students in this option enter careers as entrepreneurs or employees of turf and landscape businesses in these specialties, as well as garden center operations, arboreta and private gardens management, and as town or city horticulturists.

## Horticulture Crops Option

This program focuses on managing the production and quality maintenance during marketing of the high value, intensively grown horticultural crops. Study of the specializations in growing fruit, vegetable, nursery, and floral crops is supplemented with business and other supporting courses for the student's emphasis area. Careers include commodity production and marketing, consulting and sales in horticultural supply firms, quality assurance, integrated pest management, and international development.

## Horticulture Science Option

This program supplements the departmental core with additional science study, individualized horticultural and supporting course development, and a directed research experience. Students in this option are prepared for graduate study in horticulture and the related plant sciences or to enter the rapidly expanding technical fields in plant and crop improvement, including biotechnology.

## Horticulture Education Option

This program develops a broad horticultural foundation with supplemental requirements for a wide array of careers in teaching horticulture. These may include teaching in the secondary schools (with agriculture or biology endorsement), extension (agricultural or youth programs), community colleges, and arboreta and botanical gardens. Continuation for a graduate degree may be desirable or required for some of these education careers.

## Degree Requirements

<b><i>Liberal Education (All Options)</i></b>	<b>credits</b>
Area 1 - English	6
Area 2 - elected	6
Area 3 - Agricultural Economics/Economics	6
Area 4 - Biology/Chemistry	8
Additional Biology/Chemistry	6
Area 5 - Mathematics	6
Area 6 - elected	1
Area 7 - elected	3
Crop and Soil Environmental Science	4
Entomology	3
Horticulture Core	9
Plant Pathology, Physiology & Weed Science	7
Oral Communications	3
<b><i>Option-Specific Additions to Core</i></b>	
Agricultural Economics, other business	0-12
Biology	0-11
Chemistry	10
Crop and Soil Environmental Sciences	0-4
Horticulture	12-16
Plant Pathology, Physiology & Weed Science	3-4
Supporting Electives	11-31
Free Electives	6-12
<b>Total Credits</b>	<b>120</b>

Selection of the option may be delayed to the start of the junior year. Undecided (general horticulture) students may benefit in their course scheduling by a preliminary option selection supplemented with their alternative interest areas, e.g. landscape courses as electives to the Crops Option.

Students are required to gain work experience during their academic careers. This may be developed independently or coordinated through the department in the Cooperative Education Program or various internship programs with which the department maintains direct contact (current listings available under Internships at <http://www.hort.vt.edu/>). Other experience and enrichment programs available include the Honors Program for students with outstanding academic records, the Horticulture Club for all interested students and the honorary society Pi Alpha Xi, special industry field trips, and the opportunity to develop dual major and minor programs. A horticulture minor program is also available for students in other curricula.

The department offers programs leading to the M.S. and Ph.D. Areas of specialization include plant breeding and genetics, growth and development, physiology, molecular biology, intensification of production through modern cultural practices and innovative approaches, and urban horticulture.

## Satisfactory Progress

By the end of the academic year in which the student has attempted 72 hours (including transfer, advanced placement, advanced standing and credit by exam), "satisfactory progress" toward the degree will include the following minimum criteria:

- having a grade point average of 2.0

- o passing at least 24 semester credits that apply to the Curriculum for Liberal Education
- o passing the following:

BIOL 1105 and 1106

CHEM 1035 and 1036

HORT 2224, 2234 or 2244

6 credits additional HORT courses

6 credits from CSES 3114, ENT 4254 or 4524, PPWS 3104, 3505 or 3506

## Undergraduate Course Descriptions (HORT)

### 2134 (FOR 2134): PLANTS AND GREENSPACES IN URBAN COMMUNITIES

Modern concepts of sustainability changing plant use in urban settings. Fundamentals of urban horticulture and urban ecosystems. Philosophy of sustainability, urban forestry, urban wildlife, sustainable and community-supported agriculture, and innovations merging plant and ecosystem functions with building and site engineering. Multi-disciplinary emphasis in individual, community, regional, and global scales. (3H,3C)

### 2144: INDOOR PLANTS

Basic horticultural principles, identification and cultural criteria applicable to foliage and flowering plants grown indoors. Specific plant groups discussed include ferns, cacti and succulents, and carnivorous plants, among many others. Non-majors only. (3H,3C) I,II,III.

### 2154 (SPAN 2154): SPANISH FOR THE GREEN INDUSTRY

Dialogue-based language course focusing on the vocabulary and grammatical structures pertaining to Green and Agricultural Industry jobs. Includes vocabulary and context specific to jobs and workers in greenhouse, nursery, turf and landscape environments. Spanish culture is included throughout the course along with grammar and structure. Prior study in Spanish is helpful but not required. I, II. (3H,3C)

### 2164: FLORAL DESIGN

Principles and methods in floral art through designs for home and public environments. (2H,3L,3C) I,II.

### 2184: GLOBALIZATION AND HORTICULTURE

Globalization, the interaction and integration of people, companies, and governments, is driven by international trade and investments. This course provides students with the knowledge of horticultural crops (fruits, vegetables, ornamental plants) as a significant component of global trade. (3H,3C) II.

### 2224: HORTICULTURE SCIENCE AND INDUSTRY

Survey course of horticultural crops (fruits, vegetables, ornamentals) and enterprises. Includes plant science and business aspects of horticultural production and service industries, and introduces related issues and emerging technologies such as work force characteristics, organic production, and biotechnology. I. (2H,2C)

### 2234: ENVIRONMENTAL FACTORS IN HORTICULTURE

Principles and practices in managing environmental factors—temperature, water, light, atmospheric gases and pollutants, and soil and minerals—that influence growth and production of horticultural plants. (3H,3C) II.

### 2244: PLANT PROPAGATION ]

Principles and practices of plant propagation by sexual and asexual methods. (2H,2L,3C) II.

### 2254: FOODSHEDS AND SUSTAINABILITY

Study of foodsheds, civic agriculture and components of sustainable agriculture systems principles, exploring the evolution of agriculture from traditional farming practices to the emergence of a new agrarianism in the early 21st century. (3H,3C)

### 2304 (BIOL 2304): PLANT BIOLOGY

Introductory botany. Form, growth, function, reproduction, and ecological adaptations of major groups of plants. Pre: BIOL 1105, BIOL 1106. (3H,3C) I,II.

### 2964: FIELD STUDY

Variable credit course.

### 2974: INDEPENDENT STUDY

Variable credit course.

### 2984: SPECIAL STUDY

Variable credit course.

### 3114 (FST 3114): WINES AND VINES

Principles and standard practices of wine grape production, processing, and sensory evaluation for students with a professional interest in premium table wines. Junior standing and instructor consent required. (2H,2L,3C) II.

### 3325-3326: WOODY LANDSCAPE PLANTS

Functions, growing requirements, hardiness, problems, and methods of identification of landscape plant materials. 3325: Commonly available woody landscape plants. 3326: Native and rare woody landscape plants. Junior standing required. (2H,3L,3C) I

### 3345,3346: HERBACEOUS LANDSCAPE PLANTS

Identification, growing requirements, culture, landscape use, flowering and dormancy physiology, and unique propagation of native and exotic herbaceous plants for temperate environments. 3345: Summer and fall-flowering ornamental annuals and perennials; cultivated wildflower, wetland, and aquatic systems. 3346: Winter and spring-flowering species and related herbaceous foliage plants. Junior standing required. Pre: 2244. (1H,3L,2C)

### 3345: I:3345. II:3346; 3346:3354 (FOR 3354): URBAN FORESTRY

A study of the function, culture, and management of trees in an urban environment, with emphasis on tree value and the implementation of biological and ecological concepts to minimize maintenance and maximize utility in urban areas. Pre: (3326). (2H,3L,3C) I

### 3444 (CSES 3444): WORLD CROPS AND SYSTEMS

An introduction to world crops, their primary regions of production, the factors that determine where they are grown, and their economic importance, and how they are used in the human diet. Describes the various factors that can be managed to improve crop yields. Examines present and potential systems of farming for improved crop production in the major climatic and soil ecosystems of the world. Junior standing required. (3H,3C)

### 3524 (LAR 3524): HISTORY OF LANDSCAPE ARCHITECTURE

A study of the design-form and structure of landscape architectural works from the Bronze Age to the present, including the influence of physical, climatological, and social context, and of the individual designers. Junior standing required. I (3H,3C)

### 3544: LANDSCAPE CONSTRUCTION

Survey of landscape construction materials and methods. Concentration on small scale and residential applications, innovative uses, and cost estimates. (1H,3L,2C) I,II.

### 3574: LANDSCAPE IRRIGATION

Principles and practices in landscape irrigation system design and operation. Junior standing required. (1H,3L,2C)

### 3584: LANDSCAPE CONTRACTING PRACTICUM

The development of practical skills in landscape contracting. The course will rotate between design and installation of water gardens, landscape irrigation systems, landscape lighting or other pertinent topics on consecutive years. The course can be repeated for exposure to specific subjects to maximum of 3 credits. Junior standing required. Pass/Fail only. Pre: 2224, 2234. (3L,1C)

### 3644: LANDSCAPE ESTABLISHMENT AND MANAGEMENT

Principles and practices of the establishment and management of sustainable landscapes including site assessment, soil rehabilitation, plant establishment, pruning, irrigation, and maintenance. Emphasis is on hands-on approaches to achieving sustainable landscapes that protect and enhance the environment. Pre: 2234 or 3325 or 2134 or FOR 2324. (2H,3L,3C)

### 3664: HARDSCAPE MATERIALS & INSTAL

Non-plant portions of landscape construction such as rock walls, paver floors, arbors, and water gardens. The course covers the materials, construction methods, and business aspects required for hardscape construction. Pre: 2224. (6L,2C)

### 4004: HORTICULTURE SEMINAR

Assessment of fundamental horticultural skills developed through academics and employment. Includes career placement preparation and problem solving through research and production project design and implementation using a team approach. Junior standing required. (1H,1C)

### 4205,4206: PUBLIC GARDENS MAINTENANCE AND MANAGEMENT

4205: Principles and practices of winter annuals and spring blooming bulb production and installation; water garden cultivation and systems maintenance; fall fertilization programming; vegetative waste management; information dissemination and communication methods for public outreach including education, interpretive programs, and fundraising. 4206: Principles and practices of pruning, summer annual production; soil amendment and protection; plant collections/accessions curation and database management; personnel and financial management issues unique to public gardens. Pre: Junior standing required. Pre: (3325, 3326, 3345), (3346 or 3644). (3L,1C)

### 4324: GREENHOUSE MANAGEMENT

For persons who intend to manage or advise those managing greenhouses. Includes greenhouse construction, environmental controls, disease/insect identification and management, control of plant growth, root-zone management, and marketing and management principles specific to greenhouse operations. Pre: Coursework or experience in plant growth and environmental management required. (3H,3C)

### 4504: LANDSCAPE CONTRACTING

Capstone course for students entering the landscape contracting industry. Includes contracts, site plan interpretation, cost estimation and bidding, project sequencing, business marketing, irrigation design, and current issues. Emphasis on real-world skills and problem solving. Pre-requisite: Senior Standing required. Pre: 3264, 4004. (1H,3L,2C)

### 4545-4546: SMALL SCALE AND RESIDENTIAL LANDSCAPE DESIGN

Development of graphic skills with concentration on a variety of media and techniques. Basic theory and principles on design of small scale and residential landscapes with emphasis on spatial composition, user needs, ecology, and uses of plant materials and light construction. 4545, I; 4546, II. Pre: 3325, 3544 for 4545; 3325, 3544, 4545, 4545 for 4546. (2H,6L,4C)

### 4614: ORNAMENTAL PLANT PROD & MARKET

Production and marketing of woody and herbaceous plants in wholesale nursery and floriculture/greenhouse and related retail outlets. Includes production laboratory. Pre: 2234, 2244, 4324, AAEC 2434. (3H,3L,4C)

### 4644: SMALL FRUIT PRODUCTION

Propagation, production, and marketing of small fruit crops for the mid-Atlantic region. Emphasis on sustainable practices, market sectors, and

health and nutritional benefits. Blueberries, strawberries, brambles and other crops. Pre: 2234, 2244, AAEC 2434. (3H,3C)

#### 4654: VITICULTURE

Overview of grapevine growth and development, factors affecting yield and grape quality, and regional industry. Vineyard financial considerations, site evaluation, varietal characteristics plus cultural practices of pruning, training, canopy management, fertilization and pest management. Pre: 2234, 2244. (3H,3C)

#### 4764: VEGETABLE CROPS

A comprehensive study of major and minor vegetable crops of Virginia, the U.S., and world in relation to production practices, crop development, nutritional value, and quality characteristics. I Pre: 2234. (3H,3C)

#### 4774: VEGETABLE CROPS LABORATORY

Laboratory and field study of principles and practices related to the production of vegetables. Cultural practices, production equipment, seed and varietal characteristics, and quality evaluation will be emphasized. I Co: 4764. (3L,1C)

#### 4784: VEGETABLE SEED PRODUCTION

The study of production agriculture or reproductive biology. Seed production, handling, identification, conditioning, enhancement, packaging, storage, testing, federal standards, and biotechnology. Pre: 4764 or 2244 or equivalent experience in vegetable crops, plant propagation, or plant growth and development. Pre: 4764 or 2244. (2H,2C)

#### 4794: MEDICINAL PLANTS AND HERBS

Comprehensive study of medicinal plants/herbs history, production, processing, lore and documented scientific benefits. Traditional plant medicinal practices of Native Americans, Chinese, Indians, European and African cultures will be contrasted with use of contemporary herbal products. Pre: BIOL 1005 or BIOL 1105. (3H,3C)

#### 4835-4836: ORGANIC VEGETABLE PRODUCTION

Detailed practices in organic vegetable production. Issues in starting organic production, profitability, organic transition strategies and organic certification. Pre: 2254, ALS 3404 for 4835; 4835 for 4836. (2H,2C)

#### 4845-4846: ORGANIC VEGETABLE PROD LAB

Field experiences, demonstrations, and farm tours complementing 4835 and 4836 lectures. Co: 4835 for 4845; 4836 for 4846. (3L,1C)

#### 4964: FIELD STUDY

Variable credit course.

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

## Overview

Nutrition, foods, and exercise science is a unique field of study that builds on the biological and physical sciences. Human nutrition is directed toward helping people choose food that meets their physiological needs and is consistent with their lifestyles and cultural preferences. Changes in lifestyle and food consumption patterns have created consumer demand for new food products that are shelf stable, require little or no preparation, and are appropriate in nutrition content. These trends have increased the need for food professionals who wish to apply their science background to exploring the nutrient content and chemical and physical properties of foods and food ingredients. Increasing interest in physical fitness and wellness has brought about new professional opportunities in assisting people who want to develop appropriate exercise patterns and make healthy changes in their lifestyle.

Many contemporary health issues including obesity, heart disease, and cancer have been associated with a person's food intake and level of exercise. This has led to increasing emphasis on health promotion and disease intervention, and the nutrition or exercise professional has become a member of the health care team. Expanding research by both private and government agencies focusing on the role of nutrition and physical activity in health, growth, and aging has created a demand for graduates at the B.S., M.S., and Ph.D. levels who have a background and interest in laboratory and experimental methods in nutrition, foods and exercise science. The current interest in physical performance in our society has broadened the opportunities for combining expertise in nutrition with exercise and fitness for those with skills in counseling and entrepreneurship. Individuals with a background in food and nutrition are needed to help solve the problems of world hunger and food shortages, and the accompanying loss of human potential.

There are three options from which an undergraduate student majoring in human nutrition, foods and exercise may choose: Dietetics; Science of Food, Nutrition and Exercise; or Exercise and Health Promotion.

The department participates in the University's Cooperative Education Program and Honors Program (see "Academics" in this catalog). The department offers graduate programs leading to the M.S. and Ph.D. with options in Nutrition, Foods, Community and International Nutrition, Clinical Exercise Physiology, Nutrition in Sports and Chronic Disease; and Muscle Function and Biochemistry.

### Program Requirements

(C)

#### Curriculum for Liberal Education

(36)

Area 1: ENGL 1105-1106: Freshman English or COMM 1015, 1016 Communication Skills 3, 3

Area 2: From university-approved list of courses 3, 3

Area 3: PSYC 2004: Introductory Psychology and a PSYC course from university-approved list 3, 3

Area 4: CHEM 1035-1036: General Chemistry 3, 3

CHEM 1045-1046: General Chemistry Lab 1, 1

Area 5: MATH 1015-1016: Elem. Calculus with Trig.I 3, 3

Area 6: Any university-approved Liberal Education course in this area 1

Area 7: Any university-approved Liberal Education course in this area	3
<i>The Department Core</i>	(42)
HNFE 1004: Foods and Nutrition	3
HNFE 1114: Orientation to HNFE	1
HNFE 2014: Nutrition Across the Life Span	3
BIOL 1105, 1115: Principles of Biology and Lab	3, 1
BIOL 1106, 1116: Principles of Biology and Lab	3, 1
BMSP 2135, 2136: Human Anatomy and Physiology	3, 3
CHEM 2514: Survey of Organic Chemistry or CHEM 2535: Organic Chemistry <sup>1</sup>	3
BCHM 2024: Concepts of Biochemistry	3
COMM 2004: Public Speaking	3
STAT 2004 Introductory Statistics <sup>2</sup>	3
HNFE 3025-3026: Metabolic Nutrition	3, 3
HNFE 4004: Seminar in HNFE	3

<sup>1</sup> Science of Food, Nutrition and Exercise students must take CHEM 2535.

<sup>2</sup> Science of Food, Nutrition and Exercise students may take STAT 3615 Biological Statistics instead of STAT 2004 Introductory Statistics.

Additional courses required for each of the options in human nutrition and foods are listed in the appropriate sections below.

## Dietetics

*Consult:* Heather K. Cox

The undergraduate Dietetics option, known as the Didactic Program in Dietetics (DPD), leads to a Bachelor of Science degree in Human Nutrition, Foods and Exercise. It fulfills all academic course requirements according to the Standards of Education per the Commission on Accreditation for Dietetics Education of The American Dietetic Association (120 South Riverside Plaza, Suite 2000, Chicago, Illinois 60606-6995, 312/899-0040). Students completing this degree program are eligible to apply for acceptance into Dietetic Internship programs at Virginia Tech and elsewhere. Following completion of the BS in Dietetics, a student must then complete a supervised practice, dietetic internship; successful completion of any accredited dietetic internship qualifies one to sit for the registration examination to become a registered dietitian (RD) and/or licensed.

Registered Dietitians work in a variety of work settings. The dietetics program prepares you to assume a professional role in health care, research, the business environment or to pursue graduate studies. The dietetics program ultimately prepares you to assume a professional role in a health care, research, or business setting or to go on to graduate school. Clinical dietitians in hospitals and out-patient clinics provide care to individuals with disease-related nutritional problems. Community dietitians may work in health clubs specializing in sports nutrition, in work site wellness programs, or in community programs serving mothers and children, low-income families, or elderly people. Others work for food companies dealing with consumer questions about the nutrient content of food products, or with companies manufacturing nutritional supplements or other medical or health products. Administrative Dietitians with management or business interests find positions in food service management in health care facilities, work site, college, or university food service, or hotels and resorts. Registered Dietitians counsel people of all ages, cultural and ethnic backgrounds, and levels of education.

The dietetics option fulfills all academic course requirements for a Didactic Program in Dietetics per the Commission on Accreditation for Dietetics Education (CADE). Following completion of the B.S. degree, a student must complete a supervised practice to be eligible for the Registration Examination (RD) for Dietitians. The supervised practice requirement can be met through any CADE accredited dietetic internship. Graduates with the B.S. in Dietetics are eligible to apply for the department's or other accredited Dietetic Internships.

Students in the Dietetics option must maintain an overall GPA of 3.0 to remain in this option. Students who want to change their major into the Dietetics option with HNFE must have an overall GPA of 3.0 also.

PSYC 2084: Social Psychology <sup>1</sup>	3
HNFE 2004: Professional Dietetics	1
HNFE 2234: Food Selection and Preparation	2
HNFE 2224: Food Selection and Preparation Lab	1
BIOL 2604: General Microbiology	3
BIOL 2614: General Microbiology Lab	1
HNFE 3034: Methods of Human Nutritional Assessment	2

HNFE 3114: Foodservice & Meal Management	4
HNFE 3224: Communicating w/ Food	3
HNFE 3234: Science of Food	4
MGT 3304: Management Theory and Leadership Practice	3
AAEC 4814: Health and Food Economics	3
HNFE 4644: Health Counseling	3
HNFE 4125-4126 Medical Nutrition Therapy	3, 3
HNFE 4624: Community Nutrition	3
Free Electives to meet graduation requirements	3
<sup>1</sup> May be taken as part of the Curriculum for Liberal Education area 2.

## Science of Food, Nutrition, and Exercise

*Consult:* Nicolin Girmes-Grieco

This option provides an opportunity for the student who enjoys science and is interested in research to apply this interest to the study of the processes related to the foods we eat and the life functions of the human body. The chief difference between this course of study and others in the department is the greater depth of study in the biological and physical sciences.

Upon completion of this option a student is well prepared for graduate work in any area of nutrition, food science, exercise physiology, or related sciences. This option also meets entrance requirements for most medical, dental, physical therapy, and pharmacy schools. Among the employment opportunities for the graduate with a B.S. degree are entry level positions in research and development with a company manufacturing nutritional, health and exercise, or medical products, in the food industry in food product testing or quality control, or in a position related to clinical exercise physiology. With the growing attention to the role of nutrition and exercise in health promotion and disease prevention, this option is especially appropriate for the student preparing for a career in medicine, physical therapy, or a related health field.

Students in the SFNE option do not meet the CADE requirements for a degree in dietetics and, therefore, cannot be issued a Verification Statement saying that they have met all the CADE requirements unless they have a double option with Dietetics.

PHYS 2205-2206: General Physics	3, 3
PHYS 2215-2216: General Physics Laboratory	1, 1
CHEM 2536: Organic Chemistry	3
CHEM 2545-2546: Organic Chemistry Laboratory	1, 1
HNFE 3034: Methods in Human Nutritional Assessment	2
BMSP 2145, 2146: Human Anatomy and Physiology Lab	1,1
BIOL 2604: General Microbiology or BIOL 2104: Cell and Molecular Biology	3
<i>Individual learning experiences chosen from:</i>	
HNFE 4254, 4964, 4974, 4994 and FST 4514	2
<i>Controlled Electives (select 15 hours from this group of courses):</i>	
BIOL 2614: General Microbiology Laboratory	1
BIOL 2004: Genetics	3
BIOL 3124 Cell Physiology	3
BIOL 4604 Food Microbiology	4
BCHM 3114 Biochemistry for Biotechnology and the Life Sciences	3
HNFE 2234: Food Selection and Preparation	2
HNFE 2224: Food Selection and Preparation Laboratory	1
HNFE 2824: Prevention and Care of Athletic Injuries	2
HNFE 3234: Science of Food	4
HNFE 3824: Kinesiology	3

HNFE 3864: Concepts of Preventive & Therapeutic Exercise	2
HNFE 3804: Exercise Physiology	3

STAT 3616 Biological Statistics	3
BMVS 4074: Pharmacology	3
Free Electives to meet graduation requirements	6

## Exercise and Health Promotion

*Consult:* Janet W. Rankin

This option is designed for the student who is interested in learning how to help people develop a healthy lifestyle through exercise and health promotion. Students will learn how to integrate and apply the principles associated with exercise, nutrition, and health promotion in the prevention and therapeutic treatment of problems related to health. The basic foundation for this option is the set of knowledge, skills, and abilities specified by the American College of Sports Medicine for certification as a Certified Health Fitness Specialist.

This major prepares you for an entry level position in the area of wellness - ranging from commercial weight loss programs to wellness programs at the corporate level. Graduates are qualified to take positions in private health clubs, physical fitness centers, corporate and institutional wellness programs, physical therapy clinics, and cardiac rehabilitation programs. Many alumni decide after gaining some work experience to continue your studies at the graduate level in clinical exercise physiology or health education.

Students in the EHP option do not meet the CADE requirements for a degree in dietetics and, therefore, cannot be issued a Verification Statement saying that they have met all the CADE requirements unless they have a double option with Dietetics.

HNFE 2824 Prevention and Care of Athletic Injuries	2
PHYS 2205: General Physics I	3
HNFE 3824: Kinesiology	3
HNFE 3864: Concepts of Preventive & Therapeutic Exercise	2
HNFE 3874: Clinical Exercise Physiology	2
HNFE 3634: Epidemiologic Concepts of Health and Disease	3
HNFE 4644: Health Counseling	3
HNFE 3804: Exercise Physiology	3

[TOP](#)

## Satisfactory Progress Towards the Degree

An HNFE student will be considered to have made satisfactory progress toward the degree when he/she has successfully completed:

30 hours with

- CHEM 1035, 1036 with grades of C or higher
- HNFE 1004 with a grade of C or higher
- An overall GPA 2.5
- And an in-major GPA 2.5

At this point the student should declare an option within HNFE. A plan of study should be submitted along with your option declaration.

- Dietetics
- Exercise & Health Promotion
- Science of Food, Nutrition & Exercise

If a student wishes to double major (or double option) he/she will need to have a GPA at or above 3.0

### **Dietetics:**

An HNFE-DIET option student will be considered to have made satisfactory progress toward the degree when he/she has successfully completed:

45 hours

- CHEM 2514 (Survey of Organic Chemistry) or CHEM 2535 (Organic Chemistry) with a grade of C or higher
- HNFE 1004 (Foods & Nutrition) with a grade of C or higher
- An overall GPA > 3.0
- And an in-major GPA > 2.5

60 hours

- BCHM 2024, Concepts of Biochemistry
- HNFE 2014, Nutrition Across the Lifespan
- HNFE 2004, Professional Dietetics
- HNFE 2234, Food Selection & Preparation and HNFE 2224, Food Selection & Preparation Lab
- BMSP 2135, 2136 Anatomy & Physiology
- An overall GPA > 3.0
- And an in-major GPA > 2.5

90 hours

- HNFE 3025, 3026 Metabolic Nutrition
- An overall GPA > 3.0
- And an in-major GPA > 2.5

### **Exercise & Health Promotion:**

An HNFE-EHP option student will be considered to have made satisfactory progress toward the degree when he/she has successfully completed:

45 hours

- HNFE 1004 (Foods & Nutrition) with a grade of C or higher
- An overall GPA > 2.5
- And an in-major GPA > 2.5

60 hours

- CHEM 2514 (Survey of Organic Chemistry) or CHEM 2535 (Organic Chemistry) with a grade of C or higher
- An overall GPA > 2.5
- And an in-major GPA > 2.5

90 hours

- BMSP 2135, 2136 Anatomy & Physiology
- HNFE 2014, Nutrition Across the Lifespan
- BCHM 2024, Concepts of Biochemistry
- HNFE 3864, Concepts of Preventative & Therapeutic Exercise
- HNFE 3874, Clinical Exercise Physiology
- An overall GPA > 2.5
- And an in-major GPA > 2.5

## Science of Food, Nutrition & Exercise:

An HNFE-SFNE option student will be considered to have made satisfactory progress toward the degree when he/she has successfully completed:

45 hours

- HNFE 1004 (Foods & Nutrition) with a grade of C or higher
- An overall GPA > 2.5
- And an in-major GPA > 2.5

60 hours

- CHEM 2514 (Survey of Organic Chemistry) or CHEM 2535 (Organic Chemistry) with a grade of C or higher
- An overall GPA > 2.5
- And an in-major GPA > 2.5

90 hours

- BMSP 2135, 2136 Anatomy & Physiology
- HNFE 2014, Nutrition Across the Lifespan
- BCHM 2024, Concepts of Biochemistry
- An overall GPA > 2.5
- And an in-major GPA > 2.5

Students not meeting Satisfactory Progress will have one probationary semester in which to resolve their standing.

**Restricted Major status:** Current Virginia Tech students who wish to change majors into HNFE (or add as a 2nd major) will be required to have an overall GPA at or above 2.5 (3.0 for Dietetics and double major or double option), have completed CHEM 1035 and CHEM 1036 with grades of C or higher, and create a plan of study that demonstrates how the student will attain Satisfactory Progress in regards to coursework. The GPA threshold of 2.5 (3.0 for Dietetics option) will stand for all students regardless of transfer status. Satisfactory progress towards degree is enforced.

[TOP](#)

## Undergraduate Course Descriptions (HNFE)

### 1004: FOODS, NUTRITION AND EXERCISE

Scientific information applied to current concerns in foods, nutrition and exercise as it affects the nutritional health well-being of humans. (3H,3C) I,II.

### 1114: ORIENTATION TO HNFE

An introduction to the academic and career planning for students in the Human Nutrition, Foods & Exercise major. (1H,1C)

### 1164: GOLF

This course will provide basic instruction in the fundamentals of golf. Pass/Fail only. (3L,1C)

### 1194: TENNIS

This course will provide basic instruction in the fundamentals of tennis. Pass/Fail only. (3L,1C)

### 1214: WEIGHT TRAINING

This course is designed to enhance muscular function to enable one to engage in activities requiring greater than normal levels of muscular development. Pass/Fail only. (3L,1C)

### 1244: VOLLEYBALL

This course will provide basic instruction in the fundamentals of volleyball. Pass/Fail only. (3L,1C)

### 1264: RACQUETBALL

This course will provide basic instruction in the fundamentals of racquetball. Pass/Fail only. (3L,1C)

### 1314: AQUATIC AEROBICS

The course will provide basic instruction in the fundamentals of aquatic exercise and water aerobic skills. Pass/Fail only. (3L,1C)

### 1324: BEGINNING SWIMMING

This course will provide basic instruction in the fundamentals of swimming. Pass/Fail only. (3L,1C)

**1344: FITNESS SWIMMING**

The course will provide basic instruction in the fundamentals of American Red Cross fitness swimming. Pass/Fail only. (3L,1C)

**1364: EXERCISE AND WEIGHT CONTROL**

This course will teach the concepts and skills required to use exercise for weight reduction. Each student will assess body fat, activity patterns and diet, and use this information to develop an individual exercise and dietary plan for weight reduction. Pass/Fail only. (3L,1C)

**2004: PROFESSIONAL DIETETICS**

Introduction to the profession of dietetics with emphasis on competencies, preparation, and responsibilities associated with dietetic practice. Overview of the structure of The American Dietetic Association (ADA) and its relationship to the dietetic professional. Discussion of current professional concerns. Co: 2014. (1H,1C) II.

**2014: NUTRITION ACROSS THE LIFE SPAN**

Nutritional requirements and related health concerns of pregnant and lactating women, infants, children, adults and the elderly are studied in relation to the physiological and metabolic aspects of pregnancy, lactation, growth and development, maintenance of health, prevention of disease, and aging. 1 year of biology or chemistry required. CHEM 1056 may be substituted for co-requisite CHEM 1036. Pre: 1004, (CHEM 1035 or CHEM 1055). Co: CHEM 1036. (3H,3C)

**2014H: NUTRITION ACROSS THE LIFE SPAN**

Honors section Pre: 1004, CHEM 1035, CHEM 1036. (3H,3C)

**2224: FOOD SELECTION AND PREPARATION LABORATORY**

Principles of food preparation and the effect on food quality determined by objective and sensory evaluation. Food choices at the market and consumer consumption and utilization. Pre: (CHEM 1036 or CHEM 1056), HNFE 1004. Co: 2234. (3L,1C) I,II.

**2234: FOOD SELECTION AND PREPARATION**

Principles of the selection and preparation of foods with emphasis on the preparation and the effect on flavor, texture, and nutritive properties of food. Pre: (CHEM 1035 or CHEM 1055), (CHEM 1036 or CHEM 1056), HNFE 1004. Co: 2224. (2H,2C) I,II.

**2254: EXER LDRSHIP-GROUP FIT INSTR**

Review of the physiological and behavioral concepts and practical skills required to be an effective group fitness instructor for the general population as well as special audiences. Training and certification for Cardiopulmonary Resuscitation and Automated External Fibrillation Certification- CPR and AED is provided. Prepares students to successfully complete the American Council on Exercise Group Fitness Instructor National Certification Exam. Pass/Fail only. (2H,2C)

**2264: EXERCISE LEADERSHIP- PERSONAL TRAINER**

Review of the physiological and behavioral concepts and practical skills required to be an effective personal trainer, for the general population as well as special audiences. Training and certification for Cardiopulmonary Resuscitation and Automated External Fibrillation Certification- CPR and AED is provided. Prepares students to successfully complete the American Council on Exercise Personal Trainer National Certification Exam. Pass/Fail only. (2H,2C)

**2544 (FST 2544): FUNCTIONAL FOODS FOR HEALTH**

Introduction to functional foods (foods with additional value beyond basic nutrition) including development of functional foods, novel sources, and traditional foods with value-added health benefit; regulatory issues; and media messages. (3H,3C)

**2664: BEHAVIORAL NUTRITION & PHYSICAL ACTIVITY**

Epidemiological evidence of the benefits of healthful eating and physical activity. Interactions between individuals, the physical/social environment, interpersonal, and intrapersonal determinants of a healthful diet and regular physical activity. Theories underlying individual behavior change and promising approaches for the promotion of healthful eating and physical activity. (3H,3C)

**2824: PREVENTION AND CARE OF ATHLETIC INJURIES**

An introduction to the techniques and principles of athletic training. (1H,3L,2C) I,II.

**2974: INDEPENDENT STUDY**

Variable credit course.

**2984: SPECIAL STUDY**

Variable credit course.

**3014: FNW STUDY TOUR**

Study of emerging career opportunities in industry, government, and other nonprofit agencies, health care, consumer education, and research for students in foods, nutrition or exercise science. Special emphasis on program or product development, evaluation, and marketing as related to a target consumer group. Seminars on campus and at prearranged locations during the two day tour. Junior standing or permission; HNFE majors only. II. (1H,1C)

**3025-3026: METABOLIC NUTRITION**

Study of bioenergetics and carbohydrates, lipids, proteins, vitamins and minerals with emphasis on sources, interrelationships and factors affecting utilization and metabolism. The effects of macronutrient and micronutrient intakes related to several metabolic states diseases will be examined. Pre: BMSP 2136, (HNFE 2014 or HNFE 2014H), BCHM 2024 for 3025; 3025 for 3026. (3H,3C)

**3034: METHODS OF HUMAN NUTRITIONAL ASSESSMENT**

Laboratory projects and experiments related to nutrition principles and problems. Pre: 2014, BCHM 2024, (BMSP 2136 or BIOL 2406). Co: 3025.

(1H,3L,2C) II.

**3114: FOODSERVICE AND MEAL MANAGEMENT**

Foodservice and meal management for the dietetics professional. Emphasis is placed on understanding food procurement, production, distribution, and marketing in a safe and well managed operation. I Pre: 2234, 2224. (3H,3L,4C)

**3224: COMMUNICATING WITH FOOD**

Development of oral and written communication skills to communicate food and nutrition information to diverse populations. II Pre: 2014, 2234, 2224. (2H,3L,3C)

**3234: SCIENCE OF FOOD**

Theoretical and experimental study of food components with emphasis on the basic chemical and physical reactions, properties, interactions, and functions in foods. I Pre: 2234, 2224, (CHEM 2535 or CHEM 2514). (3H,3L,4C)

**3634: EPIDEMIOLOGIC CONCEPTS OF HEALTH AND DISEASE**

Designed to give students in the health sciences a basic understanding of the modern concepts regarding health and disease as well as skills in organizing epidemiological data, disease investigation and surveillance. Includes a survey of terms, concepts, and principles pertinent to epidemiology. Lifestyles of populations and the relationships between lifestyles and health status are studied. (3H,3C) II.

**3804: EXERCISE PHYSIOLOGY**

Effects of exercise on physiology: neuromuscular, metabolic, cardiopulmonary. Scientific basis of physical training. I Pre: (BIOL 2405, BIOL 2406) or (BMSP 2135, BMSP 2136). (3H,3C)

**3824: KINESIOLOGY**

The anatomical and biomechanical basis of human motion, with applications for motor skill acquisition, and development and rehabilitative exercises. I Pre: (BIOL 2405, BIOL 2406) or (BMSP 2135, BMSP 2136), (PHYS 2205 or PHYS 2305). (3H,3C)

**3864: CONCEPTS OF PREVENTIVE AND THERAPEUTIC EXERCISE**

Fundamental principles of exercise and health behavior for adults. Focus is on exercise and risk factor modification techniques for promotion of health, prevention of disease, and for disease rehabilitation. I (2H,2C)

**3874: CLINICAL EXERCISE PHYSIOLOGY**

Pathophysiology, function and exercise in populations with medical considerations. Emphasis on basics of assessment and interpretation for health screening, multi-component physical fitness testing, exercise electrocardiography, therapeutic medications, and supervision in exercise programs designed for disease prevention. Pre: 3864. (1H,3L,2C) II.

**4004: SEMINAR IN HNFE: WRITING AND DISCOURSE IN THE MAJOR**

Focused review of relevant and current literature in selected areas of food, nutrition and exercise. Develop practical strategies for finding research articles on specific topics utilizing a variety of search tools (e.g., library, on-line search engines, etc.). Develop analytical skills to critically assess the significance of published research data. Develop competence in written and verbal presentation of current research in formats suitable for a scientific or a lay audience. Pre: 3025. (3H,3C)

**4125-4126: MEDICAL NUTRITION THERAPY**

Study of nutritional diagnostic, therapeutic and counseling services provided by a registered dietitian. 4125: Emphasis on the relationship between principles of nutritional care and the medical treatment of individuals with selected diseases or clinical problems. 4126: Integration of knowledge of pathophysiology, biochemical, and clinical parameters, medical treatment and nutrition therapy for patients with selected clinical problems/disease states. 4125: I. 4126: II. Pre: 2004, 3026 for 4125; 4125 for 4126. Co: 3034 for 4125. (3H,3C)

**4134: EXPERIENTIAL APPROACH TO NUTRITIONAL THERAPY**

Use of didactic and experiential methods to learn and apply theories of behavior change in diverse nutrition counseling situations. Pre: Instructor approval. I Pre: 4644. Co: 4125. (2H,2C)

**4174: NUTRITION AND PHYSICAL PERFORMANCE**

Interaction of human nutrition with exercise physiology. Nutritional principles applied to the well being of the athlete and to the optimization of exercise performance. Pre: 1004, 3804. (2H,2C) II.

**4224: ALTERNATIVE AND COMPLEMENTARY NUTRITION THERAPIES**

Critical evaluation of health claims, mechanisms of action, and research literature for a wide variety of alternative nutrition therapies used for disease prevention and treatment. Practical application of knowledge through completion of problem-based learning projects. (2H,2C)

**4254: EXPERIMENTAL FOODS**

Experimental study of the functions of ingredients and factors affecting food quality with emphasis on an independent project. Pre: 3234. (1H,3L,2C) II.

**4614: INTERNATIONAL NUTRITION IN DEVELOPING COUNTRIES**

An analysis of the micro and macro determinants of malnutrition and poor quality of life of households in developing countries and of strategies designed to address the problems. I Pre: 1004. (3H,3C)

**4624: COMMUNITY NUTRITION**

The application of nutrition principles to an analysis of current applied nutrition programs and a study of the political and legislative processes affecting the practice of dietetics. I Pre: 2014, 3026. (3H,3C)

**4634: SOCIO-CULTURAL FOOD SYSTEMS**

Study of social, cultural, and economic aspects of food systems, using quantitative and qualitative methods to assess nutritional status. I Pre: 1004, SOC 3004. (2H,2L,3C)

**4644: HEALTH COUNSELING**

Roles, responsibilities, and limitations of the professional health educator in health counseling, guidance and referral, health needs assessment, dynamics of health counseling interaction, and selected counseling techniques such as crisis intervention and value clarification. Junior standing required. (3H,3C) II.

**4834: APPLICATIONS IN CLINICAL EXERCISE**

Supervised experience with the Therapeutic Exercise and Community Health Center. Direct Involvement with rehabilitative and preventive exercise and lifestyle programming for cardio-vascular, musculo-skeletal, and other conditions. Exercise leadership, case management, and daily operations. Included seminars, lab experience, and individual meetings with participants and supervisors, related projects. X-grade allowed. Pre: 3874. (9L,3C)

**4844: EXERCISE AND NEUROMUSCULAR PERFORMANCE**

Functional properties of the neuromuscular system. Emphasis placed on the acute and chronic responses of muscle in exercise, rehabilitation and the factors which determine human performance. Special emphasis on the molecular biological factors responsible for skeletal muscle development and differentiation, as well as adaptation to training and disease states, including activation of signal cascades responsible for the changes in muscle performance. Pre: 3804. (3H,3C) II.

**4854: INTERN IN EX SCI & HEALTH PROM**

Capstone internship experience in the fields of exercise science and/or health promotion. The student will be immersed in the day-to-day challenges and responsibilities of a practicing health-fitness professional. The 45 contact hours per credit will involve work experience in some aspect of exercise science and/or health promotion. Senior standing and Exercise and Health Promotion majors only. May be repeated for maximum 3 credits. Pass/Fail only. Variable credit course. Pre: 4834.

**4964: FIELD STUDY**

Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

**4994H: UNDERGRADUATE RESEARCH**

Variable credit course.

## Overview

The College of Agriculture and Life Sciences offers a program for students who are undecided about their major during the first two years at Virginia Tech. This flexibility allows students to explore career opportunities in different fields, to meet faculty in different departments, and to investigate the wide-range of majors and options within the college as well as in the university. Working closely with an advisor in the Office of Academic Programs, students will take foundation courses required of most majors (biological sciences, math, English and chemistry) in the college and be encouraged to take exploratory courses in different departments to sharpen their career focus.

## Overview

The primary mission of the department is research, extension and graduate education in the areas of plant pathology (nature, biology and control of plant diseases), plant physiology, and weed science (weed biology and control, action of herbicides). No undergraduate majors are offered in these areas; students with an interest in plant pathology or weed science may enroll in the Departments of Crop and Soil Environmental Sciences or Horticulture, and for plant physiology also in the Department of Biology or Department of Biochemistry. The department offers several undergraduate courses that may be required or electives for students in agricultural or biological majors. These courses are designed to furnish basic knowledge of the nature, diagnosis, and control of plant diseases; identification, biology, and control of weeds; plant metabolism, nutrition, molecular biology, and growth regulation; and modern pest management and pesticide usage.

The department offers graduate programs leading to M.S. in the life sciences and Ph.D. in plant pathology, plant physiology and weed science. A non-thesis M.S. program in plant protection and pest management is also available (see [Graduate Catalog](#)).

## Undergraduate Course Descriptions (PPWS)

### 2004: MYSTERIOUS MUSHROOMS, MALICIOUS MOLDS

This course is an examination of the fungi and their close relatives, with special attention to their roles in the natural world and in shaping the course of human history. Emphasis is placed on the historical and practical significance of fungi as sources of medicine, pathogens of plants and animals, rotters and decayers of organic matter, makers of food and drink, manufacturers of dangerous toxins, and producers of mind-altering chemicals. A student must have a basic understanding of biology. (3H,3C)

### 2104: PLANTS, GENES, AND PEOPLE

Explores how and why humans have manipulated plant genomes from prehistory through the current genomic era by examining the scientific, cultural, historical, and legal aspects of plant gene management in both conventional and transgenic crops. Pre: BIOL 1005 or BIOL 1105. (3H,3C)

### 2964: FIELD STUDY

Variable credit course.

### 2984: SPECIAL STUDY

Variable credit course.

### 3104: PLANT PATHOLOGY

Introduction to plant pathology as a science and a crop protection discipline. Plant disease diagnosis, biology and identification of plant disease causing agents, factors leading to disease build-up, and management of plant diseases. Diseases of specific crops are discussed as examples to illustrate general principles. I Pre: BIOL 1005, BIOL 1006. (3H,3L,4C)

### 3444 (BIOL 3444): EXPLAINING MOLECULAR CELL BIOLOGY

This writing-intensive course will enable students to improve both their own scientific writing and their understanding of the writing of specialists, scientists in other fields and lay readers. Topics include bacterial, plant, biomedical examples of major advances in molecular cell biology and biotechnology. Includes a review of current methodologies, in-class writing workshops and problem-solving sessions, mock press conferences, individual and team presentations, and individual conferences with the instructor. Pre: BIOL 2104. (3H,3C)

### 3504: PLANT PHYSIOLOGY AND THE BIOTIC ENVIRONMENT

Course explores how both agricultural and non-crop plants grow, develop, and respond to biotic environmental influences. Topics include symbiotic and pathogenic microorganisms, herbivores, phytoremediation, parasitic plants, and weeds. The scope ranges from biochemical, cellular, tissue, to whole plant physiology. Course includes an experimental project in plant physiology on one of the topics. Pre: (BIOL 1006 or BIOL 2304), CHEM

1036. (3H,3C)

**3514: PLANT PHYSIOLOGY LAB**

A laboratory course designed to illustrate basic physiological principles related to nutrient deficiencies, membrane permeability and composition, water/nutrient absorption and translocation, transpiration, photosynthesis, physiological functions of growth regulators, enzyme activity, and elemental composition of plant tissue. Co: 3504. (3L,1C)

**4104: PLANT PATHOLOGY**

Introduction to plant pathology as a science and a crop protection discipline. Plant disease diagnosis, biology, and identification of plant disease-causing agents, factors leading to disease build-up, and management of plant diseases. Diseases of specific crops are studied as examples to illustrate general principles. Pre: (BIOL 1005 or BIOL 1105), (BIOL 1006 or BIOL 1106). (3H,3L,4C)

**4114: MICROBE FORENSICS/BIOSECURITY**

Concepts of comparative and evolutionary genomics for pathogen characterization and identification taught through case studies of bioterrorism, involuntary and voluntary disease transmission, infectious disease epidemics, and genetically modified organisms; emphasis placed on unambiguous source attribution of a disease outbreak to a particular microbe, risk assessment, response as individual, community, and nation to a bioterrorism attack or disease outbreak, federal biosecurity regulations, and career opportunities. Pre: BIOL 2604, (BIOL 2104 or BIOL 2004). (3H,3C)

**4264 (ENT 4264): PESTICIDE USAGE**

An interdisciplinary study of pesticides used in urban and agricultural environments. Topics studied will include: classification, toxicology, formulation, application techniques, safety, legal considerations, environmental impact, and research and development of new pesticides. Pre: CHEM 2515 or CHEM 2536. (2H,3L,3C)

**4504: FUNDAMENTALS OF PLANT PHYSIOLOGY**

Fundamental principles of plant physiology (photosynthesis, respiration, transpiration, nutrition, translocation, and development) will be integrated with discussion of the relationship between abiotic environmental factors and plant physiological processes. Both agricultural and non-crop plants will be emphasized. Pre: (BIOL 1006 or BIOL 2304), CHEM 1036. (3H,3C)

**4604: BIOLOGICAL INVASIONS**

Broad overview of the causes, consequences, and epidemiology of invasive plants, animals, and microbes. Conceptual, mechanistic, societal, and political components of invasive species from Darwin to modern day, covering the invasion process from introduction to ecological or economic impact. Taxonomy, management, and risk assessment will be covered via case studies, within a policy context. Pre: BIOL 1105, BIOL 1106. (2H,3L,3C)

**4754: WEED SCIENCE: PRINCIPLES AND PRACTICES**

Weeds and human affairs; costs and losses; emphasis on weed biology, weed identification and weed-crop ecology; agronomic, physiological, and chemical principles underlying prevention, eradication, and control of undesired vegetation; methods of weed control available for modern agronomic, forestry, horticultural, and non-crop situations. Pre: BIOL 2304, CHEM 1036. (2H,3L,3C)

**4964: FIELD STUDY**

Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

## Overview

The College of Architecture and Urban Studies is comprised of four Schools. The School of Architecture + Design includes accredited undergraduate and graduate programs in architecture, landscape architecture, industrial design and interior design. The School of Public and International Affairs includes undergraduate programs in public and urban affairs and environmental policy and planning and graduate programs in public administration, public and international affairs, and urban and regional planning; and doctoral programs in public administration and Governance and Globalization. The Myers-Lawson School of Construction, the first of its kind in the nation, brings together the Department of Building Construction in the College of Architecture and Urban Studies and the Vecellio Construction Engineering and Management Program in the Via Department of Civil and Environmental Engineering, and includes undergraduate programs in building construction and in construction engineering and management; master's programs in building construction science and management and in civil engineering with an emphasis in construction; and the doctoral program in environmental design and planning with an emphasis in construction management and building science and in civil engineering with an emphasis in construction. The School of Visual Arts offers undergraduate programs in art history, studio art, and visual communication design as well as a master's of fine arts in creative technologies.

These programs share a common purpose—to understand and mold the built environment through acts of creation, design, construction, and analysis. These forces give meaning to the built environments that shape our lives.

Research and outreach programs supplement instructional efforts and are carried out through college centers and laboratories. Specialized research and outreach centers offer students and faculty members opportunities for concentrated investigations in such areas as history and theory of art and architecture, housing, metropolitan studies, community design, construction safety and health, high performance learning environments, community health, governance and accountability, public policy, women in architecture, environmental design and planning, and visual design.

The college offers a range of advanced digital technologies, including an array of rapid prototyping devices and a wide range of computing and graphic equipment in support of the instructional and research programs of the college. The Environmental Systems Laboratory and Research and Demonstration Facility (RDF) are available to faculty members and students for the conduct of research, in-depth investigations of environmental systems, prototype development, and industrial, graphic and product design. To support these endeavors, the college has The Virtual Environments Laboratory (VE Lab) and the Visual Design Studio for Education, Research, Exhibition and Outreach.

The Art and Architecture Library, a branch of the University Libraries, is located in Cowgill Hall and houses more than 60,000 volumes, 200 periodicals and 65,000 architectural slides. The college also provides media facilities - VTR systems, photographic, darkroom, print making, ceramics, and cinematographic space and equipment, wood and metal shops.

The college's Washington-Alexandria Architecture Center and Northern Virginia Center in Old Town Alexandria, Virginia, provide opportunities for architecture, landscape architecture, public administration, urban and regional planning students to spend one or more semesters in the Washington, D.C. metropolitan area examining the range of design and planning problems found in large urban centers. In addition to classes, studios, and curricula at the undergraduate and graduate levels, the centers offer research and continuing education opportunities for students, faculty members, and alumni, and facilitates participation in the rich educational and cultural opportunities of the Washington, D.C. area.

The Europe Studio, based at the university's Center for European Studies and Architecture in Riva San Vitale, Switzerland, provides undergraduate and graduate study opportunities for students college-wide. Studios, seminars, and organized travel are offered. The college also sponsors an array of additional study abroad opportunities, including study-travel programs in Europe, Latin America, and Asia.

Students who wish to combine degree options within the college or with related disciplines within the university should contact the major school or department regarding special undergraduate and graduate program requirements.

A Summer Qualifying Design Lab the School of Architecture + Design is required for Virginia Tech students wishing to transfer or change their major into the architecture, landscape architecture, industrial design and interior design degree programs.

## Overview

The School of Visual Arts (SOVA) offers studio-based programs in the visual arts balanced with critical study of the great art of the past and present. The faculty includes both practicing artists and scholars of art history. The School emphasizes new digital media as well as traditional artistic media. We offer B.F.A. degrees in both Visual Communication Design and Studio Arts, as well as a B.A. degree in Art History.

SOVA provides a variety of exhibitions and art events. The Armory Art Gallery exhibits work by national and regional artists. XYZ, a student-run gallery, provides students and regional artists the opportunity to create and show wide-ranging experimental work. The Collaboration for Creative Technologies in Arts and Design (CCTAD) is a cross-disciplinary initiative with Art, Music, Computer Science and Communications. The Digital Arts and Animation Studio (DAAS) is designed to facilitate this new concentration.

FourDesign, a University Service Center, provides outstanding seniors with a vital professional design experience. Student interns work in a team environment under the direction of FourDesign faculty to produce design work for clients, providing professional and entrepreneurial experience rarely available to undergraduates. Through visiting artists and scholars, the School also brings students and members of the art community into dialogue with artists and critics of international prominence.

SOVA participates in the University's Study Abroad Program, which is open to students at the sophomore level or above, and combines classroom study with travel-study tours in Europe, Cuba, and Latin America.

Students in all of the degree programs in SOVA must complete the Curriculum for Liberal Education requirements.

### Progress toward degree

In addition to the University requirement for satisfactory progress (see Satisfactory Progress in Academics), upon completion of 72 semester credits, students must have completed all second year in-major courses with a C or higher. They must have an over all GPA of at least 2.0 to remain in the program (Visual Communication Design or Studio Art).

Foundations of Art and Design is a year-long, entry-level intensive program that prepares students for advanced study in the visual fields of Integrative Studio Art and Visual Communications Design. For Studio Art, the two-semester, 1000-level curriculum is made up of 15 credit hours covering principles of art and design, drawing, and digital Imaging proficiency. Completion of the entire Foundation Program is required prior to taking SOVA courses that are 2000 level or higher.

The investigation and unification of dexterity, contextual dialogue, and presentation skills are at the heart of the Foundations of Art and Design program at SOVA. Rather than isolating craft at the foundational level of study, whole elements of visual language are fostered equally. This unified approach to art and design studies aim to develop:

- Innovation and creative leadership skills
- Visual logic through multimedia
- Confidence with digital and analog crossover
- Traditional awareness applicable to contemporary tools of production

## Portfolio Review

Students are required to pass the Portfolio Review process in order to be accepted to either the Visual Communications Design or the Studio Arts B.F.A. degree program. This process is competitive in order to maintain the highest academic standards possible within the program. All VCD or Studio Art courses at a 2000 level or above are restricted to students who successfully complete the first semester of Foundations and pass Portfolio Review.

The VCD and Studio Portfolio Review Committees (comprised of SOVA faculty) screen properly submitted portfolios for outstanding qualities in artistic ability, creativity, presentation skills, and overall motivation. The process takes place once a year in the late fall as a capstone event to the first semester of Foundations. Students may re-submit a portfolio for review annually as often as they wish.

## Eligibility

VCD and Studio Art candidates must be currently enrolled in or have passed all three Foundation courses (ART 1204: Principles of Art & Design 1; Art 1404: Drawing 1; and Art 1604: Principles of New Media). Acceptance is contingent on successfully passing all three courses. Students must have and maintain a GPA of 3.0 or greater to enter and remain in either program. All artwork must be original and produced by the applicant. The committee encourages students to establish their portfolios with work produced during the fall Foundation courses.

Students who have been accepted into the Visual Communication Design Program begin the Visual Communication Design course sequence in the second semester of their first year. From that point on, the course sequences for Studio Art and Visual Communication Design are uniquely tailored to each area

[TOP](#)

## Bachelor of Arts in Art History

Art history develops the student's ability to place a work of art in its historical, cultural, social, and political contexts by giving equal weight to the development of both analytical and visual skills. While an undergraduate concentration in art history may lead directly to graduate studies and to a career in teaching and scholarly research, there are numerous opportunities in a variety of career fields in museums, galleries, auction houses, publishing companies, and others. Because Art History is an academic program, there is no entry portfolio requirement.

### **Required Art History and Ancillary Courses:**

Total Credit Hours: 42 for major, 120 for degree

ART 1204 Principles of Art and Design I OR ART 1404 Drawing I	3
ART 2385 <sup>1</sup> Survey of the History of Western Art I	3
ART 2386 <sup>2</sup> Survey of the History of Western Art II	3
<b>Choose at least five courses total from four of the five clusters below:</b>	
ART 3074 <sup>3</sup> Egyptian Art & Architecture OR ART 3084 <sup>3</sup> Greek Art & Architecture OR ART 3174 <sup>3</sup> Archaeology OR ART 3184 <sup>3</sup> Roman Art & Architecture	15
ART 3284 <sup>3</sup> Medieval Art & Architecture OR ART 3384 <sup>4</sup> Renaissance Art & Architecture OR ART 3484 <sup>4</sup> Baroque Art & Architecture	
ART 3584 <sup>4</sup> 19th-Century Art OR ART 3684 <sup>4</sup> African-American Art OR ART 3884 <sup>4</sup> American Art to 1914	
ART 3784 <sup>4</sup> Art Since 1900 OR ART 3774 <sup>4</sup> History of Modern Graphic Design	
ART 3064 Arts of China and Japan OR ARCH 4284 Precolumbian Art and Architecture	

ART 4484 <sup>3,4,7</sup> Topics in Criticism and Methodology (Art History majors only)	3
ART 4384 <sup>5,6</sup> Topics in Art History	3
ART 4384 Topics in Art History (under different topic)	3
ART 4384 Topics in Art History (under different topic)	3
One course in History (may not be HIST 1025 or 1026)	3
<b>One course in humanities selected from the following:</b>	
HUM 1114 The Classical Age	3
HUM 1124 Roman World & Early Christianity	
HUM 1214 The Medieval World	
HUM 1224 The Renaissance	
HUM 1314 The Enlightenment & Romanticism	
HUM 1324 The Modern World	
<b>Total Credits for Major</b>	<b>42</b>

<sup>1</sup>ART 2385 is offered Fall Semester only

<sup>2</sup>ART 2386 is offered Spring Semester only

<sup>3</sup>Prerequisite: ART 2385 or permission of instructor

<sup>4</sup>Prerequisite: ART 2386 or permission of instructor

<sup>5</sup>Prerequisites vary depending on topic, check with instructor

<sup>6</sup>ART 4974 (Independent Study) may be substituted with permission from your advisor and the instructor directing the study.

<sup>7</sup>Fulfills Spoken, Visual Expression, Written and Spoken requirement (ViEWS)

OVERALL GPA: Students majoring in Art History must maintain a 2.0 in-major GPA.

**Curriculum for Liberal Education Requirements:** Requirements and options may change. Check the Undergraduate Catalog and Provost's web site for courses.

<b>Area 1. Writing and Discourse:</b> Selected from first-year writing courses.	6
<b>Area 2. Ideas, Cultural Traditions, and Values</b>	6
The six credit hours required for Area 2 are met in-major.	
<b>Area 3. Society and Human Behavior</b>	6
<b>Area 4. Scientific Reasoning and Discovery</b>	6
<b>Area 5. Quantitative and Symbolic Reasoning</b>	6
<b>Area 6. Creativity and Aesthetic Experience</b>	1
The one credit hour required for Area 6 is met in-major.	
<b>Area 7. Critical Issues in a Global Context</b>	3
<b>Foreign Language Requirement College Level</b>	6
Two years of foreign language or equivalent from high school will substitute.	
<b>Total credits for Liberal Education Requirements</b>	<b>40</b>

## Bachelor of Fine Arts in Studio Art

Entry into this program is restricted and requires successful completion of specific criteria. View restricted programs.

In the Studio Arts Program, majors can choose their emphasis from a variety of disciplines including Painting, Drawing, Ceramics, Digital/Media and Sculpture. The studio curriculum encourages students to explore and develop their talents and interests. While specialization in the traditional sense is open to all majors, the school also encourages innovative approaches by exploring areas in which different media and disciplines fruitfully overlap. The B.F.A. in Studio Arts is specially addressed to students who plan to continue their education as artists at the graduate level.

The Bachelor of Fine Arts degree in Studio Arts is a 78 credit-hour program. Each faculty member is dedicated to teaching, research, and outreach within his or her specific fields. The connection from professional practice to studio classroom is essential in creating applicable learning environments.

The goal of the program is to develop culture-enriching leaders and innovative visual artists. Completing an integrated path of study in the Studio Arts Program will result in a B.F.A. degree that is applicable to the demands of the visual arts industry. Portfolio review is required for entry to the Studio Arts Program. Students submit portfolios after completing the basic sequence of freshman level Studio Art Foundations courses. Complete information about Studio Art Portfolio Review is available on the SOVA website at <http://www.sova.vt.edu>.

## Total 120 Credit Hours Required for Graduation

<b>First Year: 15 hours</b>	
ART 1204 Principles of Art & Design I (fall only)	3
ART 1404 Drawing I (fall only)	3
ART 1604 Principles of New Media Art & Design (fall only)	3
PORTFOLIO REVIEW: Required past this point. At the completion of Art 1204, 1404 and 1604 students MUST submit AND pass the portfolio review to continue in the studio art program. The review will take place at the end of the fall semester. Students whose portfolios are declined may not advance in the curriculum. Declined students may reapply at the next regularly scheduled portfolio review.	
ART 1214 Principles of Art & Design II (spring only)	3
ART 1414 Drawing II: Life Drawing (spring only)	3
Successful completion of first year courses Art 1204, 1404, 1604, 1214 and 1414 are required to proceed in the program (C or better grade). These courses are prerequisites for all 2000-level studio art courses.	
Check with your advisor to begin to develop a focused track of study for the third and fourth year. Focus tracks might include 2-dimensional art, 3-dimensional art, animation, or new media art. All available ART courses are listed in this document under Art Electives.	
<b>Second Year: 15 hours</b>	
ART 2385 Survey of Western Art I (fall only)	3
ART 2386 Survey of Western Art II (spring only)	3
ART 2XXX 9 Hours of 2000-level courses on Studio Art Electives List	9
2000-level Art courses are the prerequisites for most 3000 level Art courses within a specific media area, (example Art 2524: Intro. to Painting is the prerequisite for Art 3524: Topics in Painting Media). Please check the specific prerequisites for each course requested.	
<b>Third year: 21 hours</b>	
ART 3784 Art Since 1900 (fall only)	3
ART 3854 Professional Studio Practices (fall only)	3
ART XXXX Art History Elective	3
ART 3XXX 12 Hours of 3000-level courses on Studio Art Electives List	12
3000-level Art courses are the prerequisites for most 4000-level Art courses. Please check the specific prerequisites for each course requested	
<b>Fourth Year: 27 hours</b>	
ART XXXX Art History Elective	3
ART 4894 Senior Studio (fall)	3
ART 4894 Senior Studio (spring)	3
ART XXXX Art Elective	6
ART 4XXX 12 hours of 4000-level courses on Studio Art Electives List	12

The BFA in Studio Art requires 78 hours of Art courses.

## Curriculum for Liberal Education Requirements

Requirements and options may change. Consult the Undergraduate Catalog and the Provost's web site for courses. Select from the approved Curriculum for Liberal Education Courses:

<b>Area 1. Writing and Discourse:</b> Select from two first-year writing courses.	6
<b>Area 2. Ideas, Cultural Traditions, and Values</b>	6
<b>Area 3. Society and Human Behavior</b>	6
<b>Area 4. Scientific Reasoning and Discovery</b>	6

<b>Area 5. Quantitative and Symbolic Reasoning</b>	<b>6</b>
<b>Area 6. Creativity and Aesthetic Experience</b> Covered by in Art Major by Art 2385	<b>1</b>
<b>Area 7. Critical Issues in a Global Context</b>	<b>3</b>

Foreign Language Requirement – Six semester hours of college level Foreign Language or equivalent from high school will substitute

### Satisfactory Progress Toward Degree

Students must successfully pass portfolio review in either Studio Arts or Visual Communication Design to take any course above Art 1604. In addition to the University requirement for satisfactory progress (see "Satisfactory Progress in Academics" chapter of Undergraduate Catalog), upon completion of 72 semester credits, students must have completed all second year in-major courses with a C or higher grade. They must maintain a GPA of at least 2.0.

<b>Studio Art Electives:</b>	<b>Art History Electives- 6 credit hours:</b>

## Bachelor of Fine Arts in Visual Communication Design

The Visual Communication Design program is notable for its practical and applied approach to design pedagogy. Majors in Visual Communication Design develop conceptual abilities, problem solving skills and technical know-how required by a fast-paced, competitive field. Visual Communication Design demands individual creativity, teamwork skills, and adaptability to changing markets and technologies. The Visual Communication Design program at Virginia Tech prepares students for the job market with practical experience and a full, professional portfolio. Graduates of the program may find themselves working in print design, product and packaging design, multimedia web page design, and advertising design. We have also added a program teaching 3D Animation and Interactive Design.

Visual Communication Design offers a Bachelor of Fine Arts degree (BFA). Visual Communication Design is a restricted program requiring a special application, portfolio review and completion of specific art prerequisites. Students do not enter the Visual Communication Design Program as incoming freshmen, but only after completing a basic sequence of required freshman prerequisite Art Foundations courses. Complete information about the Visual Communication Design Portfolio Review is available on the School's website (<http://www.sova.vt.edu>). Students who have been accepted into the Visual Communication Design Program begin the Visual Communication Design course sequence in the second year. From that point on, the course sequences for Studio Art and Visual Communication Design are uniquely tailored to each area.

Total 120 Credit Hours required for Graduation.

<b>First Year:</b>	
ART 1504 Foundations of Art and Design	3
ART 1514 Basic Drawing	3

ART 2504 Digital Art	3
ART 2514 Life Drawing	3
Portfolio Review generally occurs in the late Fall of the first year.	
<b>Second Year:</b>	
ART 2575 Intro to VCD	3
ART 2576 Intro to VCD	3
ART 2524 Introduction to Painting	3
ART 2544 Introduction to Ceramics	3
ART 2554 Introduction to Sculpture	3
ART 2385-2386 Survey of Art History	6
ART 2384 Survey Discussion, Writing Intensive (repeated course, 1 credits each)	2
<b>Third Year:</b>	
ART 3565 Intermediate I in Graphic Design	3
ART 3566 Intermediate II in Graphic Design	3
ART 3784 20th Century Art (Fall only)	3
ART Studio Topics courses, 3000 level	6
ART History Electives, 3000/4000 level	3
<b>Fourth Year:</b>	
ART 4504 Multimedia	3
ART 4574 Advanced Visual Communications	3
ART 4964 Graphic Design Internship	3
ART 4000 Studio Topics Course	3
ART History Electives, 3000/4000 level	3
ART Electives	9
Total number of ART credits: 78	
Total credits for Curriculum for Liberal Education: 32-38	
Total free elective credits: 4-10	
<b>Total credits required for the degree: 120</b>	

### Satisfactory Progress Towards Degree

Students must successfully pass portfolio review in either Studio Art or Graphic Design to take any course higher than ART 1604. In addition to the University requirement for satisfactory progress (see Satisfactory Progress in Academics Chapter), upon completion of 72 semester credits, students must have completed all second year in-major courses with a C or higher. They must maintain an in-major GPA of at least 2.0 within the Department of Art and Art History. Students below this requirement will be notified by the Program Chair of their academic status within the program.

### Curriculum for Liberal Education Requirements

Requirements and options may change. Consult the Undergraduate Catalog and the Provost's web site for courses. Select from the approved Curriculum for Liberal Education Courses:

<b>Area 1. Writing and Discourse:</b> Selected from first-year writing courses. Students must complete two Writing Intensive courses.	6
<b>Area 2. Ideas, Cultural Traditions, and Values</b>	6
<b>Area 3. Society and Human Behavior</b>	6
<b>Area 4. Scientific Reasoning and Discovery</b>	6
<b>Area 5. Quantitative and Symbolic Reasoning</b>	6
<b>Area 6. Creativity and Aesthetic Experience</b> This 1 credit hour requirement for area 6 is met by in-major of (SOVA)	1
<b>Area 7. Critical Issues in a Global Context</b>	3

Foreign Language Requirement College Level  
Two years of foreign language or equivalent from high school will substitute.

[TOP](#)

## Financial Assistance

Scholarship support is available and scholarship awards are decided in the spring for the following year. All prospective freshmen who apply to the major and all upper-level students who apply for scholarships are eligible.

## Minors

A minor in Art History is available and requires completion of 18 semester hours. Checklists of specific requirements are available from the School.

For students graduating in Calendar year 2011 and after:

18 Total Credit Hours for minor	
ART 2385 <sup>1</sup> Survey of the History of Western Art I	3
ART 2386 <sup>2</sup> Survey of the History of Western Art II	3
ART 3XXX 3000-level Art History Courses	6
ART 4XXX 4000-level Art History Courses	6

<sup>1</sup>ART 2385 is offered Fall Semester only

<sup>2</sup>ART 2386 is offered Spring Semester only

## Curriculum for Liberal Education

Majors in all Art degree programs must satisfy in full the requirements of the Curriculum for Liberal Education. The School has other specific requirements for completing the Liberal Education curriculum.

## Undergraduate Courses (ART)

### Foundations of Art

#### 1204: PRINCIPLES OF ART & DESIGN

I Introduction of two-dimensional principles of design through employment of traditional and digital media. Reference to historical and theoretical context strengthens proficiency in the language of design. Application of contemporary practices and ethics. Projects, applied problem solving, reading assignments and critiques supply graphic skills and specialized vocabulary. RESOURCE CHARGE. (1H,5L,3C)

#### 1214: PRINCIPLES OF ART & DESIGN II

Introduction of two-dimensional principles of design through employment of traditional and digital media. Reference to historical and theoretical context strengthens proficiency in the language of design. Application of contemporary practices and ethics. Projects, applied problem solving, reading assignments and critiques supply graphic skills and specialized vocabulary. RESOURCE CHARGE. Pre: 1204, 1404. (1H,5L,3C)

#### 1404: DRAWING I

Methods and concepts fundamental to drawing, for the beginning student. No previous experience necessary. Emphasis on controlled use of common drawing media for representational and expressive purposes. RESOURCE CHARGE. (1H,5L,3C)

#### 1414: DRAWING II: LIFE DRAWING

Drawing the human figure from life. Emphasis on observation, construction, and anatomy. RESOURCE CHARGE. Pre: 1404, 1204, 1604. (1H,5L,3C)

#### 1604: PRINCIPLES OF NEW MEDIA ART & DESIGN

Introduces the student to the concept of new media through the research and development of contemporary art and design. The creative and aesthetic potential of the computer will be explored to produce new media product. RESOURCE CHARGE. (1H,5L,3C)

### Studio Art and Visual Communications Design

#### 2524: INTRODUCTION TO PAINTING

Students will explore painting practices and their relationship to art and design in contemporary culture, and develop basic painting skills and an understanding of various painting media. Encompasses illustrational technique and practical applications, expressive and abstract approaches to

painting. RESOURCE CHARGE. Pre: 1204, 1404, 1604. (1H,5L,3C)

#### 2544: CERAMICS I

Basic investigations into the materials, techniques, history and appreciation of the ceramic arts. Ceramic processes and technology including hand forming construction methods, glazing, and kiln firing. Design concepts as they relate to clay objects are stressed. Historic and contemporary ceramics objects along with methods and traditions of cultures from around the world will be introduced through a range of media. RESOURCE CHARGE. Pre: 1204, 1404, (1604 or 1504). (1H,5L,3C)

#### 2554: INTRODUCTION TO SCULPTURE

An introduction to sculptural processes and materials in art and design. Intensive studio work on individual projects. Review of historical and contemporary issues as applied to the definition of space, texture, mass, volume, scale and other principles of three-dimensional art. RESOURCE CHARGE. Pre: (1204, 1404), 1604. (1H,5L,3C)

#### 2575-2576: INTRODUCTION TO GRAPHIC DESIGN

Introduction to the theory and practice of graphic design as a means of visual communication, exploring problem-solving as applied to design concepts and execution. Studio assignments relating to society, industry, community, and commerce, with emphasis on digital/electronic applications. Resource charge. Pre: 1604, 1204, 1404 for 2575; 2575 for 2576. Co: 1414 for 2575. (1H,5L,3C)

#### 2604: INTRO TO NEW MEDIA ART

An introduction to digital time-based technologies to develop new media products including, stop-motion videos, 2D animations and interactive projects for delivery on the Internet. Aesthetic ideas and concepts of new media art will be examined. RESOURCE CHARGE Pre: 1604. (1H,5L,3C)

#### 2644: CERAMICS II

Introduction to forming methods using the potter's wheel. Design concepts, techniques and approaches to creating functional forms. Overview of contemporary and historic utilitarian ceramics. RESOURCE CHARGE. Pre: 2544. (1H,5L,3C)

#### 2664: DIGITAL PHOTOGRAPHY

Concepts, terminology, and skills in digital photography. Discover and utilize the appropriate techniques for camera control, exposing techniques, image manipulation and approaches to output options. RESOURCE CHARGE. Each student MUST own a digital SLR camera. Email jrosenth@vt.edu to inquire. Pre: 1604. (1H,5L,3C)

#### 2704: 3D COMPUTER ANIMATION

Introduction to the basic principles of 3d-computer animation including modeling, texture mapping, lighting, and motion. RESOURCE CHARGE. Pre: 1414, 1604, 1204. (1H,5L,3C)

#### 2964: FIELD STUDY

Pass/Fail only. Variable credit course.

#### 2974: INDEPENDENT STUDY

Variable credit course.

#### 2984: SPECIAL STUDY

Variable credit course.

#### 3504: TOPICS IN DIGITAL ART AND DESIGN

Rotating topics that explore the computer as an artistic medium and design tool. Intermediate level. The student will encounter as interdisciplinary approach to the use of the computer, as aesthetic ideas are presented and various digital techniques are applied. Stresses use and manipulation of original images created by the student, employing a combination of digital and traditional methods. May be repeated for a maximum of 9 hours with different topics. Pre: 1604. (1H,5L,3C)

#### 3514: TOPICS IN DRAWING

Rotating topics in drawing media, approaches, and theories. All topics will be devoted to promoting individual student creativity, mastery of drawing means and techniques, and further understanding of graphic concerns. RESOURCE CHARGE. May be repeated for a maximum of 9 hours with different topics. Pre: 1414 or 2514. (1H,5L,3C)

#### 3524: TOPICS IN PAINTING MEDIA

Rotating topics in painting techniques, disciplines, and theory emphasizing individual creative development and skilled approaches to technical problem-solving in visual art and design. Intermediate level. RESOURCE CHARGE. May be repeated for a maximum of 9 credits with different topics. Pre: 2524. (1H,5L,3C)

#### 3544: TOPICS IN CERAMICS

Rotating Topics in special techniques, processes, design concepts and forms in the ceramic arts. May be repeated for a maximum of 9 hours with different topics. RESOURCE CHARGE. Pre: 2644. (1H,5L,3C)

#### 3554: TOPICS IN SCULPTURE

Rotating topics that will focus on specific technical processes and applications of three dimensional problem solving in the visual arts. The course will stress techniques and issues found in contemporary 3D art and design. Emphasizes intensive studio practice through a series of individual projects related to the topics. RESOURCE CHARGE. May be repeated for a maximum of 9 credits with different topics. Pre: 2554. (1H,5L,3C)

#### 3564: TOPICS IN PHOTOGRAPHY

Rotating topics in photographic materials, methods and philosophies. All topics promote individual student's creativity, master of photographic techniques and further understanding of the medium. RESOURCE CHARGE. May be repeated with different topics for a maximum of 9 credits.

(1H,5L,3C)

**3565-3566: INTERMEDIATE GRAPHIC DESIGN I AND II**

Intermediate design layout, technical and concept development, and communication skills. First semester emphasizes advanced and new software relevant to the design, advertising, and printing industry. Second semester focuses on typography, professional pre-press, electronic printing and color separation processes. FEE REQUIRED. Pre: 2576 for 3565; 3565 for 3566. (1H,5L,3C)

**3574: TOPICS IN GRAPHIC DESIGN**

Rotating topics in graphic design, for the intermediate level student. This course will encourage visual problem-solving, conceptual development, clarity and individuality of expression. May be repeated for a maximum of 9 credits with different topics. Pre: 2576. (1H,5L,3C)

**3604: TOPICS IN NEW MEDIA ART**

Rotating topics explore the computer as an artistic medium and design tool. An interdisciplinary approach to the use of a computer. Aesthetic ideas and application of digital techniques. Use and manipulation of original images created by the student, employing a combination of digital and traditional methods. RESOURCE CHARGE. May be repeated for a maximum of 9 credits. Pre: 2604. (1H,5L,3C)

**3704: TOPICS IN COMPUTER ANIMATION**

Rotating topics that explore computer animation as an artistic medium and design tool. Intermediate level. The student will encounter an interdisciplinary approach to the use of computer animation, as aesthetic ideas are presented and various digital techniques are applied. Stresses use and manipulation of virtual character designs created by the student. May be repeated for a maximum of 9 credit hours. Pre: 2704. (1H,5L,3C)

**3854: PROFESSIONAL STUDIO PRACTICES**

An overview of professional studio art practices, concepts, marketing strategies and promotional materials. The international exhibition system and current educational opportunities, employment and career options in the visual arts are presented. Preparing of written materials and documenting artwork, building a professional portfolio for presentation to potential employers, art galleries and exhibitions are stressed. Pre: Bachelors of Fine Arts (BFA) majors only. (3H,3C)

**3984: SPECIAL STUDY**

Variable credit course.

**4504: TOPICS IN MULTIMEDIA STUDIO**

This studio course investigates computer-based multimedia in the visual arts and applied design. Video, photography, computer art and design may be used with traditional media and communication vehicles. May be repeated for a maximum of 9 credits. Two 3000-level courses required. Pre: (1414, 1604) or (1504, 1514, 2504). (1H,5L,3C)

**4514: INTERARTS STUDIO**

This studio course will investigate new approaches to art-making and new genres, such as performance art and site-specific installation. Interdisciplinary basis for course may incorporate traditional studio practices and media in the visual arts, music and theatre arts, and appropriate technology in computer, video, and film. May be repeated for a maximum of 9 credits with different topics. 3000-level Studio or Art History course required. RESOURCE CHARGE (1H,5L,3C)

**4524: PICTORIAL ARTS STUDIO**

Rotating topics in the two dimensional arts, at an advanced level. All topics will challenge the student to develop stronger, independently generated work of portfolio quality. May be repeated for a maximum of 9 credits with different topics. 3000-level Painting or Drawing course required. RESOURCE CHARGE Pre: 3524 or 3514. (1H,5L,3C)

**4534: TOPICS IN APPLIED ART AND DESIGN STUDIO**

Rotating topics about functional art and design. Students will use appropriate materials, tools, and processes in the creation of functional artworks, such as furniture, tiles, tableware, etc. Function and design aesthetics emphasized. May be repeated for a maximum of 9 credits with different topics. RESOURCE CHARGE Pre: 3544. (1H,5L,3C)

**4544: COMPUTER ANIMATION STUDIO**

Advanced animation course focusing on the creation of short films, demo reels, and expressive computer animated films. Students enrolled in this course are expected to complete one large project during the semester. May be repeated with different course content for up to nine credit hours. Pre: 3704 or 3704. (1H,5L,3C)

**4554: SPATIAL ARTS STUDIO**

Advanced level, rotating topics in the three dimensional arts. All topics will challenge the student to develop stronger, independently generated work of portfolio quality. May be repeated for a maximum of 9 credits with different topics. 3000-level Ceramics, Sculpture or Applied Art course required. RESOURCE CHARGE Pre: 2554. (1H,5L,3C)

**4564: EXHIBITION DESIGN AND DISPLAY**

This course will focus on the display and presentation of visual art, for student-designed exhibitions. Provides experience in the public art arena, and practical knowledge about planning, designing, and mounting an exhibition. Pre: 3000-level Studio or Art History course required. (1H,5L,3C)

**4574: ADVANCED VISUAL COMMUNICATIONS**

A further refinement of design theory and practice, and communication skills. Emphasis on the conceptual development of expanded project formats, and individual creativity. This class will provide a principal opportunity for building a viable portfolio. RESOURCE CHARGE 6 credits of Art 3574 required. Pre: 4504. (1H,5L,3C) 4804: NEW MEDIA ART THEORY Exploration of new media theory in relationship to contemporary arts practice.

Overview and application of new media art aesthetics, strategies, trends, and socio-cultural aspirations. The course will examine theoretical writings and creative work from prevailing technologically-based disciplines. Must have Art 3604 prerequisite or permission of the instructor. Pre: 2385, 2386. (3H,3C)

#### 4854: THEORIES AND PROCESSES OF CONTEMPORARY ART

Analysis of contemporary art, art theory and criticism. Theoretical development through independent projects, critical essays, written analysis, oral critiques and class discussions. Application of conceptual concerns in advanced studio processes. RESOURCE CHARGE. Pre: 2385 or permission of the instructor. Pre: 2385. (3H,3C)

#### 4894: SENIOR STUDIO

Preparation and presentation of concentrated studio work under faculty supervision, culminating in solo exhibition and/or formal portfolio. May be extended over two semesters with final grade assigned on completion. Or may be repeated for a total of 6 credits at a maximum of 3H, 3C per semester. Senior standing and consent of department head required. Variable credit course. I,II,III.

#### 4964: FIELD STUDY

Variable credit course.

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

### TOP

## **Art History**

#### 2385,2386: SURVEY OF THE HISTORY OF WESTERN ART

Survey of art and architecture of Western Europe. 2385: emphasis on Greek, Roman, and medieval 2386: from ca. 1300 to the contemporary period; works of major masters such as Giotto, Leonardo, Michelangelo, Rembrandt, as well as works of European and American Impressionism, Expressionism, and Modernism. (3H,3C) 2385: I,III,IV; 2386:

#### 3004: TOPICS IN ART HISTORY

Rotating topics from all periods of art history with a particular emphasis on non-Western art, such as Japanese, Chinese, pre-Columbian, sub-Saharan, Native American, or Islamic art and architecture. Lecture and/or undergraduate seminar format. May be repeated for credit with different content for a maximum of 9 credits. Pre: 2385 or 2386. (3H,3C) I,II.

#### 3064: THE ARTS OF CHINA AND JAPAN

An introduction to Chinese and Japanese art from the Neolithic to the present. The influence of philosophy, religion and social organizations on the development of the visual arts in China and Japan. Considerations of a range of media including painting, architecture, calligraphy, ceramics, prints and lacquer. (3H,3C)

#### 3074: EGYPTIAN ART AND ARCHITECTURE

Introduction to Egyptian art and architecture from the Predynastic through the Late Period with emphasis on the major monuments of Egyptian sculpture, painting and architecture and the history of archaeological exploration within Egypt of the Old and New Kingdoms. Pre: 2385. (3H,3C)

#### 3084: GREEK ART AND ARCHITECTURE

Painting, sculpture, and architecture of the Greeks, ca. 1000-31 B.C. Emphasis on correlation of archaeological remains with literary sources, and on the development of the arts in relation to cultural environments of the archaic, classical, and Hellenistic periods. Pre: 2385. (3H,3C) I,II.

#### 3174: TOPICS IN ARCHAEOLOGY

Explores human fascination with, and responsibility to, the physical monuments of the past through a history of the discipline of archaeology in the Mediterranean world. Examines contemporary global issues surrounding the preservation and protection of archaeological artifacts, particularly with regards to the role they serve as objects of cultural heritage and cultural identity. Pre: 2385. (3H,3C)

#### 3184: ROMAN ART AND ARCHITECTURE

Painting, sculpture, and architecture of the Romans 500 B.C. - 323 A.D. Emphasis on relation between monuments and the political and cultural circumstances that led to their creation. Pre: 2385. (3H,3C) I,II.

#### 3284: MEDIEVAL ART AND ARCHITECTURE

The painting, sculpture, and architecture of the 4th through the 14th centuries in the Latin West, with an emphasis on the Romanesque and Gothic Periods. Pre: 2385. (3H,3C) I,II.

#### 3384: RENAISSANCE ART AND ARCHITECTURE

A chronological survey of Renaissance art from the Limbourg Brothers through Mannerism, with an emphasis on painting and architecture. Major stylistic trends are discussed in the historical contexts of artistic techniques, patronage, iconography and the primary literature of the period. Pre: 2386. (3H,3C)

#### 3484: BAROQUE AND ROCOCO ART AND ARCHITECTURE

Seventeenth-Century Baroque and Eighteenth-Century Rococo Art of Europe, with an emphasis on painting, sculpture, and architecture. Major artistic trends in Italy, Spain, Flanders, Holland, and France are discussed in their historical, cultural, and social context. Pre: 2386. (3H,3C)

**3584: NINETEENTH-CENTURY ART: NEO-CLASSICISM TO POST-IMPRESSIONISM**

European art of the nineteenth-century. A chronological study of neoclassicism, romanticism, realism, impressionism, symbolism and post-impressionism. Pre: 2386. (3H,3C) I,II.

**3684: SURVEY OF AFRICAN-AMERICAN ART**

A chronological survey of African-American art, from its beginnings in the tribal traditions of Africa to its contemporary manifestations. Pre: 2386 or AFST 2774. (3H,3C)

**3774: HISTORY OF MODERN GRAPHIC DESIGN**

A chronological survey of the history of modern graphic design, from the mid-19th century to 1980. Pre: 2386. (3H,3C)

**3784: EUROPEAN AND AMERICAN ART SINCE 1900**

European and American Art since 1900. A chronological survey of painting and sculpture from neo-impressionism through post-modernism. Pre: 2386. (3H,3C)

**3884: AMERICAN ART TO 1914**

American art from its colonial beginnings until World War I. I Pre: 2386. (3H,3C)

**3954: STUDY ABROAD**

Variable credit course. X-grade allowed.

**4384: TOPICS IN ART HISTORY**

Advanced art history elective. Rotating topics from all periods of art history, selected to complement offerings at the 3000-level. Topics such as Greek Sculpture, Roman Painting, Renaissance and Baroque Sculpture, Cubism, and Fauvism indicated by timetable. Lecture and/or undergraduate seminar format. May be repeated for credit for a maximum of 18 credits. Pre: 2386. (3H,3C)

**4484: TOPICS IN ART CRITICISM AND METHODOLOGY**

Advanced art history elective. Rotating topics in the criticism of art and the methodology of art history and criticism, selected to complement offerings at the 3000-level. Topics such as the History of Art Criticism from Baudelaire to the Present, New Methods in Renaissance and Baroque Art History, and the Theory of Art from various periods, indicated by timetable. Lecture and/or undergraduate seminar format. May be repeated for credit with different content to a maximum of 9 credits. Pre: 2385 or 2386. (3H,3C)

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

- [Course Descriptions](#)

## Overview

The Department of Building Construction's mission is to build leaders for the construction industry and society. This is accomplished by providing undergraduate students with a complete and diversified grasp of the building industry through technical and managerial courses and a Curriculum for Liberal Education that emphasizes self-motivation, imagination and social responsibility. The program offers a unique opportunity in education for those interested in a future in the construction/development industry.

The Building Construction program develops within the student a solid foundation in construction knowledge.

The first two years of the program are identical and form the core basics for proceeding into one of two options: the Construction and Design (CD) option or the Development, Real Estate, and Construction (DREC) option.

The course work for both options includes structural, mechanical, and electrical systems, and related subjects. Management subjects such as construction financing, contracts, planning, scheduling, and construction means and methods help familiarize the student with concepts and skills essential in the building industry. Construction materials, equipment, and procedures are also studied in the classroom and reinforced by visits to on-going construction sites. Students also gain an understanding of construction drawings and specifications, and their importance to the successful execution of building contracts and projects.

The business and construction management sequences, for all students, are devoted to necessary decision-making skills. Management topics include: organizational, financial, and legal structures for the business and project; estimating and bidding strategies; contracts; and planning and scheduling techniques. The "case study method" is used at various times in order to develop the student's ability to define problems, identify choices, and recognize the most critical elements in a variety of situations.

The Construction and Design option has an added focus of exploring technical and engineering issues supporting construction design and operations. The Development, Real Estate, and Construction option has its focus in the real estate and development arena. Entry into the Development, Real Estate, and Construction option is limited to students who are admitted to the Real Estate Minor in the Pamplin College of Business. The choice of which option to pursue is made in the spring semester of the second year.

The Building Construction major is accredited by the American Council for Construction Education. Upon successful completion of the four-year program of 134 credit hours of study, a Bachelor of Science in Building Construction is awarded.

## Building Construction Foundation (first two years)

FIRST YEAR (31 semester credits)	
First Semester	Credits
BC 1214: Intro. to Building Construction	3
ENGL 1105: Freshman English (Area 1) **	3
ACIS 2004: Survey of Accounting	3
MATH 1114: Elementary Linear Algebra	2
MATH 1205: Calculus (Area 5) **	3

Area requirement (Area 6) **	1
	<b>15</b>
<i>Second Semester</i>	
BC 1224: Intro. to Building Construction & Lab	3
BC 2114: Information Technology in Design & Construction	2
ENGL 1106: Freshman English (Area 1) **	3
MATH 1206: Calculus (Area 5) **	3
MATH 1224: Vector Geometry	2
ECON 2005: Principles of Economics (Area 3) **	3
	<b>16</b>
<b>SECOND YEAR (36 semester credits)</b>	
<i>First Semester</i>	
BC 2014: Construction Principles I	3
CEE 2814: Measurements	4
ESM 2104: Statics	3
MATH 2224: Multivariable Calculus	3
PHYS 2305: Foundations of Physics I + Lab (Area 4) **	4
	<b>17</b>
<i>Second Semester</i>	
BC 2024: Construction Principles II	3
BC 2064: Construction Principles Lab	1
BC 2044 Building and Materials + Lab	3

Elective (BC Directed Elective)	3
Area Requirement (Area 7) **	3
	17

## **Undergraduate Courses (BC)**

### **1214: INTRODUCTION TO BUILDING CONSTRUCTION I**

This is an introduction to the world of construction with an overview of the important areas of contracting and the inter-workings of the construction industry. Emphasis is placed on the theory and terminology of the construction industry supplemented with the graphical representation of construction documents and laboratory building experiments. (2H,3L,3C)

### **1224: INTRODUCTION TO BUILDING CONSTRUCTION II**

Continuation of introduction to the world of construction with an overview of the important areas of contracting and the workings of the construction industry. Emphasis is placed on the application of theory, processes and vocabulary of the construction industry supplemented with computer aided graphical representation of construction documents. Pre: 1214. Co: 2114. (2H,3L,3C) II.

### **2014: CONSTRUCTION PRINCIPLES I**

This course covers the fundamentals of construction technology and processes emphasizing materials, methods, techniques and sequences for the construction of buildings (CSI Divisions 1-6). Planning, scheduling and quantity surveying for the management of construction resources are among the topics studied. I Pre: 1224. Co: MATH 1205. (2H,3L,3C)

### **2024: CONSTRUCTION PRINCIPLES II**

This is a continuation of the fundamentals of construction technology and processes emphasizing materials, methods, techniques and sequences for the construction of buildings in CSI divisions 7-16. Planning, scheduling, quantity surveying and control systems for the management of these construction resources are among the topics studied. Pre: 1224, 1214, 2014. Co: 2064. (3H,3C) II.

### **2044: BUILDINGS & MATERIALS**

Introduction to the theory and applications of building materials. Properties, composition, and characteristics of building materials with particular focus on ferrous and non ferrous metals, concrete, bricks and blocks, timber, glass and plastics. Emphasis on physical behavior of materials under load, including thermal loads, compatibility deformations and material behavior requirements, interaction among different materials, non-destructive/destructive methods for evaluation and testing of construction materials, basic analysis and design applications of major structural components. Pre: ESM 2104. Co: ESM 2204. (2H,3L,3C)

### **2064: CONSTRUCTION PRINCIPLES INTEGRATED LAB**

Develop a competency in applying construction means and methods as they relate to quantity take-off, cost management, scheduling and resource management in support of a senior capstone project. Pre: 1214, 1224, 2014. Co: 2024. (1H,2L,2C)

### **2114: INFORMATION TECHNOLOGY IN DESIGN AND CONSTRUCTION**

A web based computer applications laboratory course related to the introduction, application and utilization of basic informational technologies used in the design and construction profession. Production and project management improvements through the use of computer applications are explored, including Internet based project management, and CADD design and database integration, spreadsheet applications, computer programming, and computer based project management software. Pre: 1214. Co: 1224. (1H,3L,2C) I,II.

### **2974: INDEPENDENT STUDY**

Variable credit course.

### **2984: SPECIAL STUDY**

Variable credit course.

### **3004: CONSTRUCTION & SOCIETY**

Principles of construction safety, sustainability, and ethical practice for construction project delivery. Techniques for prioritizing, planning, and managing project execution using safety, sustainability, and ethics best practices. Pre: 2064. (3H,3C)

### **3064: BUILDING SYSTEMS TECHNOLOGY LAB**

Develop a competency in the application of Building Environmental Systems, through modeling, scheduling, estimating, and experiments in support of a senior capstone project. Pre: (4004 or CNST 2104), PHYS 2306. Co: 2044, 4014, CEE 3014, CEE 4074. (1H,2L,2C)

### **3115,3116: BUILDING CULTURE, A HISTORY OF CONSTRUCTION**

Comprehensive review of construction and the social, ethical, political, economic and technological forces that drive the development of shelter, building, sanitation, and transportation infrastructure from Neolithic times to the present focused on Europe and America, with significant case examples from Asia and Africa. 3115 will cover shelter to the ideal city during the renaissance. 3116 will focus on the modern condition from the renaissance forward. (3H,3C)

### **3124: HOUSING AND LAND DEVELOPMENT**

A comparison of the problems and strategies of delivering single and multi-family housing in urban and suburban contexts. The interdependency of subdivision and zoning ordinances, utility infra-structure, environmental impact, economic feasibility, purchasing versus rental programs, and availability of housing systems are concerns examined. Junior standing required. Pre: 2024, 2064. (3H,3C)

### **3954: STUDY ABROAD**

Study abroad in Spain. Variable credit course.

### **4004: BUILDING SYSTEMS TECHNOLOGY I**

The student is exposed to the theory and analysis methods relative to the design and integration of Mechanical and Electrical Building Systems. Topics covered include: conceptual design, technical operations and maintenance issues necessary for determining the selection of passive and active environmental control systems within a building including: Heating, Ventilation, Air Conditioning, Lighting, Acoustical and Plumbing. I Pre: 2024, 2064, 2114. Co: PHYS 2306.(3H,2L,4C)

#### 4014: BUILDING SYSTEMS TECHNOLOGY II

This course places an emphasis on the physical installation and integration of passive and active environmental control systems including: heating, ventilation, air conditioning, lighting, acoustics and plumbing. Lectures by faculty and seminars by construction industry practitioners address issues that are relevant to illustrating the applications resulting from theory studied in BC 4004. CEE 4074 may be substituted for co-requisite BC 3064. Pre: (4004 or CNST 2104), PHYS 2306. Co: 3064. (2H,3L,3C)

#### 4024 (CEE 4014): ESTIMATING, PRODUCTION, AND COST ENGINEERING

Interpretation of plans and specifications, preparation of construction estimates, and cost control. Methods analysis, resource requirements, and resource costs in building systems, including system components, and in large-scale civil engineering works such as highways, bridges, and hydraulic structures. Pre: 2024, 2064. (3H,3C) I,II.

#### 4034 (CEE 4034): CONTRACT SPECIFICATIONS

The course work provides an overview of the basics of the Project Manual (a collection of the contractual provisions of a nontechnical nature together with the technical provisions). Techniques of specification writing, interpretation of intent, and complimentary documents are studied. Senior standing required. (3H,3C)

#### 4054 (CEE 4054): CONSTRUCTION LAW: ROLES AND RESPONSIBILITIES

A study of current legal problems associated with the construction industry. Traditional roles of the various industry participants are examined from a management's perspective. The entire building process, from pre-design to owner use, is covered with emphasis on claims avoidance. Pre: 4434 or CEE 3014 or ARCH 4044. (3H,3C)

#### 4064: CONSTRUCTION PRACTICE LAB

Application of the business and construction practices related to operation of a construction company to the execution of a senior capstone project. All project management concepts learned in prior courses are applied in the capstone lab experience. Written and oral work is formally presented and critiqued among construction faculty, students, and industry professionals. Pre: 4434. Co: 4444. (1H,2L,2C)

#### 4164: PRODUCTION PLANNING AND PROCESS DESIGN FOR CONSTRUCTION

The course deals with the planning and design of construction processes. Course topics include production systems, behavior of construction systems and workers, the relationships between subsystems in the construction process, queuing systems, process modeling and simulation. The major emphasis is on production and productivity. Production problems that typically occur in construction systems are discussed. The course also explores recent innovations in construction system design such as lean construction and agile construction. Pre: 4004, 4014, 3064. (3H,3C)

#### 4434: CONSTRUCTION PRACTICE I

Business and construction practices related to operation of a construction company are studied. Construction operation is examined as it relates construction, financial and personnel management. Project management topics studied in this course include permitting, site evaluations, design development and design phase considerations such as preliminary estimates and project constructability. Writing Intensive (WI) course. Pre: (4014, 3064), (2044) or (CEE 3014, CEE 4074). (3H,3C)

#### 4444: CONSTRUCTION PRACTICE II

This course explores and applies the business and construction practices related to operation of a construction company to a capstone experience. Construction operation is examined as it relates to construction, financial and personnel management. Project management topics studied in this course are applied in the corequisite lab. This course is formally designated as a writing intensive course. Formal written and edited and oral presentations are presented and critiqued by the BC faculty team, the writing resource center, students and industry professionals. Pre: 4434. Co: 4064. (3H,3L,4C)

#### 4754: INTERNSHIP

Variable credit course.

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

## **Construction Engineering and Management Program**

### **Overview**

The Myers-Lawson School of Construction offers students in the College of Engineering a Bachelor of Science Degree in Construction Engineering and Management. This degree is designed for students who wish to pursue a career in the construction industry. The undergraduate program facilitates the development of critical technical, managerial and professional knowledge and skills required for entry into the construction industry or graduate studies. This body of knowledge includes the decision and optimization methods required to integrate and manage the resources essential to construction operations along with the skills that support the development of safe, ethical, socially responsible, and sustainable solutions for the built environment. The Construction Engineering and Management Program is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700.

Construction managers plan, direct, and coordinate construction projects, including the building of all types of residential, commercial, and industrial structures, roads, bridges, and other public works projects. Construction managers coordinate and supervise the construction process from the conceptual development stage through final construction, ensuring the project is completed within time and budget constraints and is compliant with building and safety codes and other regulations.

The focus of this degree is construction management with engineering and business management as additional major areas of study. The degree retains an emphasis on engineering, with a focus on construction theory and applications, while providing students the opportunity to define the areas of business management they wish to study to complement their career goals.

Coursework capitalizes upon established excellence in the Via Department of Civil and Environmental Engineering, the Department of Building Construction and the Pamplin College of Business. The majority of courses are drawn from existing curricula in Civil Engineering and Building Construction. Complementary courses from the College of Business provide the balance.

Consistent with the general program goal of facilitating development of student competence necessary for entry into the construction industry or graduate school, the School has developed the following program objectives:

Within a few years of curriculum completion, graduates of the Construction Engineering and Management program should be able to combine skills gained through academic preparation and post-graduation experience so that they can:

- Identify, design, analyze, integrate and manage the technical, material, financial, legal and personnel administration aspects that

support construction operations, projects and organizations throughout the project lifecycle, i.e., from programming to decommissioning.

- Incorporate safety, efficiency, cost effectiveness, environmental sensitivity and social awareness into the development, planning and implementation of construction operations and processes.
- Apply skills of effective communication, entrepreneurship, teamwork, values-based leadership, professional and ethical behaviors that are the necessary compliment to technical competence.
- Continue their professional development and learning which may include professional licensure or certification, graduate level education, continuing education courses, self-directed study and active involvement in the construction community.

Classroom instruction in the construction engineering and management program is reinforced by instructional laboratories, field trips and guest lectures by leading construction professionals. The department seeks to employ the latest educational technology and innovative teaching methods.

Students in the School have the opportunity to participation in a summer internship program during which they may apply the concepts learned in the classroom in real world applications. The School encourages all students to participate in professional work experience prior to graduation.

## Class Size Limitation

A proposal to limit enrollment in the BS CEM degree has been approved by University governance. The proposal limits enrollment to 40 students per graduating class. The criteria that must be met in order to gain entry into the program include the following three inputs, weighted accordingly:

1. Overall GPA. (60%)
2. The grade obtained for a statement of intent outlining career objectives and experience in the construction industry prepared and submitted to a three person faculty committee. (20%)
3. The grade obtained in an interview to determine commitment to success with a two person faculty committee. (20%)

The contact person for the undergraduate Construction Engineering and Management program is Dr. Christine Fiori, at 540/239-3389 or e-mail: [cfiori@vt.edu](mailto:cfiori@vt.edu).

## Construction Engineering and Management Program (for 2012)

Note: Graduation requires a total of 133 semester credits. Requirements are subject to change; prospective students should contact the department prior to initiating individual programs of study.

<b>First Year</b>	
<i>First Semester</i>	
CHEM 1035: General Chemistry or CHEM 1074: Chemistry for Engineers	3
CHEM 1045: General Chemistry Lab or CHEM 1084: Chemistry for Engineers Lab	1
MATH 1205: Calculus	3
MATH 1114: Linear Algebra	2
ENGL 1105: Freshman English	3
ENGE 1024: Engr. Exploration	2
Liberal Education Elective: See remarks	1
<b>Credits</b>	<b>15</b>
<i>Second Semester</i>	
PHYS 2305: Foundations of Physics I	4
MATH 1206: Calculus	3
MATH 1224: Vector Geometry	2
ENGL 1106: Freshman English	3
ENGE 1114 Exploration of Engineering or ENGE 1104 Exploration of Digital Future	2
Liberal Education Elective: See remarks	3
<b>Credits</b>	<b>17</b>
<b>Second Year</b>	
<i>First Semester</i>	

PHYS 2306: Foundations of Physics I	4
MATH 2224: Multivariable Calculus	3
ESM 2104: Statics	3
GEOS 2104: Elements of Geology	3
CEE 2804: Intro. to CEE	2
ENGE 2824: CEE Drawings & CAD	1
<b>Credits</b>	<b>16</b>
<i>Second Semester</i>	
STAT 3704: Statistics for Engr. Applications	2
MATH 2214: Differential Equations	3
ESM 2204: Mech. of Deformable Bodies	3
ISE 2014: Engineering Economy	2
CEE 2814: CEE Measurements	4
Liberal Education Elective: See remarks	3
<b>Credits</b>	<b>17</b>
<b>Third Year</b>	
<i>First Semester</i>	
CEE 3404: Theory of Structures	3
CEE 3014: Construction Management	3
BC 4014: Building Systems Tech II	3
BC 3064: Building Systems Tech Lab	2
CEE 3804: Computer Application in CEE	3
CEE 4074: Construction Means & Methods	3
<b>Credits</b>	<b>17</b>
<i>Second Semester</i>	
CEE 3684: CEE Materials	3
CEE 3434: Design of Steel Structures	3
BC 4434: Construction Practice I	3
CEE 4014: Estimating	3
ENGL 3764: Technical Writing	3
ECON 2005: Principles of Economics	3
<b>Credits</b>	<b>18</b>
<b>Fourth Year</b>	
<i>First Semester</i>	
CEE 3424: Reinforced Concrete Design	3
CEE 4024: Const. Control Techniques	3
BC 4444: Construction Practice II	4
BC4064: Construction Practice Lab	2
CEE 3514: Intro to Geotechnical Engr	3
ECON 2006: Principles of Economics	3
<b>Credits</b>	<b>18</b>
<i>Second Semester</i>	
CEE 4804: Prof. & Legal Issues in Engr.	3
CEE 3104: Intro. to Environmental Engr. or CEE 4554: Natural Disaster Mitigation & Recov.	3
Business Elective: See Remarks	6
CEE Technical Elective: See Remarks	3
<b>Credits</b>	<b>15</b>

#### REMARKS:

Curriculum for Liberal Education Remarks: Engineering students entering the university in 1999-2000 or later are required to meet the following Curriculum for Liberal Education requirements, in addition to their college and departmental requirements:

Credits	
ViEWS - met by a designated sequence of required CEM courses and ENGL 3764	6
CLE Area 2: Ideas, Cultural Traditions and Values	6
CLE Area 3: Society and Human Behavior	6
CLE Area 6: Creativity and Aesthetic Experience	1

**Business Electives** – must be taken from list shown on applicable CEM checksheet.

**CEE Technical Elective Remarks** – must satisfy departmental requirements as shown on the applicable CEE checksheet.

## Undergraduate Course Descriptions (CNST)

### 2104: INTRODUCTION TO THE CONSTRUCTION ENGINEERING AND MANAGEMENT PROFESSION

Overview of the construction engineering and management profession specialty areas. Introduction to the undergraduate program of study. Emphasis on the fundamentals of good oral and written communication skills. Professionalism, ethics and legal issues relating to the industry. Emphasis on contemporary issues facing the industry. Introduction to engineering library resources. Pre: ENGE 1114 or ENGE 1104. (2H,2C)

### 2984: SPECIAL STUDY

Variable credit course.

### 4974: INDEPENDENT STUDY

Variable credit course.

### 4984: SPECIAL STUDY

Variable credit course.

### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

## Undergraduate Course Descriptions within the CEM Major

### Building Construction (BC)

#### 3064: BUILDING SYSTEMS TECHNOLOGY LAB

Develop a competency in the application of Building Environmental Systems, through modeling, scheduling, estimating, and experiments in support of a senior capstone project. Pre: (4004 or CNST 2104), PHYS 2306. Co: 2044, 4014, CEE 3014, CEE 4074. (1H,2L,2C)

#### 4014: BUILDING SYSTEMS TECHNOLOGY II

This course places an emphasis on the physical installation and integration of passive and active environmental control systems including: heating, ventilation, air conditioning, lighting, acoustics and plumbing. Lectures by faculty and seminars by construction industry practitioners address issues that are relevant to illustrating the applications resulting from theory studied in BC 4004. CEE 4074 may be substituted for co-requisite BC 3064. Pre: (4004 or CNST 2104), PHYS 2306. Co: 3064. (2H,3L,3C)

#### 4064: CONSTRUCTION PRACTICE LAB

Application of the business and construction practices related to operation of a construction company to the execution of a senior capstone project. All project management concepts learned in prior courses are applied in the capstone lab experience. Written and oral work is formally presented and critiqued among construction faculty, students, and industry professionals. Pre: 4434. Co: 4444. (1H,2L,2C)

#### 4434: CONSTRUCTION PRACTICE I

Business and construction practices related to operation of a construction company are studied. Construction operation is examined as it relates construction, financial and personnel management. Project management topics studied in this course include permitting, site evaluations, design development and design phase considerations such as preliminary estimates and project constructability. Writing Intensive (WI) course. Pre: (4014, 3064), (2044) or (CEE 3014, CEE 4074). (3H,3C)

#### 4444: CONSTRUCTION PRACTICE II

This course explores and applies the business and construction practices related to operation of a construction company to a capstone experience. Construction operation is examined as it relates to construction, financial and personnel management. Project management topics studied in this course are applied in the corequisite lab. This course is formally designated as a writing intensive course. Formal written and edited and oral presentations are presented and critiqued by the BC faculty team, the writing resource center, students and industry professionals. Pre: 4434. Co: 4064. (3H,3L,4C)

## Civil and Environmental Engineering (CEE)

### 2804: INTRODUCTION TO CIVIL AND ENVIRONMENTAL ENGINEERING

Overview of the civil engineering profession and the undergraduate program of study. The fundamentals of good oral and written communication skills for the Civil Engineer are emphasized. An introduction to engineering library resources is also included. Pre: ENGE 1024. (3H,2C) I,II.

### 2814: CIVIL AND ENVIRONMENTAL ENGINEERING MEASUREMENTS

Introduction to various data measurement issues in civil and environmental engineering, including collection techniques, analysis, error, and statistical evaluation in all sub-disciplines. Spatial measurement topics include GPS, leveling, distance and angular measurement, mapping and topographic surveys, automated data collection, terrain models, earthwork methods, construction surveying, geodesy, and GIS. Pre: BC students required to take the BC 1224 pre-requisite, they are exempt from the co-requisite ENGE 2824. CEE students are required to take the ENGE 1114 pre-requisite. Pre: ENGE 1114 or BC 1224, (MATH 1206 or MATH 1206H), (MATH 1224 or MATH 1224H). Co: ENGE 2824. (3H,3L,4C)

### 3014: CONSTRUCTION MANAGEMENT

Fundamental elements involved in managing construction projects. Management structure, construction contracts, equipment and labor productivity, scheduling, quality assurance, and cost control. Junior standing required. (2H,3L,3C) I,II.

### 3104: INTRODUCTION TO ENVIRONMENTAL ENGINEERING

Overall view of environmental engineering with emphasis on hazardous waste management, water treatment, wastewater treatment, air pollution and its control, solid waste management, groundwater pollution and environmental regulations. A grade of C- or better required in pre-requisites CHEM 1035, 1045, 1206, and PHYS 2305. Pre: (CHEM 1035 or CHEM 1074), (CHEM 1045 or CHEM 1084), (MATH 1206 or MATH 1206H or MATH 2016), (PHYS 2305 or PHYS 2205). (3H,3C)

### 3404: THEORY OF STRUCTURES

Fundamental tools and methods of structural analysis: moment-area, slope-deflection, force, and moment-distribution methods. Influence lines. Application to beams, trusses, and simple frames. A grade of C- or better required in pre-requisite ESM 2204. I,II Pre: ESM 2204. (3H,3C)

### 3424: REINFORCED CONCRETE STRUCTURES I

Behavior and design of reinforced concrete members based on ultimate strength. Beams and slabs in flexure, shear and torsion, development of reinforcement. Columns with axial force plus bending, slenderness effects in columns. A grade of C- or better required in pre-requisite 3404. I,II Pre: 3404. (3H,3C)

### 3434: DESIGN OF STEEL STRUCTURES I

Behavior and design of structural steel members and steel-frame buildings, including simple and fixed connections. AISC specifications; elastic theory. Design members to resist tension, compression, bending, torsion; plate girders, composite beams. ESM 3054 may be taken in place of co-requisite CEE 3684. Pre: 3404. Co: 3684. (2H,3L,3C) I,II.

### 3514: INTRO TO GEOTECHNICAL ENGR

Engineering properties of soils including their descriptions and classifications, the effects of water, soil strength and compressibility. Introduction to soil stabilization, earth pressures, slope stability, and foundations. A grade of C- or better required in pre-requisites GEOS 2104 and ESM 2204. Pre: ESM 2204, (GEOS 1004 or GEOS 2104 or GEOL 1004 or GEOL 2104). (2H,2L,3C) I, II.

### 3684: CIVIL ENGINEERING MATERIALS

Characteristics of constituent materials and the design and behavior of portland cement and bituminous concrete mixtures with demonstrated laboratory experiments. Pre: CHEM 1035, CHEM 1045, ESM 2204, CEE 2814, (GEOS 2104 or GEOS 1004). (2H,3L,3C) I, II.

### 3804: COMPUTER APPLICATIONS FOR CIVIL AND ENVIRONMENTAL ENGINEERS

Introduction to computer applications in civil and environmental engineering. Integration of design, data management, computer programming and problem solving skills with computer tools and techniques. Topics include systems analysis, optimization, database management, computer programming and data structures. Junior Standing Required. (2H,2L,3C) I,II.

### 4014 (BC 4024): ESTIMATING, PRODUCTION, AND COST ENGINEERING

Interpretation of plans and specifications, preparation of construction estimates, and cost control. Methods analysis, resource requirements, and resource costs in building systems, including system components, and in large-scale civil engineering works such as highways, bridges, and hydraulic structures. A grade of C- or better required in pre-requisite 3014. I,II Pre: 3014. (3H,3C)

### 4024: CONSTRUCTION CONTROL TECHNIQUES

Techniques used to plan, schedule, and control the Construction Process. Emphasizes manual and computer-based approaches. Focuses on an analytical approach towards the construction process whereby good technical methodologies and solutions are converted to reality through construction practices. I Pre: 3014. (3H,3C)

### 4074: CONSTRUCTION ENGINEERING: MEANS AND METHODS

Construction means, methods, and equipment used to transform a particular design concept into a completed usable structure or facility. Selection and optimization of individual units as well as the systems needed to produce the required work to the required quality on time

and on budget. I Pre: 3014. (3H,3C)

#### 4554: NATURAL DISASTER MITIGATION AND RECOVERY

Causes, mechanics, classifications, and forces associated with tornadoes, hurricanes, floods, earthquakes, and landslides. Resistance evaluation for existing ground, facilities and structures. Hazard-resistant design of new facilities. Risk and reliability assessment and decision analysis. Strategies and designs for natural disaster risk mitigation. Emergency response for protection of life and property and restoration of lifelines. Includes an interdisciplinary team project. Prerequisite: Senior Standing Required (3H,3C)

#### 4804: PROFESSIONAL AND LEGAL ISSUES IN ENGINEERING

Analysis of the legal, professional, and ethical aspects of engineering practice; introduction to contract law and contract dispute resolution, professional liability, and other aspects of law relevant to engineering practice; professional registration and codes of ethics. Pre: Senior standing in engineering. (3H,3C) I,II.

## Overview

Architecture enriches our lives by offering us environments that are sensibly compelling, thought provoking, and capable of lifting our spirits. In addition to being beautiful, architecture is, by ancient definition, functional and durable. Like art, architecture is permeated by dualities. It is stable and transitory, measurable and immeasurable, and capable of both being touched and touching us. Like science, architecture involves systematic study. Its methods are iterative, experimental, and rely on intense observation. By intertwining the poetic and practical, architecture is uniquely poised to address the challenges of contemporary life and build the culture of the 21st century.

The professional curriculum in architecture requires five years of study for the first professional degree, the Bachelor of Architecture (B. Arch.).

The first professional degree programs at Virginia Tech, the five-year Bachelor of Architecture degree (B. Arch.), the Master of Architecture II (M.Arch.2), and the Master of Architecture III (M.Arch.3) degrees, are fully accredited for the current maximum six-year term of accreditation by the National Architectural Accrediting Board.

All students in the School of Architecture + Design – Architecture, Industrial Design, Interior Design and Landscape Architecture – begin their studies in a common first year foundation program. Following the foundation program, students pursue professional studies in the 2-3 and 4-5 programs.

## Foundation Design Program – First Year

The focus in the first year is basic elements of design, addressed conceptually, visually, and haptically. Studies are undertaken in two and three dimensions using a range of traditional and innovative materials and tools. Projects focus on the process of design, discovery through iteration, precision within limits, and development of aesthetic judgment, self-discipline, and a capacity for self-evaluation.

## Professional Program – Second, Third, Fourth, and Fifth Years

The Professional Program employs design theory and processes to study the design of buildings. Students conduct an interactive investigation of architectural space, environmental forces, and building technology. Foundations of discipline-specific knowledge are progressively introduced, discussed, and examined as they contribute to the complex totality of a work of architecture. Students explore natural and cultural forces as they relate to architecture through means of representation specific to the discipline. With architecture at the core, the program examines interdisciplinary sources such as art, science, and philosophy for the purpose of establishing the content the discipline shares with other forms of knowledge.

Concepts in the Professional Program are communicated through both traditional drawings and models, as well as through modern virtual tools and digital production. All coursework seeks to develop the ability to conduct a professional written and verbal discourse. Further emphasis is placed on intellectual discipline, constructive dialogue, assertion of interest, and a self-motivated search for critical issues.

The **second year** is characterized by an increase in the complexity of design exercises to foster a better understanding of the interplay between situation, time and desired spatial definition. Architectural constructs of smaller scales build on knowledge of basic design principles studied in the first year. The laboratory discourse focuses on principal elements of architecture and their compositional and material role in space. Architecture as the art of building is conveyed through the detailed study of exemplary built works.

The **third year** provides for study of fundamental design principles, technical concepts and their applications, including measures of quality in architecture. The instructional content of this year articulates and communicates to students the unique nature of architecture through the study of interrelationships of material, construction systems, site, and building programs. The Architecture III design laboratory guides the student's growing experience with practical design problems and provides order to the gradual exploration and learning of the nature and means of achieving architecture. Associated with Architecture III are lectures, presentations, and workshops intended to challenge students toward sensible integration of necessary systems and legal responsibilities in the design and construction of buildings.

The **fourth year** builds on the increased comprehension of building systems acquired during the third year. On-campus or off-campus, the aim of the various program options is to promote an in-depth understanding of the relationship between architectural idea and physical building form. On-campus students are offered studio courses with various focus topics. Off-campus options include several VT and non-VT Study Abroad Programs, the Extern Program, the Washington-Alexandria Center, or the Chicago Studio.

Off-campus programs directed by the Virginia Tech School of Architecture + Design include:

- *The Europe Study Abroad Fall Travel Program* studies seminal European historic and contemporary architectural works and urban spaces, which are visited and documented with analytical drawings, sketches, and photographs, supplemented by on-site lectures by architects and professionals. Documented research before and after the program leads students to greater depth of understanding of the issues surrounding the architecture.
- *The CESA Residency Program*: Each semester, 16 architecture students take part in this program at Virginia Tech's Center for European Studies and Architecture (CESA) in Riva San Vitale, Switzerland. An 18th century villa and its gardens on the southern tip of Lake Lugano provide residence and dining facilities for Architecture + Design students, as well as 30 Virginia Tech students from other academic disciplines. Studio work, courses, research, and travel are directed to advance first-hand knowledge of the architecture, geography, and culture of Europe.
- *The Chicago Studio*: Hosted by significant architecture firms in downtown Chicago, this 4th-year off-campus semester seeks to integrate education and practice in a direct way. Its distinctive structure and curriculum is centered around urban focused studio and course work, with direct input from the profession. Site visits in the Chicago metropolitan area and the lectures and events of the active architecture culture of Chicago contribute significantly to this program.
- *Professional Extern Program* allows students to spend one semester in an approved professional setting and receive up to 12 hours of academic credit. This program provides a valuable link between the academic environment and architectural practices, discipline-related government agencies, and other design offices throughout the world.
- *The Washington-Alexandria Architecture Center* affords students from the School of Architecture + Design and from related College disciplines the opportunity to study with students and faculty from a national and international consortium of schools in the historic urban context of Old Town Alexandria. The Center complex offers studio space, classrooms, exhibition and review spaces, shops, and computer labs for the students and faculty of the consortium. The University also offers a limited number of apartments for students studying at the Center.

In the **fifth year**, students conduct a year-long advanced study with individual faculty advisors. The in-depth engagement with research, theory, and design is intended to broaden a student's expertise in a particular area within the field of architecture. Fifth-year students are expected to formulate and accomplish advanced high-level work in the form of a terminal project. Working with their advisors, students develop and discuss their research and design progress, and have periodic formal peer reviews throughout the year. Students are required to leave the project documentation of their 5th-year work with the school upon graduation.

The first professional degree programs (B.Arch., M.Arch.2 & M.Arch.3) in architecture are accredited by the National Architectural Accrediting Board (NAAB).

- In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.
- Doctor of Architecture and Master of Architecture degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.
- Next accreditation visit for all programs: 2012

The four-year, pre-professional degree is not offered at Virginia Tech.

## Bachelor of Architecture Program Requirements

<b>Required Curriculum for Liberal Education Courses</b>	<b>33 credits</b>
English 1105-1106; First-Year Writing: Writing and Discourse	6
Math 1535-1536; Geometry of Mathematics and Design	6
Society and Human Behavior Option (Social Sciences)	6
Scientific Reasoning and Discovery Option (Lab Science)	6
Ideas, Cultural Traditions and Values Option (Humanities)	6
Creative and Aesthetic Experience (satisfied by Arch 1015)	
Critical Issues in a Global Context	3
<b>Required Foundation Program Courses</b>	<b>12 credits</b>
Arch 1015, 1016; Foundation Design Lab (1st year)	12
<b>Required Professional Program Courses</b>	<b>91 credits</b>
Arch 2015, 2016: Architecture II (2nd year)	12
Arch 2034: The Art of Building (2nd year)	2
ESM 3704, Basic Principles of Structures (2nd year)	3
Arch 3115, 3116: History of Architecture (2nd year)	6
Arch 3015, 3016: Architecture III (3rd year)	12
Arch 3045, 3046: Building Assemblies (3rd year)	4
Arch 3054: Building Analysis (3rd year)	2
Arch 4015, 4016: Architecture IV (4th year studio)	14
Arch 4055, 4056: Environment and Building Systems (3rd year)	6
Arch 4075: Building Structures I (2nd year)	3
Arch 4076: Building Structures II (3rd year)	3
Arch 4034: Building Cities (4th year)	3
Arch 4044: Professional Practice (4th or 5th year)	3
Arch 4515: Architecture V (5th year studio)	9
Arch 4516: Architecture V (5th year studio)	6
Arch 4524: Thesis Documentation (5th year)	3
<b>Professional Elective Courses</b>	<b>6 credits</b>
<i>To be selected from an approved list of courses supplied by the school</i>	
Free Electives or additional Professional Electives	14
<b>Total required for B.Arch.</b>	<b>156 credits</b>

## Satisfactory Progress

In addition to the university requirements, upon completion of the second year in the program, students must have completed: Arch 1015-1016, Arch 2015-2016, Arch 2034, Arch 2044, ESM 3704, Arch 4075, Arch 3115-3116, with a minimum in-major grade point average of 2.00

or above.

## Graduation Requirements

Upon successful completion of program requirements of the foundation level of study and the professional levels of study in architecture and with completion of 156 credit hours of study, a first professional degree of Bachelor of Architecture is awarded.

### TOP

## Course Descriptions (ARCH)

### 1014: INTRODUCTION TO ARCHITECTURE: LESSONS IN FORM & CULTURE

Introduction to the discipline of architecture for non-architecture majors. Emphasis on the basic elements of design and the relationships of a culture to the forms, shapes, and structures it expresses in architectural production. (3H,3C)

### 1015-1016: FOUNDATION DESIGN LABORATORY

Introduction to the discipline of architecture. Focus on basic elements of design, addressed visually, conceptually, and haptically. Studies undertaken in two and three dimensions using various materials and tools. Inquiry into the process of design, discovering, through experiment, methods of working that develop aesthetic judgment and means of self-evaluation. Emphasis on intellectual discipline, dialogue, assertion of interest, and a self-motivated search for critical issues. (2H,12L,6C)

### 2015-2016: ARCHITECTURE II

Introduction to the discipline of architecture, isolating and intertwining fundamentals that contribute to the complex totality that constitute a work of architecture. Explores how architecture concentrates and conveys natural and cultural forces through means specific to the discipline. Focus on fundamentals realized artistically and practically in works by selected architects. Articulates the unique reality of architecture through the study of basic interrelationships of material, construction, site, and program. Introduces the complex interplay of situation, space and time in the making of places. Examines interdisciplinary sources such as art, science, and philosophy for the purpose of establishing the content architecture shares with other forms of knowledge and how that content, expressed through architecture, contributes to human well-being. Concepts communicated through drawings and models. Emphasis on intellectual discipline, dialogue, assertion of interest, and a self-motivated search for critical issues. Pre: 1016. (2H,12L,6C)

### 2034: THE ART OF BUILDING

Lecture/seminar introduction to the discipline of architecture, isolating and intertwining fundamentals that contribute to the complex totality that constitute a work of architecture. Explores how architecture concentrates and conveys natural and cultural forces through means specific to the discipline. Focus on fundamentals realized artistically and practically in works by selected architects. Articulates the unique reality of architecture through the study of basic interrelationships of material, construction, site, and program. Introduces the complex interplay of science and philosophy for the purpose of establishing the content architecture shares with other forms of knowledge and how that content, expressed through architecture, contributes to human well-being. Co: 2016. (2H,2C)

### 2044: BUILDING MATERIALS

Introduction to the attributes of materials with which buildings are built such as masonry, reinforced concrete, steel, stone, timber, glass and insulation; introduction of the impact of soil, vegetation, watersheds and other natural conditions on buildings and their material fabrication. Pre: 1015. (2H,2C)

### 2974: INDEPENDENT STUDY

Variable credit course.

### 2984: SPECIAL STUDY

Variable credit course.

### 3015-3016: ARCHITECTURE III

First design laboratory for the Professional Program in Architecture. Provides for exploratory investigation and analysis of the fundamental design principles, technical concepts and applications, and the measures of quality in architecture. Co: 3045 for 3015; 3054, 3046 for 3016. (1H,12L,6C)

### 3045-3046: BUILDING ASSEMBLIES

The designs of building assemblies, elements, systems and sub-assemblies are studied. Building assemblies as controlled by formal idea, geometry, construction, materials, details, structure, function, enclosure, and finish work are considered. Pre: 2016. Co: 3015 for 3045; 3054, 3016 for 3046. (2H,2C)

### 3054: BUILDING ANALYSIS

Study of exemplary built works of architecture through analysis of design documents, interviews, and inspection of actual construction. Course is completed as a group project resulting in both an oral presentation and a written document. Pre: 3015. Co: 3046, 3016. (2H,2C)

### 3115,3116: HISTORY OF ARCHITECTURE

A review of world architecture, predominantly but not exclusively with reference to Occidental building art. The study of principles concepts and representations of buildings and structures from the 4,000 BC to the present through reading, drawing, and writing are important aspects of the course. Pre: 1016 for 3115; 3115 for 3116. (3H,3C)

### 3514: DESIGN-RELATED MEDIA

Properties and uses of various media, materials and processes as tools for analysis, documentation and presentation of the designed environment. Basic skills and techniques relating to photography, printmaking, and pottery will be explored. Repeatable with a maximum of 6 credits. (3H,3C)

#### 3900: CESA CONSORTIUM

College of Architecture and Urban Studies Consortium agreement with peer institutions of higher education. Center for European Studies location only. No academic credit. Special fees apply. (0C)

#### 3954: STUDIO-STUDY ABROAD

The Europe Studio offers students the opportunity to make comparative studies of European cultures, as well as to study the relationship of culture to the physical environment, the organization of cities, and the history and behavior of their inhabitants. Exercises include analysis and documentation of elements of the physical environment, exploration of the interface between buildings and the fabric of the existing city, and examination of the professional community's reactions to urban design solutions. X-grade allowed. (\*H,6C)

#### 3974: INDEPENDENT STUDY

Variable credit course.

#### 3984: SPECIAL STUDY

Variable credit course. X-grade allowed.

#### 4015-4016: ARCHITECTURE IV

Design laboratory in conjunction with alternative studies in one of the College's off-campus centers. Focus on the evaluation of skills developed in the third year professional studies and emphasis toward individualized topical areas of study leading to the development of a thesis project. X-grade allowed. Pre: 3016 for 4015; 4015 for 4016. (2H,12L,7C)

#### 4034: BUILDING CITIES

Analytical studies in the historical evolution of cities, towns and villages. Comparative studies of urban form in relation to their constructive and imaginative means with an emphasis on modern construction processes. Specific case studies in designing and building cities. Co: 4016. (3H,3C)

#### 4044 (LAR 4124): PROFESSIONAL PRACTICE

Introduction to scope and diversity of the building enterprise, addressing private and public macroeconomic, industrial, technical, professional, and regulatory institutions. Analysis of historic evaluation of professional roles and practices; emergence of new modes of practice, including innovative facilities procurement methods. (3H,3C)

#### 4055,4056: ENVIRONMENT AND BUILDING SYSTEMS

A design oriented study of environmental forces, environmental impacts of the built environment, and related building environmental control, life safety and service systems, with concern for the human psycho-physical impacts of building form and systems performance. (3H,3C)

#### 4075-4076: BUILDING STRUCTURES

Building structures in steel, timber, and reinforced concrete; design of typical components: beams, slabs, columns, beam-columns, connections, and foundations; design of retaining walls; the resistance of buildings to gravity and lateral force action; building stability; floor/roof framing systems; design of simple buildings. Pre: ESM 3704. (3H,3C)

#### 4114: IDEAS, CONCEPTS, AND REPRESENTATIONS OF ARCHITECTURE

Survey of ideas, concepts, and representations that have shaped architecture. Particular emphasis is given to ideational constructs and how they have been adapted in the projecting of buildings. Pre: 3016. (2H,2C)

#### 4144: ADVANCED BUILDING STRUCTURES I

Study of long-span building structures. Introduction to geometry, form, and structure of folded and bent surfaces. Study of space grid geometry, close-packing systems, and cellular tensegrity. Approximate design of folded plate structures, single and double curvature shells, single and double layer space frames, suspension roofs, tents, and pneumatic structures. Pre: 4075, 4076. (3H,3C)

#### 4154: ADVANCED BUILDING STRUCTURES II

Study of highrise structures ranging from building slabs and blocks, terraced buildings, and skyscrapers to towers. The complexity of load action including wind, earthquake, and hidden loads. The effect of building height, form, and proportion on force action; considerations of stability and redundancy. Preliminary design of masonry buildings, core structures, suspension buildings, braced skeletons, rigid frames, interstitial systems, staggered truss buildings, tubes and hybrid structures. Pre: 4075, 4076. (3H,3C)

#### 4164: COMPUTER APPLICATIONS IN DESIGN

Computer system fundamentals. Very brief introduction to assembly programming. Programming in a high level language. Construction of a simple text editor. Construction of a simple relational file. Computer graphics fundamentals. Geometric transformations. 3-space geometry and projections. (3H,3C)

#### 4204: URBAN TECHNOLOGY AND ARCHITECTURE

Architecture as determinant of urban spaces and urban form; perceptual, morphological, and typological characteristics of urban spaces as expressions of social values, ideals, and technological innovation. Theoretical models of technological, function, environmental, and social determinants of urban configurations are related to their cultural and historic precedents. X-grade allowed. (3H,3C)

#### 4214: TOPICS IN ARCHITECTURE HISTORY AND THEORY

Topics in the history of architecture and theory, predominantly with reference to the Western World. Special emphasis on methods of analysis and interpretation. Repeatable with a maximum of 9C. X-grade allowed. Pre: 3115, 3116. (3H,3C)

#### 4304: TOPICS IN DESIGN METHODS

Topics in systematic methods of design and the nature of the design process including application of creative techniques, analogous thinking, analytic methods, computer-aided procedures, and information handling in design. Repeatable with a maximum of 6 credits. X-grade allowed. (3H,3C)

#### 4414: ADVANCED ENVIRONMENT BUILDING SYSTEMS

Advanced studies of environment and building systems, including development in building systems, urban systems, service systems, construction systems, materials and component systems, psycho-physical considerations, systems analysis, and computer technology. May be repeated for a maximum of 9 credit hours in varied options offered. X-grade allowed. Pre: 4055, 4056. (2H,3L,3C)

#### 4515-4516: ARCHITECTURE III: DESIGN AND ALLIED STUDIES

Advanced independent architectural research requiring articulation of a conceptual and professional position. This position is realized in a terminal thesis project completed in the second semester of the fifth year. X-grade allowed. Pre: 4016 for 4515; 4515 for 4516. 4515: (2H,20L,9C) 4516: (2H,16L,6C)

#### 4524: THESIS DOCUMENTATION

During the second semester of the fifth year, the student takes a required three hour thesis documentation course where their conceptual and professional position is defined and tested by the documentation of the terminal architectural project. Pre: 4515. Co: 4516. (3H,3C)

#### 4654 (UAP 4654): URBANIZATION AND URBANISM IN EUROPE

This course is designed to provide an introduction to European urbanization for students who intend to pursue a study abroad program in Europe, or who have already done so. The course adopts a comparative approach to cities, urban form and urban living, and an understanding of urbanization processes, including urban design and planning, in different parts of Europe. Pre: UAP 2014 or ARCH 2016. (3H,3C)

#### 4705-4706: QUALIFYING DESIGN SEMINAR

Exploratory overview of selected theories and issues relevant to the design and use of the environment. 4705: Emphasis on history, human behavior, and environmental context as it relates to architecture. 4706: Presentation and discussion of the nature of principal construction materials in relation to building design. Characteristics of primary structural materials: wood, steel, concrete, masonry; environmental control systems; supporting technologies. Not for credit for majors holding a first professional degree in architecture. (3H,3C)

#### 4715-4716: QUALIFYING DESIGN LABORATORY

4715: Design laboratory in which student and faculty teams explore the nature of problems and potentials with which architecture is concerned, and experimentally develop methods and process through which existing contexts are transformed into new conditions. 4716: Provides introduction to basic concepts of building structures, materials, and enclosure systems, and appropriate site and climate responses. Not for credit for majors holding a first professional degree in architecture. X-grade allowed. (3H,18L,9C)

#### 4755-4756: BUILDING ENVIRONMENTAL SYSTEMS

This sequence concentrates on defining different intervention techniques available to the architect to articulate the relationship between the outside and inside environment of buildings. These intervention techniques strive towards a fit between built form and the thermal, luminous, sonic, and water/waste environment. Pre: 4706. (3H,3C)

#### 4775-4776: BUILDING STRUCTURES

Building structures in steel, timber, and reinforced concrete; design of typical components: beams, slabs, columns, beam-columns, connections, and foundations; design of retaining walls; the resistance of buildings to gravity and lateral force action; building stability; floor/roof framing systems; design of simple buildings. Pre: ESM 3704 for 4775; 4775 for 4776. (3H,3C)

#### 4904: PROFESSIONAL STUDIES

Pass/Fail only. X-grade allowed. (1H,1C)

#### 4974: INDEPENDENT STUDY

Variable credit course. X-grade allowed.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

## Overview

As described by the Industrial Designers Society of America, "Industrial Design (ID) is the professional service of creating and developing concepts and specifications that optimize the function, value and appearance of products and systems for the mutual benefit of both user and manufacturer.

Industrial designers develop these concepts and specifications through collection, analysis and synthesis of data guided by the special requirements of the users, client and manufacturer. They are trained to prepare clear and concise recommendations through drawings, models and verbal descriptions.

Industrial design services are often provided within the context of cooperative working relationships with other members of a development group. Typical groups include management, marketing, engineering and manufacturing specialists. The industrial designer expresses concepts that embody all relevant design criteria determined by the group.

The industrial designer's unique contribution places emphasis on those aspects of the product or system that relate most directly to human characteristics, needs and interests. This contribution requires specialized understanding of visual, tactile, safety and convenience criteria, with concern for the user. Education and experience in anticipating psychological, physiological and sociological factors that influence and are perceived by the user are essential industrial design resources."

The internationally recognized program at Virginia Tech, fully accredited by the National Association of Schools of Art and Design, prepares individuals to enter this dynamic field through a rigorous curriculum and an experienced, dedicated faculty.

## Program Requirements

Required Curriculum for Liberal Education Courses	33 credits
English 1105-1106: First-Year Writing Writing and Discourse	6
Math 1535-1536: Geometry and Mathematics of Design	6
Society and Human Behavior Option (Social Sciences)	6
Scientific Reasoning and Discovery (Lab Science)	6

Ideas Cultural Traditions and Values Option (Humanities). Satisfied by ARCH 3115, 3116 or ART 2385, 2386.	6
Creative and Aesthetic Experience (satisfied by Arch 1015)	
Critical Issues in a Global Context	3
<b>Required Industrial Design and Architecture Courses</b>	
<b>First Year:</b>	
Arch 1015-1016: Foundation Design Laboratory (1st year)	12
<b>Second Year:</b>	
IDS 2015-2016 Industrial Design Lab II	11
IDS 3224: Design Competencies Workshop	1
IDS 2065 Design Visualization	2
IDS 2066 Design Visualization	2
IDS 2044 Human Factors	3
IDS 2304 Computer Aided Industrial Design	3
IDS 2114 History/Theory Industrial Design	3
IDS 2124 Hist/Theory of ID-Designers	3
ARCH 3115 - 3116: History of Architecture or ART 2385 - 2386: Survey of Western Art History	6
<b>Third Year:</b>	
IDS 3015-3016 Industrial Design Lab III	12
IDS 2034 Materials and Processes	3
IDS 3514: Design Research (3rd year)	3
IDS 3204: Topics in Professional Development, IDS 3224: Design Competencies, or IDS 3234: Design Theory	2
<b>Fourth Year:</b>	
Arch 3514: Design Related Media	3
IDS 4015-4016 Industrial Design Lab IV	12
IDS 4044 Professional Practice & Entrepreneurship	2
IDS 3204: Topics in Professional Development, IDS 3224: Design Competencies, or IDS 3234: Design Theory	2
<b>Professional Elective Courses</b>	<b>6</b>
To be selected from an approved list of courses supplied by the school	
<b>Free Electives</b>	<b>6</b>
Can be taken at any time allowed in the student's program of study	
<b>Total credit hours required for B.S.</b>	<b>124</b>

## Minor in Industrial Design

Please visit the School of Architecture + Design website to view the current requirements for the Industrial Design Minor at <http://archdesign.vt.edu/industrial-design/minor>.

## Course Descriptions (IDS)

### 2015-2016: INDUSTRIAL DESIGN LABORATORY II

Introduction to the discipline of Industrial Design. Emphasis on form generation, including: design theory, problem solving methodologies, conceptualization of ideas, and aesthetic sensibility. Secondary emphasis on skill development in 2 and 3 dimensions: awareness of materials and manufacturing processes, storyboarding, model making, written documentation of design process, and verbal presentation. IDS 2015 is taught in conjunction with IDS 3224: Topics in Design Competencies: Workshop and IDS 2065: Visual Design. Pre: ARCH 1016 for 2015; 2015 for 2016. 2015: (3H,7L,5C) 2016: (3H,9L,6C)

### 2034: MATERIALS AND PROCESSES

A survey of current materials, processes, techniques and equipment used in the design of products for mass production. (3H,3C)

### 2044: HUMAN FACTORS

This course examines human factors as it informs the design process, and as a tool to maximize the physical and psychological aspects of design

toward the establishment of a human centered design. Frameworks of industrial design philosophy, research methods, standards and data, human issues, cultural context, and design outcomes. Pre: ARCH 1016. (3H,3C)

#### 2065-2066: DESIGN VISUALIZATION

An introduction to two-dimensional modes of representation. Emphasis is placed on the development of drawing skills to facilitate documentation, analysis and presentation in the design process. Pre: ARCH 1016 for 2065; 2065 for 2066. (2H,2C)

#### 2114: HISTORY AND THEORY OF INDUSTRIAL DESIGN

The aesthetics and useful function of objects of industrial production. This class is based upon the concept that the values, ideals, and aspirations of a culture are expressed in material objects and a thorough knowledge of the history of the profession is essential to understand one's own particular circumstance and time. (3H,3C)

#### 2124: HISTORY AND THEORY OF INDUSTRIAL DESIGN-DESIGNERS

The study of individual designers and how their values, ideals, and aspirations influence the evolution of design. (3H,3C)

#### 2214: IDS STUDIO FOR MINORS

Introduction to the discipline and the critical elements that contribute to the complexity of a work of design. Emphasis on intellectual discipline, skills development, communication of ideas, materials research, and a self-motivated search for critical issues. For registered Industrial Design Minors only. (3H,9L,6C)

#### 2304: COMPUTER AIDED INDUSTRIAL DESIGN

An introduction to computer aided two and three- dimensional design and modeling as applied in industrial design using both solid and surface software modeling techniques. Pre: ARCH 1016. (3H,3C)

#### 2974: INDEPENDENT STUDY

Variable credit course.

#### 2984: SPECIAL STUDY

Variable credit course.

#### 3015-3016: INDUSTRIAL DESIGN LABORATORY III

Introduction to systematic processes in design. Introduction and application of Human Factors and systematic planning methods in the development of industrial products in the areas of work, education and health. Development of professional presentation skills and methods. Pre: 2016 for 3015; 3015 for 3016. (3H,9L,6C)

#### 3204: TOPICS IN PROF DEVELOPMENT

Issues of practicing in an industrial design professional environment: public speaking, portfolio presentation, client/civic engagement (service learning), interdisciplinary teamwork and leadership in the development process of industrial products. Repeatable with instructor permission. Variable credit and duration. Variable credit course.

#### 3214: IDS SUMMER STUDIO

Design Laboratory for industrial design. Introduction to systematic processes in design. Application of Human Factors and systematic planning methods in the development of industrial products in the areas of work, education and health. Development of professional presentation skills and methods. For industrial design majors only. Faculty permission required. (3H,9L,6C)

#### 3224: TOPICS IN DESIGN COMPETENCIES

Issues of industrial design competencies and expertise required in a professional design environment, for example: software; model making (both hand making and digital rapid prototyping); workshop (wood, metal and plastics); specialized product design areas (packaging, furniture or exhibit design). Repeatable with instructor permission Variable credit and duration. Variable credit course.

#### 3234: TOPICS IN DESIGN THEORY

Issues of industrial design theory required for advancement in a professional design environment, for example: Product Semantics; Design Ethics; EcoDesign/Sustainability; Universal Design. Repeatable with instructor permission. Variable credit and duration. Variable credit course.

#### 3514: DESIGN RESEARCH

The course looks at the question of research and the ongoing exercise of re-definition for designers using examples of current design research corporations. Pre: 2016. (3H,3C)

#### 4015-4016: INDUSTRIAL DESIGN LABORATORY IV

Detailed analysis, research and application of human factors to the design of equipment, work spaces and environments. Design and construction of full scale, interactive models and spaces. Introduction to group activities. Emphasis on the needs, the production and marketing factors of special populations, such as the elderly and disabled. Pre: 3016 for 4015; 4015 for 4016. (3H,9L,6C)

#### 4044: PROFESSIONAL PRACTICE AND ENTREPRENEURSHIP

Focus on assembling multidisciplinary teams to engage in the process of bringing a product to market, building a business around a core competency in design, the structure of a design office, and the development and protections of intellectual property. Pre-requisite: Senior standing or permission of instructor. Pre: 2015. (2H,2C)

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

- [Course Descriptions](#)

## Overview

The interior design program at Virginia Tech is dedicated to improving quality of life through design excellence, professionalism, and public service. With a curriculum that equally respects the importance of creative skill, history, building technology, ethics, innovation, and business practice, our graduates have the ability and confidence needed to immediately contribute to the profession.

Students in the interior program begin their studies in the foundation design laboratory during the first two semesters with architecture, landscape architecture and industrial design students. From the beginning, both an independent and team approach to design solutions is encouraged.

In their professional studies students are challenged to think critically in their design of space and to develop solutions that not only enhance quality of life, but also protect the health, safety, and welfare of users as prescribed in the various codes and regulations that govern the work of interior designers. This philosophy is the core of our program. It establishes a foundation upon which each student graduates with creative ingenuity and professional responsibility.

Our CIDA accredited program prepares future designers for licensure and practice. A degree from a CIDA accredited program is increasingly important as a requirement for professional certification and licensing of Interior Designers in the United States. Graduating from a CIDA accredited program is the first step in a three-part process in achieving certification or licensing as an interior designer in various states. The last two steps are to complete two years of assistantship as an interior designer and then passing the National Council for Interior Design Qualification (NCIDQ) examination. A CIDA accredited degree, work experience and passing the NCIDQ exam satisfy the requirements in Virginia for recognition as a "Certified Interior Designer."

### Required:

ARCH 1015: Foundation Design Lab	6
ARCH 1016: Foundation Design Lab	6
ENGL 1105: Freshman English	3
ENGL 1106: Freshman English	3
Math 1535: Geometry and Mathematics of Design	3
Math 1536: Geometry and Mathematics of Design	3
ITDS 1114: Design Appreciation	3
ITDS 2044: Interior Design I	6
ITDS 2134: Materials and Methods in Interior Design	3

ITDS 3126: History in Interior Design	3
ITDS 3175: Building Systems for Interior Design	3
ITDS 3176: Building Systems for Interior Design	3
ITDS 3184: Construction Documents for Interior Design	3
ITDS 3954: Study Abroad or additional professional elective	3
ITDS 4044: Interior Design V	6
ITDS 4054: Interior Design VI	6
ITDS 4554: Contemporary Issues in Interior Design	3
<b>Professional Elective Course:</b>	9
<b>Curriculum for Liberal Education Requirements:</b>	21
<b>Free Elective:</b>	9
<b>Total Required for B.S. in Interior Design</b>	120 credits

### Satisfactory Progress

Students must maintain a 2.5 minimum GPA in ITDS courses for satisfactory progress toward the degree. If a student's GPA drops below 2.5 in ITDS courses, courses with a grade below 2.5 must be repeated to elevate the GPA to 2.5 before continuing in the degree. A minimum 2.5 GPA in ITDS courses is required for graduation.

### Course Descriptions (ITDS)

#### 1114: DESIGN APPRECIATION

Introduction to fundamental design concepts, design methods and the history of design. Examples drawn from architecture, interior design, industrial design, graphic design as well as vernacular craft and design traditions. Key concepts from art, literature and philosophy are discussed in relation to design theory. (3H,3C)

#### 1124: DESIGN DRAWING

Drafting of floor plans, elevations, sections, and other orthographic drawings; measured perspective and black and white rendering. (6L,3C)

#### 2044: INTERIOR DESIGN I

Exploration and development of interior spaces emphasizing spatial volume and presentation techniques. Pre: ARCH 1016. (1H,12L,6C)

#### 2054: INTERIOR DESIGN II

Spatial relationships continue as a priority from ITDS 2044. Programs of required spaces are introduced in design projects along with issues of human behavior and perception. Pre: 2044. (1H,12L,6C)

#### 2134: MATERIALS AND METHODS IN INTERIOR DESIGN

Properties and appropriate use of materials in design and construction of building interiors. Floor, wall, and ceiling materials, and materials used in furnishings and equipment are included. Special attention is given to the health effects and environmental impact of material choices in interior design. (3H,3C)

#### 2144: SECOND YEAR ID STUDIO

Focus on application of elements and principles of design to interior environments. Introduction to programming, space planning, human environmental interaction, and construction drawings in interior design. Pre: 2114, 1124, 1106. (1H,4L,3C)

#### 2224: INTERIOR DESIGN GRAPHIC COMMUNICATION

Exploration and development of advanced presentation techniques appropriate for communicating interior design concepts. Special attention is given to utilizing digital media as support for visual and verbal communication. Pre: 2114. Co: 2144. (6L,3C)

#### 2984: SPECIAL STUDY

Variable credit course.

#### 3044: INTERIOR DESIGN III

Exploration and development of interior spaces emphasizing residential and mixed-use developments. Pre: 2054. (1H,12L,6C)

#### 3054: INTERIOR DESIGN IV

Design process, space planning and code compliance with advanced understanding of appropriate concepts for integrating furniture, fixtures, equipment and finish materials in design solutions. Communication and collaboration are emphasised. Pre: 3044. (1H,12L,6C)

#### 3114: FURNITURE DESIGN

The design of case furniture, millwork, and soft goods stressing materials, methods of construction, and ergonomic considerations in design. Pre: 1124, 2114, 2124. (6L,3C)

#### 3124: INTERIORS

Introduction to commercial and institutional space planning. Advanced residential space planning and specifications. Pre: 2114. (1H,4L,3C)

**3125,3126: HISTORY IN INTERIOR DESIGN**

Surveys of significant developments in the design of interiors and furniture of western civilization. 3125: 3000 BC through the 19th century European. 3126: Colonial America through the 20th century modern design. University Core Area II required. (3H,3C)

**3154: DESIGN STUDIO - FIBERART**

Structural and applied design experience using fibers and fabrics. Techniques will include simple and complex weaving techniques. Pre: 1114. (1H,4L,3C)

**3175-3176: BUILDING SYSTEMS FOR INTERIOR DESIGN**

Overview of building systems as they relate to the design of building interiors. Pre: 2044. (3H,3C)

**3184: CONSTRUCTION DOCUMENTS FOR INTERIOR DESIGN**

An overview of construction documents: drawings and specifications. Development of a set of construction documents for a small commercial interior. (3H,3C)

**3954: STUDY ABROAD-INTERIOR DESIGN**

Variable credit course.

**4044: INTERIOR DESIGN V**

Exploration and development of interior spaces emphasizing various commercial project types. Pre: 3184, 3044. (1H,12L,6C)

**4054: INTERIOR DESIGN VI**

Capstone studio for students to demonstrate research skills, design excellence and technical proficiency in interior design. Pre: 4044. (1H,12L,6C)

**4114: SUSTAINABLE DESIGN AND LEED**

Theoretical approaches to sustainable design as a context for the LEED Green Building Rating Systems. Biophilia, biomimicry, cradle to cradle, and other emerging ways of addressing environmental sustainability are presented. The pre-requisite ITDS 3175 may be waived with instructor's permission. Pre: 3175. (3H,3C)

**4144: ADVANCED COMPUTER-AIDED DESIGN (CAD) STUDIO**

Interior design studio with emphasis on computer modeling, rendering, and animation. Pre: 3144. (6L,3C)

**4554: CONTEMPORARY INTERIOR DESIGN PRACTICE**

Study of social, economic, political, and technological issues that influence contemporary interior design practice. Pre: 3126. (3H,3C)

**4964: FIELD STUDY**

Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

## Overview

Landscape Architecture encompasses the design, analysis, planning, management, and stewardship of sustainable environments. Landscape architects design across a wide spectrum of project scales: garden, community, urban, metropolitan, and regional, as well as at the scale of watersheds and natural systems. The work of the profession is grounded in the natural and social sciences, draws inspiration from nature and the arts, and is implemented through innovative site engineering, construction, land management, and environmental technologies. The professional curriculum emphasizes theoretical and applied approaches to design, and encourages exploration, creativity and collaboration with allied disciplines and the sciences. Students are educated to be independent thinkers and often work with communities addressing contemporary issues on actual sites. The studio sequence culminates in a year-long capstone project developed with a faculty advisor. Students entering the field should be creative, have an inquiring mind, and be willing to learn by doing.

The core of the academic program is a rigorous sequence of design studios that allow students to explore a broad range of landscape architectural issues, contexts, and project types. Studios are accompanied by discussion, lecture, and laboratory courses that provide systematic and comprehensive coverage of the emerging body of knowledge related to technology, design theory, landscape ecology, and human/environment interaction. Off-campus options include a Europe summer travel studio, study at the Washington Alexandria Architecture Center, Tongji University in Shanghai, or University College, Dublin, Ireland, an independent semester abroad and professional internships.

The Bachelor of Landscape Architecture (B.L.A.) is a five year first-professional degree program fully accredited by the Landscape Architecture Accreditation Board of the American Society of Landscape Architects. Graduates have a wide range of employment and professional opportunities including work in private practice, multidisciplinary firms, public agencies and municipalities, non-government organizations and non-profits.

<b>Program Requirements</b>	<b>Credits</b>
<i>Curriculum for Liberal Education:</i>	
Area 1: ENGL 1105, 1106 Freshman English	6
Area 2: Ideas, Cultural Traditions & Values LAR 4034 Evolution of American Landscape (required)	6
Area 3: Society and Human Behavior	6
Area 4: Scientific Reasoning and Discovery (no labs required)  GEOS 1004 Physical Geology (required)	6
Area 5: Math 1535, 1536 Geometry and Math of Design	6
Area 6: Creativity and Aesthetic Experience – met by ARCH 1015 Foundation Design Laboratory	1
Area 7: Critical Issues in a Global Context	3
<i>The Program Core:</i>	

ARCH 1015, 1016: Foundation Design Laboratory	12
LAR 1254 Environment and Natural Systems	3
LAR 1264 Seeing, Understanding, Representing Landscape	3
LAR 2015, 2016 LAR Design Studio: Place and Process	12
LAR 2164 Landform Function and Aesthetics	4
LAR 2254 Social and Cultural Landscapes	3
LAR 3015, 3016 LAR Design Studio: Site, Program and Community	12
LAR 3044 Land Analysis	3
LAR 3154 Watershed Sensitive Design	4
LAR 3164 Materials, Structures, Details	4
LAR 3264 People, Community, Place	3
LAR 4014 Design and Construction Documents	6
LAR 4034 Evolution of the American Landscape	3
LAR 4084 Landscape Design and Planning Studio	12
LAR 4094: Senior Project	9-12
LAR 4124: Professional Practice	3
LAR 4254 Theories of Landscape Architecture	3
<i>Additional Requirements:</i>	
Earth Science Cluster	3
Plant Science Cluster	6
Free Electives	15
<b>Total Credits</b>	<b>(153)</b>

## Satisfactory Progress

All students must achieve a minimum 2.00 GPA by the end of the semester in which the 50th credit hour has been attempted. All students must achieve a C- or higher grade in all required landscape architecture design lab/studios and technology courses.

## Graduation Requirements

Upon successful completion of program requirements and with completion of 153 credit hours of study, a Bachelor of Landscape Architecture degree is awarded.

## Undergraduate Courses (LAR)

### 1015-1016: DESIGN FOUNDATION LABORATORY

Laboratory and seminars in which students and faculty explore the nature of problems with which landscape architecture and the built environment are concerned. Students experimentally develop design methods for structuring concepts and forms that respond to identified issues. Restricted to landscape architecture majors or by consent of instructor. (1H,12L,6C)

### 1144: INTRODUCTION TO LANDSCAPE ARCHITECTURE

Overview of the profession of landscape architecture. Emphasis on the relation of people to the natural and built environment with particular attention to scale, forms, and space. (1H,1C) I,II.

### 1254: ENVIRONMENT & NATURAL SYSTEMS

Introduction to the environment and natural systems with emphasis on their relationship to planning and design. Topics include natural elements, structures, patterns, natural systems, ecology, landscape ecology, and sustainability. Application of relevant theories and methods related to the environment and natural systems in planning and design. (3H,3C)

### 1264: UNDERSTAND REPRESENT LANDSCAPE

This course explores and compares the potentials and limitations of various approaches to, and techniques for seeing, understanding and representing salient characteristics of landscapes. Directed to landscape architecture majors and interested individuals in related disciplines. (3H,3C)

### 2015-2016: LAR DESIGN STUDIO PLACE&PROCES

Basic theory, principles, and methods of landscape design and site planning.

2015: Design theory involving two and three dimensional compositions. Mass/space relationships, principles of spatial design and techniques used to create landscape space. 2016: Design theory relating to landscape design and site planning. Design of small scale spaces in which the analysis

of site, context and the requirements of human use are brought together in a creative synthesis. I (1H,11L,6C)

#### 2164: LANDFORM FUNCTION & AESTHETICS

Design principles and technology related to the creation of landforms for functional, aesthetic and environmentally sustainable purposes related to landscape design and construction process. Pre-requisite: LAR 1264 or consent of instructor Pre: 1264. (2H,4L,4C)

#### 2254: SOCIAL AND CULTURAL LANDSCAPES

Introduction to experiential and cultural content of designed landscapes. Physiological, functional, and psychological factors that affect experience of the landscape. Study of cultural values, attitudes, and philosophies that have shaped historic and contemporary landscapes. (3H,3C)

#### 2554 (FOR 2554): NATURE AND AMERICAN VALUES

Introduces students to the evolving relationship between nature and American society; emphasizing the ethics and values which underlie forest, park, and wildlife management. Students are introduced to contemporary land use issues and learn to articulate, defend, and critique the ethical positions surrounding these issues (i.e., wilderness, sustainability, biodiversity, hunting, old growth, suburban sprawl, environmental activism. (3H,3C) I,II.

#### 2984: SPECIAL STUDY

Variable credit course.

#### 3015-3016: INTERMEDIATE LANDSCAPE DESIGN AND CONSTRUCTION DOCUMENTS

Development of intermediate site planning and design knowledge skills. 3015 focuses on site/project scale planning and design with emphasis on greenfield development sites and models of conversation oriented design/development. Pre: 2016 for 3015; 3015 for 3016. (1H,11L,6C)

#### 3044: LAND ANALYSIS AND SITE PLANNING

Introduction to the concepts and methods of ecological resource survey and analysis at regional and site scales. Approaches to environmental problem solving with an emphasis on data collection, evaluation, and synthesis using applicable technologies such as geographic information systems. Interpretation of landscape resource data for the purpose of physical planning and design. Pre: 1004. (2H,2L,3C) II.

#### 3154: WATERSHED SENS DESIGN & CONSTR

Examines soil and water resource issues related to landscape architectural site planning and design. Key topics include watershed sensitive site design, estimation and management of storm water runoff, rainwater conservation, design of open channel conveyances for site planning applications, and erosion and sedimentation control. Pre-requisite: LAR 2164 or consent of instructor Pre: 2164. (2H,4L,4C)

#### 3164: MATERIALS STRUCTURES DETAILS

Landscape construction theories and practices involving the selection of materials, design and placement of structures in the landscape and details critical to the creation of space and form. Addresses health, safety and welfare; sustainable materials and construction processes; and environmental performance. Pre-requisite: LAR 3154 or consent of instructor Pre: 3154. (3H,3L,4C)

#### 3264: PEOPLE, COMMUNITY AND PLACE

An advanced course focusing on landscape/behavior interactions and implications for the design of outdoor environments. Study of factors that affect social interaction in community and public spaces; perceptions and needs particular to various sub-populations; ecological, social, and cultural approaches to theories of place and place attachment. Pre-requisite: LAR 2254 or instructor's permission Pre: 2254. (3H,3C)

#### 3524 (HORT 3524): HISTORY OF LANDSCAPE ARCHITECTURE

A study of the design-form and structure of landscape architectural works from the Bronze Age to the present, including the influence of physical, climatological, and social context, and of the individual designers. Junior standing required. I (3H,3C)

#### 3954: STUDY ABROAD

Variable credit course. X-grade allowed.

#### 3984: SPECIAL STUDY

Variable credit course.

#### 4004: HISTORY AND THEORY OF LANDSCAPE ARCHITECTURE II

This course studies theoretical and practical developments in landscape architecture and related arts through investigation and analysis of design theory and philosophy, and built form. Pre: 2004 or permission of instructor. Pre: 2004. (3H,3C) I

#### 4014: LANDSCAPE PLANNING AND MANAGEMENT

Links landscape architectural design and construction documents through integrating site design from schematic design through design development to construction documentation drawings and technical specifications. Landscape design and technology covered in preceding design and technology courses is combined with construction principles and practices in preparation of site design and set of construction documents. Pre-requisites may be waived with permission of instructor. Pre: 3016, 3164. (1H,11L,6C)

#### 4034: EVOLUTION OF THE AMERICAN LANDSCAPE

An examination of physical change in the rural and urban landscape of America as reflected by changes in needs during the country's history. Some of the factors influencing the character, form, and use of American space that will be studied are economic growth, changing philosophies on conservation and exploitation of natural resources and the resulting legislation, technological advancement, and social reform. (3H,3C) II.

#### 4084: LANDSCAPE DESIGN AND PLANNING STUDIO

This course is an advanced studio that enables students to address landscape architectural design and planning issues in various contexts and at a range of scales. Pre: 3016 or permission of instructor. Landscape Architecture majors must take minimum of 6 credits. May be repeated to a maximum of 12 credit hours. Pre: 3016. (1H,11L,6C) I,II.

#### 4094: SENIOR PROJECT

A capstone of a five-year design studio sequence, the senior project is a comprehensive landscape architecture design project selected and completed by the student under the direction of a faculty advisor. Senior projects are reviewed and evaluated by the program faculty. Repeatable with a maximum of 12 credits. Variable credit course. X-grade allowed. I,II.

#### 4124 (ARCH 4044): PROFESSIONAL PRACTICE

Introduction to scope and diversity of the building enterprise, addressing private and public macroeconomic, industrial, technical, professional, and regulatory institutions. Analysis of historic evaluation of professional roles and practices; emergence of new modes of practice, including innovative facilities procurement methods. (3H,3C)

#### 4234: THEORY AND PRACTICE OF URBAN DESIGN

This course examines historic and contemporary trends in urban design theory and practice; methods of analyzing urban form; social, cultural, and environmental dimensions of urban design. (3H,3C) II.

#### 4254: LANDSCAPE ARCH THEORIES

Critical examination of theories relevant to landscape architectural design and the inter-relationship between theory and practice. Evolution of theory with respect to built works. Overview of concurrent design theories and philosophies in the related arts. Pre-requisite: Senior standing or instructor's permission. (3H,3C)

#### 4304: TOPICS IN LANDSCAPE ARCHITECTURE

Topics in landscape architecture history, theory and design methods is an advanced course focusing upon issues facing the professional practice of landscape architecture today. Special emphasis on methods of analysis and interpretation including application of creative techniques, analogous thinking, computer-aided procedures and information handling in landscape architecture design and practice. Pre: 3015 and 3016 or permission of instructor. May be repeated with different content for a maximum of 12 credits. Pre: (3015, 3016). (3H,3C)

#### 4324: LANDSCAPE ARCHITECTURE TECHNOLOGY III-CONSTRUCTION DOCUMENTS

This course provides the link between landscape architectural design and construction documentation. Landscape technology covered in preceding technology courses is combined with information on construction principles and practices in the preparation of landscape architectural construction drawings and technical specifications. Pre: 4244. (2H,4L,4C) II.

#### 4444: ENVIRONMENTAL IMPACT ASSESSMENT

An examination of the issues, policies and methods related to environmental impact assessment (EIA) as required by the National Environmental Policy Act (NEPA) of 1969. Topics studied include NEPA requirements, historic evolution of legislation and regulations, and methods used to assess ecological, visual, social, and economic impacts. (3H,3C)

#### 4705-4706: LANDSCAPE DESIGN AND PLANNING

Theories, methods, techniques, and tools relating to the planning and design of sites, communities, and regional landscapes. 4705: Emphasis on the development of design ability through the study of two- and three-dimensional design, principles and elements of spatial composition, and theories and techniques for planning and design of small sites. 4706: Emphasis on the evaluation of land resources and the allocation of land uses within large complex sites and regional landscapes. Theories and techniques of site planning and community design are explored. (1H,8L,5C) I,II.

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

### **Overview**

The School of Public and International Affairs (SPIA) provides opportunities for students interested in public issues to gain perspectives and skills from several related disciplines. SPIA is a school within the College of Architecture and Urban Studies, and is comprised of the Center for Public Administration and Policy, the Government and International Affairs Program, and the Urban Affairs and Planning Program. Undergraduate degrees are offered by Urban Affairs and Planning – a B.S. in Environmental Policy and Planning and a B.A. in Public and Urban Affairs (see Urban Affairs and Planning in this catalog).

SPIA sponsors the Washington Semester, a ten-week, twelve-credit-hour summer program that allows undergraduate students to combine Washington, D.C.-area internships with course work for academic credit. For more information about undergraduate degree programs, students should contact Urban Affairs and Planning. Information on graduate programs may be obtained from the Center for Public Administration and Policy, Government and International Affairs, and Urban Affairs and Planning.

### **Undergraduate Course Description (SPIA)**

#### **1004 (PSCI 1004): NATIONS AND NATIONALITIES**

Introduction to world and American ethnic and indigenous cultures and to social constructions of human and group identity, nationalism and extreme ethno-nationalism. Music, dance, film, art, ceremonial rituals and other multimedia forms of creative or symbolic expression, supplement readings and lectures. Multidisciplinary exploration of collective conceptions of cultural differences. (3H,3C)

#### **2984: SPECIAL STUDY**

### Overview

The Urban Affairs and Planning Program (UAP) offers two undergraduate degrees, the B.A. in public and urban affairs and the B.S. in environmental policy and planning, as well as minors under both degrees. At the graduate level the department offers the master of urban and regional planning degree.

### B.A. in Public and Urban Affairs

The B.A. in public and urban affairs (PUA) is an interdisciplinary social science degree with a professional cast. It aims to educate students in the liberal arts tradition while equipping them with the skills, knowledge, and analytical thinking used in planning and policy. Students learn to address the political, economic, environmental, social, and governmental consequences of growth and change and to help resolve the problems that emanate from them.

The 120 credit hour curriculum in public and urban affairs includes 34 hours in the Curriculum for Liberal Education, 36 hours in the major core, 15 hours in one of five areas of concentration and 35 hours of free electives.

#### Curriculum for Liberal Education Requirements (34 hours)

Area 1: ENGL 1105-1106 Freshman English

Area 2: 3 hours from approved list, plus

PHIL 3314 Ethics

**or** PHIL 1304 Morality and Justice

**or** PHIL 2304 Global Ethics

Area 3: ECON 2005-2006 Principles of Economics

Area 4: 6 hours in any approved science lecture/lab sequence

Area 5: MATH 1015-1016 Elementary Calculus with Trigonometry

or MATH 1205-1206 Calculus

or MATH 1525-1526 Calculus with Matrices

Area 6: LAR 1144 Introduction to Landscape Architecture

Area 7: UAP 3344 Global Environmental Issues

#### Major Core Requirements (36 hours)

SPIA 1004 Nations and Nationalities

**or** UAP 3074 Social Movements in Urban Society

PSCI 1014 Introduction to United States Government and Politics
PSCI 2054 Introduction to World Politics
STAT 3604 Statistics for the Social Sciences
UAP 1024 Public Issues in an Urban Society
UAP 3014 Urban Policy and Planning
UAP 3024 Urban and Regional Analysis
UAP 3224 Policy Implementation
UAP 4184 Community Involvement
UAP 4754 Legal Foundations of Planning
UAP 4914 Senior Seminar in Public and Urban Affairs
<b>15 hours from an approved list in one of five concentration areas:</b>
Urbanization: Planning and Policy
or Public and Non-Profit Management
or Public Policy
or Global Development
or Environmental Affairs
<b>35 hours free electives</b>

## Satisfactory Progress

Satisfactory progress toward the public and urban affairs degree requires successful completion of PSCI 1014, PSCI 2054, UAP 3014, UAP 3024, and UAP 3344 by the time 72 total hours have been attempted. Minimum overall and in-major GPA 2.0. In-major GPA includes the PUA major core, the PUA concentration, and ECON 2005-2006 and UAP 3344 in the Curriculum for Liberal Education.

## Minor in Public and Urban Affairs

A minor in Public and Urban Affairs requires completion of 18 credit hours:

UAP 1024: Public Issues in Urban Society

UAP 3014: Urban Policy and Planning

12 hours from approved list of UAP courses

## B.S. in Environmental Policy and Planning

The B.S. in environmental policy and planning (EPP) provides students the opportunity to study environmental problems and their solutions from an interdisciplinary perspective involving humanities, natural and social science, planning, and public policy. While rooted in scientific and technological fields, environmental problems and their solutions increasingly deal with public values, economics, law, policy, and planning. The EPP curriculum, while providing a broad liberal arts and natural and social science base, has a pre-professional slant involving analytical and communication skills and policy and planning methods to prepare students for employment and graduate study.

<b>Curriculum for Liberal Education Requirements (34 hours)</b>
Area 1: ENGL 1105-1106 Freshman English
Area 2: 3 hours from approved list, and either LAR 4034 Evolution of the American Landscape <b>or</b> FOR 2554 Nature and American Values <b>or</b> UAP 4264 Environmental Ethics and Policy
Area 3: ECON 2005-2006 Principles of Economics <b>or</b> AAEC 1005-1006 Economics of Food and Fiber
Area 4: BIOL 1005-1006 General Biology <b>or</b> BIOL 1105-1106 Principles of Biology
Area 5: MATH 1015-1016 Elementary Calculus with Trigonometry
Area 6: LAR 1144 Introduction to Landscape Architecture
Area 7: UAP 3344 Global Environmental Issues
<b>Environmental Policy and Planning Requirements (58 hours)</b>
PSCI 1014 Introduction to US Government & Politics
UAP 3224 Policy Implementation

AAEC 3314 Environmental Law
UAP 3354 Introduction to Environmental Policy and Planning
UAP 4354 Environmental Problem Solving Studio
UAP 4364 Seminar in Environmental Policy and Planning
UAP 4184 Community Involvement
UAP 4374 Land Use and Environment
UAP 4384 Pollution Control Planning and Policy
UAP 3024 Urban and Regional Analysis
STAT 3604 Statistics for the Social Sciences
COMM 2004 Public Speaking <b>or</b> ENGL 3764 Technical Writing
ECON 4014 Environmental Economics <b>or</b> AAEC 4304 Environmental and Sustainable Development Economics
CHEM 1015/1025 Intro to Chemistry and Lab <b>or</b> CHEM 1035/1045 General Chemistry and Lab
ENSC 3604/CSES 3604 Fundamentals of Environmental Science
One of the following: ENGR 3054 Engineering Our Environment <b>or</b> ENGR 3124 Intro to Green Engineering <b>or</b> UAP 4394 Community Renewable Energy Systems
One of the following: BIOL 2804 Ecology <b>or</b> BSE 2384 Soil and Water Resources Management <b>or</b> GEOG 1104 Intro to Physical Geography <b>or</b> GEOL 1004 Physical Geology <b>or</b> FOR 2314/2324 Dendrology and Lab <b>or</b> FIW 2114 Principles of Fisheries and Wildlife Management <b>or</b> CSES 3114 Soils
Two of the following: <b>or</b> UAP 4214 Women, Environment, Development <b>or</b> UAP 4344 Law of Critical Environmental Areas <b>or</b> AAEC 4314 Environmental Economic Analysis and Management <b>or</b> AAEC 4344 Sustainable Development Economics <b>or</b> HIST 3144 American Environmental History <b>or</b> LAR 4444 Environmental Impact Assessment
Free Electives (27 hours)

## Satisfactory Progress

Satisfactory progress toward the degree requires successful completion of UAP 3344, UAP 3354, CHEM 1015 (or CHEM 1035), and PSCI 1014 by the time 72 total hours have been attempted. Minimum overall and in-major GPA 2.0. In-major GPA includes all courses in the EPP curriculum plus BIOL 1005-1006 (or BIOL 1105-1106), and ECON 2005-2006 (or AAEC 1005-1006), and LAR 4034 (or FOR 2554 or UAP 4264), and UAP 3344 in the Curriculum for Liberal Education.

## Minor in Environmental Policy and Planning

<b><i>Environmental Values, History, Ethics: (3 hours--one course--from the following)</i></b>
HIST 3144: American Environmental History
<b>or</b> LAR 4034: Evolution of the American Landscape
<b>or</b> FOR 2554: Nature and American Values
<b>or</b> UAP 4264: Environmental Ethics and Policy
<b><i>Environmental Science: (6 hours from the following)</i></b>
UAP 3354: Intro. to Environmental Policy & Planning
ENSC 3604: Fundamentals of Environmental Science <b>or</b> CSES 3604: Fundamentals of Environmental Science
<b><i>Environmental Policy and Planning: (9 hours)</i></b>

9 hours from:
UAP 3344: Global Environmental Issues
UAP 4184: Community Involvement
UAP 4344: Law of Critical Environmental Areas
UAP 4374: Land Use & Environment: Plan. & Policy
UAP 4384: Pollution Control: Planning and Policy
<b>Env. Policy &amp; Planning Applications: (2-4 hours from the following)</b>
UAP 4354: Environmental Problem Solving Studio or UAP 4364: Seminar in Environmental Policy & Planning

## Undergraduate Course Descriptions (UAP)

### 1004: INTRODUCTION TO CAREERS IN URBAN AFFAIRS AND PLANNING

Introduces academic requirements for the Public and Urban Affairs (PUA) and Environmental Policy and Planning (EPP) majors. Assists students with academic planning and career exploration. Students develop an ePortfolio to document their personal and professional growth in the major. Course must be taken during the first semester in the PUA or EPP program. (1H,1C)

### 1024: PUBLIC ISSUES IN AN URBAN SOCIETY

This class introduces some of the most vital concerns and issues challenging democratic capitalistic urban societies today. Topics addressed include different perspectives on the causes and portent of the urban underclass, the growing inequality between the educated and less well educated in the nation's labor markets, the causes of the marked resegregation of many of the nation's urban centers by race and income and the implications of privatization and interjurisdictional competition for the public policy behavior and outcomes of subnational governments. (3H,3C)

### 2004: PRINCIPLES OF REAL ESTATE

Introduction to real estate, including markets, land use planning and zoning, development, finance, construction, sales, marketing, management and property valuation. Examines the key actors and processes in each of these areas. Explores major public policies impacting real estate. (3H,3C)

### 2014: URBANIZATION AND DEVELOPMENT

Relationships between urbanization and economic development; role of cities in social, political, cultural, and economic development of societies; cities as settings for innovation and change. (3H,3C)

### 2024: WORLD CITIES

A comparative approach to urban systems, urban form, and urban living throughout the world. The role of cities in national and international economics. The form of urban development in relation to political, economic, and cultural context. Comparisons of urban problems and policy responses. (3H,3C)

### 2114: INTRODUCTION TO COMMUNITY AND ECONOMIC DEVELOPMENT

Acquaints students with basic concepts and principles of community and economic development, primarily as practiced in the United States but with comparative international approaches and examples. Explores programs and policies, commonly used implementation tools, and the consequences of alternative policy choices. Pre: 1024. (3H,3C)

### 2964: FIELD STUDY

Pass/Fail only. Variable credit course.

### 3014: URBAN POLICY AND PLANNING

An introduction to urban policy and urban planning. Includes analysis of the basic concepts and principles of urban policy, a review of urban policy in the United States, discussion of the development of urban planning and its role in shaping the urban environment, and an analysis of the relationship between public policy and planning and the organization and structure of the urban environment. Must complete prerequisite UAP 1024 with a B-grade or higher. Pre: 1024. (3H,3C)

### 3024: URBAN AND REGIONAL ANALYSIS

Overview and application of various methods used to study, represent, understand communities in their urban and regional context. Data collection and analysis; population, land use, transportation and economic forecasting; selecting and applying an appropriate method; designing and presenting a community study. Restricted to majors and minors only. (3H,3C)

### 3064: URBAN DIVERSITY

Examines the growing diversity of the metropolitan population in the United States including the rising numbers of people of color, the disabled, the growth of single person and single-parent headed households, aging and sexual orientation. Introduces issues and problem solving techniques related to managing city and suburban areas as they adjust to diversity. Junior standing required. (3H,3C)

### 3224: POLICY IMPLEMENTATION

Systematic analysis of the field and practice of public policy implementation. Includes analysis of the structure and dynamics of the policy process as well as specific analytic approaches to understanding policy implementation. Includes analysis of intra-organizational, interorganizational and intergovernmental implementation processes. Must complete prerequisites UAP 3014 (B- or higher) or 3354, and UAP 3024 (B- or higher). Pre: 3024, (3014 or 3354). (3H,3C)

### 3264: CONTEMPORARY URBAN ISSUES

Consideration of one particular issue of immediate importance to the contemporary urban environment. Topics emphasize major social or economic policy issues, and may change each year. Junior standing required. (3H,3C)

**3344 (PSCI 3344): GLOBAL ENVIRONMENTAL ISSUES: INTERDISCIPLINARY PERSPECTIVES**

Critical examination of major global environmental problems (e.g., global warming, atmospheric ozone depletion, acid rain, tropical deforestation, toxic waste) with emphasis on their social, economic, political, ethical, and policy implications and solutions. Completion of Area 4 of University Core required. (3H,3C)

**3354: INTRODUCTION TO ENVIRONMENTAL POLICY AND PLANNING**

Introduction to the interdisciplinary principles of environmental policy, planning, economics, and ethics to address pollution abatement, resources conservation, habitat protection, and environmental restoration. The course will focus on practical means of identifying environmental problems and creatively solving them. (3H,3C)

**3434 (PSCI 3414): PUBLIC ADMINISTRATION**

The role and context of public administration in the contemporary United States, administrative organization and decision-making, public finance, human resources administration, and program implementation. Pre: PSCI 1014. (3H,3C)

**3444 (PSCI 3444): ADMINISTRATIVE LAW AND POLICY**

The legal context of the exercise of discretion by public administrators in the United States. Adjudication and rule-making; access to administrative processes and information; legislative and judicial control of administration. Pre: PSCI 1014. (3H,3C)

**3464 (AHRM 3464) (EDHL 3464) (GEOG 3464) (HD 3464) (HUM 3464) (SOC 3464): APPALACHIAN COMMUNITIES**

The concept of community in Appalachia using a multidisciplinary approach and experiential learning. Interrelationships among geographically, culturally, and socially constituted communities, public policy, and human development. 2000-level course in any cross-listing department required. (2H,3L,3C)

**3604: PUBLIC BUDGETING**

Examines principal theories, concepts and practices of budgeting as practiced in the public sector in the United States. Assesses evolution of budgetary theory and practice from perspective of effective policy making, managerial needs, analytical techniques and reporting requirements. Junior standing required. (3H,3C)

**3714 (PSCI 3714): THE US POLICY PROCESS**

Description and analysis of the processes and institutions involved in the making and implementation of public policy in the United States, with a primary focus on domestic and economic policy. Empirical and normative models of the process of public policy making in the U.S. Pre: PSCI 1014. (3H,3C)

**3744 (PSCI 3744): PUBLIC POLICY ANALYSIS**

Methods and approaches used in the analysis and evaluation of public policy; strengths and limitations of various analytic tools; normative issues in the practice of policy analysis. (3H,3C)

**3774 (PSCI 3774): MARXIAN POLITICAL ANALYSIS**

Contemporary uses of Marxian concepts and theories to study the world economy, business structure, current social issues, modern ethical values, and alienation. Pre: PSCI 1014 or PSCI 1014H. (3H,3C)

**3894: URBAN POVERTY, WORKFORCE DEVELOPMENT AND PUBLIC POLICY**

Examines urban labor markets and related problems, low-skill workers, unemployment and underemployment, new directions in workforce development, policy initiatives and private interventions and their outcomes for disadvantaged populations. Pre: ECON 2005. (3H,3C)

**3954: STUDY ABROAD**

Variable credit course.

**4184: COMMUNITY INVOLVEMENT**

Issues, concepts, and techniques of citizen participation in community development. Institutional frameworks and their historical precedents. Exercises developing group communications skills, public meeting facilitation, and design of community involvement programs. (3H,3C)

**4214 (WGS 4214): WOMEN, ENVIRONMENT AND DEVELOPMENT IN A GLOBAL PERSPECTIVE**

Explores intersecting roles of gender, culture, and socio-economic status in people's use of nature, management of environmental resources, and experiences of environmental change. Examines debates on environmental and development initiatives, environmental ethics, and environmental social movements from feminist perspectives. Pre: 3344 or 3354. (3H,3C)

**4224: POLICY-MAKING IN THE FEDERAL SYSTEM**

This course analyzes both the design and structure of our nation's intergovernmental framework. The class examines alternative understandings of the intentions of the Founders and of the changing roles of the courts, Congress, the presidency, the governorship, the state legislatures, local governments and other institutional actors in our intergovernmental system. The class emphasizes both the strengths and weaknesses of our multi-layered system of governance laying special stress on its implications for policy process effectiveness, efficiency and accountability. (3H,3C)

**4264: ENVIRONMENTAL ETHICS AND POLICY**

Issues in applied environmental ethics. Contributions of diverse religious and philosophical traditions to contemporary perspectives on the human-nature relationship. Examination of environmental policies from utilitarian economic, deep ecology, and ecofeminist perspectives. Junior, senior or graduate standing required. Pre: 3344 or 3354. (3H,3C)

**4344: LAW OF CRITICAL ENVIRONMENTAL AREAS**

This course examines the legal principles and policy debates involved in the regulation and protection of critical environmental resources. Specific

topics vary but will likely include wetlands law and policy, endangered species habitat, open space, forestland and farmland protection, coastal zone management, and floodplain regulation and policy. (3H,3C)

#### 4354: INTERDISCIPLINARY ENVIRONMENTAL PROBLEM SOLVING STUDIO

Interdisciplinary, experiential problem solving studio focusing on specific environmental problems. Working in groups, students interact with local officials, consultants, developers, environmental groups to explore the processes of environmental management, regulation and mitigation, applying techniques and skills frequently used by environmental planners and policy-makers. Senior status required and 9 credit hours, 3000-level or above, in the Environmental Policy and Planning major or minor; Pre: 3354. (2H,5L,4C)

#### 4364: SEMINAR IN ENVIRONMENTAL POLICY AND PLANNING

Critical examination of the social, political, economic, legal, scientific, and technological contexts underlying processes of environmental change, problems, and solutions, as seen from various conceptual and disciplinary perspectives. Senior status required and 9 credit hours, 3000-level or above, in the Environmental Policy and Planning major or minor. Pre: 3354. (2H,2C)

#### 4374: LAND USE AND ENVIRONMENT: PLANNING AND POLICY

Environmental factors involved in land use planning and development, including topography, soils, geologic hazards, flooding and stormwater management, ecological features, and visual quality. Techniques used in conducting environmental land inventories and land suitability analyses. Policies and programs to protect environmental quality in land use planning and development. Pre: Junior standing. (3H,3C)

#### 4384: POLLUTION CONTROL PLANNING AND POLICY

Planning and policy aspects of managing residuals and environmental contaminants and their effects on human health and environmental quality. Technical and economic factors involved in management of water quality, air quality, solid and hazardous wastes, toxic substances, and noise. Implementation of pollution control legislation, policies, and programs at federal, state, and local levels. (3H,3C)

#### 4394: COMMUNITY RENEWABLE ENERGY SYSTEMS

Practical design fundamentals for small scale renewable energy systems: solar building heating and cooling; solar domestic hot water; wind, photovoltaic, and hydroelectric systems; alcohol, methane and other biomass conversion systems. Developing plans, programs, and policies to stimulate development of renewable systems. Pre: MATH 1016 or (ECON 2116 or ECON 2116H). (3H,3C)

#### 4404 (ALS 4404) (GEOG 4404) (NR 4404): APPROACHES TO INTERNATIONAL DEVELOPMENT

An introduction to issues relating to international development. The course will focus on areas to help students better understand the interdependencies between countries and how institutions and organizations can foster effective working relationships on global projects of mutual interest between countries. (1H,1C)

#### 4614: HEALTH POLICY

Inquiry into the structure of contemporary health policy and its historic antecedents, into the impacts of public policy on health status and health care delivery, into policy strategies for controlling health costs, and into the political economy of health and its influence on health policy formation. Emphasis is on the U.S. health system but that experience is placed in context by consideration of case studies of other advanced capitalist nations. Pre: 3224. (3H,3C)

#### 4624 (PSCI 4624): THE WASHINGTON SEMESTER: SEMINAR IN AMERICAN POLITICS AND PUBLIC POLICY

This seminar is the integrative forum for the principal elements of the Washington Semester experience. The course explores both the role of political institutions in policy formation and implementation and the primary managerial and leadership challenges that arise for implementing organization managers in American democratic public policy-making. Junior standing required and acceptance into the Washington Semester program. X-grade allowed. (3H,3C)

#### 4624H (PSCI 4624H): HONORS THE WASHINGTON SEMESTER: SEM IN AMERICAN POLITICS AND PUBLIC POLICY

X-grade allowed. (3H,3C)

#### 4644 (PSCI 4644): THE WASHINGTON SEMESTER: POLITICS, POLICY AND ADMINISTRATION IN A DEMOCRACY

This course is part of the Washington Semester. Explores the relationship between the imperatives of democratic mobilization, policy choices and organizational choices through intensive study of the operating context of a selected public or nonprofit organization. Examines implications of policy-maker choices for implementing institution dynamics and challenges. Junior standing and acceptance into the Washington Semester program. X-grade allowed. Pre: PSCI 3714. (3H,3C)

#### 4644H (PSCI 4644H): HONORS THE WASHINGTON SEMESTER: POLITICS, POLICY AND ADMIN IN A DEMOCRACY

X-grade allowed. (3H,3C)

#### 4654 (ARCH 4654): URBANIZATION AND URBANISM IN EUROPE

This course is designed to provide an introduction to European urbanization for students who intend to pursue a study abroad program in Europe, or who have already done so. The course adopts a comparative approach to cities, urban form and urban living, and an understanding of urbanization processes, including urban design and planning, in different parts of Europe. Pre: 2014 or ARCH 2016. (3H,3C)

#### 4714: ECONOMICS AND FINANCING OF STATE AND LOCAL GOVERNMENTS

Examines the provision and financing of public goods and services in local governments. Analyzes associated policy issues. Reviews experience in Western Europe and developing countries, as well as in the United States. Must complete prerequisites UAP 3024 with B- grade or higher, and ECON 2005 and 2006 with C grade or higher. Pre: 3024, (ECON 2005 or ECON 2005H), (ECON 2006 or ECON 2006H). (3H,3C)

#### 4724: CAPITAL BUDGETING AND STRATEGIC FACILITIES PLANNING

Examines the principles and practice of capital budgeting as a primary instrument for the effectuation of long-range public policy objectives. Capital budgeting forms a critical bridge between strategic planning and the delivery of vital public services. Strategic facilities are public improvements that have a relatively long life, involve substantial investment of public resources, and yield fixed assets for the community or organization. (3H,3C)

#### 4744: PRINCIPLES OF REAL ESTATE

Examines the relationship between the real estate market and urban development. Focuses on the private sector real estate market and how it responds to and shapes urban policy and urban planning practices. Pre: 3014. (4H,4C)

#### 4754: LEGAL FOUNDATIONS OF PLANNING

Examination of the legal context in which urban planning and public policy operate. Legal structure, role of law, powers of sovereign governments, constitutional limitations on government activities, and public-private conflict and their influence on planning and public policy are examined. (3H,3C)

#### 4764 (GEOG 4764) (SOC 4764): INTERNATIONAL DEVELOPMENT POLICY AND PLANNING

Examination of major development theories and contemporary issues and characteristics of low-income societies (industrialization, urbanization, migration, rural poverty, hunger, foreign trade, and debt) that establish contexts for development planning and policy-making. Junior standing required. (3H,3C)

#### 4854: PLANNING OF THE URBAN INFRASTRUCTURE

Course examines the interdependences among the elements of the built environment of the city and those between the elements of the built environment and the policy/planning structure of the city. Considered are those elements associated with the primary urban activities (residential, commercial, industrial) as well as the urban form-giving infrastructure facilities that support those land uses (water supply, sewerage, solid waste disposal, transportation, education, recreation, health, and safety). Pre: 3014. (3H,3C)

#### 4914: SEMINAR IN PUBLIC AND URBAN AFFAIRS

This capstone seminar explores the central questions of the role of the citizen and the citizenry in democratic capitalistic urban societies as well as the nature of accountability in such regimes. Topics such as the processes by which representation occurs, alternate theories of democratic community and the relationship of the public, private and civil sectors in urban society are treated. Senior status in PUA required. PUA majors and minors must complete this course with a C grade or higher to graduate; otherwise course must be repeated. Pre: 3224, 4714, 4754. (3H,3C)

#### 4964: FIELD STUDY

Variable credit course. X-grade allowed.

#### 4964H: HONORS FIELD STUDY

Variable credit course.

#### 4974: INDEPENDENT STUDY

Variable credit course. X-grade allowed.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

## Mission of the College

Virginia Tech is the home of the commonwealth's leading College of Engineering. It is known in Virginia and throughout the nation for the excellence of its programs in engineering education, research and public service. It is the state's largest engineering college, and ranks among the top five suppliers of new B.S. degrees in the United States.

The mission of the College of Engineering is to offer high quality support for our stakeholders in order to provide a successful experience in the engineering education pursuits of our customers. The vision of the college is to foster strong working relationships between faculty, student and industry partners that will ultimately bring research opportunities through engineering educational offerings. The goals of the college are to attract high-caliber students and to provide them with a top-quality engineering education in preparation for productive careers; to invest in faculty development to enhance Virginia Tech's reputation as a research university and a leader in graduate education; and to forge new links with industry and government to facilitate economic development within the Commonwealth and the nation.

In U.S. News & World Report's "America's Best Colleges 2012" survey, the College of Engineering's undergraduate program ranks 15th among all accredited engineering schools. Among public universities, the college ranks seventh. Among available individual department programs rankings, the following standouts from 2012 are: industrial/manufacturing engineering, 7th; environmental, 12th; civil, 10th; mechanical engineering, 13th; aerospace engineering, 15th; and electrical engineering, 14th.

For U.S. News & World Report's 2013 report on Graduate Schools, the college ranked 24th. Four departments within the College of Engineering finished in the top 10 of their respective category. The Grado Department of Industrial and Systems Engineering ranked third among industrial/manufacturing programs. The Charles E. Via Jr. Department of Civil and Environmental Engineering ranked eighth among civil engineering programs, with the environmental engineering ranking seventh. The biological systems engineering department, also part of the College of Agriculture and Life Sciences, ranked seventh among biological/agricultural programs. Aerospace engineering was ranked 13th, electrical engineering at 21st, with computer engineering at 23rd, and mechanical engineering ranked 18th.

According to the December 2010 issue of ASEE's Prism, Virginia Tech's Mining and Minerals Engineering Department graduated the most number of bachelor's degrees in the country with 49. Second was a far distant 25 at the Missouri University of Science and Technology.

The National Science Foundation is a major contributor of grants to our college. Research expenditures during the fiscal year 2008 (released in April of 2010) totaled \$152 million, placing the college 10th in the nation among the hundreds of engineering colleges for the second year in a row, according to the NSF. It is an increase of some \$16 million from the previous year.

The College of Engineering offers bachelor of science degrees in the following areas: Aerospace Engineering, Biological Systems Engineering, Chemical Engineering, Civil Engineering, Computer Engineering, Computer Science, Construction Engineering and Management, Electrical Engineering, Engineering Science and Mechanics, Industrial and Systems Engineering, Materials Science and

Engineering, Mechanical Engineering, Mining Engineering, and Ocean Engineering. The Computer Science program is accredited by the Computing Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700. All other College of Engineering undergraduate programs in engineering are accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700.

On September 13, 2010, the Wall Street Journal's published survey of 479 of the largest public and private U.S. companies, nonprofits, and government agencies showed Virginia Tech's College of Engineering ranked as the number five pick for graduates best prepared and most able to succeed. The Journal's research represented a systematic effort to assess colleges by surveying employers' recruiters who decide where to seek out new hires.

Engineers play an important role in modern society. They design and develop new and better materials, products and processes for households and industries, from tiny semiconductors to huge dams. Engineers are needed across a broad spectrum of industry from the traditional field such as mechanical to the emerging fields of robotics and biomedicine. Engineers must not only satisfy society's demand for improved performance, reliability and safety of products, they also are expected to supply solutions for environmental and social problems created by new technology.

Our graduates are well-rounded. Men and women trained in engineering will find many professional outlets. They may join large or small manufacturing industries or they may offer their skills and knowledge as professional consultants. They may work in government or private research laboratories or teach and do research in universities. If the future leads them into other professions such as medicine, law, food services or business, their engineering education shall provide a sound base. Graduates of the College of Engineering are in high demand. Our student-run Engineering EXPO-- one of the largest student-run career fairs in the country—attracted roughly 250 employers in 2011, and we are a key recruiting school for approximately 40 major corporations.

It is essential that engineers, regardless of specialty, be well versed in mathematics, the physical sciences and the engineering sciences so that they can adapt readily to meet the profession's ever-changing demands. But professional training is not enough. Engineers need to have imagination and insight. They must understand the history and traditions of the society in which they live. They also must be familiar with the social sciences and humanities.

Engineers also must be able to communicate effectively with higher management and the general public. All departments within the college are implementing programs to ensure that every graduate is able to effectively use a variety of spoken, visual and written communication strategies which are necessary for success as a student, for employment, and for life as a responsible citizen. Additional emphasis is being placed in freshmen engineering classes to emphasize the importance of communications in engineering analysis and design. Engineers who are well educated, not just well trained, will be better equipped to develop scientific knowledge into useful technology.

## **Innovations of the College of Engineering**

In a move recognized by the National Academy of Engineering for its leadership, the College transformed its Engineering Fundamentals program into the Department of Engineering Education. This Department continues to train freshmen in the fundamental principles of engineering. The basic ideas and principles inherent in the freshman year — such as the scientific method, an introduction to design, an understanding of the engineer's or technologist's role and responsibility in modern society, and a first exposure to technical communication — are imparted in both an "analog" and a "digital" environment. Engineering Education also has developed M.S. and Ph.D. programs to prepare students to teach engineering or technology at any level, from kindergarten to college. The National Science Foundation has supported these developments through several major grants.

Tenured or tenure-track faculty teach more than 90 percent of all engineering courses at Virginia Tech. Engineering faculty members focus on solving real world problems, and share these experiences in the classroom. The work of the faculty with industry brings modern, ground-breaking knowledge back to the classroom quicker than any textbook. These experiences provide a hands-on dimension that result in the superlative quality of engineering teaching for which Virginia Tech is so well known.

The latest national survey released by the American Society for Engineering Education (ASEE) ranked the Virginia Tech College of Engineering seventh in the number of full-time teaching faculty, ninth for the number of tenured/tenure track women faculty, tenth for the number of African American faculty, twelfth for the number of Asian faculty, and seventh for the number of Hispanic faculty. The data was based on a survey of 333 engineering schools.

Virginia Tech engineering undergraduates are fortunate to have a combination of excellent classroom instruction and the opportunity to participate in "hands-on, minds-on" engineering training. This "hands-on, minds-on" training is made possible by two unique facilities, established by the generosity of College of Engineering alumni, that are available to undergraduates.

In the Joseph F. Ware, Jr. Advanced Engineering Laboratory, students design and construct competition projects including Formula SAE race cars, Baja SAE vehicles, human-powered submarines and airplanes, radio-controlled aircraft, steel bridges, autonomous aerial and underwater vehicles, and hybrid electric vehicles.

In the Frith Freshman Engineering Design Laboratory, freshmen learn engineering principles by working with a number of mechanisms donated by industry sponsors.

The Virginia Tech Institute for Critical Technology and Applied Science (ICTAS) has emerged as a vital vehicle that presents a strong link to economic development for the entire Commonwealth. Led by Virginia Tech's College of Engineering, ICTAS presents a case for advancement of humankind through collaborative research, and it represents a strong link between all of the colleges of engineering across the Commonwealth. For the undergraduate, ICTAS will provide opportunities for research employment.

ICTAS incorporates the common features of Organized Research Units (ORUs) that have produced strong economic growth around highly ranked universities. At Virginia Tech, we recognize that a university-affiliated ORU is more than a traditional research center. It must allow for,

and encourage, a seamless path from fundamental research, through applied research and development, to technology transfer - not only by publications but also through the licensing of intellectual property, the initiation of new companies, student involvement, and technical assistance to Virginia companies.

At Virginia Tech, the common features emerged for the ORUs of ICTAS include: the clustering of synergistic research groups; teaming of researchers with science and engineering backgrounds; a breadth of activities that bridges periods of transition in research emphasis; the employment of full-time researchers and support personnel but with strong linkages to academic units through faculty and student involvement; and an initial investment and financial structure that allows the research unit to become not only self-sustaining, but a provider of revenue to the university.

ICTAS, in 2007, dedicated its first building, the Nanoscale Characterization and Fabrication Lab. Located in Virginia Tech's Corporate Research Center, the lab is a 32,000--square-foot facility on par with the best nanotechnology labs in the world. In March 2009, the ICTAS-I building opened in the College of Engineering corridor along Stanger and Old Turner streets. The 99,000-square-foot building now serves as the institute's home base, housing the School of Biomedical Engineering and Sciences as a principal tenant, in addition to the Sustainable Water Infrastructure Management program head by faculty members Marc Edwards and Sunil Sinha. The ICTAS-II building in the university's life sciences corridor opened in the spring semester of 2011. It houses research labs with a biotechnology focus.

The three facilities provide a total of 200,000 square feet for College of Engineering researchers and colleagues from the Colleges of Science, Natural Resources, and Veterinary Medicine to help Invent the Future, the mantra of Virginia Tech.

Work also is moving ahead on the planned Signature Engineering Building. To be located near the corner of Stanger Street and Prices Fork Road, the roughly 153,000-gross square-foot facility will house space for the College's core departments and serve as a leading center of engineering education in Virginia. Ground was broken on the project in fall 2011, and as of April the building was topped-out a month ahead of schedule. More information, including artist renderings and architecture plans can be found at <http://www.eng.vt.edu/signaturebuilding>.

The philosophy of Virginia Tech's College of Engineering is to place the right technology in the hands of our students. This reasoning fostered our pioneering decision in 1984 to become the first large public university to require our entering engineering freshmen to purchase a PC. In 2002, the College of Engineering switched the requirement to a Notebook computer. In 2006, in order to provide the opportunity for our engineering students to continue their education at the cutting edge of technology, we moved to the Convertible Tablet PC. Use of this device in and outside of class provides our students with experiences that they will use in the future.

The Convertible Tablet PC allows students to use digital ink for taking notes, drawing diagrams as part of the notes or homework assignments; annotating faculty PowerPoint slides or other electronic files and easily writing mathematical equations. Additionally, students are able to use digital-ink enabled collaboration software to support learning activities in and outside of class. By having all of their information electronically in one place, students have a tool to support them with organizing their assignments and time as well as collaborating electronically with their peers.

The Tablets are used in engineering classes and incoming freshmen use their Tablets in their first year courses, such as EngE 1024, 1104 and 1114, as well as in many upper division classes. Formerly a "computer requirement," this now is a "technology requirement." We group the computer, software and any other tools necessary as part of an integrated requirement. Through this program we know that the students will benefit from their experience.

The Myers-Lawson School of Construction further enhances Virginia Tech's recognized strong position of national leadership in construction education and research. The primary focus of the Myers-Lawson school is on values-based leadership in the construction industry. The school combines the strengths of two excellent programs - the Department of Building Construction in the College of Architecture, and the Vecellio Construction Engineering Management Program in the Charles E. Via Jr. Department of Civil and Environmental Engineering in the College of Engineering - to establish a new standard for construction education and research.

The School of Construction provides undergraduates and graduates more choices for pursuing construction education. It is anticipated that the undergraduate degree in construction engineering and management will complement the existing degree programs in building construction and in civil and environmental engineering. The school will work with faculty from multiple departments to provide students with additional opportunities to pursue concentrations, minors, or support courses related to construction.

The Myers-Lawson School and the Department of Building Construction is located at Bishop-Favro Hall, a 31,600-square-foot building that provides classroom space, seminar rooms, and studios for students. The facility also houses state-of-the-art laboratory spaces, include testing labs, wet labs, material handling, tool and welding labs, and workshops for assembly of construction systems.

## Green Engineering

Virginia Tech was one of the first universities to formally consider the connection between engineering practice and environmental stewardship from an interdisciplinary perspective. The Green Engineering Program was created in 1995 and serves all departments within the College of Engineering.

This program combines environmentally conscious attitudes, values and principles with science, technology and engineering practice, and focuses this interdisciplinary approach toward improving local and global environmental quality. Based on engineering fundamentals, green engineering analyzes the design of products, processes, and systems to minimize the life cycle environmental impacts, from the initial extraction of raw materials to the energy consumption and waste production during manufacturing to the ultimate disposal of materials that cannot be reused or recycled.

The Green Engineering Program works with students, faculty and the university administration to provide educational and research opportunities with regard to both the environmental impacts and the environmental solutions that can result from engineering practice.

A university-recognized minor allows students to pursue their interests in Green Engineering in addition to their primary degree(s) in the College of Engineering. To obtain this minor, students are required to take 18 credit hours in the minor area as follows: six (6) credits in the two core courses – Introduction to Green Engineering and Environmental Life Cycle Analysis; six (6) credits in interdisciplinary elective courses; and six (6) credits in disciplinary electives within the students' major. Detailed lists of the courses which meet the minor requirements can be found in the Green Engineering Web site at [www.eng.vt.edu/green](http://www.eng.vt.edu/green).

## Examples of Accomplishments at the National Level

The Virginia Tech Student Engineers' Council (SEC) created a permanent funding source for the dozens of undergraduate design teams in the College of Engineering. An initial gift of \$105,000 was presented to the college at the SEC's Leadership Awards Luncheon in 2007. In 2008 and 2009, it awarded close to another \$200,000 to the endowment. The council's goal for the endowment to reach \$500,000 by the end of 2010 was met and exceeded, allowing it to distribute \$20,000 per semester to design teams. Boeing, through the leadership of AOE alumnus Marc Sheffler, has contributed some \$100,000 to this endowment. In both 2003 and 2006, the Virginia Tech SEC was named the most philanthropic student organization in the country by the National Association of Engineering Student Councils, in recognition of grants supporting programs in the college. The SEC earns the revenue it donates to the college by hosting the annual Engineering Expo career fair, which attracts about 250 companies to the campus. In addition to grants, the SEC also has endowed three scholarships, each with a principal value of \$25,000.

Virginia Tech's Robotics and Mechanisms Laboratory team dominated the 2011 international robot soccer competition known as RoboCup, winning the Louis Vuitton Humanoid Cup, the competition's version of the Fédération Internationale de Football Association's World Cup. The team also dominated with first place in both the adult size class with the 5-foot humanoid robot CHARLI-2 and the Kid Size class with the miniature-humanoid-robot DARwIn-OP. The win is not just a first for College of Engineering team headed by Dennis Hong (<http://www.me.vt.edu/people/faculty/hong.html>), associate professor of mechanical engineering, but a first for the United States. In all, Virginia Tech's team took home four major awards from the international competition that is considered one of the most respected competitions in the robotics research community, and proposes a soccer match between full-size humanoid robots against the human World Cup human champions -- and win -- by the year 2050. Awards won include Best Humanoid Award, Louis Vuitton Humanoid Cup; First Place, Adult Size class; and Third Place, Technical Challenges for TEAM CHARLI, and First Place, Kid Size Class for TEAM DARwIn.

In January of 2011 students with the Virginia Tech College of Engineering debuted two second-generation Blind Driver Challenge vehicles that allow the blind to drive using non-visual interface assistance technologies. Driven at the Daytona International Speedway, the modified 2010 Ford Escape Hybrid SUVs is part of the ongoing Blind Driver Challenge, a collaborative effort between the Virginia Tech and the nonprofit National Federation of the Blind, partnering with Blacksburg-based TORC Technologies. As part of the public debut, a blind person drove one of the vehicles on the inner-track of the racing landmark speedway.

The Hybrid Electric Vehicle Team of Virginia Tech won the 2011 international EcoCAR Challenge, a three-year design competition that seeks to inspire science and engineering students to build more energy-efficient "green" automobiles. Awards were presented in Washington, D.C., after a two-week finale completion that had teams at General Motor's Milford Proving Grounds in Milford, Mich., and then the U.S. Department of Energy's headquarters in the nation's capital. In all, the team of Virginia Tech College of Engineering graduate and undergraduate students won 14 first place awards at the EcoCAR: The NeXt Challenge: Best Vehicle Testing Complete Presentation, Shortest Braking Distance, Lowest Fuel Consumption, Best Dynamic Consumer Acceptability, National Instruments Most Innovative Use of Graphical System Design Award, Best Progress Reports and Fastest Autocross 'Fun Run' Time. They tied for Best AVL Drive Quality, and won Second Place or Runner Up for Battery Workmanship Award, Lowest Petroleum Energy Use and Lowest Tailpipe Emissions.

A student team at the college's Robotics & Mechanisms Laboratory (RoMeLa) created the world's first and only vehicle that allows a blind or low-vision person to independently operate a motor vehicle without passenger assistance. The student team publicly debuted the prototype car at a summer camp for blind youth. "The Washington Post," Discovery Channel and CBS News' "Early Show" were on hand to capture the action. Fox News, "The New York Times," and "Popular Science" also reported on the team, with "Momentum" and "Machine Design" magazines featuring students and the prototype red buggy on their respective covers. Yet, team members know that media attention is not the reason for their work. They are bettering lives. "We're showing the world the extreme level of capability that the blind already have," said then team leader Greg Jannaman, who now is working for National Instruments. In January of 2011, the team debuted the car at the Daytona International Speedway where it again made national and international news. Virginia Tech's student team took the top spot in the competition of the inaugural 2011 Cyber Security Summit. The summit featured a morning of presentations from speakers in the cyber security field, followed by an afternoon competition where student teams faced off in efforts to attack and defend computer networks. This event is one of a number of cyber security initiatives underway at Virginia Tech to develop education and research efforts that address the critical need of industry and government.

In fall 2011, three students from Virginia Tech's Department of Mining and Minerals Engineering recently won first place in Carlson Software's National Senior Mine Design Competition, marking the fifth straight year Virginia Tech students have placed first in the prominent mine design competition. Class of 2011 seniors Erich Dohm of Gainesville, Ga., and Wilson Lin and Jason Yeager, both of Manassas, Va., won this year's event with their project titled "Flat Creek Quarry," a proposed greenstone hard rock quarry located in Virginia's south central Piedmont region.

The Hybrid Electric Vehicle Team of Virginia Tech won the 2011 international EcoCAR Challenge, a three-year design competition that seeks to inspire science and engineering students to build more energy-efficient "green" automobiles. Awards were presented in Washington, D.C., after a two-week finale completion that had teams at General Motor's Milford Proving Grounds in Milford, Mich., and then the U.S. Department of Energy's headquarters in the nation's capital. In all, the team of Virginia Tech College of Engineering graduate and undergraduate students won 14 first place awards at the EcoCAR: The NeXt Challenge: Best Vehicle Testing Complete Presentation, Shortest Braking Distance, Lowest Fuel Consumption, Best Dynamic Consumer Acceptability, National Instruments Most Innovative Use of Graphical System Design

Award, Best Progress Reports and Fastest Autocross 'Fun Run' Time. They tied for Best AVL Drive Quality, and won Second Place or Runner Up for Battery Workmanship Award, Lowest Petroleum Energy Use and Lowest Tailpipe Emissions.

A group of doctoral students in the Virginia Tech College of Engineering's Computer Science Department and the Center for Human-Computer Interaction recently won first place in the 3D User Interfaces Grand Prize competition at the 2011 Institute of Electrical and Electronics Engineers Symposium. It is the second consecutive first-place win for the team known as the Fighting Gobblers, advised by associate professor Doug Bowman. The team won the competition via a video they prepared for the contest, held in Singapore. The competition required teams to develop a 3D user interface for a difficult virtual interaction task, in this case solving a cube-shaped 3D puzzle in a virtual environment. The 2010 version of the Gobblers, consisting of several different students also advised by Bowman, won the inaugural contest for creating a program that allowed a user to "shop" in a 3D virtual supermarket.

## Major Undergraduate Scholarships

For the 2011-2012 academic year, a total of \$1,062,854 was awarded to undergraduate students in the College of Engineering. Funding is provided by 97 scholarships administered by the College and 168 scholarships administered throughout the engineering departments. Eleven entering freshmen and 39 continuing students received a Dean's Scholar award for fall semester 2011. These scholarships are open to all incoming engineering freshmen and are awarded based on academic potential, community service, leadership potential, family circumstances and essay quality. Each scholarship is available for up to four years of undergraduate study, based on academic performance. This year the College offered four new, and continued 11 Eleanor Davenport Leadership Scholarships. The Davenport Scholarship provides full in-state tuition and fees and is renewable for students who maintain at least a 3.5 grade point average (out of a possible 4.0). The largest sponsor of upper-class scholarships continues to be the Gilbert and Lucille Seay Scholarship Fund, with 70 students receiving a total of \$190,250 in scholarship funding.

## Additional Facts about the College

The University Honors Program offers a unique challenge to students with extraordinary intellectual and creative abilities. The program is available to all engineering departments and includes the opportunity for enrollment in accelerated courses, enriched sections, and independent study.

A five-year Cooperative Education program for qualified students is available in all of the engineering curricula. After at least two qualifying semesters, students may alternate semesters of study on campus with work periods in industry. Participants are required to have a minimum of a 2.0 overall grade point average, and students must have earned a 2.0 in the semester prior to any work experience. Individual departments may impose higher GPA restrictions, including ones based on in-major GPA.

Approximately 8,283 students are enrolled in undergraduate and graduate engineering departments at Virginia Tech as of fall 2010. In the entering 2010-2011 freshman class, the average SAT score for the general engineering student was 1280 and the average high school grade point average was 4.05 on a weighted scale. The male to female ratio in the college is 4:1. Members of under-represented populations make up 17.3 percent of the freshmen class.

Of the 2010-2011 College of Engineering bachelor's degree graduates who were employed full-time, (the most recent year for which statistics are known), 96 percent were employed in a field related to their major. The average annual salary at the bachelor's level was \$60,000.

## Admission

All students admitted to the College of Engineering as freshmen are placed in the Department of Engineering Education and are designated as General Engineering students. Admission to a degree program is competitive, with departmental restrictions established each year by the college. Upon completion of a set of required freshman-level courses, students with acceptable academic records are eligible for transfer into one of the college's 14 degree programs. (The exception is that engineering students who are on the Dean's List their first semester may elect to transfer after one semester.)

Students wishing to transfer into an engineering program or change majors from another college or degree program within the university must meet current standards set by the college for each engineering program. All major changes are processed by the Engineering Education.

Students transferring to Virginia Tech from another college or university will be considered for admission to a degree granting engineering program once 12 hours of degree-applicable coursework is completed at Virginia Tech (including required courses for entry to a department).

The college has a transfer articulation agreement with the Virginia Community College System. VCCS students who complete the transferable Associate Degree in engineering with a minimum 3.0 grade-point-average with "B" or better grades in all engineering, math and science courses, are guaranteed admission to the College of Engineering. Not all Virginia Community Colleges offer engineering courses. The Associate Degree in engineering is offered at Blue Ridge, Central Virginia, Danville, Germanna, J. Sargeant Reynolds, John Tyler, Mountain Empire, New River, Northern Virginia, Piedmont Virginia, Southwest Virginia, Thomas Nelson, Tidewater, Virginia Highlands, Virginia Western.

Engineering Technology credits are not accepted for transfer by the College of Engineering.

## Required Academic Progress

Minimum requirements for graduation include the attainment of at least a "C" (2.0 Grade Point Average) *average*, both overall and in-major. Some departments may have additional requirements or specifications concerning the acceptability of C- or lower grades for in-major courses. Students are expected to sustain progress towards completion of their degree requirements, consulting with their academic advisor regularly.

In addition to meeting university requirements, eligibility requirements for enrollment have been established by individual departments.

Entry into a degree-granting department requires that a student successfully complete all first year required courses. Additional requirements are specific to degree programs and are as follows:

- Entry to General Engineering requires a minimum overall VT GPA of 2.0.
- Chemical Engineering: a student must have completed CHEM 1036/1046.
- Computer Science: a student must earn a grade of C or greater in CS 1114 or 1124
- Construction Engineering and Management requires departmental application & interview. <http://www.mlsoc.vt.edu/BS+CEM>

All degree-granting majors accept applicants on a space-available basis. Applicants with a minimum 3.0 overall VT GPA are guaranteed their first-choice major. Applicants below a 3.0 overall VT GPA will be rank ordered according to GPA and placed in a major based on space availability. A student will be limited to three separate applications; if student is unsuccessful in entering first choice engineering major by third attempt, they must accept a lower-than-first-choice major (either inside or outside the college). (See [http://www.engr.vt.edu/Undergraduate/change\\_of\\_major.html](http://www.engr.vt.edu/Undergraduate/change_of_major.html) for major change process and timing.)

## Graduation Requirements

Degree requirements in the college range from 120 to 136 semester hours. Students should see their departmental advisors to determine the exact requirements of their degree. The 2.0 GPA minimum requirement for graduation also applies to all courses attempted in the student's departmental major; substitute non-departmental courses are not included. Where courses have substantial duplication, credit toward graduation will be given for one course only. Up to 2 credits in physical education may be used toward graduation as free elective credit. ESM 4404 and other courses below the academic potential of the engineering student may not be used towards graduation.

The senior academic year must be completed in residence while enrolled in the major department in the College of Engineering.

Engineering curricula have uniform minimum requirements in the humanities and social sciences. The 18-credit minimum includes 6 credits of Freshman English, usually completed during the first year, and 12 credits of humanities and social science electives selected from Areas 2 and 3 (6 credits each) of the Curriculum for Liberal Education.

Although pass/fail courses may be authorized for those who maintain a GPA above 2.0, students should recognize future disadvantages when transferring to other departments or applying for admission to other professional or graduate colleges. Engineering students are expected to take all major department courses on a grade basis. Independent study and undergraduate research courses are available for those who maintain a GPA above 2.0 overall and in their departmental majors; some departments may require a higher GPA.

The College of Engineering will accept advanced ROTC credit as free elective credit towards graduation. Some departments in engineering may allow the use of selected ROTC courses to meet technical elective requirements. Consult specific departments in the College of Engineering for information.

## Overview

The aerospace and ocean engineering department offers two bachelor of science degree programs which share a broad range of common interests. Students in the department may major in either aerospace engineering or ocean engineering. Many of the course requirements for these degrees are common because the two curricula share a broad range of common interests. Both programs offer a wide range of technical electives. Students with an interest in both majors may enroll in a double degree program.

The objectives of both of the department's programs include the preparation of students for entry level positions and graduate study in the fields of aerospace engineering and ocean vehicle engineering. The department seeks to provide students with a strong background in fundamentals, including theoretical, experimental, and computational aspects of science and engineering which will facilitate lifelong learning and the ability to pursue advanced study. It also seeks to provide students with a broad education in the aerospace and ocean vehicle fields with coverage of the areas of fluid dynamics, vehicle dynamics and control, propulsion, and structures, including an emphasis on design and synthesis in a team environment.

The department's curricula are both vehicle oriented, with an emphasis on aircraft and spacecraft in the aerospace program and on ships of all types in the ocean engineering program. The department's systems engineering approach to these technologies makes them increasingly applicable to other fields such as the automobile industry, high speed train design, and other transportation related areas. Departmental graduates find positions in these fields as well as with the aerospace industry, NASA, the Department of Defense, the ship building industry, and maritime agencies. Employers range from large, multi-national corporations to small consulting firms.

Classroom studies employ modern computational techniques. Laboratory classes use the department's outstanding experimental facilities which include a large, research quality subsonic wind tunnel with a twenty four foot long, six-by-six foot cross section test area and state of the art automated control and data collection systems, a 100 foot long towing tank, a Mach 4 supersonic wind tunnel, a Mach 7 hypersonic wind tunnel, a water tunnel, and several other facilities.

The department encourages student participation in the Cooperative Education Program which gives qualified students valuable industrial experience while working toward their engineering degrees. The department's required design courses often include multidisciplinary and even international team projects which include travel to universities in other parts of the world.

The Aerospace Engineering and Ocean Engineering programs are accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

The department also offers programs of study leading to the M. Engr., M.S., and Ph.D.

AOE students must meet all Curriculum for Liberal Education requirements and only certain "free" electives and courses designated as "P/F Only" may be taken on a Pass/Fail basis. Lists of approved electives including technical, math, Liberal Education, and other electives are available in the department office and on the department's web page.

## Aerospace Engineering Program

A total of 136 credit hours is required for graduation.

<b>First Year</b>		
<i>First Semester</i>		
CHEM 1035	GENERAL CHEMISTRY	3
CHEM 1045	GENERAL CHEMISTRY LAB	1
ENGE 1024	ENGR EXPLORATION	2
ENGL 1105	FRESHMAN ENGLISH	3
MATH 1114	ELEMENTARY LINEAR ALGEBRA	2
MATH 1205	CALCULUS	3
ELECTIVE*		3
	<b>Credits</b>	<b>17</b>
<i>Second Semester</i>		
ENGE 1114	EXPLORATION OF ENGINEERING DESIGN	2
ENGL 1106	FRESHMAN ENGLISH	3
MATH 1206	CALCULUS	3
MATH 1224	VECTOR GEOMETRY	2
PHYS 2305	FOUNDATIONS OF PHYSICS I	4
ELECTIVE*		3
	<b>Credits</b>	<b>17</b>
<b>Second Year</b>		
<i>First Semester</i>		
AOE 2074	COMPUTATIONAL METHODS	3
AOE 2104	INTRO TO AEROSPACE ENGINEERING	3
ESM 2104	STATICS	3
MATH 2224	MULTIVARIABLE CALCULUS	3
PHYS 2306	FOUNDATIONS OF PHYSICS I	4
ELECTIVE*		1
	<b>Credits</b>	<b>17</b>
<i>Second Semester</i>		
AOE 3094	MATERIALS FOR AEROSPACE AND OCEAN ENGINEERING	3
AOE 3104	AIRCRAFT PERFORMANCE	3
ESM 2204	MECHANICS OF DEFORMABLE BODIES	3
ESM 2304	DYNAMICS	3
MATH 2214	INTRO TO DIFFERENTIAL EQUATIONS	3
ELECTIVE*		3
	<b>Credits</b>	<b>18</b>
<b>Third Year</b>		
<i>First Semester</i>		
AOE 3014	AERO/HYDRODYNAMICS	3

TECHNICAL ELECTIVES++		3
	<b>Credits</b>	15

**Satisfactory Progress:** In addition to the requirements of University Policy 91, after attempting 72 credit hours, students must have passed AOE 2074 and AOE 3104 or 3204, and after attempting 108 credit hours, students must have passed 24 credit hours of in-major courses and have 2.0 overall and in-major GPAs.

\* Electives include 6 credits each from Curriculum for Liberal Education (CLE) Areas 2 and 3, 1 credit from CLE Area 6, and 3 credits from CLE Area 7 (the area 7 course may double count with area 2 or 3). The AOE Department requires that ECON 2005 (Principles of Economics) be one of the courses taken in Area 3. The elective credits must include a 1-3 credit computer programming course selected from the following: CS 1044 (Introduction to Programming in C), CS 1054 (Introduction to Programming in Java), CS 1114 (Introduction to Software Design), CS 1124 (Intro to Media Computation), ENGE 2314 (Engineering Problem Solving With C++), or

ENGE 2514 (Introduction to Engineering Computation and Control With Labview). Other computer programming courses may be approved by your advisor. Three to eight credits will be free electives.

\*\* AE majors may take either aircraft or spacecraft design. OE majors must take ship design.

+ Choice of MATH 4574 (Vector and Complex Analysis for Engineers) or MATH/AOE 4404 (Applied Numerical Methods) or STAT 4705 (Probability and Statistics for Engineers)

++ The AOE Department requires 9 credits of technical electives of which 6 credits must be an AOE course and the remaining 3 may be selected from a list of 3000 level and higher AOE and other approved technical courses

[TOP](#)

## **Undergraduate Course Descriptions (AOE)**

### **2074 (ESM 2074): COMPUTATIONAL METHODS**

Solving engineering problems using numerical methods and software, truncation and round-off error, root finding, linear and polynomial regression, interpolation, splines, numerical integration, numerical differentiation, solution of linear simultaneous equations, numerical solutions of ordinary differential equations. A grade of C- or better required in ENGE prerequisite 1114. Pre: ENGE 1114. Co: MATH 2224. (3H,3C)

### **2104: INTRODUCTION TO AEROSPACE ENGINEERING**

An overview of aerospace engineering from a design perspective; introductory aerodynamics, lift, drag, and the standard atmosphere; aircraft performance, stability, and control; propulsion; structures; rocket and spacecraft trajectories and orbits. Must have a C- or better in pre-requisites ENGE 1114 and PHYS 2305. Pre: ENGE 1114, PHYS 2305. (3H,3C)

### **2204: INTRODUCTION TO OCEAN ENGINEERING**

An overview of ocean engineering from a design perspective. Ship types and geometry; stages of ship design; introductory hydrostatics and stability; hydrodynamics; resistance and propulsion; oceanography and waves; loads on ships; ship structural analysis. Must have a C- or better in pre-requisites ENGE 1114 and PHYS 2305. Pre: ENGE 1114, PHYS 2305. (3H,3C)

### **2974: INDEPENDENT STUDY**

Variable credit course.

### **2984: SPECIAL STUDY**

Variable credit course.

### **2994: UNDERGRADUATE RESEARCH**

Variable credit course.

### **3014: AERO/HYDRODYNAMICS**

Two-dimensional potential flow, stream function, velocity potential, flow superposition, circulation and lift, airfoil characteristics. Two-dimensional airfoil theory and panel methods. Three-dimensional lifting line theory and vortex lattice solutions for finite wings. A grade of C- or better required in each prerequisite. Pre: (3104 or 3204), ESM 2304. (3H,3C)

### **3024: THIN-WALLED STRUCTURES**

Review of mechanics of materials. Stresses in stiffened shell beams. Deformation analysis by energy methods. Multicell beams. Introduction to the matrix stiffness method including truss and beam elements. Must have a C- or better in pre-requisites ESM 2104 and ESM 2204. Pre: ESM 2104, ESM 2204. (3H,3C)

### **3034: VEHICLE VIBRATION AND CONTROL**

Free and forced motions of first order system. Free and forced motions of second order systems both undamped and damped. Frequency and time response. Introduction to control, transfer functions, block diagrams, and closed loop system characteristics. Higher order systems. Must have a C- or better in pre-requisites ESM 2304 and Math 2214. Pre: ESM 2304, (MATH 2214 or MATH 2214H). (3H,3C)

### **3044: BOUNDARY LAYER AND HEAT TRANSFER**

Concepts of viscous flows and physical properties equations of laminar motion with heat and mass transfer; exact and approximate solutions; finite-difference methods; transition to turbulence; analysis in turbulent flows. Conduction and convective heat transfer. Must have a C- or better in pre-requisites AOE 3014, ME 3134, and Math 4564. Pre: 3014, ME 3134, MATH 4564. (3H,3C)

### **3054: AOE EXPERIMENTAL METHODS**

Principles of measurement and measurement systems; standards, accuracy, uncertainty and statistical concepts. Practical electronics, detectors, transducers and instruments for aerospace and ocean engineering. Signal conditioning systems and readout devices; digital data acquisition, structures, structural dynamics, fluid dynamics, materials and wind-tunnel testing. Must have a C- or better in pre-requisites AOE 3014, 3024 and 3034. Pre: 3014, 3024, 3034. (1H,6L,3C)

### **3094 (MSE 3094): MATERIALS & MANUFACTURING FOR AERO & OCEAN ENGINEERS**

This course introduces the student of Aerospace and/or Ocean Engineering to the fundamental properties of materials typically required for structural design. The performance characteristics of metals, ceramics, polymers, and composites are presented and contrasted. Foundation principles underlying materials manufacturing are also presented with the goal of providing an understanding of how processing affects material

properties and performance. Must have a C- or better in pre-requisite CHEM 1035. Pre: CHEM 1035. Co: ESM 2204, PHYS 2305. (3H,3C)

#### 3104: AIRCRAFT PERFORMANCE

Performance of aircraft. Analysis of fluid statics and dynamics affecting aircraft performance. Hydrostatics of the standard atmosphere and development of basic equations of fluid dynamics. Lift and drag. Aircraft static performance. Rates of climb, endurance, range, takeoff and landing, and turn performance. Must have a C- or better in pre-requisites ESM 2104 and co-requisite ESM 2304. Pre: 2074, (2104 or 2204), ESM 2104. Co: ESM 2304. (3H,3C)

#### 3114: COMPRESSIBLE AERODYNAMICS

Inviscid, compressible gas dynamics. Continuity, momentum and energy equations, shock waves, Prandtl-Meyer expansions. One-dimensional steady and unsteady flow, Rayleigh line, Fanno line, Shock Tubes. Method of Characteristics, supersonic thin airfoil theory and conical flow. Pre: 3014, ME 3134. (3H,3C)

#### 3124: AEROSPACE STRUCTURES

Aspects of structural analysis pertinent to the design of flight vehicles: aeroelastic divergence, environmental loads, aerospace materials, buckling of thinwalled compression members, and introduction to matrix structural dynamics. Must have a C- or better in pre-requisite AOE 3024. Pre: 3024. (3H,3C)

#### 3134: STABILITY AND CONTROL

Equations of vehicle motion. Linearized analysis. Estimation of stability derivatives, longitudinal and lateral-directional static stability, and control requirements. Dynamic characteristics including stability and mode shapes. Must have a C- or better in pre-requisite AOE 3034. Pre: 3034. (3H,3C)

#### 3204: NAVAL ARCHITECTURE

Buoyancy of ocean vehicles. Hull geometry, line drawings, coefficients of form. Hydrostatic calculations, development of a computer program for hydrostatic analysis. Review and calculations. Intact and damaged stability of ocean vehicles. Large angle stability. Stability criteria. Viscosity. Stress in a fluid. Basic laws of fluid dynamics. Must have a C- or better in pre-requisites ESM 2104 and MATH 2224. Pre: ESM 2104, MATH 2224, AOE 2074, (AOE 2104 or AOE 2204). Co: ESM 2304. (3H,3C)

#### 3224: OCEAN STRUCTURES

Overview of surface ship, submarine and offshore structural systems, materials and loadings. Application of beam and plate bending and buckling theories. Frame and finite element structural analysis. Must have a C- or better in pre-requisite ESM 3024. Pre: 3024. (3H,3C)

#### 3264: RESISTANCE AND PROPULSION OF SHIPS

Methods of estimating ship resistance; propulsion devices and their efficiencies; Resistance components; Froude scaling of model test data; Methodical series; Planing hulls; Propellers; Waterjets; Propeller design; Computer methods; Advanced marine vehicles. Must have a C- or better in pre-requisites AOE 3204 and AOE 3014. Pre: 3204, 3014. (3H,3C)

#### 4004: COMPUTER-AIDED CONTROL SYSTEM DESIGN

Computer-aided design and analysis of control systems for high-order linear systems. Stability and performance design criteria. Root locus, PID, lead/lag, and pole-placement design methods. Introduction to modern state-space modeling methods. Design problems involving aircraft, ship, space, and ground-vehicle systems. Pre: 3034. (3H,3C)

#### 4024 (ESM 4734): AN INTRODUCTION TO THE FINITE ELEMENT METHOD

The finite element method is introduced as a numerical method of solving the ordinary and partial differential equations arising in fluid flow, heat transfer, and solid and structural mechanics. The classes of problems considered include those described by the second-order and fourth-order ordinary differential equations and second-order partial differential equations. Both theory and applications of the method to problems in various fields of engineering and applied sciences will be studied. Pre: 2074, MATH 2224. (3H,3C)

#### 4034: COMPUTATIONAL STRUCTURAL ANALYSIS

Static and vibratory response of framed structures. The matrix eigenvalue problem for buckling and free vibrations. Static response of laminated composite plates by the finite element method. Pre: 3124 or 3224. (3H,3C)

#### 4054 (CEE 4444) (ESM 4444): STABILITY OF STRUCTURES

Introduction to the methods of static structural stability analysis and their applications. Buckling of columns and frames. Energy method and approximate solutions. Elastic and inelastic behavior. Torsional and lateral buckling. Use of stability as a structural design criterion. Pre: 3024 or CEE 3404. (3H,3C) II.

#### 4064 (CEE 4364): FLUID FLOWS IN NATURE

Course designed to build upon and broaden a basic traditional engineering knowledge of fluid flows into areas concerning a variety of natural occurrences and phenomena that involve fluid motions in important ways. Drag of sessile systems and motile animals, gliding and soaring, flying and swimming, internal flows in organisms, low Reynolds number flows, fluid-fluid interfaces, unsteady flows in nature and wind engineering. I Pre: 3014 or CEE 3304 or ESM 3024 or ME 3404. (3H,3C)

#### 4065-4066: AIRCRAFT DESIGN

Analysis and design of various aeronautical vehicles and systems. Pre: 3054, 3114, 3124, 3134. (2H,3L,3C)

#### 4084 (ESM 4084): ENGINEERING DESIGN OPTIMIZATION

Use of mathematical programming methods for engineering design optimization including linear programming, penalty function methods, and gradient projection methods. Applications to minimum weight design, open-loop optimum control, machine design, and appropriate design problems from other engineering disciplines. Pre: MATH 2224. (3H,3C)

#### 4114: APPLIED COMPUTATIONAL AERODYNAMICS

Development of computational methods for application to wing aerodynamic problems. Incompressible airfoil codes. Panel methods and vortex lattice methods. Finite difference techniques. Transonic and supersonic applications. Pre: 3044, 3114. (3H,3C)

#### 4124: CONFIGURATION AERODYNAMICS

Aerodynamic design of flight vehicles, with emphasis on nonlinear flowfields and configuration concepts. Aerodynamic analysis and design for transonic, supersonic, hypersonic flows, and low speed high alpha flight. Includes case studies of classic configurations and aerodynamic design papers. Pre: 3014, 3114. (3H,3C)

#### 4134: ASTROMECHANICS

Application of Newton's Laws to the dynamics of spaceflight. Two-body problem, Kepler's Laws, energy and time relations, orbit specification and determination. Orbital maneuver and transfer, patched conic approximations, relative motion, and elements of optimal maneuvering. Must have a C- or better in prerequisite ESM 2304. Pre: ESM 2304. (3H,3C)

#### 4140: SPACECRAFT DYNAMICS AND CONTROL

Space missions and the way pointing requirements affect attitude control systems. Rotational kinematics and attitude determination algorithms. Modeling and analysis of the attitude dynamics of space vehicles. Rigid body dynamics, effects of energy dissipation. Gravity gradient, spin, and dual spin stabilization. Rotational maneuvers. Environmental torques. Impacts of attitude stabilization techniques on mission performance. Must have a C- or better in pre-requisites AOE 3034 and 4134. Pre: 3034, 4134. (3H,3C)

#### 4144: AIRCRAFT AUTOMATIC FLIGHT CONTROL

Introduction and history of aircraft automatic flight control. Mathematical models of linear systems elements. Bode amplitude and phase plots of longitudinal and lateral control system analysis. Inputs and system performance assessment. Multiloop flight control systems. Applications to representative aircraft. Pre: 3134, MATH 4564. (3H,3C)

#### 4154: AEROSPACE ENGINEERING LABORATORY

Wind tunnel laboratory experiments related to subsonic and supersonic aerodynamics. Continuation of AOE 3054 for Aerospace Engineering students. Writing of technical laboratory reports; design of experiments. Must have a C- or better in pre-requisites AOE 3054, AOE 3114, AOE 3124 and AOE 3134. Pre: 3054, 3114, 3124, (3134 or 4140). (3L,1C)

#### 4164: SPECIAL TOPICS IN VEHICLE PERFORMANCE

Three dimensional point-mass equations of motion over flat and spherical Earth. Aerodynamic and propulsive modeling. Numerical integration of equations of motion. Analytic approximations and solutions. Energy state models. Advanced topics. Pre: 3104, 3134. (3H,3C)

#### 4165-4166: SPACECRAFT DESIGN

Analysis and design of various space vehicles and systems. Pre: 3054, 3114, 3124, 4140. (2H,3L,3C)

#### 4174 (ME 4174): SPACECRAFT PROPULSION

Spacecraft propulsion systems and their applications in orbital, interplanetary, and interstellar flight. Rocket propulsion fundamentals; advanced mission analysis; physics and engineering of chemical rockets, electrical thrusters, and propellantless systems (tethers and sails); spacecraft integration issues. Pre: 4234 or ME 4234. (3H,3C)

#### 4184 (ESM 4184): DESIGN AND OPTIMIZATION OF COMPOSITE STRUCTURES

Design aspects of laminate constitutive relations, coupling and decoupling of in-plane and out-of-plane elastic response. Tailoring of laminated composite materials to meet design requirements on stiffness and strength through the use of graphical and numerical optimization techniques. Introduction to integer programming: branch-and-bound method and genetic algorithms. Stacking sequence design of laminated composite beams and plates via integer programming. Pre: 3024 or ESM 3084, CEE 3404. (3H,3C)

#### 4204: OCEAN ACOUSTICS

Basic problems and techniques of underwater acoustics; sonar equations, sound propagation in the ocean, generation and detection of underwater sound, background and self noise, reverberation, target strength, applications. Pre: MATH 4564. (3H,3C)

#### 4214: OCEAN WAVE MECHANICS

Introduction to theory of wave motion in different water depth regions, including wave generation and propagation. Description of wave statistics and spectral representation for realistic ocean conditions. Wave forces on stationary structures. Nonlinear waves, wave properties, and methods of analysis. Must have a C- or better in pre-requisites AOE 3014 and MATH 4564. Pre: 3014, MATH 4564. (3H,3C)

#### 4224: PROBABILISTIC ANALYSIS OF OCEAN SYSTEMS

Representation of random phenomena for ocean systems (waves, vehicle motions, wave-induced loads). Concepts of correlation (for vector processes), power spectra, probability density, envelope processes. Responses of linear dynamic systems, statistics of responses, exceedance probability, extremes. Extension to nonlinear systems. Pre: 3234, MATH 4564. (3H,3C)

#### 4234 (ME 4234): AEROSPACE PROPULSION SYSTEMS

Design principles and performance analysis of atmospheric and space propulsion engines and systems. Application of thermodynamics, compressible fluid flow and combustion fundamentals to the design of gas turbine and rocket engines and components, including inlets, turbomachines, combustors, and nozzles. Matching of propulsion system to vehicle requirements. Must have a C- or better in pre-requisites AOE 3113 and ME 3134 or ME 3404 and ME 3124. Pre: (3114, ME 3134) or (ME 3404, ME 3124). (3H,3C)

#### 4244 (ME 4244): MARINE ENGINEERING

Analysis of major ship propulsion devices (propellers, water jets). Integration with propulsion plant and machinery. Characteristics of marine steam turbines, nuclear power plants, marine diesels, and marine gas turbines. Shafting system, bearings, and vibration problems. Must have a C- or better in pre-requisites AOE 3204 and ME 3124 or ME 3134. Pre: 3204, (ME 3134 or ME 3124). (3H,3C)

#### 4254: OCEAN ENGINEERING LABORATORY

Continuation of AOE 3054 for Ocean Engineering students using facilities and instrumentation pertinent to ocean engineering. Writing of technical laboratory reports; design of experiments. Must have a C- or better in pre-requisites AOE 3054 and AOE 3264. Pre: 3054, 3264. (1H,2L,1C)

#### 4264: PRINCIPLES OF NAVAL ENGINEERING

This course studies naval engineering systems and systems engineering processes with particular emphasis on: naval missions; combat system performance including radar; underwater acoustics and sonar; ballistics; weapon propulsion and architecture; weapons effects; ship survivability including underwater explosion and shock waves; surface ship and submarine balance and feasibility analysis; and total ship integration. Senior Standing required Pre: 2204, MATH 2224, PHYS 2306. (3H,3C)

#### 4265-4266: SHIP DESIGN

Study and application of systems engineering process to simultaneous development of ship requirements, concept exploration, selection of ship technologies, and selection of a baseline ship design. Emphasis is on hullform, machinery, ship synthesis and balance, metrics and design optimization in the context of a ship design project. Baseline design selected in the first semester is developed in the second semester. This includes hullform; topside arrangements; internal subdivision and tankage; power and propulsion; auxiliary machinery, general arrangements, machinery weights, space, seakeeping, cost, risk, and overall balance and feasibility. Pre: 3054, 3224, 3264, 4214, 4244. Co: 4334 for 4265. (2H,3L,3C)

#### 4274: COMPUTER BASED DESIGN OF OCEAN STRUCTURES

Computer-based structural models for combined finite element analysis, limit state analysis and optimization. Torsion of thin-walled structures. Buckling of stiffened panels and cylinders. Eigenvalue methods for buckling and vibration. Incremental plastic collapse; other progressive collapse. Ultimate strength of large structural modules. Pre: 3224. (3H,3C)

#### 4334: SHIP DYNAMICS

Analysis of motions of rigid body vehicles in water, including influence of added mass and buoyancy. Seakeeping motion responses in waves, wave-induced structural loads, random response analysis via spectral analysis, and extreme response analysis. Introduction to hydroelasticity and maneuvering. Must have a C- or better in pre-requisites AOE 3014, AOE 3034, AOE 4214 and MATH 4564. Pre: 3014, 3034, 4214, MATH 4564. (3H,3C)

#### 4344: DYN OF HIGH-SPEED MARINE CRAFT

Introduction to the dynamics of high-speed craft, including surface effect ships, hydrofoil vessels, semi-displacement monohulls and catamarans, and planing vessels. Pre: 3264, 4334. (3H,3C)

#### 4404 (MATH 4404): APPLIED NUMERICAL METHODS

Interpolation and approximation, numerical integration, solution of equations, matrices and eigenvalues, systems of equations, approximate solution of ordinary and partial differential equations. Applications to physical problems. Partially duplicates 4554 and 3414. Mathematics majors or minors cannot take both 4404 and 3414. X-grade allowed. Pre: MATH 4564, (ESM 2074 or AOE 2074). (3H,3C)

#### 4434: INTRODUCTION TO COMPUTATIONAL FLUID DYNAMICS

Euler and Navier-Stokes equations governing the flow of gases and liquids. Mathematical character of partial differential equations. Discretization approaches with a focus on the finite difference method. Explicit and implicit solution techniques and their numerical stability. Introduction to verification, validation, and uncertainty quantification for computational fluid dynamics predictions. Pre: MATH 2214, (AOE 3044 or ME 3404 or ESM 3016). (3H,3C)

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

## Overview

The Biological Systems Engineering program integrates biology, chemistry, and physics with engineering to solve engineering problems associated with the environmentally sound production, processing, and utilization of renewable resources. The curriculum differs from other engineering programs in that it focuses on the sustainable production and management of natural resources and biological materials. The curriculum prepares graduates for a variety of engineering careers. Biological systems engineering graduates are typically employed by environmental consulting firms, state and federal agencies, universities, and food processing, pharmaceutical, biotechnology, and energy industries.

The Biological Systems Engineering program is designed to graduate engineers who will be leaders in applying engineering principles to biological systems. The BSE program prepares graduates to research, design, and implement systems that mimic, adapt, or utilize biological processes for conservation and restoration of natural resources and sustainable development and production of value-added products.

The Biological Systems Engineering program at Virginia Tech provides a strong, broad-based engineering education with opportunity for limited specialization utilizing the 20 credits of technical electives available in the curriculum. Using these electives, BSE students may specialize in one of the two formal options offered by the department: Land and Water Resources Engineering or Bioprocess Engineering. In addition, the program may also be used as a pre-med or pre-vet program.

The **Land and Water Resources Engineering Option** is designed for students interested in a career in environmental protection and natural resources management. Biological, chemical, and engineering principles are applied to the wise use, conservation, and management of natural resources, particularly land and water. The option is unique in that it addresses nonpoint sources of pollution (water pollution caused by rainfall and runoff from land surfaces such as parking lots, golf courses, agricultural fields, construction sites) that are now responsible for more than half of the water quality problems in the United States. To pursue the Land and Water Resources Engineering Option, students must have junior standing and have completed BSE 2105. Students must receive a grade of C- or better in each course comprising the required 21 hours of the Land and Water Resources Engineering Option and an overall average of 2.0 or better in these courses. The required courses for the Land and Water Resources Engineering Option include:

- BSE 3305: Land & Water Resources Engineering
- BSE 3306: Land & Water Resources Engineering
- BSE 3314: CADD for Land and Water Resources
- BSE 4304: NPS Pollution Modeling & Management
- BSE 4344: Geographic Information Systems for Engineers
- CEE 3104: Introduction to Environmental Engineering
- CSES 3114: Soils
- CSES 3124: Soils Lab

Those who complete the requirements of this option will have Land and Water Resources Engineering Option noted on their transcript.

The **Bioprocess Engineering Option** is tailored for students interested in the design and development of equipment and processes for environmentally responsible manufacturing of value-added products such as food, feed, biofuels, pharmaceuticals, nutraceuticals, chemicals, polymers, and other biological products from renewable biological materials. To pursue the Bioprocess Engineering Option, students must have junior standing and have completed BSE 2105. The required courses for the Bioprocess Engineering Option include:

- BSE 3524: Unit Operations in Biological Systems Engineering
- BSE 4504: Bioprocess Engineering
- BSE 4514: Industrial Processing of Biological Materials
- BSE 4524: Biological Process Plant Design
- BSE 4544: Protein Separation Engineering
- BSE 4604: Food Process Engineering
- BIOL 2614: General Microbiology Lab

Those who complete the requirements of this option will have Bioprocess Engineering Option noted on their transcript.

Recognizing the importance of "hands-on" experience in engineering education, instructional laboratories are included in over half the courses in Biological Systems Engineering. These laboratory courses are designed to enhance understanding of theoretical concepts through hands-on activities. In addition to providing a strong and broad-based engineering education, the program emphasizes communication, team work skills, and design experience. The department participates in the Cooperative Education Program, which gives qualified students valuable work experience while pursuing an undergraduate degree. Students are also encouraged to participate in undergraduate research and study abroad programs. Many BSE students are employed in departmental research laboratories.

Design and teamwork experiences are integral parts of the program. In the second year, students work in teams to design, build, and test a solution to an assigned design problem. Throughout the junior year, students acquire knowledge and analysis skills required for successful and professional engineering design through course assignments. The senior year design sequence gives students a comprehensive design experience in which they utilize much of the knowledge they have acquired through their other courses. Students work in teams to solve "real-life" engineering problems.

The relatively small class sizes in Biological Systems Engineering promote excellent interaction between faculty and students. Mentoring begins early in the second year when each student is assigned a faculty advisor who follows the student's progress through graduation.

The bachelor of science in biological systems engineering is offered through the College of Engineering and is accredited by the Engineering Accreditation Commission of ABET, Inc., 111 Market Place, Suite 1050, Baltimore, MD 21202-4012 – telephone: (410) 347-7700. The department offers over 20 endowed scholarships to students enrolled in Biological Systems Engineering; students are also eligible for College of Engineering and other university scholarships.

In addition to the undergraduate degree program, programs of study leading to master of engineering, master of science, and Ph.D. degrees are available in the department. The BSE department also participates in the Accelerated Undergraduate/Graduate degree program. Through this program, undergraduate students with a GPA of 3.4 or above can apply for admission to the Graduate School during their junior year. If admitted, students may apply up to 12 hours of graduate coursework to both their graduate and undergraduate degree requirements, thus accelerating completion of a master's degree in BSE.

## Biological Systems Engineering Program (BSE)

(This program applies to students graduating in 2013.)

<b>First Year</b>			
<b>First Semester</b>	<b>Credits</b>	<b>Second Semester</b>	<b>Credits</b>
CHEM 1035: General Chemistry	3	CHEM 1036: General Chemistry	3
CHEM 1045: General Chemistry Lab	1	ENGE 1114: Exploration Eng. Design or ENGE 1104: Exploration Digital Future	2
ENGE 1024 Eng. Exploration	2	ENGL 1106: Freshman English	3
ENGL 1105: Freshman English	3	MATH 1206: Calculus II	3
MATH 1205: Calculus I	3	MATH 1224: Vector Geometry	2
MATH 1114: Elementary Linear Algebra	2	PHYS 2305: Foundations of Physics I	4
CLE Courses <sup>1</sup>	3		<b>17</b>
	<b>17</b>		
<b>Second Year</b>			
<b>First Semester</b>	<b>Credits</b>	<b>Second Semester</b>	<b>Credits</b>
ESM 2104: Statics	3	ESM 2304: Dynamics	3
Math 2224: Multivariable Calculus	3	Math 2214: Differential Equations	3
Phys 2306: Foundations of Physics I	4	ESM 2204: Mechanics of Deformables	3

Biol 1105: Principles of Biology	3	Biol 1106: Principles of Biology	3
BSE 2105: Introduction to BSE	2	BSE 3144: Engr Analysis for Biol Systems	2
CHEM 2514 or 2535 or 2565: Organic Chemistry	3	ISE 2014: Engineering Economy	2
	<b>18</b>		<b>16</b>
<b>Third Year</b>			
<b>First Semester</b>	<b>Credits</b>	<b>Second Semester</b>	<b>Credits</b>
BSE 3134: Biological Systems Eng. Seminar	1	BSE 3504: Transport Processes in BSE	3
BSE 3154: Thermodynamics of Biological Sys.	3	ECE 3054: Electrical Theory	3
ESM 3024: Fluid Mechanics	3	BSE 3524: Unit Operations in BSE	3
CHEM 3615 or 4615 Physical Chemistry	3	BIOL 2604: General Microbiology	3
ENGE 2344: Computer-Aided Drafting	1	CLE Courses <sup>1</sup>	3
CLE Courses <sup>1</sup>	6		
	<b>17</b>		<b>15</b>
<b>Fourth Year</b>			
<b>First Semester</b>	<b>Credits</b>	<b>Second Semester</b>	<b>Credits</b>
BSE 4125: Comprehensive Design Project	2	BSE 4126: Comprehensive Design Project	2
BSE 4004: Instrumentation & Exp. Mechanics	3	BSE elective	3
BSE elective	3	Technical elective	5
STAT 4604: Stat. Meth. for Engrs. or STAT 4705: Probability & Statistics for Engrs.	3	Engineering topics elective	3
Technical elective	3	CLE Courses <sup>1</sup>	4
Engineering topics elective	3		<b>17</b>
	<b>17</b>		

<sup>1</sup> These courses must include six credits each from Curriculum for Liberal Education (CLE) Areas 2 and 3; one credit from Area 6; and three credits from Area 7 (the Area 7 course may double count with Area 2 or Area 3, or with a qualifying technical elective).

In addition to university policy, for graduation, a student must complete 134 credits with a minimum overall GPA of 2.0 and a minimum in-major GPA of 2.0. The in-major GPA calculation uses the following courses: BSE 2105, 3134, 3144, 3154, 3504, 3524, 4004, 4125, 4126, the 6 hours of required BSE electives and additional BSE electives (if taken).

**Eligibility for continued enrollment:** upon having attempted 72 hours (including transfer, advanced placement, advanced standing, and credit by examination), "satisfactory progress" toward a B.S. degree will include the following minimum criteria: having a GPA of at least 2.0; earning a C- or better in BSE 2105 and passing Phys 2306, Math 2224, 2214.

## Undergraduate Course Descriptions (BSE)

**Courses for Engineering Students**  
(See [College of Agriculture and Life Sciences](#) for courses for non-engineering students)

### 2004: INTRODUCTION TO BIOLOGICAL SYSTEMS ENGINEERING

Introduction to the fundamental concepts of Biological Systems Engineering, including statistics, heat and mass balances, protein separation, microbial metabolism, and enzyme kinetics. Engineering design process, engineering problem-solving tools and techniques, development of oral and written communication skills, and the importance of teamwork and ethics in Biological Systems Engineering. Pre: ENGE 1024. (1H,3L,2C)

### 2984: SPECIAL STUDY

Variable credit course.

### 3134: BIOLOGICAL SYSTEMS ENGINEERING SEMINAR

Critical review of technical and professional articles on current topics in Biological Systems Engineering. Development of oral presentation and technical writing skills. Contemporary ethical, professional, and global issues in Biological Systems Engineering. Pre: 2105. (2L,1C)

### 3144: ENGINEERING ANALYSIS FOR BIOLOGICAL SYSTEMS USING NUMERICAL METHODS

Solving engineering problems related to biological systems using numerical analysis including root finding, numerical integration, differentiation,

interpolation and numerical solution of ordinary differential equations. Error analysis and programming with engineering software. Pre: 2105, MATH 2214. (2H,2C)

#### 3154: THERMODYNAMICS OF BIOLOGICAL SYSTEMS

Fundamental concepts, first and second laws, psychrometrics applied to plant and animal environments, introduction to Gibbs energy, and application of calorimetry to gain basic understanding of energy flow in a biological system. Pre: MATH 2214. (3H,3C)

#### 3305-3306: LAND AND WATER RESOURCES ENGINEERING

3305: Surface and groundwater hydrology, soil physics, irrigation principles, nonpoint source pollution control, land surveying. 3306: Erosion and sediment transport; transport and fate of nutrients, pesticides and pathogens; design of wetlands, detention facilities and other management practices for rural and urban nonpoint source pollution control; design of small dams and reservoirs. Pre: 2105. Co: CSES 3114, ESM 3024 for 3305. (2H,3L,3C)

#### 3314: COMPUTER-AIDED DESIGN AND DRAFTING FOR LAND AND WATER RESOURCES ENGINEERING

Introduction to computer-aided design and drafting for land and water resources engineering. Representation of features in two and three dimensions for documentation and visualization of land and water resources engineering projects. Create plans, cross sections, detail drawings, and three dimensional visualizations using computer-aided design and drafting tools. Partial duplication of ENGE 2344. Pre: 3305. (3H,2L,2C)

#### 3324: SMALL WATERSHED HYDROLOGY

Precipitation, soil physics, infiltration, evapotranspiration, groundwater hydrology, overland flow, open channel flow, flow routing, hydraulic analysis. Co: CEE 3304, CHE 3114, ESM 3015, ESM 3024, ME 3404. (3H,3C)

#### 3414 (CEE 3414): DESIGN OF WOOD STRUCTURES

Wood as an engineering material, loads, structural lumber, glulam, plywood, design of single structural elements, combined stress design, fastener design, truss design, pole and post-frame structures, shear wall, and diaphragm design. I Pre: CEE 3404. (3H,3C)

#### 3494: ADVANCED WELDING TECHNOLOGY

Techniques in welding that include gas, submerged metal arc, metal inert gas, pulsed arc, and tungsten inert gas welding. Design of welding structures, fundamentals of heat treatment, and plasma arc cutting. Consent required. I Pre: ISE 2214. (3L,1C)

#### 3504: TRANSPORT PROCESSES IN BIOLOGICAL SYSTEMS

Introduction to material and energy balances in biological systems. Fundamentals of heat and mass transfer in biological systems. One and two dimensional conduction, convection, and diffusion of thermal energy and mass. Heat and mass transfer rates, steady and unsteady state conduction, convection, diffusion; design of simple heat exchangers. Application of these topics and fluid mechanics to fluid handling, bacterial growth, plant nutrient uptake, enzymatic reactions. Pre: 3154, ESM 3024. (3H,3C)

#### 3514: PHYSICAL PROPERTIES OF BIOLOGICAL MATERIALS

Physical characteristics and physical properties to include mechanical, thermal, and electromagnetic properties of whole and processed biological products are studied. Laboratory methods for measuring physical properties are included. Pre: ESM 3024. (2H,3L,3C) II.

#### 3524: UNIT OPERATIONS IN BIOLOGICAL SYSTEMS ENGINEERING

Unit operations for processing biological materials including heat exchangers, evaporation, drying, mixing, homogenization, extrusion, phase and multi-phase separation, and size reduction. Laboratory hands-on experience in various unit operations. Co: 3504. (2H,3L,3C)

#### 4125-4126: COMPREHENSIVE DESIGN PROJECT

4125: Identify and develop an engineering design project using the team approach; use of literature resources to define project objectives and approach; present project proposal in a professional written and oral manner; engineering ethics, professionalism and contemporary issues. 4126: Complete a comprehensive design project using the team approach and make professional presentations of the final design. Completion of 96 hours and overall GPA of 2.0 or better. Pre: 3306 or 3524 for 4125; 4125 for 4126. 4125: (1H,3L,2C) 4126: (6L,2C)

#### 4144: BIOLOGICAL SYSTEMS SIMULATION

Study of modeling techniques and application of these techniques to reaction kinetics, crop growth, and systems analysis. Emphasis is on development of basic understanding of methods for defining and evaluating interrelationships between parameters in a biological system. I Pre: 3504. (3H,3C)

#### 4204: INSTRUMENTATION

Introduction to instrumentation and sensors for measurement and control of biological systems. Sensor response dynamics, data acquisition, sensor selection, signal processing and signal conditioning principles. Experimental determination of velocity, pressure, strain, displacement, forces and chemical constituents. Data analysis focused on uncertainty, error and statistical concepts. (2H,2L,3C)

#### 4304: NONPOINT SOURCE POLLUTION MODELING AND MANAGEMENT

Concepts, principles and application of modeling and monitoring for assessment and management of nonpoint source pollution. Design and implementation of monitoring systems. Concepts of modeling agroecosystems and land use impacts on hydrologic/water quality response of upland catchments. Model selection, calibration, validation, and application for comparative analysis. Screening models using Geographic Information Systems. Case studies in current watershed management issues, with a focus on agricultural waste and nutrient management, using existing field and watershed models. Pre: 3306. (2H,3L,3C)

#### 4324: NONPOINT SOURCE POLLUTION

Engineering aspects of the sources and magnitudes of nonpoint source pollution, major causative factors, and control techniques. Emphasis on hydrologic factors, erosion, atmospheric deposition, adsorption and degradation of pollutants in soil, disposal of agricultural wastes, and management for the control of urban and agricultural nonpoint source

pollution. Pre: CEE 3104. (3H,3C)

#### 4344: GEOGRAPHIC INFORMATION SYSTEMS FOR ENGINEERS

Conceptual, technical, and operational aspects of geographic information systems as a tool for storage, analysis, and presentation of spatial information. Focus on engineering applications in resource management, site selection, and network analysis. Laboratory work and senior standing required. (2H,3L,3C) II.

#### 4394: WATER SUPPLY AND SANITATION IN DEVELOPING COUNTRIES

Social, economic and engineering principles of water supply and sanitation in developing countries as affected by climate, cultural and sociological factors, and material and financial resources. Pre: CEE 3104. (3H,3C) II.

#### 4404: DESIGN OF MACHINERY SYSTEMS

Functional analysis and engineering design and selection of machinery components and systems for agricultural, food, and processing applications. Design, sizing, and selection of components, power units (internal combustion engines and electronic motors), transmission devices (belts, chains, gears, hydraulics, and drivelines), material handling devices, (pumps, fans, and conveyors), and agricultural equipment (tillage, planting and chemical applications). Pre: ESM 2204, ESM 2304, ESM 3024, BSE 3154. (2H,3L,3C)

#### 4424 (ME 4434): FLUID POWER SYSTEMS AND CONTROLS

Design and analysis of industrial and mobile hydraulic systems. Hydrostatic transmissions. Electrohydraulic servovalve characteristics and use in precise position and speed control application. Characteristics of pumps, motors, valves, and activators illustrated in laboratory exercises. Pre: ESM 3024 or ME 3404. (2H,3L,3C)

#### 4504: BIOPROCESS ENGINEERING

Study of the engineering concepts for biological conversion of raw materials to food, pharmaceuticals, fuels, and chemicals. Emphasis is placed on enzyme kinetics and technology, bioreaction kinetics, analysis, and control of bioreactors and fermenters, and downstream processing of bioreaction products. Pre: 3504, BIOL 2604, (CHEM 2514 or CHEM 2535 or CHEM 2565 or CHEM 2565H), (CHEM 3615 or CHEM 3615H or CHEM 4615). (3H,3C) II.

#### 4514: INDUSTRIAL PROCESSING OF BIOLOGICAL MATERIALS

Principles of industrial processing of biological materials. Surveys the major food processing and biopharmaceutical industries and the major processing steps involved in the production of vegetable oils, starch, corn sweeteners, biofuels, protein, dairy products, meat and poultry, seafood, fruits and vegetables, and biopharmaceuticals. Economics, safety, environmental, and quality control factors involved in the processing of biological materials. Pre: (3524, 4604). (3H,3C)

#### 4524: BIOLOGICAL PROCESS PLANT DESIGN

Engineering principles for design of systems for processing biological materials into primary and secondary products. Delivery, scheduling, storage requirements, economic analysis. Process control and instrumentation of bioprocessing plants. Pre: 4504, 4604. (3H,3C)

#### 4544 (CHE 4544): PROTEIN SEPARATION ENGINEERING

Concepts, principles and applications of various unit operations used in protein separations. Properties of biological materials, such as cells and proteins, and their influences on process design. Design of processes for protein purification based on the impurities to be eliminated. Concepts and principles of scale-up of unit operations. Case studies in practical protein recovery and purification issues, with a focus on enhanced protein purification by genetic engineering. Protein purification process simulation and optimization using process simulation software. Pre: 3504 or CHE 3144. (3H,3C)

#### 4604: FOOD PROCESS ENGINEERING

Analysis and design of food processing operations including thermal pasteurization and sterilization, freezing, extrusion, texturization, and mechanical separation. Pre: 3504, 3524. (3H,3C)

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

## Overview

Skillful and creative applications of the principles of chemistry, biochemistry, biology, mathematics, and physics are needed to solve the problems now confronting society. Whether these problems involve energy, food, health, environmental quality, materials, or whatever impacts us, the modern chemical engineer is the professional concerned with finding economically and socially acceptable solutions. The program prepares graduates for employment in a great variety of industries including the chemical, petroleum, biochemicals, pharmaceutical, paper, environmental, fibers, plastics, food, electronics, and consumer product industries. Students may customize their academic program around an industry of their interest by judiciously selecting electives. For example, areas of concentration such as polymers, biotechnology, marketing, and environmental chemical engineering are common choices.

The goal of the undergraduate program is to produce chemical engineering graduates who are prepared for professional careers and/or graduate school. In fulfilling this goal the department has set three primary objectives for the graduates:

- Graduates will demonstrate a thorough understanding of chemical engineering fundamentals;
- Graduates will be successful in a variety of professional careers, including those outside of traditional chemical engineering fields;
- Graduates will be able to function in a modern professional environment

The curriculum has been developed to meet the department goal and the objectives for the graduates. The curriculum is demanding and a GPA of at least 2.50 is recommended for transfer into the program at the sophomore level. An average GPA of at least 2.00 in all ChE courses attempted is required for continued enrollment in the department. The department has specific grade policies for continuation in the program and for graduation. For further information on these policies, please contact the department.

The chemical engineering curriculum integrates studies in thermodynamics, fluid mechanics, heat transfer, mass transfer, process control, reaction kinetics, plant and process design, verbal and written communications, and reaction kinetics, along with professional ethics and environmental awareness. Students gain hands-on experience with the equipment described in the courses during the summer Unit Operations Laboratory. The laboratory and the senior design courses are recognized as two of the high points in the undergraduate program. Throughout these studies, the student learns the elements of the design of chemical processes and chemical processing equipment. The experience culminates in participation in a national senior-level design contest. The computer is a necessary tool in all the courses and the same software used in industry is used in the design courses.

In addition to the basic undergraduate program outlined here, more sophisticated and specialized programs leading to the M.S. and Ph.D. in chemical engineering also are offered (see [Graduate Catalog](#)).

The department participates in the Cooperative Education Program whereby qualified students may alternate periods of study with periods of professional employment.

## Chemical Engineering Program

A total of 135 semester credits are required for graduation (effective with Class of 2006).

<b>First Year</b>	
<i>First Semester</i>	
CHEM 1035: General Chemistry	3
CHEM 1045: General Chemistry Lab	1
ENGE 1024: Engineering Explorations	2
ENGL 1105: Freshman English	3
MATH 1205: Calculus	3
MATH 1114 : Linear Algebra	2
Elective	3
<b>Credits</b>	<b>17</b>
<i>Second Semester</i>	
CHEM 1036: General Chemistry	3
CHEM 1046: General Chemistry Lab	1
ENGE 1114: Exploration Engineering Design	2
ENGL 1106: Freshman English	3
MATH 1206: Calculus	3
MATH 1224: Vector Geometry	2
PHYS 2305: Foundations of Physics I	4
<b>Credits</b>	<b>18</b>
<b>Second Year</b>	
<i>First Semester</i>	
CHE 2114: Mass and Energy Balances	3
CHEM 2535: Organic Chemistry (or 2565)	3
CHEM 2545: Organic Chemistry Lab	1
CHEM 3615: Physical Chemistry	3
MATH 2224: Calculus	3
PHYS 2306: Foundations of Physics II	4
<b>Credits</b>	<b>17</b>
<i>Second Semester</i>	
CHE 2004: CHE Sophomore Seminar	1
CHE 2124: CHE Simulations	2
CHE 2164: CHE Thermodynamics	3
CHEM 2536: Organic Chemistry (or 2566)	3
CHEM 2546: Organic Chemistry Lab	1
CHEM 3625: Physical Chemistry Lab	1
MATH 2214: Intro to Diff. Equations	3
Elective	3
<b>Credits</b>	<b>17</b>
<b>Third Year</b>	
<i>First Semester</i>	
CHE 3114: Fluid Transport	3
CHE 3134: Separation Processes	3
ENG 3764: Technical Writing	3

STAT 4604: Statistical Methods for Engineers (or 4705)	3
MATH 4564: Oper. Methods	3
<b>Credits</b>	<b>15</b>
<i>Second Semester</i>	
ChE 3015: Process Meas. and Controls	3
CHE 3044: Heat Transfer	2
CHE 3144: Mass Transfer	3
CHE 3184: Chemical Reactor Analysis and Design	3
CHE 4134: Chemical Process Modeling	2
Elective*	3
<b>Credits</b>	<b>16</b>
<i>Summer Term (must precede senior year)</i>	
ChE 4014: ChE Laboratory	5
<b>Fourth Year</b>	
<i>First Semester</i>	
CHE 4104: Process Materials	3
ChE 4185: Process and Plant Design	4
ESM 2214: Statics and Mechanics of Materials	3
Electives*	6
<b>Credits</b>	<b>16</b>
<i>Second Semester</i>	
ChE 4186: Process and Plant Design	4
Electives*	10
<b>Credits</b>	<b>14</b>

\* **Elective Hours: 25, as specified below**

16 hours **Liberal Education** (choose from approved lists) -- Areas 2, 3, 6, 7

3 hours **Technical Electives** (choose from approved list)

6 hours **Free Electives**

The following are special focus areas students can use as electives. Lists of approved courses for these focus areas are available in the Department of Chemical Engineering.

1. No concentration
2. Marketing and Chemical Distribution
3. Biochemical Engineering
4. Polymers

As part of **progress toward a degree**, a student must have a grade of C- or better in all ChE-prefix courses and maintain a minimum in-major GPA of 2.0 or above. If the in-major GPA drops below 2.0 at any time, students will be placed on departmental probation. Students cannot remain on departmental probation for more than two consecutive semesters. In the case that a student has not achieved an in-major 2.0 or better after two semesters, the student is prohibited from registering for any ChE courses for at least one semester and, after that, only with permission of ChE department head. All ChE credits are used to calculate in-major GPA.

**Students who plan to co-op** should talk with with Dr. Goldstein (339 ICTAS Building) of the ChE department.

For additional information about the Chemical Engineering curriculum, please contact the department head.

The Chemical Engineering Department at Virginia Tech is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 2120-4012 - telephone (410) 347-7700.

## Undergraduate Course Descriptions (CHE)

### 2004: CHEMICAL ENGINEERING SOPHOMORE SEMINAR

Career opportunities and current topics of interest in the Chemical Engineering profession. Pass/Fail only. (1H,1C)

#### 2114: MASS AND ENERGY BALANCES

Stoichiometric and composition relationships, behavior of gases, vapor pressures, solubility, mass balances, recycling operations, energy balances, first law of thermodynamics, thermophysics, thermochemistry, fuels and combustion, application to chemical operations. Pre: (MATH 1206 or MATH 1206H), (CHEM 1036 or CHEM 1036H or CHEM 1056 or CHEM 1056H). (3H,3C)

#### 2124: CHEMICAL ENGINEERING SIMULATIONS

Many chemical engineering processes lead to sets of linear and nonlinear algebraic equations. This course will focus on numerical methods for solving these types of problems. In addition, techniques for analyzing data to evaluate different models and to obtain model parameters will be developed. Students will learn how to evaluate whether the information provided is sufficient to solve steady-state material balances frequently encountered in process design. Students will be exposed to both mathematical software as well as process modeling software useful for solving process engineering problems and when each should be utilized. Pre: 2114, (MATH 2224 or MATH 2224H). (2H,2C)

#### 2164: CHEMICAL ENGINEERING THERMODYNAMICS

First and Second Laws, properties fluids, properties of homogeneous mixtures; phase equilibria, chemical-reaction equilibria. Pre: 2114. Co: CHEM 3615. (3H,3C)

#### 2984: SPECIAL STUDY

Variable credit course.

#### 3015-3016: PROCESS MEASUREMENT & CONTROL

3015: Common process measurements; applications to theory and practice of automatic control of chemical processes; 3016: Design and laboratory practice underlying the automatic computer control of chemical processes. Pre: (MATH 4564 or MATH 4544) for 3015; MATH 4564 or MATH 4544 for 3016. Co: 2124, 3184, 3044 for 3015; 2124 for 3016. 3015: (3H,3C) 3016: (1H,3L,2C)

#### 3044: HEAT TRANSFER

One and two dimensional conduction, convection, and diffusion of thermal energy; heat transfer rates, steady state and unsteady state conduction, convection; design of heat exchangers; forced and free convection boiling and condensation. Pre: 2164, 3114, (MATH 4544 or MATH 4564). (2H,2C)

#### 3114: FLUID TRANSPORT

Fluid statics, surface tension, fluid dynamics, Newton's Law of viscosity, momentum transport, laminar and turbulent flow, velocity profiles, flow in pipes, flow around objects, non-Newtonian fluids, design of piping systems, pumps and mixing. Pre: 2114, PHYS 2305. Co: MATH 4564. (3H,3C)

#### 3134: SEPARATION PROCESSES

Binary separations and multicomponent separations, distillation, batch distillation, extraction, absorption, McCabe-Thiele and Ponchon Savaret methods, short cut methods, design of plate columns, plate and column efficiencies. Pre: 2114, (CHEM 3615 or CHE 2164). (3H,3C)

#### 3144: MASS TRANSFER

Multidimensional molecular diffusion and convection of single and multi-component systems; mass transfer rates; steady state, quasi-steady state and transient mass transfer; effect of reactions on mass transfer; convective mass transfer coefficients; design of stage and continuous gas/liquid contactors, membrane, liquid-liquid and liquid-solid separation processes, artificial kidney and drug delivery systems. Pre: 3114, 2164, (MATH 4544 or MATH 4564). (3H,3C)

#### 3184: CHEMICAL REACTOR ANALYSIS AND DESIGN

Power-law rate expressions, kinetic data, rate constants, Arrhenius equation, design of reactors, reactor behavior. Pre: 2164, (MATH 2214 or MATH 2214H or MATH 4544). Co: 3144, 3044. (3H,3C)

#### 4014: CHEMICAL ENGINEERING LABORATORY

Practical experience in the planning of experimentation, gathering of experimental data, interpretation of data, and the preparation of written and oral reports. Use of small scale processing equipment. Applications include momentum transfer, heat transfer, mass transfer, and chemical reaction. Use of automatic control and data acquisition. Grade of C- or better in all CHE prefix courses and in-major GPA of 2.0 or better are required. Pre: 3015, 3044, 3134, 3144, 3184, ENGL 3764. (15L,5C)

#### 4034: CHEMICAL REACTION DESIGN

Reactor design for multiple reactions, nonisothermal operation, optimum reactor operation and configurations, design and analysis of heterogeneous reactors, mass transfer limitations. Pre: 3184. (3H,3C)

#### 4044: APPLIED MATHEMATICS IN CHEMICAL ENGINEERING

Mathematical techniques applied to the solution of chemical engineering problems. Pre: 3134, 3184. (2H,2C)

#### 4104: PROCESS MATERIALS

Basics of materials science as it relates to the interest of the chemical engineer. The course emphasizes the three fundamental areas of material science being polymer materials, metallics, and ceramic/inorganic glasses. The general molecular structure property – application behavior of each area will be presented but with a focus when possible on topics related to the field of chemical engineering. Pre: 2164, (CHEM 2535 or CHEM 2565). (3H,3C)

#### 4134: CHEMICAL PROCESS MODELING

Mathematical modeling of chemical processes, application of numerical techniques to the solution of equations, use of a programming language to write programs for calling numerical subroutines, numerical solutions of problems resulting in partial differential equations. Pre: 2124, 3114. Co: 3044, 3184, 3144. (2H,2C)

#### 4144 (MKTG 4144): BUSINESS AND MARKETING STRATEGIES FOR THE PROCESS INDUSTRIES

Business strategies and industrial marketing concepts, and their application in the chemical, pharmaceutical and related process industries. The

course is designed for engineers and other students planning a career in the process industries. Junior standing required. Pre: ECON 2005. (3H,3C)

#### 4185-4186: PROCESS AND PLANT DESIGN

Chemical process synthesis and plant design, economic analysis of alternative processes, process equipment design and specifications, computer-aided process design and simulation, design case studies, application of scientific and engineering knowledge to practical design problems. Grade of C- or better in all CHE prefix courses and in-major GPA of 2.0 or better is required. Pre: 3144, 3134, 3184, 3044, 4014 for 4185; 4185 for 4186. (4H,4C)

#### 4214: INTRODUCTION TO POLYMER MATERIALS

Basics of polymeric materials including description and categorization of macromolecules; characterization; mechanical properties; rubbery, glassy, crystalline, and viscous flow behavior. Pre: CHEM 2536, CHE 2164. (3H,3C)

#### 4224: INTRODUCTION TO POLYMER PROCESSING

Basic principles of momentum and heat transfer applied to the analysis of polymer processing operations. Introduction to polymer rheology. Pre: 3144, 3044. (3H,3C)

#### 4334: INTRO COLLOID INTERFACE SCI

Properties and behavior of colloidal systems, primarily in liquid environments. Size characterization and description, Brownian motion, interparticle forces, dispersion stability, and experimental techniques for characterizing these systems. Pre: 2164, 3144. (3H,3C)

#### 4544 (BSE 4544): PROTEIN SEPARATION ENGINEERING

Concepts, principles and applications of various unit operations used in protein separations. Properties of biological materials, such as cells and proteins, and their influences on process design. Design of processes for protein purification based on the impurities to be eliminated. Concepts and principles of scale-up of unit operations. Case studies in practical protein recovery and purification issues, with a focus on enhanced protein purification by genetic engineering. Protein purification process simulation and optimization using process simulation software. Pre: BSE 3504 or CHE 3144. (3H,3C)

#### 4904: PROJECT AND REPORT

Variable credit course.

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

#### 4994H: UNDERGRADUATE RESEARCH

Honors course Variable credit course.

### University Exemplary Department

**W.S. Easterling, Head and Montague-Betts Professor of Structural Steel Design**

**G.M. Filz, Assistant Head and Charles E. Via, Jr. Professor**

**M.A. Widdowson, Assistant Head and Professor**

**Burrows Professor: R.T. Leon**

**Charles E. Via, Jr. Professor: S. Kikuchi**

**Charles E. Via, Jr. Professor: J. C. Little**

**Charles Lunsford Professor: M.A. Edwards**

**Newport News Shipbuilding Professor: T.A. Dingus**

**Nick Prillaman Professor: J.T. Novak**

**Vecellio Professor: J.M. de la Garza**

**W. Curtis English Professor: W.R. Knocke**

**Professors:** G.D. Boardman; F.A. Charney; T.E. Cousins; A.M. Dietrich; P. Diplas; G.W. Flintsch; T.J. Grizzard; A.G. Hobeika; J.C. Little; J.R. Martin II; G. E. Moglen; H.A. Rakha; C.L. Roberts-Wollmann; E. Sotelino; A.A. Trani; L. Wang

**Associate Professors:** M.M. Abbas; T.L. Brandon; R.L. Dymond; D.L. Gallagher; M.J. Garvin; Z.C. Grasley; R.A. Green; J.L. Irish; K.L. Hancock; L.C. Marr; M. Mauldon; A. Pruden; A. Rodriguez-Marek; K.B. Rojiani; S.K. Sinha; J.E. Taylor; P.J. Vikesland; W. J. Wright

**Assistant Professors:** M.R. Eatherton; M. Golparvar-Fard; E.T. Hester; I.A. Koutromanos; C.D. Moen; P.M. Murray-Tuite; D.E. Young-Corbett

**Assistant Professors of Practice:** V.A. Mouras; R.P. Scardina

**Research Associate Professor: A. Godrej**

**Research Assistant Professor: J. Dove; C.G. Olgun**

**Professors Emeritus:** R.W.E. Cox; D.R. Drew; J. M. Duncan; D. A. Garst; R.C. Hoehn; S.M. Holzer; J.M. Hughes; D.F. Kibler; T. Kuppasamy; J.K. Mitchell; T. M. Murray; R. H. Plaut; C.W. Randall; D. Teodorovic; M.C. Vorster; R.D. Walker

**Academic and Career Advisor: K.E. Lattimer**

**Alumni Relations Coordinator: E.P. Moen**

The Civil and Environmental Engineering Department offers one undergraduate degree: the B.S. in Civil Engineering. This program is described in the following sections:

- [Overview](#)
- [Civil Engineering Program](#)
- [Undergraduate Course Descriptions](#)

---

## Overview

The Charles Edward Via, Jr. Department of Civil and Environmental Engineering offers an undergraduate program that facilitates development of critical analytical abilities and the necessary core of knowledge and skills for entry into the civil engineering profession or graduate studies. This body of knowledge includes the scientific procedures for formulating and testing theories and the procedures for applying theory to enhance welfare through engineering analysis, synthesis, and design. The civil engineer plays a key role in the design, construction, maintenance, and management of society's physical infrastructure, including transportation and communication systems, structural facilities for housing human activities, water resource management systems, natural resource development systems, and facilities and programs for environmental protection. The Bachelor of Science program in Civil Engineering is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Emphasis in civil engineering education is on fundamental principles of science and mathematics and their application to solving human problems. But civil engineering activities interact in many ways with the natural and social environments within which they take place. Accordingly, the civil engineering program strives to create an awareness of the ecological, social, economic, and political context of engineering and attempts to prepare the civil engineer for the necessary interactions with other professions and the public. An effort to instill an understanding of the role of the civil engineer in satisfying total societal needs is an integral part of the civil engineering program.

Consistent with the general program goal of facilitating development of student competence necessary for entry into engineering practice or graduate school, the Department has developed the following program objectives:

Within a few years of program completion, graduates of the Civil and Environmental Engineering Department should be able to combine skills gained through academic preparation and post-graduation experience so that they can:

1. Exhibit technical competence through application of engineering knowledge, problem-solving skills, and modern tools from multiple areas of civil engineering practice in the analysis, evaluation, design, and construction of civil engineering systems

- and system components.
2. Apply skills of effective communication, teamwork, leadership, and professional and ethical behavior as complements to technical competence.
3. Incorporate economic, environmental, social, and sustainability considerations into the practice of civil engineering.
4. Continue their technical and professional development, which may include professional licensure, graduate level education, continuing education courses, self-directed study, and participation in conference and committee activities.

The curriculum provides a common freshman and sophomore year, with selection of upper division courses made during pre-registration of the second semester of the sophomore year. The civil engineering curriculum provides breadth across the civil engineering profession and the opportunity for depth within a student's selected specialty areas of interest. Specialty areas offered within the department include : construction engineering & management, environmental engineering, geotechnical engineering, land development, civil engineering materials, structural engineering, transportation engineering, and water resources engineering.

Students are progressively exposed to civil engineering design, culminating in a focused design course experience. The projects assigned in design courses are open-ended, incorporate appropriate engineering standards, and require the application of knowledge from earlier courses in the curriculum. Projects apply technical knowledge to design appropriate physical facilities, but also include consideration of non-technical constraints that confront real-world projects. These additional considerations include such interdisciplinary issues as economics, environmental impact, and sustainability. Accordingly, teamwork and good professional communications skills are a significant part of each design project course experience.

Classroom instruction in the civil engineering program is reinforced by instructional laboratories in the major areas of civil engineering practice. The department seeks to employ the latest educational technology and innovative teaching methods.

The department participates in the Cooperative Education Program in which qualified students may alternate semesters of study with semesters of professional employment. The department encourages all students to participate in professional work experience prior to graduation.

Contact person for undergraduate Civil and Environmental Engineering programs is Kara Lattimer, CEE Academic and Career Advisor at 540/231-7148 or e-mail: [karalatt@vt.edu](mailto:karalatt@vt.edu).

Full programs of graduate study are available, leading to the M.Eng., M.S., and Ph.D. in civil engineering. Graduate degree programs concentrate in one of five major areas: construction engineering and management, environmental and water resources engineering, geotechnical engineering, structural engineering and materials, and transportation and infrastructure systems engineering. For details, see the [Graduate Catalog](#).

[TOP](#)

## Civil Engineering Program (for 2013)

**Note:** Graduation requires a total of 132 semester credits. Requirements are subject to change; prospective students should contact the Department prior to initiating individual programs of study.

Admission to a degree program is competitive, with departmental restrictions established each year by the college. Entry into a degree-granting department requires that a student successfully complete all first year required courses. All degree-granting majors accept applicants on a space-available basis. Applicants with a minimum 3.0 overall VT GPA are guaranteed admission to their engineering department of choice.

First Year	
<i>First Semester</i>	
Chem 1035: General Chemistry	3
Chem 1045: General Chemistry Lab	1
Math 1205: Calculus I	3
Math 1114: Linear Algebra	2
Engl 1105: Freshman English	3
ENGE 1024: Engr. Exploration	2
Liberal Education Elective: See remarks	1
<b>Credits</b>	<b>15</b>
<i>Second Semester</i>	
Phys 2305: Foundations of Physics I	4

Math 1206: Calculus II	3
Math 1224: Vector Geometry	2
Engl 1106: Freshman English	3
ENGE 1114 Exploration of Engineering or ENGE 1104 Exploration of Digital Future	2
Liberal Education Elective: See remarks	3
<b>Credits</b>	<b>17</b>
<b>Second Year</b>	
<i>First Semester</i>	
PHYS 2306: Foundations of Physics I	4
MATH 2224: Multivariable Calculus	3
ESM 2104: Statics	3
GEOS 2104: Elements of Geology	3
CEE 2804: Intro. to CEE	2
ENGE 2824: CEE Drawings & CAD	1
<b>Credits</b>	<b>16</b>
<i>Second Semester</i>	
Science or Engineering Science Elective	3
MATH 2214: Differential Equations	3
ESM 2204: Mech. of Deformable Bodies	3
ISE 2014: Engineering Economy	2
CEE 2814: CEE Measurements	4
Liberal Education Elective: See remarks	3
<b>Credits</b>	<b>18</b>

<b>Third Year</b>	
<i>First Semester</i>	
ENGL 3764: Technical Writing	3
CEE 3304: Fluid Mechanics for CEE	3
CEE Fundamentals	3
CEE Fundamentals	3
CEE Fundamentals	3
Additional Elective: See Remarks	3
<b>Credits</b>	<b>18</b>

### **REMARKS:**

**Curriculum for Liberal Education Remarks:** Engineering students entering the university in 1999-2000 or later are required to meet the following Curriculum for Liberal Education requirements, in addition to their college and departmental requirements:

<b>Credits</b>	
ViEWS - met by a designated sequence of required CEE courses and ENGL 3764	6
CLE Area 2: Ideas, Cultural Traditions and Values	6
CLE Area 3: Society and Human Behavior	6
CLE Area 6: Creativity and Aesthetic Experience	1

**Science or Engineering Science Elective Remarks** – must be taken from list shown on applicable CEE checksheet.

**CEE Fundamentals Remarks** – must satisfy departmental requirements as shown on the CEE checksheet.

**CEE Advanced Courses Remarks** – must satisfy departmental requirements as shown on the CEE checksheet.

**Additional Elective Remarks** - must not duplicate other courses and cannot include courses on College of Engineering not-for-credit-degree list.

[TOP](#)

## **Undergraduate Course Descriptions (CEE)**

### **2804: INTRODUCTION TO CIVIL AND ENVIRONMENTAL ENGINEERING**

Overview of the civil engineering profession and the undergraduate program of study. The fundamentals of good oral and written communication skills for the Civil Engineer are emphasized. An introduction to engineering library resources is also included. Pre: ENGE 1024. (3H,2C) I,II.

### **2814: CIVIL AND ENVIRONMENTAL ENGINEERING MEASUREMENTS**

Introduction to various data measurement issues in civil and environmental engineering, including collection techniques, analysis, error, and statistical evaluation in all sub-disciplines. Spatial measurement topics include GPS, leveling, distance and angular measurement, mapping and topographic surveys, automated data collection, terrain models, earthwork methods, construction surveying, geodesy, and GIS. Pre: BC students required to take the BC 1224 pre-requisite, they are exempt from the co-requisite ENGE 2824. CEE students are required to take the ENGE 1114 pre-requisite. Pre: ENGE 1114 or BC 1224, (MATH 1206 or MATH 1206H), (MATH 1224 or MATH 1224H). Co: ENGE 2824. (3H,3L,4C)

### **2974: INDEPENDENT STUDY**

Variable credit course.

### **2984: SPECIAL STUDY**

Variable credit course.

### **2994: UNDERGRADUATE RESEARCH**

Variable credit course.

### **3014: CONSTRUCTION MANAGEMENT**

Fundamental elements involved in managing construction projects. Management structure, construction contracts, equipment and labor productivity, scheduling, quality assurance, and cost control. Junior standing required. (2H,3L,3C) I,II.

### **3104: INTRODUCTION TO ENVIRONMENTAL ENGINEERING**

Overall view of environmental engineering with emphasis on hazardous waste management, water treatment, wastewater treatment, air pollution and its control, solid waste management, groundwater pollution and environmental regulations. A grade of C- or better required in pre-requisites CHEM 1035, 1045, 1206, and PHYS 2305. Pre: (CHEM 1035 or CHEM 1074), (CHEM 1045 or CHEM 1084), (MATH 1206 or MATH 1206H or MATH 2016), (PHYS 2305 or PHYS 2205). (3H,3C)

### **3274: INTRO LAND DEVELOPMENT**

An introduction to the land development design process including site selection and feasibility, environmental considerations, utility layout, grading, stormwater management and integrating planning with the design of infrastructure to support residential and commercial development. Pre: 2814. (3H,3C)

**3304: FLUID MECHANICS FOR CIVIL AND ENVIRONMENTAL ENGINEERING** Hydrostatics; fluid motion; continuity, momentum, and energy equations; viscous effects; applications to pipe networks and hydraulic systems, including open channel flow. Laboratory experiments and demonstrations. A grade of C- or better in pre-requisite ESM 2104. I,II Pre: ESM 2104. (3H,2L,3C)

**3314: WATER RESOURCES ENGINEERING**

Open channel flow; hydrology; hydraulic modeling; hydraulic machinery and structures; laboratory experiments and demonstrations. A grade of C- or better required in pre-requisite 3304. Pre: 3304. (3H,2L,3C)

**3404: THEORY OF STRUCTURES**

Fundamental tools and methods of structural analysis: moment-area, slope-deflection, force, and moment-distribution methods. Influence lines. Application to beams, trusses, and simple frames. A grade of C- or better required in pre-requisite ESM 2204. I,II Pre: ESM 2204. (3H,3C)

**3424: REINFORCED CONCRETE STRUCTURES I**

Behavior and design of reinforced concrete members based on ultimate strength. Beams and slabs in flexure, shear and torsion, development of reinforcement. Columns with axial force plus bending, slenderness effects in columns. A grade of C- or better required in pre-requisite 3404. I,II Pre: 3404. (3H,3C)

**3434: DESIGN OF STEEL STRUCTURES I**

Behavior and design of structural steel members and steel-frame buildings, including simple and fixed connections. AISC specifications; elastic theory. Design members to resist tension, compression, bending, torsion; plate girders, composite beams. ESM 3054 may be taken in place of co-requisite CEE 3684. Pre: 3404. Co: 3684. (2H,3L,3C) I,II.

**3514: INTRO TO GEOTECHNICAL ENGR**

Engineering properties of soils including their descriptions and classifications, the effects of water, soil strength and compressibility. Introduction to soil stabilization, earth pressures, slope stability, and foundations. A grade of C- or better required in pre-requisites GEOS 2104 and ESM 2204. Pre: ESM 2204, (GEOS 1004 or GEOS 2104 or GEOL 1004 or GEOL 2104). (2H,2L,3C) I, II.

**3604: INTRODUCTION TO TRANSPORTATION ENGINEERING**

Planning, design and operation of transportation systems with emphasis in multimodal transportation techniques and unified system engineering theories to analyze large scale transportation problems. Discussion of Intelligent Vehicle Highway Systems (IVHS) and hands on experience in computer models in transportation operations and planning. Interactions between transportation infrastructure and environmental engineering planning. Junior standing required. II (3H,3C)

**3684: CIVIL ENGINEERING MATERIALS**

Characteristics of constituent materials and the design and behavior of portland cement and bituminous concrete mixtures with demonstrated laboratory experiments. Pre: CHEM 1035, CHEM 1045, ESM 2204, CEE 2814, (GEOS 2104 or GEOS 1004). (2H,3L,3C) I,II.

**3804: COMPUTER APPLICATIONS FOR CIVIL AND ENVIRONMENTAL ENGINEERS**

Introduction to computer applications in civil and environmental engineering. Integration of design, data management, computer programming and problem solving skills with computer tools and techniques. Topics include systems analysis, optimization, database management, computer programming and data structures. Junior Standing Required. (2H,2L,3C) I,II.

**4014 (BC 4024): ESTIMATING, PRODUCTION, AND COST ENGINEERING**

Interpretation of plans and specifications, preparation of construction estimates, and cost control. Methods analysis, resource requirements, and resource costs in building systems, including system components, and in large-scale civil engineering works such as highways, bridges, and hydraulic structures. A grade of C- or better required in pre-requisite 3014. I,II Pre: 3014. (3H,3C)

**4024: CONSTRUCTION CONTROL TECHNIQUES**

Techniques used to plan, schedule, and control the Construction Process. Emphasizes manual and computer-based approaches. Focuses on an analytical approach towards the construction process whereby good technical methodologies and solutions are converted to reality through construction practices. I Pre: 3014. (3H,3C)

**4064: DESIGN FOR HAZARD CONTROL IN CONSTRUCTION**

Design of construction projects and systems to control inherent hazards to the health and safety of construction workers, inhabitants of the built environment, and the general public. Regulatory and legal drivers pertinent to construction, chemical and physical health hazards, major classes of safety hazards, design processes and specifications to control safety and health hazards, system engineering risk analysis tools, and safety management processes. Pre: 3014. (3H,3C)

**4074: CONSTRUCTION ENGINEERING: MEANS AND METHODS**

Construction means, methods, and equipment used to transform a particular design concept into a completed usable structure or facility. Selection and optimization of individual units as well as the systems needed to produce the required work to the required quality on time and on budget. I Pre: 3014. (3H,3C)

**4104: WATER AND WASTEWATER TREATMENT DESIGN**

Design of municipal water and wastewater treatment plants. Emphasis on characterization of water and wastewater and physical, chemical, and biological treatment methods. Sludge processing advanced treatment methods and treatment plant hydraulics are considered. I Pre: 3104, 3304. (3H,3C)

#### 4114: FUNDAMENTALS OF PUBLIC HEALTH ENGINEERING

Public health engineering principles for protection against biological and chemical health hazards. Emphasis on major communicable diseases that plague mankind, organisms that cause them, routes of transmission, and engineering methods of control. Appropriate control methods for rural areas and developing countries. A grade of C- or better required in pre-requisite 3104 or permission of the instructor. Pre: 3104. (3H,3C)

#### 4134: ENGINEERING SOLUTIONS FOR ENVIRONMENTAL SUSTAINABILITY

Quantitative methods to evaluate sustainable engineering solutions. Management of air and water resources using metrics of environmental sustainability, life cycle assessment of civil and environmental engineering infrastructure, design of renewable energy systems, environmental quality and energy efficiency in green buildings. Design Project. Pre: 3104. (3H,3C)

#### 4144: AIR RESOURCES ENGINEERING

Effects, regulation, sources, and control of air pollution. Application of engineering calculations and models to estimate emissions, predict pollutant concentrations, and design pollution control equipment. Pre: 3104 or ENGR 3124 or GEOS 3114 or ENSC 3634. (3H,3C)

#### 4164 (BIOL 4164) (CSES 4164) (ENSC 4164): ENVIRONMENTAL MICROBIOLOGY

Ecology, physiology, and diversity of soil and aquatic microorganisms; incorporates the significance of these topics within the context of environmental applications such as bioremediation, wastewater treatment, control of plant-pathogens in agriculture, and pollution abatement in natural systems. The laboratory portion of the course will stress methodology development, isolation and characterization of microorganisms from natural and engineered systems, and examination of the roles of microorganisms in biogeochemical cycling. Biology students are exempt from CEE 3104 but must take BIOL 2604 and obtain a C- or higher. Pre: BIOL 2604 or CEE 3104. (2H,3L,3C) II.

#### 4174: SOLID AND HAZARDOUS WASTE MANAGEMENT

Introduction to the problems, regulations and techniques associated with the management of solid and hazardous waste. Composition, volume and characterization of the wastes. Design of collection and disposal systems, including landfills, solidification/stabilization and incineration. A grade of C- or better required in pre-requisite 3104. I Pre: 3104. (3H,3C)

#### 4204: CAD APPLICATIONS IN CIVIL AND ENVIRONMENTAL ENGINEERING

Overview of CAD-based software in civil and environmental engineering. Project design methods and supportive software. Field survey data, surface creation, visualization techniques, grading, piping, roads, CAD standards, software customization. Specific software packages to demonstrate current industry practices. Senior standing required. A grade of C- or better required in pre-requisite 2814. Pre: 2814. (3H,3C)

#### 4254: MUNICIPAL ENGINEERING

An introduction to the field of municipal engineering. Infrastructure, capital projects, financing, sustainability, disaster planning and response, and plan review for development projects. Senior standing required Pre: MATH 1206. (3H,3C)

#### 4264: SUSTAINABLE LAND DEVELOPMENT

An introduction to the modern techniques for developing land while maintaining a focus on long-term sustainability. Topics include site layout, stormwater impact, air quality and microclimate, living resources, LEED and EarthCraft development standards. Pre-requisite: Senior Standing required (3H,3C)

#### 4274: LAND DEVELOPMENT DESIGN

Overview of land development projects including factors, construction practices, legal issues, and government policies. Design project includes feasibility study, engineering evaluation of site, and layout design of lots, buildings, streets, sewers, etc. Interactive graphics and automated drafting. Senior standing in Civil Engineering required. I Pre: 3274. (2H,3L,3C)

#### 4284: ADV LAND DEVELOPMENT DESIGN

Advanced course in land development design focusing on site grading and parking, stormwater management, and erosion control. Reviews project design criteria and applicable municipal and state guidelines. Uses CAD software for design and deliverables. Senior/Graduate standing required. Co: 4274. (3H,3C)

#### 4304: HYDROLOGY

Precipitation, evaporation, consumptive use, infiltration; stream flow, flood routing; statistical analysis of hydrologic data, flood and drought forecasting, risk analysis, subsurface flow, well hydraulics, introduction to urban drainage design. A grade of C- or better required in pre-requisite 3314. I Pre: 3304. (3H,3C)

#### 4314: GROUNDWATER RESOURCES

Fundamentals of groundwater hydrology; flow through porous media, both saturated and unsaturated; flow to wells in both confined and unconfined aquifers; seepage of groundwater to canals and field drains; analysis of aquifer test data to quantify flow and storage parameters; contaminants in groundwater, basic introduction to groundwater modeling. A grade of C- or better required in pre-requisite 3304. Pre: 3304. (3H,3C) II.

#### 4324: OPEN CHANNEL FLOW

Mechanics of open channel flow, including uniform flow, gradually varied flow, channel transitions, unsteady flow and fundamentals of sediment transport phenomena. Pre: 3314. (3H,3C)

#### 4334: HYDRAULIC STRUCTURES

Hydraulic analysis and design of engineering structures for water control, including reservoirs, dams, spillways, spilling basins, drainage structures, and hydraulic models. A grade of C- or better required in pre-requisite 3314. II Pre: 3314. (3H,3C)

#### 4344: WATER RESOURCES PLANNING

Analysis of the water resources planning process and the institutional framework for water resources management. Criteria and procedures for

evaluating management alternatives are examined, with emphasis on assessment of economic and environmental impacts. Senior standing required. I (3H,3C)

#### 4354: ENVIRONMENTAL HYDROLOGY

Overall view of pollutants movements in surface waters, with emphasis on the role of various hydrologic processes. Natural and constructed wetlands and their use for water quality control. Fundamentals of river hydraulics. Design of flood control channels. Environmental consequences of various types of hydraulic systems. Mitigation, enhancement, and restoration techniques. A grade of C- or better required in pre-requisites 3104 and 3314. II Pre: 3104, 3314. (3H,3C)

#### 4364 (AOE 4064): FLUID FLOWS IN NATURE

Course designed to build upon and broaden a basic traditional engineering knowledge of fluid flows into areas concerning a variety of natural occurrences and phenomena that involve fluid motions in important ways. Drag sessile systems and motile animals, gliding and soaring, flying and swimming, internal flows in organisms, low Reynolds number flows, fluid-fluid interfaces, unsteady flows in nature and wind engineering. I Pre: 3304 or AOE 3014 or ESM 3024 or ME 3404. (3H,3C)

#### 4404: COMPUTER ANALYSIS OF STRUCTURES I

Formulation of matrix displacement method in a form suitable for program development. Application to trusses and frames. Incorporation of special features such as symmetry, internal releases, support settlements, and influence lines. Initiation of program development. Use of existing programs on the personal computer. A grade of C- or better required in pre-requisite 3404. I Pre: 3404. (3H,3C)

#### 4424: DESIGN OF PRESTRESSED CONCRETE STRUCTURES

Principle of prestressing applied to concrete beams, slabs, and frames; design of individual elements and structural systems of prestressed concrete; precast construction and connection design. A grade of C- or better required in pre-requisite 3404 and 3684. I Pre: 3404, 3684, 3424. (3H,3C)

#### 4444 (AOE 4054) (ESM 4444): STABILITY OF STRUCTURES

Introduction to the methods of static structural stability analysis and their applications. Buckling of columns and frames. Energy method and approximate solutions. Elastic and inelastic behavior. Torsional and lateral buckling. Use of stability as a structural design criterion. A grade of C- or better required in AOE 3024 or CEE 3404. II Pre: AOE 3024 or CEE 3404. (3H,3C)

#### 4474: REINFORCED CONCRETE STRUCTURES II

Behavior and design of continuous reinforced concrete structures subjected to gravity and lateral loads. application of computer programs to frame analysis and design of members. Biaxial bending of columns, two-way floor systems, retaining walls, and footing design problems. Comprehensive design project concludes the course. A grade of C- or better required in pre-requisite 3424. II Pre: 3424. (3H,3C)

#### 4494: COMPUTER METHODS IN STRUCTURAL DESIGN

Design of structural members in steel, concrete, and wood using computers. Design of structural systems. Development of programs for the solution of structural design problems. Senior standing in civil engineering required. A grade of C- or better required in pre-requisites 3424 or 3434. Pre: 3424 or 3434. (3H,3C)

#### 4514: METHODS IN GEOTECHNICAL ENGINEERING

Principles and techniques for characterizing earth materials (soil and rock) for civil engineering projects in various regional environments; with emphasis on the interdisciplinary approach to field exploration and site description through soil mechanics theory, geologic correlations, geophysical methods, in site testing and sampling. A grade of C- or better required in pre-requisite 3514. I Pre: 3514. (3H,3C)

#### 4534: EARTH PRESSURES AND FOUNDATION STRUCTURES

Earth pressure theories and their applications to the design of retaining structures, anchors, and excavation bracing. Bearing capacity and settlement of shallow foundations. Types and capacity of deep foundations. A grade of C- or better in pre-requisite 3514. I,II Pre: 3514. (3H,3C)

#### 4544: APPLIED GEOTECHNICAL ENGINEERING ANALYSIS

Application of geotechnical engineering principles in the design and control of surface and subsurface construction. Excavations, earth fills, slope stability, geosynthetics and geotechnical aspects of sustainable development. Pre: 3514. (3H,3C)

#### 4554: NATURAL DISASTER MITIGATION AND RECOVERY

Causes, mechanics, classifications, and forces associated with tornadoes, hurricanes, floods, earthquakes, and landslides. Resistance evaluation for existing ground, facilities and structures. Hazard-resistant design of new facilities. Risk and reliability assessment and decision analysis. Strategies and designs for natural disaster risk mitigation. Emergency response for protection of life and property and restoration of lifelines. Includes an interdisciplinary team project. Prerequisite: Senior Standing Required (3H,3C)

#### 4594 (CSES 4594): SOIL AND GROUNDWATER POLLUTION

Application of mathematical models for chemical movement in soils and groundwater to evaluate soil and groundwater pollutant behavior; discussion of pollution remediation technologies; design of subsurface monitoring networks; case studies in soil and groundwater pollution; applications to landfills, waste spills, septic drainfields, pesticide/fertilizer leaching, and other problems of environmental concern. Pre: MATH 2224 or MATH 2224H or MATH 2016. (3H,3C) I,II.

#### 4604: TRAFFIC ENGINEERING

Study of traffic and parking characteristics; application of traffic control devices; principles and techniques used to improve the efficiency and safety of traffic flow systems. A grade of C- or better required in pre-requisite 3604. I Pre: 3604. (3H,3C)

#### 4614: ADVANCED CIVIL ENGINEERING MATERIALS

Fundamental properties and the physical and chemical aspects of the structure of Portland cement concretes. Emphasis placed on environmental

performance aspects and the application of studies of concrete performance under various exposure conditions. A grade of C- or better required in pre-requisite 3684. II Pre: 3684. (3H,3C)

#### 4624: PLANNING TRANSPORTATION FACILITIES

Transportation planning process; urban and regional studies, surveys, data analysis, model development and testing; transportation management, administration, finance, system evaluation, implementation, and integration. A grade of C- or better required in pre-requisite 3604. II Pre: 3604. (3H,3C)

#### 4634: INFRASTRUCTURE CONDITION ASSESSMENT

Infrastructure components and assessment needs; physical and chemical properties of construction materials; deterioration causes, assessment methods, nondestructive evaluation techniques, infrastructure management systems, performance models, service-life-cycle estimates. A grade of C- or better required in pre-requisite 3684. II Pre: 3684. (3H,3C)

#### 4644: TRAFFIC SIGNAL SYSTEM OPERATION AND CONTROL

Traffic signal system control, with emphasis in arterial operation. Signal system design and operations, traffic simulation techniques, advanced traffic control strategies, and incorporation of surface street systems into Intelligent Transportation Systems (ITS). Hands-on experience in signal system software and hardware. Pre: 3604. (3H,3C)

#### 4654: GEOMETRIC DESIGN OF HIGHWAYS

Functional design of highways; curves, intersections, interchanges, drainage, and other features involved in highway safety and traffic efficiency. A grade of C- or better required in pre-requisite 3604. II Pre: 3604. (3H,3C)

#### 4664: PAVEMENT DESIGN

Principles underlying methods for the design of various elements of flexible and rigid pavements for highways and airports; climate and traffic effects; pavement management systems. A grade of C- or better required in pre-requisite 3684. I Pre: 3684. (3H,3C)

#### 4674: AIRPORT PLANNING AND DESIGN

Airport planning and economic justification, site selection, configuration, development and design of terminal areas, demand forecasting, access, traffic control. A grade of C- or better required in pre-requisite 3604. II Pre: 3604. (3H,3C)

#### 4684: TRANSPORTATION SAFETY

Basic principles associated with transportation safety related to humans, vehicles and infrastructure as well as principles of design for safety and practices of empirical evaluation of safety. Principles and practices of accident investigation and injury epidemiology as well as safeguards and control practices. Pre: 3604. (3H,3C)

#### 4804: PROFESSIONAL AND LEGAL ISSUES IN ENGINEERING

Analysis of the legal, professional, and ethical aspects of engineering practice; introduction to contract law and contract dispute resolution, professional liability, and other aspects of law relevant to engineering practice; professional registration and codes of ethics. Pre: Senior standing in engineering. (3H,3C) I,II.

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

#### 4994H: UNDERGRADUATE RESEARCH

Variable credit course.

## The Field of Computer Science

In a contemporary world where every educated person must have some knowledge of computing, the Department of Computer Science offers courses to meet a variety of needs. The department offers a bachelor of science program to prepare specialists in the area of computer science itself, a minor in computer science, and individual courses directed to the needs of non-majors who will be using computers as tools in their chosen careers. The department also offers the M.S. and Ph.D. in computer science (see [Graduate Catalog](#)).

As a major, computer science involves far more than just writing computer programs. It is a technically rigorous field that requires a strong background in mathematics. Computer scientists must be good at problem solving. Their work requires the ability to think abstractly and to represent real-world objects and interactions as symbols that can be manipulated by a computer. The field of computer science is characterized by rapid change, with new opportunities emerging every year to improve life in diverse areas such as education, communication, science, commerce and entertainment.

## Accreditation and Program Objectives

The bachelor of science degree in Computer Science is accredited by the Computing Accreditation Commission of ABET, <http://www.abet.org>.

Part of the accreditation process is a clear statement of program objectives and desired outcomes for graduates. The objective of the computer science program is to provide majors with a balanced breadth and depth of knowledge in computer science that allows them the choice between continuing their education in graduate school and beginning their professional career, and to excel in either environment.

Desired outcomes for graduates are organized into the following six areas:

- Foundations of computing: ability to apply knowledge of mathematics and science to carry out analysis of computer science problems and design appropriate solutions; ability to use techniques, skills, and modern software development tools necessary for computing practice.
- Depth of knowledge: ability to identify, formulate, and solve computer science problems; ability to design a computing system

to meet desired needs; ability to apply problem-solving strategies to new, unknown, or open-ended situations in computer science.

- Breadth of knowledge: knowledge and understanding of the impact of the many sub-disciplines of computer science.
- Communication skills: ability to function in teams; ability to use written and oral communication skills effectively.
- Professional ethics: understanding of professional and ethical responsibility.
- Lifelong learning: recognition of the need for and ability to engage in lifelong learning; ability to acquire and use the ever-changing technical knowledge required of computing professionals.

## Degree Requirements

A total of 123 semester credits are required for graduation. (The details below are for students graduating in 2013.)

The curriculum in computer science is designed to provide a broad general computer science background that will prepare a student for a professional career as a computer scientist or to continue study at the graduate level. All majors take a set of foundational courses in software design and development, algorithms, and computer organization at the freshmen and sophomore level. Students at the junior and senior level select one theoretical course, four specialty courses and a capstone course according to their individual interests within the field. In all, a minimum of 43 credit hours of computer science is required: 1114 or 1124, 2104, 2114, 2505, 2506, 3114, 3214, 3304, 3604, two 3000 or 4000 level electives, one 4000 level elective, a CS theory course (4104 or 4114 or 4124), a CS capstone course, a one credit senior seminar and an approved technical elective. To qualify for a B.S. degree in Computer Science, a student must earn a "C" (2.0) or better in 1114 or 1124, 2104, 2114, 2505, 2506, and 3114.

Computer science majors are required to take an additional 36 credits distributed over five disciplines. Mathematics comprises 22 of these credits, which include Math 1114, 1205, 1206, 1224, 2214, 2224, 2534, and 3134. CS/Math double majors take 3034 and 3124 in place of 2534 and 3134. Depending on their selection of CS courses, CS majors need at most one additional math course to obtain a math minor.

The other specific disciplines represented in the departmental requirements are engineering education, English, statistics, and communication studies. Students must take ENGE 1024 and 1104, Engl 3764, Stat 4705 or 4714, and COMM 2004. The final four additional credits come from taking one more physics or chemistry lab course beyond the two required by the General Engineering requirements.

## Opportunities for Majors

The department offers computer science majors the opportunity to enhance their education through a variety of curricular and extracurricular activities. Students who meet the requirements for independent study or undergraduate research can pursue research or individualized study under the direction of a faculty member. Through the honors program, superior students can work toward earning their degree "in honors" or even elect to earn both the bachelor's and master's degrees in an accelerated undergraduate/graduate program. The Cooperative Education Program makes it possible for students to acquire professional experience while pursuing their degree.

The department sponsors chapters of three national computer science organizations: the Association for Computing Machinery (ACM), the national professional organization for computer scientists; the Association for Women in Computing (AWC), which is dedicated to the advancement of women in information technology fields; and Upsilon Pi Epsilon (UPE), the national computer science honor society. Additional recognition of student achievements is made during the annual graduation ceremonies. Among the awards given are the Gorsline award, awarded to a rising senior who has overcome freshman-year academic difficulties and subsequently demonstrated great academic achievement.

## Information for Non-Majors

The department offers a CS minor for non-majors seeking a strong background in computer science. The requirements for the minor include: 1114 or 1124, 2114, 2505, 3114, and six credits from 3000/4000-level courses except 3604, 4004, or 4014. Minors must meet the same prerequisites as majors. This includes Math 2534 as a co-requisite for CS 2505 and achievement of a "C" (2.0) or better in all CS courses which are prerequisites for subsequent CS courses.

## Computational Facilities

The Department of Computer Science possesses extensive facilities for both instruction and research. There are several undergraduate teaching laboratories and a number of specially equipped research laboratories. These include two large parallel computing clusters and numerous compute and file servers for research and instruction in areas such as animation, digital libraries, software engineering, data mining, bioinformatics and networking. The department also operates extensively equipped laboratories for human-computer Interaction, virtual environments and information visualization. These labs include display walls, state-of-the-art 3D and head-mounted displays, and a 4-wall CAVE immersive theater.

## Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the Curriculum for Liberal Education (see Academics) and toward the degree in computer science.

Satisfactory progress toward the B.S. in Computer Science requires that a Computer Science major must:

1. be registered in at least one 3-credit course required in the major during each on-campus semester of the regular academic year;
2. maintain a GPA of 2.0 or better in the major;
3. not take any CS course required in the major more than twice, including attempts ending in course withdrawal; and
4. not repeat more than 3 CS courses required in the major, including attempts ending in course withdrawal.

## **Undergraduate Course Descriptions (CS)**

### **1004: COMPUTER LITERACY**

Introduction to personal computer applications. Overview of basic computer hardware and system software concepts. Projects using various application software packages including word processing, spreadsheets, databases, and graphics (analytical and presentation), using electronic-mail, computer network browsers, and on-line training systems. Not for CS major or minor credit. Duplicates ACIS 1504, ALS 1514. (3H,3C)

### **1044: INTRODUCTION TO PROGRAMMING IN C**

Fundamental concepts underlying software solutions of many problems. Structured data, statement sequencing, logic control, input/output, and functions. The course will be taught using a structured approach to programming. Partially duplicates 1344. (3H,3C) I, II, III, IV.

### **1054: INTRODUCTION TO PROGRAMMING IN JAVA**

This course provides an introduction to object oriented programming using the Java language. Fundamental concepts underlying programming and software solutions to many problems. Structured data, statement sequencing, logic control, classes, objects, methods, instantiation of classes, sending messages to objects. (2H,2L,3C) I, II, III.

### **1104: INTRODUCTION TO COMPUTER SCIENCE**

This course (a) presents the fundamental concepts of computer programming, (b) introduces the history of computing, (c) provides an introduction to and preliminary investigation of the fundamental concepts found throughout the computer science discipline, and (d) overviews computer science subdisciplines such as algorithms, artificial intelligence, computer architecture, human-computer interaction, language translation, operating systems, parallel computation, and software engineering. Co: 1044 or 1344. (3H,3C)

### **1114: INTRODUCTION TO SOFTWARE DESIGN**

Fundamental concepts of programming from an object-oriented perspective. Basic software engineering principles and programming skills in a programming language that supports the object-oriented paradigm. Simple data types, control structures, array and string data structures, basic algorithms, testing and debugging. A basic model of the computer as an abstract machine. Modeling and problem-solving skills applicable to programming at this level. Partially duplicates 1054, 1124, and 1705. Programming experience may be substituted for pre-requisite ENGE 1024 with instructor's permission. Pre: ENGE 1024. (2H,2L,3C)

### **1124: INTRODUCTION TO MEDIA COMPUTATION**

This course teaches fundamental manipulations of digital media as an introduction to computer science. Basic software engineering principles and programming skills are taught with a programming language that supports object-oriented programming. Simple data types, control structures, array and string data structures and algorithms, testing and debugging. Partially duplicates 1054 and 1705. (2H,2L,3C)

### **1204: INTERNET AND SYSTEM SOFTWARE**

An on-line self-paced tutorial to the Internet and World Wide Web, Program Development Tools, and common applications. Introduction to Web publishing, communication, and searching. Instruction in the use of an integrated program development environment, debugger, and related program development tools. Introduction to spreadsheets, databases, and slide presentation software package. Partially duplicates 1604. Co: 1344, 1044. (1H,1C)

### **1344: PROGRAMMING IN C**

A course designed to build on prior knowledge of a high level programming language and to teach the fundamentals of structured programming in C. Expression, statement, and module level constructs are discussed; programming assignments are used to reinforce concepts and to provide the requisite experience to pursue advanced Computer Science courses. Partially duplicates 1044. Pre: 1014 or 1034. (1H,1C)

### **1604: INTRODUCTION TO THE INTERNET**

Introduces the concepts, software, data organization and issues involved with using networked information. Also covers file formats (as applied in networked hypermedia and multimedia sound/video documents), local and global (Internet) network access, electronic mail, transferring files, network news, the World Wide Web, digital libraries, on-line public access catalogs and electronic journals, CD-ROMs and on-line databases, and commercial and other networks. Word processing ability required. (1H,1C)

### **1614 (ACIS 1614) (BIT 1614): INTRODUCTION TO LIVING IN THE KNOWLEDGE SOCIETY (LIKES)**

Introduces computing concepts needed by students to live in the emerging Knowledge Society. Prepares students to take courses in the Curriculum for Liberal education that are part of the pathway with theme Living In the KnowlEdge Society (LIKES) - i.e., the LIKES themed core. Surveys key paradigms of computing, including problem solving, programming, modeling and simulation, and software engineering. Relates these to the Knowledge Society, covering data, information, and knowledge, considering hypermedia, human-computer interaction, presentation, visualization, networking, and communication. Students are prepared to understand the (potential) application of computing to society in general and in their disciplines. (1H,1C)

### **1704: INTRODUCTION TO DATA STRUCTURES AND SOFTWARE ENGINEERING**

Introduces a disciplined approach to problem-solving and emphasizes the utility of software engineering principles applied to programming practices. Also stressed are program design and implementation involving multiple modules, verification of program correctness, and abstract data types and objects such as strings, arrays, sets, linked lists, stacks, queues, and files. Pre: 1044 or 1344. Co: 2304, 1206. (3H,3C)

#### 1705-1706: INTRODUCTION TO OBJECT-ORIENTED DEVELOPMENT

Fundamental concepts of programming from an object-oriented perspective. Basic software engineering principles and programming skills taught with a programming language that supports the object-oriented paradigm. 1705: Simple data types, control structures, array and string data structures and algorithms, testing and debugging. 1706: Detailed coverage of data structures, algorithms, and the methods of object-oriented design and software construction. Design and construction of medium-sized object-oriented programming projects with an emphasis on teamwork and software engineering. Programming experience in C++ or Java may be substituted for ENGE 1024 prerequisite. Must have a C or better in prerequisite CS 1705. Pre: (MATH 1205 or MATH 1526), ENGE 1024 for 1705; 1705 for 1706. (2H,2L,3C) I, II.

#### 1705H-1706H: HONORS INTRODUCTION TO OBJECT-ORIENTED DEVELOPMENT

(2H,2L,3C)

#### 1944: COMPUTER SCIENCE FIRST YEAR SEMINAR

An introduction to academic and career planning for computer science majors. Pass/Fail only. (1H,1C)

#### 2104: INTRODUCTION TO PROBLEM SOLVING IN COMPUTER SCIENCE

This course introduces the student to a broad range of heuristics for solving problems in a range of settings that are relevant to computation. Emphasis on problem-solving techniques that aid programmers and computer scientists. Heuristics for solving problems "in the small" (classical math and word problems), generating potential solutions to "real-life" problems encountered in the profession, problem solving through computation, and problem solving in teams. Programming experience may be substituted for the ENGE 1024 pre-requisite. Pre: ENGE 1024, (MATH 1205 or MATH 1526). (3H,3C)

#### 2114: SOFTWARE DESIGN AND DATA STRUCTURES

A programming-intensive exploration of software design concepts and implementation techniques. Builds on knowledge of fundamental object-oriented programming. Advanced object-oriented software design, algorithm development and analysis, and classic data structures. Includes a team-based, semester-long software project. Co-requisite MATH 1205 may be substituted with MATH 1526. A grade of C or better is required in CS pre-requisite 1114 or 1124. Pre: 1114 or 1124. Co: MATH 1205. (2H,2L,3C)

#### 2204: UNIX

A hands-on introduction to the modern operating system UNIX. Introduction to the basic operating systems concepts employed by UNIX. Students gain experience with basic system usage, system installation and administration, the UNIX programming environment, and system utilities. Duplicates 2304 (UNIX). A grade of C or better required in CS prerequisite 1706. Pre: 1706 or ECE 2574. (2H,2C)

#### 2304: SELF STUDY IN A PROGRAMMING SYSTEM

Guided self-study in a specific programming system, its syntax and applications; based on prior knowledge of the programming process and experience in programming with some high level language; may be taken three times for credit with different system each time; may be taken only twice for CS major or minor credit; systems to be offered may include FORTRAN, COBOL, C, UNIX, LISP. A grade of C or better required in CS prerequisite 1706. Pre: 2114. (1C)

#### 2504: INTRODUCTION TO COMPUTER ORGANIZATION

Basic computer organization at the machine language and assembly language level. Digital logic and circuits. Basic components of computer hardware and their implementation. Interaction with the operating system. Alternative computer organizations and implementations. Partially duplicates ECE 2504. A grade of C or better required in CS prerequisites 2204 and 2605. Pre: 2204, 2605. (3H,3C)

#### 2505-2506: INTRODUCTION TO COMPUTER ORGANIZATION

An introduction to the design and operation of digital computers. Works up from the logic gate level to combinational and sequential circuits, information representation, computer arithmetic, arithmetic/logic units, control unit design, basic computer organization, relationships between high level programming languages and instruction set architectures. A grade of C or better is required in CS pre-requisite 2114. Pre: 2114 for 2505; 2505, 2114, MATH 2534 for 2506. Co: MATH 2534 for 2505. (3H,3C)

#### 2604: DATA STRUCTURES AND FILE MANAGEMENT

This course extends the concepts of primitive data types by teaching the student a classical set of data structures that pervades both the theoretical and practical domains of computer science. Topics discussed include lists, trees, graphs, searching, sorting, file system organization and access methods. A grade of C or better required in CS prerequisites 2204 and 2704. Pre: 2204, 2704, MATH 2534. (3H,3C)

#### 2605-2606: DATA STRUCTS & OO DEVELOPMENT

Design and implementation of data structures, intermediate software engineering design principles, and object-oriented programming skills. Emphasis on algorithm analysis, design patterns, testing, debugging, and organizing and managing larger problems. 2605: Designing, implementing, and using data structures, introductory algorithm analysis, object-oriented design principles, and low-level design techniques. 2606: Sorting, searching, file processing, indexing, hashing, algorithm analysis, and advanced tree structures. 2605: Must have C or better in prerequisite CS 1706. 2606: Must have C or better in prerequisite 2605. Pre: 1706, MATH 2534 for 2605; 2605 for 2606. 2605: (2H,2L,3C) 2606: (3H,3C)

#### 2704: OBJECT-ORIENTED SOFTWARE DESIGN AND CONSTRUCTION

Introduces the principles of object-oriented programming with emphasis on objects, classes, inheritance, and polymorphism. A programming language such as C++ is used to apply these principles in several application domains. Also stressed are tools and techniques for testing, debugging, and organizing and managing larger programs. A grade of C or better required in CS prerequisite 1706. Pre: 1706 or ECE 2574. (3H,3C)

#### 2964: FIELD STUDY

Pass/Fail only. Variable credit course.

#### 2974: INDEPENDENT STUDY

Variable credit course.

#### 2984: SPECIAL STUDY

Variable credit course.

#### 3114: DATA STRUCTURES AND ALGORITHMS

Advanced data structures and analysis of data structure and algorithm performance. Sorting, searching, hashing, and advanced tree structures and algorithms. File system organization and access methods. Course projects require advanced problem-solving, design, and implementation skills. A grade of C or better is required in CS prerequisites 2114 and 2505. Pre: 2114, 2505, MATH 2534. (3H,3C)

#### 3204: OPERATING SYSTEMS

Covers the concept of a "process", its abstract and physical representations, its creation, management and scheduling. Study of: a thread process and how it relates to the parent; asynchronous concurrently executing processes, shared memory access, synchronization via semaphores, critical regions and monitors. Additional topics: deadlock prevention, avoidance, and detection, including Banker's Algorithm; memory management strategies including virtual memory; file representation and storage management; and device management. UNIX will be the reference system and the one used for project development and submission. A grade of C or better required in CS prerequisites 2504, and CS (2604 or 2606). X-grade allowed. Pre: (2504 or ECE 2504), (CS 2604 or CS 2606). (3H,3C) I, II.

#### 3214: COMPUTER SYSTEMS

Introduction to computer systems as they are relevant to application programmers today, with emphasis on operating system principles. Operating system design and architectures; processes; threads, synchronization techniques, deadlock; CPU scheduling; system call interfaces, system level I/O and file management; shell programming; separate compilation, loading and linking; inter-process communication (IPC); virtual and physical memory management and garbage collection; network protocols and programming; virtualization; performance analysis and optimization. A grade of C or better is required in CS pre-requisites 2506 and 2114. Pre: 2506, 2114. (3H,3C)

#### 3304: COMPARATIVE LANGUAGES

This course in programming language constructs emphasizes the run-time behavior of programs. The languages are studied from two points of view: (1) the fundamental elements of languages and their inclusion in commercially available systems; and (2) the differences between implementations of common elements in languages. A grade of C or better required in CS prerequisite 3114. Pre: 3114. (3H,3C)

#### 3414 (MATH 3414): NUMERICAL METHODS

Computational methods for numerical solution of non-linear equations, differential equations, approximations, iterations, methods of least squares, and other topics. Partially duplicates Math 4554. A grade of C or better required in CS prerequisite 1044 or 1705 or 1114 or 1124. Pre: 1044, MATH 2214, MATH 2224, (CS 1705 or CS 1114 or CS 1124). (3H,3C)

#### 3604: PROFESSIONALISM IN COMPUTING

Studies the ethical, social, and professional concerns of the computer science field. Covers the social impact of the computer, implications and effects of computers on society, and the responsibilities of computer professionals in directing the emerging technology. The topics are studied through case studies of reliable, risk-free technologies, and systems that provide user friendly processes. Specific studies are augmented by an overview of the history of computing, interaction with industrial partners and computing professionals, and attention to the legal and ethical responsibilities of professionals. This is a web-supported course, incorporating writing intensive exercises, making extensive use of active learning technologies. A grade of C or better required in CS prerequisite 3114. Pre: 3114, COMM 2004. (3H,3C)

#### 3704: INTERMEDIATE SOFTWARE DESIGN AND ENGINEERING

Explores the principles of software design in detail, with an emphasis on software engineering aspects. Includes exposure of software lifecycle activities including design, coding, testing, debugging, and maintenance, highlighting how design affects these activities. Peer reviews, designing for software reuse, CASE tools, and writing software to specifications are also covered. A grade of C or better required in CS prerequisite 3114. Pre: 3114. (3H,3C)

#### 3714: MOBILE SOFTWARE DEVELOPMENT

Technologies and concepts underlying software development for mobile devices (handheld computers). Mobile computing platforms, including architecture, operating system, and programming environment. Software design patterns and structuring for mobile applications. Network-centric mobile software development. Data persistence. Programming for mobile device components such as cameras, recorders, accelerometer, gyroscope and antennas. Location-aware software development. Pre: 2114. (3H,3C)

#### 3724: INTRODUCTION TO HUMAN-COMPUTER INTERACTION

Survey of human-computer interaction concepts, theory, and practice. Basic components of human-computer interaction. Interdisciplinary underpinnings. Informed and critical evaluation of computer-based technology. User-oriented perspective, rather than system-oriented, with two thrusts: human (cognitive, social) and technological (input/output, interactions styles, devices). Design guidelines, evaluation methods, participatory design, communication between users and system developers. A grade of C or better required in CS prerequisite 2114. Pre: 2114. Co: 3744. (3H,3C)

#### 3744: INTRO GUI PROGRAMMING/GRAPHICS

Design and implementation of object-oriented graphical user interfaces (GUI) and two-dimensional computer graphics systems. Implementation methodologies including callbacks, handlers, event listeners, design patterns, layout managers, and architectural models. Mathematical foundations of computer graphics applied to fundamental algorithms for clipping, scan conversion, affine and convex linear transformations, projections, viewing, structuring, and modeling. A grade of C or better is required in CS pre-requisite 2114. Pre: 2114, MATH 1224, MATH 1114. (3H,3C)

#### 3824: INTRODUCTION TO COMPUTATIONAL BIOLOGY AND BIOINFORMATICS

Introduction to computational biology and bioinformatics (CBB) through hands-on learning experiences. Emphasis on problem solving in CBB. Breadth of topics covering structural bioinformatics; modeling and simulation of biological networks; computational sequence analysis; algorithms for reconstructing phylogenies; computational systems biology; and data mining algorithms. Pre-requisite: Grade of C or better in CS 3114. Pre: 3114. (3H,3C)

#### 4004: DATA AND INFORMATION STRUCTURES

Formal underpinnings of computer science: logic, sets, relations as they apply to computer science. Principles of data structures, algorithm analysis, file management, databases. Not for CS major or minor credit; not for graduate credit in CSA program. Pre: 1704. (3H,3C)

#### 4014: PRINCIPLES OF COMPUTER ARCHITECTURE AND OPERATING SYSTEMS

Principles of computer hardware organization and operating systems. From individual microprocessor hardware components to computer network architectures. Operating system principles, with emphasis on concurrency and synchronization, deadlock, memory, scheduling and performance. Not for CS major or minor credit; not for graduate credit in CSA program. Pre: 4004.(3H,3C) II.

#### 4104: DATA AND ALGORITHM ANALYSIS

This course emphasizes the understanding of data structures and algorithms from an analytical perspective rather than from an implementation standpoint. The concepts developed allow discussion of the efficiency of an algorithm and the comparison of two or more algorithms with respect to space and run-time requirements. Analytical methods are used to describe theoretical bounds as well as practical ones. In general, this course addresses the constraints that affect problem solvability. A grade of C or better required in CS prerequisite 3114. Pre: 3114, (MATH 3034 or MATH 3134). (3H,3C)

#### 4114: INTRODUCTION TO FORMAL LANGUAGES AND AUTOMATA THEORY

The course presents a study of formal languages and the correspondence between language classes and the automata that recognize them. Formal definitions of grammars and acceptors, deterministic and nondeterministic systems, grammar ambiguity, finite state and push-down automata, and normal forms will be discussed. Pre: MATH 3134 or MATH 3034. (3H,3C)

#### 4124: THEORY OF COMPUTATION

Theoretical analysis of the computational process; fundamental concepts such as abstract programs, classes of computational machines and their equivalence, recursive function theory, unsolvable problems, Church's thesis, Kleene's theorem, program equivalence, and generability, acceptability, decidability will be covered. Pre: MATH 3134 or MATH 3034. (3H,3C)

#### 4204: COMPUTER GRAPHICS

Hardware and software techniques for the display of graphical information. 2D and 3D geometry and transformations, clipping and windowing, software systems. Interactive graphics, shading, hidden surface elimination, perspective depth. Modeling and realism. A grade of C or better required in CS prerequisite 3114 and 3744. Pre: 3114, 3744. (3H,3C)

#### 4214: SIMULATION AND MODELING

Overview of discrete-event digital computer simulation and modeling. Fundamentals of model development, Monte Carlo simulation, the life cycle of a simulation study, input and output data analysis, world views and time control, random number and variate generation, credibility assessment of simulation results, simulation languages, applications of simulation using the General Purpose Simulation System (GPSS). A grade of C or better required in CS prerequisite 2114. Pre: 2114. (3H,3C)

#### 4224: PERFORMANCE EVALUATION OF COMPUTER SYSTEMS

Overview of techniques for measuring, improving, and tuning the performance of computer systems. Procurement, workload characterization, measurement principles, the representation of measurement data, software and hardware monitors, capacity planning, bottleneck detection, system and program tuning, simulation and analytic models and their applications, case studies. Pre: 3204, (STAT 4714 or STAT 4105 or STAT 4705). (3H,3C)

#### 4234: PARALLEL COMPUTATION

Survey of parallel computer architectures, models of parallel computation, and interconnection networks. Parallel algorithm development and analysis. Programming paradigms and languages for parallel computation. Example applications. Performance measurement and evaluation. A grade of C or better required in CS prerequisite 3214. Pre: 3214. (3H,3C)

#### 4244: INTERNET SOFTWARE DEVELOPMENT

Key technology underlying the World-Wide Web. Web architecture, including client and server design, network protocols, and related standards. Static and dynamic content, caching, state management, fault tolerance, error handling. Programming systems and abstractions, e.g., sockets, remote procedures, Web services, frameworks and component models. Document representations and processing. Security. Entrepreneurial issues and emerging technologies. A grade of C or better required in CS 3214 prerequisite. Pre: 3214. (3H,3C)

#### 4254: COMPUTER NETWORK ARCHITECTURE AND PROGRAMMING

Introduction to computer network architecture, and methods for programming network services and applications (e.g. DNS, Email and MIME, http, SNMP, multimedia). Wired, wireless, and satellite network architectures. OSI protocol model, with an emphasis on upper layers. Congestion control, quality of service, routing. Internet protocol suite (e.g. IP, TCP, ARP, RARP). Server design (e.g. connectionless, concurrent). Network programming abstractions (e.g. XDR, remote procedure calls, sockets, DCOM). Case studies (e.g. TELNET). A grade of C or better required in CS prerequisite 3214. Pre: 3214. (3H,3C)

#### 4284: SYSTEMS & NETWORKING CAPSTONE

Advanced topics in computer systems & networking, e.g. distributed and parallel processing, emerging architectures, novel systems management & networking design, fault-tolerance, and robust and secure data management. Team-based approach to solving open-ended computer systems & networking problems. Designing, implementing and documenting advanced computer/networking systems. A grade of C or better is required for pre requisites CS 3114 and CS 3214. Pre: 3114, 3214. (3H,3C)

#### 4304: COMPILER DESIGN AND IMPLEMENTATION

This course includes the theory, the design, and the implementation of a large language translator system. Lexical analysis, syntactic analysis, code generation, and optimization are emphasized. A grade of C or better required in CS prerequisite 3214. Pre: 3214. (3H,3C)

#### 4414 (MATH 4414): ISSUES IN SCIENTIFIC COMPUTING

Theory and techniques of modern computational mathematics, computing environments, computational linear algebra, optimization, approximation, parameter identification, finite difference and finite element methods and symbolic computation. Project-oriented course; modeling and analysis of physical systems using state-of-the-art software and packaged subroutines. Pre: MATH 2214, MATH 3214. (2H,3L,3C)

#### 4504 (ECE 4504): COMPUTER ORGANIZATION

Information representation and transfer; instructions and data access methods; the control unit and microprogramming; memories; input/output and interrupts; secondary storage; the von Neumann SISD organization; high level language machines; the RISC concept; special purpose processors including operating system, file, text, floating point, communication, etc. Multicomputers; multiprocessors; concurrent processing support; Pipeline machines, processor arrays, database machines; the data flow/data directed approach; computer networks. A grade of C or better required in CS prerequisite 3214. Pre: 3214. (3H,3C)

#### 4570 (ECE 4570): WIRELESS NETWORKS AND MOBILE SYSTEMS

Multidisciplinary, project-oriented design course that considers aspects of wireless and mobile systems including wireless networks and link protocols, mobile networking including support for the Internet Protocol suite, mobile middleware, and mobile applications. Students complete multiple experiments and design projects. Pre: 4254 or ECE 4564. (3H,3C)

#### 4604: INTRODUCTION TO DATA BASE MANAGEMENT SYSTEMS

Emphasis on introduction of the basic data base models, corresponding logical and physical data structures, comparisons of models, logical data design, and data base usage. Terminology, historical evolution, relationships, implementation, data base personnel, future trends, applications, performance considerations, data integrity. Senior standing required. A grade of C or better required in CS prerequisite 3114. Pre: 3114. (3H,3C)

#### 4624: MULTIMEDIA, HYPERTEXT AND INFORMATION ACCESS

Introduces the architectures, concepts, data, hardware, methods, models, software, standards, structures, technologies, and issues involved with: networked multimedia information and systems, hypertext and hypermedia, networked information videoconferencing, authoring/electronic publishing, and information access. Coverage includes how to capture, represent, link, store, compress, browse, search, retrieve, manipulate, interact with, synchronize, perform, and present: text, drawings, still images, animations, audio, video, and their combinations (including in digital libraries). Pre: 3114. (3H,3C)

#### 4634: DESIGN OF INFORMATION

Survey of the higher-order properties that allow data to become information, that is, to inform people. The course focuses on the analysis of user needs, user comprehension and local semantics; the design of information organization; and the design of information display appropriate to use and setting. A grade of C or better is required in CS prerequisites 3114 and 3724. Pre: 3114, 3724. (3H,3C)

#### 4644: CREATIVE COMPUTING STUDIO

Capstone computer science course at the intersection of arts and technology. Intensive immersion in different approaches to digital arts such as game design, interactive art, digital music, and immersive virtual reality. Students work in teams to conduct an end-to-end integrative design project. A grade of C or better is required for prerequisite CS 3724. Pre: 3724. (3H,3C)

#### 4704: SOFTWARE ENGINEERING

Introduction to the basic principles of software engineering. Issues in the software life cycle. Emphasis on methods for software design and testing. Project management and quality assurance. Significant software project required. A grade of C or better required in CS prerequisite 3704. Pre: 3704. (2H,3L,3C)

#### 4784: HUMAN-COMPUTER INTERACT CAPSTN

Advanced, project-based course in Human-Computer Interaction. Team-based, end-to-end, integrative interface design project drawn from area of expertise in the department, e.g., virtual reality, augmented reality, embodied cognition, visualization, semiotic engineering, game design, personal information management, mobile computing, design tools, educational technology, and digital democracy. Pre-requisite: Senior Standing required. A grade of C or better is required in CS pre-requisite 3724 and 3744 Pre: 3724, 3744. (3H,3C)

#### 4804: INTRODUCTION TO ARTIFICIAL INTELLIGENCE

Overview of the areas of problem solving, game playing, and computer vision. Search trees and/or graphs, game trees, block world vision, syntactic pattern recognition, object matching, natural language, and robotics. Senior standing required. A grade of C or better required in CS prerequisite 3114. Pre: 3114. (3H,3C)

#### 4884: COMP BIO & BIOINFO CAPSTONE

Advanced topics in computational biology and bioinformatics (CBB). Team-based approach to solving open-ended problems in CBB. Projects drawn from areas of expertise in the department, e.g., algorithms for CBB, computational models for biological systems, analysis of structure function relationships in biomolecules, genomic data analysis and data mining, computational genomics, systems biology. Design, implementation, documentation and presentation of solutions. A grade of C or better required in CS prerequisite 3824. Pre: 3824. (3H,3C)

#### 4944: SEMINAR

Pass/Fail only. (1H,1C)

#### 4964: FIELD STUDY

Pass/Fail only. Variable credit course.

4974: INDEPENDENT STUDY

Variable credit course.

4984: SPECIAL STUDY

Variable credit course.

4994: UNDERGRADUATE RESEARCH

Variable credit course.

## **Construction Engineering and Management Program**

### **Overview**

The Myers-Lawson School of Construction offers students in the College of Engineering a Bachelor of Science Degree in Construction Engineering and Management. This degree is designed for students who wish to pursue a career in the construction industry. The undergraduate program facilitates the development of critical technical, managerial and professional knowledge and skills required for entry into the construction industry or graduate studies. This body of knowledge includes the decision and optimization methods required to integrate and manage the resources essential to construction operations along with the skills that support the development of safe, ethical, socially responsible, and sustainable solutions for the built environment. The Construction Engineering and Management Program is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone: (410) 347-7700.

Construction managers plan, direct, and coordinate construction projects, including the building of all types of residential, commercial, and industrial structures, roads, bridges, and other public works projects. Construction managers coordinate and supervise the construction process from the conceptual development stage through final construction, ensuring the project is completed within time and budget constraints and is compliant with building and safety codes and other regulations.

The focus of this degree is construction management with engineering and business management as additional major areas of study. The degree retains an emphasis on engineering, with a focus on construction theory and applications, while providing students the opportunity to define the areas of business management they wish to study to complement their career goals.

Coursework capitalizes upon established excellence in the Via Department of Civil and Environmental Engineering, the Department of Building Construction and the Pamplin College of Business. The majority of courses are drawn from existing curricula in Civil Engineering and Building Construction. Complementary courses from the College of Business provide the balance.

Consistent with the general program goal of facilitating development of student competence necessary for entry into the construction industry or graduate school, the School has developed the following program objectives:

Within a few years of curriculum completion, graduates of the Construction Engineering and Management program should be able to combine skills gained through academic preparation and post-graduation experience so that they can:

- Identify, design, analyze, integrate and manage the technical, material, financial, legal and personnel administration aspects that

support construction operations, projects and organizations throughout the project lifecycle, i.e., from programming to decommissioning.

- Incorporate safety, efficiency, cost effectiveness, environmental sensitivity and social awareness into the development, planning and implementation of construction operations and processes.
- Apply skills of effective communication, entrepreneurship, teamwork, values-based leadership, professional and ethical behaviors that are the necessary compliment to technical competence.
- Continue their professional development and learning which may include professional licensure or certification, graduate level education, continuing education courses, self-directed study and active involvement in the construction community.

Classroom instruction in the construction engineering and management program is reinforced by instructional laboratories, field trips and guest lectures by leading construction professionals. The department seeks to employ the latest educational technology and innovative teaching methods.

Students in the School have the opportunity to participation in a summer internship program during which they may apply the concepts learned in the classroom in real world applications. The School encourages all students to participate in professional work experience prior to graduation.

## Class Size Limitation

A proposal to limit enrollment in the BS CEM degree has been approved by University governance. The proposal limits enrollment to 40 students per graduating class. The criteria that must be met in order to gain entry into the program include the following three inputs, weighted accordingly:

1. Overall GPA. (60%)
2. The grade obtained for a statement of intent outlining career objectives and experience in the construction industry prepared and submitted to a three person faculty committee. (20%)
3. The grade obtained in an interview to determine commitment to success with a two person faculty committee. (20%)

The contact person for the undergraduate Construction Engineering and Management program is Dr. Christine Fiori, at 540/239-3389 or e-mail: [cfiori@vt.edu](mailto:cfiori@vt.edu).

## Construction Engineering and Management Program (for 2012)

Note: Graduation requires a total of 133 semester credits. Requirements are subject to change; prospective students should contact the department prior to initiating individual programs of study.

<b>First Year</b>	
<i>First Semester</i>	
CHEM 1035: General Chemistry or CHEM 1074: Chemistry for Engineers	3
CHEM 1045: General Chemistry Lab or CHEM 1084: Chemistry for Engineers Lab	1
MATH 1205: Calculus	3
MATH 1114: Linear Algebra	2
ENGL 1105: Freshman English	3
ENGE 1024: Engr. Exploration	2
Liberal Education Elective: See remarks	1
<b>Credits</b>	<b>15</b>
<i>Second Semester</i>	
PHYS 2305: Foundations of Physics I	4
MATH 1206: Calculus	3
MATH 1224: Vector Geometry	2
ENGL 1106: Freshman English	3
ENGE 1114 Exploration of Engineering or ENGE 1104 Exploration of Digital Future	2
Liberal Education Elective: See remarks	3
<b>Credits</b>	<b>17</b>
<b>Second Year</b>	
<i>First Semester</i>	

PHYS 2306: Foundations of Physics I	4
MATH 2224: Multivariable Calculus	3
ESM 2104: Statics	3
GEOS 2104: Elements of Geology	3
CEE 2804: Intro. to CEE	2
ENGE 2824: CEE Drawings & CAD	1
<b>Credits</b>	<b>16</b>
<i>Second Semester</i>	
STAT 3704: Statistics for Engr. Applications	2
MATH 2214: Differential Equations	3
ESM 2204: Mech. of Deformable Bodies	3
ISE 2014: Engineering Economy	2
CEE 2814: CEE Measurements	4
Liberal Education Elective: See remarks	3
<b>Credits</b>	<b>17</b>
<b>Third Year</b>	
<i>First Semester</i>	
CEE 3404: Theory of Structures	3
CEE 3014: Construction Management	3
BC 4014: Building Systems Tech II	3
BC 3064: Building Systems Tech Lab	2
CEE 3804: Computer Application in CEE	3
CEE 4074: Construction Means & Methods	3
<b>Credits</b>	<b>17</b>
<i>Second Semester</i>	
CEE 3684: CEE Materials	3
CEE 3434: Design of Steel Structures	3
BC 4434: Construction Practice I	3
CEE 4014: Estimating	3
ENGL 3764: Technical Writing	3
ECON 2005: Principles of Economics	3
<b>Credits</b>	<b>18</b>
<b>Fourth Year</b>	
<i>First Semester</i>	
CEE 3424: Reinforced Concrete Design	3
CEE 4024: Const. Control Techniques	3
BC 4444: Construction Practice II	4
BC4064: Construction Practice Lab	2
CEE 3514: Intro to Geotechnical Engr	3
ECON 2006: Principles of Economics	3
<b>Credits</b>	<b>18</b>
<i>Second Semester</i>	
CEE 4804: Prof. & Legal Issues in Engr.	3
CEE 3104: Intro. to Environmental Engr. or CEE 4554: Natural Disaster Mitigation & Recov.	3
Business Elective: See Remarks	6
CEE Technical Elective: See Remarks	3
<b>Credits</b>	<b>15</b>

#### REMARKS:

Curriculum for Liberal Education Remarks: Engineering students entering the university in 1999-2000 or later are required to meet the following Curriculum for Liberal Education requirements, in addition to their college and departmental requirements:

Credits	
ViEWS - met by a designated sequence of required CEM courses and ENGL 3764	6
CLE Area 2: Ideas, Cultural Traditions and Values	6
CLE Area 3: Society and Human Behavior	6
CLE Area 6: Creativity and Aesthetic Experience	1

**Business Electives** – must be taken from list shown on applicable CEM checksheet.

**CEE Technical Elective Remarks** – must satisfy departmental requirements as shown on the applicable CEE checksheet.

## Undergraduate Course Descriptions (CNST)

### 2104: INTRODUCTION TO THE CONSTRUCTION ENGINEERING AND MANAGEMENT PROFESSION

Overview of the construction engineering and management profession specialty areas. Introduction to the undergraduate program of study. Emphasis on the fundamentals of good oral and written communication skills. Professionalism, ethics and legal issues relating to the industry. Emphasis on contemporary issues facing the industry. Introduction to engineering library resources. Pre: ENGE 1114 or ENGE 1104. (2H,2C)

### 2984: SPECIAL STUDY

Variable credit course.

### 4974: INDEPENDENT STUDY

Variable credit course.

### 4984: SPECIAL STUDY

Variable credit course.

### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

## Undergraduate Course Descriptions within the CEM Major

### Building Construction (BC)

#### 3064: BUILDING SYSTEMS TECHNOLOGY LAB

Develop a competency in the application of Building Environmental Systems, through modeling, scheduling, estimating, and experiments in support of a senior capstone project. Pre: (4004 or CNST 2104), PHYS 2306. Co: 2044, 4014, CEE 3014, CEE 4074. (1H,2L,2C)

#### 4014: BUILDING SYSTEMS TECHNOLOGY II

This course places an emphasis on the physical installation and integration of passive and active environmental control systems including: heating, ventilation, air conditioning, lighting, acoustics and plumbing. Lectures by faculty and seminars by construction industry practitioners address issues that are relevant to illustrating the applications resulting from theory studied in BC 4004. CEE 4074 may be substituted for co-requisite BC 3064. Pre: (4004 or CNST 2104), PHYS 2306. Co: 3064. (2H,3L,3C)

#### 4064: CONSTRUCTION PRACTICE LAB

Application of the business and construction practices related to operation of a construction company to the execution of a senior capstone project. All project management concepts learned in prior courses are applied in the capstone lab experience. Written and oral work is formally presented and critiqued among construction faculty, students, and industry professionals. Pre: 4434. Co: 4444. (1H,2L,2C)

#### 4434: CONSTRUCTION PRACTICE I

Business and construction practices related to operation of a construction company are studied. Construction operation is examined as it relates construction, financial and personnel management. Project management topics studied in this course include permitting, site evaluations, design development and design phase considerations such as preliminary estimates and project constructability. Writing Intensive (WI) course. Pre: (4014, 3064), (2044) or (CEE 3014, CEE 4074). (3H,3C)

#### 4444: CONSTRUCTION PRACTICE II

This course explores and applies the business and construction practices related to operation of a construction company to a capstone experience. Construction operation is examined as it relates to construction, financial and personnel management. Project management topics studied in this course are applied in the corequisite lab. This course is formally designated as a writing intensive course. Formal written and edited and oral presentations are presented and critiqued by the BC faculty team, the writing resource center, students and industry professionals. Pre: 4434. Co: 4064. (3H,3L,4C)

## Civil and Environmental Engineering (CEE)

### 2804: INTRODUCTION TO CIVIL AND ENVIRONMENTAL ENGINEERING

Overview of the civil engineering profession and the undergraduate program of study. The fundamentals of good oral and written communication skills for the Civil Engineer are emphasized. An introduction to engineering library resources is also included. Pre: ENGE 1024. (3H,2C) I,II.

### 2814: CIVIL AND ENVIRONMENTAL ENGINEERING MEASUREMENTS

Introduction to various data measurement issues in civil and environmental engineering, including collection techniques, analysis, error, and statistical evaluation in all sub-disciplines. Spatial measurement topics include GPS, leveling, distance and angular measurement, mapping and topographic surveys, automated data collection, terrain models, earthwork methods, construction surveying, geodesy, and GIS. Pre: BC students required to take the BC 1224 pre-requisite, they are exempt from the co-requisite ENGE 2824. CEE students are required to take the ENGE 1114 pre-requisite. Pre: ENGE 1114 or BC 1224, (MATH 1206 or MATH 1206H), (MATH 1224 or MATH 1224H). Co: ENGE 2824. (3H,3L,4C)

### 3014: CONSTRUCTION MANAGEMENT

Fundamental elements involved in managing construction projects. Management structure, construction contracts, equipment and labor productivity, scheduling, quality assurance, and cost control. Junior standing required. (2H,3L,3C) I,II.

### 3104: INTRODUCTION TO ENVIRONMENTAL ENGINEERING

Overall view of environmental engineering with emphasis on hazardous waste management, water treatment, wastewater treatment, air pollution and its control, solid waste management, groundwater pollution and environmental regulations. A grade of C- or better required in pre-requisites CHEM 1035, 1045, 1206, and PHYS 2305. Pre: (CHEM 1035 or CHEM 1074), (CHEM 1045 or CHEM 1084), (MATH 1206 or MATH 1206H or MATH 2016), (PHYS 2305 or PHYS 2205). (3H,3C)

### 3404: THEORY OF STRUCTURES

Fundamental tools and methods of structural analysis: moment-area, slope-deflection, force, and moment-distribution methods. Influence lines. Application to beams, trusses, and simple frames. A grade of C- or better required in pre-requisite ESM 2204. I,II Pre: ESM 2204. (3H,3C)

### 3424: REINFORCED CONCRETE STRUCTURES I

Behavior and design of reinforced concrete members based on ultimate strength. Beams and slabs in flexure, shear and torsion, development of reinforcement. Columns with axial force plus bending, slenderness effects in columns. A grade of C- or better required in pre-requisite 3404. I,II Pre: 3404. (3H,3C)

### 3434: DESIGN OF STEEL STRUCTURES I

Behavior and design of structural steel members and steel-frame buildings, including simple and fixed connections. AISC specifications; elastic theory. Design members to resist tension, compression, bending, torsion; plate girders, composite beams. ESM 3054 may be taken in place of co-requisite CEE 3684. Pre: 3404. Co: 3684. (2H,3L,3C) I,II.

### 3514: INTRO TO GEOTECHNICAL ENGR

Engineering properties of soils including their descriptions and classifications, the effects of water, soil strength and compressibility. Introduction to soil stabilization, earth pressures, slope stability, and foundations. A grade of C- or better required in pre-requisites GEOS 2104 and ESM 2204. Pre: ESM 2204, (GEOS 1004 or GEOS 2104 or GEOL 1004 or GEOL 2104). (2H,2L,3C) I, II.

### 3684: CIVIL ENGINEERING MATERIALS

Characteristics of constituent materials and the design and behavior of portland cement and bituminous concrete mixtures with demonstrated laboratory experiments. Pre: CHEM 1035, CHEM 1045, ESM 2204, CEE 2814, (GEOS 2104 or GEOS 1004). (2H,3L,3C) I, II.

### 3804: COMPUTER APPLICATIONS FOR CIVIL AND ENVIRONMENTAL ENGINEERS

Introduction to computer applications in civil and environmental engineering. Integration of design, data management, computer programming and problem solving skills with computer tools and techniques. Topics include systems analysis, optimization, database management, computer programming and data structures. Junior Standing Required. (2H,2L,3C) I,II.

### 4014 (BC 4024): ESTIMATING, PRODUCTION, AND COST ENGINEERING

Interpretation of plans and specifications, preparation of construction estimates, and cost control. Methods analysis, resource requirements, and resource costs in building systems, including system components, and in large-scale civil engineering works such as highways, bridges, and hydraulic structures. A grade of C- or better required in pre-requisite 3014. I,II Pre: 3014. (3H,3C)

### 4024: CONSTRUCTION CONTROL TECHNIQUES

Techniques used to plan, schedule, and control the Construction Process. Emphasizes manual and computer-based approaches. Focuses on an analytical approach towards the construction process whereby good technical methodologies and solutions are converted to reality through construction practices. I Pre: 3014. (3H,3C)

### 4074: CONSTRUCTION ENGINEERING: MEANS AND METHODS

Construction means, methods, and equipment used to transform a particular design concept into a completed usable structure or facility. Selection and optimization of individual units as well as the systems needed to produce the required work to the required quality on time

and on budget. I Pre: 3014. (3H,3C)

#### 4554: NATURAL DISASTER MITIGATION AND RECOVERY

Causes, mechanics, classifications, and forces associated with tornadoes, hurricanes, floods, earthquakes, and landslides. Resistance evaluation for existing ground, facilities and structures. Hazard-resistant design of new facilities. Risk and reliability assessment and decision analysis. Strategies and designs for natural disaster risk mitigation. Emergency response for protection of life and property and restoration of lifelines. Includes an interdisciplinary team project. Prerequisite: Senior Standing Required (3H,3C)

#### 4804: PROFESSIONAL AND LEGAL ISSUES IN ENGINEERING

Analysis of the legal, professional, and ethical aspects of engineering practice; introduction to contract law and contract dispute resolution, professional liability, and other aspects of law relevant to engineering practice; professional registration and codes of ethics. Pre: Senior standing in engineering. (3H,3C) I,II.

## Overview

The Bradley Department of Electrical and Computer Engineering offers bachelor of science degrees in electrical engineering (EE) and computer engineering (CPE). The difference between these two degrees is one of emphasis. Electrical engineering concentrates on physical processes and design in communications, power and energy, systems and controls, electronics, electromagnetics, and digital systems. Computer engineering emphasizes the development of computer hardware and software systems, such as networks, embedded systems, design automation, and machine intelligence. In addition to undergraduate degrees, the department also offers M.S., M.Eng., and Ph.D. programs in both EE and CPE. An accelerated undergraduate/graduate (UG/G) program is available for qualified undergraduates.

Electrical engineers (EEs) and computer engineers (CPEs) create important and exciting technologies, systems and applications that make the world a better place for all of us. EEs and CPEs are inventing new ways to generate, distribute and use electric power that are more efficient, more sustainable and friendlier to the environment. For example, wider use of solar energy relies on improved photovoltaic devices, power electronics for energy conversion, and power grids. Some of our most critical global infrastructures, including the Internet, mobile voice and data networks, and the electric power grid are designed by EEs and CPEs. And, EEs and CPEs design sensors and embedded systems to monitor intelligent buildings and transportation systems. Applying innovative technologies to biology and the healthcare industry, EEs and CPEs create techniques for medical imaging, methods in synthetic biology to better understand disease, micro-electromechanical systems for medical diagnostics, implantable devices for health monitoring and drug delivery, and information systems to improve healthcare delivery. To meet the challenge of cybersecurity, EEs and CPEs design hardware and software for cryptographic algorithms and develop methods to ensure private communications through the Internet and wireless devices. EEs and CPEs also develop new technologies and applications to enable global collaboration and more effective learning. They design new devices and systems for high-performance computing and networking. They build satellites and instruments to improve communications and enhance our knowledge of space and the Earth. And, EEs and CPEs enhance our leisure time by creating new ways to listen to music, watch movies, play games, communicate with friends, and build social networks.

Students in the Bradley Department of Electrical and Computer Engineering learn from faculty who work at the cutting-edge of engineering research and bring the excitement of their discoveries to the classroom. Engineers want to make things that work and EE and CPE students get hands-on opportunities to build systems from the beginning of their studies. In the freshman year, students explore applications of electrical and computer engineering, such as medical imaging and cryptography. In the sophomore year, EE and CPE students use personal, portable equipment and components to build and explore simple digital and analog electronic systems, which become more complex each semester. Laboratories and team projects throughout the curriculum contribute to an enriching hands-on, minds-on learning experience.

Electrical engineering and computer engineering are dynamic and fast changing fields that drive innovation and solutions to global challenges. The ECE faculty has created a program of study that provides each graduate with a firm foundation in mathematics, physics, and engineering principles, and with broad experience in different areas of EE and CPE. The program enables our graduates to excel in their EE and CPE specialties, while gaining the tools to adapt to the technical changes and career opportunities they will experience in the future. EE and CPE students develop effective communication and teamwork skills and gain knowledge of ethics, all of which are essential to professional success. EE and CPE graduates are prepared to pursue careers in industry and government, advanced graduate work in EE and CPE, and other advanced professional degrees.

ECE seeks to develop tomorrow's engineering and technical leaders and innovators. Students can enhance their undergraduate experience by participating in multidisciplinary team projects, cooperative education and internships, research experiences for undergraduates, study abroad programs, dual degree and minor programs in other fields, and mentoring programs. The Cooperative Education (co-op) and Internship Program is highly recommended, as is participation in professional societies, including the Institute of Electrical and Electronics Engineers (IEEE) and the Association for Computing Machinery (ACM). ECE works with the Ted and Karyn Hume Center for National Security and Technology to develop future leaders for the US government. ECE offers many scholarships for academic excellence, leadership and service, as well as for participation in various special academic programs.

## Computer Engineering Program (CPE)

*This program applies to students graduating in 2013*

**Total credits to graduate:** 131 (see comments below)

<b>First Year</b>	
<i>First Semester</i>	
ENGE 1024: Engineering Exploration	2
CHEM 1035: General Chem	3
CHEM 1045: General Chem Lab	1
ENGL 1105: Freshman English	3
MATH 1114: Linear Algebra	2
MATH 1205: Calculus I	3
Curriculum for Liberal Education (Recommended Area 6)	1
<b>Credits</b>	<b>15</b>
<i>Second Semester</i>	
ENGE 1104: Eng Digital Future	2
ECE 1574: Engineering Problem Solving with C++	3
ENGL 1106: Freshman English	3
MATH 1224: Vector Geometry	2
MATH 1206: Calculus II	3
PHYS 2305: Found Physics with Lab	4
<b>Credits</b>	<b>17</b>
<b>Second Year</b>	
<i>First Semester</i>	
ECE 2014: Engineering Professionalism <sup>2</sup>	2
ECE 2504: Intro to Computer Engineering	3
ECE 2574: Intro to Data Structures and Software Engineering	3
MATH 2214: Differential Equations	3
PHYS 2306: Foundations of Physics II/Lab	4

Curriculum for Liberal Education (Recommended Area 2)	3
<b>Credits</b>	<b>18</b>
<i>Second Semester</i>	
ECE 2534: Microprocessor System Design	4
ECE 2524: Introduction to UNIX	2
ECE 2004: Circuit Analysis	3
ECE 2074: Electric Circuit Analysis Lab	1
MATH 2224: Multivariable Calculus	3
MATH 2534: Discrete Math	3
<b>Credits</b>	<b>16</b>
<b>Third Year</b>	
<i>First Semester</i>	
ECE 3574: Software Engineering	3
ECE 2204: Electronics I	3
ECE 2274: Electronics Networks Lab I	1
ECE 2704: Signals and Systems	3
ECE 3504: Digital Design	4
Curriculum for Liberal Education (Recommended Area 2)	3
<b>Credits</b>	<b>17</b>
<i>Second Semester</i>	
CPE Technical Elective <sup>1</sup>	3
CPE Technical Elective <sup>1</sup>	3
ECE 2500: Computer Organization & Architecture	3
ISE 2014: Engineering Economy	2
STAT 4714: Probability/Statistics for Engineers	3
ENGL 3764: Technical Writing <sup>2</sup>	3
<b>Credits</b>	<b>17</b>
<b>Fourth Year</b>	
<i>First Semester</i>	
ECE 4534: Embedded Systems	4

## Comments

- Curriculum for Liberal Education Area 6 one-credit requirement recommended in Engineering Education first year, first semester.
- Students interested in pursuing professional registration are encouraged to consult with advisors early in their program to permit proper course selection for maximum preparation.
- A C- or better grade must be attained in core ECE prerequisite courses, including ECE 1574, before proceeding into the next course.

## Notes:

<sup>1</sup> Must be selected from department's approved CPE Technical Elective list annually updated.

<sup>2</sup> Curriculum for Liberal Education ViEWS course.

<sup>3</sup> Must be selected from department's approved CPE Design Elective list annually updated.

<sup>4</sup> Must be selected from department's approved Engineering Science list annually updated.

<sup>5</sup> Must be selected from department's approved Math Elective list annually updated.

<sup>6</sup> Must be selected from departments approved EE Capstone Elective list annually updated.

<sup>7</sup> Must be selected from department's approved EE Technical Elective list annually updated.

## Undergraduate Course Descriptions (ECE)

### 1574: OBJECT-ORIENTED ENGINEERING PROBLEM SOLVING WITH C++

Problem solving techniques for engineering problems, primarily from the fields of electrical and computer engineering; procedural and object oriented program development, editing, compiling, linking, and debugging using the C++ programming language. Must have C- or better in the prerequisites. Pre: ENGE 1024, (MATH 1205 or MATH 1205H). (2H,2L,3C) I,II.

### 2004: ELECTRIC CIRCUIT ANALYSIS

Introduction to the basic laws and techniques for the analysis of electric circuits. Calculation of the response of circuits with resistors, independent sources, controlled sources, and operational amplifiers. The transient analysis of basic circuits with R, L, and C components. An introduction to AC analysis and phasors. Requires a C- or better in ENGE 1104 or 1204. Pre: ENGE 1104 or ENGE 1204. Co: 2074, MATH 2214. (3H,3C)

### 2004H: HONORS ELEC CIRCUIT ANALYSIS

Pre: ENGE 1016. Co: MATH 2214. (3H,3C)

### 2014: ENGINEERING PROFESSIONALISM IN ECE

Overview of the nature and scope of the electrical and computer engineering profession. Working in a diverse team environment; professional and ethical responsibility; the impact of engineering solutions in a global and societal context; contemporary issues; and life-long learning. Sophomore

standing required. Co: 2504, 2004. (2H,2C)

#### 2054: APPLIED ELECTRICAL THEORY

For students in the Mechanical Engineering program or by permission of the ECE Department. Fundamentals of electric circuits; circuit laws and network theorems, operational amplifiers, energy storage elements, response of first and second order systems, AC steady state analysis. Construction, analysis, and characterization of circuits with student owned Lab-in-a-Box system. Pre: PHYS 2306. Co: MATH 2214. (2H,2L,3C)

#### 2074: ELECTRIC CIRCUIT ANALYSIS LABORATORY

Construction, analysis, and characterization of circuits with student-owned Lab-in-a-Box system. Experiments include: characterization of breadboard backplane wiring; component tolerances; Ohm's law; Kirchoff's laws; series and parallel resistors; voltage and current dividers; delta-wye configurations; mesh-current and node-voltage analysis; superposition and Thevenin equivalents; inverting and non-inverting amplifier circuits; series RC and RL circuits; discharging LEDs and integrator and differentiator circuits. Introductory design experiments include a simple voltmeter and a flashing traffic arrow. Must have a C- or better in ENGE 1104 or 1204. Pre: ENGE 1104 or ENGE 1204. Co: 2004, MATH 2214. (3L,1C)

#### 2204: ELECTRONICS

Introduction to basic electronic devices including diodes and transistors and their operating principles. Analysis of electronic circuits operating under dc bias and switching conditions. Applications of devices in digital electronic circuits. Pre: 2004. Co: 2274. (3H,3C)

#### 2204H: HONORS ELECTRONICS

Pre: 2004. Co: 2274. (3H,3C)

#### 2274: ELECTRONIC NETWORKS LABORATORY I

Principles of operation of electrical and electronic test equipment and applications to measurement of circuit parameters. Transient and steady state response of RLC networks. Applications of laws and theories of circuits. Design, prototyping, and testing of electronic devices and circuits. Pre: 2074. Co: 2204. (3L,1C) I,II,IV.

#### 2500: COMPUTER ORGANIZATION AND ARCHITECTURE

Computer organization and architecture: instruction formats and construction; addressing modes; memory hierarchy (cache, main memory and secondary memory) operation and performance; simple pipelines; basic performance analysis; simple OS functions, particularly as they relate to hardware; virtual memory; computer I/O concepts, including interrupt and DMA mechanisms; intercomputer communication concepts. Must have C- or better in prerequisite 2504. Pre: 2504. (3H,3C)

#### 2504: INTRODUCTION TO COMPUTER ENGINEERING

An introduction to the design and operation of digital computers, including information representation, logic design, integrated circuits, register transfer description, hardware description languages, basic computer organization and assembly-level programming. The relationship between software and hardware is stressed. This course duplicates material in CS2504 and may not be taken for credit towards graduation if CS2504 is also taken. Pre: 1574. (3H,3C)

#### 2524: INTRODUCTION TO UNIX FOR ENGINEERS

Fundamental concepts of operating systems, emphasizing a hands-on introduction to UNIX. User interfaces, UNIX shell commands, the UNIX file system, task management, common system utilities, the UNIX programming environment. Students gain experience with system installation and administration. Duplicates CS 2204. Must have C- or better in prerequisite 2574. Pre: 2574. (2H,2C)

#### 2534: MICROCONTROLLER PROGRAMMING AND INTERFACING

Operation and applications of microcontrollers, including system level organization, analysis of specific processors, and software and hardware interface design. Pre: 2504. (3H,3L,4C)

#### 2574: INTRODUCTION TO DATA STRUCTURES AND SOFTWARE ENGINEERING

Introduces fundamental data structures, algorithms, and abstract data types. Main topics include data structures such as arrays, linked lists, stacks, queues, graphs, and trees, and algorithms such as those that are used for list manipulation, graph searches, sorting, searching, and tree traversals. Implementation of data structures and algorithms in C++. Pre: 1574. (3H,3C)

#### 2704: SIGNALS AND SYSTEMS

Analysis techniques for signals and systems. Signal representation, including Fourier and Laplace transforms. System definitions and properties, such as linearity, causality, time invariance, and stability. Use of convolution, transfer functions and frequency response to determine system response. Applications to circuit analysis. Pre: (2004 or 2004H), (MATH 2214 or MATH 2214H). (3H,3C) I,II.

#### 2964: FIELD STUDY

Variable credit course.

#### 2974: INDEPENDENT STUDY

A minimum GPA of 2.0 in all ECE courses is required for enrollment. Variable credit course.

#### 2984: SPECIAL STUDY

Variable credit course.

#### 3004: AC CIRCUIT ANALYSIS

Application of the basic laws and techniques of circuit analysis to AC circuits. Complex numbers and algebra with an emphasis on phasor representation of circuits. Calculation of the frequency response of circuits with R, L, and C components, independent sources, controlled sources, and operational amplifiers. Analysis of AC steady-state circuits and determination of average power. Magnetically coupled circuits. Laplace and Fourier transforms. Representation of circuits by two-port models. Pre: 2704. Co: 3074. (3H,3C)

#### 3054: ELECTRICAL THEORY

For students in curricula other than ECE. Fundamentals of electric circuits: circuit laws and network theorems, operational amplifiers, energy storage elements, response of first and second order systems. AC steady state analysis. Pre: PHYS 2306. Co: MATH 2214. (3H,3C)

#### 3074: AC CIRCUIT ANALYSIS LABORATORY

Construction, analysis, and characterization of circuits with student-owned Lab-in-a-Box system. Experiments include: sinusoids and phasors including impedance, admittance, and Kirchhoff's laws; sinusoidal steady-state including node and mesh analysis, Thevenin and Norton equivalent, and op amps; ac power analysis including instantaneous and average power, power factor, and complex power; magnetically coupled circuits including mutual inductance, energy in a coupled circuit, and transformers; frequency response including transfer functions, Bode plots, resonance, and passive and active filters; and two-port circuits. A C- or better is required for all prerequisites. Pre: 2074. Co: 3004. (3L,1C)

#### 3105-3106: ELECTROMAGNETIC FIELDS

Maxwell's equations and their application to engineering problems. 3105: transmission lines, electrostatics, magnetostatics. 3106: time-varying fields, Maxwell's Equations, waves, propagation, guided waves, radiation. Pre: PHYS 2306, MATH 2224, (ECE 2004 or ECE 2004H) for 3105; 3105 for 3106. (3H,3C)

#### 3204: ANALOG ELECTRONICS

Small signal modeling of transistors. Basic architecture and functionality of linear amplifiers including transistor biasing circuits, current sources, differential amplifier, common emitter amplifier, common source amplifier, emitter follower, and source follower. Operational amplifier operating principles, circuit design, and applications. Frequency response of single stage and multistage amplifiers. Feedback systems and stability analysis of amplifiers. Pre: 2204, 2704. Co: 3274. (3H,3C)

#### 3254: INDUSTRIAL ELECTRONICS

For students in curricula other than EE and CpE. Fundamentals of electronics, including basic device principles. Circuit applications include digital, op-amp, and analog analysis for industrial applications. Pre: 3054. (2H,3L,3C) I,II,IV.

#### 3274: ELECTRONIC CIRCUITS LABORATORY II

Design, build, and test amplifiers and other electronic circuits to meet specifications. Bipolar and field-effect transistors, diodes, integrated circuits such as operational amplifiers, and passive components are used. Gain, bandwidth, input and output impedance, positive and negative feedback, and circuit stability are implemented in the designs. Digital oscilloscopes, ammeters, voltmeters, function generators, and power supplies are used. A grade of C- or better is required in all pre-requisite courses. Pre: 2274, 3074. Co: 3204. (3L,1C)

#### 3304: INTRODUCTION TO POWER SYSTEMS

Basic concepts of AC systems, single-phase and three-phase networks, electric power generation, transformers, transmission lines, electric machinery and the use of power. Pre-requisite 3004 with C- or better. Pre: 3004. (3H,3C)

#### 3354: ELECTRIC POWER ENGINEERING LABORATORY

Laboratory experiments based on principles of electric power engineering. Pre: 3304. Co: 3304. (3L,1C) II.

#### 3504: DIGITAL DESIGN I

Design techniques for combinational and sequential logic. Design of digital circuits using standard integrated circuit chips and programmable logic devices. Computer simulation will be used to validate designs. Prototypes will be constructed to demonstrate design functionality. Pre: 2504. (3H,3L,4C) I,II.

#### 3574: APPLIED SOFTWARE DESIGN

An introduction to applied software design methods for use in the writing of efficient, reusable, and modular C++ programs. Introduces the use of the following: classes, inheritance, and polymorphism; design patterns; high-level programming techniques using libraries, generics, and containers; widgets, models, and views; software frameworks for embedded systems; and advanced techniques ranging from multi-threading to reflective programming. Pre: 2574. (3H,3C)

#### 3614: INTRODUCTION TO COMMUNICATION SYSTEMS

Analysis and design of analog and digital communication systems based on Fourier analysis. Topics include linear systems and filtering, power and energy spectral density, basic analog modulation techniques, quantization of analog signals, line coding, pulse shaping, and transmitter and receiver design concepts. Applications include AM and FM radio, television, digital communications, and frequency-division and time-division multiplexing. Pre: 2704. (3H,3C)

#### 3704: CONTINUOUS AND DISCRETE SYSTEM THEORY

Continuous- and discrete-time system theory. Block diagrams, feedback, and stability theory. System analysis with Bode diagrams. Discrete-time stability, difference equations, Z-transforms, transfer functions, Fourier transforms, and frequency response. Sampling of continuous systems and an introduction to digital filtering. Pre: 2704. (3H,3C) I,II.

#### 3964: FIELD STUDY

Variable credit course.

#### 3974: INDEPENDENT STUDY

Variable credit course.

#### 3984: SPECIAL STUDY

Variable credit course.

#### 4104: MICROWAVE AND RF ENGINEERING

Passive and active Radio Frequency and microwave components and circuits for wireless communications; transmission-line theory; planar

transmission-lines and waveguides; S-parameters; resonators; power dividers and couplers; microwave filters; sources, detectors, and active devices; modern RF & microwave CAD; measurement techniques. Pre: (3106, 3204). (3H,3L,4C)

#### 4114: ANTENNAS

Antenna fundamentals, analysis and design principles, and a survey of antenna types including: arrays, wire antennas, broadband antennas, and aperture antennas. Pre: 3106. (3H,3C) II.

#### 4124: RADIO WAVE PROPAGATION

Behavior of radiated electromagnetic waves in terrestrial, atmosphere, space, and urban environments; path, frequency and antenna selection for practical communication systems; propagation prediction. Pre: 3106. (3H,3C)

#### 4134: FIBER OPTICS APPLICATIONS

Theory of optical fiber waveguide propagation and design applications in communication and sensing systems. I Pre: 3106. (3H,3C)

#### 4144: INTRODUCTION TO OPTICAL INFORMATION PROCESSING

Modern wave optics. The application of Fourier transforms to image analysis, optical spatial filtering, and image processing. Pre: 3106. (3H,3C) II.

#### 4154: INTRODUCTION TO SPACE WEATHER

The space environment from the Sun to the Earth's upper atmosphere and the practical consequences (space weather) of this environment on the modern technologies and human health. Concepts in space plasma physics. Examples of observations and data utilized to illustrate the environment and its dynamic variability. Pre: 3106. (3H,3C)

#### 4164: INTRODUCTION TO GLOBAL POSITIONING SYSTEM (GPS) THEORY AND DESIGN

Fundamental theory and applications of radio navigation with the Global Positioning System GPS. Satellite orbit theory, GPS signal structure and theory, point positioning with pseudoranges and carrier phases, selective availability, dilution of precision, differential GPS, atmospheric effects on GPS signals. Pre: 3106 or AOE 4134. (3H,3L,4C)

#### 4205-4206: ELECTRONIC CIRCUIT DESIGN

Stability and response of feedback amplifier, wideband amplifiers, operational amplifier characteristics, waveform generators and wave shaping, nonlinear circuit applications, signal generators, and photolithography. Design of analog electronic circuits, circuit simulation, response characterization, and printed circuit construction. Pre: 3204 for 4205; 4205 for 4206. (3H,3C) I,II.

#### 4214: SEMICONDUCTOR DEVICE FUNDAMENTALS

Fundamental semiconductor device physics associated with semiconductor materials and devices with an in-depth coverage of p-n and Schottky diodes, bipolar junction transistors and metal-oxide semiconductor and junction field effect transistors. Pre: 2204 or MSE 3204 or PHYS 3455. (3H,3C)

#### 4220: ANALOG INTEGRATED CIRCUIT DESIGN

Integrated circuit design in silicon bipolar, MOS, and BiCMOS technologies for communications, sensor, instrumentation, data conversion, and power management applications. Models for integrated circuit active devices in bipolar and MOS technologies; noise; current mirrors, active loads and references; amplifiers and output stages; operational amplifiers; and an introduction to data conversion circuits. Circuit design at the IC level; modern VLSI CAD software. A grade of C- or better required in pre-requisite 3204. Pre: 3204. (3H,3C)

#### 4224: POWER ELECTRONICS

Power devices and switching circuits including inverters and converters; electronic power processing and control as applied to industrial drives, transportation systems, computers, and spacecraft systems. I Pre: 3204. (3H,3C)

#### 4234 (MSE 4234): SEMICONDUCTOR PROCESSING

Manufacturing practices used in silicon integrated circuit fabrication and the underlying scientific basis for these process technologies. Physical models are developed to explain basic fabrication steps, such as substrate growth, thermal oxidation, dopant diffusion, ion implantation, thin film deposition, etching, and lithography. The overall CMOS integrated circuit process flow is described within the context of these physical models. I. Pre: 2204 or 3054. (3H,3C)

#### 4235-4236 (MSE 4235-4236): PRINCIPLES OF ELECTRONIC PACKAGING

This two-course sequence covers principles and analyses for design and manufacture of electronic packages. 4235: design issues such as electrical, electromagnetic, thermal, mechanical, and thermomechanical, are covered at the lower levels of packaging hierarchy. Materials and process selection guidelines are discussed for the manufacturing and reliability of chip carriers, multichip and hybrid modules. 4236: system-level package design issues for meeting application requirements and modeling tools for analyzing electronic packages are introduced. Materials and process selection guidelines are discussed for the manufacturing and reliability of packaged electronic products. Pre: 2204 or 3054 for 4235; 2204, (4235 or MSE 4236) for 4236. Co: 3054 for 4235. (3H,3C)

#### 4244: INTERMEDIATE SEMICONDUCTOR PROCESSING LABORATORY

Design, layout, fabricate, and characterize microelectronic devices. Analyze test results to verify performance to the predetermined specifications. Required oral and written reports. A C- or higher is required in all pre-requisite courses. Pre: 4234 or MSE 4234. (1H,6L,3C)

#### 4284: POWER ELECTRONICS LABORATORY

Design and testing of electronic power processing systems for commercial and aerospace applications. Co: 4224. (3L,1C) II.

#### 4304: DESIGN IN POWER ENGINEERING

A study of the principles in electric power engineering. Expert systems, superconductivity, DC transmission, motor control, system protection, high performance motors, solar energy, microcomputer applications, machine design, computer-aided design, digital relaying and space station

application. I Pre: 3304. (3H,3C)

#### 4324: ELECTRONIC CONTROL OF MACHINES

Dynamics and control of electric machines driven by electronic power converters. Pre: 4405, 4224. (3H,3C) II.

#### 4334: POWER SYSTEM ANALYSIS AND CONTROL

Development of methods for power analysis and control. An analysis and design of systems for steady state, transient, and dynamic conditions. Digital solutions emphasized. I Pre: 3304. (3H,3C)

#### 4344: ELECTRIC POWER QUALITY FOR THE DIGITAL ECONOMY

Causes, consequences and solutions of power quality problems that affect the operation of computerized processes and electronic systems. Industry standards, monitoring techniques and economic consideration of power quality issues. Pre: 3304. (3H,3C)

#### 4354: POWER SYSTEM PROTECTION

Protection of power apparatus and systems. Fuses. Voltage and current transducers. Relays. Coordination of relays. Pilot channels. Grounding practices. Surge phenomena. Insulation coordination. Pre: 4334. (3H,3C) II.

#### 4364: ALTERNATE ENERGY SYSTEMS

Electric energy from alternative energy sources including solar, wind, hydro, biomass, geothermal and ocean. Characteristics of direct conversion, electromechanical conversion, and storage devices used in alternative energy systems. Power system issues associated with integration of small scale energy sources into the electricity grid. Pre: STAT 4714. (3H,3C) II.

#### 4374: POWER SYSTEM PROTECTION LABORATORY

Experimental verification of principles and practice of protective relaying. Experiments and design projects to demonstrate the principles and techniques of industrial power system design. Fuses, time overcurrent, and instantaneous relays. Differential relaying for transformers. Distance relaying. Current and voltage transformers. Pre: 4334. Co: 4354. (3L,1C) II.

#### 4405-4406: CONTROL SYSTEMS

4405: Introduction to the design of feedback compensation to improve the transient and steady-state performance of systems. Course covers modeling techniques, root locus analysis and design, Nyquist criterion, and frequency domain compensation. Must have a C- or better in prerequisite 3704. 4406: Extension of the techniques of 4405 to systems controlled by digital compensators. Course covers discrete-time modeling of continuous-time systems, discrete-time redesign of continuous controllers, root-locus compensation, and frequency domain compensation. A capstone design project involving both written and oral presentations is required. Must have a C- or better in prerequisite 4405. Pre: 3704 for 4405; 4405 for 4406. (3H,3C)

#### 4415-4416: CONTROL SYSTEMS LABORATORY

Design and implementation of controllers for physical systems. System identification techniques. 4415: Supplements material in ECPE 4405. Continuous-time modeling and control. 4416: Supplements material in ECPE 4406. Discrete-time modeling and control. Co: 4405 for 4415; 4406 for 4416. (3L,1C) I,II.

#### 4500: FUNDAMENTALS OF COMPUTER SYSTEMS

Fundamental principles and concepts of computer systems. Computer hardware; Boolean logic; number systems and representation; design and operation of digital logic; instruction set architectures and computer organization; and basics of data communication and networking. Partially duplicates ECE 3504 and 4504. Master of Information Technology students only. Pre: Ability to program in a modern high-level programming language. (3H,3C)

#### 4504 (CS 4504): COMPUTER ORGANIZATION

Information representation and transfer; instructions and data access methods; the control unit and microprogramming; memories; input/output and interrupts; secondary storage; the von Neumann SISD organization; high level language machines; the RISC concept; special purpose processors including operating system, file, text, floating point, communication, etc. Multicomputers; multiprocessors; concurrent processing support; Pipeline machines, processor arrays, database machines; the data flow/data directed approach; computer networks. A grade of C or better required in prerequisite CS 3214. Pre: CS 3214. (3H,3C)

#### 4514: DIGITAL DESIGN II

In this course, students will learn to use a hardware descriptive language (VHDL) in the digital design process. Emphasis will be on system-level concepts and high-level design representations. Methods will be learned that are appropriate for use in automated synthesis systems. Students will have the opportunity to use commercial schematic capture and simulation tools to design a series of increasingly complex devices. Students will also use a logic synthesis tool and synthesize assignments into Field Programmable Gate Arrays. Must have a C- or better in prerequisite 3504. Pre: 3504. (3H,3L,4C)

#### 4520: DIGITAL AND MIXED-SIGNAL SYSTEM TESTING AND TESTABLE DESIGN

Various topics on testing and testable design for digital and mixed-signal systems are studied: fault modeling, logic and fault simulation, fault modeling, automatic test pattern generation, deterministic ATPG, simulation-based ATPG, delay fault testing, design for testability, built-in-self-test and fault diagnosis. Pre: 3504, 2574. (3H,3C)

#### 4524: ARTIFICIAL INTELLIGENCE AND ENGINEERING APPLICATIONS

Problem solving methods; problem spaces; search techniques; knowledge representation; programming languages for AI; games; predicate logic; knowledge-based systems; machine learning; planning techniques; reactive systems; artificial neural networks; natural language understanding; computer vision; robotics. Pre: 2574, STAT 4714. (3H,3L,4C)

#### 4530: HARDWARE-SOFTWARE CODESIGN

An introduction to the design of mixed hardware-software systems, focusing on common underlying modeling concepts, the design of hardware-software interfaces, and the trade-offs between hardware and software components. Students will use simulation tools to conduct experiments with mixed hardware-software systems in the area of embedded systems. Pre: 3504, (2984 or 2534). (3H,3C)

#### 4534: EMBEDDED SYSTEM DESIGN

Introduction to the design of embedded computer systems; design, implementation, and analysis of embedded computer hardware and software; design, implementation, and debugging of complex software applications on embedded systems; and fundamentals of real-time operating systems for embedded computers. Semester-long design project including written and oral presentations. C- or better required in pre-requisites. Pre: 3574, 2534. (3H,3L,4C)

#### 4540: VLSI CIRCUIT DESIGN

Introduction to the design and layout of Very Large Scale Integrated Circuits (VLSI). Emphasis is placed on digital CMOS circuits. Static and dynamic properties of MOSFET devices, along with integrated circuit fabrication are examined. Computer-aided design tools are used to produce working integrated circuit designs. Pre: 2204, 2504. (3H,3C)

#### 4550: REAL-TIME SYSTEMS

Introduction to real-time systems, real-time scheduling including multiprocessor scheduling, real-time operating systems (kernels), real-time communication, real-time programming languages, reliability and fault-tolerance, and real-time system requirements and design methods. Design, analysis, and implementation of real-time kernel mechanisms and real-time applications using kernels such as Linux and programming languages such as C (with POSIX primitives) and Ada 95. Must have a grade of C- or better in prerequisites 4534 or CS 3204. Pre: 4534 or CS 3214. (3H,3C) II.

#### 4560: COMPUTER AND NETWORK SECURITY FUNDAMENTALS

This course introduces fundamental security principles and real-world applications of Internet and computer security. Topics covered in the course include legal and privacy issues, risk analysis, attack and intrusion detection concepts, system log analysis, intrusion detection and packet filtering techniques, computer security models, computer forensics, and distributed denial-of-service (DDoS) attacks. Must have C- or better in ECE 4564 or CS 4254. Pre: 4564 or CS 4254. (3H,3C)

#### 4564: NETWORK APPLICATION DESIGN

Application program interface and network transport services including User Datagram Protocol and Transmission Control Protocol from the Internet Protocol suite. Client-server organization and design of synchronous, asynchronous, and multithreaded client and server applications. Design, implementation, and testing techniques to improve robustness and performance. Partially duplicates CS 4254 and credit will not be allowed for both. Pre: (2504, 2574). (3H,3C)

#### 4570 (CS 4570): WIRELESS NETWORKS AND MOBILE SYSTEMS

Multidisciplinary, project-oriented design course that considers aspects of wireless and mobile systems including wireless networks and link protocols, mobile networking including support for the Internet Protocol suite, mobile middleware, and mobile applications. Students complete multiple experiments and design projects. Pre: 4564. (3H,3C)

#### 4574: LARGE-SCALE SOFTWARE DEVELOPMENT FOR ENGINEERING SYSTEMS

Large-scale software implementations of the hierarchy of engineering analysis, design, and decision evaluation. Computer-aided engineering programs with state-of-the-art computer tools and methods. Operator overloading, dynamic polymorphism, graphical user interfaces, generic programming, dynamic link libraries, and multiple threads. Pre: 3574. (3H,3C)

#### 4580: DIGITAL IMAGE PROCESSING

This course provides an introduction to basic concepts, methodologies and algorithms of digital image processing focusing on the two major problems concerned with digital images: (1) image analysis and object restoration for easier interpretation of images, and (2) image analysis and object recognition. Some advanced image processing techniques (e.g., wavelet and multiresolution processing) will also be studied in this course. The primary goal of this course is to lay a solid foundation for students to study advanced image analysis topics such as computer vision systems, biomedical image analysis, and multimedia processing & retrieval. (3H,3C)

#### 4605-4606: RADIO ENGINEERING

Wireless application circuit design for gain and filter control at radio frequencies to interface the baseband processing systems and the antennas of communication systems. 4605: Design of radio transmitter and receiver circuits using scattering-parameter methods. Circuits include oscillators, radio frequency amplifiers and matching networks, mixers and detectors. 4606: Design of amplitude, frequency, and pulse-modulated communication systems, including modulators, detectors, and the effects of noise. Design basics and guidelines for phaselocked loops and several power amplifier configurations. Pre: 3106, 3204, 3614 for 4605; 4605 for 4606. Co: 4675 for 4605. (3H,3C) I,II.

#### 4614: TELECOMMUNICATION NETWORKS

An introduction and overview of the architecture, technology, operation, and application of telecommunication networks. Major topics include the convergence of telephone and computer networks, the layered architecture of computer networks with emphasis on the Internet, and wireless network technology and applications. Pre: 2504, 2704, STAT 4714. (3H,3C)

#### 4624: DIGITAL SIGNAL PROCESSING AND FILTER DESIGN

Analysis, design, and realization of digital filters. Discrete Fourier Transform algorithms, digital filter design procedures, coefficient quantization. Pre: C or better in 3704 Pre: 3704. (3H,3C)

#### 4634: DIGITAL COMMUNICATIONS

System level analysis and design for digital communications systems: analog-to-digital conversion, digital baseband communications, carrier modulation formats, matched filters, bandwidth efficiency, receiver design, link budgets, signal-to-noise ratio, bit error rates in additive-white-noise Gaussian (AWGN) channels, and multiple access. Must have a grade of C- or better in prerequisites 3614 and STAT 4714. Pre: 3614, STAT 4714. (3H,3C)

#### 4644: SATELLITE COMMUNICATIONS

Theory and practice of satellite communications. Orbits and launchers, spacecraft, link budgets, modulation, coding, multiple access techniques, propagation effects, and earth terminals. Pre: 3614. (3H,3C) II.

#### 4654: DSP IMPLEMENTATION OF COMMUNICATION SYSTEMS

An introduction to designing communication subsystems and involves designing and implementing in software demodulators, signal synthesizers, and synchronizers. A significant part of this class will be DSP programming. Pre: 4624, 4634. (3H,3C)

#### 4664: ANALOG & DIGITAL COMMUNICATIONS LABORATORY

Laboratory experiments which deal with the design and measurement of analog and digital communication systems. Concepts include SNR, Modulation Index, PCM, and spread spectrum. I Pre: 3614. Co: 4634. (3L,1C)

#### 4674: SCATTERING PARAMETERS LABORATORY

Laboratory techniques for ultra-high frequency measurements. Emphasizes the design of a microstrip amplifier using scattering parameter measurement and analysis. Pre: 4605, 4675. (3L,1C) II.

#### 4675-4676: RADIO ENGINEERING LABORATORY

Laboratory techniques for radio frequencies including the design of amplifiers, oscillators, and a single-side-band receiver. Associated measurements will be used. Pre: 3106, 3204 for 4675; 4675 for 4676.

Co: 4605 for 4675; 4606 for 4676. (3L,1C) I,II.

#### 4704: PRINCIPLES OF ROBOTICS SYSTEMS

Introduction to the design, analysis, control, and operation of robotic mechanisms. Introduction to the use of homogeneous coordinates for kinematics, dynamics, and camera orientation; sensors and actuators, control, task planning, vision, and intelligence. Pre: 3704. (3H,3C) II.

#### 4904: PROJECT AND REPORT

Investigation and report on a special project under the direction of a faculty advisor. Course may be extended over several semesters with a letter grade assigned at the end of the semester in which the project and report are completed. Involves design, construction, and testing of a circuit or system. A minimum in-major GPA of 2.5 is required for enrollment. Variable credit course.

#### 4964: FIELD STUDY

Variable credit course.

#### 4974: INDEPENDENT STUDY

A minimum in-major GPA of 2.0 is required for enrollment. Variable credit course. X-grade allowed.

#### 4984: SPECIAL STUDY

A minimum in-major GPA of 2.5 is required for enrollment. Variable credit course. X-grade allowed.

#### 4994: UNDERGRADUATE RESEARCH

A minimum GPA of 2.0 in all ECE courses is required for enrollment. Variable credit course. X-grade allowed.

## Overview

The Department of Engineering Education (ENGE) teaches first-year and second-year engineering courses, advises General Engineering (GE) students, and offers graduate programs, including a graduate certificate and a Ph.D., in engineering education. The department offers second-year courses in engineering topics such as computer-aided design and programming.

At the undergraduate level, the department provides the foundation for students to complete a bachelor of science degree in one of the college of engineering programs and move into degree-related employment or graduate studies. At the graduate level, the department prepares students to teach engineering and conduct research related to teaching, learning, and assessment in engineering contexts.

Accreditation statements may be found in the listings for individual undergraduate degree programs.

The National Science Foundation (NSF) Center for e-Design is a major asset to Engineering Education. The mission of this multi-university industry/university center is to serve as a national center of excellence in IT-enabled design and realization of products and systems. The main objectives are twofold: 1) to research, develop, and test methods and technologies for collaborative design environments that enable lower cost, higher quality, faster to market products, and 2) to nurture and cultivate a new breed of engineers, scientists, and business leaders in this new design paradigm through an educational model that includes close collaborations with industry and use of the latest technologies and methods. Refer to the Center web site for more information: <http://e-design.iems.ucf.edu/index.html>

Faculty from the department have created and direct the Virginia Tech Engineering Communications Center (VTECC), a research center focused on understanding engineering communication and collaboration practices in industry and academic settings. As part of its outreach mission, VTECC continually uses the findings from industry and classroom research sites to help engineering faculty and departments develop assignments and curricula that effectively address professional skills such as written and oral communication and multidisciplinary collaboration (<http://www.vtecc.eng.vt.edu/>).

Our department is also the organizational home of the Joseph F. Ware, Jr. Advanced Engineering Laboratory. The Ware Lab, as it is commonly known, is a College of Engineering facility that is home to many of the hardware realization projects in the College (<http://www.eng.vt.edu/warelab/>).

## Special Facilities

The department has a student project laboratory, the Frith Freshman Engineering Design Laboratory, equipped for hands on engineering design and reverse engineering activities. The Frith Lab is reconfigurable for a number of different activities and has been used for purposes ranging from simple mechanical fabrication to using small fuel cells for experimental purposes.

## First Year Students and General Engineering

The General Engineering (GE) program of the EngE department serves first-year students in the College of Engineering. Through EngE courses, these first-year students, often with little firsthand knowledge of engineering, participate in basic problem solving and design exercises that represent the essence of the engineering profession. The courses emphasize team-based design-oriented hands-on experience to develop students' concepts of engineering and engineering methods while reinforcing the role of concurrent required courses (e.g. mathematics, chemistry, English, physics), as well as serving as a foundation for subsequent courses in the various engineering curricula. Coverage of engineering ethics instills a sense of the responsibilities of engineers to society. Algorithm development and computer programming develop logical thinking, provide the background for computer use in later courses, and complement problem solving skills. Spatial visualization skills are developed through engineering graphics, a primary engineering tool. Through writing and presentations students begin to develop professional communication skills, including audience analysis, visual rhetoric, effective writing styles, opportunities and problems posed by electronic writing environments, issues in collaborative writing, techniques of oral presentation, print and Web-based research, graphics for written and oral presentations, and editing.

All College of Engineering students must own 1) a convertible tablet PC computer meeting current specifications, and 2) stipulated software used to analyze and solve problems in and out of class.

## Transfer to Engineering Departments

Entering students are admitted to General Engineering, the first-year program for all engineering curricula. As noted, this program introduces students to foundational concepts and practices in engineering, allows time to adjust to the College, and provides opportunities to investigate the College's individual degree programs and select the branch of engineering (or computer science) best suited to their skills and interests. At the end of the year – after additional advising, counseling, contacts with the various departments, and satisfactory progress – students select a degree program and, if academically eligible, are transferred to the appropriate degree-granting department. Students achieving Dean's List status (GPA of 3.4 or higher) at the end of their first semester can transfer to their selected department in the beginning of their second semester. Students must earn a minimum grade of C- in the first EngE course, ENGE 1024, in order to be eligible to take all subsequent ENGE courses. Also, a minimum grade of C- in all other first-year ENGE courses is required before transferring to a degree-granting department.

In addition to requiring successful completion of the first-year courses, some degree-granting programs have additional restrictions and/or required courses before students may transfer from General Engineering. Please see the previous catalog section, titled "[Required Academic Progress](#)," for details.

<b>First Year</b>	
<i>First Semester</i>	
CHEM 1035: General Chemistry	(3)
CHEM 1045: General Chemistry Lab	(1)
ENGE 1024: Engineering Exploration	(2)
ENGL 1105: Freshman English	(3)
MATH 1205: Calculus	(3)
MATH 1114: Elementary Linear Algebra	(2)
Curriculum for Liberal Education	(1-3)
<b>Credits</b>	<b>(15-17)</b>
<i>Second Semester</i>	

ENGL 1106: Freshman English	(3)
MATH 1206: Calculus	(3)
MATH 1224: Vector Geometry	(2)
PHYS 2305: Foundations of Physics I	(4)
PHYS 2305: Foundations of Physics Lab	(0)
ENGE 1104: Exploration of the Digital Future or ENGE 1114: Exploration of Engineering Design. ENGE 1104: Required for Computer Engineering and Electrical Engineering ENGE 1104: Recommended for Computer Science ENGE 1114: Required for Aerospace Engineering, Mechanical Engineering, and Ocean Engineering ENGE 1114: Recommended for all other engineering majors	(2)
Biological Systems Engineering interested students: CHEM 1036: General Chemistry	(3)
Chemical Engineering interested students: CHEM 1036: General Chemistry CHEM 1046: General Chemistry Lab	(3) (1)
Computer Engineering interested students: ECE 1574: Object-Oriented Engineering Problem Solving with C++	(3)
Computer Science interested students: CS 1114: Intro to Software Design or CS 1124 Intro to Media Computation	(3)
Electrical Engineering interested students: ECE 1574: Object-Oriented Engineering Problem Solving with C++	(3)
All other students: Curriculum for Liberal Education	(1-3)
Credits	(15-18)

## Graduate Courses

The department's growing graduate program provides opportunities for students pursuing advanced degrees in engineering (or related areas) to expand their knowledge of teaching and learning in engineering contexts. Courses help prepare students for academic careers in engineering, understand the principles that guide teaching methods in various types of engineering courses, and develop tools for assessing both student learning and program effectiveness. In addition, the department provides opportunities for students to participate in research projects that advance our understanding of engineering pedagogy. A Graduate Certificate in Engineering Education is available for graduate students from any Virginia Tech department. The Ph.D. in Engineering Education is designed for graduate students who desire to perform and lead rigorous research in the field of engineering education.

## Undergraduate Course Descriptions (ENGE)

### 1024: ENGINEERING EXPLORATION

Introduction to the profession and the College of Engineering. Foundation material in: problem definition, solution and presentation; design, including hands-on realization working in teams; modeling and visual representation of abstract and physical objects; scientific computation; algorithm development, computer implementation and application; documentation; ethics; and professionalism. Grade of C- or better required of all students attempting entry into College of Engineering programs. Attempts to achieve grade of C- or better limited to two attempts, including attempts utilizing the W grade option. Co: MATH 1205. (2H,2C)

### 1044: GREEN ENGINEERING LECTURE SERIES

Weekly discussions presented by engineers, environmentalists, scientists, and public officials concerning the need for engineering works to be planned, constructed, and operated in harmony with the environment. (1H,1C)

### 1104: EXPLORATION OF THE DIGITAL FUTURE

Builds on the principles and practice of engineering design introduced in 1024 and introduces various discipline-specific engineering tools.

Topics covered include: the engineering design cycle; patent application and search; basic project management; written and oral communications. Basic computer organization and Boolean algebra. Signal and information coding and representation. Introduction to networking. For students planning to major in Computer Engineering, Computer Science, or Electrical Engineering. Grade of C- or better required of all students attempting entry into College of Engineering programs. Attempts to achieve grade of C- or better limited to two attempts, including attempts utilizing the W grade option. Partially duplicates 1114. Duplicates 1204. Prerequisite requires grade of C- or better. Pre: 1024. (2H,2C)

#### 1114: EXPLORATION OF ENGINEERING DESIGN

Builds on principles and practice of engineering design introduced in 1024 and introduces various discipline-specific engineering tools. Topics covered include: engineering design cycle; patent application and search; basic project management; written and oral communications; computer assisted design and analysis; the graphics language; working in a team environment. Requires successful completion of a team-based design project. For students planning to major in Aerospace Engineering, Biological Systems Engineering, Chemical Engineering, Civil and Environmental Engineering, Engineering Science and Mechanics, Industrial and Systems Engineering, Materials Science and Engineering, Mechanical Engineering, Mining and Minerals Engineering, and Ocean Engineering. Grade of C- or better required of all students attempting entry into College of Engineering programs. Attempts to achieve grade of C- or better limited to two attempts, including attempts utilizing the W grade option. Partially duplicates 1104. Duplicates 1214. Prerequisite requires grade of C- or better. Pre: 1024. (2H,2C)

#### 1204: DIGITAL FUTURE TRANSITION

Builds on the principles and practice of engineering design introduced in 1024 and introduces various discipline-specific engineering tools. Basic computer organization and Boolean algebra. Signal and information coding and representation. Introduction to networking. For students who have successfully completed 1114 and are now planning to major in Computer Engineering, Computer Science, or Electrical Engineering. Grade of C- or better required of all students attempting entry into College of Engineering programs. Attempts to achieve grade of C- or better limited to two attempts, including attempts utilizing the W grade option. Partially duplicates 1104. Prerequisite requires a grade of C- or better. Pre: 1114. (1H,1C)

#### 1214: ENGINEERING DESIGN TRANSITION

Builds on the principles and practice of engineering design introduced in 1024 and introduces various discipline-specific engineering tools. Topics covered include computer assisted design and analysis and the graphics language. For students who have successfully completed 1104 and are currently planning to major in Aerospace Engineering, Biological Systems Engineering, Chemical Engineering, Civil and Environmental Engineering, Engineering Science and Mechanics, Industrial and Systems Engineering, Materials Science and Engineering, Mechanical Engineering, Mining and Minerals Engineering, and Ocean Engineering. Grade of C- or better required of all students attempting entry into College of Engineering programs. Attempts to achieve grade of C- or better limited to two attempts, including attempts utilizing the W grade option. Partially duplicates 1114. Prerequisite requires grade of C- or better. Pre: 1104. (1H,1C)

#### 1224: INTRODUCTION TO ENGINEERING ETHICS

Introduction to the application of basic ethical theories to ethical dilemmas in engineering. Topics include risk and design, professional responsibility, loyalty, conflict of interest, safety, and intellectual property concerns with an emphasis on real-world engineering case studies. Grade of C- or better required of all students attempting entry into College of Engineering programs. Attempts to achieve grade of C- or better limited to two attempts, including attempts utilizing the W grade option. Partially duplicates 1024. (1H,1C)

#### 1234: ENGINEERING HANDS-ON LAB

Introduction to teamwork; introduction to hand tools; dissection and reassembly of various mechanical and electrical devices such as cameras, computers, drills, and engines; examination of engineering principles and design issues; oral presentation using computer software. (2L,1C)

#### 1354: INTRO TO SPATIAL VISUALIZATION

Introduction to spatial visualization. Training to improve three-dimensional visualization skills. Does not count towards College of Engineering graduation credit. (1H,1C)

#### 1434: FUNDAMENTALS OF ENGINEERING

Introduction to the profession and the College of Engineering. Foundation material in: problem definition, solution and presentation; design, including hands-on realization working in teams; modeling and visual representation of abstract and physical objects; scientific computation; algorithm development, computer implementation and application; documentation; ethics; and professionalism. Various discipline-specific engineering tools. Requires successful completion of a team-based project. Grade of C- or better is required of all students attempting entry into College of Engineering programs. Duplicates 1024, 1104, 1114, 1204, and 1214. This course counts as an attempt at each of those courses. Attempts to achieve grade of C- or better is limited to two attempts, including attempts utilizing the W grade option. Enrollment restricted to external transfer students. Co: MATH 1205. (5H,5C)

#### 2314: ENGINEERING PROBLEM SOLVING WITH C++

Algorithmic problem solving techniques for engineering problems for various fields; flowcharting, pseudocode, object-oriented program development, editing, compiling, and debugging using the C++ programming language. For Engineering students only. Must have a C- or better in ENGE 1104 and/or ENGE 1114. Pre: (1104 or 1114), MATH 1114, MATH 1206. (1H,2L,2C)

#### 2324: ENGINEERING PROBLEM SOLVING USING FORTRAN

Introduction of basic computing concepts and programming process including algorithm development, flowcharting, program development,

editing, compiling, and debugging using Fortran 90. Emphasis will be on the development and execution of program code to solve engineering problems. Must have C- or better in ENGE 1024. Pre: 1024. (1H,1C)

#### 2344: COMPUTER-AIDED DRAFTING

Introduction to computer-aided drafting concepts, primarily in two dimensions. Creation of two-dimensional system views utilizing lines, polygons, polylines, construction lines; creating drawing views principally applied to facilities design and layout. Must have C- or better in ENGE 1114. Pre: 1114. (1H,1C)

#### 2414: ADVANCED ENGINEERING PROBLEM SOLVING WITH C++

Object-oriented problem solving techniques for engineering problems from various fields; object-oriented program development, editing, compiling, and debugging using the C++ programming language. This course builds on ENGE 2314, the introductory C++ course, so that the student has the prerequisite knowledge required to take ECE 2574. Taught in an on-line format only. Students should request the course directly from the Department of Engineering Education. Partially duplicates 1574. For engineering students only. Not open to EE or CPE majors. Must have a C- or better in ENGE 2314. Pass/Fail only. Pre: 2314. (1H,1C)

#### 2514: INTRODUCTION TO ENGINEERING COMPUTATION AND CONTROL WITH LABVIEW

Introduces engineering computation and control using the LabVIEW graphical programming language and the text/matrix-based (and MATLAB compatible) MathScript programming language. Topics include algorithm development, flowcharts, pseudocode, programming control structures, structured programming, object oriented programming (OOP), data-flow programming, data acquisition, analysis and device control. Partially duplicates ENGE 2314. Pre: 1104 or 1114. (1H,2L,2C)

#### 2714: PREPARING FOR UNDERGRADUATE ENGINEERING RESEARCH

Preparing for undergraduate research, best engineering research practices, effective technical communication. Limited enrollment determined through written application process. Pre: 1114 or 1104. (1H,1C)

#### 2824: CIVIL ENGINEERING DRAWINGS AND CAD

Introduction to use of CAD in civil engineering, construction, and other land development projects. Read typical civil engineering drawings. Create land development plans, cross section and profile drawings, and detail drawings utilizing computer aided design and drafting tools. Create two and three dimensional visualizations of civil engineering, construction, and other land development projects. Partial duplication of ENGE 2344. CEE majors only. Co: CEE 2804, 1114. (1H,1L,1C)

#### 2974: INDEPENDENT STUDY

Variable credit course.

#### 2984: SPECIAL STUDY

I Variable credit course.

#### 2994: UNDERGRADUATE RESEARCH

Variable credit course.

#### 3714: DOCUMENTING UNDERGRADUATE ENGINEERING RESEARCH

Oral and written documentation of undergraduate research experience. A valid engineering undergraduate research experience required. Pre: 2714. (2H,2C)

#### 4974: INDEPENDENT STUDY

Variable credit course. X-grade allowed.

#### 4984: SPECIAL STUDY

Variable credit course. X-grade allowed.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course. X-grade allowed.

## Overview

Mechanics is a fundamental area of science and engineering. It is an exciting, expanding field of learning with its roots grounded in the laws of motion formulated by Newton and the principles governing the behavior of solids and fluids, branching out in modern times into interdisciplinary fields such as new engineering materials (adhesives, composites, polymers, light metals), biomechanics, transportation, wind engineering, and vehicular structures. Although the problems to which they are applied may change, the basic principles of mechanics remain current and relevant.

The Department of Engineering Science and Mechanics has a rich tradition for providing an interdisciplinary engineering education. We strive to prepare our graduates to succeed in advanced graduate or professional study, industry, and government. In these activities, our alumni will:

- Apply fundamentals of engineering mechanics and related areas of applied science to define, model, and solve a wide range of engineering problems.
- Apply fundamental mathematical and scientific principles, as well as computational and experimental techniques, to the demands of engineering and scientific practice.
- Function on and lead teams that engage in new areas of research and development in engineering, particularly those that cross the boundaries of traditional disciplines.
- Maintain high productivity and high ethical standards.
- Continually enhance their knowledge throughout their careers.
- Communicate effectively to a broad range of audiences.

These educational objectives are supported by a curriculum that provides its graduates with:

- an ability to apply fundamental knowledge of mathematics, science, and engineering
- an ability to design and conduct mechanics experiments
- an ability to analyze and interpret experimental and computational mechanics data
- an ability to design a system, component, or process to meet desired needs by synergistically combining mechanics of materials, fluid mechanics, and dynamics, when necessary
- an ability to effectively function as the leader, or member, of a multi-disciplinary team
- an ability to identify, formulate, and solve engineering problems involving mechanics of materials, fluid mechanics, and/or dynamics
- an understanding of professional and ethical responsibility
- an ability to communicate effectively – orally, graphically, and in writing
- the broad education necessary to understand the impact of engineering solutions on society and the environment

- a recognition of the need for, and an ability to engage in, life-long learning and accomplishment
- a knowledge of contemporary issues (e.g., social, political, technical, economic, etc.)
- a fundamental understanding that will enable the appropriate use and development of the techniques, skills, and modern engineering tools necessary for engineering practice
- a recognition of the importance of safety in phases of engineering design and practice

A total of 12 credit hours of technical electives and 6 credit hours of senior design give the student freedom to develop individually tailored programs of concentrated study. The department has emphasis areas in Biomechanics, Engineering physics, Fluid mechanics, Motions, or Solid mechanics. Exposure to the design process exists throughout the curriculum, culminating in a senior level capstone design course. The department offers official university degree options in Biomechanics and Engineering Physics. The graduation checksheets for all degree options are available at [http://www.registrar.vt.edu/registration/degree\\_checksheets.php](http://www.registrar.vt.edu/registration/degree_checksheets.php).

The Cooperative Education Program is available to qualified candidates at undergraduate and graduate levels.

Undergraduate courses in engineering science and mechanics are taught on a service basis for all engineering curricula. A minor in engineering science & mechanics is available for engineering students. The department offers graduate programs leading to M.S. (thesis and non-thesis option), M.Eng., and Ph.D. The department also participates in the Accelerated Undergraduate/Graduate Degree Program. Students with an interest in this program should contact the department for additional information.

The Engineering Science and Mechanics program at Virginia Tech is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

## Undergraduate Course Descriptions (ESM)

### 1054: INTRODUCTION TO NDE ENGINEERING

Introduction to science and technology of nondestructive evaluation (NDE) engineering. Basic concepts and terminology are presented. Applications in different industries are explored. (1H,1C) II.

### 2014: PROFESSIONAL DEVELOPMENT SEMINAR FOR ESM STUDENTS

Topics designed to foster the professional development of the ESM student. ESM program objectives and outcomes. Overview of solid mechanics, fluid mechanics, and dynamics. Synergistic applications in biotechnology, adhesion science, and other applied areas. (1H,1L,1C)

### 2074 (AOE 2074): COMPUTATIONAL METHODS

Solving engineering problems using numerical methods and software, truncation and round-off error, root finding, linear and polynomial regression, interpolation, splines, numerical integration, numerical differentiation, solution of linear simultaneous equations, numerical solutions of ordinary differential equations. A grade of C- or better required in ENGE prerequisite 1114. Pre: ENGE 1114. Co: MATH 2224. (3H,3C)

### 2104: STATICS

Vector mechanics of forces and moments, free-body diagrams, couples, resultants, equilibrium of particles and rigid bodies in two and three dimensions, forces in trusses, frames, and machines, centroids, centers of mass, distributed forces, internal shear forces and bending moments in beams, shear and moment diagrams, friction, belt friction, area of moments of inertia, parallel axis theorem. Pre: (MATH 1114 or MATH 1114H). Co: MATH 2224. (3H,3C)

### 2204: MECHANICS OF DEFORMABLE BODIES

Concepts of stress, strain, and deformation. Factor of safety. Stress-strain relationships and material properties. Stress concentrations. Area moments of inertia. Axially loaded members, torsionally loaded members, bending of beams. Shear and moment diagrams. Stresses due to combined loading. Thin-walled pressure vessels. Transformation of stress including Mohr's circle. Beam deflections and buckling stability. Pre: 2104, (MATH 2224 or MATH 2224H). (3H,3C)

### 2214: STATICS AND MECHANICS OF MATERIALS

Forces, moment, resultants, and equilibrium. Stress, strain, and stress-strain relations. Centroids and distributed loads. Analysis of axially loaded bars and beams. Principal stresses and Mohr's circle, combined loading. Pressure vessels and buckling of columns. Partially duplicates 2104 and 2204. Must be ChE major. Co: MATH 2224. (3H,3C)

### 2304: DYNAMICS

Vector treatment of the kinematics and kinetics of particles and rigid bodies, Newton's laws, work and energy, impulse and momentum, impact, mass moments of inertia, rotating axes. Pre: 2104, (MATH 2224 or MATH 2224H). Co: MATH 2214. (3H,3C)

### 2974: INDEPENDENT STUDY

Variable credit course.

### 2984: SPECIAL STUDY

Variable credit course.

### 2994: UNDERGRADUATE RESEARCH

Variable credit course.

### 3015-3016: FLUID MECHANICS I, II

3015: Fluid statics. Dimensional analysis. Control volume approach to flow analysis, pipe flow, boundary layers, compressible flow, open channel flow. 3016: Introduction to continuum mechanics. Fluid kinematics. Differential approach to flow analysis: derivation of mass, momentum and energy equations, vorticity dynamics, potential flows, compressible flows, viscous flows. Pre: 2304, (MATH 2224 or MATH 2224H) for 3015; MATH 4574, ESM 3015 for 3016. Co: ME 3134 for 3015; 3034 for 3016. (3H,3C)

#### 3024: INTRODUCTION TO FLUID MECHANICS

Fluid properties and hydrostatics. Derivation and application of the continuity, momentum, and energy equation (Bernoulli's equation) for ideal and real fluid flow (laminar or turbulent). Dimensional analysis and similitude. Introduction to boundary layers, lift and drag. Pre: 2304, MATH 2224. (2H,2L,3C)

#### 3034: FLUID MECHANICS LABORATORY

Introduction to experimental fluid mechanics. Technical writing. Experiments on fluid properties, manometry, hydrostatic forces on submerged surfaces, flow measurements, impulse-momentum principle, velocity measurements, drag forces on cylinders, model testing of ships, flow visualization and hydraulic jumps. Demonstration of modern data acquisition. Pre: 3015. (3L,1C)

#### 3054 (MSE 3054): MECHANICAL BEHAVIOR OF MATERIALS

Mechanical properties and behavior of engineering materials subjected to static, dynamic, creep and fatigue loads under environments and stress states typical of service conditions; biaxial theories of failure; behavior of cracked bodies; microstructure-property relationships and design methodologies for homogeneous and composite materials. Pre: 2204. (2H,2C)

#### 3064 (MSE 3064): MECHANICAL BEHAVIOR OF MATERIALS LABORATORY

Laboratory experiments on mechanical properties and behavior of homogenous and composite engineering materials subjected to static, dynamic, creep, and fatigue loads; behavior of cracked bodies; microstructure-property relationships, and determination of materials properties for use in engineering design. Pre: 2204. Co: 3054. (3L,1C)

#### 3114: PROB DEFINITION ENGR DESIGN

Define open-ended engineering design projects, identify relevant broad social, global, economic, cultural and technical needs and constraints, determine ways in which technical skills contribute to addressing complex engineering design challenges. Identify a capstone project for ESM 4015-4016. Pre-requisite: Junior standing in ESM. (2L,1C)

#### 3124: INTERMEDIATE DYNAMICS

Vector analysis, Newton's Laws, rotating coordinate systems, particle dynamics, orbital mechanics, systems of particles, rigid-body dynamics, inertia matrix, Eulerian angles, introduction to gyroscopic motion, Lagrange's equations. Pre: 2304, (MATH 2214 or MATH 2214H), (MATH 2224 or MATH 2224H). (3H,3C)

#### 3154: SOLID MECHANICS

Definition of strain and stress, consideration of balance of mass, momentum, energy and constitutive behavior; deformation of solid objects: 3D wave equation for bulk modes; plane stress; plane strain and axisymmetry; asymmetrical bending and shear center; torsion of general cross-section bars. Pre: 2204. (3H,3C)

#### 3704: BASIC PRINCIPLES OF STRUCTURES

Static equilibrium of forces and moments, concurrent and nonconcurrent force systems, center of gravity, concentrated and distributed loads. Solution of trusses. Stress and strain, elastic behavior of materials, cables and arches, shear, bending, and deformation in beams, indeterminate structures. Not available to students in engineering. (3H,3C)

#### 4004: INSTRUMENTATION & EXPERIMENTAL MECHANICS

Introduction to instrumentation. Data analysis: uncertainty, error and statistical concepts. Devices: digital multi-meters, oscilloscopes, power supplies, and function generators. Circuits: ballast circuits, wheatstone bridges, operational amplifiers, and transistors. Principles of data acquisition. Fourier analysis. Measurements of velocity, pressure, strain, displacement, forces and accelerations. Laboratory and design projects. Pre: 2204, 2304, (3015 or 3024), ECE 3054. (2H,2L,3C)

#### 4014: APPLIED FLUID MECHANICS

Analysis of flow over practical configurations, panel methods, Reynolds-averaged Navier-Stokes equations, turbulent boundary layers, flow separation and three-dimensional effects. Unsteady flows, fluid structure interactions. Pre: 2074, 3016. (3H,3C)

#### 4015-4016: CREATIVE DESIGN AND PROJECT I, II

Design of engineering systems and projects encompassing the principles and practices of engineering science and of the several engineering fields. Investigation and report on a supervised design project. Senior standing required. Instructor consent. 4015: (2H,3L,3C) 4016: (1H,6L,3C)

#### 4024: ADVANCED MECHANICAL BEHAVIOR OF MATERIALS

Mechanical behavior of materials, emphasizing solid mechanics aspects and methods for predicting strength and life of engineering components. Plasticity, failure criteria, fracture mechanics, crack growth, strain-based fatigue, and creep. Microstructure-property relationships, and laboratory demonstrations. Pre: 3054 or MSE 3054. (3H,3C)

#### 4044: MECHANICS OF COMPOSITE MATERIALS

Introduction to the deformation, stress, and strength analysis of continuous-fiber-polymer-matrix laminated composites. Fabrication, micromechanics of stiffness and expansional coefficients, classical lamination theory (CLT). Environmentally induced stresses. Computerized implementation and design. Pre: 2204. (3H,3C)

#### 4074: VIBRATION AND CONTROL

Single-degree-of-freedom vibration, two- and n-degree-of-freedom systems, continuous systems, introduction to nonlinear systems, system stability,

introduction to the control of dynamic systems. Pre: 3124, MATH 4564. (3H,3C)

#### 4084 (AOE 4084): ENGINEERING DESIGN OPTIMIZATION

Use of mathematical programming methods for engineering design optimization including linear programming, penalty function methods, and gradient projection methods. Applications to minimum weight design, open-loop optimum control, machine design, and appropriate design problems from other engineering disciplines. Pre: MATH 2224. (3H,3C)

#### 4105-4106: ENGINEERING ANALYSIS OF PHYSIOLOGIC SYSTEMS

Engineering analysis of human physiology. Physiologic systems are treated as engineering systems with emphasis input-output considerations, system interrelationships and engineering analogs. 4105 - Mass and electrolyte transfer, nerves, muscles, renal system. 4106 - cardiovascular mechanics, respiratory system, digestive systems, senses. Pre: 2304, MATH 2214. (3H,3C)

#### 4114: NONLINEAR DYNAMICS AND CHAOS

Motion of systems governed by first-, second-, and third-order differential and difference equations: stability, geometry, phase planes, bifurcations, Poincare' maps, point attractors, limit cycles, strange attractors, fractal dimensions, Lyapunov exponents. Forced oscillations of one-degree-of-freedom systems: jump phenomena, sub- and superharmonic resonances, Hopf bifurcations, period-multiplying bifurcations, chaos. Pre: 2304, (MATH 2214 or MATH 2214H). (3H,3C)

#### 4154 (MSE 4154): NONDESTRUCTIVE EVALUATION OF MATERIALS

Concepts and methods of nondestructive evaluation of materials. Discussion of techniques and mathematical bases for methods involving mechanical, optical, thermal, and electromagnetic phenomena; design for inspectability; technique selection criteria; information processing and handling; materials response measurement and modeling; signal analysis. Pre: 3054, (PHYS 2206 or PHYS 2306). (3H,3C)

#### 4194 (ME 4194): SUSTAINABLE ENERGY SOLUTIONS FOR A GLOBAL SOCIETY

Addresses energy metrics, global and US energy supply and demand, transitional energy sources (natural gas, petroleum, coal, nuclear), sustainable/renewable source (solar, geothermal, hydro, tidal, wind, biofuels), and methods for increasing efficiencies (energy storage, batteries, green building, conservation). Options for transportation, electricity, lighting and heating needs of industry, agriculture, community, and citizens. Production, transmission, storage, and disposal issues considered in the context of global political, economic, and environmental impacts. Senior Standing in major may be substituted for pre-requisite ENGL 3764. Pre: (CHEM 1035 or CHEM 1055), PHYS 2306, ENGL 3764. (3H,3C)

#### 4204: MUSCULOSKELETAL BIOMECHANICS

Skeletal anatomy and mechanics. Muscle anatomy and mechanics. Theory and application of electromyography. Motion and force measuring equipment and techniques. Inverse dynamics modeling of the human body. Current topics in musculoskeletal biomechanics research. Pre: 2304, (2074 or ME 2004). (3H,3C)

#### 4224: BIODYNAMICS AND CONTROL

Study of human movement dynamics and neuromuscular control of multi-degree-of-freedom systems. Computational simulation of forward-dynamics and state-space linear control of human movement to investigate functional performance and neuromuscular pathology. Pre: 3124, 4204. (3H,3C)

#### 4234: MECHANICS OF BIOLOGICAL MATERIALS AND STRUCTURES

Anatomy and physiology of connective tissue. Techniques for determining the mechanical response of biological soft and hard tissues. Includes static, viscoelastic, creep, fatigue, and fracture. Simplified models of biological structures. Creation of geometric models from medical imaging and computational modeling. Specific topics may include bone, cartilage, ligaments, tendon, teeth, and skin. Pre: 3054, (2074 or ME 2004). (3H,3C)

#### 4245,4246: MECH ANIMAL LOCOMOTION

Mechanical and biological principles of terrestrial animal locomotion, including walking, running, climbing, burrowing, and crawling. Terrestrial locomotion-based bio-inspired design. Pre: 3054 for 4245; 3015 for 4246. (3H,3C)

#### 4304: HEMODYNAMICS

Study of the human cardiovascular system and blood flow. Anatomy and physiology of the human heart, vascular system, and its organization. Blood physiology and rheology. Non-Newtonian blood flow models. Steady and pulsatile blood flow in rigid and elastic arteries. Pressure waves in elastic arteries. Three-dimensional blood flow in the aortic arch and flow around heart valves. Pre: 3016 or ME 3404. (3H,3C)

#### 4404: FUNDAMENTALS OF PROFESSIONAL ENGINEERING

A refresher of basic principles and problem solving techniques involving twelve subject areas most common to all engineering curricula. The topics include those tested by the National Council of Engineering Examiners on the EIT (Engineer in Training) examination, the first requirement, in all fifty states, toward P.E. (Professional Engineer) licensing. Duplicates material of other engineering courses and impracticable for nonengineers, hence not usable for credit toward any degree. Pre: Junior and senior standing in Engineering or in Building Construction or Graduate students in Engineering. Pass/Fail only. (2H,2C)

#### 4444 (AOE 4054) (CEE 4444): STABILITY OF STRUCTURES

Introduction to the methods of static structural stability analysis and their applications. Buckling of columns and frames. Energy method and approximate solutions. Elastic and inelastic behavior. Torsional and lateral buckling. Use of stability as a structural design criterion. Pre: AOE 3024 or CEE 3404. (3H,3C)

#### 4524: INTRODUCTION TO WAVE MOTION

Introduction to fundamentals of wave propagation. Topics include wave speed and dispersion relations, group velocity, wavepackets, waveguides, wave reflections, effects of nonuniformity and nonlinearity. General phenomena will be illustrated through use of specific physical applications and well-known model equations. Examples will be drawn from all areas of the physical sciences including solid and fluid dynamics, acoustics, geophysics, and electromagnetic field theory. Pre: MATH 4564. (3H,3C)

#### 4574 (MSE 4574): BIOMATERIALS

Lectures and problems dealing with materials used to mimic/ replace body functions. Topics include basic material types and possible functions, tissue response mechanisms, and considerations for long term usage. Integrated design issues of multicomponent materials design in prosthetic devices for hard and soft tissues are discussed. Must meet prerequisite or have graduate standing in the College of Veterinary Medicine. Pre: MSE 3054 or ESM 3054. (3H,3C)

#### 4614: INTRODUCTION TO RELIABILITY-BASED ENGINEERING DESIGN

Basic concepts of reliability, useful probability distributions, probabilistic design, safety factors and safety index, system reliability, failure rate, service life calculations. Pre: 2204, 3064. (2H,2C)

#### 4714: SCIENTIFIC VISUAL DATA ANALYSIS AND MULTIMEDIA

Classical and advanced methods of visual data analysis within scientific applications context; emphasis on examples of scientific investigation with visual tools, and new visual methods with computer graphics; visual data analysis of numerical experimental and analytical results including: gradients, function-extraction, chaos, nth-order tensor glyph representations, molecular synthesis. Pre: (MATH 1015, MATH 1016) or (MATH 1205 or MATH 1205H), (MATH 1206 or MATH 1206H). (3H,3C)

#### 4734 (AOE 4024): AN INTRODUCTION TO THE FINITE ELEMENT METHOD

The finite element method is introduced as a numerical method of solving the ordinary and partial differential equations arising in fluid flow, heat transfer, and solid and structural mechanics. The classes of problems considered include those described by the second-order and fourth-order ordinary differential equations and second-order partial differential equations. Both theory and applications of the method to problems in various fields of engineering and applied sciences will be studied. Pre: (2074 or AOE 2074), (MATH 2224 or MATH 2224H). (3H,3C)

#### 4904: PROJECT AND REPORT

## **College of Engineering**

### **Undergraduate Non Degree Courses**

The following courses are applicable to study in several departments and do not carry departmental designations. Several of the undergraduate courses listed below were developed specifically for students in both engineering and non-engineering majors with the objective of broadening the base of knowledge in cross-disciplinary areas with some background within a technology driven focus. Others were created as part of the academic, professional and personal support services provided for engineering students. Most students will use these courses to satisfy free electives in their programs. Engineering students also may find these courses of value in broadening their perspectives regarding their fields of study and may wish to use them as free electives in their programs.

### **Undergraduate Course Descriptions (ENGR)**

#### **1014: ENGINEERING RESEARCH SEMINAR**

Discussion of current research topics in the College of Engineering by Virginia Tech Faculty. Credit earned for this course may not be used to satisfy degree requirements. Pass/Fail only. (1H,1C)

#### **1034: FIRST YEAR HYPATIA SEMINAR**

Success strategies that are designed for first-year female engineering students who are residents of the Hypatia learning community are presented. Students are provided information on study skills; resources and academic support for Virginia Tech students; gender issues in engineering; service learning; leadership; technology; and the College of Engineering's departments/majors. Credit not applicable to meeting degree requirements. (2H,2C)

#### **1054: FIRST YEAR GALILEO SEMINAR**

Success strategies that are designed for first-year male engineering students who are residents of the Galileo learning community are presented. Students are provided information on study skills; resources and academic support for Virginia Tech students; gender issues in engineering; service learning; leadership; technology; and the College of Engineering's department/majors. Credit not applicable to meeting degree requirements. (2H,2C)

#### **1814: ENERGY, RESOURCE DEVELOPMENT AND THE ENVIRONMENT**

Population trends. Renewable and non-renewable energy. Coal mining methods, reclamation of mined lands. Petroleum and natural gas. Nuclear waste. Land management, aquifer depletion. Development of mineral reserves, surface and underground mining, environmental impacts. Minerals in world economics. Geopolitical concerns. Global environmental effects of industrial enterprises. Sustainable development. Effects of social structures. Regulatory processes and national/international legislation. (3H,3C) I,II.

#### **2004A: ENGR INTERNATIONAL ACTIVITY**

Engineering International Education course reflects academic effort in study abroad settings as defined by the college. No degree applicable credit awarded. Enrollment in this course does not apply toward the definition of full time status. 0 Credits. (0C)

#### **2004E: ENGR EXPERIENTIAL LEARNING**

Engineering Experiential course reflects college defined experiential learning experiences for undergraduates. No degree applicable credit is awarded. Enrollment in this course does not apply toward the definition of full time status. (0C)

#### **2004R: ENGR UG EXPLORATORY ACTIVITY**

Engineering Undergraduate Exploratory Activity course is an undergraduate research experience as defined by the college. No degree applicable credit is awarded. Enrollment in this course will not apply toward the definition of full time status. 0 Credits. (0C)

#### **2004S: ENGINEERING SERVICE LEARNING**

Engineering Service Learning course reflects academic effort in service learning settings as defined by the college. No degree applicable credit is awarded. Enrollment in this course will not apply toward the definition of full time status. 0 Credits. (0C)

#### **2044: SECOND YEAR HYPATIA SEMINAR**

Success strategies designed for second year women engineering students who are participants of Hypatia, the women in engineering residential community; topics include women in the engineering workplace, leadership, and goals associated with academic and professional success. Credit not applicable to meeting degree requirements. (1H,1C)

#### **2054: GLOBAL ENGINEERING PRACTICE**

Global teaming, leadership in engineering, achievement of cultural competency for engineers, cultural, social, and economic aspects of practicing engineering abroad, international awareness, immersive international experience, historical aspects of technology, art and design. For rising sophomore students in the college of engineering. Pre-requisite may be waived with permission of instructor. Pre: ENGE 1024. (3H,3C)

#### **2064: GALILEO SEMINAR FOR SOPHOMORES**

This course is designed to assist sophomore students who are participants of Galileo, an engineering learning community in their efforts to become/ remain successful students at Virginia Tech. The course will include focus on issues regarding the workplace, leadership, and goals associated with academic and professional success. Credit not applicable to meeting degree requirements. Pre: 1054. (1H,1C)

2984: SPECIAL STUDY  
Variable credit course.

3004: MENTORING SEMINAR  
Course will prepare engineering students to mentor first year engineering students: focus on leadership and team building skills, study skills development, technology skills engineering departments/majors, college policies and procedures. Credit not applicable to meeting degree requirements. Pass/Fail only. (1H,1C)

3124: INTRODUCTION TO GREEN ENGINEERING  
Introduction to green engineering and global environmental issues. Impacts of human and engineering activities on the environment, and techniques that can be utilized to minimize adverse environmental impacts with emphasis on ISO 14000, and environmentally conscious design and manufacturing. Pre: (CHEM 1035 or CHEM 1074), (ENGE 1104 or ENGE 1114), PHYS 2306. (3H,3C)

3984: SPECIAL STUDY  
Variable credit course.

4134: ENV LIFE CYCLE ASSESSMENT  
Quantification of the environmental impacts for products, processes, and systems across all engineering disciplines. A detailed look at life cycle phases and formal and informal Life Cycle Assessment (LCA) methodologies including ISO standards, stream-lined LCA, green building ratings systems, carbon footprints, and other environmental ratings systems. Pre: 3124. (3H,3C)

4974: INDEPENDENT STUDY  
Variable credit course.

4984: SPECIAL STUDY  
Variable credit course.

## Overview

The Grado Department of Industrial and Systems Engineering advances the discipline and imparts knowledge to students, peers and practitioners. In an environment that fosters leadership, achievement, and diversity, we:

1. Prepare undergraduate and graduate students for life-long success and leadership in the profession, in industry, and in higher education;
2. Conduct and disseminate research that promotes the economic prosperity and well-being of Virginia and the nation; and
3. Provide valuable services to industry, society, and the ISE profession.

Industrial and systems engineering is one of the most diverse fields in engineering. ISE is concerned with the design, improvement, and installation of integrated work systems of people, materials, equipment and technology, processes, information, and capital. The industrial engineer is concerned with creating value and improving performance of integrated systems, whether that involves improving quality and productivity, reducing costs and non-value adding activities, improving customer satisfaction, or improving worker safety.

The applications for industrial engineering capabilities include industry, government, and service organizations. Graduates of the ISE program at Virginia Tech work in manufacturing facilities, distribution warehouses, hospitals, airlines, railroads, banks, amusement parks, the military, federal government, and management consulting firms, among others. The boundaries of where IEs make contributions are limitless.

The mission of the ISE Undergraduate Program is to prepare industrial and systems engineering students to create value for organizations, the profession, and society. We achieve this mission by recruiting, retaining, and educating high quality and diverse students and by creating a rigorous and collegial environment enabling students to learn industrial engineering methods and tools, built upon a foundation of mathematical, physical, and engineering sciences, and to apply them in any global organizational setting. Students are able to achieve academic and

professional success through opportunities to participate in various educational experiences, to develop capabilities as future leaders, and to embark on a lifelong journey of professional development and learning.

## Program Educational Objectives and Program Outcomes

The ISE faculty, with input from our external Advisory Board, employers, and students, have defined the following Program Educational Objectives (PEOs) and Program Outcomes for our Undergraduate Program. PEOs are statements that describe the expected accomplishments of ISE graduates within 3-5 years after graduation. Program Outcomes are statements that describe what students are expected to know and be able to do at the time of graduation.

**Program Educational Objectives:** Within 3-5 years of graduation, ISE alumni will have:

1. Created value by applying the appropriate industrial engineering tools to design/redesign integrated systems/processes, solve problems, and improve results.
2. Provided formal and informal leadership to their respective organization.
3. Stayed current by pursuing professional development through graduate study, professional certification, and continuing education.
4. Communicated effectively using written, oral, and visual media adapted to different audiences and stakeholders.
5. Worked effectively in cross-functional team environments comprised of members with varying organizational backgrounds, positions, and geographic locations.
6. Served the profession, community, and society.

**Program Outcomes:** At the time of graduation, ISE students will have the:

1. Ability to apply computational and industrial engineering tools and techniques encompassing manufacturing systems, operations research, human factors and ergonomics, and management systems.
2. Ability to apply knowledge of mathematics, statistics, and physical and social sciences to IE problems.
3. Ability to identify, formulate, and solve structured and unstructured IE problems.
4. Ability to model, analyze, and evaluate work systems and processes, using appropriate experimental design, measurement tools/ techniques, and data.
5. Ability to generate and evaluate alternatives to design an integrated work system or process through a systems perspective.
6. Ability to evaluate the impact of IE solutions in the broader context of the organization and society, with an appreciation of different cultures and perspectives.
7. Knowledge of the role of industrial engineers in contemporary issues.
8. Ability to communicate effectively to a variety of audiences and using written, oral, and visual media.
9. Understanding of professionalism, good citizenship, and ethical behavior.
10. Ability to work collaboratively in multi-disciplinary teams.
11. Understanding of the need for continued professional development and ability to engage in life-long learning.

The Industrial and Systems Engineering program at Virginia Tech is accredited by the Engineering Accreditation Commission of ABET, Inc., 111 Market Place, Suite 1050, Baltimore, MD 21202-4012 - telephone (410) 347-7700.

## Curriculum

The ISE curriculum explicitly encompasses coursework useful in addressing not only the technical elements of work systems, but also the organizational, economic, and human elements. Our aim is to provide graduates with the knowledge and capabilities to enable them to successfully pursue careers in industrial engineering or, if qualified, to continue on to graduate study.

ISE emphasizes instruction in fundamental engineering principles based on the physical sciences, engineering sciences, mathematics, and statistics. These principles are applied in practical design experiences throughout the undergraduate curriculum.

Course work in the physical and chemical sciences and mathematics provides a solid background for basic engineering science courses, which in turn support more focused courses in industrial engineering, covering topics in operations research, manufacturing systems engineering, human factors engineering and ergonomics, and management systems engineering. In all these areas, analysis and design activities are supported by modern computing and software tools taught in the curriculum.

Students gain valuable hands-on, laboratory experience in manufacturing processes, work methods, computer simulation, and human factors engineering. State-of-the-art laboratory facilities associated with the undergraduate curriculum include the ISE Computer Laboratory, which contains computers and printers to support the needs and requirements of ISE students that are not available through access to personal computers or in other laboratories; the Senior Design Center, with computer support and other resource material for student design projects; the Harris Manufacturing Processes Laboratories, which contain robotics and automation equipment, machining equipment, conventional and numerically controlled machine tools, and welding and foundry facilities; the Human Factors Work Measurement and Methods Engineering Laboratory, which is equipped and used for in-class exercises and experiments in work measurement, motion economy and time study, psychophysics, human audition and vision, and work station design.

The capstone course in the ISE Undergraduate Program is a two-semester class, ISE 4005-6 Project Management & System Design (also referred to as "Senior Design"), where students work in project teams with an external company sponsor to solve a real-world problem. This

experience provides ISE students with actual project experience that develops technical and professional skills, such as teamwork, communication, project management, and life-long learning skills, in addition to developing capabilities in applying IE tool and techniques. Student project teams present their project findings at our annual Senior Design Symposium attended by company sponsors and the ISE Advisory Board.

The course work totals 136 hours and includes 21 credit hours of electives and 13 credit hours of Curriculum for Liberal Education Area electives, providing students with the opportunity to explore other areas of engineering, as well as cultural, societal and creative experiences, which makes for a well-rounded, diverse, and globally-aware engineer.

The ISE program also provides students with the opportunity to pursue minors, such as a Business Minor, Green Engineering Minor, or Math Minor. More specific information about minors available to ISE students can be found in the ISE Undergraduate Student Handbook, posted on the ISE web site. Students and employers alike are seeing the benefits of these minors for adding value to the ISE major.

Many ISE students seek to participate in Undergraduate Research to satisfy elective requirements in the curriculum. The opportunity to work more closely, in some cases on a one-on-one basis, with our outstanding faculty can provide more in-depth development of ISE capabilities and a more enriching educational experience. Each year, about 15% of ISE students participate in Undergraduate Research, with almost one-third of students having participated in an Undergraduate Research experience by the time they graduate.

The department participates in the Cooperative Education Program, in which qualified students may alternate semesters of study with semesters of professional co-op employment or internships. Students are encouraged to pursue these experiences before they graduate to make them more competitive in the work force. Students are also encouraged to participate in career fairs and job interviews on and off campus.

The ISE department also provides students with many significant scholarship opportunities at the undergraduate and graduate levels to encourage and acknowledge high academic performance and achievements.

Graduate programs leading to the M.S. and Ph.D. are offered (see Graduate Catalog). The graduate programs include concentrations in manufacturing systems engineering, human factors engineering and ergonomics, operations research, management systems engineering, and general IE. The ISE Department also coordinates on- and off-campus master's degree programs in systems engineering (M.S.) and engineering administration (M.E.A.).

## Program Requirements

The required classes for the ISE undergraduate degree are shown below for each year. These requirements are based on the ISE 2013 Checksheet for students graduating in 2013.

<b>First Year</b>	
<i>First Semester</i>	
ENGL 1105: English I	3
CHEM 1035: General Chemistry for Engineers	3
CHEM 1045: General Chemistry Lab for Engineers	1
MATH 1114: Linear Algebra	2
MATH 1205: Calculus I	3
ENGE 1024: Engineering Exploration	2
Elective	3
<b>Credits</b>	<b>17</b>
<i>Second Semester</i>	
ENGL 1106: English II	3
PHYS 2305: Foundations of Phys I w/lab	4
MATH 1206: Calculus II	3
MATH 1224 Vector Geometry	2
ENGE 1104: Exploration Digital Future or ENGE 1114: Exploration Engineering Design	2
Elective(s)	3
<b>Credits</b>	<b>17</b>
<b>Second Year</b>	
<i>First Semester</i>	
PHYS 2306: Foundations of Phys II w/Lab	4
MATH 2224: Multivariable Calculus	3
ISE 2014: Engineering Economy	2

ENGE 2314: Eng. Problem Solving w/ C++	2
ENGE 2344: Computer-Aided Drafting	1
ESM 2104: Statics	3
<b>Credits</b>	<b>15</b>
<i>Second Semester</i>	
MATH 2214: Differential Equations	3
STAT 4105: Theoretical Statistics	3
ISE 2204: Manufacturing Processes	2
ISE 2214: Manufacturing Processes Lab	1
ISE 2404: Deterministic Operations Research	3
ESM 2304: Dynamics	3
MSE 2034: Materials Engineering	3
<b>Credits</b>	<b>18</b>
<b>Third Year</b>	
<i>First Semester</i>	
STAT 4706: Statistics for Engineers	3
ISE 3014: Work Measurement and Methods Engr	3
ISE 3414: Probabilistic Operations Research	3
ISE 3614: Intro to Human Factors Engineering	3
ECE 3054: Electrical Theory	3
Elective	1
<b>Credits</b>	<b>16</b>
<i>Second Semester</i>	
ISE 3214: Facility Planning and Material Handling	3
ISE 3424: Discrete-Event Computer Simulation	3
ISE 3624: Industrial Ergonomics	3
ISE 3024: Data Mgt for Industrial Engineers	3
Electives	6
<b>Credits</b>	<b>18</b>
<b>Fourth Year</b>	
<i>First Semester</i>	
ISE 4005: Project Management and Sys. Design	3
ISE 4204: Prod. Planning and Inventory Control	3
ISE 4404: Statistical Quality Control	3
Electives	9
<b>Credits</b>	<b>18</b>
<i>Second Semester</i>	
ISE 4006: Project Management and Sys. Design	2
ISE 4304: Global Issues in Indus. Mgt.	3
Electives	12
<b>Credits</b>	<b>17</b>

Notes:

- These program requirements are based on the ISE 2013 Checksheet;
- A grade of C- or better must be obtained in core ISE, STAT, and MATH courses that are prerequisites for more advanced ISE courses (see Catalog descriptions for specific prerequisite requirements for each course);
- Electives must be taken to satisfy the 13 credit hours of Curriculum for Liberal Education Area requirements, 6 credit hours of Free Electives, 9 credit hours of Technical Electives, and 6 credit hours of ISE Technical Electives – students should refer to the ISE Undergraduate Student Handbook and ISE 2013 Checksheet for specific requirements in each Elective area;
- For more information about the ISE curriculum and requirements, contact the ISE Academic Advisor at 540/231-6388 or the ISE department at 540/231-6656.

## Undergraduate Course Descriptions (ISE)

### 2014: ENGINEERING ECONOMY

Concepts and techniques of analysis for evaluating the worth of products, systems, structures, and services in relation to their cost. Economic and cost concepts, calculating economic equivalence, comparison of alternatives, replacement economy, economic optimization in design and operations, and after-tax analysis. Pre: ENGE 1024. (3H,2C)

### 2204: MANUFACTURING PROCESSES

Survey of manufacturing processes, including casting, forming, machining, joining, and nontraditional processes such as laser and electrical discharge machining. Emphasis on process capabilities and limitations and design for manufacturability. Also includes topics in product design, material selection, process planning, and manufacturing automation. Pre: ENGE 1104 or ENGE 1114. (2H,2C) I,II.

### 2214: MANUFACTURING PROCESSES LABORATORY

Laboratory exercises and experimentation in manufacturing processes. Emphasis on metrology, casting and molding, forming, machining, welding and computer-aided manufacturing. Pre: ENGE 1104 or ENGE 1114. (3L,1C) I,II.

### 2404: DETERMINISTIC OPERATIONS RESEARCH

Deterministic operations research modeling concepts; linear programming modeling, assumptions and algorithms, duality and sensitivity analysis with economic interpretation; transportation and assignment problems; convexity issues, optimality conditions for continuous unconstrained and constrained nonlinear optimization problems, numerical optimization methods; and discrete optimization concepts. Co: MATH 2224. (3H,3C) II,III.

### 2984: SPECIAL STUDY

Variable credit course.

### 2994: UNDERGRADUATE RESEARCH

Variable credit course.

### 3004: INDUSTRIAL COST CONTROL

Fundamentals of general and cost accounting practices applied to manufacturing and service organizations. Cost accounting, standard cost determination, cost and budgetary control systems. A grade of C- or better required in prerequisite ISE 2014. Pre: 2014 or ME 2024. (4H,3C) II.

### 3014: WORK MEASUREMENT AND METHODS ENGINEERING

Survey of methods for assessing and improving performance of individuals and groups in organizations. Techniques include various basic industrial engineering tools, work analysis, data acquisition and application, performance evaluation and appraisal, and work measurement procedures. A grade of C- or better required in prerequisites ISE 2204 and 2214 and STAT 4105. Pre: (2204 or 2214), STAT 4105. (2H,3L,3C) I,III.

### 3024: DATA MANAGEMENT FOR INDUSTRIAL ENGINEERS

Investigation of data modeling, storage, acquisition, and utilization in Industrial Engineering via manual and computerized methods. Development of effective spreadsheet applications using Excel. Design and implementation of relational databases via E-R modeling, relational schema, normalization, SQL, and MS Access. Web-based database applications using HTML, JavaScript, and ASP. Interface design and the system development life cycle applied to data management applications. All topics covered within the context of typical Industrial Engineering problems. A grade of C- or better is required in ISE 2214. Pre: 2214, ENGE 2314. Co: 3214. (3H,3C)

### 3214: FACILITY PLANNING AND MATERIAL HANDLING

Theory and concepts involved in model formulation for design and analysis of facility plans. Includes facility layout, facility location and material handling system design. Application of quantitative tools and techniques for flow analysis, layout planning, and automated material handling system design. A grade of C- or better required in ISE prerequisites 2014, 2404, and 3414. Pre: 2014, 2404, 3414, ENGE 2344. Co: 3424. (3H,3C) II,IV.

### 3414: PROBABILISTIC OPERATIONS RESEARCH

This course introduces probability models used to investigate the behavior of industrial systems. The major topics include conditioning, elementary counting processes and Markov chains. Emphasis is on the use of these tools to model queues, inventories, process behavior and equipment reliability. A grade of C- or better required in STAT 4105, MATH 2214 and MATH 2224. Pre: ENGE 2314, MATH 2214, MATH 2224, STAT 4105. (3H,3C) I,III.

### 3424: DISCRETE-EVENT COMPUTER SIMULATION

Introduction to the analysis of systems through discrete simulation. Topics include an introduction to systems analysis and modeling, random variable generation, model development, and testing and problem analysis through simulation. A grade of C- or better required in ISE prerequisite 3414. Pre: 3414. Co: STAT 4706. (2H,3L,3C) II,IV.

### 3614: INTRODUCTION TO HUMAN FACTORS ENGINEERING

Survey of human factors engineering emphasizing the systems approach to workplace and machine design. Discussion of basic human factors research and design methods, visual processes and design methods, selection of statistical techniques for application to human factors data, visual and auditory processes, display and control design and effects of environmental stressors on humans. A grade of C- or better required in STAT 4105. Pre: STAT 4105. (2H,3L,3C) I,IV.

### 3624: INDUSTRIAL ERGONOMICS

Introduction to ergonomics with an emphasis on people at work. Discussion of ergonomic methods for measurement, assessment, and evaluation, with major topics including manual materials handling, cumulative trauma disorders, environmental stresses, safety, and legal issues. A grade of C- or better required in ISE prerequisite 3014. I,II. Pre: 3014, ESM 2104. (3H,3C)

### 4004: THEORY OF ORGANIZATION

A theory of cooperative behavior in formal organizations, including the structure and elements of formal organizations. The executive process and the

nature of executive responsibility also are examined. I, II. (3H,3C)

#### 4005-4006: PROJECT MANAGEMENT & SYSTEM DESIGN

The capstone design sequence for ISE majors. Survey of methods, tools and techniques used to plan, communicate, manage and control projects. Students work in teams to develop a proposal for and implement an industrial engineering design project for actual manufacturing or service industry clients. A grade of C- or better required in ISE prerequisites 3214, 3424, 3024 and 3614. Pre: 3024, 3214, 3424, 3614 for 4005; 4005 for 4006. Co: 4204, 3624 for 4005. 4005: (3H,3C) 4006: (2H,2C)

#### 4015,4016: MANAGEMENT SYSTEMS THEORY, APPLICATIONS, AND DESIGN

Systems approach to management, domains of responsibility, structured and synergistic management tools, management system model, contextual frameworks, information portrayal, automation objectives model, evaluation, shared information processing, information modeling. A management process for definition, measurement, evaluation and control, the organization as an information processor, corporate culture, scoping agreements, schemas and management elements, structured design. I (3H,3C)

#### 4204: PRODUCTION PLANNING AND INVENTORY CONTROL

Theory and concepts involved in model formulation for analysis and control of production processes. Systems for planning and controlling production and inventory including material requirements planning (MRP), just-in-time (JIT), and synchronous production systems. A grade of C- or better is required in prerequisite ISE 2404 and STAT 4706. I. Pre: 2404, STAT 4706. (3H,3C)

#### 4214: LEAN MANUFACTURING

Lean Manufacturing principles, theory, methods, and techniques in modern manufacturing enterprises. Lean manufacturing philosophy and basic concepts, master production scheduling and production smoothing, assembly line sequencing, setup time reduction, U-shaped line balancing/operation, machine arrangement, kanban, automation, and quality control. Investigation and discussion of lean manufacturing case studies. Grade of C- or better required in ISE 4204 Pre: 4204. (3H,3C)

#### 4234: MODELING AND SIMULATION LANGUAGES

Modeling of industrial situations and introduction to the use of simulation languages. Several simulation languages commonly used for industrial engineering applications such as GPSS, SLAM, and SIMAN will be covered. A grade of C- or better required in prerequisite ISE 3424. Pre: 3424. (3H,3C)

#### 4244: FUNDAMENTALS OF COMPUTER INTEGRATED MANUFACTURING

Concepts and techniques for modeling, designing, and implementing Computer Integrated Manufacturing (CIM) systems. Emphasis on relational databases and communications networks and their use in modern manufacturing enterprises. Fundamentals and role of Computer Aided Design (CAD), Computer Aided Manufacturing (CAM), and Computer Aided Process Planning (CAPP) in CIM systems. A grade of C- or better required in ISE prerequisites 2204, 2214 and 4204. Pre: (2204 or 2214), (4204). (3H,3C)

#### 4264: INDUSTRIAL AUTOMATION

A survey of the various technologies employed in industrial automation. This includes an emphasis on industrial applications of robotics, machine vision, and programmable controllers, as well as an investigation into problems in the area of CAD/CAM integration. Examination of the components commonly employed in automation systems, their aggregation and related production process design. Laboratory work is required. A grade of C- or better required in prerequisites ISE 2204 or 2214. Pre: 2204 or 2214. (2H,3L,3C)

#### 4304: GLOBAL ISSUES IN INDUSTRIAL MANAGEMENT

Industrial management topics of current interest explored from a global perspective. Current domestic and international challenges resulting from a global marketplace and the proliferation of information and technology. Industrial management and organizational performance, total quality management, business process re-engineering, leadership, organizational change, role of communication and information, and ethics. Examination and comparison across international boundaries. Pre: STAT 4705. (3H,3C) II.

#### 4404: STATISTICAL QUALITY CONTROL

Application of statistical methods and probability models to the monitoring and control of product quality. Techniques for acceptance sampling by variables and attributes are presented. Shewhart control charts for both classes of quality characteristics are examined in depth. The motivation for each method, its theoretical development, and its application are presented. The focus is upon developing an ability to design effective quality control procedures. A grade of C- or better required in ISE 3414, STAT 4105, and STAT 4706. Pre: 3414, STAT 4105, STAT 4706. (3H,3C) I.

#### 4414: INDUSTRIAL QUALITY CONTROL

Implementation of statistical quality control techniques in an industrial setting. Development and analysis of cost models for use in the design of optimal quality control plans. Also included are new techniques, advanced quality control models, and an examination of the role of industrial statistics in the overall product quality assurance function. A grade of C- or better required in prerequisite ISE 4404. Pre: 4404. (3H,3C)

#### 4424: LOGISTICS ENGINEERING

Introduction to the key issues in the integrated support of a product or process. Synthesis of topics from earlier studies to provide a cohesive approach to their applications. Logistics engineering provides a survey of product support issues and methods of resolving them within the context of the overall production activity. A grade of C- or better required in prerequisite ISE 3414. Pre: 3414. (3H,3C)

#### 4624: WORK PHYSIOLOGY

Anthropometry, skeletal system, biomechanics, sensorimotor control, muscles, respiration, circulation, metabolism, climate. Ergonomic design of task, equipment, and environment. A grade of C- or better required in prerequisite ISE 3614. Pre: 3614. (3H,3C)

#### 4644: OCCUPATIONAL SAFETY AND HAZARD CONTROL

Survey of occupational safety. Topics include: history of occupational safety; hazard sources related to humans, environment, and machines; engineering management of hazards. A grade of C- or better required in prerequisite ISE 3614. Pre: 3614. (3H,3C) II.

#### 4654: PRINCIPLES OF INDUSTRIAL HYGIENE

Introduction to the foundations of the field of Industrial Hygiene, that discipline devoted to the anticipation, recognition, measurement, evaluation, and control of occupational health hazards. Includes biological (e.g. microbial agents, allergens), chemical (e.g. solvents, carcinogens, dusts), and physical (e.g. radiation , temperature) hazards. Overview of control of health hazards, such as personal protective equipment, administrative controls, and engineering controls. Will involve lecture and participatory "case-study" activities. Will provide ample opportunity for hands-on use of monitoring equipment, protective equipment and controls testing devices. II. (3H,3C)

4974: INDEPENDENT STUDY

Variable credit course.

4984: SPECIAL STUDY

Variable credit course.

4994: UNDERGRADUATE RESEARCH

## Overview

Materials engineers and scientists study the structure and properties of engineering materials on scales ranging from the atomic through the microscopic to the macroscopic. These materials include ceramics, metals, polymers, composites, biomaterials, nanomaterials, semiconductors, and electronic, magnetic, and photonic materials. Materials engineers develop new materials, improve traditional materials, and manufacture materials economically through synthesis, processing, and fabrication. They seek to understand physical and chemical phenomena in material structures and to measure and characterize materials properties of all kinds including mechanical, electrical, optical, magnetic, thermal, and chemical. They predict and evaluate the performance of materials as structural or functional elements in engineering systems and structures. Because the performance of virtually all engineered products depends upon the properties of the various materials which make up the components of the system, engineering and technological advances are commonly limited by the properties and cost of the manufactured materials which are currently available. As a consequence, the discipline of materials science and engineering is central and critical to the success of several identified strategic national quality-of-life initiatives, including biotechnology, nanotechnology, energy, information technology, vehicular transportation systems, national defense and security, and environmental stewardship.

Significant opportunities exist for graduates in the aerospace, automobile, transportation, medical, microelectronics, telecommunications, chemical, petroleum, energy storage, power generation, and energy conservation industries, as well as within the basic industries producing materials—for example, the copper, aluminum, steel, ceramics, glass, and polymer industries. Opportunities also exist in government-operated engineering centers and research laboratories. Graduates work in entry level engineering, manufacturing, materials selection and design, quality assurance and control, research and development, technical consulting, management, and sales and marketing. Graduates have an excellent background for post-graduate studies in science, engineering, medicine, law, and business.

Students of MSE can optionally participate in the cooperative education program in which qualified students may alternate semesters of study with semesters of professional employment. Study-abroad opportunities are also possible. Honors-eligible students may participate in a formalized program of study leading to one of several university honors degrees (see <http://www.univhonors.vt.edu>).

## Educational Objectives and Learning Outcomes

### Educational Objectives:

The goal of the Bachelor of Science in Materials Science and Engineering degree program is to provide the educational foundation that enables alumni to pursue their personal career objectives. Historically, the majority of our alumni become valued members of industrial and/or research teams within the field of materials science or related technical disciplines while a smaller percentage pursue graduate education or other personal career objectives such as patent law and medicine.

The specific objectives for the B.S. degree program in MSE are to produce alumni who are

- effective learners able to apply new technical tools, techniques, and knowledge specific to their field of employment or graduate studies,
- able to apply critical thinking skills to engineering and research problems, and
- effective communicators with written, oral, and visual media.

### Learning Outcomes

Upon graduation, students completing the B.S. in MSE degree program will be able to:

- apply advanced science (such as chemistry and physics) and engineering principles to materials systems
- understand and apply the scientific and engineering principles underlying the four major elements of the field: structure, properties, processing, and performance
- apply and integrate knowledge from each of the above four elements of the field to solve materials selection and design problems, and;
- utilize experimental, statistical, and computational methods consistent with the program educational objectives.

In addition, students will also have demonstrated the following general outcomes:

- an ability to apply knowledge of mathematics, science, and engineering
- an ability to design and conduct experiments, as well as to analyze and interpret data
- an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- an ability to function on multidisciplinary teams
- an ability to identify, formulate, and solve engineering problems
- an understanding of professional and ethical responsibility
- an ability to communicate effectively
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
- a recognition of the need for, and an ability to engage in life-long learning
- a knowledge of contemporary issues
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

## Curriculum

Students typically enter the MSE Department following completion of their first year studies within the College of Engineering, as administered by the Department of Engineering Education (EngE); a description of required first year coursework can be found within the EngE section of this catalog.

In addition to foundation courses in MSE, students tailor an individualized program of elective study. Fifteen credits of technical electives will be selected to emphasize certain subdisciplines of MSE (e.g., metals, ceramics, polymers, electronic materials, composites, biomaterials, nanomaterials, etc.) or to prepare for a career in certain application areas (e.g., manufacturing, aerospace, automotive, information technology, microelectronics, etc.). Course work totals 131 credit hours as detailed on the BS in MSE checklist which can be found at [http://www.registrar.vt.edu/registration/degree\\_checksheet.php](http://www.registrar.vt.edu/registration/degree_checksheet.php). Students expecting to graduate beyond the displayed checklist years should use the last projected term. Check back every year for revisions.

The undergraduate curriculum contains a nationally-recognized integrated program of instruction in engineering communication including writing, public speaking, proposal preparation, reporting, research skills, critical and creative thinking, and graphical presentation. More information regarding this unique program can be found at <http://www.vtecc.eng.vt.edu/ecp/>.

The MSE students have pursued various minors including Microelectronics, Green Engineering, Chemistry, Mathematics or a foreign language.

The B.S. in MSE degree program at Virginia Tech is accredited by the Engineering Accreditation Commission of ABET, Inc., 111 Market Place, Suite 1050, Baltimore, MD 21202-4012 - telephone (410) 347-7700.

## Undergraduate Courses (MSE)

1004: MATERIALS IN TODAY'S WORLD

An introductory course designed for the student with a basic high school science background who wishes to understand and learn about the exciting materials developments which are affecting us all in today's world. The course will introduce the structures and properties of metals, ceramics, polymers (plastics), composites, and materials for electronic and optical applications. Students will also gain an appreciation for the processing and design limitations of materials used in everyday applications. (1H,1C)

#### 2014: MATERIALS ENGINEERING TRANSITION

Supplemental coverage of introductory topics not included in courses delivered to non-MSE majors. Pre: 2034 or 3094 or AOE 3094. (1H,1C)

#### 2034: ELEMENTS OF MATERIALS ENGINEERING

This course is designed to introduce the non-MSE student to the structures and properties of metals, ceramics, polymers, and composites. In addition, students will gain an understanding of the processing and design limitations of these materials, as well as being introduced to new classes of materials being developed to meet the ever expanding range of material requirements. Non-MSE majors only. Pre: CHEM 1035. Co: PHYS 2305. (3H,3C)

#### 2044: FUNDAMENTALS OF MATERIALS ENGINEERING

This course is designed to introduce the MSE major to the structures and properties of metals, ceramics, polymers, composites, and electronic materials. Students will also gain an understanding of the processing and design limitations of materials. Topics fundamental to the further study of materials, such as crystal structures, phase diagrams, and materials design and processing will be emphasized as foundations for future MSE courses. Pre: CHEM 1035. Co: PHYS 2305. (4H,4C)

#### 2054: FUNDAMENTALS OF MATERIALS SCIENCE

Introduces MSE majors to fundamental underlying concepts governing phase equilibrium, microstructure, electronic properties of materials, and transport phenomena as a foundation to understanding materials behavior and processing. Pre: 2044, CHEM 1035, PHYS 2305. (3H,3C)

#### 2114: MATH PROGRAMMING MSE I

Basic computational and graphical functions in mathematics oriented programming languages using data and engineering examples from the field of Materials Science. Students apply general methods to problems of their choice through mini- projects. Pre: 2034 or 2044 or 3094 or AOE 3094. (1H,1C)

#### 2884: MATERIALS ENGINEERING PROFESSIONAL DEVELOPMENT I

Library engineering research skills, technical computer graphics, basic engineering workplace communication skills, basic engineering teamwork skills, introduction to engineering ethics, resumes and letters of introduction, gender issues in the workplace, professional poster presentations, and engineering public speaking. Pre: MSE major, sophomore status. (3L,1C)

#### 2974: INDEPENDENT STUDY

Variable credit course.

#### 2974H: INDEPENDENT STUDY

Variable credit course.

#### 2984: SPECIAL STUDY

Variable credit course.

#### 2994: UNDERGRADUATE RESEARCH

Variable credit course.

#### 2994H: UNDERGRADUATE RESEARCH

Variable credit course.

#### 3004H: MATERIALS IN TOMORROW'S WORLD

The role of materials and materials development in society and technological progress. The role of research in the solutions to pressing global, materials-related scientific and engineering challenges. New and envisioned materials forms developed in response to present and future applications needs, and the ethical, environmental and energy implications thereof. Pre-requisite: Honors students enrolled in the sciences or engineering. Pre: CHEM 1035, PHYS 2305. (3H,3C)

#### 3044: TRANSPORT PHENOMENA IN MSE

Mass transport (continuum and atomistic diffusion), heat transport and fluid flow (momentum transport). Analytical and computer based methods for solving transport problems. Pre: 2034 or 2044, MATH 2214. (3H,3C)

#### 3054 (ESM 3054): MECHANICAL BEHAVIOR OF MATERIALS

Mechanical properties and behavior of engineering materials subjected to static, dynamic, creep, and fatigue loads under environments and stress states typical of service conditions; biaxial theories of failure; behavior of cracked bodies; microstructure-property relationships and design methodologies for homogeneous and composite materials. Pre: ESM 2204. (2H,2C)

#### 3064 (ESM 3064): MECHANICAL BEHAVIOR OF MATERIALS LABORATORY

Laboratory experiments on mechanical properties and behavior of homogenous and composite engineering materials subjected to static, dynamic, creep, and fatigue loads; behavior of cracked bodies; microstructure-property relationships, and determination of materials properties for use in engineering design. Co: 3054. (3L,1C)

#### 3094 (AOE 3094): MATERIALS & MANUFACTURING FOR AERO & OCEAN ENGINEERS

This course introduces the student of Aerospace and/or Ocean Engineering to the fundamental properties of materials typically required for structural design. The performance characteristics of metals, ceramics, polymers, and composites are presented and contrasted. Foundation

principles underlying materials manufacturing are also presented with the goal of providing an understanding of how processing affects material properties and performance. Must have a C- or better in pre-requisite CHEM 1035. Pre: CHEM 1035. Co: ESM 2204, PHYS 2305. (3H,3C)

#### 3104 (GEOS 3504): MINERALOGY

Principles of modern mineralogy, crystal chemistry, and crystallography, with emphasis on mineral atomic structure and physical property relationships, mineralogy in the context of geology, geochemistry, environmental science and geophysics, phase equilibria, mineral associations, and mineral identification, and industrial applications of minerals. There are three required field trips during the semester. Pre: MATH 1016, CHEM 1036. (2H,3L,3C)

#### 3114: MATHEMATICS PROGRAMMING IN MATERIALS SCIENCE II

Advanced computational and graphical methods in mathematics oriented programming languages. Students develop programs that solve and/or provide visualizations of solutions to materials science and engineering problems. Pre: 2114. (1H,1C)

#### 3124 (GEOS 3524): OPTICAL MINERALOGY

Principles of color and the behavior of light in crystalline materials; use of the petrographic microscope in the identification of minerals using optical techniques. Pre: GEOS 1004. Co: GEOS 3504. (3L,1C)

#### 3134: CRYSTALLOGRAPHY AND CRYSTAL STRUCTURES

Provides a comprehensive foundation in crystallography including lattices, point groups, space groups, reciprocal lattices, properties of x-rays, and electron density maps, all leading to a formal description of structures and an interpretation of the published crystallographic data. Pre: (2034 or 2044). Co: 3204. (3H,3C)

#### 3204: FUNDAMENTALS OF ELECTRONIC MATERIALS

Introduction to the electrical, magnetic, and optical properties of solid-state materials. Development of atomic scale models for physical phenomena that are observable at the macroscopic scale. Connection is made between basic materials properties and the operational characteristics of selected solid-state devices. Pre: PHYS 2306, MSE 2044, (ECE 3054 or ECE 2204). (3H,3C)

#### 3304: PHYSICAL METALLURGY

Deformation of crystalline solids and its relationship to crystal structure and crystal defects: crystal structures of metals, dislocations and plastic deformation, vacancies, recovery, recrystallization, grain growth, deformation twinning and martensite. Pre: 2034 or 2044. (3H,3C)

#### 3314: MATERIALS LABORATORY I

Sample preparation for materials characterization techniques including various types of microscopy, spectroscopy, diffraction, and hardness testing. Instruction in the use of heat treating equipment and polishing and chemical etching procedures. Pre: 2044. Co: 3304. (3L,1C)

#### 3324: ELEMENTARY METAL CASTING LABORATORY

Introduction to metal casting processes; gating, risering, molding and purging. Hands-on experience. Emphasis on safe foundry practices. Oral and written reports are required. Pre: 2034 or 2044, ISE 1014. Co: 3354. (3L,1C)

#### 3334: TEST METHODS FOR FOUNDRY LABORATORIES

The properties of foundry sand, molten metal and castings are measured using standard laboratory test procedures. Safe foundry practices are emphasized. Oral and written reports are required. Pre: 2034 or 2044, ISE 2214. Co: 3354. (1H,2L,2C)

#### 3344: GOVERNMENT REGULATION OF THE METAL CASTING INDUSTRY

Introduction to the role of federal, state, and local regulation of the metal casting industry. Implementation of OSHA, EPA, and DEQ regulations in an inherently dangerous industry. Emphasis is placed on the implementation of these regulations in a University environment as implemented in the VT-FIRE facility. Visits to VT-FIRE and other local production foundries are included. Oral and written reports required. Pre: (2034 or 2044), ISE 2214. (3H,3C)

#### 3354: FOUNDRY SAFETY

Provides comprehensive training in foundry safety procedures and policies. (P/F only, may register multiple times). Pass/Fail only. Pre: (2034 or 2044), ISE 2214. Co: 3324, 4324, 3334. (2H,1C)

#### 3424: CRYSTAL CHEMISTRY AND PHASE EQUILIBRIA

Basic crystal chemical principles in multicomponent inorganic materials. Interpretation of one, two, and three component phase diagrams. Interrelationships between crystal chemistry, phase equilibria, microstructure, and properties of materials. Pre: 2034 or 2044. (3H,3C)

#### 3884: MATERIALS ENGINEERING PROFESSIONAL DEVELOPMENT II

Public speaking and workplace communications for materials engineers, business writing for the engineering workplace, teamwork skills, engineering ethics, collaborative writing, engineering management skills, and gender issues in the workplace. Extends the basic treatment of these topics given in MSE 2884. Pre: MSE major, junior status. Pre: 2884. (3L,1C)

#### 3954: STUDY ABROAD

Variable credit course.

#### 4034: THERMODYNAMICS OF MATERIALS SYSTEMS

Topics in thermodynamics on the solution of materials selection and design related problems such as materials stability at high temperatures and in corrosive chemical environments. Thermodynamic principles important in controlling equilibrium in single component systems and multicomponent solid solutions and in establishing the thermodynamic driving force in kinetic processes which are important in materials processing unit operations. Estimation of thermodynamic properties and equilibrium calculations in multicomponent and multiphase systems. Pre: CHEM 1036, (MSE 2044 or MSE 2034 or MSE 3094 or AOE 3094). (3H,3C)

#### 4044: POWDER PROCESSING

Processing methods associated with powder synthesis, characterization, colloidal processing, and forming of powder compacts. Theory of solid state and liquid phase sintering. Pre: 3044. (3H,3C)

#### 4055-4056: MATERIALS SELECTION AND DESIGN I AND II

4055: Selection of materials for engineering systems, based on constitutive analyses of functional requirements and material properties.

4056: The role and implications of processing on material selection. Pre: 3364, 3044, (3204, 3444) or (3204, 3504) or (3444, 3504) for 4055; 3044 for 4056. (3H,3C)

#### 4064 (ME 4704): TRIBOLOGY

Basic principles of tribology--the study of friction, wear, and lubrication--including the importance of materials, surfaces, design, operating conditions, environment, and lubrication on friction, wear, and surface damage in any system. Application of tribological theories, concepts, techniques, and approaches to design, research, development, evaluation, and problem-solving. Pre: 2034 or 2044, 3034 or ME 3404. (3H,3C)

#### 4075-4076: SENIOR DESIGN LABORATORY

A capstone design course centered around an open-ended, faculty-advised senior project involving the design of a process, material, or a technique for solving a technological problem. Senior standing in MSE required. Pre: 4644 for 4075; 4075 for 4076. Co: 4085, 4055 for 4075; 4086 for 4076. 4075: (3L,1C) 4076: (6L,2C)

#### 4085-4086: SENIOR DESIGN RECITATION

Capstone course run in parallel with faculty-advised Senior Project Laboratory (MSE 4075-4076). Topics in engineering professional practice, project planning, and reporting. Preparation of proposals, interim reports, final project reports, and discussion of the environmental, social, and economic impacts of engineering. Instruction in design theory, ethics, continuous learning, and global issues. Senior Standing in MSE. Pre: 3884 for 4085; 4085 for 4086. Co: 4095, 4075 for 4085; 4096, 4076 for 4086. 4085: (2H,2C) 4086: (1H,1C)

#### 4095-4096: HONORS SENIOR DESIGN LABORATORY

A capstone design course centered around an open-ended, faculty-advised senior honors project involving the design of a process, material, or a technique for solving a technological problem. Outcomes and work effort are consistent with that expected of honors students. Individual preparation and presentation of an original senior honors thesis. Enrollment in University Honors, and senior standing in MSE required. Pre: 4644 for 4095; 4095, 3324 for 4096. Co: 4085, 4055 for 4095; 4086 for 4096. (6L,2C)

#### 4124: EXTRACTIVE PROCESSES

Principles of various industrial processes of upgrading minerals from ores, extracting metals from ores and mineral concentrates by pyrometallurgical, hydrometallurgical, and electrochemical methods; an refining metals and producing alloys by various methods. Pre: 4034 or MINE 3554. (3H,3C)

#### 4154 (ESM 4154): NONDESTRUCTIVE EVALUATION OF MATERIALS

Concepts and methods of nondestructive evaluation of materials. Discussion of techniques and mathematical bases for methods involving mechanical, optical, thermal, and electromagnetic phenomena; design for inspectability; technique selection criteria; information processing and handling; materials response measurement and modeling; signal analysis Pre: 3054, PHYS 2176 or PHYS 2306. (3H,3C)

#### 4164 (MINE 4164): PRINCIPLES OF MATERIALS CORROSION

Introduction to the scientific principles of materials corrosion and corrosion protection. Topics include: thermodynamics of materials corrosion, including potential- PH (Pourbaix) diagrams, kinetics of corrosion reactions and mixed potential theory, types of corrosion (uniform, galvanic, crevice, pitting, fatigue, stress corrosion cracking, intergranular, and hydrogen embrittlement), material/environmental factors that promote or prevent the various types of corrosion, and methods and techniques of corrosion testing. Co: MSE 4034 or ME 3114 or ME 3124 or ME 3134. I (3H,3C)

#### 4234 (ECE 4234): SEMICONDUCTOR PROCESSING

Manufacturing practices used in silicon integrated circuit fabrication and the underlying scientific basis for these process technologies. Physical models are developed to explain basic fabrication steps, such as substrate growth, thermal oxidation, dopant diffusion, ion implantation, thin film deposition, etching, and lithography. The overall CMOS integrated circuit process flow is described within the context of these physical models. Pre: ECE 2204 or ECE 3054. (3H,3C) I.

#### 4235-4236 (ECE 4235-4236): PRINCIPLES OF ELECTRONIC PACKAGING

This two-course sequence covers principles and analyses for design and manufacture of electronic packages. 4235: design issues such as electrical, electromagnetic, thermal, mechanical, and thermomechanical, are covered at the lower levels of packaging hierarchy. Materials and process selection guidelines are discussed for the manufacturing and reliability of chip carriers, multichip and hybrid modules. 4236: system-level package design issues for meeting application requirements and modeling tools for analyzing electronic packages are introduced. Materials and process selection guidelines are discussed for the manufacturing and reliability of packaged electronic products. Pre: ECE 2204. Co: ECE 3054 for 4235. (3H,3C)

#### 4254: SCIENCE AND TECHNOLOGY OF THIN FILMS

Study of the fundamental properties and microstructure of materials in thin film (thin coating) form, their interaction with the substrate, and their processing techniques. Areas of application to exemplify the interdisciplinary nature of the field, including the electronics, biomedical, military, aerospace, and construction industries. Pre: 4206 or 4215 or 4124. Co: 3255. (3H,3C)

#### 4304: METALS AND ALLOYS

This course covers the production, properties and uses of commercially important metals and alloys. The influence of structure, chemistry,

and processing upon the properties of metals is emphasized. Alloy selection is discussed. Mechanical, electrical, thermal and chemical characteristics of ferrous and nonferrous alloys are studied. Pre: 2034 or 2044 or AOE 3094. (3H,3C)

#### 4305-4306: PHYSICAL METALLURGY AND MODELING OF METAL CASTING

Casting processes; solidification and its influence on the structure and chemistry of castings; role of fluid flow and heat transfer in mold design; origin and control of casting defects. Pre: 3304 for 4305; 2304 or 2044 for 4306. (3H,3C)

#### 4324: ADVANCED METAL CASTING LABORATORY

Advanced metal casting processes; no-bake sand molds; investment casting; rapid prototyping; melting and casting of aluminum, bronze, iron and steel. Casting finishing including shot and sand blasting. Hands-on experience. Emphasis on safe foundry practices. Oral and written reports are required. Pre: 3324. Co: 3354. (1H,1L,2C)

#### 4354: STRENGTH AND FRACTURE

Microstructural origins of strengthening, deformation, and fracture in engineering materials. Pre: 3304. Co: 3064, 3054. (1H,1C)

#### 4384: NUCLEAR MATERIALS

An introduction to materials for nuclear applications with emphasis on fission reactors. Fundamental radiation effects on materials; material properties relevant to structural, moderator, reflector, blanket, coolant, control shielding and safety systems; processes such as nuclear fuel cycles, fuel enrichment and reprocessing; and related structural systems. Pre: (3044 or ME 3304), (MSE 3054 or ESM 3054 or ME 3614). (3H,3C)

#### 4414: PHYSICAL CERAMICS

Study of the relationships between the physical properties (thermal, optical, mechanical, electrical and magnetic) and the structure and composition of ceramics at the atomic and microscopic level as affected by processing and service environment. Emphasis will be placed on application and design using structural ceramics. Co: 4424. (3H,3C)

#### 4424: MATERIALS LABORATORY II

Processing and characterization of materials; exploration of the influence of processing parameters on physical and mechanical properties. Emphasis on material synthesis. Pre: (2044 or 2034 or 3094 or AOE 3094). Co: 3304. (3L,1C)

#### 4434: GLASS AND REFRACTORIES

Manufacturing processes and applications of glassy and refractory materials. Current theories of the structure of glassy and refractory materials are studied and related to their properties and behavior at high temperature and other demanding applications. Environmental effects of these energy intensive processes are taken into consideration. Pre: 3044, 3134. Co: 4414. (3H,3C)

#### 4534 (CHEM 4634): POLYMER AND SURFACE CHEMISTRY

Physical chemical fundamentals of polymers and surfaces including adhesives and sealants. Pre: CHEM 3615 or CHEM 4615. (3H,3C) II.

#### 4544 (CHEM 4074): LABORATORY IN POLYMER SCIENCE

Experimental techniques used in the synthesis of various linear polymers, copolymers, and crosslinked networks. Determination of polymer molecular weights and molecular weight distribution. Methods used in the thermal, mechanical, and morphological characterization of polymeric systems. Pre: CHEM 3616, CHEM 4534. (1H,3L,2C)

#### 4554: POLYMER ENGINEERING

This course is designed to introduce the student to polymers from the MSE perspective. The basics of polymer syntheses and polymerization will be outlined. The relationship between processing, structure, and properties will be presented with respect to the performance and design requirements of typical polymer applications. Pre: 4034. (3H,3C) II.

#### 4564: POLYMER ENGINEERING LABORATORY

Laboratory experiments exploring the processing-structure-property relationships in polymers and polymer based composites will be performed. Experiments will be conducted in synthesis, melt rheology, crystal structure and mechanical properties of polymers. Effects of reinforcement on the properties of engineering polymers will also be investigated. Co: 4554. (3L,1C)

#### 4574 (ESM 4574): BIOMATERIALS

Lectures and problems dealing with materials used to mimic/ replace body functions. Topics include basic material types and possible functions, tissue response mechanisms, and considerations for long term usage. Integrated design issues of multicomponent materials design in prosthetic devices for hard and soft tissues are discussed. Must meet prerequisite or have graduate standing in the College of Veterinary Medicine. Pre: 3054 or ESM 3054. (3H,3C)

#### 4584: BIOMIMETIC MATERIALS

Introduction to structure property relationships in biological materials such as wood, bone, shells, spider silk, connective tissue, blood vessels and jellyfish. Proteins and polysaccharides, biosynthesis and assembly, biomineralization, hierarchical organization. Introduction to tissue engineering and regenerative medicine. Life cycle, environmental aspects of biofabrication. Pre: CHEM 1036 or BIOL 1106 or MSE 2034 or MSE 3094 or AOE 3094. (3H,3C)

#### 4604: COMPOSITE MATERIALS

The application of the fundamental concepts of mechanics, elasticity, and plasticity to multiphase and composite materials. Constitutive equations for the mechanical and physical properties of metal, ceramic, and polymeric matrix composites. The role of processing and microstructure on properties. Pre: (2034 or 2044 or 3094), (ESM 2204). (3H,3C)

#### 4614: NANOMATERIALS

Synthesis of 0-dimensional nanoparticles, 1-dimensional nanotubes, nanowires, and nanorods; 2-dimensional nanoribbons and nanofilms,

and specialized nano-features on substrates. Characterization of nanomaterials. Processing into higher order dimensions. Chemical, physical, mechanical, and electrical properties of nanomaterials. Application of nanomaterials. Pre: 4034. (3H,3C)

#### 4624: DESIGN OF MATERIALS

The design of materials through the application of microstructural based structure/property relationships. Emphasis on the use of phenomenological and theoretical structure-property-processing relationships as a means to guide material design. The influence of scale (nano, micro, meso, macro) on property development and material behavior. Co: 4055 or permission of Instructor. Co: 4055. (3H,3C)

#### 4634: DESIGN WITH MATERIALS

The role and implications of material properties, processing, and structure in engineering and/or functional design. The role of material selection in the conceptualization, specification, and implementation phases of the design process. Case studies in state-of-the-art, material-limiting component design. Multidisciplinary enrollment encouraged. Co: senior capstone experience or permission of the instructor. (3H,3C)

#### 4644: MATERIALS OPTIMIZATION THROUGH DESIGNED EXPERIMENTS

Methods of analysis of variation in materials systems, manufacturing or R&D through the use of statistical methods including experimental design techniques. Instructional examples related to Materials Science and Engineering. Pre: (3314 or 4424). (3H,3C)

#### 4900: COMMUNICATIONS PORTFOLIO IN MATERIALS SCIENCE AND ENGINEERING

Each student develops a portfolio of writing and speaking in various styles from work performed in seven required courses, and reflects on the development of his or her communication ability over the course of the program. The completed portfolio and reflections documents the student's success in meeting the Area 1: Writing and Discourse in written, oral, and visual communication. Students register for this course in the semester during which their portfolio will be completed. Pass/Fail only. Pre: 3314, 3884, 4424. Co: 4086. (1H,1C)

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4974H: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

#### 4994H: UNDERGRADUATE RESEARCH

Variable credit course.

## Nature of the Profession

Mechanical engineering is the broadest of the engineering professions. Because of the breadth of the ME discipline, mechanical engineers work in a wide variety of technical areas and are employed in a range of job functions. Specialty areas within the mechanical engineering discipline include, among many others, acoustics, biomechanics, CAD, controls, energy conversion and energy management, HVAC, materials, mechanical design, mechatronics, nuclear engineering, robotics and automation, and turbomachinery. The actual job functions which mechanical engineers perform vary widely as well. ME's work in design, research and development, manufacturing, service and maintenance, as well as technical sales, in almost every industry. Many are in management and administration. Many mechanical engineering graduates go on to more advanced degrees, or continue their education in other fields, such as law or business.

## Employment Opportunities

Because of the diversity and breadth of the mechanical engineering profession, ME graduates find employment in a wide variety of industries, laboratories, and consulting firms. This results in a relatively stable job market that is not dependent upon a single particular industry. The textile, petroleum, chemical, electronic, automotive, aerospace, power generation, HVAC, and manufacturing industries hire large numbers of mechanical engineering graduates and the starting salaries for ME's are very competitive with the other engineering disciplines.

Because of the wide diversity of specialties and job functions any two mechanical engineers might have significantly different day-to-day activities and responsibilities. Some may be concerned with very large engineering systems while others are working with small and even microscale devices and components; some work might call for highly analytical or mathematical approaches while other work might be more amenable to experimental or empirical approaches. Mechanical engineers may be involved in the operation of processing plants, or the design of engines, prosthetic devices, steam and gas turbines or compressors and pumps, alternative fuel devices, and many other devices and systems. At Virginia Tech there is a close association between the ME departments research and design project activities with industry. This enhances the opportunities for student interaction with industry representatives.

## Mechanical Engineering Program Educational Objectives

The ME program produces graduates who during their professional careers:

1. Utilize fundamental technical knowledge and skills in mathematics, science, and engineering to analyze and solve problems, and apply these abilities to generate new knowledge, ideas or products in academia, industry or government.
2. Demonstrate practical experience and organizational skills, and can interact and communicate effectively (written and/or oral) with others (e.g., supervisor, client and/or team) with an appreciation for intellectual diversity, involved in the project.
3. Demonstrate leadership and/or assumes roles of increasing responsibility that benefits themselves and their employers.
4. Recognize the importance of and engagement in life-long learning through: (a) self-study, (b) continuing education courses or workshops, and/or (c) formal graduate level education, and encourages co-workers to have this same motivation.
5. Understand professional and ethical responsibilities toward peers, employers, and society and follows these precepts in their daily lives.

## Program Outcomes

We expect our students to have the following skills, knowledge, and behaviors by the time of their graduation. We want our students to attain:

- an ability to apply knowledge of mathematics, science, and engineering
- an ability to design and conduct experiments, as well as to analyze and interpret data
- an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- an ability to function on multi-disciplinary teams
- an ability to identify, formulate, and solve engineering problems
- an understanding of professional and ethical responsibility
- an ability to communicate effectively
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
- a recognition of the need for, and an ability to engage in life-long learning
- a knowledge of contemporary issues
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

The Bachelor of Science in Mechanical Engineering (BSME) degree program at Virginia Tech is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

One important objective of the Department of Mechanical Engineering is to ensure that every mechanical engineering graduate has the knowledge, ability, and understanding required to meet the basic ABET guidelines. The structure and sequence of courses is designed to provide these requirements for every graduate. The department is committed to providing students with an exceptional experience in both the theory and practice of mechanical engineering. In the senior capstone sequence, students are required to apply classroom knowledge to complex engineering problems requiring teamwork, problem formulation, economic analysis, effective communication, and product realization. These projects are carefully selected and updated to ensure relevancy to contemporary technical issues and needs. The department encourages the involvement of underclass students and students outside the department and college in these projects. The department also encourages hands-on student involvement by providing dedicated machine and welding shops that exclusively serve the undergraduate program. The required sophomore-level Manufacturing Processes Laboratory course and certification by a professional machinist are required prior to use of either of these shops. Opportunity for professional development is provided by participation in student professional organizations, such as the American Society of Mechanical Engineers, ASME, and the American Nuclear Society, ANS.

## The Curriculum

A total of 130 semester credits are required for graduation.

The curriculum provides a strong foundation in the basic physical and chemical sciences and in mathematics. These are followed by a sequence of courses that provide a broad background in design methodology, computer programming, electronics, solid and fluid mechanics, manufacturing processes, system modeling, machine design, thermodynamics, heat and mass transfer, statistics and materials. Courses in English and in the humanities and social sciences are included to broaden the individual. This background is strengthened and unified through a sequence of engineering design and laboratory courses. Instructional laboratories in the junior and senior years provide opportunities for students to learn measurement and instrumentation techniques. Students apply these skills to the acquisition and analysis of data from various engineering systems.

In all professional endeavors the mechanical engineer must consider ecological effects as well as the economic and social needs of people. The mechanical engineer must consider the conservation of natural resources and the environmental impact in the design of systems. These considerations are included in a number of ME courses and technical elective classes. Students wishing to further strengthen this area may wish to consider the Green Engineering Option at <http://www.eng.vt.edu/green/index.php>.

The unifying activity in all aspects of mechanical engineering is the design function. A special emphasis has been placed on the use of computer-aided design methods and applied design project experience as a required part of the curriculum. Elective courses in the junior and senior years provide students with the opportunity to pursue specialized interests related to career plans or preparation for graduate study.

The department participates in the Cooperative Education Program in which qualified students may alternate semesters of study with semesters of professional employment. Approximately twenty-five percent of all mechanical engineering students participate in this program.

To prepare its students to function as true global engineers, the department offers the students, in collaboration with its sister department at the Technische Universität Darmstadt, Germany, the opportunity to complete their senior year at the other university and thus earn a BSME degree simultaneously from both universities.

The Department of Mechanical Engineering actively seeks input on the nature and quality of our program from all interested individuals and organizations, including students, employers and supporting agencies. Our goal is to provide the best possible service to the students who entrust their education to us. Through our continuous improvement efforts, we pledge to continually improve the content of our curriculum, our educational methods and our facilities. Comments to the department head or any member of the faculty are welcomed. Note that because of this continuous improvement process entrance and degree requirements and course content are subject to periodic change. Please consult the department academic advisor for current information.

## Entrance Requirement

Mechanical Engineering is a restricted major. Students transferring into ME prior to January 2013 must have a 2.5 or better GPA and complete the required freshman year college of engineering courses to gain admission. Starting in January 2013 a new policy will be implemented which limits the number of students entering degree granting engineering departments. Students earning a 3.0 or higher overall GPA will be allowed to enter the engineering department of their choice once they have completed the required courses for that department. The remaining seats in each department will be awarded based upon the student's cumulative grade point average earned at Virginia Tech. Refer to the ME website for the latest information. The ME academic advisor may also be consulted for information on planned entrance requirement changes.

## Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the Curriculum for Liberal Education (see Academics chapter in this catalog), and toward the degree in mechanical engineering.

Satisfactory progress toward a B.S. in Mechanical Engineering includes the following minimum criteria:

1. after having completed 72 credit hours (including transfer, advanced placement, advanced standing, and credit by examination) complete a minimum of 12 credits that apply toward the BSME each year
2. maintain an in-major GPA (all ME and NSEG courses) of at least a 2.0
3. maintain an extended in-major GPA of at least 2.0 (in all ME, NSEG courses plus ESM 2104, 2204, and 2304).
4. complete ESM 2304, ME 2124, and Math 2214 within 60 attempted required course credits (not to include CLE courses or technical electives)
5. complete ME 3124, ME 3514 and ME 3614 within 72 attempted required course credits (not to include CLE courses or technical electives)
6. complete ME 4006, ME 4015 and ME 4124 within 90 attempted required course credits (not to include CLE courses or technical electives).

The department offers graduate programs leading to the M.S., M.Eng., and Ph.D. in mechanical engineering (see the [Graduate Catalog](#)).

	Semester	
First Year	I	II
ENGE 1024: Engineering Exploration	2	
ENGE 1114: Engineering Exploration of Design		2
ENGL 1105: Freshman English	3	
ENGL 1106: Freshman English		3
CHEM 1035: General Chemistry	3	
CHEM 1045: Chemistry Lab	1	
MATH 1205: Calculus	3	
MATH 1206: Calculus		3
MATH 1114: Elementary Linear Algebra	2	
MATH 1224: Vector Geometry		2
PHYS 2305: Foundations of Physics		4
Curriculum for Liberal Education Area 6/2	1	3
<b>Total Required Credits (32 Credit Hours)</b>	<b>15</b>	<b>17</b>
Second Year	I	II
ECE 2054: Applied Electrical Theory		3
ENGE 2314: Engineering Problem Solving with C++	2	
ESM 2104, 2204: Statics, Deformable Bodies	3	3
ESM 2304: Dynamics		3
ISE 2214: Manufacturing Processes	1	
MATH 2224, 2214: Multivar. Calculus, Diff. Eq.	3	3
ME 2024: Intro to ME Design	3	
ME 2124: Intro to Thermal Fluid Sciences		2
STAT 3704: Engineering Statistics		2
PHYS 2306: Foundations of Physics & Lab II	4	
<b>Total Required Credits (32 Credit Hours)</b>	<b>16</b>	<b>16</b>
Third Year	I	II
ECE 3254: Industrial Electronics	3	
ME 3514: System Dynamics	3	
ME 3124: Thermodynamics	3	
ME 3304: Heat Transfer		3
ME 3404: Fluid Mechanics	3	
ME 3504 or 4504: Vibrations or Controls		3
ME 3614: Mechanical Design	3	
ME 4005: ME Lab I		3
MSE 2034: Elements of Materials Science		3
Curriculum for Liberal Education Area 2/3	3	
Technical Elective		3
<b>Total Required Credits (33 Credit Hours)</b>	<b>18</b>	<b>15</b>
Fourth Year	I	II
ME 4015, 4016: Capstone Design Course (Writing Intensive)	3	3
ME 4006: ME Lab II (Writing Intensive)	3	
ME 4124 CAD of Fluid-Thermal Systems	3	
Technical Electives	3	3
Technical Electives	3	3
Curriculum for Liberal Education Area 2/3	3	3
Area 7: Critical Issues in a Global Context		3

<b>Total Required Credits (33 Credit Hours)</b>	<b>18</b>	<b>15</b>
<b>A total of 130 semester credits are required for graduation.</b>		

**Notes:**

- There are no hidden prerequisites.
- **Foreign Language Requirement:** Students who did not complete 2 units of a foreign language in high school must earn 6 credit hours of college level foreign language. These credits are in addition to those normally taken for graduation.

## VT-TUD Dual BSME Degree Program

Standard program for students that complete their first three years at Virginia Tech and their senior year at the Technische Universität Darmstadt, Germany:

<b>First and Second Year (Virginia Tech)</b>	<b>I</b>	<b>II</b>
First year: Same as for regular VT BSME degree program	15	17
Second year: Same as for regular VT BSME degree program	16	16
<b>Total Required Credits (64 Credit Hours)</b>	<b>31</b>	<b>33</b>

<b>Third Year and Summer (Virginia Tech)</b>	<b>I</b>	<b>II</b>	<b>III</b>	<b>IV</b>
ECE 3254: Industrial Electronics	3			
ME 3514: System Dynamics	3			
ME 3124: Thermodynamics	3			
ME 3304: Heat & Mass Transfer		3		
ME 3404: Fluid Mechanics				
ME 3614: Mechanical Design I	3			
ME 4005: Mechanical Engineering Laboratory I	3	3		
MSE 2034: Elements of Materials Engineering		3		
Curriculum for Liberal Education Area 2 & 7	3	3		
Curriculum for Liberal Education Area 3		(6)		
GER 1114: Accelerated Elementary German			6	
GER 2114: Accelerated Intermediate German				6
German language bridge-course taught in Germany				
<b>Total Required Credits (42 Credit Hours)</b>	<b>18</b>	<b>12</b>	<b>6</b>	<b>6</b>

<b>Fourth Year (Technische Universität Darmstadt)</b>	<b>Sep</b>	<b>WS</b>	<b>SS</b>
German as a Second Language; the intensive phase			
Strukturdynamik	X		
Systemtheorie und Regelungstechnik		3	
Tutorium Pneumatik I		3	
Aerodynamik I (3 cr) or Grundlagen der Flugantriebe (4 cr)		2	
Technical Electives		3-4	
Bachelor-Thesis		3-2	6
Numerische Mathematik			2
Numerische Berechnungsverfahren			2
Grundlagen der Turbomaschinen und Fluidsysteme			4
Curriculum for Liberal Education Area 3			3
<b>Total Required Credits (31 Credit Hours)</b>		<b>14</b>	<b>17</b>

The German language courses are only required for those students that do not possess sufficient German language skills: The lectures and exams at Technische Universität Darmstadt (TUD) are in German. The Bachelor Thesis may be written in English. The students must pass demonstrate sufficient German language skills at TUD in order to enroll in TUD engineering courses.

GER 1114 is equivalent to GER 1105-1106 and satisfies the VT foreign language requirement. GER 2114 is equivalent to GER 2105-2106 and counts in this context as technical elective (2credit hours) and free elective (3 credit hours). The German language bridge-course is an alternative to GER 3105-3106. Students must earn a "B" or better in GER 3106 or its equivalent to continue at TUD. Students that do not take GER 2105, 2106, 2114, 3105, or 3106, or at least 4 CP ECTS German language courses at TUD as a VT technical elective will need to complete an additional 2 credit hours of technical electives.

TUD requires at least 60 CP ECTS be completed at TUD. The VT BSME degree program requires at least 130 semester credits for graduation.

## TUD-VT Dual BSME Degree Program

Standard program for students that complete their first two years at Technische Universität Darmstadt, Germany and their senior year and summer at Virginia Tech:

First and Second Year (Technische Universität Darmstadt)	
General Chemistry Lab	Naturwissenschaften III
Arbeitstechniken	Maschinenelemente und Mechatronik I
Einführung in den Maschinenbau	Mathematik III für Maschinenbauer
Grundlagen der Datenverarbeitung	Technische Mechanik III (Dynamik)
Mathematik I für Maschinenbauer	Technische Thermodynamik I
Naturwissenschaften I	Werkstoff- und Bauteilfestigkeit
Technische Mechanik I (Statik)	Technische Strömungslehre
Technologie der Fertigungsverfahren	Maschinenelemente und Mechatronik II
Einführung in das rechnergestützte Konstruieren	Numerische Mathematik
Einführung in die Elektrotechnik	Physikalisches Grundpraktikum für Maschinenbauer
Naturwissenschaften II	Product Design Project
Mathematik II für Maschinenbauer	Technische Thermodynamik II
Technische Mechanik II (Elastostatik)	Messtechnik für Maschinenbauer
Werkstoffkunde und -prüfung	
Total Required Credits (81 Credit Hours)	

Third Year and Summer (Virginia Tech)	I	II	III	IV
AOE 4404 or 4024: Applied Numerical Methods or Intro FM		3		
ENGL 1105, 1106: Freshman English I & II	3	3		
ME 3304: Heat and Mass Transfer		3		
ME 3504: Dynamic Systems – Vibrations		3		
ME 4006: Mechanical Engineering Laboratory II	3	3		
ME 4015, 4016: Engineering Design and Project I & II	3	3		
ME 4124: Fluid Machinery – Heat Transfer Design	3			
ME 4504: Dynamic Systems – Controls	3			
Curriculum for Liberal Education Area 2			3	3
Curriculum for Liberal Education Area 3	3			3
Curriculum for Liberal Education Area 6		1	3	
Curriculum for Liberal Education Area 7		3		
Technical Electives				
Total Required Credits (49 Credit Hours)	18	19	6	6

The VT BSME degree program requires at least 130 semester credits for graduation.

### Other Education Abroad Programs

The Department of Mechanical Engineering has vigorously pursued other education abroad opportunities for its undergraduate students. Among these, students can spend their sophomore fall semester at Melbourne University in Australia with credits earned abroad counting towards the VT BSME degree. Other courses may be available for credit, with appropriate pre-approval. Interested students are encouraged to speak with their academic advisor.

### Undergraduate Courses (BMES)

#### 2104: INTRODUCTION TO BIOMEDICAL ENGINEERING

Methods of mathematical modeling and engineering analyses related to human physiology. Emphasis placed on fundamental concepts such as biomaterials, biomechanics, tissue engineering, biomedical imaging and nanomedicine. Broad spectrum of current biomedical engineering research areas. Pre: (ENGE 1104 or ENGE 1114), PHYS 2305. Co: MATH 2214. (3H,3C)

#### 2984: SPECIAL STUDY

Variable credit course.

#### 4064 (BMVS 4064): INTRO MED PHYSIOLOGY

An introductory to the principles of medical physiology. Designed primarily for (but not limited to), undergraduate students minoring in biomedical engineering, and other related engineering and physical sciences majors with little or no formal background in biological sciences. Basic principles and concepts of human physiology. Special emphasis on the interactions of human systems biology in their entirety rather than individual genes and pathways. Pre: Junior standing or permission of instructor. (3H,3C)

#### 4984: SPECIAL STUDY

Variable credit course.

## Undergraduate Courses (ME)

### 2004 (MATH 2004): ENGINEERING ANALYSIS USING NUMERICAL METHODS

Numerical methods applied to engineering analysis. Linear systems. Root finding. Numerical integration. Ordinary differential equations. Programming using a software package such as Matlab. Pre: (ENGE 1114 or ENGE 1434). Co: MATH 1206, MATH 1114. (2H,2C)

### 2024: INTRODUCTION TO ENGINEERING DESIGN AND ECONOMICS

Design process, mini-design projects, collaborative design, product dissection, economics of decision making, reverse engineering, intellectual property, oral, written, and graphic communications, engineering ethics. Pre: (ENGE 1434 or ENGE 1024). Co: ESM 2104, PHYS 2306. (3H,3C) I,II.

### 2124: INTRODUCTION TO THERMAL AND FLUID ENGINEERING

Basics of thermodynamics, fluid mechanics, and heat transfer. Fluid and thermal properties of materials. Ideal gas equation of state. First law of thermodynamics in closed systems. Transient heat transfer. First law of thermodynamics in open systems. Fluid mechanics balances, open systems. Emphasis on applications in all topic areas. Pre: (ESM 2104 or PHYS 2305). Co: MATH 2214. (2H,2C) I,II,IV.

### 2974: INDEPENDENT STUDY

Variable credit course.

### 2984: SPECIAL STUDY

Variable credit course.

### 2994: UNDERGRADUATE RESEARCH

Variable credit course.

### 3114: ENGINEERING THERMODYNAMICS

General treatment of the basic laws of thermodynamics with emphasis on engineering applications. This course is for curricula not requiring 3124. I Pre: MATH 2214. (3H,3C)

### 3124: THERMODYNAMICS

Classical thermodynamics and its applications. Thermodynamic properties of pure substances: property tables, property software, equations of state. First law of thermodynamics. Second law of thermodynamics. Gas mixtures. Combustion: atom and energy balances. Power and refrigeration cycles. Pre: 2124, (MATH 2214 or MATH 2214H). (3H,3C) I,II.

### 3134: FUNDAMENTALS OF THERMODYNAMICS

Fundamental concepts, first and second laws, gas and vapor processes with emphasis on chemical reactions, statistical interpretation of entropy, limited use of thermodynamic property tables. This course is for non-ME students. I Pre: MATH 2214 or MATH 2214H. (3H,3C)

### 3145-3146: FUNDAMENTALS OF NUCLEAR ENGINEERING

Application of fundamental principles of neutron physics and reactor theory. Introduction to nuclear cross-section data, neutron scattering, nuclear fission, and diffusion theory. Examination of current and next generation nuclear power plants. I Pre: MATH 2214 or MATH 2214H for 3145; 3145 for 3146. (3H,3C)

### 3304: HEAT AND MASS TRANSFER

Comprehensive basic course in heat and mass transfer for mechanical engineering students. Principles of conduction, convection, and radiation with applications to heat exchangers and other engineering systems. Pre: 2124, (MATH 2214 or MATH 2214H). (3H,3C) II, III.

### 3404: FLUID MECHANICS

Comprehensive first course in basic and applied fluid mechanics. Fluid properties, statics, kinematics, and dynamics. Euler's and Bernoulli's equations. Hydrodynamics. Dimensional analysis and similitude. Real fluids, laminar and turbulent flows. Boundary layer model and approximate analysis. Compressible flow and propulsion devices. Flow measurement. Introduction to turbomachinery with applications. Pre: 2124, (MATH 2214 or MATH 2214H). (3H,3C) I,II.

### 3504: DYNAMIC SYSTEMS - VIBRATIONS

Principles of dynamic system modeling with emphasis on second order mechanical systems. Harmonic and nonharmonic vibrations of single and multi-degree of freedom systems. Applications of computer simulation and analysis techniques in vibrations. Pre: (MATH 2214 or MATH 2214H), ME 3514. (3H,3C) II, IV.

### 3514: SYSTEM DYNAMICS

Mathematical descriptions of physical systems' behavior including mechanical, electrical, thermal, and fluid systems and their combinations; system descriptions using state variable and transfer functions; analysis of system responses: convolution integral, frequency response, numerical simulations, and Laplace transform methods; systems concepts: input-output, causality, and analogies; general process descriptions including first-order, second-order, and time delayed. Pre: ESM 2304, (MATH 2214 or MATH 2214H). (3H,3C) I, II, III.

### 3604: KINEMATICS AND DYNAMICS OF MACHINERY

Kinematic analysis and design of cams, gears, and linkages, velocity, acceleration and force analysis, kinematic synthesis, balancing, kinematic and force analysis by complex numbers, computer-aided analysis, and synthesis of linkages. Pre: ESM 2304. (3H,3C)

### 3614: MECHANICAL DESIGN I

Design of mechanical components subject to static and fatigue loads. Design using screws, fasteners, springs and bearings. Computer-aided design using transfer matrix and finite element methods. Pre: ESM 2204, (MATH 2214 or MATH 2214H). (3H,3C) I,II.

#### 4005-4006: MECHANICAL ENGINEERING LAB

Principles of measurement, measurement standards and accuracy, detectors and transducers, digital data acquisition principles, signal conditioning systems and readout devices statistical concepts in measurement, experimental investigation of engineering systems, technical report writing. Pre: ECE 3254, ME 3514, STAT 3704 for 4005; 4005 for 4006. (2H,3L,3C) 4005: II,IV; 4006:

#### 4015-4016: ENGINEERING DESIGN AND PROJECT

Team oriented, open-ended, multi-disciplinary design projects focused on industrially relevant problems. A specific, complex engineering design problem is normally taken from problem definition to product realization and testing. Emphasis is placed on documenting and reporting technical work, idea generation and selection, application of design and analysis tools developed in previous courses, project management, selling technical ideas and working in teams. I Pre: (4005, 2024, ECE 3254, ME 3614, ME 3304), (ME 3504 or ME 4504) for 4015; 4015 for 4016. (2H,1L,3C)

#### 4034: BIO-INSPIRED TECHNOLOGY

Introduction to engineering solutions inspired by biological systems. Overview over the approach of bio-inspired technology and the state of the art. Exploration of the relationship between engineered and natural biological systems. Explanation of concepts of biological systems, such as evolutionary optimization, sensing, actuation, control, system integration, assembly and materials in engineering terms. Practice of interdisciplinary analysis skills in technical report writing projects where man-made and biological systems are evaluated for parallels to engineering and their technological potential. Pre: (PHYS 2205, PHYS 2206) or (PHYS 2305, PHYS 2306). (3H,3C)

#### 4124: COMPUTER AIDED DESIGN OF FLUID-THERMAL SYSTEMS

Review of physical laws and engineering concepts introduced in thermodynamics, fluid mechanics, and heat transfer with applications. Emphasis on analysis, modeling, and design of engineering systems, components and physical phenomena with state-of-the-art computer software. I Pre: 3124, 3304, 3404. (2H,3L,3C)

#### 4134: AIR CONDITIONING

Analysis and design practice for heating, ventilation, and air-conditioning (HVAC) systems. Psychometrics, air quality, space heating and cooling loads, and moisture control in buildings. Configurations and designs for HVAC systems by conventional practice and computer-aided methods. Liquid- and air-based distribution systems. Selection of HVAC system components including compressors, evaporators, heat pumps, and controls for comfort cooling. Pre: 3304. (3H,3C)

#### 4144: REFRIGERATION AND CRYOGENIC ENGINEERING

Thermodynamics of refrigeration cycles and characteristics of refrigeration equipment. Analysis and design of systems for cold storage, freeze drying, and manufacturing processes. Engineering problems associated with reduction, handling, and storage of cryogenic fluids including liquefied natural gas. Low temperature properties of engineering materials. Pre: 3304. (3H,3C)

#### 4154: INDUSTRIAL ENERGY SYSTEMS

Survey of energy-intensive technologies used in typical industrial plants, with emphasis on cost-effective energy conservation. Burners, boilers, pumps, air compressors, electric motors, lights, refrigeration plants, HVAC systems, cogeneration systems, waste heat recovery equipment. Energy-efficient design and operation. Determination of energy efficiency based on field measurements. Economic analysis of energy conservation measures. Mitigation of environmental impacts. Pre: 3114 or 3124 or 3134 or CHE 2164 or BSE 3154. (3H,3C)

#### 4164: ENERGY SYSTEMS FOR BUILDINGS

Application of the fundamental principles of thermodynamics, heat transfer, and fluid flow to analyze energy use for building environmental control. Exploration of approaches for configuring basic thermal-fluid engineering components (e.g. pumps, piping, fans, heat exchangers, refrigeration cycles, etc.) to yield systems that provide heating, cooling, and ventilation. Introduction to techniques and software tools for estimating energy use by these systems and the associated economic and environmental impact. Examination of alternate technologies for meeting building energy needs including small scale combined heat and power systems and renewable energy systems. Pre: 2124, 3124. (3H,3C)

#### 4174 (AOE 4174): SPACECRAFT PROPULSION

Spacecraft propulsion systems and their applications in orbital, interplanetary, and interstellar flight. Rocket propulsion fundamentals; advanced mission analysis; physics and engineering of chemical rockets, electrical thrusters, and propellantless systems (tethers and sails); spacecraft integration issues. Pre: 4234 or AOE 4234. (3H,3C)

#### 4194 (ESM 4194): SUSTAINABLE ENERGY SOLUTIONS FOR A GLOBAL SOCIETY

Addresses energy metrics, global and US energy supply and demand, transitional energy sources (natural gas, petroleum, coal, nuclear), sustainable/renewable source (solar, geothermal, hydro, tidal, wind, biofuels), and methods for increasing efficiencies (energy storage, batteries, green building, conservation). Options for transportation, electricity, lighting and heating needs of industry, agriculture, community, and citizens. Production, transmission, storage, and disposal issues considered in the context of global political, economic, and environmental impacts. Senior Standing in major may be substituted for pre-requisite ENGL 3764. Pre: (CHEM 1035 or CHEM 1055), PHYS 2306, ENGL 3764. (3H,3C)

#### 4204: INTERNAL COMBUSTION ENGINES

Analysis and design of gasoline and diesel engines. Fundamental processes and their application in current technology. Thermodynamics: air standard and air-fuel cycles. Combustion: stoichiometry, fuels, chemical equilibrium, chemical kinetics, flame propagation, knock, pollutant formation and control. Flow processes: volumetric efficiency, intake and exhaust tuning, two-stroke scavenging, carburetion, fuel injection, super- and turbo-charging. Pre: 3124, 3404. (3H,3C)

#### 4214: POWER GENERATION

The design, control, and performance characteristics of electric power generating plants, with major emphasis upon the steam generating system, both fossil and nuclear. Pre: 3124, 3304. Co: 4414. (3H,3C)

#### 4224: AIRCRAFT ENGINES AND GAS TURBINES

Performance and characteristics of aircraft engines and industrial gas turbines, as determined by thermodynamic, fluid mechanic, heat transfer, and

solid mechanic behavior of components. Operational limitations and component matching. Stress and associated temperature limits and influence of blade cooling techniques on turbines. Pre: 4234 or 4124. (3H,3C)

#### 4234 (AOE 4234): AEROSPACE PROPULSION SYSTEMS

Design principles and performance analysis of atmospheric and space propulsion engines and systems. Application of thermodynamics, compressible fluid flow and combustion fundamentals to the design of gas turbine and rocket engines and components, including inlets, turbomachines, combustors, and nozzles. Matching of propulsion system to vehicle requirements. Must have a C- or better in pre-requisites ME 3404 and ME 3124 or AOE 3114 and AOE 3134. Pre: (3404, 3124) or (AOE 3114, ME 3134). (3H,3C)

#### 4244 (AOE 4244): MARINE ENGINEERING

Analysis of major ship propulsion devices (propellers, water jets). Integration with propulsion plant and machinery. Characteristics of marine steam turbines, nuclear power plants, marine diesels, and marine gas turbines. Shafting system, bearings, and vibration problems. Must have a C- or better in pre-requisites AOE 3204 and ME 3124 or ME 3134. Pre: AOE 3204, (AOE 3134 or AOE 3124). (3H,3C)

#### 4254: RAMJET AND ROCKET PROPULSION

Detailed study of analysis and design of ramjet and rocket propulsion systems. Vehicle performance requirements relating to choice of propulsion systems. Ramjet inlets, combustion chambers, and nozzles; analysis techniques for high-speed flow. Liquid and solid propellant rocket engine designs. Solid propellant burning rates, grain design. Special propulsion systems for high speed, trans-atmospheric, and space flight. Pre: 4234. (3H,3C)

#### 4304: HEAT TRANSFER ANALYSIS

Methods for solving multidimensional and transient conduction problems. Convective heat and mass transfer with applications to industrial process heating, heat exchanger design, boiling and condensation, cooling tower design, and aerodynamic heating. Radiation properties of materials and heat transfer applications to real surfaces and absorbing-transmitting media including gases and windows. Transfer from wetted surfaces and through porous media with applications to drying, evaporative cooling, and heat pipe theory. Pre: 3304. (3H,3C)

#### 4324: ENERGY SYSTEMS: THEORY AND APPLICATIONS

Theory and applications of thermodynamic and fluid mechanics principles as applied to energy systems. Fundamental concepts on exergy, mixtures, psychrometry and thermochemistry. Analyses and applications include vapor and gas power systems, refrigeration, air conditioning, combustion processes and one-dimensional compressible flow. Pre: 3124, 3404. (3H,3C)

#### 4404: FLUID MECHANICS II

Integral and differential equations of mass, momentum, and energy. Equations for turbulent flow. Applications in hydrodynamics, thermodynamics of compressible flow, channel and multiple path systems, boundary layers with exact and approximate solutions, shear and drag, fluid transients, laboratory techniques. Pre: 3404. (3H,3C)

#### 4424: THERMODYNAMICS OF FLUID FLOW

One-dimensional compressible flow of perfect gases under specialized conditions: isentropic flow (with area change), normal and oblique shocks, constant area flow with friction, constant area flow with heat transfer, Prandtl-Meyer flow, and generalized one-dimensional flow. Introduction to propulsion systems and other selected topics. Pre: (3124 or 3114), 3404. (3H,3C)

#### 4434 (BSE 4424): FLUID POWER SYSTEMS AND CONTROLS

Design and analysis of industrial and mobile hydraulic systems. Hydrostatic transmissions. Electrohydraulic servovalve characteristics and use in precise position and speed control application. Characteristics of pumps, motors, valves, and activators illustrated in laboratory exercises. Pre: ESM 3024 or ME 3404. (2H,3L,3C)

#### 4444: ROTATING MACHINERY

Techniques and analysis issues associated with the dynamics, operation, and maintenance of rotating machinery with a focus on turbomachinery issues. Vibration analysis, introductory rotor dynamics, rotor balancing techniques, oil and wear particle sampling, gearbox and bearing issues, industrial case studies, and environmental issues associated with power plant operation. Hands-on experience with small high speed rotors and state-of-the-art monitoring instrumentation in common use throughout the petrochemical and power generation industries. Monitoring of actual steam plant equipment. Pre: 3504. (3H,3C)

#### 4454 (EDCI 4454): ENGR. LEADERSHIP/MGMT

Introduction to management and mentoring skills associated with the application of the engineering design process. Course covers skills necessary for leading diverse teams of people through a technical design project. Managing teams of local high school students through an authentic technical design experience associated with design competitions. Course addresses the practical applications of science, math and engineering, while building and managing teams of people to meet technical project goals. Pre-requisite: ME 4015 or similar team-based design experience, or by permission of instructor. Pre: 4015. (2H,3L,3C)

#### 4504: DYNAMIC SYSTEMS - CONTROLS ENGINEERING I

Fundamentals of feedback control theory, classical analysis and design techniques for automatic controls, introduction to modern control theory. Pre: 3514, (MATH 2214 or MATH 2214H). (3H,3C) I,II.

#### 4514: CONTROLS ENGINEERING II

Applications of classical and modern control techniques in design studies. Introduction to nonlinear systems and nonlinear control strategies and to digital control techniques. Includes design problems and case studies with hands-on experience. Pre: 4504. (3H,3C)

#### 4524: INTRODUCTION TO ROBOTICS AND AUTOMATION

Automation, robot technology, kinematics, dynamics, trajectory planning, and control of two-dimensional and spatial robots; robot programming; design and simulation of robotic devices. II Pre: ECE 2574, STAT 4714. (3H,3C)

#### 4534: LAND VEHICLE DYNAMICS

Analytical methods for land vehicle dynamics. Mechanics of pneumatic tires on pavement and steel wheels on rails. Vehicle stability, handling, response to random guideway and roadway irregularities, ride quality computation methods and standards, suspension design. II Pre: 3514. (3H,3C)

#### 4544: AUTOMOTIVE ENGINEERING

Vehicle performance, drive train, suspension, steering, and brake systems. Steady state and transient conditions. Senior standing in Mechanical Engineering required. I (3H,3C)

#### 4554: ADVANCED TECHNOLOGY FOR MOTOR VEHICLES

Energy use and environmental issues for motor vehicles: Emissions standards, fleet requirements, dynamometer testing, fuel economy, and vehicle performance. Alternative fuel vehicles: Characteristics and infrastructure of fuels, batteries, electric vehicles, and hybrid electric vehicles. Vehicle design: Modeling and simulation of vehicle energy use and performance, component sizing. Fuel cells for transportation. Heavy-duty vehicles and busses. Low mass vehicles and future vehicle technology. I Pre: 3114 or 3124 or 3134. (3H,3C)

#### 4604: MECHANISMS

Advanced cam design using analytical and computer methods, design of nonstandard spur-gears cut with a hob and with a pinion-shaper cutter; introduction to computer methods in the design of spur gears; kinematic synthesis by graphical, analytical, and computer methods; balancing of rotating and reciprocating masses, balancing of linkages. Pre: 3604. (3H,3C)

#### 4614: MECHANICAL DESIGN II

Design of mechanical elements such as welded joints hydrodynamic bearings, spur gears, shafts, brakes. Alternative fatigue design methods, cumulative fatigue, mechanical design computer software. Pre: 3614. (3H,3C)

#### 4624: FINITE ELEMENT PRACTICE IN MECHANICAL DESIGN

Application of the finite element method to stress analysis problems in mechanical design. Modeling techniques, proper use of existing computer programs, interpreting of results, application to design modification. I Pre: 3614. (3H,3C)

#### 4634: INTRODUCTION TO COMPUTER-AIDED DESIGN AND MANUFACTURING

Participants will study the computer-aided design and manufacturing of mechanical systems. A mechanical system will be designed including preliminary design, analysis, detail design, numerical control programming, and documentation. Applications programs will be written and interfaced to the CAD/CAM database. All assignments will be carried out on a CAD/CAM system. II (2H,3L,3C)

#### 4644: INTRODUCTION TO RAPID PROTOTYPING

Participants will study topics fundamental to rapid prototyping and automated fabrication, including the generation of suitable CAD models, current rapid prototyping fabrication technologies, their underlying material science, the use of secondary processing, and the impact of these technologies on society. The rapid prototyping process will be illustrated by the actual design and fabrication of a part. Programming skills required. Co: 4634. (3H,3C)

#### 4664: INTRO GLOBAL COLL ENGR DESIGN

Participants will study topics fundamental to global collaborative engineering design, product data management, and collaborative product data management. These topics will be applied during a team project with team members located overseas, utilizing state-of-the-art collaborative engineering and product data management software and hardware technologies. Partially duplicates 5664. Credit may only be received for one course. I Pre: 2024, 4634. (3H,3C)

#### 4704 (MSE 4064): TRIBOLOGY

Basic principles of tribology--the study of friction, wear, and lubrication--including the importance of materials, surfaces, design, operating conditions, environment, and lubrication on friction, wear, and surface damage in any system. Application of tribological theories, concepts, techniques, and approaches to design, research, development, evaluation, and problem-solving. Pre: MSE 2034 or MSE 2044, MSE 3034 or ME 3404. (3H,3C)

#### 4714: THEORY AND APPLICATION OF HYDRODYNAMIC LUBRICATION

Basic equation of lubrication as applied to design problems. Reynolds equation, plain journal bearing analysis, fixed arc geometry bearing analysis, tilting pad bearing analysis. Fluid film seal analysis and design. Thrust bearing design and application. Introduction to gas bearing theory. Finite element solution for fluid film bearing analysis. Pre: 3404. (3H,3C)

#### 4724: ENGINEERING ACOUSTICS

Basic acoustical theory and practice, acoustic terminology, measurement, transmission, and perception of sound, muffler design, noise control techniques. I Pre: 3514. (3H,3C)

#### 4734 (ECE 4734): MECHATRONICS

Electromechanical system modeling, control and applications. Design of electronic interfaces and controllers for mechanical devices. Sensor technology, signal acquisition, filtering, and conditioning. Microcontroller-based closed-loop control and device communications. Sensor and actuator selection, installation, and application strategies. I Pre: ECE 2504, ECE 2704 or ME 3514. (3H,3C)

#### 4735,4736: MECHATRONICS

Electromechanical system modeling, control and applications. Design and building of electronic interfaces and controllers for mechanical devices, sensors, signal acquisition, filtering, and conditioning. Microcontroller-based closed-loop control and device communications. Sensor and actuator selection, installation, and application strategies are studied. A term design project is a key component to this course (for 4736). Pre: (ECE 3254, ME 3514) or (ECE 2004, ECE 2704) for 4735; 4735 for 4736. (3H,3C)

#### 4744: THE COMPLEXITY OF SOCIO-TECHNOLOGICAL PROBLEMS

Examines the complexity and interconnectedness of problems involving technology and society (environmental pollution, waste of natural resources,

energy, automation, computers and privacy, medical technology, genetic engineering, hunger, the third world, military spending, nuclear arms and war, etc.). Includes readings, guest lectures, discussion, and project work in small groups on real problems. Junior or Senior standing in any field required. (3H,3C)

#### 4754: IMPACT BIOMECHANICS

Introduction to impact biomechanics. Covers in-depth background of human tolerance to impact loading. Emphasis on the interdisciplinary nature of impact biomechanics. Use of fundamental engineering principles and advanced medical technologies to develop injury prevention measures. Real world examples from automobile safety, military applications, and sport biomechanics. Pre: ESM 2204, ESM 2304. (3H,3C)

#### 4864: MICRO/NANO-ROBOTICS

Overview of Micro/Nano-robotic systems. Physics of reduced length scales (scaling effects in the physical parameters, surface forces, contact mechanics, and micro/nano-scale dynamical phenomena), Basics of micro/nano-manufacturing, microfabrication and soft lithography, Biomimetic design strategies for mobile micro-robots, Principle of transduction, material properties and characteristics of Micro/nano-actuators (piezoelectric, shape-memory alloy, and a variety of MEMS and polymer actuators), Control requirements and challenges of micro/nano-actuators, Micro/nano sensors for mobile microrobotic applications, Micro/nano-manipulation (scanning probe microscopy, operation principles, designing experiments for nanoscale mechanical characterization of desired samples). Pre: MATH 2214, ME 3404, ME 3514. (3H,3C)

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

#### 4994H: UNDERGRADUATE RESEARCH

Variable credit course.

### Undergraduate Courses (NSEG)

#### 3145-3146: FUNDAMENTALS OF NUCLEAR ENGR

Application of fundamental principles of neutron physics and reactor theory. Introduction to nuclear cross-section data, neutron scattering, nuclear fission, and diffusion theory. Examination of current and next generation nuclear power. Pre: MATH 2214 or MATH 2215H for 3145; 3145 or ME 3145 for 3146. (3H,3C)

#### 3604: RADIATION DETECTION, PROTECTION AND SHIELDING

Radioactive decay, interaction of charged particles and photons with matter, methods of radiation detection and radiation dosimetry, counting statistics, radiation protection criteria and exposure limits, external radiation protection using time, distance and shielding. Pre: PHYS 2306. Co: MATH 2214. (3H,3C)

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

#### 4994H: UNDERGRADUATE RESEARCH

Honors Section Variable credit course.

### Overview

The Department of Mining and Minerals Engineering offers an engineering program containing aspects of mineral science, engineering, and technology that is professionally related to the minerals industry. Graduates of this program find domestic and international employment opportunities with hardrock, coal, industrial minerals, and construction aggregates producers, as well as with government agencies and equipment vendors.

The mission of the department is to produce high quality, rigorously trained mining engineers, whose background and education reflect the current level of technology and thought of the profession, and who can enter directly into engineering practice or, alternatively, graduate school for further study. Specifically, the Department of Mining and Minerals Engineering seeks, as its educational objectives, to prepare alumni within a few years of graduation to possess:

- the intellectual ability to critically assess and tackle any engineering problem they may encounter;
- the communication skills to communicate technical information to a variety of audiences including technically trained supervisors and subordinates as well as non-technical members of the work force and the general public;
- the leadership and team building skills to lead projects and function as entry-level managers as well as work productively as members of a team;
- an understanding of the practical aspects of the mining industry and an appreciation for mining as a business; and
- an awareness of societal issues and how these issues affect their role as future professional engineers working for the general benefit of society.

The mining engineering curriculum utilizes the basic and engineering sciences to develop the various areas of activity of the mining engineer: mineral exploration, evaluation, development, extraction, mineral processing, conservation, protection of the environment, and mineral economics. Course work in these areas provides a unique background for engineering and management positions in industry and government, as well as for continuation of specialized graduate studies.

Intrinsic to the curriculum is the development of a meaningful, major engineering design experience that builds upon the fundamental concepts of mathematics, basic sciences, the humanities and social sciences, engineering topics, and communication skills. This design experience is stressed within the major and grows with the development and progression of the student. Ethical, social, safety, economic, and environmental considerations are emphasized in the design experience throughout many courses, including the capstone senior design course. Finally, the major engineering design experience is a focal point of the mining engineering curriculum and is consistent with the objectives and goals of the program.

The program has an emphasis on the application of computers to mining and minerals processing operations. Furthermore, it exposes students to laboratory courses which focus on conducting experiments, understanding the principles involved in each experiment, and analyzing and interpreting experimental data.

Information on the mission, goals, and curriculum of the program is continuously updated on the departmental website.

The Cooperative Education Program, as well as opportunities for financial support in the form of scholarships, loans, awards, and summer

employment, are available to undergraduate and graduate students. Graduate programs are available leading to the M.S., M. Eng., and Ph.D.

The B.S. degree program in Mining Engineering is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

## Program of Study

<b>First Year</b>	
<i>First Semester</i>	
CHEM 1035: General Chemistry	3
CHEM 1045: General Chemistry Lab	1
ENGE 1024: Engineering Exploration	2
ENGL 1105: Freshman English (Area 1)	3
MATH 1205: Calculus (Area 5)	3
MATH 1114: Elementary Linear Algebra	2
Free Elective	2
<b>Credits</b>	<b>16</b>
<i>Second Semester</i>	
ENGE 1114 or ENGE 1104: Exploration of Engineering Design or Exploration of Digital Future	2
ENGL 1106: Freshman English (Area 1)	3
MATH 1206: Calculus (Area 5)	3
MATH 1224: Vector Geometry	2
PHYS 2305: Foundations of Physics I (Area 4)	4
Free Elective	3
<b>Credits</b>	<b>17</b>
<b>Second Year</b>	
<i>First Semester</i>	
ESM 2104: Statics	3
MATH 2224: Multivariable Calculus	3
GEOS 1004: Physical Geology (Area 4)	3
GEOS 1104: Physical Geology Lab (Area 4)	1
MINE 2504: Introduction to Mining Engineering	3
ENGE 2824: Civil Engineering Drawings and CAD	1
Liberal Education Area 2 Elective	3
<b>Credits</b>	<b>17</b>
<i>Second Semester</i>	
ESM 2204: Mechanics of Deformable Bodies	3
ESM 2304: Dynamics of Particles & Rigid Bodies	3
MATH 2214: Intro. to Differential Equations	3
MINE 2514: Mining Surveying	1
MINE 2524: Elements of Mine Design	3
Liberal Education Area 6 Elective	1
Liberal Education Area 7 Elective	3
<b>Credits</b>	<b>17</b>
<b>Third Year</b>	
<i>First Semester</i>	
ESM 3024: Introduction to Fluid Mechanics	3
ME 3114 or ME 3134: Engineering Thermodynamics or Fundamentals of Thermodynamics	3
MINE 3504: Rock Mechanics and Ground Control	3

MINE 3514: Rock Mechanics Lab. (Area 1, ViEWS)	1
MINE 3524: Excavation Engineering	3
MINE 3534: Mineral Processing	2
<b>Credits</b>	<b>15</b>
<i>Second Semester</i>	
GEOS 3104 or GEOS 3404: Elementary Geophysics or Elements of Structural Geology	3
MINE 3544: Mineral Processing Lab. (Area 1, ViEWS)	1
MINE 3554: Resource Recovery	2
MINE 3564: Underground Mine Design	3
MINE 3574: Surface Mine and Quarry Design	3
MINE 3584: Ventilation Engineering	3
<b>Credits</b>	<b>15</b>
<b>Fourth Year</b>	
<i>First Semester</i>	
ECE 3054: Electrical Theory	3
MINE 4504: Materials Handling and Power Sys.	3
MINE 4514: Health, Safety and Risk Management	3
MINE 4524: Project Engr. and Mine Management	3
MINE 4535: Senior Design Project (Area 1, ViEWS)	1
Liberal Education Area 3 Elective	3
<b>Credits</b>	<b>16</b>
<i>Second Semester</i>	
GEOS 4624: Mineral Deposits	3
MINE 4536: Senior Design Project (Area 1, ViEWS)	2
MINE 4544: Mine Reclamation and Environmental Management	3
MINE 4554: Mining Engr. Leadership Seminar	1
Liberal Education Area 2 Elective	3
Liberal Education Area 3 Elective	3
<b>Credits</b>	<b>15</b>

**A total of 128 semester credits are required for graduation.**

**Foreign Language Requirement:** Students who did not complete 2 units of a foreign language in high school must earn 6 credit hours of a college level foreign language, such credits to be in addition to those normally required for graduation.

**Eligibility for Continued Enrollment:** Upon having attempted 72 hours (including transfer, advanced placement, advanced standing, and credit by examination), "satisfactory progress" toward a B.S. will include the following minimum criteria:

- a grade point average of at least 2.0, and
- passing grades in MINE 2504, MATH 2214 and MATH 2224.

**Restricted Major requirements:** In order to enter and remain in this restricted major, students must have:

- Min 2.0 GPA overall.
- Credit for MATH 1205, 1206, 1114, 1224; CHEM 1035, 1045; ENGL 1105, 1106; PHYS 2305.
- Min grade of C- or better in ENGE 1024 and ENGE 1104/1114.

**Liberal Education Area 7 Elective:** If the Liberal Education Area 7 requirement is fulfilled with a course which double counts with another course on this checksheet, an additional three credit hour free elective must be completed.

## Undergraduate Courses (MINE)

#### 2504: INTRODUCTION TO MINING ENGINEERING

Introductory course covering the complete field of Mining and Minerals Engineering with special emphasis on the evolution of discrete mining systems, interaction of mining with the environment and the inter-relationship of Mining and Minerals Engineering with other disciplines. I (3H,3C)

#### 2514: MINING SURVEYING

Specialized principles of field surveying as applied to the delineation of mineral deposits and the design and monitoring of surface and underground mining operations. Introduction to surveying instruments, field techniques, computation procedures and mapping. Pre: MATH 1224, ENGE 1024. (3L,1C) II.

#### 2524: ELEMENTS OF MINE DESIGN

Basic concepts used in the modeling and design of mining systems including basic statistical concepts, sampling, geological and geostatistical modeling of ore bodies, ore reserve estimation, and selection of basic mine development methods. Pre: 2504, GEOS 1004. (2H,3L,3C) II.

#### 2974: INDEPENDENT STUDY

Variable credit course.

#### 2984: SPECIAL STUDY

Variable credit course.

#### 2994: UNDERGRADUATE RESEARCH

Variable credit course.

#### 3074: HISTORY OF MINING

History and development of mining technology and law from prehistoric to modern times. The importance of the mining industry in society and its role in world development. Junior standing required. (3H,3C)

#### 3094: ENERGY AND MINERALS IN SOCIETY

Trends in mineral consumption and the problems of meeting today's demands; mineral pricing; political influences; government regulation; the energy problem; alternative energy sources. Junior standing required. (3H,3C)

#### 3504: ROCK MECHANICS AND GROUND CONTROL

Properties and behavior of geologic materials and masses and their classifications and ratings. Design principles of structures founded on and in rocks and basic aspects of ground control. I Pre: ESM 2204, GEOS 1004, MINE 2504. (3H,3C)

#### 3514: ROCK MECHANICS LABORATORY

Laboratory techniques used in the determination of geologic materials properties and behavior. Determination of rock index properties, strengths, failure criterion and mechanical behavior. I Co: 3504. (3L,1C)

#### 3524: EXCAVATION ENGINEERING

Rock fragmentation for excavation; drilling fragmentation, rock drilling systems; blasting fragmentation, types and properties of commercial explosives and accessories, system of initiation, design of blasting rounds, applications in mining and construction, structural damage criteria, overbreak control, safe practice and regulations; fragmentation by excavation machines; excavation system selection and design. Pre: GEOS 1004, ESM 2204, MINE 2504. (3H,3C) I

#### 3534: MINERAL PROCESSING

Principles of processing ores to recover valuable minerals. Basics of mineral processing including sampling theory, material balancing, slurry calculations, grade-recovery relationships, particle size analysis, process control. Unit operations including crushing, grinding and size separation. Applications to coal cleaning and crushed stone production. Pre: 2504. (2H,2C) I

#### 3544: MINERAL PROCESSING LABORATORY

Laboratory investigations of the unit operations and principles of mineral processing including ore preparation (size reduction, mineral liberation, and classification) and mineral recovery (froth flotation, electrostatic separation, magnetic separation, and solid-liquid separation). Pre: 3534. Co: 3554. (3L,1C) II.

#### 3554: RESOURCE RECOVERY

Techniques for the separation and concentration of primary and secondary resources. Mineral concentration and waste recycling. Solid/solid concentration including gravity concentration, dense medium separation, froth floatation, magnetic separation and high tension separation. Solid/liquid separation including sedimentation/clarification, filtration and thermal drying. Overview of hydrometallurgical processing including leaching, solvent extraction and electrowinning. Pre: 3534, CHEM 1035. (2H,2C) II.

#### 3564: UNDERGROUND MINE DESIGN

Design fundamentals of mining systems and stope development for tabular and massive underground mineral deposits. Equipment selection and application, permitting, cost analysis and production simulation. Pre: 2524, 3504. (3H,3C) II.

#### 3574: SURFACE MINE AND QUARRY DESIGN

Surface mining methods, and their selection; mine planning and design; excavation, haulage and ancillary systems; equipment selection and maintenance; impoundment and piles design; mine closure/reclamation. Pre: 2524, 3524. (3H,3C) II.

#### 3584: VENTILATION ENGINEERING

Subsurface ventilation systems. Ventilation planning and design, laws of airflow, airway resistance. Ventilation surveys, network analysis, ventilation economics. Ventilation software. Fan types, impeller theory, fan laws and testing. Mine ventilation thermodynamics. Pre: 2504, ESM 3024. (2H,3L,3C) II.

#### 4054: COMPUTER APPLICATIONS IN MINING

Applications of computer programs to the estimation of ore reserves, the scheduling and planning of mine activities, the optimization of mine production, and the design and selection of equipment and support systems. Pre: 2524, 3564. (2H,2C)

#### 4074: COAL PREPARATION

Unit operations of cleaning coals by physical and chemical processes, coal analysis and characterization, flowsheet design, evaluation of plant performance, process control, and simulation of coal preparation plants. I Pre: 3554. (2H,3L,3C)

#### 4114: ECONOMICS OF MINERALS

Economic, technologic, and environmental aspects of mineral location, production, processing, and utilization. Junior standing required. (2H,2C) II.

#### 4124: MINING LAW

Land ownership and mineral rights, withdrawals, environmental laws, locatable and leasable minerals, exploration permits, lease management, and mineral taxation. Pre: 2524. (2H,2C)

#### 4134: SURFACE MINING CONTROL AND RECLAMATION

Design of engineering systems and methods to meet present environmental laws and regulations for surface mined land. Pre: 3574. (2H,2C)

#### 4144: MARKETING AND TRANSPORTATION OF COAL

Markets, grade specifications, reserve requirements, contracts, schedules, and transportation of minerals to markets. Pre: 3554. (2H,2C)

#### 4154: INTERMEDIATE ROCK MECHANICS

Theory and application of field instrumentation, simulation laws, and modeling in rock mechanics; dynamic response of rock; theory of rock bursts; stability of rock slopes, computer techniques of modeling, and monitoring. Pre: 3504. (3H,3C)

#### 4164 (MSE 4164): PRINCIPLES OF MATERIALS CORROSION

Introduction to the scientific principles of materials corrosion and corrosion protection. Topics include: thermodynamics of materials corrosion, including potential- PH (Pourbaix) diagrams, kinetics of corrosion reactions and mixed potential theory, types of corrosion (uniform, galvanic, crevice, pitting, fatigue, stress corrosion cracking, intergranular, and hydrogen embrittlement), material/environmental factors that promote or prevent the various types of corrosion, and methods and techniques of corrosion testing. Co: MSE 4034 or ME 3114 or ME 3124 or ME 3134. I (3H,3C)

#### 4174: COAL TECHNOLOGY

A broad-based background in coal technology, including origin of coal, classification, physical and chemical properties, beneficiation, combustion, carbonization, and chemical conversion. Pre: CHEM 1035, MATH 2214, PHYS 2305. (3H,3C)

#### 4184: GROUND CONTROL

Design of structures in rock, support analysis and design, strata control in bedded formations, mass deformation and subsidence concepts, slope stabilization and monitoring. Pre: 3504, 3514. (3H,3C)

#### 4504: MATERIALS HANDLING AND POWER SYSTEMS

Principles of materials handling, fluid power and electrical power systems for surface and underground mining operations. Engineering analysis and design of secondary haulage operations (belt conveyors, hoists, trucks, railways), fluid power systems (hydraulics, pumps, piping networks, compressors, pneumatic equipment). electrical systems (electrical machinery, distribution networks, controls), and other ancillary systems required to support mining operations. Assessment of equipment reliability and development of preventive maintenance programs. Pre: ESM 3024. Co: ECE 3054. (3H,3C) II.

#### 4514: HEALTH, SAFETY AND RISK MANAGEMENT

Study of risk analysis; mine legislation; mine gases, their occurrence, and physiological effects; methane emissions; dust classification, monitoring, and control; heat and humidity; psychrometry; physiological effects; climatic simulation; radiation monitoring and control; equipment hazards; noise; illumination; personal health and safety; fires and explosions; disaster management. Pre: 3564 or 3574. (3H,3C) I.

#### 4524: PROJECT ENGINEERING AND MINE MANAGEMENT

Introduction to theory and practice of project engineering and management. Estimation of capital and operating expenditures. Cash flow development, worth evaluation, comparison of alternatives, taxation/depreciation and optimization. Principles of financial management, accounting and resource utilization. Topical seminars by industrial representatives. Pre: 3564 or 3574. (3H,3C) I

#### 4535-4536: SENIOR DESIGN PROJECT

Investigation of a significant design problem in mining engineering under the supervision of a staff member. Periodic progress reports and submission of a comprehensive final design project including detailed drawings, engineering calculations, economic feasibility, and environmental impacts. Pre: 3564 or 3574 for 4535; 4535 for 4536. Co: 4524 for 4535. 4535: (3L,1C) I. 4536: (6L,2C) I.

#### 4544: MINE RECLAMATION AND ENVIRONMENTAL MANAGEMENT

Statutory and regulatory controls on the mining environment. Air, water and land pollutants, standards, monitoring systems, and prevention and control techniques. Unique environmental issues, Surface Mine Conservation and Reclamation Act (SMCRA), endangered species, environmental impact statements, permitting, environmental audits and torts. Pre: 3574. (3H,3C) II.

#### 4554: MINING ENGINEERING LEADERSHIP SEMINAR

Invited speakers, short-courses and workshops on subjects related to leadership issues in mining and minerals engineering. Technology and design; mining finances and marketing; management and business concerns; labor relations and leadership; team building, motivation, and communications; problem solving and performance measurements; environmental issues; permitting and regulatory requirements. Senior standing required. (3L,1C) II.

**4604: MINERAL PROCESSING SIMULATION AND CONTROL**

Principles of processing minerals and coal including analysis of flowsheets and unit operations, mass balance calculations, mathematical modeling, simulation and control of mineral and coal processing operations. Pre: 3554. (3H,3C) II.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course. X-grade allowed.

## Overview

The College of Liberal Arts and Human Sciences offers baccalaureate degrees encompassing the humanities, performing arts, and human and social sciences. The College emphasizes the importance of mastering the intellectual skills a liberal arts education develops as well as job skills by encouraging students to apply knowledge from one field to another and to think creatively.

Outstanding faculty members conduct research and teach courses in 16 departments leading to baccalaureate and advanced degrees. Coursework from the College of Liberal Arts and Human Sciences also provides a foundation of knowledge of a number of fundamental subjects for students in all colleges in the Curriculum for Liberal Education.

## General Requirements for Graduation

A student in the College of Liberal Arts and Human Sciences must complete at least 120 hours for an undergraduate degree as well as satisfy the following requirements:

- achieve a minimum overall Grade Point Average (GPA) of 2.0 for all hours attempted (some majors may require a higher GPA)
- achieve a minimum overall GPA of 2.0 for all hours attempted in all work applied to the major (some majors may require a higher GPA)
- complete all other requirements established for their degree by the major department
- complete all college and university Curriculum for Liberal Education requirements

No course required for graduation or in the major/minor may be elected to be taken on a pass/fail basis (i.e., pass/fail may be used for free electives only). This excludes courses that are offered pass/fail only.

## College Curriculum for Liberal Education

A description of the Curriculum for Liberal Education may be found in the [Academics](#) chapter of this catalog. For requirements specific to departments in the College of Liberal Arts and Human Sciences, please contact the individual department.

## The Honors Program

The University Honors Program is available to students in the College of Liberal Arts and Human Sciences. These programs provide an enriched environment for qualified students who are highly motivated and possess outstanding scholastic ability. Specific requirements for the three possible honors degrees are available from the [University Honors Program](#), participating departments and the Office of Undergraduate Academic Affairs.

## Dean's List

A student enrolled in the College of Liberal Arts and Human Sciences for 12 hours or more for grade (A-F) who earns a GPA of 3.4 or higher during the fall or spring semesters is awarded a Dean's List certificate.

## Pre-Professional Advising

The University provides pre-professional career advisors for all disciplines and the college provides career advisors in areas related to the College.

- Pre-law advisors are based in the College but advise students from any discipline. In addition they advise a pre-law student organization that any Virginia Tech student interested in the law can join. In addition, several majors in the College of Liberal Arts and Human Sciences offer pre-law concentrations which students may take if they are interested in pursuing a graduate program in law.
- Health professions advisor is located in Career Services and provides advising on entering professional programs such as medical, occupational therapy, nursing and dental school to all students
- Pre-Education Advising - The College of Liberal Arts and Human Sciences provides pre-education advising for potential elementary education students. The College of Liberal Arts and Human Sciences' School of Education provides preparation of educational professionals through programs at the graduate level. These graduate programs meet state and national accreditation standards and are designed to promote teaching, research, and service.

## Scholarships

A number of scholarships are available for outstanding students enrolled in the College of Liberal Arts and Human Sciences. Descriptions and deadlines are available on the [college website](#).

Students who are interested in applying for financial merit-based aid should contact the [University Office of Scholarships and Financial Aid](#).

## Undergraduate Research

Undergraduate research is a commitment of the college. The Undergraduate Research Institute aims to expose undergraduates to investigation, inquiry, and creative expression in the liberal arts and human and social sciences, enhancing the opportunities for advanced research initiatives, elevating the visibility of that research, and providing access to a variety of resources for student development and faculty mentorship. The College offers first-year students a 3-credit course, LAHS 1004 Introduction to a Research University, which introduces students to the concept of undergraduate research while preparing them to be successful college students at Virginia Tech. Departments within the College of Liberal Arts and Human Sciences have a variety of research opportunities in which students may choose to participate. Students interested in undergraduate research should contact the department where they wish to conduct research or the Undergraduate Research Institute for assistance.

## Internships, Co-Op Opportunities and Study Abroad

Students are encouraged to participate in Internship and Co-op opportunities to gain relevant work experience prior to graduation. Department career advisors can help students identify opportunities. In some cases students can receive credit for qualifying work experience. Study abroad experiences are highly encouraged for students in the College of Liberal Arts and Human Sciences and students should meet with their academic advisor or contact the Office of Undergraduate Academic Affairs for information.

## Career Advising

Career advising is available from a number of sources. The university offers centralized career services and on-campus interviewing. The College of Liberal Arts and Human Sciences works with employers interested in hiring students with degrees from the college and organizes employer panels and information sessions specifically tailored to majors in the college. The college also co-hosts two career fairs each year, one in the fall semester and one in the spring semester. The college offers a 1-credit course, LAHS 3004, Professional Seminar designed specifically for liberal arts and human sciences majors as they prepare for careers and/or graduate and professional school. Additionally, every major has a departmental career advisor who specializes in guiding students from their field towards career success.

## Graduate Programs in the College of Liberal Arts and Human Sciences

Many of the College of Liberal Arts and Human Sciences departments offer graduate degrees at the Master's and Ph.D. levels. Complete information on these programs including descriptions of graduate courses can be found in the [Graduate Catalog](#).

---

## Undergraduate Courses (LAHS)

### 1004: FIRST YEAR EXPERIENCE: INTRODUCTION TO A RESEARCH UNIVERSITY

Introduces first-year Liberal Arts and Human Sciences majors to the university's research mission and the scope and nature of research within the disciplines in the college. Prepares students to participate in the university's research mission through undergraduate research. Focuses on building problem-solving, inquiry, and integration skills as foundational to academic success. Topics include an introduction to academic support resources, academic planning, career exploration, and e-portfolio. (3H,3C)

### 1104: PROFESSIONAL PERSPECTIVES

Introduction to the heritage and professional characteristics of the programs in the College of Liberal Arts and Human Sciences. Emphasis on assisting new students in the college with academic goals, strategies, and academic plans of study. (1H,1C)

### 2204: APPALACHIAN FAMILY & ENVIRONMENT

Characteristics of the people of Central and Southern Appalachia are emphasized: past and present, including family relationships, food practices, clothing, and housing constraints. (3H,3C)

### 2974: INDEPENDENT STUDY

Variable credit course.

### 2984: SPECIAL STUDY

Variable credit course.

### 3004: PROFESSIONAL SEMINAR

Designed specifically for liberal arts and human sciences majors, this course prepares students for careers and/or graduate school. Interviewing, resume writing, the graduate school application process, writing personal statements, electronic job searching, and diversity issues in the workplace are examples of topics covered. Pre: Junior or Senior standing. Major within the College of Liberal Arts and Human Sciences, Junior standing preferred. (1H,1C)

### 3914: SURVEY OF RESEARCH METHODS FOR THE LIBERAL ARTS AND HUMAN SCIENCES

Survey of research methods and technologies used in the Liberal Arts and Human Sciences disciplines. Disciplinary and cross disciplinary research methods including quantitative, qualitative, mixed and creative approaches, research proposals, computer based research applications, interpretation of research articles, identification of funding sources and preparation for conference presentations are some of the topics to be covered. Designed to complement discipline based research methods courses and foster development of research skills and interest. Pre: Junior or Senior standing required. (3H,3C)

### 3954: STUDY ABROAD

Variable credit course.

### 3984: SPECIAL STUDY

Variable credit course.

### 4964: FIELD STUDY

Variable credit course.

### 4974: INDEPENDENT STUDY

Variable credit course.

4984: SPECIAL STUDY

Variable credit course.

4994: UNDERGRADUATE RESEARCH

Variable credit course.

### Overview

The Air Force Reserve Officer Training Corps (AFROTC) provides a program of leadership development which prepares college men and women for service as commissioned officers in the United States Air Force. After graduation, they assume active duty positions in both flying and non-flying specialties. To accomplish this, the Department of Aerospace Studies recruits, selects, retains, and commissions officer candidates as second lieutenants in the United States Air Force. AFROTC:

- Provides ethics and values education, stressing the Air Force core values of integrity first, service before self, and excellence in all we do.
- Prepares cadets to be commissioned as second lieutenants through a curriculum which develops leadership and management skills and provides opportunities to use these skills in a variety of practical applications.
- Provides an understanding of how to lead and influence small organizations, with a strong emphasis on personal integrity, honor, and individual responsibility. The techniques of effective leadership and quality management are stressed to achieve mission accomplishment.
- Enhances the cadets' understanding of the role of the military in society and provides an in-depth orientation to history and tradition of the Air Force and how the Air Force serves the nation. This goal is reinforced by summer hands-on leadership training and career orientation opportunities at Air Force bases around the country.
- In conjunction with the Virginia Tech Corps of Cadets, provides programs and experiences which increase self-confidence, self-discipline, accountability, physical stamina, poise, and other traits essential to the development of a leader of character who is prepared to serve the nation or the commonwealth both in and out of uniform.

The curriculum and leader development programs of the Department of Aerospace Studies are mentally and physically challenging. Cadets learn basic military skills and participate in a demanding physical conditioning program starting in the freshman year. The program moves progressively from followership to leadership experiences and culminates with the senior class cadets planning, organizing, and administering all leadership training for the cadet group. On-campus instruction is conducted both in the classroom by Air Force officers and in the field environment by both officer and cadet leaders. Semiannual visits to Air Force bases expand the cadets' knowledge of Air Force operations and life-style. A demanding summer field training encampment prior to the junior year prepares the cadet for acceptance into the commissioning track.

Air Force ROTC offers four-, three-, and two-year tracks. Four- and three-year track cadets must complete 8 semester hours of AFROTC academics prior to a four-week summer encampment. The two-year track cadets complete a six-week summer encampment where they receive the freshman and sophomore academic courses in addition to the normal four-week field training course of instruction. Students who have Junior ROTC, other-service ROTC, national guard, reserve, or active duty military experience may request credit and advanced placement.

### Scholarships

Air Force ROTC offers four-, three-, and two-year scholarships which are based on merit, not need. Though scholarship awards vary, most pay all tuition, books, and approved university fees. High school seniors who are interested in the four-year or guaranteed three-year scholarships must apply at [www.afrotc.com](http://www.afrotc.com) by Dec. 1 of their senior year. Non-scholarship cadets may apply for three- and two-year scholarships during their freshman and sophomore years. All students who are contracted into the AFROTC program (includes all scholarship winners and those juniors and seniors holding a commissioning contract) receive a tax-free stipend of up to \$500 per month while in school.

Virginia Tech requires membership in the Virginia Tech Corps of Cadets to be enrolled in ROTC. All freshman and sophomore cadets, as

well as contracted junior and senior cadets, receive a special Air Force uniform allowance to offset the cost of cadet uniforms. The Corps of Cadets also provides need- and merit-based scholarships for deserving cadets.

Membership in the Virginia Tech Corps of Cadets and completion of four years of Air Force ROTC may qualify a student to receive a minor in leadership. The leadership progression program of the Corps of Cadets and the leadership education inherent in the AFROTC program in combination allow the student to earn this leadership minor -- an academic achievement only available at Virginia Tech. Contact the Rice Center for Leader Development, 540-231-9455, for information on how to apply for the leadership concentration.

Air Force ROTC builds leaders and offers every student who successfully completes the program a job upon graduation. The basic requirements for commissioning are: award of a degree from Virginia Tech including 24 hours of AFROTC; be a U.S. citizen of good moral character; meet medical and physical standards; achieve passing scores on the Air Force Officer Qualifying Test; and willingly accept a four-year service commitment.

## **Undergraduate Courses (AS)**

### **1115-1116: INTRODUCTION TO THE AIR FORCE**

Introduction to the United States Air Force and Air Force Reserve Officer Training Corps. Mission and organization of the Air Force, officership and professionalism, military customs and courtesies, Air Force officer opportunities, and introduction to communication skills. Co: 2944 for 1115. (1H,1C) 1115: I; 1116:

### **2115-2116: THE DEVELOPMENT OF AIR POWER**

Study of air power from balloons through the jet age. Historical review of air power employment. Evolution of air power concepts and doctrine. Air Force communication skills Pre: 1115, 1116. Co: 2944 for 2115. (1H,1C)

### **2934: AIR FORCE FITNESS**

Reflects change in culture on physical fitness and incorporates fitness as a way of life with the United States Air Force & the Air Force Reserve Officer Training Corps (AFROTC). Structured to motivate members to develop and maintain year-round physical fitness conditioning program emphasizing total-body wellness to meet expeditionary mission requirements. Prepares cadets to tackle squadron fitness programs upon entering active duty. Course may be taken up to 10 times. Pre-requisite: Enrollment on AFROTC Co: 2944. (2H,1C)

### **2944: AFROTC LEADERSHIP LABORATORY**

Experiential learning laboratory that allows cadets to practice and demonstrate mastery of leadership skills essential to an Air Force officer. May be taken eight times. Pass/Fail only. Membership in Virginia Tech Corps of Cadets required. Pass/Fail only. Co: 1115, 1116, 2115, 4216, 3215, 3216, 4215, 2116. (4L,1C)

### **2974: INDEPENDENT STUDY**

Variable credit course.

### **2984: SPECIAL STUDY**

Variable credit course.

### **3215-3216: AIR FORCE MANAGEMENT AND LEADERSHIP**

Integrated leadership study emphasizing concepts and skills. Motivational and behavioral processes, management, military ethics, communication, and group dynamics. Examines case studies and scenarios. Pre: 2116. Co: 2944 for 3215. (3H,3C)

### **4215-4216: NATIONAL SECURITY FORCES IN CONTEMPORARY AMERICAN SOCIETY**

Examines the formulation, organization, and implementation of national security; evolution of strategy; management of conflict; and civil-military interaction. Military profession, officership, and the military justice system. Air Force communication skills. Pre: 3216. Co: 2944 for 4215. (3H,3C)

### **4964: FIELD STUDY**

Pass/Fail only. Variable credit course.

### **4974: INDEPENDENT STUDY**

Variable credit course.

### **4984: SPECIAL STUDY**

Variable credit course.

- Consumer Studies Option
- Housing Option
- Residential Property Management Option
- Course Descriptions

Overview

The mission of the Department of Apparel, Housing, and Resource Management is to improve quality of life for individuals, families, and the broader community by creating and extending knowledge in apparel, housing, and resource management. We apply business, consumer, and design perspectives to teaching and learning, research, and outreach.

The AHRM Degree includes four options, Apparel Product Development and Merchandising Management, Housing, Residential Property Management, and Consumer Studies.

Apparel Product Development and Merchandising Management Option

Career Advisor: Doris Kincade

The Apparel field addresses the domestic and international concerns of apparel and textile consumers, manufacturers, and retailers. The Apparel program prepares students for careers in business, industry, and government services. Apparel Product Development and Merchandising Management (APDM), the name of the option in the Apparel program, reflects the diverse career opportunities available to graduates of the program.

Students may find employment with apparel or textile manufacturers or with various types of retailers or fashion media. Students specializing in APDM may be employed in the areas of product development and merchandising. The numerous positions in these areas include account representative, buyer, fashion coordinator, fashion journalist, merchandise manager, production manager, sourcing analyst, store manager, technical designer, visual merchandiser, among others for many types of fashion and special-use apparel and accessories.

Individuals employed in today's apparel and textile industries need to understand both product development and merchandising management. The APDM option is designed to build students' knowledge and skills in the development, production, marketing, distribution, and use of apparel and other textile products. The Curriculum for Liberal Education furthers students' knowledge by providing a broad liberal education.

Courses in the APDM option allow students to gain experience in the product development process, computer-aided design; textile and apparel evaluation; merchandise planning, buying, promotion, and presentation techniques; consumer buying behavior; and economics of the textile and apparel industry. Supporting courses in accounting, management, and marketing enhance career preparation. Through coursework, internships, study tours, student organizations, and interaction with industry experts, students become prepared to enter the field.

Required:	
AHRM 1204	Clothing and People

AHRM 1214	Fashion Presentation Techniques
AHRM 2204 & 2214	Introduction to Textiles & Apparel Textiles Lab
AHRM 2264	Apparel Product Development
AHRM 2404	Consumer Rights
AHRM 3104	Fashion Retailing Concepts
AHRM 3204	Introduction to Textile Evaluation
AHRM 3224 (or AHRM 1224)	Apparel Production (Basic Apparel Assembly)
AHRM 3234	Fit, Patternmaking, and Draping
AHRM 4034	History of Costume
AHRM 4214	Economics of the Textile and Apparel Industry
AHRM 4224	Fashion Analysis and Communication
AHRM 4234	Apparel Quality Evaluation
ACIS 2115	Principles of Accounting
ECON 2005-2006 or AAEC 1005-1006	Principles of Economics Economics of Food and Fiber Systems
LAHS 3004	Professional Seminar
MGT 3304	Management Theory and Leadership Practice
MKTG 3104	Marketing Management
SOC 1004 or PSYC 2004	Introductory Sociology Introductory Psychology
<b>Select at least four of the following courses:</b>	
AHRM 3244	Small Apparel Business Management and Entrepreneurship
AHRM 3254	Global Apparel Production and Trade
AHRM 4024	Portfolio
AHRM 4124	Clothing Behavior Patterns
AHRM 4264	Merchandising Strategies
AHRM 4984	Multichannel Retailing
<b>Select at least one of the following courses:</b>	
ACIS 1504	Intro to Business Information Systems
COMM 2004	Public Speaking
ENGL 3764	Technical Writing
<b>Select at least one of the following courses:</b>	
AHRM 3954	European Study Abroad
AHRM 4244	New York Fashion Study Tour
AHRM 4664	Universal Design
AHRM 4964	Field Study
AHRM 4974	Independent Study
AHRM 4994	Undergraduate Research
BIT 2405	Quantitative Methods
MGT 3324	Organization Behavior
MGT 3334	Introduction to Human Resource Management
MKTG 3504	Advertising
MKTG 4204	Consumer Behavior
MKTG 4554	Buyer – Seller Relationships
MKTG 4604	Retail Management
STAT 2004	Introductory Statistics

For a complete list of graduation requirements please see the graduation checksheet at [http://www.registrar.vt.edu/registration/degree\\_checksheets.php](http://www.registrar.vt.edu/registration/degree_checksheets.php).

## Consumer Studies Option

**Career Advisor: I. Leech**

The Consumer Studies Option prepares students to enter a variety of careers in the public and private sectors. Central to these careers is the ability to analyze issues and problems from the perspectives of consumers, business, and government. Students learn to reasonably advocate consumer interests and to help consumers improve their well-being. They develop fundamental skills that are used to resolve problems faced by consumers in the market place and the work place.

Graduates enter careers related to consumer affairs, marketing and sales, business management, and human resources. Required courses build a thorough understanding of households in the dual roles of producers and consumers that function within an international economic marketplace affected by government policy and regulation. Students study current events to track changing conditions and public policy. Additional courses develop skills for effectively processing and conveying information. A choice of controlled electives enables a student to tailor study to consumer products and promotion or consumer financial services, and counseling.

Consumer Studies students are provided a variety of learning experiences on- and off-campus. Through involvement with student professional associations, as well as relevant state and national organizations, students can develop leadership and organizational skills and network with active professionals. There are opportunities to relate classroom learning to the "real world" with projects and visits with industry, legislators, and regulators. An individualized study experience, typically an internship related to personal career interests, is required.

<b>Required:</b>	
AHRM 2304	Family Financial Management
AHRM 2404	Consumer Rights
AHRM 2504	Resource Management for Individuals and Families
AHRM 4314	Debtor-Creditor Relationships
AHRM 4404	Consumer Protection
AHRM 4414	Professionalism in Consumer Affairs
AHRM 4504	Advanced Resource Management
AHRM 4964, 4974, 4994	Individual Study
ACIS 1504	Introduction to Business Information Systems
ACIS 2115	Principles of Accounting
COMM 2004	Public Speaking
ECON 2005-2006 or AAEC 1005-1006	Principles of Economics Economics of Food and Fiber Systems
ENGL 3764	Technical Writing
HD 2004 or HD 2304	Human Development II Family Relationships
MGT 3304	Management Theory and Leadership Practice
MKTG 3104	Marketing Management
STAT 3604	Statistics for the Social Sciences
LAHS 3004	Professional Seminar
<i>Eighteen credit hours in one of the following areas:</i>	
Consumer Products and Promotion or	
Consumer Financial Services and Counseling	

For a complete list of graduation requirements please see the graduation checksheet at [http://www.registrar.vt.edu/registration/degree\\_checksheets.php](http://www.registrar.vt.edu/registration/degree_checksheets.php).

## Housing Option

**Career Advisor: K. Parrott**

The Housing Option focuses on the residential environment, especially planning, design, and marketing. Required courses emphasize design, human, social, and business factors, including current issues and practices, which influence the environment of housing. The diversity of the population with differing needs, the range of available products, the growth of regulation, the increased concern for health and

safety, and the rapid changes in technology are among the factors that lead to a very complex market place in the housing industry.

There will be many career opportunities for graduates of the Housing Option, especially as certified kitchen or bath designers, which provide employment as well as business opportunities. Other employment opportunities include manufacturing and sales of residential products, residential construction, home furnishings, appliances, and related industries. The future looks bright for those students who choose careers in the housing industry. A number of trend and demographic indicators suggest that people will continue to spend money on their homes and need products and services from experts. There will be a strong, on-going need in the housing industry for well-educated professionals with specialized knowledge in design and the ability to think and solve complex problems.

The program in kitchen and bath design is accredited by the National Kitchen and Bath Association, and interested students can prepare to sit for the first level design certification examination. All students in the option are mentored by industry members of the Center for Real Life Kitchen Design Advisory Board. Classroom learning is expanded through field trips, guest speakers, community clients, internships, competitions, and other special projects.

<b>Required:</b>	
AHRM 1624	Residential Drafting Lab
AHRM 2204	Introduction to Textiles
AHRM 2644	Housing and the Consumer
AHRM 2654	Housing Environments
AHRM 2404	Consumer Rights
AHRM 2504 or AHRM 2304	Resource Management for Individuals and Families Family Financial Management
AHRM 2604	House Planning
AHRM 2614/2634	Introduction to Residential Technologies & Laboratory
AHRM 2675	Residential Property Management I
AHRM 3624	House Planning II
AHRM 3644	American Housing
AHRM 3674	Advanced Residential Technologies
AHRM 4604	Housing: Energy and the Environment
AHRM 4624	Advanced Kitchen and Bath Design
AHRM 4664/4764	Universal Design & Laboratory
AHRM 4964	Field Study
ART 2385-2386	Survey of the History of Western Art
ECON 2005-2006	Principles of Economics
ACIS 2115	Principles of Accounting
MKTG 3104	Marketing Management
MKTG 4554	Buyer - Seller Relationships

In addition to required courses, students develop a supporting area of study by completing a minor or cognate. Additional recommended courses are: Study Abroad (AHRM 3954), Housing Study Tour (AHRM 4924), Advanced Topics in House Planning (AHRM 4654) and Undergraduate Research (AHRM 4994).

For a complete list of graduation requirements please see the graduation checksheet at [http://www.registrar.vt.edu/registration/degree\\_checksheets.php](http://www.registrar.vt.edu/registration/degree_checksheets.php).

## **Residential Property Management Option**

**Career Advisor: R. C. Goss**

The residential property management option was developed in 1985 in response to industry demand for more and better-educated professionals. Today residential property management is a fast-growing career sector with hundreds of management positions available each year in communities that range from luxury apartment developments to innovative senior living communities. Graduates typically choose among several employment offers and enjoy quick advancement.

The curriculum offers a wide-ranging program of study that includes specific courses in property management, as well as supporting courses in housing, business, and human relations. All students complete an internship where they gain real-world experience, make valuable career

contacts, and explore different career areas. RPM's very active advisory board visits campus twice yearly. Board members act as mentors and provide financial support for field trips, professional development, and scholarships. RPM seniors prepare for and take the National Apartment Association's CAM (Certified Apartment Manager) exam. Graduating with this credential places new employees a year or more ahead of other entry-level peers.

<b>Required:</b>

## Course Descriptions (AHRM)

### 1204: CLOTHING AND PEOPLE

A personal and societal approach to the study of clothing and its importance in people's lives. Social, psychological, and economic forces that affect clothing behavior of individuals and groups. Fundamentals of clothing and textiles importance to consumers. (3H,3C)

### 1214: FASHION PRESENTATION TECHNIQUES

Basic principles and methods for executing fashion and specification illustrations and technical flats. Practice and skill development using a variety of manual and computer tools. Emphasis on the correct use of industry terminology. (2H,2L,3C)

### 1624: RESIDENTIAL DRAFTING LAB

Principles of visual presentation of housing designs. Introduction to hand and computer drafting. (2L,1C)

### 2204: INTRODUCTION TO TEXTILES

Structure, properties and basic production of textiles and textile components: natural and manufactured fibers; yarns; woven, knit, nonwoven fabrics; mechanical and chemical finishes; colorants and coloration methods. Influence on performance of apparel and interior textile products. Sophomore standing and one semester (lecture) of university core requirement in Scientific Reasoning and Discovery is required. (3H,3C)

### 2214: APPAREL TEXTILES LABORATORY

Identification and characterization of textiles and textile components including: fabrics, finishes and coloration. Influence of these structural parameters on performance of apparel textiles. (3L,1C)

### 2224: INTERIOR TEXTILES LABORATORY

Identification and characterization of textiles and textile components used in draperies, upholstery, and carpets. Performance testing of interior textiles to determine suitability for a selected interior. (2L,1C)

### 2244 (AAEC 2244): FOOD AND CLOTHING: CULTURAL TRADITIONS, CONFLICTS AND POSSIBILITIES

Survey of basic ideas underlying values and cultural traditions expressed in food and clothing. Ethical perspectives in Western and Non-Western schools of thought. Application to issues involving food and clothing, such as product liability, food and clothing safety, animal rights and the use of fur, labor sweatshops, sourcing of inputs, endangered species, rain forests, consumer sovereignty, freedom and economic justice. Sophomore standing is required. II (3H,3C)

#### 2264: APPAREL PRODUCT DEVELOPMENT

Study of the pre-production stage of product development in the apparel industry, including planning a line based on market, consumer, and product research, forecasting trends in color, style and materials, developing and selecting designs and styles, and wholesale marketing of a line to retail buyers. Also includes the use of diverse inspiration sources for creating a design, application of computer-aided design to design and style development, and identification of career opportunities and qualifications for professional positions in the industry. Pre-requisite: Sophomore Standing required. Pre: 1214. (2H,2L,3C)

#### 2304: FAMILY FINANCIAL MANAGEMENT

Overview of family financial management. Analysis of financial situations of individuals and families; assessment of needs for cash and credit management, insurance, tax savings, and investments; introduction to components of a comprehensive family financial plan. (3H,3C)

#### 2404: CONSUMER RIGHTS

Changing role of consumers in American society from the perspective of the consumer interest. Consumers' legal and moral rights, responsibilities and means for successfully obtaining redress of grievances. Processes of government regulation and policy making that affect consumers. Current consumer problems and issues in such areas as ripoffs and frauds, food, health care, product safety, banking, credit, housing, insurance and investments.(3H,3C)

#### 2504: RESOURCE MANAGEMENT FOR INDIVIDUALS AND FAMILIES

Introduction to resource management concepts and theories with application to personal and family life goals. (3H,3C)

#### 2604: HOUSE PLANNING

Principles of space planning and housing design in relation to individual and family activities, needs, and preferences. Introduction to house construction. Reading visual presentations of housing designs. (2H,2C)

#### 2634: RESIDENTIAL TECHNOLOGIES LABORATORY

Basic principles of home technologies and their applications in the home. Co: 2614. (2L,1C)

#### 2644: HOUSING AND THE CONSUMER

Overview of housing as it relates to consumer needs, values, lifestyles, norms and constraints. Includes structural and tenure alternatives, financial and legal considerations, house design, neighborhood choices, the home buying process, and future directions in housing. Government aspects focus on the history of federal involvement in housing, major housing programs, role of state and local government, and current housing issues and policies. (3H,3C)

#### 2654: HOUSING ENVIRONMENTS

Basic design elements and principles in housing products and spaces. Qualities of spatial elements and housing products. The design process as used to explore the selection and application of these elements and products for specific user needs in housing environments. Pre: 1624. (2H,2L,3C)

#### 2664: INTRODUCTION TO RESIDENTIAL PROPERTY MANAGEMENT

The history of property management, roles and responsibilities of managers, developing effective marketing and maintenance strategies, fair housing, and landlord-tenant law. (3H,3C)

#### 2675-2676: RESIDENTIAL PROPERTY MANAGEMENT

2675: The history of property management, role and responsibilities of managers, developing effective marketing and maintenance strategies, fair housing, and landlord-tenant law. 2676: The operation and management of residential properties including detailed examination of financial aspects of residential property management. (3H,3C)

#### 2964: FIELD STUDY

Variable credit course.

#### 2974: INDEPENDENT STUDY

Variable credit course.

#### 2974H: INDEPENDENT STUDY

Variable credit course.

#### 2984: SPECIAL STUDY

Variable credit course.

#### 3104: FASHION RETAILING CONCEPTS

Detailed investigation and analysis of the fundamentals of fashion merchandising concepts emphasizing problem solving at the retail level. Pre: 2264, (ACIS 2004 or ACIS 2115). (3H,3C)

#### 3204: INTRODUCTION TO TEXTILE EVALUATION

Analysis of the performance properties of fabrics. Importance of evaluation to product development, quality control, and specification of care requirements. Pre: 2204, 2214.(2H,3L,3C)

#### 3224: APPAREL PRODUCTION

Application of concepts and principles of basic and intermediate-level apparel patternmaking and construction from the apparel industry perspective to the creation of prototypes, product specifications, and finished products. Students will gain conceptual understanding of simple to complex apparel construction techniques, learn the stitch and seam types and their applications, and develop skill in using a variety of manual and computer tools and equipment for apparel patternmaking and construction. Pre-requisite: Junior or second-semester sophomore standing. Pre: 2264. (3H,3L,3C)

#### 3234: FIT, PATTERNMAKING, AND DRAPING

Study of apparel product development from the apparel industry point of view using intermediate and advanced techniques and skills. Focus on conceptual understanding and application of garment fit, pattern and product alteration, pattern grading, and marker making principles and of flat-pattern and manikin-drape techniques used in apparel engineering and product development, along with development, along with development of skill in using a variety of related manual and computer tools. Pre-requisite: Junior Standing required. Pre: 3224. (3H,3C)

#### 3244: SMALL BUSINESS APPAREL RETAIL DEVELOPMENT

Comprehensive study of small business concepts as applied to the textile and apparel retail industry. Analysis of the entrepreneurial mindset and strategies for business entry with emphasis on small business development, including concept and opportunity identification, merchandising and management, operations and control, advertising and promotion, and financial planning for a textile and/or apparel retail business. Pre: 2264. (3H,3C)

#### 3254: GLOBAL APPAREL PROD & TRADE

Study of evolution, basic elements, patterns, and implications in developed and developing countries of contemporary global apparel production and trade. Course topics also include key roles of U.S. firms and government agencies in global apparel production and trade, the types and roles of firms that participate in sude production and trade, as well as international trade policies and other factors that influence global apparel production and trade. Pre-requisite: Junior Standing required. (3H,3C)

#### 3464 (EDHL 3464) (GEOG 3464) (HD 3464) (HUM 3464) (SOC 3464) (UAP 3464): APPALACHIAN COMMUNITIES

The concept of community in Appalachia using a multidisciplinary approach and experiential learning. Interrelationships among geographically, culturally, and socially constituted communities, public policy, and human development. 2000-level course in any cross-listing department is required. (2H,3L,3C)

#### 3624: HOUSE PLANNING II

Principles of space planning, including activity analysis and user needs, as applied to residential settings. Graphic design solutions for specific areas of the home, including social, private, kitchen, and outdoor areas. Pre: 2604, 2634, 2654. (6L,3C)

#### 3634: MANAGING AFFORDABLE & SPECIALIZED HOUSING

Management of affordable multifamily, military, and student housing, as well as homeowner associations and mixed-use development. Pre: 2676. (3H,3C)

#### 3644: AMERICAN HOUSING

Overview of the role of housing in family life and society throughout the history of the United States. Exploration of the impact of technology, resources, and societal values on the design and style of housing and products used in the home. (3H,3C)

#### 3674: ADV RESIDENTIAL TECHNOLOGIES

Residential technologies, such as lighting, communications, and security systems, their impact on home activities, and how they can be successfully integrated into the house structure and design. Pre: 2614. (3H,3C)

#### 3954: STUDY ABROAD

Variable credit course.

#### 4024: PORTFOLIO

The development and production of a professional apparel portfolio in both paper and ePortfolio format. Pre-requisite: Senior Standing required. Pre: 3234. (3H,3C)

#### 4034: HISTORY OF COSTUME

A study of costume which people of various cultures have worn throughout history. Pre: 1204. (3H,3C)

#### 4124: CLOTHING BEHAVIOR PATTERNS

Study of clothing behavior of individuals in relationship to their needs, values, attitudes, interests, and self-concepts. Overview of principles and theories related to individuals' emotional, mental, and physical activities when obtaining, using, maintaining, and disposing of apparel products so as to satisfy their needs and desires. Application of principles and theories related to clothing behavior to the analysis of consumer and the development of effective merchandising strategies. Pre: 3104, PSYC 2004 or SOC 1004. (3H,3C)

#### 4214: ECONOMICS OF THE TEXTILE AND APPAREL INDUSTRY

Study of the various segments of the textile and apparel industry. Analysis of the market structure and functioning of each segment and of factors currently affecting the industry. Pre: 2204, (ECON 2006 or ECON 2006H). (3H,3C)

#### 4224: FASHION ANALYSIS AND COMMUNICATION

Analysis of factors influencing fashion change and acceptance. Application of effective promotional activities to trade, national, and retail levels of fashion merchandising. Senior standing required. Pre: 2264, MKTG 3104. (3H,3C)

#### 4234: APPAREL QUALITY EVALUATION

Study of quality of ready-to-wear apparel and factors that influence variations in the aesthetic and functional performance of the end product, including consumer perceptions and expectations, manufacturing processes and trends, and the physical components of the end product.

Pre: (1224 or 3224), (3204 or 4204). (3H,3C)

#### 4244: NEW YORK FASHION STUDY TOUR

Integrative study of methods of operating at all levels within the fashion industry. Special emphasis on design, merchandising, and promotional activities. Seminars on campus and at pre-arranged appointments during a five-day stay in New York. AHRM major; Junior standing. Twelve hours of AHRM courses required. (3H,3C)

#### 4254: TEXTILE PRODUCTION PROCESSES

Analysis of textile production processes will include focus on a particular aspect of production for each individual. Field work will be conducted at textile manufacturing plants. Pre: 4204 or 3204. (2H,3L,3C)

#### 4264: MERCHANDISING STRATEGIES

A senior capstone course providing students with experience in synthesizing and using course content learned throughout their apparel program. Includes projects in forecasting, product development and promotions as used in the apparel industry in preparing and positioning products in the market. Pre: 3104, 4234, 4224. (3H,3C)

#### 4314: DEBTOR-CREDITOR RELATIONSHIPS

Examination of legal and operational aspects of debtor-creditor relationship from the perspective of businesses and debtors. Overview of the types of credit, access to credit, factors contributing to debt problems, and alternatives available for resolution. Focus on collection processes of federal and state bankruptcy laws and regulations. (3H,3C)

#### 4324: FINANCIAL COUNSELING

Examination of debt and budgeting problems affecting families. Utilizes a problem-solving approach. Includes financial counseling strategies for coping with financial crises and becoming proactive in family financial management. (3H,3C)

#### 4404: CONSUMER PROTECTION

Analysis of the effectiveness of consumer protection efforts. Examination of government laws, regulations, and agencies at the federal, state, and local levels, as well as the effectiveness of both business and private consumer protection efforts. (3H,3C)

#### 4414: PROFESSIONALISM IN CONSUMER AFFAIRS

Roles, functions and responsibilities of consumer affairs professionals employed in business, government, and non-profit public/consumer interest organizations. Professional advocacy within employing organizations, managing consumer complaint handling systems and major consumer and career issues are analyzed. (3H,3C)

#### 4504: ADVANCED RESOURCE MANAGEMENT

Theory and principles of the systems approach to resource management. Application to family problems of special life cycle or resource situations. (3H,3C)

#### 4604: HOUSING, ENERGY AND THE ENVIRONMENT

A study of the development and management of sustainable housing, emphasizing energy and environmental resource efficiency. (3H,3C)

#### 4604H: HOUSING: ENERGY & ENVIRONMENT

Honors section (3H,3C)

#### 4624: ADVANCED KITCHEN AND BATH DESIGN

Planning, design, and evaluation of residential kitchens and bathrooms, in relation to the total house plan. Emphasis on planning principles and technical requirements with attention to functional use of the spaces to meet the needs of people. Pre: 3624, 3674. (6L,3C)

#### 4644: ADV RESIDENTIAL PROPERTY MGMT

Examination of the competencies necessary for maximizing value of residential properties through management of the asset, including detailed examination of income maximization, financial management and reporting, and ownership objectives for multifamily housing. Pre: 2676, 4964. (3H,3C)

#### 4654: ADV TOPICS HOUSE PLANNING

Advanced topics in house planning, particularly kitchen and bath design, with emphasis on independent work of portfolio quality. May be repeated for a maximum of 6 credits. Pre: 4624. (6L,3C)

#### 4664: UNIVERSAL DESIGN

Evaluation and design of commercial and residential environments with consideration for accessibility, adaptation, safety, and support of the user(s). (2H,2C)

#### 4674: MANAGING AND MARKETING HOUSING FOR LATER LIFE

Managing and marketing housing for later life, including active adult communities and assisted living facilities. Pre: (2675 or 3675), (2676 or 3676). (2H,2C)

#### 4684: MANAGING AND LEASING COMMERCIAL PROPERTIES

Examination of commercial property management considerations associated with office building, medical offices, industrial property, and shopping center space relative to leasing and negotiation, maintenance, marketing practices, and legal and fiduciary responsibilities of the property manager. Pre: 2676. (3H,3C)

#### 4694: CONTEMPORARY ISSUES IN PROPERTY MANAGEMENT

Issues affecting property management, including ethics, professional management decisions, legislative issues, and current management practices. The course culminates in the analysis of an apartment community and development of a management plan. Pre: 4694 and senior standing in the Residential Property Management option or 5964 and graduate standing. Pre: 4964 or 5964 or 4644. (3H,3C)

#### 4764: UNIVERSAL DESIGN LAB

Design of residential spaces that meet the needs of a range of users, including older adults and people with disabilities. Principles of universal design are applied to the spatial requirements and product selection for the home. Pre: 3624. Co: 4664. (2L,1C)

#### 4914: RESIDENTIAL PROPERTY MANAGEMENT STUDY TOUR

Study tour that examines trends in the multifamily housing industry focusing on marketing, management, design, and customer service. Variable credit 2 credits maximum. Pass/Fail only. Variable credit course. Co: 4694.

#### 4924: HOUSING STUDY TOUR

A study tour designed to examine the housing industry and trends in design, technology, products and processes. Junior standing required. Variable credit. May be repeated for a maximum of 6 credits Pass/Fail only. Variable credit course.

#### 4964: FIELD STUDY

Variable credit course. X-grade allowed.

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4974H: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

#### 4994H: UNDERGRADUATE RESEARCH

Variable credit course.

## Overview

The Department of Military Science provides a program of leadership development which prepares college men and women for service as officers in the United States Army. After graduation, they serve as commissioned officers on active duty, or as officers in reserve forces units.

To accomplish this, the department:

- Prepares cadets to be commissioned as Second Lieutenants through a curriculum which develops leadership and management skills, and provides opportunities to utilize these skills in a variety of practical applications.
- Provides an understanding of how to lead and influence small organizations, with a strong emphasis on personal integrity, ethical decision making, goal setting, and mission accomplishment.
- Offers adventure training, such as rappelling, land-navigation, marksmanship, and, for selected students, airborne, air assault, combat diver training and the opportunity to serve with active army units worldwide during the summer.
- In conjunction with the Virginia Tech Corps of Cadets, provides programs and experiences which increase self-confidence, self-discipline, physical stamina, poise, and other attributes essential to the development of a leader of character--one who is prepared to serve the nation or the commonwealth both in or out of uniform.

The curriculum and leader development programs of the Department of Military Science are mentally and physically challenging. Cadets learn individual soldier skills and undergo physical conditioning, beginning in the freshman year. On-campus instruction is done both in the classroom and in the field environment. Field trips expand the general knowledge of cadets and provide opportunities for practical leadership experience. Summer leadership evaluations occur between the junior and senior years at Fort Lewis, Washington.

Army ROTC offers the conventional four-year program where a student enters as a freshman. A three-year program for sophomores is also available. Additionally, a two-year program is offered for juniors and graduate students. Placement credit may be awarded to students with ROTC or JROTC experience, students currently serving in the Army Reserve or National Guard, those who have had active military service, or those who volunteer for summer training at Fort Knox, Kentucky.

Cadets enrolled in the junior and senior years of ROTC are paid a tax-free stipend of \$450.00 for ten months during their junior year and \$500 for ten months during their senior year for a total of \$9,500.00. Applications for these scholarships are available on-line at [www.armyrotc.com](http://www.armyrotc.com).

Membership in the Virginia Tech Corps of Cadets is a pre-requisite for all ROTC classes. The cost of cadet uniforms is paid by a special Army uniform allowance provided to each enrolled cadet.

## Minor in Leadership Studies

Satisfactory completion of the 20-credit military science curriculum may qualify each cadet for a minor in leadership studies. Virginia Tech is the first land-grant university in the nation to recognize the military science curricula with the award of a leadership studies minor. Contact the Center for Leader Development, 540/231-7136, for information on how to apply for the minor in leadership studies.

## **Undergraduate Courses (MS)**

### **1005,1006: MS I, AROTC**

First year of military science. 1005: Introduction to ROTC. Roles and mission of the Army, including the Army National Guard and Army Reserve. Army customs and traditions. Introduction to drill ceremony, basic first aid, physical training and land navigation. Required participation: leadership lab, physical training and field training exercises. 1006: Basic military skills training. Introduction to marksmanship, small unit tactics and leadership. Required participation: leadership lab, physical training and weekend field training exercises. I (1H,2L,2C)

### **2005,2006: MS II, AROTC**

Second year of military science. 2005: Apply ethics-based leadership skills. Oral presentations, writing concisely, basic military tactics, advanced first aid and land navigation. Required participation; leadership lab, physical training, weekend field exercises. 2006: Team and small unit operations to include radio communications, safety assessments, movement techniques. Required participation: leadership lab and weekend field training exercises. I Pre: 1005, 1006. (1H,2L,2C)

### **2974: INDEPENDENT STUDY**

Variable credit course.

### **2984: SPECIAL STUDY**

Variable credit course.

### **3005,3006: MS III, AROTC**

Third year of military science. 3005: Analysis of the leadership role in directing and coordinating offensive and defensive tactical operations. Introduction to military training management. Practical exercises in land navigation and small unit tactics. 3006: Classroom and practical exercises to prepare cadets for Advanced Camp: emphasis on weapons qualification, physical fitness, leadership techniques, and small unit operations. Practical exercises to enhance oral and written skills. I Pre: 1005, 1006, 2005, 2006. (3H,2L,3C)

### **4005,4006: MS IV, AROTC**

Fourth year of military science. 4005: The role of the military profession in today's society. Ethical dimensions of military decision-making. Introduction to methods of instruction, the conduct of briefings, how to structure and conduct meetings, performance and disciplinary counseling. 4006: Introduction to logistics, personnel management, the Army finance and accounting system, the role of the lieutenant in unit administration and military justice. The military aspect of world geography. Current events and their relevance to the military profession. I Pre: 3005, 3006. (3H,2L,3C)

### **4964: FIELD STUDY**

Pass/Fail only. Variable credit course.

### **4974: INDEPENDENT STUDY**

Variable credit course.

### **4984: SPECIAL STUDY**

Variable credit course.

## The Center for 21st Century Studies

Director Robert Siegle

- [Overview](#)
  - [Undergraduate Courses](#)
- 

## Overview

The Center for 21st Century Studies is a transdisciplinary program housed in Virginia Tech's College of Liberal Arts and Human Sciences. Dedicated to the undergraduate teaching mission of the university, the Center consists of a network of affiliated faculty who participate in its teaching, travel, and events. The program significantly subsidizes the travel costs associated with the program thanks to the generous support of our donors.

## Undergraduate Courses (C21S)

### 2104: INTRODUCTION TO TWENTY-FIRST CENTURY STUDIES

An introduction to issues and resources in 21st century studies: the interaction of tradition and modernity as it plays out in human and economic development, levels of governance from local to global, social forms (gender, family, class, nation, ethnicities, human rights), and cultural forms (art, changing mores, media, religion, technology, the built environment); the art, ideas, and issues of the 21st century. (3H,3C)

### 2984: SPECIAL STUDY

Variable credit course.

### 3954: STUDY ABROAD

Variable credit course.

### 4004: CAPSTONE SEMINAR

Capstone research/project seminar for the minor in C21S. Research skills, engagement with the most recent scholarship and other cultural responses to 21st century issues, presentation, and dissemination. Pre: 3954 with at least a C grade (3H, 3C). Pre: 3954. (3H,3C)

## Overview

The major in communication, leading to a B.A., allows students to develop a broad understanding of the discipline and specific expertise in either public communication or mass communication. The Department of Communication focuses on strategic, theoretical, and practical application of message creation, delivery, analysis, and criticism in cultural and historical contexts.

Communication majors are prepared to continue their studies in graduate school or immediately apply their skills in various professional settings because of the broad applicability of both the theory to which they are exposed and the competencies they develop. Rooted in a strong liberal arts curriculum, this course of study prepares students to enter careers in mass media, business, public service, government, or professional specializations, such as law.

## Options

Students choose one of three options in COMM in order to specialize in the discipline. Two options involve the study of public communication: Public Relations and Communication Studies. The other option involves the study of multimedia communication: Electronic and Print Journalism.

**Public Relations** –This option emphasizes both skill and management functions of public relations through theoretical and practical applications. Public relations spans media, organizational, corporate, and political contexts and includes investigation and analysis of public relations situations (e.g., crises, successes), message production and campaign planning, writing and presentation, and evaluation of public relations strategies. Public relations permeates many areas of corporate, non-profit, and political careers, so this option provides students a foundation for many different career paths.

**Electronic and Print Journalism (Multimedia)** -- This option prepares students for news media careers in newspapers, magazines, broadcasting and new media. The lines that separate these specialties are blurring as media convergence becomes more nearly the norm. Courses provide both practical skills and theory as they address history, law and ethics, current controversies and opportunities in the changing news media.

**Communication Studies** -- This option is designed to provide students with a broad overview of communication theories and practices, stressing understanding and effective participation in communication across interpersonal, organizational, and public contexts. For students interested in fields such as politics, law, education, business, ministry, or medicine, the Communication Studies option could be especially appealing because of its analytical and critical approach to communication.

Please see [www.comm.vt.edu/](http://www.comm.vt.edu/) for more information.

## Major Requirements

Along with University and College requirements, including CLE and foreign language, majors must complete 42 hours in Communication.

The curriculum is designed to provide foundational experiences, development courses, advanced study, and a capstone experience. Students are introduced to concepts early in the undergraduate career, and the curriculum allows them to build knowledge and skills as they work on increasingly complex tasks. They also develop skills in written, spoken, and visual communication across their studies in the major. At the foundational level, students in every option are required to take the same introductory courses. Then students move into one of three options, and later they come back together in the senior year to work on a capstone experience. Information below reflects courses on the 2012-2013 checksheet:

### Public Relations:

1. Foundation: COMM 1014, COMM 1015, COMM 1016
2. Development: Varies by option; see checksheet
3. Advanced Study: Varies by option; see checksheet
4. Capstone: Choose 1: COMM 4214, 4224, 4244, 4254, 4304, 4344

### Electronic and Print Journalism:

1. Foundation: COMM 1014, COMM 1015, COMM 1016
2. Development: Varies by option; see checksheet
3. Advanced Study: Varies by option; see checksheet
4. Capstone: Choose 1: COMM 4214, 4224, 4244, 4254, 4304, 4344

### Communication Studies:

1. Foundation: COMM 1014, COMM 1015, COMM 1016
2. Development: Varies by option; see checksheet
3. Advanced Study: Varies by option; see checksheet
4. Capstone: Choose 1: COMM 4214, 4224, 4244, 4254, 4304, 4344

## Satisfactory Progress Toward the Degree

University policy requires that students demonstrate their progress toward the degree by meeting minimum requirements. A student will be certified as making satisfactory progress towards a degree by meeting the following requirements:

1. Option: Declared no later than the semester during which the 45th hour (overall) is completed
2. Courses: COMM 1014 (minimum grade of C); COMM 2124 by end of semester in which the 60th hour is attempted
3. Overall GPA: 2.0 by the time 45 hours have been attempted; 3.0 for students double-majoring with COMM secondary
4. COMM GPA: 2.0 or better by the semester the 75th hour is completed

Students who fall below the standard for either the overall GPA or the COMM GPA will have one semester to regain the required GPA standards. A student who fails to make satisfactory progress toward degree after that semester will be blocked from continuing in the Communication major.

## Freshmen and External Transfers into Communication

Incoming freshmen and students enrolled at other institutions should follow directions for application as shown on the Admissions website: [www.admiss.vt.edu](http://www.admiss.vt.edu).

## Internal Transfers into Communication

Students enrolled in other Virginia Tech majors who wish to transfer into Communication must submit an application. Information is available at the Department website: [www.comm.vt.edu](http://www.comm.vt.edu)

## Undergraduate Courses (COMM)

### 1014: INTRODUCTION TO COMMUNICATION STUDIES

Survey of the field of communication studies from the interpersonal to the mass communication levels; emphasis on development of theories and concepts, social contexts, and message analysis. (3H,3C)

### 1015-1016: COMMUNICATION SKILLS

Introduction to oral and written communication. 1015: Focus on oral and written communication in interpersonal, small group, and public contexts.

Special emphasis on the writing process, listening, interviewing, conflict resolution, critical analysis, and communication through electronic media. 1016: Continued Study in written and oral communication skills for small group and public contexts. Focus on practical applications in research and information gathering, audience analysis and adaptation, message development, and oral and written presentations. May not receive credit for both 1015-1016 and 2004. (3H,3C)

#### 2004: PUBLIC SPEAKING

Basic skills of public speaking; speech organization and delivery; emphasis on audience-centered delivery of speeches. Credit may not be earned for both Comm 2004 and COMM 1016. (3H,3C)

#### 2014: SPEECH COMMUNICATION

Introductory study of communication messages across various types, including intrapersonal, interpersonal, small group and public. Credit may not be earned for both 1015 and 2014. (3H,3C)

#### 2024: MEDIA WRITING

Writing and information gathering skills including news, features, press releases, and advertising copy for broadcast, print and public relations media. This is a writing intensive (WI) course. Pre: 1014. (3H,3C)

#### 2034: VISUAL MEDIA

An introduction to the visual image and visual thinking applied to photography, video, and film. Sophomore standing required. Pre: 1014. (3H,3C)

#### 2044: PRINCIPLES OF PUBLIC RELATIONS

Principles of public relations practice; public relations in organizations; responsibilities of the public relations practitioner; legal and ethical considerations; role of public relations in society. Sophomore standing required. Pre: 1014. (3H,3C)

#### 2054 (TA 2054): INTRODUCTION TO FILM

Introduction to film as a medium for artistic communication. Sophomore standing required. X-grade allowed. (2H,3L,3C)

#### 2064: THE RHETORICAL TRADITION

Great theories of rhetoric developed throughout the world during the past 2,500 years will be analyzed to demonstrate the dynamic, critical nature of persuasive thought. (3H,3C)

#### 2084: MEDIA INSTITUTIONS

Historical development, current industrial structure, and recent trends of different media institutions including print, film and electronic media. Emphasis on how economic incentives influence media content and the interconnections between media institutions. (3H,3C)

#### 2094: COMM INTERNET & SOCIETY

This course examines the Internet as an emerging mass communication medium and its potential impact on society. Topics to be discussed include computer-mediated communication, emergence of on-line community, privacy in the information age, copyright, freedom of speech, antitrust, and electronic commerce. Students will also learn basic technical concepts of the Internet and software skills to create a web site. Pre: 1014. (3H,3C)

#### 2104 (AINS 2104) (HUM 2104): ORAL TRADITIONS AND CULTURE

Examination of the world's great oral traditions, both ancient and contemporary. Emphasis on performance contexts, relationships among multicultural traditions, including American Indian oral traditions, and the relationships among orality, literacy, technology, media, and culture. I (3H,3C)

#### 2124: INTRODUCTION TO COMMUNICATION RESEARCH

Study of approaches to research in the discipline, including identification and analysis of existing research; procedures for conducting and reporting basic research in communication. Pre: 1014, (1016 or ENGL 1106). (3H,3C)

#### 2964: FIELD STUDY

Pass/Fail only. Variable credit course.

#### 2974H: INDEPENDENT STUDY

Honors section.

Variable credit course.

#### 2984: SPECIAL STUDY

Variable credit course.

#### 3024: MASS MEDIA HISTORY

History of the development of mass media from early writing systems through new technologies; emphasis on print and broadcast media in the United States. Pre: 1014. (3H,3C)

#### 3034 (HUM 3034): THEORIES OF POPULAR CULTURE

Relationship of popular culture to communication; ways to classify, analyze, and evaluate popular culture; history of main themes with emphasis on the United States; cultural evolution of the electronic revolution. Junior standing required. I (3H,3C)

#### 3044: ORAL COMMUNICATION CENTER PRACTICUM

Focus on peer pedagogy in a communication center to support development of oral communication competence among students across disciplines. Emphasis on oral communication theory applied to one-on-one support for students' oral presentations. May repeat 1 time. Pre: 1016 or 2004. (1H,1C)

**3054: AMERICAN FILM GENRES**

Close visual and cultural study of classic film genres. Emphasis is on the cinematic codes and narrative conventions which unify the genre and which are found in representative films. Exploration of genre films as symbols of American culture and society. Genres studied include the Western, the musical and the detective film. Pre: 2054. (3H,3C)

**3064: PERSUASION**

Theoretical foundations of persuasion; techniques of persuasion; contemporary persuasive practice and campaigns; persuasive media strategies. Junior standing required. Pre: 1016 or ENGL 1106. (3H,3C)

**3104: VIDEO PRODUCTION: FIELD**

Basic elements, theories, and practices of video productions, including photography and editing. Students will develop skills in production through operation of portable field equipment and computer editing systems. Junior standing. Pre: 2034. (2H,3L,3C)

**3114: VIDEO PRODUCTION: STUDIO**

Producing, directing, and writing live video segments; operating control room and studio equipment including studio camera, video switcher, audio board and the creation of video graphics and written packages. Pre: (3104 or 3184), 3174. (2H,3L,3C)

**3124: INTERPERSONAL COMMUNICATION**

Basic theories and processes of person-to-person communication; interpersonal perception; verbal and nonverbal communication; establishment of relationships in the family and work situation. Junior standing required. (3H,3C)

**3134: PUBLIC ADVOCACY**

Practical reasoning and argumentation about questions of community significance, emphasizing critical thought, rhetorical strategies, and advocacy. Junior standing required. Pre: 2004 or 1016. (3H,3C)

**3144: WRITING AND EDITING FOR PUBLIC RELATIONS**

Advanced writing and editing skills related to the preparation of press releases, feature articles, brochures, newsletters, fund-raising letters, annual reports, and webpages. Pre: Junior standing. Pre: 2024. (3H,3C)

**3154: MULTIMEDIA REPORTING**

Multimedia news gathering, news writing, visual content, and news judgment for print and online media. Pre: 2024, 2034. (2H,2L,3C)

**3164: GROUP PROCESSES AND PRESENTATIONS**

Study of group theory and its application to a group project, including team dynamics and leadership, conflict resolution, project management, and team presentation strategies. (1H,1C)

**3174: ADVANCED MULTIMEDIA REPORTING**

Multimedia gathering and writing of complex news, features, and documentary; visual content and news judgment for television, print and online media; techniques of broadcast interviewing. Pre: 3154. (2H,3L,3C)

**3204 (HUM 3204): MULTICULTURAL COMMUNICATION**

Exploration of communication in various cultural groups through the medium of performance. Emphasis on understanding cultural differences and similarities in styles of communication, aesthetics, worldviews, and values. (3H,3C)

**3244 (PSCI 3244): POLITICAL COMMUNICATION**

Distribution of political information; elite-mass communication; alternative models of political communication; communication and telecommunications policy. Pre: PSCI 1014 or PSCI 1024. (3H,3C)

**3544 (ENGL 3544): LITERATURE AND CINEMA**

Works of literature and the films into which they have been transformed; emphasis on differences between media. (3H,3C)

**3954: STUDY ABROAD**

Variable credit course. X-grade allowed.

**3984: SPECIAL STUDY**

Variable credit course.

**4014: MEDIA EFFECTS**

Impact of mass media on individuals and on society; methods for documentation of media effects; research about effects on various demographic groups such as children, elderly, and minorities; effects of advertising; effects of interactive and time shift technologies. Senior standing required. (3H,3C)

**4024: COMMUNICATIONS LAW AND ETHICS**

Freedom of speech and press; how this freedom is limited in such areas as libel, privacy, copyright, contempt, free press/fair trial, judicial gag orders, reporters' shield laws; related ethical areas. Senior standing required. (3H,3C)

**4034 (HUM 4034): FUNCTIONS OF POPULAR CULTURE**

Popular culture as a humanistic discipline; emphasis on archetypes, formulas, and genres; the function of ideas, images, and icons on the popular imagination. Senior standing required. (3H,3C)

**4044 (IS 4044): INTERNATIONAL COMMUNICATION**

Comparative perspectives on global communication systems; problems with the flow of information; roles of international organizations; mass

communication and national development; implications for conflict resolution; selected case studies. Senior standing required. (3H,3C)

#### 4054: PUBLIC RELATIONS CASE STUDIES

Case studies applying public relations principles. Senior standing required. Pre: 2044. (3H,3C)

#### 4074: ORGANIZATIONAL COMMUNICATION

Role of communication in complex organizations; communication networks, communication and management, message systems, decision-making; relationships between organizational theory and communication. Senior standing required. (3H,3C)

#### 4084: CINEMA HISTORY

Aesthetic, economic, social, and technological history of world cinema; film theory as it relates to the history of cinema. Junior standing required. Pre: 2054. (2H,3L,3C)

#### 4094: BROADCAST MANAGEMENT

Broadcast management procedures; programming; sales and advertising. Senior standing required. Pre: 3184. (3H,3C)

#### 4114: PHOTOJOURNALISM

Interpretive and creative photography applied to journalism; cameras, films, photography techniques; history of photography as communication; advanced darkroom techniques. Junior standing required. Pre: 2034. (3H,3C)

#### 4124: ADVANCED REPORTING

Gathering and writing complex news and interpretative stories; emphasis on covering courts, governmental agencies, economic issues, consumer issues, and environmental issues; use of sources including human and data-base. Pre: 3154. (3H,3C)

#### 4134: EDITORIAL WRITING

Development and function of the editorial page; writing of editorials, reviews, and personal columns; examination of role of letters and syndicated columns and cartoons; problems editorial writers face in their jobs and communities. Junior standing required. (3H,3C)

#### 4144: MAGAZINE WRITING

The writing of feature material (as opposed to the reporting of hard news), plus detailed examination of several article types from a wide variety of contemporary magazines and newspapers. Junior standing required. Pre: 2024. (3H,3C)

#### 4154: DIGITAL NEWSROOM

Production of news. Practice of writing news stories, gathering news and visual content, performing for broadcast, and producing content for multiple media platforms. Pre: 3174. (1H,6L,3C)

#### 4204: COMMUNICATION INTERNSHIP

Placement in a communication industry for practical internship under supervision by a departmental advisor and a professional in the field. May be repeated for credit up to a maximum of 6 hours credit. Junior standing and consent required. Pass/Fail only. Variable credit course.

#### 4214: TOPICS IN COMMUNICATION RESEARCH

Selected topics in communication research. Offered on demand. Senior standing or consent required. (3H,3C)

#### 4224: TOPICS IN MEDIA CRITICISM

Selected topics in media criticism. Offered on demand. Senior standing and consent required. (3H,3C)

#### 4244: TOPICS IN PUBLIC COMMUNICATION

Selected topics in public communication. Offered on demand. Senior standing and consent required. May be repeated with a different topic focus, up to a maximum of 6 credit hours. (3H,3C)

#### 4254: TOPICS IN MEDIA WRITING

Selected topics in media writing; emphasis on critical analysis and writing. Senior standing required. (3H,3C)

#### 4294: WRITING/DIRECTING DIGIT CINEMA

Advanced course in digital cinema production exploring the practice of writing, producing, and directing dramatic motion pictures. Pre: 3194. (2H,2L,3C)

#### 4304: COMMUNICATION CAMPAIGNS

Selected topics in communication campaigns; emphasis on application of theory in campaign contexts. Senior standing required. Pre: 2044 or 3064. Co: 3164. (3H,3C)

#### 4344 (TA 4344): ADVANCED TOPICS IN FILM STUDIES

Selected topics in advanced film studies; emphasis on critical analysis and application. May be repeated for credit up to a maximum of 6 credit hours with different content. Pre: 2054. (3H,1L,3C)

#### 4354 (TA 4354): THE FILM DIRECTOR

Close thematic and visual analysis of the films of a single director. Directorial style assessed in terms of recurring visual and thematic patterns. Development and evolution of the director's style, and comparison with filmmakers whose work lacks a unifying "signature." Pre: 2054. (3H,3C)

#### 4364: ISSUE MANAGEMENT IN PUBLIC RELATIONS

Principles of issue management: creation, development, and resolution; role of rhetoric in public policy processes; legal constraints; strategies;

social responsibility. Pre: 2044. (3H,3C)

**4374: NEW COMMUNICATIONS TECHNOLOGY**

Identify recent trends in the innovation of new communications technologies; storage, transmission, and display systems of mediated communication: optical disc, common carriers, telecommunication-computer linkages, high-definition TV, and virtual reality; information industries and society; markets for new and existing telecommunication services. Junior or senior standing required. Pre: 2084 or 4014. (3H,3C)

**4384: CRITICISM OF PUBLIC COMMUNICATION**

Study of rhetorical research method as systematic approach to the analysis, interpretation, and evaluation of public communication texts including speeches, film, and advertisements. Pre: 2064. (3H,3C)

**4394 (TA 4394): ADVANCED CINEMA PRODUCTION**

Advanced cinema course in motion picture lighting, editing theories and digital post-production techniques. Pre: 3194. (2H,2L,3C)

**4964: FIELD STUDY**

Pass/Fail only. Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4974H: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

**4994H: UNDERGRADUATE RESEARCH**

Variable credit course.

## Overview

The curriculum in English offers excellent preparation for students who seek careers in business, government, and non-profit organizations, who are preparing for graduate or professional schools, who plan to teach, and who are seeking careers that involve writing.

## The English Major

The major in English is composed of an in-major core of 24 hours and a number of upper-division options ranging from 27 to 33 hours (including 3-15 hours of English electives).

After completion of the in-major core, the English major offers three options for specialization: Literature, Language, and Culture, Professional Writing, and Creative Writing. Students who choose the Literature, Language, and Culture option will select one of the following tracks: Literature, Pre-Education, or Pre-Law.

### The In-Major Core:

All English majors must take 24 hours distributed as follows.

- 5 hours: Foundational Work. Introduction to Critical Reading (2604) and The English Studies ePortfolio (2614). The two courses, the gateway course to the major and its co-requisite course, should be taken in the same semester immediately after satisfaction of the

- first-year writing requirement
- o 12 hours: Literary Traditions. Survey of British Literature (2515, 2516), Shakespeare (4165 or 4166), and Survey of American Literature (2525 or 2526)
- o 3 hours: Global Literacy. Study Abroad (3954), Literature and Ecology (3534), or Postcolonial Literature (3644)
- o 4 hours: Capstone Experience. Advanced Creative Writing: Fiction (4704); Advanced Creative Writing: Poetry (4714); Senior Seminar (4784); or Issues in Professional and Public Discourse (4874); and Senior Portfolio Development in Creative Writing (4734); Senior Portfolio Development in Literature, Language, and Culture (4774); or Senior Portfolio Development in Professional Writing (4864).

## Upper-Division Options

In order to enroll in an upper-division option, a student must:

- o Pass 2604 with a minimum grade of C.
- o Complete 12 of the 17 hours in the in-major core with a GPA of 2.0 or better.

## Literature, Language, and Culture Option

The Literature, Language, and Culture (LLC) Option of the major is aimed at those students who are interested in the study of literature and language and their many contexts and who want to pursue careers in such areas as the law, business, government, publishing, advertising, social services, and education. There are three different tracks in the LLC Option: the Literature Track, the Pre-Education Track, and the Pre-Law Track.

We have known for centuries that the study of literature, language, and culture is matchless in preparing students for a lifetime of reading, analysis, self-discovery, and self-expression. Each of the three LLC choices grounds students in the sophisticated thought and analysis of literary studies, then focuses them upon a track that will take them more deeply into literary studies or into the specific preparations for careers in education or law. In addition to the in-major core requirements (24 hours), each track has its own unique emphasis and requirements.

[TOP](#)

## The Literature Track

This choice allows students the maximum of time devoted to the various periods, genres, themes, major figures, and practices distinctive to region, ethnicity, or gender; students will not only finish their degrees with a rich sense of the best that has been thought and said, but they will also be skilled in the art of analyzing any text or body of data and in presenting their analyses persuasively and insightfully.

The B.A. in English, LLC Option/Literature Track, requires 28 hours in English beyond the in-major core; these 28 hours are distributed as following: to fulfill the period or author requirements detailed below, the student must take one of the following courses which cover pre-1800 literature: 3204, 3214, 3224, 4114, 4124, 4214, 4554, or an appropriate section of 3254:

- o 3 hours: A backgrounds course chosen from the following: Ancient Greek & Roman Mythology (CLA 2444); Literary and Cultural Criticism (3354); The Bible As Literature (3584); Hebrew Bible/Old Testament (REL 2414); New Testament (REL 2424).
- o 3 hours: A period course chosen from the following: Medieval Literature (3204); Renaissance Literature (3214); Augustan Literature (3224); Romantic Literature (3234); Victorian Literature (3244); American Literature before 1900 (3254); Modernist British Literature (3264); Modernist American Literature (3274); Introduction to Old English (4124); British Drama Before 1800 (4554).
- o 3 hours: An author course chosen from the following: Chaucer (4114); Shakespeare I (4165); Shakespeare II (4166); Milton (4214); Studies in a British Author after 1800 (4624); Studies in an American Author before 1900 (4634); Studies in an American Author after 1900 (4644). The Shakespeare course taken for the in-major core cannot also satisfy the author requirement.
- o 3 hours: A course in prose narrative chosen from the following: English Novel I (4405); English Novel II (4406); American Narrative to 1950, I (4415); American Narrative to 1950, II (4416); Contemporary Fiction (4664).
- o 3 hours: A course in non-canonical literature chosen from the following: Topics in Literature by Women (3364); Literature for Children (3524); Ethnic Literature for Children (3514); African-American Literature (3634); Postcolonial Cultural Studies (3644); Ethnic American Literature (3654).
- o 1 hour: A Career Planning Course: Professional Seminar (LAHS 3004)
- o 12 hours: Four English elective courses; at least six hours must be at the 4000-level, and no more than three hours can be below the 3000-level.
- o Other Requirement: Completion of the ePortfolio.

For more information, please consult the LLC web pages (<http://www.english.vt.edu/undergraduate/LLC>).

## The Pre-Education Track

This track will provide students with a thorough grounding in canonical American and British literature and hone their skills in literary analysis, but it will also ensure that they become conversant with content areas required by the Virginia state licensing board: literature written by minorities and women, linguistics, and world literature. Pursuit of this track is the best possible way to prepare for the graduate work leading to certification.

The B.A. in English, LLC Option/Pre-Education Track, requires 30 hours in English beyond the in-major core. Those 30 hours are distributed as follows:

- 3 hours: A period or author course chosen from among the following: Medieval Literature (3204); Renaissance Literature (3214); Augustan Literature (3224); Romantic Literature (3234); Victorian Literature (3244); American Literature before 1900 (3254); Modernist British Literature (3264); Modernist American Literature (3274); Introduction to Old English (4124); British Drama Before 1800 (4554); Chaucer (4114); Shakespeare I (4165); Shakespeare II (4166); Milton (4214); Studies in a British Author after 1800 (4624); Studies in an American Author before 1900 (4634); Studies in an American Author after 1900 (4644). The Shakespeare course taken for the in-major core cannot also satisfy this requirement.
- 3 hours: A 3000–4000-level course in women's literature chosen from among the following: Topics in Literature by Women (3364); an appropriate section of British Author after 1800 (4624); an appropriate section of American Author before 1900 (4634); an appropriate section of American Author after 1900 (4644)
- 3 hours: A 3000–4000 level course in literature by a minority chosen from among the following: African-American Literature (3634); Ethnic Literature for Children (3514); Ethnic American Literature (3654); an appropriate section of British Author after 1800 (4624); an appropriate section of American Author before 1900 (4634); an appropriate section of American Author after 1900 (4644)
- 3 hours: A 3000 or 4000-level writing course chosen from among the following: Introduction to Professional Writing (3104); Advanced Composition (3754); Technical Writing (3764); Business Writing (3774); Science Writing (4824)
- 12 hours: Contemporary Approaches to Linguistics (4065–4066), Language and Society (4044), and History of the English Language (4054), English Syntax (4074) or Working Grammar (3314)
- Other Requirement: Completion of the ePortfolio
- 6 hours: Two English elective courses (6 hours) at the 4000 level.

In addition to these specific course requirements, LLC/Pre-Education majors who plan careers in elementary or middle school education should consider using their electives to take the following courses: Introduction to World Literature (1644); Literature for Children (3524) and English Syntax (4074).

For more information, please consult the LLC web pages (<http://www.english.vt.edu/undergraduate/LLC>).

[TOP](#)

## The Pre-Law Track

This choice is the ideal preparation for the study and practice of the field of law; students will finish their degree with significant advantages as readers and analysts of the law archives that they must master in their graduate training, and also as masters of the art of presentation in the briefs and oral presentations that constitute the bulk of a legal career.

The B.A. in English, LLC Option/Pre-Law Track, requires 28 hours in English beyond the in-major core. The 28 hours are distributed as follows:

- 3 hours: A period course chosen from the following: Introduction to Old English (4124); Medieval Literature (3204); Renaissance Literature (3214); British Drama Before 1800 (4554); Augustan Literature (3224); Romantic Literature (3234); Victorian Literature (3244); American Literature before 1900 (3254); Modernist British Literature (3264); Modernist American Literature (3274).
- 3 hours: Literature and the Law (3684)
- 3 hours: A 3000–4000 level writing course chosen from among the following: Professional Writing (3104); Advanced Composition (3754); Technical Writing (3764); Business Writing (3774); Science Writing (4824)
- 3 hours: An author course chosen from the following: Chaucer (4114); Shakespeare I (4165); Shakespeare II (4166); Milton (4214); British Author after 1800 (4624); American Author before 1900 (4634); American Author after 1900 (4644). The Shakespeare course taken for the in-major core cannot also satisfy the author requirement.
- 3 hours: A course in prose narrative chosen from the following: English Novel I (4405); English Novel II (4406); American Narrative to 1950, I (4415); American Narrative to 1950, II (4416); Contemporary Fiction (4664)
- 3 hours: A course in non-canonical literature chosen from the following: Topics in Literature by Women (3364); Ethnic Literature for Children (3514); Literature for Children (3524); African-American Literature (3634); Postcolonial Cultural Studies (3644); Ethnic American Literature (3654).
- 1 hour: A Career Planning Course: Professional Seminar (LAHS 3004)
- Other Requirement: Completion of the ePortfolio
- 9 hours: Three English elective courses; at least six hours must be at the 4000 level, and no more than three hours can be below the 3000 level.

For more information, please consult the LLC web pages (<http://www.english.vt.edu/undergraduate/LLC>).

## Professional Writing Option

The Professional Writing (PW) Option of the major is aimed at those students who want to make writing a career. Students combine coursework on the methods, forms, and issues of workplace writing with practical experience, usually in the form of client or service-learning projects with non-profit organizations. As a result, students begin their careers with the writing skills needed to succeed in today's competitive market, an understanding of professional expectations, experience with current software packages, and a portfolio of real-world writing samples.

The B.A. in English, PW Option, requires 50 hours. The 27 hours in English beyond the in-major core are distributed as follows:

- o 3 hours: Professional Writing (3104).
- o 3 hours: Technical Editing and Style (3804).
- o 3 hours: A course in linguistics chosen from the following: Working English Grammar (3314); Language and Society (4044); History of the English Language (4054); English Syntax (4074)
- o 12 hours: At least 6 hours at 4000-level: Professional Writing electives chosen from the following: Creating User Documentation (3814); Designing Documents for Print (3824); Intercultural Issues in Professional Writing (3834); Grant Proposals and Reports (4804); Writing for the Web (4814); Science Writing (4824); Internship [Professional Writing Focus] (4964). ENGL 3104 and 3804 are pre-requisites for all PW electives except 4824, Science Writing.
- o 6 hours: Two English elective courses from 3000-4000 level courses.
- o Other Requirement: Completion of the ePortfolio.

For more information, please consult the Professional Writing web pages (<http://www.english.vt.edu/undergraduate/PW/>).

## Creative Writing Option

The Creative Writing (CW) Option of the major is aimed at those students who want to pursue a career as a writer of poetry, fiction, creative non-fiction, or drama. Admission to a Master of Fine Arts (M.F.A.) program is typically based upon writing samples, recommendations, academic history, and--increasingly--publications; therefore, students interested in pursuing the M.F.A. should concentrate upon developing an excellent portfolio of poetry, fiction, creative non-fiction, and/or drama. Students interested in M.A. or Ph.D. programs in creative writing, as well as those who plan to enter the fields of publishing and/or editing, should also follow these guidelines. In addition to courses in creative writing, students are well advised to take a range of courses in literature, particularly those in their primary genre(s), in order to familiarize themselves with major writers and literary traditions.

The B.A. in English, CW Option, requires 56 hours. The 33 hours in English beyond the in-major core are distributed as follows:

- o 3 hours: Introduction to Creative Writing (2744).
- o 3 hours: Creative Writing: Fiction (3704).
- o 3 hours: Creative Writing: Poetry (3714).
- o 3 hours: A 3000-4000 level Creative Writing elective chosen from the following: Playwriting I (3315); Playwriting II (3316); Creative Writing: Creative Non-Fiction (3724); Creative Writing: Fiction for Young People (4724).
- o 3 hours: A course in modern or contemporary literature chosen from the following: Modern Poetry (4504); Contemporary Poetry (4514); Modern Drama (4564); Contemporary Fiction (4664).
- o Other Requirement: Completion of the ePortfolio.
- o 15 hours: Five English elective courses; at least six hours must be at the 4000 level, and no more than three hours can be below the 3000 level. These electives may include 3704, 3714, and 3724, which may each be repeated twice for a total of nine hours. Note that Advanced Creative Writing: Fiction (4704) and Advanced Creative Writing: Poetry (4714) may not be repeated for credit.

For more information, please consult the Creative Writing web pages (<http://www.english.vt.edu/undergraduate/cw/index.html>).

## Minors in English

The department offers four minors in English. Students who want further information or advice about minoring in English should consult the Coordinator of Undergraduate Advising in Shanks Hall 329.

## Minor in English--Literature, Language, and Culture

The Minor in Literature requires 21 hours distributed as follows:

- o 3 hours: A course in writing chosen from the following: Introduction to Creative Writing (2744); Literature and Ecology (3534);

Advanced Composition (3754); Technical Writing (3764); Business Writing (3774).

- 3 hours: A period course chosen from the following: Medieval Literature (3204); Renaissance Literature (3214); Augustan Literature (3224); Romantic Literature (3234); Victorian Literature (3244); American Literature before 1900 (3254); Modernist British Literature (3264); Modernist American Literature (3274); Introduction to Old English (4124).
- 3 hours: An author course chosen from the following: Chaucer (4114); Shakespeare I (4165); Shakespeare II (4166); Milton (4214); British Author after 1800 (4624); American Author before 1900 (4634); American Author after 1900 (4644).
- 12 hours: Four English elective courses; no more than three hours can be below the 2000 level.

[TOP](#)

## Minor in English - Language Studies

The Minor in Language Sciences requires 18 hours distributed as follows:

- 6 hours: Contemporary Approaches to Linguistics (4065-4066)
- 3 hours: Language and Society (4044)
- 3 hours: History of the English Language (4054)
- 3 hours: English Syntax (4074)
- 3 hours: One elective course, chosen from among Languages of Native America (3304); Linguistic Discourse Analysis (4004); Topics in Linguistics (4084); Introduction to Hispanic Linguistics (SPAN 3494); Topics in German Language, Life, and Culture: History of the German Language (GER 4334); or an Independent Study (4974) with appropriate language content.

## Minor in English--Professional Writing

The Minor in Professional Writing requires 18 hours distributed as follows:

- 3 hours: Professional Writing (3104).
- 3 hours: Technical Editing and Style (3804)
- 12 hours: Four Professional Writing electives chosen from the following: Creating User Documentation (3814); Designing Documents for Print (3824); Intercultural Issues in Professional Writing (3834); Grant Proposal and Reports (4804); Writing for the Web (4814); Science Writing (4824); Internship (4964, Professional writing focus). ENGL 3104 (or substitute) and 3804 are pre-requisites for all Professional Writing electives except 4824.

## Minor in English--Creative Writing

The Minor in Creative Writing requires 21 hours distributed as follows:

- 3 hours in the required introductory course: Introduction to Creative Writing (2744)
- 3 hours: A literary survey course chosen from the following: Survey of British Literature (2516); Survey of American Literature (2526).
- 12 hours: Four Creative Writing electives chosen from the following: Playwriting (3315); Playwriting (3316); Creative Writing: Fiction (3704); Creative Writing: Poetry (3714); Creative Writing: Creative Non-Fiction (3724); Creative Writing: Fiction for Young People (4724).
- 3 hours: One course in literature chosen from the following: Literature for Children (3524); Literature and Ecology (3534); Literature and Film (3544); Bible as Literature (3584); Southern Literature (3614); Appalachian Literature (3624); African-American Literature (3634); Contemporary Poetry (4515); Contemporary Fiction (4664).

A GPA of 2.0 or better calculated on the basis of all courses comprising the minor in Creative Writing is required for graduation. 1105, 1106, and H1204 do not count toward satisfaction of the minor.

[TOP](#)

## Post-Graduate Study

Undergraduate majors interested in pursuing advanced degrees (M.A., M.F.A., or Ph.D.) in English should, with the assistance of their professors and academic advisors, carefully plan their programs of study. It is generally a good idea to take a variety of courses and to fulfill requirements and electives with as many 3000- and 4000-level courses as possible. It is strongly recommended that students planning to undertake post-graduate study acquire a good reading knowledge of a modern and/or a classical foreign language. Getting to know professors and learning as much as possible about the professional elements of the discipline provide excellent preparation for graduate work.

## First-Year Composition

The Curriculum for Liberal Education requires a two-semester freshman sequence to fulfill Area 1 requirements. First-Year Writing (1105-

1106), which the Department of English offers as part of its Writing Program, fulfills this Area I Liberal Education requirement. Honors Freshman English (1204H) may substitute for this sequence for students who qualify for placement in Honors English. 1105-1106 and 1204H share a focus on the rhetorical dimensions of writing, speaking, and visual communication, but each is a separate course with distinctive assignments and goals.

**Advanced Standing (AS):** Some students are exempted from ENGL 1105 and granted Advanced Standing on the basis of three scores: SAT Critical Reading, SAT Writing, and Standardized High School Class Rank. Advanced Standing students fulfill their Freshman English requirement with the single advanced course into which they are placed: **ENGL 1106** or **Honors ENGL 1204H**. If Advanced Standing students complete the assigned advanced course at Virginia Tech with a C- or better in the first enrollment, they receive pass/fail credit for ENGL 1105, the course from which they are exempted. Advanced Standing is a placement category for students at Virginia Tech; it is not related to the Advanced Placement (AP) courses offered in high schools or the AP exam offered by the Educational Testing Service (ETS).

**Credit from AP, CLEP, and IB** exams can fulfill the CLE Area 1 requirement. See "Advanced Placement," "Advanced Standing," and "International Baccalaureate" information in the Admissions section of this catalog.

## Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the Curriculum for Liberal Education (see Academics chapter in this catalog), toward the Liberal Arts and Human Sciences College Core (see first part of this chapter), and toward the degree in English.

Satisfactory progress toward the B.A. in English requires that:

1. Upon having attempted 72 semester credits (including transfer, advanced placement, advanced standing, credit by examination, and freshman rule), students must have passed 12 of the required 45-51 credits in English.
2. Upon having attempted 96 semester credits, students must have an in-major grade point average of 2.0 or above.

## [TOP](#)

## Undergraduate Courses (ENGL)

### 0014: ORAL COMMUNICATION FOR INTERNATIONAL TEACHING ASSISTANTS

For international students taking regular academic loads. Practice in preparing and delivering oral reports in an academic field, as well as advanced pronunciation and aural comprehension exercises for effective classroom communication. Pass/Fail only. X-grade allowed. (3H,1C) I,II.

### 1105-1106: FIRST-YEAR WRITING

1105: Introduction to rhetorical analysis, visual rhetoric, critical writing, and critical thinking; intensive reading of works in multiple genres; practice in writing and revision; fundamentals of oral presentations. 1106: Continued study in rhetorical analysis and the conventions of various genres; intensive instruction in writing and revision of work that incorporates research; experience in oral presentations. (3H,3C)

### 1204H: HONORS FRESHMAN ENGLISH

Introduction to analytical, critical, and interpretive writing and reading at an advanced level and accelerated pace for students whose test scores and high school work indicate readiness for the Honors level of complexity, responsibility, and initiative; in a single semester, reviews the work of 1105 and focuses on the work of 1106 at the Honors level. Placement by the English Department required. (3H,3C)

### 1604: INTRODUCTION TO POETRY

This course examines the genre of poetry from the Old English period up to contemporary writers. Emphasis is on close reading and poetic forms and conventions. (3H,3C)

### 1614: INTRODUCTION TO SHORT FICTION

This course introduces the knowledge and skills required to read and understand short stories and novellas. Readings trace the development of short fiction from the fable and myth to contemporary narrative forms. (3H,3C)

### 1624: INTRODUCTION TO DETECTIVE FICTION

This course introduces students to classic and modern texts of detective fiction from a variety of historical periods and cultural traditions. (3H,3C)

### 1634: INTRODUCTION TO SHAKESPEARE

This course introduces Shakespeare's drama and poetry, including at least one modern adaptation of a Shakespearean play (play, novel, movie, opera, etc.). Emphasis is placed on how to read a play, how to read Shakespearean verse, and how the various genres of Shakespearean drama differ. (3H,3C)

### 1644: INTRODUCTION TO WORLD LITERATURE

This course examines masterpieces of world literature in translation. Readings focus upon one or two common themes across places and times. (3H,3C)

### 1654: INTRODUCTION TO SCIENCE FICTION AND FANTASY

This course introduces a variety of speculative works within the genres of science fiction and fantasy. Attention will be given to the development and

principal characteristics of each genre. Emphasis is placed on the social, cultural, and historical contexts in which specific speculative texts have been produced. (3H,3C)

#### 1664: INTRODUCTION TO WOMEN'S LITERATURE

This introductory course examines literary and cultural questions raised by women writers throughout history and from different cultural backgrounds. Emphasis is on women's writing in English, but the course may include some literature in translation. (3H,3C)

#### 1674: INTRODUCTION TO AFRICAN AMERICAN LITERATURE

This course introduces students to some of the major writers of the African American literary tradition from such early poets as Phillis Wheatley to such contemporary novelists as Toni Morrison. The course situates the literary works within their historical and cultural contexts, but also emphasizes close readings of the texts. (3H,3C)

#### 1684: INTRODUCTION TO DRAMA

This course examines the history, structures, and dynamics of dramatic literature and theatre practice. Classic and contemporary texts from around the world are read with emphasis on the traditions and influences that have shaped dramatic form. (3H,3C)

#### 2444 (CLA 2444) (HUM 2444): ANCIENT GREEK AND ROMAN MYTHOLOGY

Survey of Ancient Greek and Roman mythology and modern interpretations. In English. No knowledge of Ancient Greek or Latin required. Not for credit toward a Latin Minor. (3H,3C)

#### 2454 (CLA 2454) (HUM 2454): ANCIENT GREEK AND LATIN LITERATURE IN ENGLISH TRANSLATION

A variable content course devoted to the study of major works of Ancient Greek and Latin literature in English translation. May be repeated for credit with different content. In English. No knowledge of Ancient Greek or Latin required. Not for credit toward a Latin Minor. (3H,3C)

#### 2515,2516: SURVEY OF BRITISH LITERATURE

A two-course sequence introducing students to major writers of the British literary tradition; 2515 extends from the medieval period to the death of Alexander Pope in 1744; 2516 continues to the present day. This course provides the literary, historical, and social contexts necessary to comprehend significant developments in poetry, drama, prose fiction, and criticism. Pre: 1106 or H1204 or COMM 1016. (3H,3C)

#### 2525,2526: SURVEY OF AMERICAN LITERATURE

A two-course sequence introducing students to major writers of the American literary tradition; 2525 extends from the colonial period to 1865; 2526 continues to the present day. This course provides the literary, historical, and social contexts necessary to comprehend significant developments in poetry, drama, prose fiction, and criticism. Pre: 1106 or 1204H or COMM 1016. (3H,3C)

#### 2604: INTRODUCTION TO CRITICAL READING

A writing intensive introduction to the techniques and theoretical implications of close reading and to the literary genres of poetry, drama, fiction, and, in some sections, non-fiction. The focus is on four primary texts, at least one of which was written before the eighteenth century and one after it, and on criticism of at least one of these. The course emphasizes the analytical skills, basic critical terminology, and conventions of literary criticism essential to advanced English studies. Intended primarily for English majors and minors. Pre: 1106, H1204 or COMM 1016. Co: 2614. (3H,3C)

#### 2614: INTRODUCTION TO ENGLISH STUDIES

A lecture/lab course in which students are introduced to the concept of the required English Studies ePortfolio, receive coaching in developing it's various components, and develop the software and technology skills necessary to create an entry-level ePortfolio that they will continue to work on during the course of their undergraduate study. In addition to creating the ePortfolio, students learn about the discipline of English Studies and its various areas of specialization. Co: 2604. (1H,3L,2C)

#### 2744: INTRODUCTION TO CREATIVE WRITING

A workshop for beginning writers who want to explore their talents in poetry, drama, and fiction. Pre: 1106. (3H,3C)

#### 2804 (AINS 2804): CONTEMPORARY NATIVE AMERICAN LITERATURES

This course offers a sampling of fiction, poetry, and non-fiction by the most influential American Indian writers since 1970, authors such as Momaday, Silko, Deloria, Welch, Harjo, and Alexie. Students also learn about those aspects of cosmology and storytelling traditionally shared by all American Indian Nations, as well as about those aspects specific to the individual tribal traditions from which the authors and their characters come. Pre: 1106 or H1204 or COMM 1016. (3H,3C)

#### 2964: FIELD STUDY

Pass/Fail only. Variable credit course.

#### 2974: INDEPENDENT STUDY

Variable credit course.

#### 2974H: INDEPENDENT STUDY

Variable credit course.

#### 2984: SPECIAL STUDY

Variable credit course.

#### 3104: INTRODUCTION TO PROFESSIONAL WRITING

This course introduces students to the theory and practice of professional writing and its functions in workplace settings. In this rhetorically-based course, students gain experience with a variety of writing situations, composing documents that solve problems or help readers make decisions. Students learn current conventions and broadly applicable procedures for analyzing the audiences, purposes, and situations of professional writing, and learn strategies for adapting these conventions and procedures to meet the unique demands of each new situation and task. Pre: 1106 or

1204H or COMM 1016. (3H,3C)

#### 3154: LITERATURE, MEDICINE, AND CULTURE

The representation of health and illness in literature and the cultural aspects of medicine as a practice. Pre: 1106 or H1204 or COMM 1016. (3C)

#### 3204: MEDIEVAL LITERATURE

This course presents medieval British literature from ca. 700 to 1500 in its representative modes and defining contexts, including the literary influences of pagan antiquity, the native British (Celtic) tradition, Scandinavian and contemporary continental influences, the Crusades, the Byzantine Empire, and the philosophical traditions of neoplatonism and scholasticism. Specific authors and texts will vary, but will include poetry, prose, and drama. Pre: 1106 or H1204 or COMM 1016. (3H,3C)

#### 3214: RENAISSANCE LITERATURE

This course presents Renaissance British literature from 1500-1660 in its representative modes and defining contexts, including the discovery of the Copernican universe and the new world, the rise of Protestantism, the resultant Counter-reformation, the movement from humanism to empiricism, and the institution of Parliamentary democracy. Specific authors and texts will vary, but will include poetry, prose, and drama. Pre: 1106 or H1204 or COMM 1016. (3H,3C)

#### 3224: AUGUSTAN LITERATURE

This course presents Restoration and eighteenth-century British literature from 1660 to 1800 in its representative modes and defining contexts, including the expansion of democracy, commerce, and empire, the successes and limitations of Enlightenment philosophy, and the diversification of the literary public to include women, provincial, and laboring writers. Specific authors and texts will vary, but will include poems, essays, plays and novels. Pre: 1106 or 1204 or COMM 1016. (3H,3C)

#### 3234: ROMANTIC LITERATURE

This course presents Romantic literature from the late eighteenth century to 1832 in its representative modes and defining contexts, including the French, American, and Industrial Revolutions, the expansion of the British empire, the rise of the novel, Gothicism, and the intellectual influence of periodical essays. Specific authors and texts will vary, but will include poetry, fictional prose, and non-fictional prose. Pre: 1106 or H1204 or COMM 1016. (3H,3C)

#### 3244: VICTORIAN LITERATURE

This course presents Victorian British Literature from 1832 to 1901 in its representative modes and defining contexts, including the development of modern science and the decline of traditional religion, the emergence of the mass reading public, and the glorification of the writer's role as prophet, guide, and culture critic. Specific authors and texts will vary, but will include poems, essays, plays, and novels. Pre: 1106 or H1204 or COMM 1016. (3H,3C)

#### 3254: AMERICAN LITERATURE BEFORE 1900

This course presents American literature from before 1900 in its representative modes and defining contexts, including colonization, the founding of the republic, the Civil War, the settlement of the west, American Romanticism, and American Realism. Specific authors and texts will vary, but will include poetry and fictional and non-fictional prose. Pre: 1106 or H1204 or COMM 1016. (3H,3C)

#### 3264: MODERNIST BRITISH LITERATURE

This course presents Modernist British literature from 1918-1945 in its representative modes and defining contexts, including World Wars I and II, the collapse of the British empire, the influence of Darwin, Marx, and Freud, and such literary movements as Modernism, Realism, and Stream of Consciousness. Specific authors and texts will vary, but will include poetry, prose, and drama. Pre: 1106 or H1204 or COMM 1016. (3H,3C)

#### 3274: MODERNIST AMERICAN LITERATURE

This course presents Modernist American literature from 1918 to 1945 in its representative modes and defining contexts, including World Wars I and II, the Great Depression, and such literary movements as Modernism and Realism. Specific authors and texts will vary, but will include poetry, prose, and drama. Pre: 1106 or H1204 or COMM 1016. (3H,3C)

#### 3304 (AINS 3304): THE LANGUAGES OF NATIVE AMERICA

Study of the structures of the native languages of the Americas; their interrelationships; their use in individual speech communities; contact with other languages; the interrelationships of linguistic structure, culture, and thought; their future survival. Pre: 1106 or H1204 or COMM 1016. (3H,3C)

#### 3314: WORKING ENGLISH GRAMMAR

This course introduces students to the fundamentals of standard English written grammar. Some attention will also be paid to the use of English grammar for varying purposes. (3H,3C)

#### 3315-3316 (TA 3315-3316): PLAYWRITING

A workshop course in the craft and art of playwriting which emphasizes the development of craft and the nurturing of vision and art. 3315: primary focus is on the writing of original scripts with additional attention paid to the work of influential playwrights and critics. 3316: primary focus is on the creative process of developing a play with the collaborative influences of a director, actors, designers, and other theatre professionals. Consent of instructor required for 3316. Pre: 1106 or 1204H or COMM 1016 for 3315; 3315 for 3316. (3H,3C)

#### 3354: LITERARY AND CULTURAL CRITICISM

Introduction to the principal critical approaches used in literary analysis. Major critical schools are covered, with attention to methodology, theoretical backgrounds, and practical interpretation. Pre: 2604. (3H,3C)

#### 3364: TOPICS IN LITERATURE BY WOMEN

This rotating topics course examines literature written by women with different national and ethnic identities and from different historical periods. Specific content varies, but the common focus is on the fundamental issues surrounding women's writing, the critical methodologies commonly

employed to analyze this writing, and the historical, social, and literary contexts influencing the particular writing being studied. May be repeated once with different content. Pre: 1106 or 1204H or COMM 1016. (3H,3C)

#### 3404 (FR 3404): FRENCH LITERATURE IN ENGLISH

Variable content course devoted to the study of major writers or periods of French literature. May be repeated with different content. May not be taken for credit toward a major or minor in French. In English. One 2000 level English literature course required. (3H,3C)

#### 3414 (GER 3414): GERMAN LITERATURE IN ENGLISH

A variable content course devoted to the study of major German literary works in English translation. May be repeated with different content. May not be taken for credit toward a major or minor in a foreign language. No knowledge of German required. In English. One 2000 level English literature course required. (3H,3C)

#### 3424 (RUS 3424): RUSSIAN LITERATURE IN ENGLISH

Variable-content course devoted to the study of Russian literary classics. Readings and lectures in English. Topics will range from general surveys of 19th century or 20th century Russian literature to more intensive study of the works of a single major author like Tolstoy or Dostoevsky. May be repeated with different content. No knowledge of Russian required. In English. One 2000 level English course required. (3H,3C)

#### 3434 (SPAN 3434): HISPANIC LITERATURE IN ENGLISH

Variable content course devoted to the study of major works of Spanish and Spanish-American literature in translation. May be repeated with different content. May not be taken for credit toward a major or minor in Spanish. No knowledge of Spanish required. In English. One 2000 level English literature course required. (3H,3C)

#### 3514: ETHNIC LITERATURE FOR CHILDREN

This course examines the historical contexts of and issues surrounding ethnic literature for children. The course considers the literature in terms of aesthetics, cultural representations, and identity. Ethnic literatures considered may include Native American, African American, Asian American, and Latino/a. The course also introduces other ethnic literary traditions, such as world folk tales, that influence or parallel American ethnic children's books. Pre: 1204H or 1106 or COMM 1016. (3H,3C)

#### 3524: LITERATURE FOR CHILDREN

General critical and historical survey of traditional and contemporary writing for children: picture books, folk literature, modern fantasy, poetry, drama, modern fiction, historical fiction. (3H,3C)

#### 3534: LITERATURE AND ECOLOGY

Study of the poetry, proses and dramatic literature that stresses human cooperation with nature conceived as a dynamic, interrelated series of cyclic feedback systems. Included are ways esthetic values (literary themes, form, vision, perception, language) intersect with selected ecological concepts such as biocentrism, the food chain, energy transfer, Gaia theory, and ecofeminism; selected works by contemporary ecologists and environmentalists, and a study of the origins of ecology in the Greek oikos or home. This is a writing intensive course. Pre: 1106. (3H,3C)

#### 3544 (TA 3544): LITERATURE AND CINEMA

Works of literature and the films into which they have been transformed; emphasis on differences between media. (3H,3C)

#### 3584: THE BIBLE AS LITERATURE

This course focuses on the Bible both as a work of literature and as a major influence on the literatures of the world. Specific books of the Bible to be covered, as well as literary-critical approaches, will vary. Pre: 1106 or H1204 or COMM 1016. (3H,3C)

#### 3614: SOUTHERN LITERATURE

The literature of the American South from 1840 to the present with emphasis on 20th-century fiction, drama, and poetry. Concentration on such writers as Faulkner, Capote, Chopin, Langston Hughes, O'Connor, Welty, Alice Walker, and others. Exploration of such themes as importance of land, family, community; roles of industry and agrarianism; race relations. (3H,3C)

#### 3624: APPALACHIAN LITERATURE

Appalachian writers from the 1800s to the present including Murfree, Wolfe, and selected contemporary authors. Course will treat artistic merit and such selected themes as the mountains, Appalachia as a frontier, ambivalence about the Civil War, religion, folk ways and traditions, coal mining, and cottage industries. (3H,3C)

#### 3634 (AFST 3634): AFRICAN-AMERICAN LITERATURE

African-American writings from Phyllis Wheatley through the slave narratives of the nineteenth century to such modern figures as Wright, Hughes, Baldwin, and Morrison. Pre: 1106. (3H,3C)

#### 3644: POSTCOLONIAL CULTURAL STUDIES

Correlates theoretical, literary, and historical materials from both "western" and "indigenous" sources in order to study at least two postcolonial settings (e.g., Indian, African, South American, Caribbean). Issues will include both contextual matters and literary problems. Pre: 1106. (3H,3C)

#### 3654: ETHNIC AMERICAN LITERATURE

Variable content course which introduces major American ethnic literatures: African-American, Asian-American, Chicano/a, Arab-American, and Native American. Representative texts from one or two of these categories are examined within the cultural, historical, and geographical matrices within which they are written. May be repeated twice for credit if the content is different. Pre: 1106 or 1204H or COMM 1016. (3H,3C)

#### 3684: LITERATURE AND THE LAW

This course introduces students to the representation of the law and lawyers in literature. Emphasis is placed on the cultural and historical contexts that shape our perception of the law and legal practice and on the use of facts, research, interpretation, and rhetoric in legal argument. Junior standing required. (3H,3C)

#### 3704: CREATIVE WRITING: FICTION

This course is designed for students who want to focus in some depth on the writing of various forms of fiction such as the short story and novella. Emphasis is on the writing the critiquing of original fiction in a workshop/studio environment, and the analysis of exemplary texts which serve as models. Students produce a body of original fiction in draft and revised forms. May be repeated for a maximum of 9 credit hours. Pre: 2744. (3H,3C)

#### 3714: CREATIVE WRITING: POETRY

This course is designed for students who want to focus in some depth on the writing of poetry. Emphasis in on the writing and critiquing of original poetry in a workshop/studio environment, and the analysis of exemplary poems which serve as models. Students analyze various poetic forms and produce a revised body of original poetry. May be repeated for a maximum of 9 credit hours. Pre: 2744. (3H,3C)

#### 3724: CREATIVE WRITING: CREATIVE NON-FICTION

This course is designed for students who want to focus in some depth on the writing of creative non-fiction in its various forms, including memoir, personal experience writing the lyrical essay, travel narratives, and nature writing. Emphasis is on the writing and critiquing of original creative non-fiction in a workshop/studio environment, and the analysis of exemplary texts which serve as models. Students produce a body of original non-fiction in draft and revised forms. May be repeated for a maximum of 9 credit hours. Pre: 2744. (3H,3C)

#### 3744: WRITING CENTER THEORY & PRACTICE

Focus on the theory and practice of teaching writing across the disciplines in the Writing Center setting. Emphasis is on writing center theory applied to one-on-one teaching strategies and on techniques for responding appropriately to student writing. To take this course you must first have the professor's consent. (3H,3C)

#### 3754: ADVANCED COMPOSITION

Advanced training in writing analytical and critical essays. Practice in addressing a range of audiences and in using varied styles and organizational patterns. Workshop and conference for students in arts and humanities, as well as for technical and extension students who wish to address non-specialized audiences and to practice forms outside their own fields. Junior standing required. (3H,3C)

#### 3764: TECHNICAL WRITING

Principles and procedure of technical writing; attention to analyzing audience and purpose, organizing information, designing graphic aids, and writing such specialized forms as abstracts, instructions, and proposals. Junior standing required. (3H,3C)

#### 3774: BUSINESS WRITING

Extensive practice in forms of persuasive and informative writing such as memos, case analyses, reports, abstracts, and letters. Designed for students in all curricula. Junior standing required. (3H,3C)

#### 3804: TECHNICAL EDITING AND STYLE

Technical Editing and Style explores the art of editing from the initial writing task to the final delivery of the document. In addition to learning document management, students study and practice the roles, responsibilities, and tasks that editors perform. The course also covers the rules that govern the fundamentals of style (correctness, clarity, and propriety) and the principles needed to match the tone and formality to the aim, audience, and occasion of the work. Must have pre-requisites or the consent of the Director of Professional Writing. Pre: 3104. (3H,3C)

#### 3814: CREATING USER DOCUMENTATION

This course prepares students to produce both print and online user documentation that enables people to accomplish a given set of tasks (e.g., user guides, online help, policy and procedure manuals, tutorials, and how-to books). Readings include rhetorical theory and discussions of professional practice. Students learn the principles of user and task analysis, information design, usability testing, and indexing. In addition, they have opportunities for hands-on experience with clients and end-users. Must have pre-requisites or the consent of the Director of Professional Writing. Pre: 3804. (3H,3C)

#### 3824: DESIGNING DOCUMENTS FOR PRINT

This course prepares students to design and produce complex documents such as proposals, brochures, booklets, and newsletters using computer technologies. Students learn rhetorical and visual factors (e.g., legibility, readability, layout, and integration of text/images) that contribute to the effectiveness and usability of documents. In addition, students study the use of color and electronic image editing. They also master some of the technologies necessary to publish documents from their desktops. In addition to working on individual projects, students engage in collaborative exercises intended to sharpen their teamwork, editing, writing, audience-awareness, and design skills. Must have prerequisite or consent of the Director of Professional Writing. Pre: 3804. (3H,3C)

#### 3834: INTERCULTURAL ISSUES IN PROFESSIONAL WRITING

Focuses on intercultural and international issues in the global workplace. Explores, through examination of theoretical perspectives and practical applications, ways in which notions about culture and national identity shape professional interactions. Provides a foundational understanding of the issues involved in writing and designing documents for international audiences. Pre: 3804. (3H,3C)

#### 3954: STUDY ABROAD

Variable credit course. X-grade allowed.

#### 3984: SPECIAL STUDY

Variable credit course.

#### 4004: LINGUISTIC DISCOURSE ANALYSIS

Introduction to discourse analysis. This course examine spoken and written discourses of English. Further attention will be paid to how discourse functions in political, legal, medical, and educational contexts. (3H,3C)

#### 4024: CULTURAL STUDIES THEORY AND PRACTICE

In-depth study of major theories of cultural studies with attention to their practical application in the interpretation of images, texts, artifacts, institutions, experiences, and practices. Pre-requisite: Completion of at least 60 credit hours Pre: 3354. (3H,3C)

#### 4044: LANGUAGE AND SOCIETY

English language variation in the United States is considered from a current sociolinguistic perspective. Social, regional, ethnic, gender, and stylistic-related language variation are covered, along with models for collecting, describing, and applying knowledge about language variation. Students are exposed to a wide range of data on language variation, with emphasis on vernacular varieties of American English. Pre: 1106 or 1204H. (3H,3C)

#### 4054: HISTORY OF THE ENGLISH LANGUAGE

Development of English including both its internal history (sounds, vocabulary, inflections, syntax) and its external history (political, social, and intellectual forces). Indo-European origins through the present, with special emphasis on the English Language in America. (3H,3C)

#### 4065,4066: CONTEMPORARY APPROACHES TO LINGUISTICS

Thorough introductions to the core areas of the discipline of linguistics, as well as a number of subfields that make up this wide ranging field of study. Phonetics, phonology, morphology, syntax, semantics, language change. (3H,3C)

#### 4074: ENGLISH SYNTAX

This course introduces the grammatical structures of the English language and the processes by which we create and comprehend English sentences. Emphasis is on recent linguistic models. Topics include morphological structure, form- and structure-class taxonomy, phrase structure, transformational and generative approaches, language variation. Alternative models will be considered. Pre: 1106. (3H,3C)

#### 4084: TOPICS IN LINGUISTICS

An advanced course in such areas of linguistics as phonetics, phonology, morphology, syntax, language change, dialectology, etc. Emphasis will be placed on the analysis of natural language data within contemporary theoretical frameworks. Individual sections will focus upon differing areas of linguistics (to be specified in the subtitle of the course). Repeatable with different content for a maximum of nine credits. Pre: 4064 or 4074. (3H,3C)

#### 4114: CHAUCER

This course examines the life, work, and critical reception of Geoffrey Chaucer. Junior standing required. (3H,3C)

#### 4124: INTRODUCTION TO OLD ENGLISH

Introduction to Old English grammar and reading of Old English poetry and prose. Senior standing required. (3H,3C)

#### 4165,4166: SHAKESPEARE

The plays of Shakespeare. 4165: Shakespeare's early career (1590-1600), including history plays from HENRY VI to HENRY V, comedies from THE COMEDY OF ERRORS to THE MERRY WIVES OF WINDSOR, and early tragedies such as ROMEO AND JULIET and JULIUS CAESAR. 4166: the later career, including "problem plays" such as MEASURE FOR MEASURE, the great tragedies (HAMLET, KING LEAR, OTHELLO, MACBETH), and the romances such as THE TEMPEST. (3H,3C)

#### 4214: MILTON

Milton's poetry from the early works, including COMUS, LYCIDAS, and the sonnets, to his major late works PARADISE LOST, PARADISE REGAINED, and SAMSON AGONISTES; with some attention to the important prose and to the historical context in which he wrote. (3H,3C)

#### 4405,4406: THE ENGLISH NOVEL

4405: Development of the English novel to 1850, including such novelists as Defoe, Richardson, Fielding, Sterne, Austen, the Brontes, and Thackeray. 4406: Major novels from 1850 to World War II, including Dickens, Trollope, Eliot, Gaskell, Hardy, Woolf, Joyce, Lawrence, Huxley, and Waugh. (3H,3C)

#### 4414: TOPICS IN SPECULATIVE FICTION

This variable content course offers an advanced exploration of deliberately anti-realistic narratives such as science fiction, utopian and dystopian fiction, and fantasy. May be taken twice with differing content. Junior standing required. (3H,3C)

#### 4415,4416: AMERICAN NARRATIVE TO 1950

4415: The history of American narrative to 1865; 4416: The history of American narrative from 1865 to 1950; genres to be addressed may include diaries, journals, letters, autobiographies, narratives of captivity, essays, sermons, folktales, short fiction, and novels. Junior standing required. (3H,3C)

#### 4424: DIGITAL LITERARY CULTURE

The interpretation of literary forms produced specifically for digital environments. Students will learn to analyze the design and rhetoric of hypertexts and hypermedia. Pre: 3354. (3H,3C)

#### 4504: MODERN POETRY

British and American poetry from 1900 to World War II with emphasis on such figures as Pound, Williams, Stevens, Yeats, Sylvia Plath, Stevie Smith, and Eliot. (3H,3C)

#### 4514: CONTEMPORARY POETRY

British and American poetry from World War II to the present, with emphasis on such figures as Bishop, Lowell, Ashbery, Heaney, and Hughes. (3H,3C)

#### 4554: BRITISH DRAMA TO 1800

Plays from the Middle Ages through the 18th century (excluding Shakespeare). Includes works by the anonymous authors of the medieval mystery and morality plays and by such playwrights as Marlowe, Johnson, Webster, Ford, Dryden, Wycherly, and Goldsmith. (3H,3C)

#### 4564: MODERN DRAMA

Plays by 19th and 20th century British, American, and continental dramatists, beginning with Ibsen and Shaw and culminating with Beckett and the contemporary Theatre of the Absurd. (3H,3C)

#### 4624: STUDIES IN A BRITISH AUTHOR AFTER 1800

This course examines the life, work, and critical reception of a single major British author (or pair of closely associated authors) writing after 1800. May be taken up to 3 times with different content. Junior standing required. (3H,3C)

#### 4634: STUDIES IN AN AMERICAN AUTHOR BEFORE 1900

This course examines the life, work, and critical reception of a single major American author (or a pair of closely associated authors) writing before 1900. May be taken up to three times with different content. Junior standing is required. (3H,3C)

#### 4644: STUDIES IN AN AMERICAN AUTHOR AFTER 1900

This course examines the life, work, and critical reception of a single major American author (or pair of closely associated authors) writing after 1900. May be taken up to three times with different content. Junior standing is required. (3H,3C)

#### 4664: CONTEMPORARY FICTION

Fiction since 1945 with emphasis upon the most recent two decades: the late modernist narratives of Bellow, Updike, and Percy; the new fiction of Barth, Hawkes, Barthelme; the postmodern fiction of Federman, Carter, Fowles, Katz, Sukenick. (3H,3C)

#### 4674: STUDIES IN CONTEMPORARY CULTURE

Studies the emerging changes across arts media (including architecture, cyberculture, essay, fiction, film, painting, performance, photography, poetry, theatre, video) in relation to current cultural and social theory from a variety of disciplines (including architectural theory, art, history, literature, philosophy, psychoanalysis, and social sciences). (3H,3C)

#### 4684: SPECIAL TOPICS IN LITERATURE

An advanced, variable-content course which explores a significant or emergent literary issue or approach, or a body of literature. May be taken twice with different content. Pre: 3204 or 3214 or 3224 or 3234 or 3244 or 3254 or 3264 or 3274. (3H,3C)

#### 4704: ADVANCED CREATIVE WRITING: FICTION

Designed for senior English majors who have selected the Creative Writing option, this is an intensive, advanced workshop. This capstone course builds on skills students have acquired in creative writing workshops. Primary focus is on the writing and critiquing of original fiction, while paying close attention to the work of established writers who are acknowledged masters of their genres. Students hone their skills as peer reviewers and constructive critics. In the process, they produce a portfolio of their own fiction. Pre: 3704. (3H,3C)

#### 4714: ADVANCED CREATIVE WRITING: POETRY

Designed for senior English majors who have selected the Creative Writing option, this is an intensive, advanced workshop. This capstone course builds on the skills acquired in previous creative writing workshops. Primary focus is on the writing and critiquing of original poems, while paying close attention to the work of established poets who are acknowledged masters of their genres. Students hone their skills as peer reviewers and constructive critics. In the process, they produce a portfolio of their own poetry. Pre: 3714. (3H,3C)

#### 4724: CREATIVE WRITING: FICTION FOR YOUNG PEOPLE

This course is conducted in a workshop setting in which students compose original stories for young people. Elementary techniques of fiction are emphasized, such as plot structure, point of view, setting, characterization, and audience. Must have prerequisites or permission of the instructor. Pre: 3704. (3H,3C)

#### 4734: SENIOR PORTFOLIO DEVELOPMENT IN CREATIVE WRITING

A course focused on the development of the senior portfolio and on making an effective and well-informed transition from undergraduate study to careers or graduate/professional school. English majors in the Creative Writing option only. (1H,1C)

#### 4774: SENIOR PORTFOLIO DEVELOPMENT IN LITERATURE, LANGUAGE, AND CULTURE

A course focused on the development of the senior portfolio and on making an effective and well-informed transition from undergraduate study to careers or graduate/professional school. English majors in the Literature, Language, and Culture option only. Pre: 2614. (1H,1C)

#### 4784: SENIOR SEMINAR

Designed for senior English majors, this is a variable topics, in-depth study of a particular issue or theme in language or literature. This capstone course aims to integrate and synthesize previous work in the discipline, focusing especially on close reading, research, and writing skills. Pre: 1106. (3H,3C)

#### 4804: GRANT PROPOSALS AND REPORTS

This course prepares students to write effective proposals, reports, and informational articles. Students learn to define and write problem statements, program objectives, plans of action, evaluation plans, budget presentations, and summaries. In addition, they sharpen their teamwork, editing, writing, audience awareness, and design skills as they engage in collaborative projects with campus and/or non-profit organizations in the community. Prerequisite or consent of the instructor is required. Pre: 3804. (3H,3C)

#### 4814: WRITING FOR THE WEB

This course prepares students to write and design complex documents for the World Wide Web, with a particular emphasis on communicating complex, technical, and scientific information. Students learn rhetorical principles, writing strategies, visual design factors, and technologies needed to create effective, usable web sites. They will develop sites in both individual and team settings, apply the principles of usability testing, and locate and use resources to help them keep pace with this rapidly changing field. Pre: 3804. (3H,3C)

**4824: SCIENCE WRITING**

Writing in and about the natural and social sciences. Students will write documents such as abstracts, research proposals, and ethnographies, analyze the development of disciplinary writing practices, and study non-fiction science writing for general audiences. Senior standing or instructor approval required. Pre: 1106 or 1204H or COMM 1016. (3H,3C)

**4864: SENIOR PORTFOLIO DEVELOPMENT IN PROFESSIONAL WRITING**

A course focused on the development of the senior portfolio and on making an effective and well-informed transition from undergraduate study to careers or graduate/professional school. English majors in the Professional Writing option only. Pre: 2614. (1H,1C)

**4874: ISSUES IN PROFESSIONAL AND PUBLIC DISCOURSE**

In this course designed for English majors in the Professional Writing Option, students will focus on the ways in which scientific, technical, and professional communication influence, and are influenced by, public discourse. Drawing on strategies of rhetorical criticism, students will gain an understanding of the persuasive value of style, arrangement, and delivery by investigating their professional roles in helping to structure public debate. Pre: 3804. (3H,3C)

**4954: STUDY ABROAD: ISSUES AND TEXTS**

An advanced, variable-content and multi-disciplinary course that explores global themes and literature(s) during a month-long, faculty-led summer study abroad experience. Pre-requisite: Junior Standing required. Variable credit course, repeatable up to 6 credits. Variable credit course.

**4964: FIELD STUDY**

Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4974H: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course. X-grade allowed.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

**4994H: UNDERGRADUATE RESEARCH**

Variable credit course.

## Overview

The study of foreign languages and literatures opens doors to international understanding and the appreciation of ancient and contemporary foreign civilizations. The department gives interested students of the university an opportunity to enroll in its courses:

- To major or minor in a language;
- To become a more aware and informed citizen of the world;
- To prepare for careers in international organizations, the Foreign Service, government, business or industry, teaching;
- To prepare for a study abroad program;
- To obtain humanities credits on an elective basis;
- To fulfill undergraduate language requirements;
- To satisfy graduate reading requirements;
- Just out of interest.

Majors and Minors are offered in French, German, Spanish, and Classical Studies, and a Russian Area Studies major is available, under the Interdisciplinary Studies Program. Minors are also given in Classical Languages, French for Business, Latin, and Russian. The department also offers instruction in Chinese, modern Greek, Hebrew, Italian, and Japanese. In addition to fulfilling the requirements of the core curriculum of the College of Liberal Arts and Human Sciences, the foreign language major must complete 30 hours at the 3000-level and above in a single foreign language (with the exception of Classical Studies), according to the following requirements in the individual languages.

A minimum grade of C (2.0) must be earned by foreign language majors and minors in all courses required for the major or minor.

## Classical Studies Major

To complete the interdisciplinary major in Classical Studies a student must complete 36 hours: 18 in Classical Studies (Humanities, History, Art & Art History, Mythology, Literature, Culture, Religion, etc.) and 18 hours in Classical Languages (Ancient Greek and/or Latin). For information on required courses and for a checksheet, see the Classical Studies website (<http://www.fll.vt.edu/Classics/ClassicsHome.html>) or the Department of Foreign Languages and Literatures (331 Major Williams Hall, 231-5361).

## **Classical Studies Minor**

To obtain an interdisciplinary minor in Classical Studies a student must complete 18 hours in Classical Studies. For information on required courses and for a checksheet, see the Classical Studies website (<http://www.fll.vt.edu/Classics/ClassicsHome.html>) or the Department of Foreign Languages and Literatures (331 Major Williams Hall, 231-5361).

## **Classical Languages Minor**

To obtain a minor in Classical Languages a student must complete 18 hours in Classical Languages (Ancient Greek and/or Latin). For information on required courses and for a checksheet, see the Classical Studies website (<http://www.fll.vt.edu/Classics/ClassicsHome.html>) or the Department of Foreign Languages and Literatures (331 Major Williams Hall, 231-5361).

## **TOP**

## **Language Majors/Minors**

### **French Major**

To complete a major in French, a student must complete 30 hours at the 3000-level and above, including the following required courses: 3105, 3106, \*3126, \*\*3304, four of the following five courses 3205, 3206, 3305, 3306, 3314, six hours of \*\*\*4314 and 4154.

\*Students may be exempted from French 3126 through demonstrating satisfactory oral proficiency by examination, in which case no credit is granted and three additional hours of advanced elective course work in French may be necessary to complete the required 30 hours. Students not placing into or out of 3126 are strongly advised to take 3125, which is designed to enable students to achieve the level of oral proficiency required for entry into 3126. For most students the hours represented by 3125 will be in addition to the minimum of 30 required for the major.

\*\* Although 3304 is a prerequisite for 3305, 3306 and 3314, it may be waived in some instances. Contact section coordinator for details.

\*\*\*French 4314 is a variable content three-credit course which may be repeated for credit. When appropriate, depending on the topic, students may petition the department for consent to use French 4324 to satisfy three hours of the six hour 4000-level French literature requirement.

Except with consent in special cases, the 30 hours must be in French courses exclusive of 2964: Field Study; 2984: Special Study; 4964: Field Study; 4974: Independent Study; 4984: Special Study; 4994: Undergraduate Research.

### **French Minor**

To obtain a minor in French, a student must complete 18 hours in French at the 2000-level and above, 12 of which must be taken at the advanced level, including 3105, 3106. Student must take at least one 3000-level French culture and civilization course and one 3000-level French literature course. French 3314 can count either as a culture and civilization course or as a literature course. In some instances, French 3164 may count toward the minor. See French section coordinator.

### **French for Business Minor**

The French for Business minor requires 18 hours in French at the 2000-level and above. The minor must include the following courses: 2164, 3105, 3106, 3164 and one of the following: 2714, 3205 or 3206.

### **Advanced French for Business Minor**

The Advanced French for Business minor requires 18 hours at the 3-4000 level. It must include the following courses: 3105, 3105, 3164, 3304, 4164 and either 3205 or 3206.

### **French for Business Concentration**

To obtain the French for Business concentration, a student must complete 18 hours on the 1-2000 level in French including the following courses: 2164 and 2714.

## German Major

To complete a major in German, a student must complete 30 hours at the 3000-level and above, including the following required courses: 3105, 3106, \*3126, 3204, 3305, 3306, 4154, and six hours of \*\*4000-level literature.

\* Students may be exempted from German 3126 through demonstrating satisfactory oral proficiency by examination, in which case **no credit is granted** and three additional hours of advanced elective course work in German will be necessary to complete the required 30 hours. Students not placing into or out of 3126 are strongly advised to take 3125, which is designed to enable students to achieve A8e level of oral proficiency required for entry into 3126. For most students the hours represented by 3125 will be in addition to the minimum of 30 required for the major.

\*\* GER 4xxx includes 4304 and any of the variable-content 4000-level German literature courses which may be repeated for credit. When appropriate, depending on the topic, students may petition the department for consent to use German 4334 to satisfy three hours of the six hour 4000-level German literature requirement.

Except with consent in special cases, the 30 hours must be in German courses exclusive of 2724: Introduction to German Culture and Civilization; 2964: Field Study; 2984: Special Study; 4964: Field Study; 4974: Independent Study; 4984: Special Study; and 4994: Undergraduate Research.

[TOP](#)

## German Minor

To obtain a minor in German, a student must complete 18 hours in German at the 2000-level and above, 12 of which must be taken at the advanced level, including 3105, 3106, 3204, and 3305 or 3306, exclusive of 2724.

## Latin Minor

To obtain a minor in Latin, a student must complete 18 hours of course work in Latin, including 6 hours at the 3000 level or above.

## Russian Area Studies Degree Option

Although the department does not yet offer a Russian major, students can utilize the existing resources of the university to pursue an interdisciplinary IDST (B.A.) degree program in Russian Area Studies. The program provides interested students with sufficient background in Russian language, culture, and area studies to pursue careers in diplomacy, international business, journalism, government service or to continue their Russian studies in graduate school. The program aims at developing competence in a single discipline and in the Russian language while providing a broad background in Russian area studies. The program complements but does not duplicate the existing major in International Studies.

An 18-hour minor in Russian Studies is offered as part of the IDST Program. This concentration includes courses drawn from Humanities, Foreign Languages, English, Political Science, and History. Requirements for the concentration can be obtained from the CIS or Foreign Languages and Literatures office.

*Concentration Coordinator: Amy Nelson (History).*

## Russian Minor

To obtain a minor in Russian, a student must complete 18 hours in Russian at the 2000-level and above, 12 of which must be taken at the advanced level, including 3105, 3106, and any additional 6 hours of Russian **language** courses at the 3000-level or above.

## Spanish Major

To complete a major in Spanish, a student must complete 30 hours at the 3000-level and above, including the following required courses: 3105, 3106, \*3126, 3414 (prior 3204), 3444 (prior 3214), 3304, 3404 (prior 3314), 3454 (prior 3324), and six hours of \*\*4000-level literature.

\* Students may be exempted from Spanish 3126 through demonstrating satisfactory oral proficiency by examination, in which case **no credit is granted** and three additional hours of advanced elective course work in Spanish will be necessary to complete the required 30 hours. Students not placing into or out of 3126 are strongly advised to take 3125, which is designed to enable students to achieve the level of oral proficiency required for entry into 3126. For most students the hours represented by 3125 will be in addition to the minimum of 30 required for the major.

**\*\* At the 4000 level, students are required to do a minimum of three hours of Spanish literature course work.**

Except with consent in special cases, the 30 hours must be in Spanish courses exclusive of 2964: Field Study; 2984: Special Study; 4964: Field Study; 4974: Independent Study; 4984: Special Study; 4994: Undergraduate Research.

## Spanish Minor

To obtain a minor in Spanish, a student must complete 18 hours at the 2000-level and above, 12 of which must be taken at the advanced level, including 3105, 3106, 3304, and one of the following: 3404, 3414, 3444, 3454 .

## Concentrations

### Latin American Studies Concentration (LAAS)

The LAAS concentration constitutes an 18-hour concentration within the existing IDST program. The LAAS concentration is interdisciplinary, offering courses in history, civilization, culture and literature, economics, political science, urban affairs and planning, geography, and international studies. A combination of six courses from the areas of history, culture, and development form the concentration. The LAAS concentration may be combined with a minor in Spanish and another approved 18-hour concentration to form a major in IDST. Students pursuing this degree will be enrolled as majors in the IDST program. Requirements for the concentration can be obtained from the offices of the Center for Interdisciplinary Studies or the Department of Foreign Languages and Literatures.

Concentration Coordinator: A. A. Fernández-Vázquez

## Restrictions

**1000 level courses do not count for Majors or Minors in French, German, Russian, or Spanish.**

**1000 level courses do count toward Majors and Minors in Classical Studies, Latin, and Classical Languages.**

**Other courses that do not count toward the major or minor:** Classics 2444, Classics 2454, French 2714, French 2964, French 2984, French 3195-3196, French 3404, French 4964, French 4974, French 4984, French 4994, German 2724, German 2964, German 2984, German 3195-3196, German 3414, German 4964, German 4974, German 4984, German 4994, Latin 2964, Latin 4964, Latin 4974, Latin 4994, Russian 2734, Russian 2964, Russian 2984, Russian 3424, Russian 4964, Russian 4974, Russian 4984, Russian 4994, Spanish 2744, Spanish 2754, Spanish 2964, Spanish 2984, Spanish 3434, Spanish 4964, Spanish 4974, Spanish 4984, Spanish 4994.

Questions about courses numbered 4964, 4974, 4984, and 4994 should be addressed to the Coordinator of the specific language section or the department chair. No more than six hours of 4964 (Field Study) may be taken.

Courses designated 3195-3196 do not satisfy the foreign language requirement for the university or the College of Liberal Arts and Human Sciences.

Courses designated Fr. 3954, Ger. 3954, and Span 3954 (Study Abroad) may carry major credit only if the student is eligible to pursue courses above the second-year level; otherwise credits will be assigned at the first and second-year level as appropriate in each individual case.

In addition to its formal courses, the department offers informal extracurricular activities, such as conversation groups, language tables, and language clubs, all of which are open to the university community.

## [TOP](#)

## Independent Study

The minimum grade point averages required for independent study in the Department of Foreign Languages are 3.3 in 3000- and 4000-level courses in the language of the independent study; and at least 2.5 overall and no lower than 3.0 in all course work done after the freshman year. Students wishing to enroll in courses designated 4974 (Independent Study) must receive permission from the instructor and the department chair in the term prior to enrollment. No more than eight hours of independent study and/or undergraduate research combined may be counted toward a degree.

## Teaching Certification

Those majors who are preparing to teach a foreign language in the public schools should consult the College of Liberal Arts and Human Sciences and plan a course of study leading to the Collegiate Professional Certificate upon graduation.

## Study Abroad

The department encourages students to work and/or study abroad. Information relating to work and/or study abroad programs is available from the department office (331 Major Williams) and from the Study Abroad Office.

The department offers programs of study in the summer in Paris, Madrid, Spain (El Camino), Moscow, Greece, Switzerland, Japan; and semester- or year-long exchange programs in Caen (France) and Quito (Ecuador).

## Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the Curriculum for Liberal Education ([see "Academics" in this catalog](#)), toward the College of Liberal Arts and Human Sciences core (see first part of this chapter), and toward the degrees in French, German, and Spanish.

## Repeating Work Completed

Students who have studied a foreign language may not repeat work completed at another institution without advance permission of the instructor. For example, those who have studied four years of a language in high school cannot normally study that language at the elementary level for credit. In addition, native speakers may not take language courses in their native language for credit.

### B.A. in French

**Satisfactory progress toward the B.A. in French requires that for continued enrollment in the major,**

- Upon having attempted 72 semester credits (including transfer, advanced placement, advanced standing, credit by examination, course withdrawal), students must have completed:**

FR 3105: Grammar, Comp., and Conversation	3
FR 3304: Introduction to French Literature	3
<b>Credits</b>	<b>(6)</b>

- By the end of the junior year, students must have an in-major grade point average of 2.0 or above and have completed:**

FR 3105, 3106: Grammar, Comp., and Conversation	6
FR 3205: French Culture and Civilization or Fr 3206: French Culture and Civilization	3
FR 3304: Introduction to French Literature	3
FR 3305, 3306: Survey of French Literature	6
<b>Credits</b>	<b>(18)</b>

### B.A. in German

**Satisfactory progress toward the B.A. in German requires that for continued enrollment in the major,**

- Upon having attempted 72 semester credits (including transfer, advanced placement, advanced standing, credit by examination, course withdrawal), students must have completed:**

GER 3105: Grammar, Comp., and Conversation	3
GER 3204: Culture of German-Speaking Countries (If not offered in senior year)	3
GER 4154: Advanced Composition and Stylistics (If not offered in senior year)	3
<b>Total Credits</b>	<b>(9)</b>

- By the end of the junior year, students must have an in-major grade point average of 2.0 or above and must have completed:**

GER 3105, 3106: Grammar, Comp., and Conversation	6
GER 3204: Culture of German-Speaking Countries (If not offered in senior year)	3
GER 3305, 3306: Survey of German Literature	6
GER 4154: Advanced Composition and Stylistics (If not offered in senior year)	3
<b>Credits</b>	<b>(18)</b>

---

## B.A. in Spanish

Satisfactory progress toward the B.A. in Spanish requires that for continued enrollment in the major,

1. **Upon having attempted 72 semester credits (including transfer, advanced placement, advanced standing, credit by examination, course withdrawal), students must have completed:**

SPAN 3105, 3106: Grammar, Comp., and Conversation	6
One of the following: SPAN 3404, 3414, 3444, 3454	3
SPAN 3304: Introduction to Hispanic Literature	3
<b>Credits</b>	<b>(12)</b>

2. **By the end of the junior year, students must have an in-major grade point average of 2.0 or above and must have completed:**

SPAN 3105, 3106: Grammar, Comp., and Conversation	6
One of the following: SPAN 3404, 3414, 3444, 3454	3
SPAN 3304: Introduction to Hispanic Literature	3
SPAN 3314: Survey of Peninsular Literature	3
<b>Credits</b>	<b>(15)</b>

## **French Undergraduate Courses (FR)**

1105-1106: ELEMENTARY FRENCH  
Fundamentals of the French language with emphasis on grammar, reading, composition, and conversation. 1105 for students with no prior knowledge of the language; 1106 for students who have completed 1105 or less than three years in high school. X-grade allowed. (3H,3C) I,II,III,IV.

2105-2106: INTERMEDIATE FRENCH  
Emphasizes comprehension of written and spoken French, communication in French, literature, and culture of French-speaking world. X-grade allowed. Pre: 1106 for 2105; 2105 for 2106. (3H,3C) I,II.

2164: INTERMEDIATE BUSINESS FRENCH  
This course emphasizes all four language skills (reading, writing, speaking, and listening) by focusing on various facets of the world of business and technology. It also develops students' understanding of French institutions and business practices. Pre: 2105. (3H,3C) II.

2714 (HUM 2714): INTRODUCTION TO FRENCH CULTURE AND CIVILIZATION  
French culture and civilization from the Middle Ages to the present. Interdisciplinary approach to literature, film, art, architecture, and theatre in the context of French cultural history. In English. (3H,3C)

2794H: INDEPENDENT STUDY  
Variable credit course.

2964: FIELD STUDY  
Pass/Fail only. Variable credit course.

2974: INDEPENDENT STUDY  
Variable credit course.

2974H: INDEPENDENT STUDY  
Honors section. Variable credit course.

2984: SPECIAL STUDY  
Variable credit course.

3105,3106: GRAMMAR, COMPOSITION AND CONVERSATION

Progressive and comprehensive review of French syntax and morphology. Practice in written and oral expression in French on a variety of topics in French culture. Conducted in French. May be taken out of sequence. X-grade allowed. Pre: 2106. (3H,3C) I,II.

#### 3125-3126: FRENCH FOR ORAL PROFICIENCY

For acquisition of measured levels of proficiency in speaking and understanding spoken French. Content-based instruction in small groups. 3125: to achieve an oral proficiency rating comparable to "Intermediate-high" on the American Council on the Teaching of Foreign Languages Oral Proficiency Interview (ACTFL-OPI) or "S -1+" on the Foreign Service Institute (FSI) scale. 3126: to achieve an oral proficiency rating comparable to "Advanced" on the ACTFL-OPI or a "2" on the FSI scale. Admission by oral exam. Pass/Fail only. X-grade allowed. Pre: 3105, 3106. (3H,3C) I,II.

#### 3164: ADVANCED BUSINESS FRENCH

In this skills-based course, students learn to use appropriate French technical vocabulary for different business contexts, do translation, write professional correspondence, and read articles related to the worlds of business, economics, and finance. Cross-cultural differences regarding the work place are also a focus of the course. I Pre: 3105, 3106. (3H,3C)

#### 3195-3196: FRENCH FOR READING KNOWLEDGE

3195: Fundamentals of grammar with emphasis on idiomatic patterns and translation technique. 3196: Continues presentation of grammar with increasing emphasis on directed translation of material chosen from the student's major field of interest. Primarily for graduate students. Partially duplicates 1105-1106. Does not satisfy the Arts and Sciences core curriculum foreign language requirement. (2H,2C) I,II,III,IV.

#### 3205,3206: FRENCH CULTURE AND CIVILIZATION

3205: Patterns of French life and culture in the context of social, intellectual, and institutional changes from the Middle Ages to the French Revolution. 3206: From the French Revolution to the present with an introduction to other francophone parts of the world. Pre: (3105, 3106). (3H,3C) 3205: I,II; 3206:

#### 3304: INTRODUCTION TO FRENCH LITERATURE

Introduction to French literature through analysis and discussion of selected texts from different periods and genres. Methods, terminology, and practice of literary analysis. Intensive writing component. X-grade allowed. Pre: 2106. (3H,3C) II.

#### 3305,3306: SURVEY OF FRENCH LITERATURE

Readings in French literature from the Middle Ages to the present to acquaint students with literary techniques and contexts. Pre: 3304, 3105, 3106. (3H,3C)

#### 3314: INTRODUCTION TO FRANCOPHONE STUDIES

Introduction to the literatures and cultures of French- speaking countries outside of France including North Africa, the Caribbean, Sub-Saharan Africa, and Quebec. Examination of thematic and cultural aspects of literatures of these regions within their socio-historical contexts; explorations of such notions as postcolonialism, identity, race, and nation as they relate to the legacy of colonial France. Pre: 3105, 3106, 3304. (3H,3C)

#### 3404 (ENGL 3404): FRENCH LITERATURE IN ENGLISH

Variable content course devoted to the study of major writers or periods of French literature. May be repeated with different content. May not be taken for credit toward One 2000 level English literature course required. (3H,3C)

#### 3954: STUDY ABROAD

Variable credit course. X-grade allowed.

#### 4154: ADVANCED COMPOSITION AND STYLISTICS

Intensive work in written French. Development of the student's ability to write clear, correct, and articulate French in a variety of modes (e.g., epistolary style, the formal and informal essay). Writing intensive. Pre: 3106. (3H,3C)

#### 4164: SPECIAL TOPICS IN BUSINESS FRENCH

A variable content course devoted to developing and perfecting highly advanced language skills through the study of special topics in the French and francophone business worlds. Emphasis on a mastery of specialized French for professional settings. May be repeated for credit with different content. Taught even years. Pre: 3106, 3164. (3H,3C) II.

#### 4314: STUDIES IN FRENCH LITERATURE

In-depth study of a selected topic in French literature, such as an author, a group of authors, a literary movement or genre during a specific period of French literary history (i.e., Voltaire, the Pleiade, Romanticism, the nouveau roman). May be repeated for credit with different content. Pre: 3105, 3106, (3305 or 3306 or 3314). (3H,3C) I,II.

#### 4324: SPECIAL TOPICS IN FRENCH LIFE, LITERATURE AND LANGUAGE

In-depth study of a selected topic in French culture or language as manifested in creative and historical literature, music, art, film, etc., such as phonetics, translation techniques, or the staging of dramatic works in French. May be repeated for credit with different content. Pre: (3105, 3106) or (3205, 3206). (3H,3C) I,II.

#### 4794: SENIOR TUTORIAL IN FRENCH STUDIES

Individual or small group sessions which give the student the opportunity to hone special language skills, with a focus on post-graduation application of these skills. May concentrate on areas such as technical or business language, linguistics, translation, interpreting, creative writing, specialized literary, or cultural studies. May be taken twice for credit with different content. Must be pre-arranged three weeks before end of previous semester. One 4000 level French course, senior standing, French major, and consent of French Section required. (1H,1C) I, II.

#### 4964: FIELD STUDY

Pass/Fail only. Variable credit course.

4974: INDEPENDENT STUDY  
Variable credit course. X-grade allowed.

4974H: INDEPENDENT STUDY  
Variable credit course.

4984: SPECIAL STUDY  
Variable credit course.

4994: UNDERGRADUATE RESEARCH  
Variable credit course.

4994H: UNDERGRADUATE RESEARCH  
Variable credit course.

## **German Undergraduate Courses (GER)**

1105-1106: ELEMENTARY GERMAN  
Fundamentals of the German language with emphasis on grammar, reading, composition, and conversation. 1105: for students with no prior knowledge of the language; 1106: for students who have completed 1105 or less than three years in high school. (3H,3C) I,II.

1114: ACCELERATED ELEMENTARY GERMAN  
Proficiency-oriented approach to elementary German, designed for learners who wish to progress rapidly through the beginning stages of language learning. It develops the four language skills (speaking, listening, reading, writing) in a cultural context. Partially duplicates GER 1105 and 1106. (6H,6C)

2105-2106: INTERMEDIATE GERMAN  
Review of grammar with increasing emphasis on reading, writing, and oral communication. Pre: 1106. (3H,3C) I,II.

2114: ACCELERATED INTERMEDIATE GERMAN  
Proficiency-oriented approach to intermediate German, designed for learners who wish to progress rapidly through the intermediate stages of language learning. The course strengthens the four language skills (speaking, listening, reading and writing) in a cultural context. Accelerated version of GER 2105-2106. Pre: 1106. (6H,6C)

2724 (HUM 2724): INTRODUCTION TO GERMAN CULTURE AND CIVILIZATION  
German culture and civilization from the earliest period to the present. Interdisciplinary approach to literature, film, art, architecture, music, and theatre in the context of German cultural history. In English. (3H,3C)

2964: FIELD STUDY  
Pass/Fail only. Variable credit course.

2974: INDEPENDENT STUDY  
Variable credit course.

2974H: INDEPENDENT STUDY  
Variable credit course.

2984: SPECIAL STUDY  
Variable credit course.

3104: COMMERCIAL GERMAN  
Development and application of written and oral German needed for commercial transactions: reading of business letters and journals; composition of business correspondence; participation in business meetings; business etiquette in German-speaking countries. Pre: 2106. (3H,3C)

3105,3106: GRAMMAR, COMPOSITION AND CONVERSATION  
Progressive and comprehensive review of German syntax and morphology. Practice in written and oral expression in German on a variety of topics in German culture. 3106 Writing intensive. Pre: 2106. (3H,3C) I,II.

3125-3126: GERMAN ORAL PROFICIENCY  
For acquisition of measured levels of proficiency in speaking and understanding spoken German. Content-based instruction in small groups. 3125: to achieve an oral proficiency rating comparable to "Intermediate-high" on the American Council on the Teaching of Foreign Languages Oral Proficiency Interview (ACTFL-OPI) or "S-1+" on the Foreign Service Institute (FSI) scale. 3126: to achieve an oral proficiency rating comparable to "Advanced" on the (ACTFL-OPI) or a "2" on the FSI scale. Admission by oral exam. Taught alternate years. Pass/Fail only. (3H,3C) I,II.

3195-3196: GERMAN FOR READING KNOWLEDGE  
3195: Fundamentals of grammar with emphasis on idiomatic patterns and translation technique; 3196: Continues presentation of grammar with increasing emphasis on directed translation of material chosen from the student's major field of interest. Primarily for graduate students. Partially duplicates 1105-1106. Does not satisfy the Arts and Sciences core curriculum foreign language requirement. (2H,2C) I,II,III,IV.

#### 3204: CULTURE OF THE GERMAN-SPEAKING COUNTRIES

Study of German, Austrian, and Swiss culture and civilization from the Middle Ages to the present, including literature, art, architecture, film, and music. Pre: 3104 or 3105 or 3106. (3H,3C)

#### 3305,3306: SURVEY OF GERMAN LITERATURE

3305: Readings in major works of German literature from the late Middle Ages to the end of Classicism. 3306: Readings in major works of German literature from Romanticism to the end of World War II. Pre: 3105 or 3106. (3H,3C) I,II.

#### 3414 (ENGL 3414): GERMAN LITERATURE IN ENGLISH

A variable content course devoted to the study of major German literary works in English translation. May be repeated with different content. May not be taken for credit toward a major or minor in a foreign language. No knowledge of German required. In English. One 2000- level English literature course required. (3H,3C)

#### 3474: TOPICS IN GERMAN CINEMA

This course introduces students to critical issues in the history of German Cinema. It examines the aesthetic characteristics of each major period, with an emphasis on cinematic trends and the way in which film reflects cultural developments in German-speaking countries. The specific thematic content is variable. The course is taught in English. It may be taken twice for credit with different content. (3H,3C)

#### 3954: STUDY ABROAD

Variable credit course. X-grade allowed.

#### 4154: ADVANCED COMPOSITION AND STYLISTICS

Intensive advanced work in written German. Development of the student's ability to write clear, correct, and articulate German in a variety of modes. Style analysis. Writing intensive. Pre: 3106. (3H,3C)

#### 4304: AGE OF GOETHE

Major writers of the age of Goethe: Goethe, and Schiller; the development of German Classicism. Pre: 3106, 3306. (3H,3C)

#### 4314: STUDIES IN 19TH-CENTURY LITERATURE

Variable content course devoted to the study of 19th century drama, lyric, and prose. May be repeated for credit with different content. Pre: 3106, 3306. (3H,3C)

#### 4324: STUDIES IN 20TH-CENTURY LITERATURE

A variable content course devoted to the study of major literary works of the 20th century. May be repeated for credit with different content. Pre: 3106, 3306. (3H,3C)

#### 4334: SPECIAL TOPICS IN GERMAN LIFE, LITERATURE, AND LANGUAGE

Variable content course devoted to the study of various aspects of German culture, literature, and language. May be repeated for credit with different content. Pre: (3105 or 3106), (3305 or 3306). (3H,3C)

#### 4794: SENIOR TUTORIAL IN GERMAN STUDIES

Individual or small group sessions which give the student the opportunity to hone special language skills, with a focus on post-graduation application of these skills. May concentrate on areas such as technical or business language, linguistics, translation, interpreting, creative writing, specialized literary, or cultural studies. Must be pre-arranged three weeks before end of previous semester. May be taken twice for credit with different content. PRE: one 4000-level German course, major with senior standing, and consent required. (1H,1C) I,II.

**TOP****Spanish Undergraduate Courses (SPAN)****1105-1106: ELEMENTARY SPANISH**

Fundamentals of grammar, composition, and oral skills. Readings carefully selected for comprehension and simple conversation. 1105 for students with no high school Spanish; 1106 for students who have completed 1105 or who have less than three years of high school Spanish. (3H,3C) I,II,III, IV.

**1114: ACCELERATED ELEMENTARY SPANISH**

Condenses SPAN 1105 and 1106. Proficiency-oriented approach to elementary Spanish, designed for learners with some prior experience in the language or for those who wish to progress rapidly through the beginning stages of language learning. Supplemented with a self-instructional electronic component. Meets University and college foreign language requirement. SPAN 1114 duplicates SPAN 1106. (3H,2L,4C) I,II.

**2105-2106: INTERMEDIATE SPANISH**

Review of grammar with increasing emphasis on reading, writing, and oral communication. X-grade allowed. Pre: 1106 for 2105; 2105 for 2106. (3H,3C) I,II.

**2114: SPANISH FOR AGRICULTURE AND RELATED FIELDS**

Vocabulary, idiomatic expressions, and agricultural terminology at the intermediate level. Cultural idiosyncrasies and customs of rural Spanish America. For students with career interests in agriculture, food production, nutrition, veterinary medicine, or rural development. Particularly suited for students following the Agriculture-Home Economics-Foreign Language option in International Studies. May substitute for SPAN 2106 but may not duplicate it for credit. Pre: 2105. (3H,3C)

**2154 (HORT 2154): SPANISH FOR THE GREEN INDUSTRY**

Dialogue-based language course focusing on the vocabulary and grammatical structures pertaining to Green and Agricultural Industry jobs. Includes vocabulary and context specific to jobs and workers in greenhouse, nursery, turf and landscape environments. Spanish culture is included throughout the course along with grammar and structure. Prior study in Spanish is helpful but not required. I, II. (3H,3C)

**2744 (HUM 2744): INTRODUCTION TO SPANISH CULTURE AND CIVILIZATION**

Introduction to Spanish culture and civilization from the Middle Ages to the present. Interdisciplinary approach combining the study of literature, the arts, architecture, music, theatre, and film in the context of Spanish cultural history. In English. (4H,3C)

**2754 (HUM 2754): INTRODUCTION TO SPANISH-AMERICAN CULTURE AND CIVILIZATION**

Spanish-American culture and civilization from the discovery of the New World to the present. Interdisciplinary approach to literature, film, art, architecture, music, and theatre in the context of Spanish-American cultural history. In English. (3H,3C)

**2774: MINORITY LANGUAGES IN THE SPANISH-SPEAKING CONTEXT**

Examination of language policies and practices with regard to minority languages across the Spanish-speaking context, histories of minority languages in Spanish-speaking areas, and the current socio-political situations of these languages and their speakers; exploration of issues concerning linguistic rights, such as access to education, economic opportunities, and political status; analysis of the implications of restrictions on minority groups' linguistic rights; and discussion of why some minority-language speakers have been more successful in their language conservation or revitalization efforts than others. In English. Does not count toward the Spanish major or minor (3H,3C)

**2964: FIELD STUDY**

Pass/Fail only. Variable credit course.

**2974: INDEPENDENT STUDY**

Variable credit course.

**2974H: INDEPENDENT STUDY**

Variable credit course.

**2984: SPECIAL STUDY**

Variable credit course.

**3104: COMMERCIAL SPANISH**

Vocabulary, idiomatic expressions, business letters, and customs common to the Spanish-speaking commercial milieu. For students who would like to apply their language knowledge to careers in the business world. X-grade allowed. Pre: 3105. (3H,3C)

**3105-3106: GRAMMAR, COMPOSITION AND CONVERSATION**

Practice in communication skills in Spanish both orally and in writing, including review of grammar, directed composition, and conversation, with an emphasis on pronunciation and oral expressions. Not recommended for native speakers of Spanish. Pre: 2106 for 3105; 3105 for 3106. (3H,3C) I,II.

**3125-3126: SPANISH FOR ORAL PROFICIENCY**

For acquisition of measured levels of proficiency in speaking and understanding spoken Spanish. Content-based instruction in small groups. 3125: to achieve an oral proficiency rating comparable to "Intermediate-high" on the American Council on the Teaching of Foreign Languages Oral Proficiency Interview (ACTFL-OPI) or "S-1+" on the Foreign Service Institute (FSI) scale. 3126: to achieve an oral proficiency rating comparable to "Advanced" on the (ACTFL-OPI) or a "2" on the FSI scale. Admission by oral exam. Pass/Fail only. (3H,3C) I,II.

**3304: INTRODUCTION TO HISPANIC LITERATURE**

Introduction to Hispanic literature through analysis and discussion of selected major texts from Spain and Spanish America. Methods, terminology, and practice of literary analysis. X-grade allowed. Pre: 3106. (3H,3C) II.

**3404: EARLY PENINSULAR CULTURE AND LITERATURE**

This course examines Spain's construction of a cohesive national identity as it comes together to form a nation and to become a leading world empire. Exploring the development of Spain from pre-history to the end of the Golden Age in 1700, the class engages diverse literary and cultural texts in dialogue with the key historical and political events of their period in order to provide a greater appreciation of how various cultural media interact with one another in the construction of an overall national identity. Pre: 3304. (3H,3C)

**3414: MODERN PENINSULAR CULTURE AND LITERATURE**

This course examines Spain's efforts to re-construct itself in the years following the waning of its imperial power. Exploring the development of Spanish identity from 1700 to the present, the class examines diverse literary and cultural texts within the historical, political, and social context in which they were created. The course treats canonical as well as non-canonical texts, from both "high" and "popular" culture, and includes narrative, poetry, theatre, film, art, and architecture. Pre: 3304. (3H,3C)

**3434 (ENGL 3434): HISPANIC LITERATURE IN ENGLISH**

Variable content course devoted to the study of major works of Spanish and Spanish-American literature in translation. May be repeated with different content. May not be taken for credit toward a major or minor in Spanish. No knowledge of Spanish required. In English. One 2000-level English literature course required. (3H,3C)

**3444: EARLY SPANISH-AMERICAN CULTURE AND LITERATURE**

This course traces the cultural development of Spanish America from the pre-Hispanic era to independence from Spain in the 19th century. Key literary and cultural texts are examined within the historical, political, and social context in which they were created. The course includes historical texts, narrative, poetry, drama, art, architecture, and music. Pre: 3304. (3H,3C)

#### 3454: MODERN SPANISH-AMERICAN CULTURE AND LITERATURE

This course combines Spanish-American civilization, culture, and literature from the 19th century period of independence to the present. Key literary and cultural texts are examined within the historical, political, and social context in which they were created. The course treats canonical as well as non-canonical texts, from both "high" and "popular" culture, and includes historical texts, narrative, poetry, drama, film, art, architecture, and music. Pre: 3304. (3H,3C)

#### 3464: MODERN MEXICAN AND CENTRAL AMERICAN CULTURE AND LITERATURE

Exploration of the civilization, culture, and literature of Mexico and Central America, spanning the 19th century post-independence period to the present; examination of literary and cultural texts within the historical, political, and social context in which they were created; study of canonical as well as non-canonical texts, from both "high" and "popular" culture, including historical texts, narrative, poetry, drama, film, art, architecture, and music. Taught in Spanish. Pre: 3304. (3H, 3C)

#### 3474: MOD SPANISH CARIBBEAN CULT LIT

Exploration of the civilization, culture, and literature of the Spanish Caribbean, spanning the 19th century post-independence period to the present; examination of literary and cultural texts within the historical, political, and social context in which they were created; study of canonical as well as non-canonical texts, from both "high" and "popular" culture, including historical texts, narrative, poetry, drama, film, art, architecture, and music. Taught in Spanish Pre: 3304. (3H,3C)

#### 3484: MOD ANDEAN/S CONE CULT LIT

Exploration of the civilization, culture and literature of the Andean and Southern Cone regions of South America, spanning the 19th century post-independence period to the present; examination of literary and cultural texts with the historical, political, and social context in which they were created; study of canonical as well as non-canonical texts, from both "high" and "popular" culture, including historical texts, narrative, poetry, drama, film, art, architecture, and music. Taught in Spanish Pre: 3304. (3H,3C)

#### 3494: INTRODUCTION TO HISPANIC LINGUISTICS

Introduction to fundamental concepts of Hispanic linguistics; exploration of context-appropriate language use; examination of linguistic properties in Spanish (phonetics/phonology, morphology, syntax, and semantics/pragmatics); development of analytical tools necessary to explore the relationship between the Spanish language and Hispanic cultural practices; and application of knowledge of linguistics to hands-on activities. In Spanish. Pre: 3304 (3H,3C)

#### 3514: SPANISH FOR THE MEDICAL PROFESSIONS

Specialized course applying knowledge of the Spanish language and its culture to the medical professions. Contextualized use of specific vocabulary, idiomatic expressions, and cultural practices in real-world situations. Taught in Spanish. Pre: 3304. (3H,3C)

#### 3524: INTRODUCTION TO SPANISH TRANSLATION

Introduction to the translation of various types of texts, such as literature, business correspondence, commercial advertising, and legal documents. Includes translation from English to Spanish and from Spanish to English, as well as a thorough review of Spanish grammar and idiomatic language. Taught in Spanish. Pre: 3304. (3H,3C)

#### 3684: CROSSING THE BORDER: LIVING THE LITERATURE

Experiential education in the local Latino community through academic readings, community experience, journal reflections, and classroom discussions. Includes 50 hours per semester of interaction with Latino families in their homes, exchanging culture and language with recent immigrants to the New River and Roanoke Valleys. Pre: 2106. (3H,3C)

#### 3954: STUDY ABROAD

Variable credit course. X-grade allowed.

#### 3984: SPECIAL STUDY

Variable credit course.

#### 4104: ADVANCED GRAMMAR AND STYLE

Analysis of and practice with advanced grammatical and stylistic concepts, including idiomatic and colloquial usage. Intended to help advanced students achieve high levels of proficiency in writing and speaking Spanish. X-grade allowed. Pre: 3105. (3H,3C) II.

4114: TOPICS IN SPANISH LINGUISTICS Variable content course that surveys linguistic concepts and methods as related to the Spanish language. Topics may include the study of the phonology, morphology, syntax, and semantics of Spanish; the pedagogical application of these language systems; the psychological and social context of language; and the development of Spanish from its origins to its modern form. May be repeated for credit with different content. I Pre: 3105. (3H,3C)

#### 4124: SPANISH TRANSLATION: THEORY AND TECHNIQUE

Introduction to translation theories and application of these theories to different types of texts, including literature, business correspondence, commercial advertising, and legal documents. Includes translation from English to Spanish and from Spanish to English, as well as a thorough review of Spanish grammar and idiomatic language. Pre: 3105. (3H,3C)

#### 4304: STUDIES IN MEDIEVAL AND GOLDEN AGE LITERATURE

A variable content course devoted to Hispanic literature of the Middle Ages and of the Golden Age. The texts selected are studied not only for their aesthetic value but also for their historical and cultural significance. May be taken twice for credit with different content. I Pre: 3404. (3H,3C)

#### 4314: STUDIES IN 18TH AND 19TH CENTURY LITERATURE

A variable content course devoted to Hispanic literature of the 18th and 19th centuries. The texts selected are studied not only for their aesthetic value but also in terms of their historical and cultural significance. May be taken twice for credit with different content. Taught alternate years. I

Pre: 3414 or 3444 or 3454. (3H,3C)

#### 4324: STUDIES IN 20TH CENTURY LITERATURE

A variable content course devoted to Hispanic literature of the 20th century. Texts are selected not only for their aesthetic value but also in terms of their historical and cultural significance. May be taken twice for credit with different content. Taught alternate years. Prerequisite 3404 or 3414 for Spain course; 3444 or 3454 for Spanish American course. II Pre: 3414 or 3454. (3H,3C)

#### 4334: SPECIAL TOPICS IN HISPANIC LIFE, LITERATURE, AND LANGUAGE

Broad central themes of Hispanic culture as manifested in creative and historical literature, music, art, film, etc., or in language, such as the history of the Spanish language, translation techniques, or the staging of dramatic works in Spanish. Historical and/or national boundaries are crossed whenever the nature of the topic permits. May be repeated for credit with different content. Taught alternate years. X-grade allowed. Pre: 3454. (3H,3C) II.

#### 4344: SPANISH-AMERICAN LITERATURE AND THE REPRESENTATION OF HISTORY

This is a variable content course that allows students to explore different geographical regions of Spanish America and the ways that authors have used literature to preserve, recreate, revise, subvert, and even contradict their countries' official history. All discussion conducted in Spanish. May be repeated for credit up to three times with different content. Pre: minimum oral proficiency of "Advanced" on the ACTFL scale; at least one prior 4000-level course in Hispanic literature, or consent. Pre: 3454 or 3444. (3H,3C)

#### 4794: SENIOR TUTORIAL IN SPANISH STUDIES

Individual or small group sessions which give the student the opportunity to hone special language skills, with a focus on post-graduation application of these skills. May concentrate on areas such as technical or business language, linguistics, translation, interpreting, creative writing, specialized literary, or cultural studies. May be taken twice for credit with different content. Must be pre-arranged three weeks before end of previous semester. One 4000 level Spanish course required. Restricted to Seniors. Restricted to Spanish majors. Consent of Spanish Section required. (1H,1C) I,II,III,IV.

#### 4964: FIELD STUDY

## Overview

The study of history enables students to learn about the people and events of the past. In the process, it also helps them develop their ability to think logically, to conduct research, and to analyze the various ways in which the past continues to shape the present.

The history curriculum prepares students for graduate or professional schools; positions in teaching, business, or government; and a variety of other careers. Faculty advisors are available to consult with students regarding career choices, education certification, and internships, as well as to provide assistance in planning general academic progress. An honors program is offered for outstanding history majors.

Courses at the 1000 level are introductory surveys open to anyone with an interest in history but without a strong background in the subject. Students intending to continue in history should take these courses in their freshman or sophomore years. Courses at the 2000 level, with the exception of Historical Methods, are national surveys for a general undergraduate audience. Courses at the 3000 level, primarily for sophomores and above, provide more focused and detailed study of a period, place, or topic introduced at the 1000 or 2000 level. Courses at the 4000 level are conducted as seminars that emphasize original writing and research, and are generally restricted to students with junior standing or above who have already taken six hours or more of college-level history.

In addition to fulfilling the requirements of the Curriculum for Liberal Education, history majors must complete 39 hours of course work in history including: no more than nine hours at the 1000 level (all of which must be taken before the senior year); History 2004 (must receive a "B-" or better if no option is chosen; "B" or better if one of the four options is selected); at least 24 hours of course work at the 2000 or 3000 levels distributed among the four groups identified on the department's Information Sheet for Majors (available at the departmental office or on the department's Homepage); three hours of course work at the 4000 level.

Majors may select a concentration within the history major. Concentrations require that at least 12 of the 24 hours of history taken at the 2000 or 3000 level be appropriate to the field of concentration, and the completion of 6 hours of undergraduate research. Concentrations are available in: Military/Political/Diplomatic History; Social/Cultural/Economic History; Global/Comparative History; and History of Science/Technology/Environment.

A faculty advisor and/or professional advisor will assist each major in planning a suitable course of study. The student is expected to confer with the faculty advisor at regular intervals regarding the progress of his or her studies.

**To earn a minor in history**, a student must complete satisfactorily (with at least a 2.0 average) a minimum of 18 hours of history courses. These 18 hours must include at least three hours of credit from each of three of the four groups of history courses identified on the Information Sheet for Majors. For purposes of the minor, History 1115 and 1116 may be considered as Group I credit; History 1024, 1025, and 1026 may be considered as Group II credit; and History 1214 and 1224 may be considered as Group III credit. At least six of the 18 hours must be on the 2000 level or above, and at least six more of the 18 hours must be at the 3000 level or above. Students must have a minimum 3.0 overall GPA to enter the minor.

## Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the Curriculum for Liberal Education (see "[Academics](#)") and toward the degree in history.

Satisfactory progress toward the B.A. in history requires that:

- Upon having attempted 18 semester credits of history, must have an in-major GPA of 2.5 or above
- Upon having attempted 72 semester credits (including transfer, advanced placement, advanced standing, credit by examination, freshman rule), students must have completed:

HIST 2004: Historical Methods (with grade of "B-" or above)	3
History electives	12
<b>Total Credits</b>	<b>(15)</b>

- Upon having attempted 96 semester credits, students must have an in-major grade point average of 2.0 or above.
- Students must earn a C- or above for a history course to count toward their major requirements.

## Major Restrictions

History is a restricted major. The criteria for entering the major include: a) Completion of first-year writing requirement (ENGL 1105-06, COMM 1015-16, or ENGL 1204H) with an average GPA of 2.5; b) completion of at least 9 semester credits of history at Virginia Tech, with an average GPA of 2.5 or above in all of those classes; c) minimum of 2.0 GPA overall; 4) applicants are considered on a competitive GPA and space available basis. Secondary majors and minors must have a minimum 3.0 GPA overall to enter the major or minor.

## Undergraduate Courses (HIST)

### 1004: INTRODUCTION TO THE HISTORY OF THE UNITED STATES

A thematic approach to the history of the United States from pre-independence to the present. Major themes, developed within broad chronological units, will include: the contours of political democracy, and civic culture; the rise of an industrial, corporate, and global economy; territorial expansion and increasing involvement in world affairs; the impact of science and technology on public policy and daily life; the relationship between religion and society; and the development of a multicultural America. This course fulfills the university requirement for proficiency in American History. Partially duplicates 1115 and 1116. No credit will be allowed for duplicating courses. (3H,3C)

### 1014 (AAEC 1014): SURVEY OF AMERICAN ECONOMIC HISTORY

Overview of the major themes in the transformation and change of the United States economy and the economic life of its citizens from the colonial period to the present. Economic growth and change are described within contemporary social, political and cultural contexts. Broad themes include the transformation of an agrarian economy into an industrial economy, the changing nature of work, the role of government in the economy, and the performance of the economy over time. (3H,3C)

### 1024: ANCIENT HISTORY

History of the ancient world from the invention of writing after 10,000 BC to the fall of the Roman Empire in the fifth century AD. Surveys the civilizations of the Ancient Near East (including Egypt and Anatolia), Greece, and Rome. (3H,3C)

### 1025,1026: INTRODUCTION TO EUROPEAN CIVILIZATION

Significant problems and processes in the history of Europe from the Middle Ages to the recent past. 1025: From Medieval society to the mid-18th century; 1026: Mid-18th-century to the recent past. Sequence is recommended in preparation for advanced courses in European history. (3H,3C)

### 1115,1116: HISTORY OF THE UNITED STATES

Stresses fundamental facts and interpretations in American history. 1115: 1607 to Civil War; 1116: Civil War to present. Sequence is recommended preparation for advanced courses in American history. Students who have taken 1004 may not take 1115 or 1116 for credit. (3H,3C)

### 1214: HISTORY OF THE MODERN WORLD

An examination of the global significance of the critical political, social, cultural, and international issues in the 20th century. (3H,3C)

### 1224: INTRODUCTION TO LATIN AMERICA

The peoples of Latin America from the earliest times to the present. Historical approach to understanding ancient and contemporary cultures, their environmental impact, and their socio-political dynamics from Mexico to Tierra del Fuego over 5000 years. (3H,3C)

### 2004: HISTORICAL METHODS

Explanation of the discipline of history: its history, philosophies, and methods, with emphasis on historical research. (3H,3C)

### 2054 (STS 2054): ENGINEERING CULTURES

Development of engineering and its cultural roles in historical and cross-national perspectives. Explores roles of engineers and engineering in popular life, development of national styles, changing values in engineering problem solving, and effects of evolving forms of capitalism. (3H,3C)

### 2104H: CRITICAL ISSUES IN AMERICAN HISTORY

This course allows Honors students to explore more thoroughly selected themes in the history of the United States, from its initial settlement to the present. Students must have University Honors status or permission of the instructor to take this course. (3H,3C)

#### 2114H: CRITICAL ISSUES IN EUROPEAN HISTORY

An exploration of critical issues in modern European history, through the study of source materials and historical interpretations. University Honors standing is required. (3H,3C)

#### 2124: CRITICAL ISSUES IN WORLD HISTORY

An examination of significant themes and important topics in world history. (3H,3C)

#### 2155,2156: HISTORY OF ENGLAND

Development of English culture, society, and institutions from the Anglo-Saxon invasions to the present. Stress on the growth of law, government, and the constitution. 2155: 450 A.D. to 1702; 2156: since 1702. (3H,3C)

#### 2165,2166: HISTORY OF FRANCE

French history from Roman Gaul to the present. 2165: Roman, Medieval, and Renaissance France; Absolute Monarchy. 2166: The Revolution; Nineteenth and Twentieth Century France. (3H,3C)

#### 2184: HISTORY OF THE BALKANS

History of Southeastern Europe from the sixth century to the present. Chief themes are movement of peoples, Byzantine and Ottoman Empires, religious conflicts, social developments, and rival nationalisms. (3H,3C)

#### 2304: AFRICA IN THE MODERN WORLD

The peoples and societies of Africa. Emphasis on major themes and developments since the eighteenth century. Historical approach to understanding indigenous African cultures and their encounters with global forces. Concentration on African achievements, the response to colonialism, the rise of modern nationalism, and the problems and prospects of independent Africa. (3H,3C)

#### 2345,2346: HISTORY OF THE MIDDLE EAST

History of the Middle East from the seventh century to today, with emphasis on formation of Islamic civilization, medieval and early modern political systems, European imperialism, and the struggle for independence. 2345: seventh century to 1914; 2346: independence, wars, revolutions, and social change since 1914. (3H,3C)

#### 2355,2356: HISTORY OF CHINA

China from prehistory to the present. Special attention to political, social, economic, and cultural developments. 2355: Prehistory, Imperial China to the sixteenth century; 2356: late Imperial China to modern and contemporary China. (3H,3C)

#### 2364: HISTORY OF JAPAN

Political, social, economic, and cultural development of Japan from earliest times to present; emphasis on problems of modernization in the nineteenth and the twentieth centuries. (3H,3C)

#### 2375,2376: HISTORY OF THE INDIAN SUBCONTINENT

History of the Indian subcontinent (South Asia) from ancient times to the present, with special emphasis on cultural developments. 2375: Development of traditional South Asian civilization from ancient times to 1500; 2376: Development of modern South Asian civilization since 1500. (3H,3C)

#### 2964: FIELD STUDY

Pass/Fail only. Variable credit course.

#### 2974: INDEPENDENT STUDY

Variable credit course.

#### 2974H: INDEPENDENT STUDY

Variable credit course.

#### 2984: SPECIAL STUDY

Variable credit course.

#### 2984H: SPECIAL STUDY

Variable credit course.

#### 3004: COLONIAL AMERICA

Critical analysis of early American society. Founding and development of the colonies in the 17th century; 18th century colonial life. (3H,3C)

#### 3014: AMERICAN REVOLUTION

Causes, nature, and results of the American Revolution, 1763- 1789. (3H,3C)

#### 3024: THE EARLY UNITED STATES

A study of social, political, and economic developments in the United States between 1790 and 1845 with special emphasis on the Industrial and Transportation Revolutions in the North and Old Northwest. (3H,3C)

#### 3055,3056: CIVIL WAR AND RECONSTRUCTION

Causative forces leading to war, political, military, and social study of the Civil War, with emphasis on the Southern Confederacy; the levying and

legacy of Reconstruction. 3055: 1820-1862; 3056: 1862-1877. (3H,3C)

**3064: EMERGENCE OF MODERN AMERICA**

1877-1917 American from end of Reconstruction to World War I: industrial and urban growth, the last frontier, worsening status for blacks, immigration and new ethnic currents, Populism and Progressivism, cultural ferment, and overseas expansion, America's entry on the world stage. (3H,3C)

**3084: RECENT AMERICA 1917-PRESENT**

Social, economic, cultural, and political history of America from the entry into World War I, the turbulent 1920's, the Great Depression, the New Deal, World War II, postwar prosperity, the Cold War, social and cultural ferment, Vietnam, Watergate, to the new anxieties about the limits of power in the 1980's. (3H,3C)

**3104: UNITED STATES SOCIAL HISTORY**

Examination of the lives of ordinary people in order to understand the human experience through a focus on race, ethnicity, class, gender, and region. (3H,3C)

**3105,3106: WOMEN IN US HISTORY**

Roles of women from colonial settlement to the present. Special attention to family experiences, political agendas, and economic contributions of women and to social construction of gender identities. 3105: to 1865; 3106: since 1865. (3H,3C)

**3114: UNITED STATES BUSINESS HISTORY**

Survey of U.S. business history from colonial times through the present. Formation of business institutions, specialization of commercial functions, rise of big business, and development of oligopolies, conglomerates, and multinational corporations. (3H,3C)

**3124: HISTORY OF AMERICAN AGRICULTURE**

Changes in farming and the relation between farming and society, politics, and economics. Stresses development of modern agriculture in America. (3H,3C)

**3134: SPORTS IN AMERICAN HISTORY**

Impact of sports in American history. Emphasis on the impact of team sports (college and professional basketball, baseball, and football) and individual sports (golf, boxing, and automobile racing) have had on the development of American society and culture. (3H,3C)

**3144: AMERICAN ENVIRONMENTAL HISTORY**

Changing attitudes about nature and wilderness, political decisions, supervisory institutions, and environmental problems that accompanied utilization of America's natural resources. (3H,3C)

**3155,3156: HISTORY OF AMERICAN CITIES**

Growth and development, form and functioning of American cities from the settlement of the country to the present. 3155: 1565 to 1870. 3156: 1870 to the present. (3H,3C) I,II.

**3164: SEXUALITY IN AMERICAN HISTORY**

This course introduces students to how the meaning and place of sexuality in American life have changed from the colonial era through the present, with a focus on the dynamics of race, ethnicity, gender, and class. (3H,3C)

**3174 (AFST 3174): AFRICAN AMERICAN MEN IN UNITED STATES HISTORY**

Chronological and thematic examination of significant historical moments in black men's lives. Examination of the social, cultural, and political forces contributing to a uniquely African American male experience in the United States. Survey of events in America's collective past such as wars, depressions, and protest movements. (3H,3C)

**3175,3176 (AFST 3175, 3176): AFRO-AMERICAN HISTORY**

The Afro-American experience in the United States from 1619 to the present. Emphasis upon slavery and the strategies of economic and social survival in the twentieth century. 3175: 1619-1877. 3176: 1877-present. (3H,3C)

**3184: HISTORY OF UNITED STATES FOREIGN RELATIONS**

American foreign relations with emphasis on the twentieth century and American globalism, domestic influences on foreign policy and interrelationships between foreign and domestic events and ideas. (3H,3C)

**3205,3206: U.S. SOUTH**

The southern experience from Old to New South with emphases upon racial accommodation, social hierarchy, cultural identity, political struggle, and intellectual change. 3205: to 1900; 3206: since 1900. (3H,3C)

**3214: HISTORY OF APPALACHIA**

Early settlement, religion, the pre-industrial economy, the coming of the coal and lumber industries, labor activism, politics, migration, and regional identity. (3H,3C)

**3224: HISTORY OF VIRGINIA**

Social, political, cultural, and economic developments in Virginia, from the sixteenth century to the present. (3H,3C)

**3234: THE NORTH AMERICAN WEST**

A study of the peoples and history of the North American West from the sixteenth century through the twentieth. (3H,3C)

**3254: THE VIETNAM WAR**

A critical study of the causes and consequences of the Vietnam War, 1945-1975. Analysis of America's strategic and military objectives, the nature and conduct of the war, and the growth of the antiwar movement at home. (3H,3C)

**3264: THE UNITED STATES IN LATIN AMERICA**

U.S. political and economic relations with the Latin American republics. Analysis and discussion of the history of formal and informal U.S. diplomacy, military intervention, and economic interests in Latin America during the nineteenth and twentieth centuries. (3H,3C)

**3274: THE GREEK CITY**

History of the ancient Greek city-state (polis) from the Archaic period (800-500 BC) to the creation of the Roman Empire. Principal topics are: origins and definition of the polis; Greek colonization throughout the Mediterranean and Black Seas; the struggle for autonomy in the Classical and Hellenistic periods; and the Hellenizing impact of the polis on non-Greek populations. (3H,3C)

**3284: THE ROMAN REVOLUTION**

History of the Roman world from 264 B.C. to A.D. 180. Particular attention to the three themes of imperialism, revolution, and empire through extensive reading of the contemporary authors. (3H,3C)

**3304: THE WORLD OF ALEXANDER THE GREAT**

The life and times of Alexander the Great, 431 to 323 B.C., and the new cosmopolitan world initiated by his conquests, 323 to 30 B.C. (3H,3C) II.

**3314: THE LATER ROMAN EMPIRE**

Roman Empire in the west from A.D. 180 to A.D. 476 and in the east from A.D. 476 to A.D. 1071. Particular attention to the causes of the fall of the empire in the west and to the Byzantine Empire in the east until the coming of the Turks and the Christian Crusaders. (3H,3C)

**3324: THE MEDIEVAL WORLD**

Characteristic thought and institutions of high and late Middle Ages. (3H,3C)

**3334: THE RENAISSANCE**

The Italian Renaissance in its European context. Emphasis upon the culture and institutions of Italian states from 1300 to 1500. (3H,3C) II.

**3344: THE ERA OF THE REFORMATION**

Development of Protestantism and reformation of the Catholic Church from 1500 to about 1600. Emphasis upon social, political, and economic factors as well as theology. Examination of conflicts engendered by the reformation movements. (3H,3C)

**3364: THE AGE OF REVOLUTION AND NAPOLEON**

The French Revolution in its European and global context, with particular attention to social and political causes of unrest, strategies of popular mobilization, debates about authority and order, the emergence of empires, and the long-term implications of revolutionary change. (3H,3C)

**3384: EUROPE AND WORLD WAR I**

European politics and society before and after World War I. Emphasis on industrialism, imperialism, and the conflicts which they engendered; total war and its aftermath; economic dislocation; strains upon democracy; Fascism, Communism, and the totalitarian state. (3H,3C)

**3394: EUROPE SINCE WORLD WAR II**

Europe's political and economic recovery since 1945; development of the "Cold War"; Soviet Union and Eastern Europe before and after Stalin; Western European integration and development of a consumer society; Ostpolitik and Detente; decolonization and neo-colonialism; Europe's position in the world economy, dependence on imported materials and energy; the Revolutions of 1989 and post-Marxist Eastern Europe. (3H,3C)

**3424: TUDOR AND EARLY STUART ENGLAND**

1509-1660 Causes and consequences of the English Reformation and subsequent Civil War. Decline of royal power and increasing importance of Parliament. Cultural and intellectual developments of the Elizabethan period. (3H,3C)

**3434: LATE STUART AND EIGHTEENTH-CENTURY ENGLAND**

Causes and consequences of the Glorious Revolution, the early Industrial Revolution, and the War of the American Revolution. Establishment of cabinet government and office of Prime Minister. Cultural and artistic developments of the period. (3H,3C)

**3484: TWENTIETH-CENTURY GERMANY**

Political, social, economic, and cultural history of twentieth-century Germany. (3H,3C)

**3494 (JUD 3494): THE HOLOCAUST**

This course provides a historical account, a psychological analysis and an occasion for philosophical contemplation on the Holocaust. We will examine the deliberate and systematic attempt to annihilate the Jewish people by the National Socialist German State during World War II. Although Jews were the primary victims, Gypsies, the handicapped, homosexuals, Jehovah's Witnesses and political dissidents were targeted, we will discuss their faith as well. The class will be organized around the examination of primary sources: written accounts, photographic and film, and personal testimony. (3H,3C)

**3504 (HUM 3504) (REL 3504): THE AGE OF THE CRUSADES**

The origins and development of religious violence examined from an interdisciplinary and cross-cultural perspective; that place of that phenomenon in medieval society. Christianity, Islam, Judaism and their interactions in the medieval world. (3H,3C)

**3505,3506: EUROPEAN DIPLOMATIC HISTORY**

Diplomacy and war among European powers.

3505: Development of the European States System, 1589-1848; 3506: Diplomacy of nation states, 1848-present. (3H,3C)

#### 3514: THE AGE OF EXPLORATION AND CONQUEST

Technological, political, and economic factors that brought about the European exploration of the world from 1450-1770 and the conquest of much of it. The impact of those events on both Europe and the world. (3H,3C)

#### 3524: EUROPEAN MILITARY HISTORY TO 1789

Analysis of change in warfare from the ancient Greeks to the French Revolution. Emphasis on the social and technological causes of military change. (3H,3C)

#### 3534: MODERN MILITARY HISTORY

Evolution of warfare in its political and social setting since the French Revolution. Discussion of both European and American military institutions. (3H,3C)

#### 3544: WORLD WAR II

Causes, course, and results of World War II. Emphasis upon diplomacy and the social impact of total war as well as military events. Coverage will stress the world-wide nature of the war. (3H,3C)

#### 3554: AGE OF GLOBALIZATION

An examination of historical forces in the late twentieth century, including economic trends, ideological forces, social structures, and political relations, that have shaped patterns of globalization. (3H,3C)

#### 3565,3566: HISTORY OF THE CHURCH

The Christian Church from the earliest times to the present. 3565: The early and medieval periods. 3566: The modern period. (3H,3C)

#### 3574: WOMEN IN EUROPEAN HISTORY

Women's historical experience and social roles, attitudes toward women, and the development of feminist thought and activity in Europe since 1500. (3H,3C)

#### 3584: COLONIAL LATIN AMERICA

Major themes and issues in Colonial Latin American History. Discussion of the Spanish and Portuguese empires in the western hemisphere, emphasizing indigenous responses to colonization, the privatization of land and labor, the Church and village as financial and cultural institutions, imperial policies and reforms, and the collapse of empire after 300 years. I (3H,3C)

#### 3594: THE RISE OF MODERN LATIN AMERICA

Major themes and issues in Modern Latin American History. Discussion of the rise of Latin American nations, stressing the internal and external challenges new republics confronted during the nineteenth century and the opportunities and conflicts of the twentieth century. (3H,3C)

#### 3604: RUSSIA TO PETER THE GREAT

Russian history from the founding of Russia in the ninth century to the reign of Peter the Great in the early eighteenth century, with special attention to political developments, changes in society and culture and regional context. (3H,3C)

#### 3614: IMPERIAL RUSSIA

Russian history from Peter the Great to the Revolution of 1917, with special attention to political developments, changes in society and culture, and the impact of the regional context. (3H,3C)

#### 3644: TWENTIETH-CENTURY RUSSIA

The history of the Soviet Union from 1917 to the present, with particular emphasis on collectivization, industrialization, ideology, international relations, and other factors that have determined the peculiar character of the Soviet state. (3H,3C)

#### 3654: THE ARAB-ISRAELI DISPUTE

Historical origins and development of the struggle for Palestine. Emphasis on post-WW II including conflicting nationalisms, wars, history of Israel, and Great Power diplomacy. (3H,3C)

#### 3664: REVOLUTIONARY CHINA

Ideological and institutional development of the Chinese Communist movement since 1920; emphasis on problems of historical change in modern China. (3H,3C)

#### 3684 (HUM 3684): CULTURAL HISTORY OF THE SOVIET UNION AND THE SUCCESSOR STATES

History and main characteristics of cultural life and the arts in the former Soviet Union, with emphasis on film, music, literature, and the relationship between elite and popular culture. (3H,3C)

3694: HISTORY THROUGH FILM This course introduces students to critical issues in history and representation, utilizing film to analyze central historical issues. The specific thematic content is variable. Course may be repeated for up to 9 credits. (3H,3C)

#### 3705,3706 (STS 3705, 3706): HISTORY OF SCIENCE

Conceptual and institutional development of physical and biological sciences viewed within a cultural and societal context. 3705: Early Science; 3706: Modern Science. (3H,3C)

#### 3715,3716 (STS 3715, 3716): HISTORY OF TECHNOLOGY

Description of the development of technology and engineering in their social contexts. 3715: From prehistory to the industrial revolution in Europe and the United States, mid-19th century. 3716: From mid-19th century to the present. (3H,3C)

#### 3724: HISTORY OF DISEASE, MEDICINE, AND HEALTH

Development of Western concepts of disease, medicine, and health with emphasis on period from eighteenth century to present. Social construction of disease and relationship between health and social, economic, and political structures. Special attention to impact of public health and the development of scientific and technological medicine. (3H,3C)

**3734 (STS 3734): HISTORY OF MODERN BIOLOGY**

This course explores the development of biology from the Enlightenment to the end of the twentieth century, with a particular emphasis on biology's impact on society. (3H,3C)

**3744: SOCIAL HISTORY OF FILM**

This course introduces students to critical issues in the social history of film, examining the production and consumption of film in specific historical moments as well as the effects of film on society, culture, and politics. The specific thematic content is variable. May be repeated with different content for a maximum of 9 credits. (3H,3C)

**3954: STUDY ABROAD**

Variable credit course.

**4004: TOPICS IN SOCIAL AND CULTURAL HISTORY**

Selected topics in social and cultural history. May be repeated with different content. 3 other hours of history and junior standing required. Pre: 2004. (3H,3C)

**4014: TOPICS IN WAR, REVOLUTION AND DIPLOMACY**

Selected topics in the roles of war, revolution, and diplomacy in human history. May be repeated with different content. 3 other hours of history and junior standing required. Pre: 2004. (3H,3C)

**4024: TOPICS IN COLONIALISM AND IMPERIALISM**

Selected topics in colonialism, imperialism, and de-colonization. May be repeated with different content. 3 other hours of history and junior standing required. Pre: 2004. (3H,3C)

**4034: TOPICS IN ECONOMIC AND BUSINESS HISTORY**

Selected topics in economic and business history. May be repeated with different content. 3 other hours of history and junior standing required. Pre: 2004. (3H,3C)

**4044: TOPICS IN WOMEN'S HISTORY**

Intensive study of selected topics in women's history. May be repeated with different content. 3 other hours of history and junior standing required. Pre: 2004. (3H,3C)

**4054: TOPICS IN POLITICAL HISTORY**

Selected topics in the role of politics in history. May be repeated with different content. 3 other hours of history and junior standing required. Pre: 2004. (3H,3C)

**4064: TOPICS IN RACE AND ETHNIC HISTORY** Selected topics in the role of race and ethnicity in human history. May be repeated with different content. 3 other hours of history and junior standing required. Pre: 2004. (3H,3C)

**4074 (REL 4074): TOPICS IN RELIGIOUS AND INTELLECTUAL HISTORY**

Selected topics in the role of religion and intellectual systems in human history. May be repeated with different content. 3 other hours of history and junior standing or above required. Pre: 2004. (3H,3C)

**4214: TOPICS IN THE HISTORY OF SCIENCE, MEDICINE AND TECHNOLOGY**

Selected topics in the history of science, medicine and technology. May be repeated with different content. 3 other hours of history and junior standing required. Pre: 2004. (3H,3C)

**4224: TOPICS IN LEGAL AND CONSTITUTIONAL HISTORY**

Selected topics in legal and constitutional history. May be repeated with different content. 3 other hours of history and junior standing required. Pre: 2004. (3H,3C)

**4234: TOPICS IN AFRICAN-AMERICAN HISTORY**

Selected topics in African-American history. May be repeated with different content. 3 other hours of history and junior standing required. Pre: 2004. (3H,3C)

**4244: TOPICS IN ENVIRONMENTAL HISTORY**

Selected topics in environmental history. May be repeated with different content. 3 other hours of history and junior standing required. Pre: 2004. (3H,3C)

**4964: FIELD STUDY**

Pass/Fail only. Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4974H: INDEPENDENT STUDY**

Variable credit course.

4984: SPECIAL STUDY  
Variable credit course. X-grade allowed.

4994: UNDERGRADUATE RESEARCH  
Variable credit course.

4994H: UNDERGRADUATE RESEARCH  
Variable credit course.

## Overview

The Department of Human Development offers undergraduate study of family relationships and of human development across the lifespan. The department's mission is to understand and improve the lives of people of all ages in relationships, families, organizations, and communities. The Human Services option leading to the B.S. prepares students for a variety of professional careers.

The program participates in the University Honors Program.

The department offers graduate programs leading to the M.S. in applied human development at the Blacksburg campus, and adult learning and human resource development as well as marriage and family therapy at the National Capital Region campus. The department also offers graduate programs leading to the Ph.D. in adult development and aging, adult learning and human resource development, child and adolescent development, family studies, and marriage and family therapy. Graduate students can earn the Graduate Certificate in Gerontology along with their degree or as Commonwealth Campus students (for more information, contact the Center for Gerontology, 237 Wallace Hall, 540/231-7657). (See [Graduate Catalog](#))

## Human Services

*Career Advisors:* M. E. Verdu

The Human Services Option is for students interested in a wide variety of careers and graduate school programs. The option provides undergraduate majors with a theoretical and experiential grounding in child and adult development and in family and relational dynamics. Course work includes emphases on how individuals and families develop over the life cycle, on the critical issues and events that influence families, and on family transitions and dynamics. The curriculum also focuses on human sexuality, family diversity, and social and public policies that affect individuals and their families. Through course work and field placement experiences, human services students develop and practice skills and communication techniques for working with individuals, families and groups. In addition to course work with the Department of Human Development, human services students take courses in the areas of psychology, sociology, biology, statistics and mathematics, writing and communication, family economics, creative arts, cultural traditions, and international perspectives on human concerns. Students may tailor their studies to their particular professional goals and interests through the use of free electives.

The field study, which integrates theory, research and practice, is a pivotal experience in students' career development. It increases students' communication and practice skills and helps narrow career interests. Careers open to human services graduates include: preschool, elementary, family & consumer science and special education, employment and job training services, health and wellness programs, housing services, income programs, mental health services, nutrition and meals programs, protective services, recreation programs, respite services, social services, substance abuse programs, volunteer programs, and child care services. Graduate and professional options that human services graduates may consider include business, community health and public health, law, education, family studies, gerontology, marriage and family therapy, medicine and nursing, psychology and sociology, public administration, rehabilitation, and social work.

<b>A. Required</b> (55 credits) for students graduating in 2012 in tracks: Child & Adolescent, Family Gerontology or Professional Helping Skills	
COMM 2004: Public Speaking	3
HD 1004: Human Development I: Childhood and Adolescence	3
HD 2004: Human Development II: Adulthood and Aging	3
HD 2335-2336: Principles of Human Services	3-3
HD 2304: Family Relationships	3
HD 2314: Human Sexuality	3
HD 3014: Research Methods in H.D.	3
HD 4324: Individual & Family Risk & Resilience	3
HD 4354: The Family, Law, and Public Policy	3
HD 4364: Gender and Family Diversity	3
HD 4714: Senior Capstone	3
HD 4964: Field Study	6
AHRM 2304: Family Financial Management or AHRM 2404: Consumer Rights	3
STAT 3604: Statistics for the Social Sciences	3
LAHS 3004: Professional Seminar	1
<b>B. Tracks:</b> select one: Child & Adolescent; Family Gerontology; Professional Helping Skills (9-12 credits)	
Students are encouraged to consider the wide array of courses across the university curriculum as potential choices for electives to support their Human Services major. In consultation with the major advisor, each student should confirm that prerequisite requirements have been met before enrolling in elective courses. Courses used in Section A cannot be counted again in Section B.	
<b>C. Free Electives</b> (Select 23-28 credits)	
Students are encouraged to consider the wide array of courses across the university curriculum as potential choices for electives to support their Human Services major. In consultation with the major advisor, each student should confirm that prerequisite requirements have been met before enrolling in elective courses. Courses used in Section A cannot be counted again in Section B.	
<b>Total Credits</b>	<b>120</b>
<i>Note:</i> Please consult the appropriate catalog course list or the departmental checksheet for prerequisites to required courses.	

## Satisfactory Progress

A student will be considered to have made satisfactory progress toward the degree when he/she has successfully completed the Curriculum for Liberal Education requirements for English, mathematics, and biology, and HD 1004, by the time the student has attempted 72 semester credits.

## Course Descriptions (HD)

### 1004: HUMAN DEVELOPMENT I: CHILDHOOD AND ADOLESCENCE

Basic concepts related to normal human development. Emphasis on developmental theories and principles of growth, development, and behavior of children from conception through adolescence. Designed as a general survey course for majors and non-majors. (3H,3C) I,II.

### 1115-1116: INTRODUCTION TO THE EDUCATION PROFESSION I

Orientation to early childhood and elementary education profession. 1115: Issues in development of professional identity and functioning in a university community of learners; historical overview. 1116: Current issues in education. This course is restricted to students in the Early Childhood Education option. (1H,1C)

### 2004: HUMAN DEVELOPMENT II: ADULTHOOD AND AGING

Introduction to adult development and aging (gerontology). Basic concepts, principles, and issues of development across the adult years. Pre: 1004. (3H,3C)

#### 2115-2116: INTRODUCTION TO THE EDUCATION PROFESSION II

Continuation of HD 1115-1116. Integration of personal and professional identity status, home-school relations, alternative education models. This course is restricted to students in the Early Childhood Education option. Pre: 1115, 1116 for 2115; 2115 for 2116. (1H,1C)

#### 2304: FAMILY RELATIONSHIPS

Overview of basic concepts, principles, theories, and issues of development and change in family relationships. Topics include families in historical and contextual perspective, structural and relational diversity in families, and processes of relational development, maintenance, and dissolution in families. (3H,3C)

#### 2314: HUMAN SEXUALITY

Explores the diversity of human sexuality using global perspectives. Biological, historical, developmental, psychological, and sociological approaches frame this interdisciplinary examination of the social constructions of sexuality, the processes of gender stratification, and the development of sexual practices, rituals, mythologies, and belief systems across time and around the world. (3H,3C)

#### 2335-2336: PRINCIPLES OF HUMAN SERVICES

2335: Basic concepts, techniques, and structure of the human services profession. Survey of client/family assessment and problem management.

2336: Advanced topics in human services focusing on: case management, crisis intervention, program administration, specialized interventions, ethics, and professional development. Pre: 1004 for 2335; 2335 for 2336. (3H,3C)

#### 2964: FIELD STUDY

Pass/Fail only. Variable credit course.

#### 2974: INDEPENDENT STUDY

Variable credit course.

#### 2974H: INDEPENDENT STUDY

Variable credit course.

#### 2984: SPECIAL STUDY

Variable credit course. X-grade allowed.

#### 3014: RESEARCH METHODS IN HUMAN DEVELOPMENT

Critical thinking and problem-solving involved in applying methods of scientific inquiry to the field of human development. Topics include methods of data collection, basic methods for displaying and analyzing data, and writing reports. Pre: 2004, 2304, STAT 3604. (2H,1L,3C)

#### 3114: ISSUES IN AGING

Seminar which investigates selected contemporary issues in adulthood and old age, such as family and friend relationships; work and retirement; political, legal, and economic issues; and women's concerns. (3H,3C) I,II.

#### 3144 (EDCI 3144): EDUCATION OF EXCEPTIONAL LEARNERS

Emphasizes legal, ethical, and economic bases, assessment and eligibility requirements, characteristics and educational implications, and practices pertaining to various exceptionalities. (3H,3C)

#### 3204: PRINCIPLES OF WORKING WITH CHILDREN AND PARENTS

Principles and techniques of guiding children's behavior will be studied from a developmental perspective. Parent education methods will be explored. Pre: 1004. (2H,3L,3C) I,II.

#### 3214: INFANCY AND EARLY CHILDHOOD

Theories, principles, normal patterns of physical, cognitive, social, and emotional development from conception to the early school years. Micro and macro environmental influences on development are considered as they interact with genetic/biological determinants of development. Pre: 1004. (3H,3C)

#### 3224: MIDDLE CHILDHOOD AND ADOLESCENCE

Theories, principles, normal patterns of physical, cognitive, social, and emotional development from middle childhood to adolescence. Micro and macro environmental influences on development are considered as they interact with genetic/ biological determinants of development. Pre: 1004. (3H,3C)

#### 3234: LIFESPAN COMMUNITY SERVICES

Health and human service programs serving children, youth, older, adults, and families. Overview of community programs for individuals and families over the lifespan; methods of determining service eligibility; procedures for maintaining quality assurance. Pre-requisites: HD 1004, HD 2004, and HD 2304 Pre: 1004, 2304, 2004. (3H,3C)

#### 3304: ADVANCED HELPING SKILLS

Helping skills used in human services settings. Case management, evaluating crisis situations, and approaches to individual and family assessment. Pre: 2335, 2336. (3H,3C)

#### 3334: INDIVIDUAL AND FAMILY INTERVENTIONS

Focus on intervention approaches used in human services settings. Provides students with an introduction to theories of individual, couple, family, and group intervention. Students will apply course material to case scenarios. Topics include theories of intervention, developmentally appropriate interventions, and methods for addressing diversity. Students will be introduced to intervention strategies used in a variety of human services settings. Students with Graduate standing are not required to take the pre-requisite HD 2004. Pre: 3304. (3H,3C)

#### 3344: SOCIO-HISTORICAL DEVELOPMENT OF THE FAMILY

Description and analysis of the process of change in American family patterns. (3H,3C) I,II.

#### 3464 (AHRM 3464) (EDHL 3464) (GEOG 3464) (HUM 3464) (SOC 3464) (UAP 3464): APPALACHIAN COMMUNITIES

The concept of community in Appalachia using a multidisciplinary approach and experiential learning. Interrelationships among geographically, culturally, and socially constituted communities, public policy, and human development. (2H,3L,3C)

#### 3954: STUDY ABROAD

Variable credit course.

#### 4114: COMMUNITY BASED SERVICES FOR OLDER ADULTS

Introduces students to the health and human services programs that comprise the community-based long term care system. Topics include an overview of the continuum of community programs and services for older adults, methods to determine service eligibility, and procedures for maintaining quality assurance. Prerequisite or graduate standing is required. Pre: 2004. (3H,3C)

#### 4224: ADMINISTRATION OF CHILD DEVELOPMENT PROGRAMS

Addresses issues, functions, and responsibilities involved in developing and implementing child care programs. Included are types of programs, staffing, scheduling, environmental design, equipment, evaluation, and financing. Pre: 3204, 4214. (3H,3C) II.

#### 4235-4236: CURRICULUM AND ASSESSMENT

Basic concepts, principles and issues of curriculum and assessment are explored in the real context of teaching and learning with young children. Supervised experience in observation, reflection, assessment, planning, implementing and evaluating activities and experiences consistent with developmental abilities and interests of children is provided. Pre: 1004, 4964 for 4235; 4235 for 4236.

Co: 4964 for 4235. (3H,3C)

#### 4304: HUMAN SERVICES ADMINISTRATION

Issues, functions, and responsibilities involved in developing, implementing, and evaluating family and human services programs. Pre: 3234 or 4114. (3H,3C)

#### 4324: INDIVIDUAL AND FAMILY RISK AND RESILIENCE

Investigation of challenges, stresses, and crises experienced by individuals and families; protective factors and resilience; coping strategies; prevention and intervention. Pre: 2304. (3H,3C)

#### 4334: PERSPECTIVES ON ADDICTION AND FAMILY SYSTEMS

Intra-personal and inter-personal dimensions of compulsive- addictive patterns manifested in the context of the family system. Reciprocal interaction between families and other systems. Junior standing required. Pre: 2304 or 2314.(3H,3C) I,II.

#### 4354: FAMILY, LAW, AND PUBLIC POLICY

Theoretical and substantive issues that relate to the development and implementation of family policies. Implications of political culture and family legislation for the well-being of children and their families. Pre: 1004, 2335, 2336, 2004, 2304. (3H,3C) I,II.

#### 4364: GENDER AND FAMILY DIVERSITY

Examination of the changing character of individual and family diversity, as related to the intersections among gender, race, class, sexuality, age, and ability. Junior standing required Pre: 2304. (3H,3C) I,II.

#### 4374: PARENT EDUCATION AND PRACTICE

Students review concepts, principles, program trends, and research related to parent education using a life course approach. Students examine parenting diversity including parents of different social addresses and parents with chronically ill, mentally and physically challenged, or gifted children. Pre: 1004, 2004, 2304, 4324. (3H,3C)

#### 4714: SENIOR CAPSTONE SEMINAR

Intensive learning experiences in critical thinking and analysis. Opportunities to demonstrate breadth of learning while developing leadership skills and honing professional competencies. Topics include leadership and team development, problem solving, grant writing, program evaluation, and electronic portfolios. Senior standing in Human Services required. (3H,3C)

#### 4964: FIELD STUDY

Variable credit course. Pre: 1004, 2004, 2335, 2336.

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4974H: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

#### 4994H: UNDERGRADUATE RESEARCH

Variable credit course.

## International Studies

[www.psci.vt.edu/internationalstudies/](http://www.psci.vt.edu/internationalstudies/)

**Ioannis Stivachtis, Director**

- [Overview](#)
- [Satisfactory Progress](#)
- [Minor](#)
- [Undergraduate Courses](#)

---

## Overview

The international studies program offers an opportunity to learn about foreign cultures, languages, politics, economics, and history. The curriculum is interdisciplinary in orientation and is designed to introduce students to a variety of important approaches for understanding the international scene. Whether or not students will pursue careers directly related to world affairs, the understanding gained in the program will provide a much broader perspective of the world and the United States's place in it.

All students who wish to obtain a major in international studies must complete the Core Curriculum requirements of the College of Liberal Arts and Human Sciences. The program makes use of additional courses in international studies, economics, foreign languages, history, political science, and other disciplines.

The major in international studies requires successful completion of 48 semester hours of course work, including the following seven required courses (21 hours):

IS 2054: Intro. to World Politics

IS 2064: Global Economy and World Politics

ECON 2005, ECON 2006: Principles of Economics

PSCI 3615, PSCI 3616: International Relations

IS 4004: Seminar in International Studies

*And the following:*

12 hours of a single foreign language at the 3000-4000 level

15 hours of selected courses in one of these options:

(1) World Politics and Policy; (2) Global Development; (3) Business; (4) Environmental Affairs.

## Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the Curriculum for Liberal Education as amended for International Studies, and toward the degree in international studies.

To proceed satisfactorily toward a degree, a student must complete IS 2054, IS 2064, ECON 2005, ECON 2006 and Foreign language 2105 & 2106 by the end of the semester in which 60 hours have been attempted; must maintain an overall GPA of at least 2.0. It is recommended that students complete PSCI 3615 and PSCI 3616 before the end of the junior year.

## Minor

The minor in international studies requires successful completion of 18 semester hours of course work, including the following required courses (6 hours):

IS 2054: Intro. to World Politics

IS 2064: Global Economy and World Politics

The remaining 4 courses (12 semester hours) needed to complete the minor will be chosen from an approved list.

## Undergraduate Courses (IS)

### 2054 (GEOG 2054) (PSCI 2054): INTRODUCTION TO WORLD POLITICS

An introduction to the prevalent methods and theories in the study of world politics. Topics include: historical context of contemporary world politics, global actors and power relations, international conflict and conflict resolution, international systems, interdependence, trade and international law and prospects for global governance. (3H,3C)

### 2064 (GEOG 2064) (PSCI 2064): THE GLOBAL ECONOMY AND WORLD POLITICS

An introduction to the interaction of politics and economics power and wealth, within the world political economy. Topics include: the international financial system, the dynamics and principles of trade, and the role of transnational firms, as well as issues of environmental protections, sustainable development, and the distribution of wealth and power. (3H,3C)

### 2964: FIELD STUDY

Pass/Fail only. Variable credit course.

### 2974: INDEPENDENT STUDY

Variable credit course.

### 2974H: INDEPENDENT STUDY

Variable credit course.

### 2984: SPECIAL STUDY

Variable credit course.

### 3115,3116: SELECTED WORLD PROBLEMS

Selected world problems and how they affect various countries. Each semester, a topic will be chosen. (3H,3C)

### 3944: INTERNATIONAL ENROLLMENT

Participation in an approved study abroad program without direct supervision of the Va Tech faculty but with required enrollment in an approved program of study in a foreign university. (0C) I,II,III,IV,V.

### 3944S: INTERNATIONAL ENROLL SPECIAL

Participation in an approved Study Abroad program without direct supervision of the Virginia Tech faculty but with required enrollment in an approved program of study in an international university. Course represents three billable hours and no academic credit. (0C) IV, V.

### 3954: STUDY ABROAD

Variable credit course.

### 4004: SEMINAR IN INTERNATIONAL STUDIES

Interdepartmental seminar to synthesize and articulate basic assumptions, theories, and methods of international studies. Senior standing in IS and instructor consent required. (3H,3C) I, II.

### 4014: SEMINAR IN GRASSROOTS DEVELOPMENT

Utilizes development, gender, and social theory to examine the impact of aid programs on communities in the Third World. Analyzes such issues as the impact of development projects in agriculture, natural resources, and employment on the local people, the impact of aid on women; and the policies and administrative structures that direct the world of international development. (3H,3C) II.

### 4044 (COMM 4044): INTERNATIONAL COMMUNICATION

Comparative perspectives on global communication systems; problems with the flow of information; roles of international organizations; mass communication and national development; implications for conflict resolution; selected case studies. Senior standing required or instructor consent required. (3H,3C)

### 4754: INTERNSHIP

Variable credit course.

### 4964: FIELD STUDY

Pass/Fail only. Variable credit course.

### 4974: INDEPENDENT STUDY

Variable credit course.

### 4974H: INDEPENDENT STUDY

Variable credit course.

### 4984: SPECIAL STUDY

Variable credit course.

### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

### 4994H: UNDERGRADUATE RESEARCH

Variable credit course.

- [Undergraduate Course Descriptions](#)

---

## **Overview**

The Virginia Tech Department of Music provides high-quality training to a select number of music majors, as well as ensembles and courses for large numbers of non-music majors. Instruction takes place in a handsome new facility which has superb rehearsal rooms, well-designed practice rooms and music teaching studios, a beautiful acoustically engineered Recital Salon, and laboratories with state-of-the-art electronic equipment for music study, recording, and digital music.

The curriculum offers an excellent liberal arts education with a low professor/student ratio combined with the library, computer facilities, and cultural interaction which only a major comprehensive university can provide. Learning is enhanced by the use of music technology across the curriculum and innovative programs such as laboratory ensembles and extensive teaching experiences in the music education program. Together with traditional degree programs in Performance, Music Education, and Theory/Composition, students may design a degree plan combining music with virtually all other majors offered by the university.

Virginia Tech faculty artists and scholars have performed and lectured at conventions, in music festivals, and on concert series throughout the United States and in Canada, Europe, Asia, and South America. Each year, internationally known guest artists join forces with our faculty to perform world calibre performances on campus.

Prospective music majors must successfully complete an audition/interview. Contact the chairperson of the Scholarship and Audition Committee, the Department of Music, 241 Squires Student Center, Blacksburg, Virginia 24061-0240 to receive information concerning auditions and scholarship opportunities. Scholarship support is available. Please also refer to the School of the Arts general information section for details.

The major in music, leading to a B.A., emphasizes four areas of music: music education; performance; theory/composition and designed option. This designed option area is provided as a means for a student to tailor music and non-music courses into a curriculum that best meets the interests of the student. In addition to fulfilling the Curriculum for Liberal Education and the core curriculum requirements of the College of Liberal Arts and Human Sciences, the music major must pursue a concentration in one of the above areas of emphasis.

There are five primary options available to music majors. These are:

- 84-Credit Music Education Option (see website for details)
- 78-Credit Performance Option
- 78-Credit Composition Option
- 50-Credit Designed Option – Liberal Arts
- 78-Credit Designed Option – Professional
- 51-Credit Performance Option-Liberal Arts

There are pre-approved curricula in both of the designed options in the area of music technology. Pre-approved curricula also are available in the 50-credit Designed Option in performance and in composition.

In addition, all music majors must meet a minimum level of piano proficiency no later than two semesters prior to graduation. Music majors

are expected to participate in an ensemble or as an accompanist every semester of residence and attend a minimum number of concerts and recitals. Additional curriculum and policy information is available in the *Handbook for Music Majors* available on the department website.

The minor in music consists of 18 semester hours selected from performance, history/literature, and theory/composition. Interested students should contact John Husser, Virginia Tech, Department of Music, 309 Henderson Hall, Blacksburg, Virginia 24061-0240 or at [jhusser@vt.edu](mailto:jhusser@vt.edu) for the exact requirements.

The department follows the Curriculum for Liberal Education except in Area 4 - Scientific Reasoning and Discovery, of which two credits of laboratory science are not required. Both the Department of Music and the university foreign language requirement are the same, except for vocal performance majors.

## Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the Curriculum for Liberal Education (see "[Academics](#)"), toward the Liberal Arts and Human Sciences College Core, and toward the degree in music.

Satisfactory progress toward the B.A. in Music requires that:

1. Upon having attempted 72 semester credits (including transfer, advanced placement, advanced standing, credit by examination, freshman rule), students must have completed:

MUS 2025, 2026: Theory/Harmony	6
MUS 2045, 2046: Harmony/sightsinging Lab	2
MUS 3135, 3136: History and Analysis of Musical Styles	6
MUS 3145, 3146: Styles Lab	2
MUS 3314: Instrumental Ensemble Music or MUS 3414: Choral Ensemble Music	2
MUS 2514: Individual Applied Voice	2
<b>Credits</b>	<b>(20)</b>

2. Upon having attempted 96 semester credits, students must have an in-major grade point average of 2.0 or above.

## Undergraduate Courses (MUS)

### 1005-1006: THEORY/FUNDAMENTALS

Development of understanding the basic components of the composition of music through reading and writing the symbolic notation as it appears on the page, and realizing the experimental and expressive content of music performance through singing, ear training, and practice at a keyboard instrument. (3H,3C) I,II.

### 1104: MUSIC APPRECIATION

Introduction to fundamental aspects of Western Art Music of major periods to give the student a basic understanding of the breadth and nature of this art form. (3H,3C) I,II.

### 2025-2026: THEORY/HARMONY

Study of structure, relationship, and function of chords through harmonization of bass and melody lines and through written analysis. Majors and minors only. Pre: 1006. Co: 2045, 2035 for 2025; 2046, 2036 for 2026. (3H,3C) I,II.

### 2035-2036: HARMONY LABORATORY

Aural study of rhythm, melody, and harmony, in conjunction with written and analytic studies in 2025-2026. Majors and minors only. Co: 2045, 2025 for 2035; 2046, 2026 for 2036. (3L,1C)

### 2045-2046: SIGHTSINGING LABORATORY

Study and practice of techniques involved in the sight reading and sightsinging of printed music. Majors and minors only. Co: 2035, 2025 for 2045; 2036, 2026 for 2046. (3L,1C) I,II.

### 2054: INTERMEDIATE MIDI APPLICATIONS

Application of intermediate MIDI techniques, MIDI hardware and MIDI software for music synthesis, transcription and performance. Fundamental musical acoustics and synthesizer programming. Fundamental digital sound processing and analog recording techniques. Prepares student to utilize music technologies effectively in teaching, performance and creative work. Pre: 2025. (3H,3C) II.

### 2055-2056: AUDIO TECHNOLOGY FOR MUSIC

Develops basic understanding of audio technology for musical applications, focusing on today's digital audio recording and editing technologies including microphone use, live recording, and studio session recording. Develops critical listening skills through lab experimentation and recording. Pre: 2054 and permission of instructor required. 2055: I, 2056: II Pre: 2054. (3H,3C)

### 2115,2116: SURVEY OF MUSIC

Music and composers of all historical periods will be heard and studied to acquaint the students with the music of Western Civilization. The emphasis will be on listening rather than on reading, writing, and performing music skills. (3H,3C) I,II.

**2214: CLASS APPLIED PIANO**

Group piano lessons for beginners or for students at an early stage of keyboard development. May be repeated for 1 credit. Consent required. (3L,1C) I,II.

**2224: CLASS APPLIED VOICE**

Group voice lessons for beginners or for students at an early stage of vocal development. May be repeated for 1 credit. Consent required. (3L,1C) I, II.

**2234: CLASS APPLIED STRINGS**

Group string lessons for beginners or for students at an early stage of string development. May be repeated for 1 credit. Consent required. I (3L,1C)

**2244: CLASS APPLIED WOODWINDS**

Group woodwind lessons for beginners or for students at an early stage of woodwind development. May be repeated for 1 credit. Consent required. (3L,1C) II.

**2254: CLASS APPLIED BRASS**

Group brass lessons for beginners or for students at an early stage of brass development. May be repeated for 1 credit. Consent required. (3L,1C) II.

**2264: CLASS APPLIED PERCUSSION**

Group percussion lessons for beginners or for students at an early stage of development. May be repeated for 1 credit. Consent required. I (3L,1C)

**2274: MUSIC EDUCATION LAB ENSEMBLE**

Music education laboratory ensemble. Performance techniques, teaching methods, management procedures, materials and literature for school music ensembles. May be repeated for credit. (1L,1C)

**2284: PIANO ACCOMPANYING**

Pianists will examine and practice the skills necessary for successful piano accompanying. The course will include sonata, concerto, vocal and choral literature. Pianists will be required to collaborate with vocal and instrumental students. Pre: consent required. (3H,3C)

**2514: INDIVIDUAL APPLIED VOICE**

Individual instruction in voice. May be repeated. Consent and audition required. Variable credit course. I,II,III.

**2515-2516: VOCAL DICTION**

An introduction to principles of vocal diction for singing using the International Phonetic Alphabet and standard foreign-language pronunciation techniques. Two semesters. Fall semester: Italian, Latin, and English. Spring semester: French and German. One credit hour. Pre: 2514 or 4514. (1L,1C) I,II.

**2524: INDIVIDUAL APPLIED KEYBOARD**

Individual instruction in keyboard. May be repeated. Consent and audition required. Variable credit course. I,II,III.

**2534: INDIVIDUAL APPLIED VIOLIN**

Individual instruction in violin. May be repeated. Consent and audition required. Variable credit course. I,II,III.

**2544: INDIVIDUAL APPLIED VIOLA**

Individual instruction in viola. May be repeated. Consent and audition required. Variable credit course. I,II,III.

**2554: INDIVIDUAL APPLIED CELLO**

Individual instruction in cello. May be repeated. Consent and audition required. Variable credit course. I,II,III.

**2564: INDIVIDUAL APPLIED BASS**

Individual instruction in bass. May be repeated. Consent and audition required. Variable credit course. I,II,III.

**2574: INDIVIDUAL APPLIED FLUTE**

Individual instruction in flute. May be repeated. Consent and audition required. Variable credit course. I,II,III.

**2584: INDIVIDUAL APPLIED OBOE**

Individual instruction in oboe. May be repeated. Consent and audition required. Variable credit course. I,II,III.

**2594: INDIVIDUAL APPLIED CLARINET**

Individual instruction in clarinet. May be repeated. Consent and audition required. Variable credit course. I,II,III.

**2614: INDIVIDUAL APPLIED SAXOPHONE**

Individual instruction in saxophone. May be repeated. Consent and audition required. Variable credit course. I,II,III.

**2624: INDIVIDUAL APPLIED BASSOON**

Individual instruction in bassoon. May be repeated. Consent and audition required. Variable credit course. I,II,III.

**2634: INDIVIDUAL APPLIED HORN**

Individual instruction in horn. May be repeated. Consent and audition required. Variable credit course. I,II,III.

**2644: INDIVIDUAL APPLIED TRUMPET**

Individual instruction in trumpet. May be repeated. Consent and audition required. Variable credit course. I,II,III.

**2654: INDIVIDUAL APPLIED TROMBONE**

Individual instruction in trombone. May be repeated. Consent and audition required. Variable credit course. I,II,III.

**2664: INDIVIDUAL APPLIED BARITONE**

Individual instruction in baritone. May be repeated. Consent and audition required. Variable credit course. I,II,III.

**2674: INDIVIDUAL APPLIED TUBA**

Individual instruction in tuba. May be repeated. Consent and audition required. Variable credit course. I,II,III.

**2684: INDIVIDUAL APPLIED PERCUSSION**

Individual instruction in percussion. May be repeated. Consent and audition required. Variable credit course. I,II,III.

**2714: INDIVIDUAL APPLIED HISTORICAL WIND INSTRUMENTS**

Individual instruction in historical wind instruments. May be repeated. Consent and audition required. Variable credit course. I,II,III.

**2724: INDIVIDUAL APPLIED HISTORICAL STRING INSTRUMENTS**

Individual instruction in historical string instruments. May be repeated. Consent and audition required. Variable credit course. I,II,III.

**2734: INDIVIDUAL APPLIED COMPOSITION**

Individual instruction in composition. May be repeated. Consent and audition required. Variable credit course. I,II,III.

**2815-2816: JAZZ IMPROVISATION**

Fundamental principles of jazz improvisation. Topics include interval relationships, chord identification, modes and modality, blues and ii-V-I chord progressions. Pre: Permission of instructor required. 2815: I, 2816: II (2H,2C)

**2974: INDEPENDENT STUDY**

Variable credit course.

**2974H: INDEPENDENT STUDY**

Variable credit course.

**2984: SPECIAL STUDY**

Variable credit course.

**3024: COUNTERPOINT**

Study of the development and aesthetics of contrapuntal techniques throughout the common practice period. I Pre: 2026. (3H,3C)

**3034: FORM AND ANALYSIS**

Analysis of musical form by study of musical scores and aural development. Simple and large instrumental and vocal forms. Extensive listening. I Pre: 2025, 2026. (3H,3C)

**3035-3036: ADVANCED EAR TRAINING & KEYBOARD HARMONY**

Concentrated and integrated training in sight-singing, melodic, rhythmic and harmonic dictation, and related keyboard skills. Pre: 2036, 2046. (3L,1C) I,II.

**3044: ORCHESTRATION & ANALYSIS**

An introduction to the craft of scoring and arranging of music for full orchestra. Analysis of scores, small projects and a full orchestration project. Pre: 3034. (3H,3C) II.

**3054: INTRODUCTION TO VOCAL/CHORAL ARRANGING**

Techniques of arranging music for vocal/choral ensembles. Emphasis on transcription from recordings to develop rhythmic, melodic, and harmonic dictation skills. Discussion, transcription, listening, small writing exercises, final project. I Pre: 3035, 3036. (3H,3C)

**3055-3056: MUSIC AND MEDIA PRODUCTION**

Develops advanced knowledge of music production through practical application of music recording and production technologies, including advanced microphone techniques, critical listening, and critical artistic evaluation skills. Individual and group production projects. Hands-on experience with a variety of expressive media technologies including CD and DVD production in a collaborative, inter-disciplinary team approach. Pre: 2056 and continuation examination. 3055: I, 3056: II Pre: 2056. (3H,3C)

**3065: COMPUTER MUSIC AND MULTIMEDIA DESIGN**

A two-semester study of interactive multimedia composition and performance software as a foundation for creative work and research endeavors. Also provides an in-depth study of digital sound synthesis, algorithmic creation of multimedia content, and the design of audio-visual interactive systems using latest technologies. Must meet pre-requisite or have permission of the instructor Pre: 2054. (3H,3C)

**3114: SYMPHONIC LITERATURE**

Study of representative works of symphonic music from the eighteenth, nineteenth, and twentieth centuries, with corollary readings in the history of musical ideas. Consent required. II (3H,3C)

**3115,3116: MUSIC IN AMERICA**

An introduction to the history and stylistic evolution of American music from the seventeenth century to the present. (3H,3C) I,II.

#### 3124: 20TH CENTURY MUSIC LITERATURE

An introduction to music in Europe and America since 1945; supplementary study in the aesthetics of contemporary music. Consent required. II (3H,3C)

#### 3134: VOCAL MUSIC LITERATURE

Covers vocal music of Europe and America, especially music composed the eighteenth century. Examines differences in style and forms of choral and solo-vocal expression characteristic of the Baroque, Classic, Romantic, and Modern eras. Discusses issues of vocal performance practice. Ability to read music required. I (3H,3C)

#### 3135-3136: HISTORY AND ANALYSIS OF MUSICAL STYLES

The history of Western music from 1100 to the present as an evolution of musical styles. Extensive analysis of the music, stylistic attributes, normative forms, and representative literature of each period. Historical and philosophical background of each period. The study of analytical techniques to improve comprehension and performance. Pre: 2026 for 3135; 2026, 3135 for 3136. Co: 3145 for 3135; 3146 for 3136. (3H,3C) I,II.

#### 3144: EARLY MUSIC LITERATURE

Covers vocal and instrumental music from the Middle Ages to the eighteenth century. Examines differences in style and forms of expression characteristic especially of Medieval, Renaissance, and early Baroque music. Discusses issues of performance practice. Ability to read music required. (3H,3C) II.

#### 3145-3146: MUSICAL STYLES LITERACY LABORATORY

Aural study of Western music from 1100 to the present as an evolution of musical styles. Extensive listening to the music of each stylistic period. Supervised as well as self-paced study using HyperMedia technology. Automated examinations. Co: 3136, 3135 for 3145. (1L,1C) I,II.

#### 3154: PIANO LITERATURE

Study of representative works of keyboard repertoire from the 17th century to the works of contemporary composers. Extensive stylistic analysis and discussion of performance practice. Pre: consent required. (3H,3C)

#### 3204: MUSIC FOR CLASSROOM TEACHERS

Foundations and principles of music education for classroom teachers. Music methods and materials from early childhood to the middle school. (3H,3C) I,II.

#### 3214: TEACHING MUSIC IN THE ELEMENTARY SCHOOL

Methods of teaching elementary school music. Emphasis on Kodaly, Orff, and traditional music textbook series approaches to teaching music in elementary schools. Pre: Instructor permission and successful completion of sophomore music continuation exam. Co: 4964. (3H,3C)

#### 3225-3226: CONDUCTING

An introduction to the practice and theory of ensemble conducting and leadership. 3225: Basic conducting skills, and choral conducting. 3226: Intermediate conducting skills, and instrumental conducting. Consent required. (3H,3C) I,II.

#### 3234: PIANO PEDAGOGY

Examination of principles and practice of piano pedagogy. Covers teaching methods, materials and literature for the independent studio teacher. Pre: consent required. (3H,3C)

#### 3314: INSTRUMENTAL ENSEMBLE MUSIC

Instruction and participation in the various instrumental musical performance ensembles under direction of members of the music faculty. 3314 and/or 3414 may be repeated for a combined maximum of 8 hours. Consent and audition required. (3H,1C) I,II.

#### 3414: CHORAL ENSEMBLE MUSIC

Instruction and participation in the various choral ensembles under the direction of the music faculty. 3314 and/or 3414 may be repeated for a combined maximum of 8 hours. Consent and audition required. (3H,1C) I,II.

#### 3815-3816: ADVANCED JAZZ IMPROVISATION

Advanced principles of jazz improvisation. Topics include transcribing and transcription techniques, advanced ear training, study of various improvisational styles, memorization of standard forms and the aural recognition of both major and minor modes. 3815: I, 3816: II Pre: 2816. (2H,2C)

#### 4054: MICROCOMPUTER APPLICATIONS IN MUSIC

Theory and practice of digital control and synthesis of music. MIDI data structures and programming from high-level languages. Comprehensive sequencing and transcription techniques. Musical acoustics; analog and digital hardware programming. Digital sound processing and recording. Contemporary music production techniques; industry applications. History and aesthetics of electronic music. Literary in traditional music notation. Working knowledge of any high-level programming language such as C, PASCAL, or FORTRAN required. (3H,3C) I,II.

#### 4055-4056: MUSIC TECHNOLOGY SENIOR SEMINAR

Weekly seminars in music technology with group discussion of progress in current student projects, the current state of artistic and business practices in the recording industry, and guest lecturers drawn from the professional world. 4055: I, 4056: II Pre: 3056. (1H,1C)

#### 4124: SPECIAL TOPICS IN MUSIC HISTORY AND LITERATURE

Specific, in depth study of one of several topics in music history and or literature. Pre: 3136. (3H,3C) I,II.

#### 4204: REHEARSAL TECHNIQUES AND MATERIALS

Techniques and materials for rehearsing secondary school music performance ensembles. Pre: Instructor permission and successful completion of

the sophomore music continuation exam. (3H,3C)

**4514: ADVANCED INDIVIDUAL APPLIED VOICE**

Individual instruction in voice at an advanced level. Majors only. May be repeated. Performance continuation exam required. Variable credit course. Pre: 2514. I,II,III.

**4524: ADVANCED INDIVIDUAL APPLIED KEYBOARD**

Individual instruction in keyboard at an advanced level. May be repeated. Performance continuation exam required. Variable credit course. Pre: 2524. I,II,III.

**4534: ADVANCED INDIVIDUAL APPLIED VIOLIN**

Individual instruction in violin at an advanced level. Majors only. May be repeated. Performance continuation exam required. Variable credit course. Pre: 2534. I,II,III.

**4544: ADVANCED INDIVIDUAL APPLIED VIOLA**

Individual instruction in viola at an advanced level. Majors only. May be repeated. Performance continuation exam required. Variable credit course. Pre: 2544. I,II,III.

**4554: ADVANCED INDIVIDUAL APPLIED CELLO**

Individual instruction in cello at an advanced level. Majors only. May be repeated. Performance continuation exam required. Variable credit course. Pre: 2554. I,II,III.

**4564: ADVANCED INDIVIDUAL APPLIED BASS**

Individual instruction in bass at an advanced level. Majors only. May be repeated. Performance continuation exam required. Variable credit course. Pre: 2564. I,II,III.

**4574: ADVANCED INDIVIDUAL APPLIED FLUTE**

Individual instruction in flute at an advanced level. Majors only. May be repeated. Performance continuation exam required. Variable credit course. Pre: 2574. I,II,III.

**4584: ADVANCED INDIVIDUAL APPLIED OBOE**

Individual instruction in oboe at an advanced level. May be repeated. Performance continuation exam required. Variable credit course. Pre: 2584. I,II,III.

**4594: ADVANCED INDIVIDUAL APPLIED CLARINET**

Individual instruction in clarinet at an advanced level. Majors only. May be repeated. Performance continuation exam required. Variable credit course. Pre: 2594. I,II,III.

**4614: ADVANCED INDIVIDUAL APPLIED SAXOPHONE**

Individual instruction in saxophone at an advanced level. Majors only. May be repeated. Performance continuation exam required. Variable credit course. Pre: 2614. I,II,III.

**4624: ADVANCED INDIVIDUAL APPLIED BASSOON**

Individual instruction in bassoon at an advanced level. Majors only. May be repeated. Performance continuation exam required. Variable credit course. Pre: 2624. I,II,III.

**4634: ADVANCED INDIVIDUAL APPLIED HORN**

Individual instruction in horn at an advanced level. Majors only. May be repeated. Performance continuation exam required. Variable credit course. Pre: 2634. I,II,III.

**4644: ADVANCED INDIVIDUAL APPLIED TRUMPET**

Individual instruction in trumpet at an advanced level. Majors only. May be repeated. Performance continuation exam required. Variable credit course. Pre: 2644. I,II,III.

**4654: ADVANCED INDIVIDUAL APPLIED TROMBONE**

Individual instruction in trombone at an advanced level. Majors only. May be repeated. Performance continuation exam required. Variable credit course. Pre: 2654. I,II,III.

**4664: ADVANCED INDIVIDUAL APPLIED BARITONE**

Individual instruction in baritone at an advanced level. Majors only. May be repeated. Performance continuation exam required. Variable credit course. Pre: 2664. I,II,III.

**4674: ADVANCED INDIVIDUAL APPLIED TUBA**

Individual instruction in tuba at an advanced level. Majors only. May be repeated. Performance continuation exam required. Variable credit course. Pre: 2674. I,II,III.

**4684: ADVANCED INDIVIDUAL APPLIED PERCUSSION**

Individual instruction in percussion at an advanced level. Majors only. May be repeated. Performance continuation exam required. Variable credit course. Pre: 2684. I,II,III.

**4714: ADVANCED INDIVIDUAL APPLIED HISTORICAL WIND INSTRUMENTS**

Individual instruction in historical wind instruments at an advanced level. Majors only. May be repeated. Performance continuation exam required.

Variable credit course. Pre: 2714. I,II,III.

**4724: ADVANCED INDIVIDUAL APPLIED HISTORICAL STRING INSTRUMENTS**

Individual instruction in historical string instruments at an advanced level. May be repeated. Performance continuation exam required. Variable credit course. Pre: 2724. I,II,III.

**4734: ADVANCED INDIVIDUAL APPLIED COMPOSITION**

Individual instruction in composition at an advanced level. Majors only. May be repeated. Performance continuation exam required. Variable credit course. Pre: 2734. I,II,III.

**4744: ADVANCED INDIVIDUAL APPLIED CONDUCTING**

Individual instruction in conducting at an advanced level. May be repeated. Consent required. Variable credit course. Pre: 3225, 3226. I,II,III.

**4815-4816: JAZZ ARRANGING**

Contemporary harmonic practice and the craft of scoring and arranging music for modern jazz ensembles. Pre: 2026 and permission of instructor required. 4815: I, 4816: II Pre: 2026. (3H,3C)

**4824: JUNIOR RECITAL**

Preparation for a public half recital featuring performances of works by established or student composers, or lecture-demonstrations devoted to major works by established composers. Consent required. (1H,1C) I,II.

**4834: SENIOR RECITAL**

Preparation of a public full recital featuring performances of works by established or student composers, or lecture-demonstrations devoted to major works by established composers. Consent required. (1H,1C) I,II.

**4964: FIELD STUDY**

Pass/Fail only. Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4974H: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

**4994H: UNDERGRADUATE RESEARCH**

Variable credit course.

## Overview

The Naval Reserve Officers Training Corps (NROTC) offers eligible young men and women the opportunity to earn commissions in the Navy or Marine Corps. NROTC midshipmen are required to complete the naval science curriculum and attend weekly laboratory sessions. During summer vacations, midshipmen participate in active duty at-sea or shore-based training facilities for periods of approximately four weeks. Students may enroll in the NROTC Program at the start of college or at the beginning of their sophomore year. Two-, three-, and four-year scholarships may be available for those who demonstrate outstanding potential. Upon completion of university degree requirements and the naval science program, qualified midshipmen are commissioned as Ensigns in the Navy (Navy-option) or Second Lieutenants in the Marine Corps (Marine-option).

Students may join NROTC through any one of the following four programs.

### Four-Year National Scholarship Program

Students enter the NROTC Four-Year Scholarship Program through national competition and are appointed Midshipmen in the Naval Reserve. While enrolled the government provides tuition, fees, uniform allowance, book allowance, and a monthly allowance. Students complete required naval science courses and participate in three summer training periods of approximately four weeks each. Upon graduation midshipmen are commissioned with an obligation to serve on active duty for at least five years.

### Two-Year National Scholarship Program

Sophomore students not in the NROTC Program may qualify for enrollment in the Two-Year Scholarship Program. Selection for this program is made by the Naval Service Training Command based on the student's academic record, physical qualifications, and an interview. Application begins at the NROTC Unit during the fall semester before the last two undergraduate years. Selected applicants attend six weeks of instruction at the Naval Science Institute (NSI) at Newport, Rhode Island during the summer following selection to bring them up-to-date on the NROTC curriculum missed during their freshman and sophomore years. Successful completion of NSI qualifies two-year applicants for appointment as midshipmen in the Naval Reserve and enrollment in the NROTC

Scholarship Program. Upon acceptance of this appointment, these students receive all the benefits and assume all the obligations of midshipmen in the Four-Year Scholarship Program.

## **Four-Year College Program**

Students are enrolled in the Four-Year College Program upon acceptance by the Professor of Naval Science. Naval Science textbooks and a uniform allowance are provided and, during their junior and senior years if accepted for advanced standing, College Program students receive a monthly allowance. College Program students are obligated to complete the prescribed naval science curriculum, attend one summer at-sea training period, accept a commission in the Naval Reserve or Marine Corps Reserve upon graduation, and serve on active duty after graduation a minimum of three years for Navy personnel and 3-- 1/2 years for the Marine Corps.

## **Two- and Three-Year NSTC Controlled Scholarship Program**

Students enrolled in the NROTC College Program and in good standing may be nominated by the Commanding Officer/Professor of Naval Science for a limited number of two- and three-year scholarships awarded by the Naval Service Training Command. If selected and found medically qualified, these students receive the same benefits and incur the same obligations as the Four-Year Scholarship Program.

## **Requirements for All Candidates**

Qualifications for acceptable candidates for the Scholarship Programs or the College Programs include: U.S. citizenship; membership in the Virginia Tech Corps of Cadets; fulfillment of physical examination requirements; and willingness to participate in required summer training periods and to accept the appropriate commission in the Navy, Marine Corps, Naval Reserve, or Marine Corps Reserve when offered.

If not included in the requirements of their majors or the Curriculum for Liberal Education and college core curriculum, NROTC Navy-option scholarship students must complete the following: one year of college calculus through differential and integral calculus of one real variable; one year of calculus-based physics; one semester of American military affairs or national security policy; one year of English; and an Area 2 class approved by your NROTC advisor.

During NROTC enrollment, each midshipman will be required to pass semiannual physical fitness tests and to qualify as a swimmer before going on summer cruise.

## **Emerging Leader Scholarship Program**

The University, in conjunction with the Virginia Tech Corps of Cadets Alumni Association, is offering a scholarship to incoming freshmen who are enrolled in an ROTC program and become members of the Corps of Cadets. Contact the Virginia Tech Corps of Cadets for more information.

## **Leadership Minor**

Students participating in the Virginia Tech Corps of Cadets are eligible for a minor in leadership based on the training and experience they gain while a member of the Corps. Students who complete one of the three ROTC programs may qualify to receive the minor when they complete their bachelor's degree. Contact the Center for Leader Development for more information.

## **Course Descriptions (MN)**

### **1004: INTRODUCTION TO NAVAL SCIENCE**

Naval profession and concept of seapower. Missions and organization of Navy and Marine Corps. Overview of naval concerns, customs, traditions, seamanship, regulations, and military justice. I (3H,3C)

### **1104: NAVAL SHIPS SYSTEMS I: ENGINEERING**

Ship characteristics and types. Includes ship design, hydrodynamic forces, stability, main propulsion, electrical and auxiliary systems, interior communications, ship control, and damage control. One semester of college level science required. Pre: 1004. (3H,3C) I,II.

### **2004: NAVAL SHIPS SYSTEMS II:**

WEAPONS Theory and employment of naval weapons systems. Includes threat detection, evaluation, weapon selection, delivery systems, guidance, and warhead design. Elements of command, control, and communications. (3H,3C) I,II.

#### 2104: SEAPOWERS AND MARITIME AFFAIRS

A survey of naval history from the American Revolution to the present with emphasis on major developments in strategy, tactics, and technology. Discussion of the geopolitical theory of Alfred Thayer Mahan. Explores present concerns in seapower and maritime affairs, including the economic and political dimensions of ocean commerce, the Law of the Sea, a comparison of U.S. and Soviet maritime strategies, and current naval affairs. (3H,3C) II.

#### 2974: INDEPENDENT STUDY

Variable credit course.

#### 2984: SPECIAL STUDY

Variable credit course.

#### 3005-3006: NAVIGATION AND NAVAL OPERATIONS

3005: An in-depth study of the theory and practice of piloting and introduction to celestial navigation. Students develop practical skills in the use of charts, visual and electronic aids. A study of the International Rules of the Nautical Road. 3006: Relative motion, vector-analysis theory, and ship employment. Includes an introduction to naval operations, ship characteristics, shiphandling, and afloat communications. I (3H,3C)

#### 3204: EVOLUTION OF WARFARE

Development of warfare focusing on impact of major military theorists, strategists, and technicians. Ancient times to present. I Pre: 2104. (3H,3C)

#### 4005-4006: LEADERSHIP AND MANAGEMENT/ETHICS

Advanced-level study of leadership and management theory, including planning, organizing, communication, decision-making, and individual and group behavior. Explores major behavioral theories; practical applications involve experiential exercises, case studies, and laboratory discussions. 4006: Ethics and management in the Navy. Includes study of professionalism and ethics, human resources development, counseling, military law, personnel evaluation, administration, and material management. Pre: SOC 1004. (3H,3C) I,II.

#### 4204: AMPHIBIOUS WARFARE

Historical survey of the development of amphibious doctrine and the conduct of amphibious operations. Emphasis is on amphibious operations in World War II. Present day potential and limitations on amphibious operations are explored. I (3H,3C)

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course. II.

## Overview

Courses in philosophy aim at critical understanding and rigorous evaluation of the concepts underlying our views concerning the nature of reality, what sorts of things there are, what can be known, what is of value, and what people ought to do and to aim at. The department offers programs leading to the B.A. and to the M.A. Philosophy majors receive a strong liberal arts education and are prepared for careers that require a broad perspective and independent judgment. They are prepared for graduate work in a variety of scholarly and professional fields. An undergraduate philosophy major is especially appropriate for the student considering law school, medical school, or other professional schools. In addition, philosophy may be chosen as a minor.

Philosophy majors must complete the college core and the Curriculum for Liberal Education and successfully complete at least 30 hours in philosophy, including three courses in the history of philosophy, and 3505 (Symbolic Logic). At least 9 of the 30 hours must be at the 3000 level or above, with at least 3 of these hours at the 4000 level. In addition, a strong second area of concentration is chosen by each major student; it will consist of at least 18 credit hours [including courses as part of the Liberal Education requirements] in one discipline or in a set of closely related disciplines other than philosophy. At least 6 of these 18 hours must be at the 3000 level or above. Also, the department has recently added a new Pre-Medical Professions Option in Philosophy. See Philosophy Department web site for specific details. A double major is possible with any of several other curricula.

Philosophy minors must complete at least 18 hours of philosophy, including one of 1504 or 3505, 6 hours selected from courses at the 3000 or 4000 level and an additional 3 hours from either the 3000-4000 level or in the history sequence (2115, 2116, 2125, 2126).

## Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the Curriculum for Liberal Education (see [Academics in this catalog](#)), toward the Liberal Arts and Human Sciences College Core, and toward the degree in philosophy.

Satisfactory progress toward the B.A. in philosophy requires that:

1. Upon having attempted 72 semester credits (including transfer, advanced placement, advanced standing, credit by examination, freshman rule), students must have completed:

Philosophy	12
<b>Total Credits</b>	<b>(12)</b>

2. Upon having attempted 96 semester credits, students must have an in-major grade point average of 2.0 or above.

## Course Descriptions (PHIL)

### 1204: KNOWLEDGE AND REALITY

Examines the questions: What is the nature of reality? How do I know what is real and what is misleading appearance, error, or illusion? What is

knowledge? How do I find out who I am and how I relate to the world around me? (3H,3C)

#### 1304: MORALITY AND JUSTICE

A critical survey of theories concerning human nature, the meaningful life, and the moral evaluation of actions, persons, and institutions. Theories will be applied to such issues as abortion, justice, and moral problems faced by professionals. (3H,3C)

#### 1504: LANGUAGE AND LOGIC

Basic concepts in logic and critical thinking: argument, validity, deduction and induction, logical form, formal and informal fallacies. Introduction to the logic of truth functions and of categorical statements. Critical analysis of arguments in ordinary language. (3H,3C)

#### 2115,2116: ANCIENT THROUGH MEDIEVAL PHILOSOPHY

Western philosophical thought through the medieval period. 2115: ancient philosophy, including Presocratics, Socrates, Plato, and Aristotle. 2116: main trends in Post-Aristotelian Greek and Roman philosophy and medieval philosophy, including Augustine, Aquinas, and Ockham. (3H,3C)

#### 2125,2126: HISTORY OF MODERN PHILOSOPHY

Western philosophical thought from Descartes through Kant. 2125: 17th Century Philosophy, including Descartes, Spinoza, Leibniz, and Locke. 2126: 18th century philosophy, including Berkeley, Hume and Kant, with special attention to significant predecessors. (3H,3C)

#### 2304: GLOBAL ETHICS

Ethical issues in international context. Application of the principles of moral theory to such issues as the obligations of richer nations toward poorer ones, cultural and other forms of relativism, emigration and immigration, nationalism, war, deterrence, intervention, environmental degradation, preservation of natural diversity, and responsibilities toward future generations. (3H,3C)

#### 2605,2606: REASON AND REVOLUTION IN SCIENCE

Study of philosophical approaches to understanding and justifying modes of human reasoning both in science and everyday life. 2605: nature of theory confirmation and falsification; 2606: justifying changing paradigms of human inquiry. (3H,3C)

#### 2964: FIELD STUDY

Pass/Fail only. Variable credit course.

#### 2974: INDEPENDENT STUDY

Variable credit course.

#### 2974H: INDEPENDENT STUDY

Variable credit course.

#### 2984: SPECIAL STUDY

Variable credit course.

#### 3015,3016 (PSCI 3015, 3016): POLITICAL THEORY

Analysis of the fundamental ideas in the history of political theory. 3015: Plato to the 17th century. 3016: late 17th century to the present. Pre: PSCI 2014. (3H,3C)

#### 3024: PHILOSOPHICAL MOVEMENTS

This course focuses on the assumptions and methods of one or more contemporary or historically important movements in philosophy such as Existentialism, Feminism, Local Positivism, Phenomenology, Pragmatism, or Naturalism. Pre-requisite: 3 Philosophy credits required. May be repeated twice for credit under different topics, up to 9 hours total. (3H,3C)

#### 3314: ETHICAL THEORY

Careful examination of some important historical or contemporary ethical theories. Includes coverage of such topics as the assessment of character and action, the foundations of ethical theories, their justification, their relationship to scientific theories, and their objective or subjective status. 3 Philosophy credits required. (3H,3C)

#### 3324: BIOMEDICAL ETHICS

Philosophical analysis of ethical issues in medicine and biotechnology, such as problems arising in connection with the relations between physicians and patients, the challenges of cultural diversity, practices surrounding human and animal research, decisions about end of life care, embryonic stem cell research, genetic engineering, biotechnological human enhancement, and social justice in relation to health-care policy. (3H,3C)

#### 3414: AESTHETICS

Studies the basic concepts used in the analysis and evaluation of art works; considers problems of art criticism as treated within major types of aesthetic theory. (3H,3C)

#### 3454: PHILOSOPHY OF RELIGION

A consideration of religious belief and its justification with attention to such philosophical issues as the nature and existence of God, the problem of evil, and the notion of faith. (3H,3C)

#### 3505-3506: MODERN LOGIC AND ITS DEVELOPMENT

Logic and logical theory and the history of its development. 3505: Validity of arguments. Syllogistic logic from Aristotle to modern times. Deductive methods in truth functional and quantificational logic through the theory of identity. Translation from English into symbolic form. 3506: Metalogic and the history and philosophy of modern logical theory. Decidability and undecidability, completeness and incompleteness of formal systems. Developments from Cantor to Goedel. Must have 3505 to take 3506. (3H,3C)

#### 4015,4016: SPECIAL TOPICS IN PHILOSOPHY

Critical examination of special issues of current philosophical interest. 3 Philosophy credits required. (3H,3C)

#### 4204: PHILOSOPHY OF MIND

Current issues in the philosophy of mind such as relation of mind and body, status of the mental, knowledge of one's own and other minds, personal identity, consciousness, mentality of animals and machines, topics in the philosophy of psychology. 3 Philosophy credits required. (3H,3C)

#### 4214: METAPHYSICS

Examination of some of the central problems of metaphysics. Topics may include: existence, necessary truth, the problem of universals, causation, the identity of the self through time, free will. Attention will be given both to the historical development of these problems and to contemporary philosophical responses to them. 3 Philosophy credits required. (3H,3C)

#### 4224: EPISTEMOLOGY

Theory of knowledge. Is all knowledge based on experience? Does knowledge have a foundation? Can knowledge of the present and the nearby give us reasons for beliefs about the future, the past, or about events far away? 3 Philosophy credits required. (3H,3C)

#### 4304: TOPICS IN SOCIAL & POLITICAL PHILOSOPHY

Study of topics such as distributive justice, equality exploitation, alienation, individual rights, anarchy, constitutional government, the justification of political authority, and liberation. Topics to be announced each semester course is offered. 3 Philosophy credits required. (3H,3C)

#### 4324 (MGT 4324): BUSINESS AND PROFESSIONAL ETHICS

An inquiry into the fundamental norms of conduct in business and other professions and their justification in relation to the most important ethical theories. Special attention will be given to moral problems such as the ethics of hiring and firing, bribery, and professional responsibility to society. (3H,3C)

#### 4334: JURISPRUDENCE

An examination of the nature of law and legal systems with attention to traditional theories of law and to such topics as judicial decision and discretion, law and morality, the justification of legal coercion. 3 Philosophy credits required. (3H,3C)

#### 4514: SPECIAL TOPICS IN LOGIC

Topics that build upon a knowledge of classical deductive logic: extensions of classical logic, alternatives to classical logic, philosophy of logic, and philosophy of language. Topics to be announced each semester course is offered. Pre: 3505. (3H,3C)

#### 4604: PHILOSOPHY OF BIOLOGY

This course is designed primarily for students of biology or philosophy students with a strong interest in biology. Topics vary from year to year, but include the changing character of biology as a science, the special character of biological explanations and methods, and the place and value of reduction (e.g., of Mendelian to molecular genetics) in biology. (3H,3C)

#### 4614: PHILOSOPHY OF SCIENCE

An examination of the structure and methodology of science as well as key concepts such as explanation, confirmation, realism, and instrumentalism. One year of science and 3 philosophy credits required. (3H,3C)

#### 4964: FIELD STUDY

Pass/Fail only. Variable credit course.

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4974H: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

#### 4994H: UNDERGRADUATE RESEARCH

Variable credit course.

## Overview

The department offers courses leading to degrees in Political Science and International Studies. These courses provide understanding of political systems, forms of government, and political processes throughout the world. Political science courses also offer preparation for careers in government, business, law, politics, and education.

## General Option for the B.A. Degree

In addition to required courses in the Curriculum for Liberal Education and the department's general education requirements, a student majoring in political science must complete the following:

1. LAHS 1004: Introduction to a Research University
2. PSCI 1014: Introduction to United States Government and Politics
3. PSCI 1024: Introduction to Comparative Government and Politics
4. PSCI 2014: Introduction to Political Theory
5. PSCI 2024: Research Methods in Political Science
6. PSCI 2054: Introduction to World Politics or  
PSCI 2064: Global Economy and World Politics
7. 21 hours of political science electives (of which 18 at the 3000 or 4000 level)
8. One course in advanced theory and practice in Political Science
9. 12 hours in 3000-4000 level courses in one of these related disciplines:

Agricultural and Applied Economics, Communication, Economics, English, Geography, History, Philosophy, Psychology, Sociology, Urban Affairs and Planning, or a single foreign language.

## Legal Studies Option for the B.A. Degree

This option is intended to help students gain appreciation of one of western civilization's greatest intellectual achievements: the structure and application of the law. The option is not intended to be a pre-law program, although students hoping to attend law school may enroll for the option and may well benefit from its completion. In addition to meeting the requirements of the Curriculum for Liberal Education and the department's general education requirements, a student taking the legal studies option must complete:

1. 1004: Introduction to a Research University

2. PSCI 1014: Introduction to United States Government and Politics
  3. PSCI 1024: Introduction to Comparative Government and Politics
  4. PSCI 2014: Introduction to Political Theory
  5. PSCI 2024: Research Methods in Political Science
  6. PSCI 2054: Introduction to World Politics or
  7. PSCI 2064: Global Economy and World Politics
- Two of the following courses:
- PSCI 3354: Constitutional Law: Structures and Relationships
  - PSCI 3364: Constitutional Law: Civil and Political Rights
  - PSCI 3334: Judicial Process
  - PSCI 4324: Senior Seminar in Constitutional Law
8. PHIL 1204: Knowledge and Reality
  9. PHIL 1304: Morality and Justice
  10. 15 hours of political science electives (of which 12 at the 3000 or 4000 level)
  11. One course in advanced theory and practice in Political Science
  12. 12 hours of courses from among the following:

AAEC 3314: Environmental Law  
 AAEC 3604: Agricultural Law  
 AAEC 4754: Real Estate Law  
 COMM 4024: Communications Law and Ethics  
 ECON 4894: Law and Economics  
 ENGL 3684: Literature and the Law  
 FIN 3055: Legal Environment of Business  
 FIN 4004: Wills, Trusts, and Estates  
 FIN 4014: Internet, Electronic and Online Law  
 HD 4354: The Family, Law, and Public Policy  
 HIST 4224: Topics in Legal and Constitutional History  
 PHIL 4334: Jurisprudence  
 SOC 3414: Criminology  
 SOC 4404: Sociology of Law  
 UAP 4344: Law of Critical Environmental Areas  
 UAP 4754: Legal Foundations of Planning

## Minor

A minor in political science may be obtained by completing:

1. PSCI 1014: Introduction to United States Government and Politics;
2. PSCI 1024: Introduction to Comparative Government and Politics;
3. PSCI 2014: Introduction to Political Theory; or PSCI 3015 or 3016: Political Theory;
4. 9 hours of political science electives (of which 6 at the 3000 or 4000 level).

## Regarding Double Majors

The Department of Political Science offers majors in both Political Science and International Studies. Courses for the two majors overlap significantly. Therefore, students may not pursue both majors simultaneously, nor major in one and minor in the other.

## Advising

The department provides advisors to help students understand and meet degree requirements. Career counseling also is available in the department, as is advising for students interested in attending law school after graduation from Virginia Tech.

The department arranges academic credit for internships in state, local, and federal governments, nonprofit organizations, and other appropriate settings. The department's internship program offers students a chance to gain career-related experience in a wide variety of organizations. Information on these opportunities can be obtained from the internship director.

To provide opportunities for informal association of faculty and students, the department sponsors the Political Science Club, a chapter of Phi Alpha Delta, the pre-law honor fraternity, a chapter of Pi Sigma Alpha, the national honor society in political science, and other student organizations. Information about these activities, as well as about any other aspect of the department, may be obtained from the department chair, advisors, or the department office.

## Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the Curriculum for Liberal Education (see Academics chapter in this catalog), toward the department's general education requirements, and toward the degree in Political Science.

Satisfactory progress toward the B.A. in political science requires completion of PSCI 1014, 1024, and 2024 within the first 60 credit hours attempted. Students must also maintain an in-major GPA of 2.0 and must achieve a minimum grade of C in both PSCI 1014 and 1024.

## Study Abroad

Virginia Tech offers a variety of study abroad programs.

## Honors

Honors courses are offered in Political Science. Majors in the department also may be admitted into the University Honors Program. In this program, they may choose among a variety of honors diplomas. Several of these require a senior honors thesis written under the direction of a faculty member in the department.

---

## Undergraduate Course Descriptions (PSCI)

### 1004 (SPIA 1004): NATIONS AND NATIONALITIES

Introduction to world and American ethnic and indigenous cultures and to social constructions of human and group identity, nationalism and extreme ethno-nationalism. Music, dance, film, art, ceremonial rituals and other multimedia forms of creative or symbolic expression, supplement readings and lectures. Multidisciplinary exploration of collective conceptions of cultural differences. (3H,3C)

### 1014: INTRODUCTION TO UNITED STATES GOVERNMENT AND POLITICS

Government and politics of the United States; the Constitution, political culture, interest groups, political parties, elections, Congress, bureaucracy, presidency, and federal courts; selected current policy issues. (3H,3C) I,II,III,IV.

### 1014H: HONORS INTRODUCTION TO UNITED STATES GOVERNMENT AND POLITICS (3H,3C)

### 1024: INTRODUCTION TO COMPARATIVE GOVERNMENT AND POLITICS

Government and politics of selected countries outside the United States; nature of politics and government, types of political systems, linkages of people and governments, and current political issues. (3H,3C) I,II,III,IV.

### 1024H: HONORS INTRODUCTION TO COMPARATIVE GOVERNMENT AND POLITICS (3H,3C)

### 2014: INTRODUCTION TO POLITICAL THEORY

Examines central themes involved in the practices of normative political theory. Topics will include critical review of the historical origins, established traditions, and major themes in normative political thinking. (3H,3C)

### 2024: RESEARCH METHODS IN POLITICAL SCIENCE

Introduction to research in political science; formulation of theory, operationalization and measurement, gathering, analysis and interpretation of data. Pre: 1014 or 1014H, 1024 or 1024H. (3H,3C) I,II,III,IV.

### 2054 (GEOG 2054) (IS 2054): INTRODUCTION TO WORLD POLITICS

An introduction to the prevalent methods and theories in the study of world politics. Topics include: historical context of contemporary world politics, global actors and power relations, international conflict and conflict resolution, international systems, interdependence, trade and integration, international law and prospects for global governance. (3H,3C)

### 2064 (GEOG 2064) (IS 2064): THE GLOBAL ECONOMY AND WORLD POLITICS

An introduction to the interaction of politics and economics power and wealth, within the world political economy. Topics include: the international financial system, the dynamics and principles of trade, and the role of transnational firms, as well as issues of environmental protection, sustainable development, and the distribution of wealth and power. (3H,3C)

### 2964: FIELD STUDY

Pass/Fail only. Variable credit course.

### 2974: INDEPENDENT STUDY

Variable credit course.

### 2974H: INDEPENDENT STUDY

Variable credit course.

### 2984: SPECIAL STUDY

Variable credit course.

**3015,3016 (PHIL 3015, 3016): POLITICAL THEORY**

Analysis of the fundamental ideas in the history of political theory. 3015: Plato to the 17th century. 3016: late 17th century to the present. I Pre: 2014. (3H,3C)

**3214: POLITICAL PARTICIPATION**

Levels and types of political participation; reasons for participation; who participates and why; effects of political activity on political processes. I Pre: 1014 or 1014H or 1024 or 1024H. (3H,3C)

**3224: PUBLIC OPINION**

Sources and distribution of public opinion; measurement of public opinion; relationships between public opinion and public policy; institutions linking public opinion to government decisions. I Pre: 1014 or 1014H or 1024 or 1024H. (3H,3C)

**3234: VOTING AND ELECTIONS**

Voting, elections, and support for political parties and party leaders in the United States and other Western democracies; impact of economic conditions on political support and patterns of realignment and dealignment. I Pre: 1014 or 1014H or 1024 or 1024H. (3H,3C)

**3244 (COMM 3244): POLITICAL COMMUNICATION**

Distribution of political information; elite-mass communication; alternative models of political communication; communication and telecommunications policy. Pre: 1014 or 1014H or 1024 or 1024H. (3H,3C)

**3255,3256: THE POLITICS OF RACE, ETHNICITY AND GENDER**

Studies the status and political behavior of selected political minorities. 3255: compares African-, Mexican- and Native-Americans. 3256: examines diverse political responses to traditional gender roles, current gender issues, and the unique gender problems facing people of color. I Pre: 1014 or 1024. (3H,3C)

**3264: INTEREST GROUPS**

Formation, structure, activities, and regulation of interest groups; comparison of American interest groups with those in other countries; evaluation of interest groups as participants in the political process. I Pre: 1014 or 1014H or 1024 or 1024H. (3H,3C)

**3274: POLITICAL PARTIES**

Development, organization, activities, and personnel of political parties; citizens' partisan attitudes and behavior; origins, characteristics, stability, and changes of party systems. I Pre: 1014 or 1014H or 1024 or 1024H. (3H,3C)

**3314: CONGRESS**

Congressional structure; organization and procedure; characteristics of members of Congress; Congressional elections; decision-making and external influences; change and reform. I Pre: 1014 or 1014H. (3H,3C)

**3324: THE PRESIDENCY**

Election, institutionalization, staffing, relations with Congress, and the bureaucracy; initiation and implementation of public policy. Pre: 1014 or 1014H. (3H,3C) II.

**3334: JUDICIAL PROCESS**

Structure and functions of American legal institutions; participants in the process, impact of legal institutions on society. Pre: 1014 or 1014H. (3H,3C) II.

**3344 (UAP 3344): GLOBAL ENVIRONMENTAL ISSUES: INTERDISCIPLINARY PERSPECTIVES**

Critical examination of major global environmental problems (e.g., global warming, atmospheric ozone depletion, acid rain, tropical deforestation, toxic waste) with emphasis on their social, economic, political, ethical, and policy implications and solutions. Pre: completion of Area 4 of University Core. (3H,3C) II.

**3354: CONSTITUTIONAL LAW: STRUCTURES AND RELATIONSHIPS**

Power and authority of president, Congress, and courts; division of powers between states and federal government. Pre: 1014 or 1014H. (3H,3C)

**3364: CONSTITUTIONAL LAW: CIVIL AND POLITICAL RIGHTS**

Civil rights and liberties; rights of criminal defendants; competing conceptions of constitutional rights. Pre: 1014 or 1014H. (3H,3C)

**3414 (UAP 3434): PUBLIC ADMINISTRATION**

The role and context of public administration in the contemporary United States, administrative organization and decision-making, public finance, human resources administration, and program implementation. Pre: 1014 or 1014H. (3H,3C)

**3424: STATE AND LOCAL GOVERNMENT**

Institutions, functions, and policies of state, county, and municipal governments in the U.S.; issues confronting these governments in the federal system. I Pre: 1014 or 1014H. (3H,3C)

**3434: URBAN POLITICS**

Basic concepts of urban politics; governmental structures, policy processes, and political conflicts in U.S. cities, policy options for coping with urban problems. Pre: 1014 or 1014H. (3H,3C) II.

**3444 (UAP 3444): ADMINISTRATIVE LAW AND POLICY**

The legal context of the exercise of discretion by public administrators in the United States. Adjudication and rule-making; access to administrative

processes and information; legislative and judicial control of administration. Pre: 1014 or 1014H. (3H,3C)

#### 3514: LATIN AMERICAN GOVERNMENT AND POLITICS

Introduction to the political systems of Latin American countries, including legislative-executive relations, interest groups, political parties, electoral systems, political violence, and socio-political development. Pre: 1014H or 1024. (3H,3C) II.

#### 3515,3516: EUROPEAN POLITICAL SYSTEMS

The government and politics of selected European states and of the European Union. 3515: normally includes the United Kingdom. 3516: normally includes Germany and Hungary. I Pre: 1024 or 1024H. (3H,3C)

#### 3524: POLITICS OF POST-COMMUNIST SYSTEMS

Institutions, party structures, political economy, elite politics, ethnic conflicts, leadership dynamics, and mass political behavior in Russia and other post-communist political systems. Pre: 1024 or 1024H. (3H,3C) II.

#### 3534: AFRICAN GOVERNMENT AND POLITICS

Survey of major concepts and themes in the study of African politics and development: analyses of the state, political institutions, social forces, democratization, sustainable development, issues of contemporary African politics. I Pre: 1024 or 1024H. (3H,3C)

#### 3544 (JUD 3544): THE STATE OF ISRAEL: A POLITICAL HISTORY

This course provides a survey on the political history of the State of Israel and highlights major themes uniquely characterizing the specific events surrounding its establishment and its first 50 years of existence.

Additionally, the course will add a comparative dimension by using the political history of Israel as a case study to discuss major themes in political science such as democracy, government, political economy, etc.

PSCI 1024 or JUD 2134. Pre: 1024 or 1024H or JUD 2134. (3H,3C) II.

#### 3554: COMPARATIVE POLITICAL ECONOMY

Economic policies and collective choice processes of pre-industrial, industrializing, and advanced industrial states; problems and crises of industrial development, economic distribution, and technological transfer in the transition from an agrarian to advanced industrial society. Pre: 1024 or 1024H. (3H,3C) II.

#### 3564: VIOLENT POLITICAL CHANGE

Historical origins, political processes, and institutional outcomes of violent political change, rising from mass protest movements, revolutionary organization, military coups, and radical political parties. I Pre: 1024 or 1024H. (3H,3C)

#### 3574: GOVERNMENT AND POLITICS OF JAPAN

Introduction to governmental institutions, patterns of political organization and behavior, and key policies of the Japanese political system. I Pre: 1024 or 1024H. (3H,3C)

#### 3584: GOVERNMENTS AND POLITICS OF ASIA

Introduction to governmental institutions, political behavior, and social and economic policy approaches of China and other selected countries in the Asian region. I Pre: 1024 or 1024H. (3H,3C)

#### 3615-3616: INTERNATIONAL RELATIONS

Structure and development of the modern international system; theories of international politics; international law; international organizations. I Pre: IS 2054 or PSCI 2054 or GEOG 2054 or PSCI 2064 or IS 2064 or GEOG 2064 for 3615; 2054 or IS 2054 or GEOG 2054 or PSCI 2064 or IS 2064 or GEOG 2064 for 3616. (3H,3C)

#### 3625,3626: FOREIGN POLICIES OF THE SUPER POWERS

3625: Formulation of American foreign policy; roles of the President, Congress, press, public, and bureaucracy; central themes, issues, and problems of American diplomacy; 3626: Development and operational practices of Russian foreign policy decision-making in the international environment; party and state political institutions; Marxist-Leninist ideology. I Pre: 1024 or 1024H. (3H,3C)

#### 3684 (AINS 3684): INDIGENOUS PEOPLES AND WORLD POLITICS

A survey of the historical and contemporary struggles of indigenous peoples throughout the world. Examines the dynamics of colonialism (internal and external), identity construction, gender, cultural integrity, and the ongoing global indigenous rights discourse. In addition to covering broad global processes/theoretical approaches, comparative case studies of particular indigenous groups, such as the Maasai (Kenya, Tanzania) and Mayans (Mexico, Guatemala, Belize), are used to highlight the global, regional and intra-community diversity among contemporary indigenous peoples. (3H,3C)

#### 3714 (UAP 3714): THE US POLICY PROCESS

Description and analysis of the processes and institutions involved in the making and implementation of public policy in the United States, with a primary focus on domestic and economic policy. Empirical and normative models of the process of public policy making in the U.S. I Pre: 1014 or 1014H. (3H,3C)

#### 3724: POVERTY AND WELFARE POLICY

Public policies regarding the poor, impact of current policies; future policy options. I Pre: 1014 or 1014H. (3H,3C)

#### 3734: NATIONAL SECURITY

Post-1945 strategic problems, policies, and security commitments of major participants in international politics, especially the United States and Russia; effects of security policies on international and domestic political economies. I Pre: 2054 or IS 2054 or GEOG 2054. (3H,3C)

#### 3744 (UAP 3744): PUBLIC POLICY ANALYSIS

Methods and approaches used in the analysis and evaluation of public policy; strengths and limitations of various analytic tools; normative issues in the practice of policy analysis. Pre: 1014 or 1014H. (3H,3C) II.

#### 3754: AMERICAN POLITICAL THEORY

American political theory from the pre-Revolutionary era to the present. American contribution to the understanding of freedom, equality, political community, constitutionalism, political dissent, and the welfare state. I Pre: 1014 or 1014H. (3H,3C)

#### 3764: CONTEMPORARY DEMOCRATIC THEORY

History and critiques of classical theories of democracy; contradictions within and contemporary problems facing democracy; future of democracy according to conservative, liberal, and radical theoretical perspectives. Pre: 2014, (3015 or 3016). (3H,3C) II.

#### 3774 (UAP 3774): MARXIAN POLITICAL ANALYSIS

Contemporary uses of Marxian concepts and theories to study the world economy, business structure, current social issues, modern ethical values, and alienation. Pre: 2014, (3016 or 3554). (3H,3C) II.

#### 3784: ORIGINS OF THE STATE

Theories of the origins of politics and government; evidence of state formation in prehistoric societies; political behavior in contemporary pre-literate societies as precursor to state formation. Pre: 2014, (3015 or 3016). (3H,3C) II.

#### 3984: SPECIAL STUDY

Variable credit course.

#### 4214: SENIOR SEMINAR IN POLITICAL BEHAVIOR

Political behavior: socialization, voting, opinion formation and expression, decision-making in government, as explained by personality, rationality, culture, class, and institutional roles. Topics vary from semester to semester as announced. Must have senior standing. Pre: 3214 or 3224 or 3234 or 3244 or 3264 or 3274. (3H,3C)

#### 4314: SENIOR SEMINAR IN POLITICAL INSTITUTIONS

Selected topics in political institutions, including decision-making, types and structures of political institutions, internal and external influences on institutional behavior. Topics vary from semester to semester. Must have senior standing. X-grade allowed. Pre: 3314 or 3324 or 3334 or 3515 or 3516 or 3524. (3H,3C)

#### 4314H: HONORS SENIOR SEMINAR IN POLITICAL INSTITUTIONS

X-grade allowed. (3H,3C)

#### 4324: SENIOR SEMINAR IN CONSTITUTIONAL LAW

Cases, law review articles, and related materials containing describing, or commenting on major decisions of the U.S. Supreme Court. Topics vary from semester to semester as announced. Must have senior standing. Pre: 3354 or 3364. (3H,3C)

#### 4414: SENIOR SEMINAR IN PUBLIC ADMINISTRATION

Selected topics in public administration, including norms of practice, government personnel, administrative process, administrative law, privatizing, and contracting. Topics vary from semester to semester as announced. Must have senior standing. Pre: 3414 or 3424 or 3444. (3H,3C)

#### 4514: SENIOR SEMINAR IN COMPARATIVE POLITICS

Selected topics in the comparative analysis of political behavior, processes, and institutions; cross-national institutional and aggregate data analysis. Topics vary from semester to semester as announced. Must have senior standing. Pre: 3515 or 3516 or 3524 or 3554 or 3564 or 3514 or 3534 or 3544 or 3574 or 3584. (3H,3C)

#### 4614: SENIOR SEMINAR IN INTERNATIONAL RELATIONS

Selected topics in international relations, including objectives of national policy, dimensions and components of national power, comparative diplomacy, international conflict and cooperation, instruments for conflict resolution. Topics vary from semester to semester as announced. Must have senior standing and any two of the prerequisites. Pre: 3615 or 3616 or 3625 or 3626 or 3734. (3H,3C)

#### 4624 (UAP 4624): THE WASHINGTON SEMESTER: SEMINAR IN AMERICAN POLITICS AND PUBLIC POLICY

This seminar is the integrative forum for the principal elements of the Washington Semester experience. The course explores both the role of political institutions in policy formation and implementation and the primary managerial and leadership challenges that arise for implementing organization managers in American democratic public policy-making. PRE: Junior standing or instructor consent and acceptance into the Washington Semester program. X-grade allowed. (3H,3C) III,IV.

#### 4624H (UAP 4624H): HONORS THE WASHINGTON SEMESTER: SEM IN AMERICAN POLITICS AND PUBLIC POLICY

X-grade allowed. (3H,3C)

#### 4644 (UAP 4644): THE WASHINGTON SEMESTER: POLITICS, POLICY AND ADMINISTRATION IN A DEMOCRACY

This course is part of the Washington Semester. Explores the relationship between the imperatives of democratic mobilization, policy choices and organizational choices through intensive study of the operating context of a selected public or nonprofit organization. Examines implications of policy-maker choices for implementing institution dynamics and challenges. Junior standing and acceptance into the Washington Semester program required. X-grade allowed. Pre: 3714. (3H,3C) III,IV.

#### 4644H (UAP 4644H): HONORS THE WASHINGTON SEMESTER: POLITICS, POLICY AND ADMIN IN A DEMOCRACY

X-grade allowed.(3H,3C)

#### 4714: SENIOR SEMINAR IN POLICY ANALYSIS

Theoretical, analytical, and methodological approaches used to assess government activities and public policy. Topics vary from semester to semester as announced. Must have senior standing. Pre: 3724, 3734. (3H,3C)

**4724: SENIOR SEMINAR IN POLITICAL THEORY**

Selected topics in analytic political philosophy, contemporary ideologies, and democratic theory. Topics vary from semester to semester as announced. Senior standing required. Must have senior standing and any two of the prerequisites. Pre: 3015 or 3016 or 3764 or 3754 or 3774. (3H,3C)

**4754: INTERNSHIP PROGRAM**

Qualified students are placed in an administrative or legislative staff position under the combined supervision of a faculty member and a responsible supervisor in the employing agency. Detailed reports on the internship experience and a specific project will be required of each intern. (Variable credit to maximum of 6 credits for a full-time position over an entire semester). Three hours of appropriate advanced American government courses, Junior standing, a screening interview, GPA of 3.00 or better and consent required. Variable credit course. X-grade allowed. I,II.

**4964: FIELD STUDY**

Pass/Fail only. Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course. X-grade allowed.

**4974H: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

**4994H: UNDERGRADUATE RESEARCH**

Variable credit course.

## Overview

The Department of Religion and Culture critically investigates religion, culture, and their relationships by problematizing what is commonly considered self-evident, especially since these subjects are intrinsic to understanding the human condition both locally and globally. In our research, teaching, and engagement, we seek to craft and apply new forms of critical inquiry that advance integrative intellectual thought. These paths of inquiry inform our engagement with students, who become well prepared to understand complex transformations throughout their lives, whether they pursue graduate studies or other life trajectories.

The Department of Religion and Culture offers an undergraduate degree in Interdisciplinary Studies (IDST) with an option in Religion and Culture (RLC).

The department offers minors in (alphabetically) American Studies, Appalachian Studies, Asian Area Studies, Humanities, Humanities & the Arts, Judaic Studies, Medieval & Early Modern Studies, Middle East Studies, Popular Culture, and Religion.

The department also offers graduate certificates in Liberal Arts and in Religious Studies and participates in the Alliance for Social, Political, Ethical, and Cultural Thought (ASPECT) Ph.D. program.

## Interdisciplinary Studies Major (IDST): Religion and Culture Option (RLC)

**Peter Schmitthenner, Director of Undergraduate Studies**

The Interdisciplinary Studies Major (IDST): Religion and Culture Option (RLC) is the undergraduate major leading to a Bachelor of Arts degree in Interdisciplinary Studies: Religion and Culture Option. This major provides an opportunity for students to explore topics and issues related to courses in Appalachian Studies (APS), the Humanities (HUM), Judaic Studies (JUD), and Religion (REL). Most students who choose this major are more interested in developing complex problem solving skills, critical thinking, and acquiring a broad education, than in gaining specialized skills for a single occupation. The global focus of the major affords career opportunities in education, business, government, industry, and the service sector, including the nonprofit sector. The major has a strong academic and career advising component.

## Degree Requirements

The requirements of the Interdisciplinary Studies Major (IDST): Religion and Culture Option (RLC) are completed by (a) the Curriculum for Liberal Education requirements; (b) departmental courses (see below); (c) an approved minor (the approved list of minors attached to the major checksheet as posted on the department website); and (d) a foreign language requirement (2105-2106 or equivalent in a language studied in high school or 1105-1106 in a new language). A complete checksheet showing all degree requirements in detail is available on the department website and in 115 Lane Hall. Required departmental course comprise the following:

6 credits from APS, HUM, JUD, and/or REL courses at the 1000 level or above  
9 credits from APS, HUM, JUD, and/or REL courses at the 2000 level or above  
9 credits from APS, HUM, JUD, and/or REL courses at the 3000 level or above  
6 credits from APS, HUM, JUD, and /or REL courses at the 4000 level

While completing the above requirements students must take two non-Eurocentric courses (see the checksheet for the list of these courses).

## **Study Abroad**

Students are strongly encouraged to complete an approved study abroad program outside of the U.S.

## **Honors Program**

Eligible students are encouraged to participate in the University Honors Program. Completing a degree "In Honors" is an excellent way for outstanding students to integrate the knowledge from several disciplines. Honors students have considerable flexibility in completing the degree requirements.

## **Double Majors**

For information on earning a double major or second degree, contact the Department Chair.

## **Religion and Culture Minors**

The department offers the following minors. Additional information about each can be found on our website at [www.rc.vt.edu/undergrad.html](http://www.rc.vt.edu/undergrad.html). Students in any major may opt to declare them as minors.

American Studies  
Appalachian Studies  
Asian Area Studies  
Humanities  
Humanities and the Arts  
Judaic Studies  
Medieval and Early Modern Studies  
Middle East Studies  
Popular Culture  
Religion

## **American Studies**

American studies is an interdisciplinary field that draws upon a number of academic disciplines, including history, literature, sociology, to consider relationships between culture and society in the United States as it is embedded in global processes and issues. Students work closely with an advisor to plan a coherent program tailored to each student's interest.

To complete a minor in American studies at Virginia Tech, students take HUM 2504: Introduction to American Studies and HUM 4104: Explorations in Advanced Humanities Topics.

Students then choose twelve hours of course work from at least two of four areas: literature; history; the arts and communications; and cultural studies. The approved list includes a variety of courses with a North American emphasis from literature, history, art history, architecture, Africana studies, communications, humanities, music, political science, religion, women's studies, landscape architecture, and urban affairs. Students work in close association with an advisor who will help plan a coherent program tailored to each student's interests. Appropriate special topics courses and honors colloquia may be substituted with permission of the minor coordinator. A check sheet for this minor is available online, from the Religion and Culture main office, or from the minor coordinator.

**Coordinator: Emily Satterwhite**

## **Appalachian Studies**

**Religion and Culture Faculty:** Elizabeth Fine, Elizabeth Hahn, Stevan Jackson Anita Puckett, Emily Satterwhite

**Affiliated Faculty:** Danny Axsom (Psychology), Kathy Combiths (English), Wilma Dunaway (School of Public and International Affairs), Serena Frost (English), Rosemary Goss (Apparel, Housing, and Resource Management, A. L. (Tom) Hammett (Wood Science and Forest Products), Alice Kinder (English), Jeff Mann (English), Steve Mooney (English), Aaron Purcell (University Libraries, Special Collections), Richard Rich (Political Science), John Seiler (Forest Resources and Environmental Conservation) and Barbara Ellen Smith (Sociology)

Appalachian Studies is an academic program supporting teaching, research, and service on issues pertaining to Appalachia. The Appalachian Studies minor provides students with the opportunity to study complex social, political, economic, and environmental issues important to the region from a number of disciplinary perspectives. Appalachian Studies faculty focus on these issues from a critical regionalism perspective in which the relationship between these issues and region is considered problematic and open to investigation.

The Appalachian Studies minor focuses on complex cultural, political, economic, and environmental issues in the study of an important American region. The course of study ranges from mythic to modern Appalachian America and also provides opportunity for cross-cultural study of mountain cultures worldwide. A check sheet for this minor is available online, from the Director, or from the Religion and Culture main office.

**Director: Anita Puckett**

## **Asian Area Studies**

The interdisciplinary minor in Asian Area Studies focuses on the great cultural traditions of the Middle East, South Asia (including India), East Asia (China, Japan, Korea), Southeast Asia, and Central Asia. The majority of the earth's peoples belong to one of these cultures, influential for many centuries and representing some of the world's most unique, sophisticated, and important visions of the human experience. Students explore how various Asian traditions explain and represent this experience in literature, philosophy, religion, history, the social sciences, and the arts.

Students work closely with an advisor to shape a program that reflects the student's interest within the range of offerings available for the program. A check sheet for this minor is available online, from the Religion and Culture main office, or from the minor coordinator.

**Coordinator: Peter Schmitthenner**

[TOP](#)

## **Humanities**

Humanities offers interdisciplinary courses, many of which are in Area 2 of the Curriculum for Liberal Education. Courses lead to the understanding of cultural legacies from ancient through modern civilizations, explored through the traditional humanities disciplines: philosophy, history, and the arts, including languages, literatures, fine arts, architecture, music, and theatre arts.

The Humanities minor gives students the opportunity to create a focused package of Humanities coursework within the following broad guidelines:

18 hours (6 courses) of courses designated HUM are required. At least 9 hours (3 courses) must be at the 3000-4000 level; HUM 4974: Independent Study is strongly suggested as a means of integrating coursework in the minor. Suggested tracks are Historical, Modern and Cross-cultural, but students may design their own combinations of courses with an advisor, who will make substitutions to the courses within the tracks, as appropriate. A check sheet for this minor is available online, from the Religion and Culture main office, or from the minor coordinator.

**Coordinator: Elizabeth Fine**

## **Humanities and The Arts**

The minor in Humanities and the Arts was developed in cooperation with faculty from the departments of Art and Art History, Communication Studies, English, Music, Theatre Arts, and the College of Architecture and Urban Studies. It aims to acquaint students with the historical, critical, and practical dimensions of the arts, while simultaneously examining the relation of the arts to other human endeavors (cultural, philosophical, political, religious, scientific, and social).

The minor Humanities and the Arts (HART) helps students explore the worlds of the arts, culture (including popular culture), and the humanities within the following broad guidelines:

18 hours (6 courses) of courses are required: 9 of these hours (3 courses) include HUM 1604 and 2204, plus either HUM 3014 or 3024. At least 6 hours (2 courses) of additional courses must be at the 3000-4000 level; these upper-level courses, plus one additional course, may

include offerings in Art and Art History, English, Music, Philosophy, and Theatre and Cinema as well as in Religion and Culture. HUM 4974: Independent Study is strongly suggested as a means of integrating coursework in the minor. Students may design their own combinations of courses with an advisor, who will make substitutions to the courses within the tracks, as appropriate. A check sheet for this minor is available online, from the Religion and Culture main office, or from the minor coordinator.

**Coordinator: Michael Saffle**

[TOP](#)

## **Judaic Studies**

Affiliated Faculty: C. Kiebuszinska (English); S. Knapp (English); E. Meitner (English); E. Sheinberg (Music)

Endowed in 1996, the Malcolm and Diane Rosenberg Program in Judaic Studies offers students the opportunity to explore, examine, and critically engage the rich and multifaceted history, religion, and culture of the Jewish people. As members of a community that has crossed a number of borders and cultures, the Jews have served as transmitters of texts and ideas, as agents of cultural and intellectual cross-fertilization and innovation. Judaic culture has significantly contributed to Western and other civilizations.

The program is multidisciplinary in nature and complements various existing courses and programs dedicated to major religions and cultures at Virginia Tech.

The minor in Judaic Studies is an option for students in all majors. The student who chooses a minor in Judaic Studies will work closely with a faculty advisor to tailor an academic program that fits the interests of the student while also ensuring the students acquaintance with the diverse topics of Judaic Studies. The minor requires 18 credit hours. Students will take the two required courses: JUD 2134: Judaism: A Survey of History, Culture and Heritage, and JUD/REL 2414: Hebrew Bible/Old Testament. Then they choose four additional courses from two units, at least one course from each unit. A check sheet for this minor is available online, from the Religion and Culture main office, or from the minor coordinator.

**Coordinator: Benjamin Sax**

## **Medieval and Early Modern Studies**

The Medieval and Early Modern Studies Minor was developed in conjunction with faculty from participating departments. The minor allows students to gain a broad interdisciplinary understanding and appreciation of events and ideas between the fourth and seventeenth centuries, although it encourages some degree of specialization. Students work in close association with an advisor who will help plan a coherent program tailored to the student's interests, but which also reflects the range and variety of Medieval and Early Modern Studies. A check sheet for this minor is available online, from the Religion and Culture main office, or from the minor coordinator.

**Coordinator: Matthew Gabriele**

## **Middle East Studies**

The Middle East Studies minor was developed in conjunction with faculty from participating departments. The interdisciplinary minor in Middle East Studies allows students to gain a broad understanding and appreciation of the languages, religions, and cultures of the Middle East and of the region's history and its place in international relations. Students work in close association with an advisor who will help plan a coherent program tailored to the student's interests. A check sheet for this minor is available online, from the Religion and Culture main office, or from the minor coordinator.

**Coordinator: Rachel M. Scott**

## **Popular Culture**

The minor in Popular Culture provides students with interdisciplinary tools that enable them to recognize popular culture as a site of ongoing political and social struggle. Popular culture includes all widely practiced and distributed expressions: news; entertainment; religion; sports; popular art and styles of decoration, dress, and architecture. Familiarity with the forces that shape the productions and reception of popular culture allows students to develop skills fundamental to life in a consumer-capitalist economy and citizenship in an information age. Minors explore how popular culture generates and articulates our understandings of race, class, gender, and consumer capitalism. Students learn to think critically about the ways in which images and stories sustain and contest societal norms.

The minor has two required courses, HUM 2504: Introduction to American Studies and HUM 3034: Theories of Popular Culture.

Students work in close association with an advisor who will help plan a coherent program tailored to each student's interests. Appropriate courses may be substituted with permission from the minor coordinator. A check sheet for this minor is available online, from the Religion and Culture main office, or from the minor coordinator.

## **Religion**

Religion is a topic as broad as the study of people, their histories, literatures, arts, and ways of thinking. To study religion is to explore the many ways people in various cultures and times have expressed their deepest convictions about life and death, the universe, law, politics, and identity.

Studies in religion offer an examination of the values and sacred traditions that have been cherished and contested throughout history. Academic courses in religion studies use a variety of approaches. Some are descriptive in character, dealing with historical or contemporary forms of religious phenomena and thought. Others employ literary methods in the study of sacred texts or engage the student in reflection about contemporary religious and secular thought and issues. Still others pose normative questions about certain issues or controversies concerning religious traditions themselves (e.g., Why do many religions that are practiced in America differ from their counterparts elsewhere? Is homosexuality compatible with Christianity? Does feminism in Islam coincide with its founding?) By examining a diversity of traditions and viewpoints, the study of religion provides the resources for an intellectually responsible appraisal of one's own value commitments. Students choose Religion courses as a part of a broad liberal arts education, and some who have minored in Religion have gone on to pursue graduate study in a variety of fields (including the academic study of religion) or to professional training in ministerial or social service vocations.

Any student whose major requires or permits a minor may complete the Religion minor. For the minor, a student must complete a total of 18 semester hours (usually 6 courses) in Religion, including 6 hours at the 1000 level, 6 hours at the 2000-4000 level, and 6 hours at the 3000-4000 levels. In the process of meeting these requirements, the student must also satisfy a diversity requirement by successfully completing one of the following REL courses: 1014, 2144, 2234, 2734, 2744, 3214, 3224, 3234, or 4074 or 4324 with an appropriate and approved topic.

Many Religion courses fulfill requirements for the Curriculum for Liberal Education. The following courses are approved for Area 2 (Ideas, Cultural Traditions, and Values): REL 1014, 1024, 1034, 1044, 2124, 2234, 2414, 2424, 3024, 3214, 3224, 3414, and 3424. REL 1024, 2234 and 2464 are also approved for Area 7 (Critical Issues in a Global Context). A check sheet for this minor is available online, from the Religion and Culture main office, or from the minor coordinator.

**Coordinator: Ananda Abeysekara**

---

## **TOP**

### **Undergraduate Course Descriptions (APS)**

#### **1704 (HUM 1704): INTRO APPAL STUDIES**

Traces the idea of Appalachia in American and world consciousness and its expression in the humanities and arts. Through comparison with other cultural groups, explores humanistic problems of cultural identity, assumptions, change and manipulation. (3H,3C)

#### **3464 (AHRM 3464) (GEOG 3464) (HD 3464) (HUM 3464) (SOC 3464) (UAP 3464): APPALACHIAN COMMUNITIES**

The concept of community in Appalachia using a multidisciplinary approach and experiential learning. Interrelationships among geographically, culturally, and socially constituted communities, public policy, and human development. Pre: 2000-level course in any cross-listing department. (2H,3L,3C)

#### **4404 (HUM 4404): APPALACHIAN FOLK CULTURE**

Examination of information learning systems and traditional aesthetic expressions in Appalachia. Investigation of worldview and cultural premises as expressed in traditional artifacts. (3H,3C)

#### **4414 (HUM 4414): CRIT ISSUES/APPAL**

Examination of dominant value conflicts in contemporary Appalachia, focusing on questions of exploitation of human and natural resources. Comparative study of Appalachia, other mountain cultures worldwide, and the Third World. (3H,3C)

#### **4974: INDEPENDENT STUDY**

Variable credit course.

#### **4994: UNDERGRADUATE RESEARCH**

Variable credit course.

### **Undergraduate Course Descriptions (HUM)**

**Introductory Courses:** *Introductory culture courses focus on the culture of a particular age and place through critical examinations of a wide range of human activities: the arts, philosophy, history, politics, religion, economics, science, and technology. Emphasis is placed on the interrelationships among these endeavors and their contributions toward shaping the values and aspirations of their, and our, age and culture. Humanities and the Arts courses explore relationships between the arts and other human endeavors. Classes emphasize writing and classroom discussion of issues*

*raised in readings, lectures, and multi-media presentations, including music, drama, film, and slides of art and architecture.*

---

**1004 (REL 1004): INVESTIG IN RELIGION & CULTURE**

Introduction to the study of religion and culture through multiple academic approaches in humanities and social sciences. Critical investigations of appropriate issues through scholarly collaboration, with emphasis on reading, discussion, and undergraduate research skills. (3H,3C)

**1104 (AINS 1104): INTRODUCTION TO AMERICAN INDIAN STUDIES**

Introduces students to the richness and complexity of American Indian societies past and present. The course begins by considering the critical question of what it means to be "American Indian" or "Native American," comparing externally produced stereotypes with a wide variety of indigenous discourses and narratives. Through a special focus on specific indigenous groups and regions, the course examines American Indian experiences with and reactions to colonial confrontations, government policies, and cultural interchanges with non-Indians. (3H,3C)

**1114: INTRODUCTORY HUMANITIES: THE CLASSICAL AGE**

The world of classical Athens through its embodiments in the arts, philosophy, politics, history, literature, and religion. Emphasis on the interrelationships among the various forms of cultural expression and their contributions toward shaping the values and aspirations of the age. (3H,3C)

**1124: INTRODUCTORY HUMANITIES: THE ROMAN WORLD AND EARLY CHRISTIANITY**

The Roman world and early Christian culture. Emphasis on the interrelationships among the arts, literature, philosophy, history, religion, and their contributions toward shaping the values and aspirations of the age. (3H,3C)

**1214: INTRODUCTORY HUMANITIES: THE MEDIEVAL WORLD**

The medieval synthesis in Western European thought and the transition to the world of the Renaissance. Emphasis on the interrelationships among the arts, literature, philosophy, history, religion, and science, and their contributions toward shaping the values and aspirations of the age. (3H,3C)

**1224: INTRODUCTORY HUMANITIES: THE RENAISSANCE**

The interrelationships among the arts, literature, philosophy, history, religion, and science of the Renaissance in Western Europe, and how they reflect and contribute to the shaping of the values and aspirations of the age. (3H,3C)

**1314: INTRODUCTORY HUMANITIES: ENLIGHTENMENT AND ROMANTICISM**

Major notions and cultural expressions of the Enlightenment and of Romanticism. Emphasis on the interrelationships among the arts, literature, philosophy, history, religion, and science. (3H,3C)

**1324: INTRODUCTORY HUMANITIES: THE MODERN WORLD**

The shifts in thought and values over the past century in the Western imagination. Emphasis on the interrelationships among the arts, literature, philosophy, history, religion, and science, and their contributions toward shaping the values and aspirations of the age. (3H,3C)

**1604: INTRODUCTION TO HUMANITIES AND THE ARTS**

Explores the verbal, visual, and aural arts of several important periods in Western history, setting them in the context of their times. Introduces the structural principles of each art form. (3H,3C)

**1704 (APS 1704): INTRODUCTION TO APPALACHIAN STUDIES**

Traces the idea of Appalachia in American and world consciousness and its expression in the humanities and arts. Through comparison with other cultural groups, explores humanistic problems of cultural identity, assumptions, change, and manipulation. (3H,3C)

**1914: EXPLORATIONS IN TRADITIONAL ASIAN CULTURES**

An introduction to salient cultural characteristics of the major premodern Asian civilizations of the Middle East, India, China, Japan, Southeast Asia, and Central Asia. Differing visions of the human condition represented by these traditions are compared in case studies incorporating historical, literary, philosophical, and artistic works. (3H,3C)

**1924: EXPLORATIONS IN MODERN ASIAN CULTURES**

An introduction to the cultural modernization of major Asian societies since the eighteenth century. The cultural transformation of the Middle East, South Asia, China, Japan, and Southeast Asia are exemplified and compared in case studies that incorporate modern Asian historical, literary, philosophical, sociopolitical, and artistic works. (3H,3C)

**2004 (REL 2004): CASE STUDIES IN RELIGION AND CULTURE**

Significant case studies in the study of religion and culture with an emphasis on influential and emerging research. Focuses engagement with humanities and social sciences research grounded in analysis, comparison, and evaluation of relevant case studies. Pre: REL 1004 or HUM 1004. (3H,3C)

**2104 (AINS 2104) (COMM 2104): ORAL TRADITIONS AND CULTURE**

Examination of the world's great oral traditions, both ancient and contemporary. Emphasis on performance contexts, relationships among multicultural traditions, including American Indian oral traditions, and the relationships among orality, literacy, technology, media, and culture. I (3H,3C)

**2204: HUMANITIES AND THE ARTS: THE CREATIVE PROCESS**

Explores the theory and the experience of the creative process. Studies both essays on the process of creative activity and examples of its product. Includes a personal creative project. (3H,3C)

#### 2214: EXPERIENCES IN THE ARTS

Guided exposure to selected works of art, including painting and sculpture, literature, and the performing arts as well as participation in arts events; exploration of ways in which individual works of art embody and help explain human experience. May not be repeated for credit. Pass/Fail only. (1H,1C)

#### 2444 (CLA 2444) (ENGL 2444): ANCIENT GREEK AND ROMAN MYTHOLOGY

Survey of Ancient Greek and Roman mythology and modern interpretations. In English. No knowledge of Ancient Greek or Latin required. Not for credit toward a Latin Minor. (3H,3C)

#### 2454 (CLA 2454) (ENGL 2454): ANCIENT GREEK AND LATIN LITERATURE IN ENGLISH TRANSLATION

A variable content course devoted to the study of major works of Ancient Greek and Latin literature in English translation. May be repeated for credit with different content. In English. No knowledge of Ancient Greek or Latin required. Not for credit toward a Latin Minor. (4H,3C)

#### 2504: INTRODUCTION TO AMERICAN STUDIES

Methodology and tools of American Studies, emphasizing interrelations among social, cultural, and technological history, values, and artistic creation. Intensive study of a specific topic or period in American culture since 1850. (3H,3C)

#### 2514: ASIAN AMERICAN EXPERIENCE

Critical overview of diverse Asian-American experience, the complexity of minority status, and meaningful citizenship in the USA. Topics include different historical tracks of various Asian ethnicities, experience of racism, activism, cultural adaptation and conflict, and economic survival and success. (3H,3C)

#### 2714 (FR 2714): INTRODUCTION TO FRENCH CULTURE AND CIVILIZATION

French culture and civilization from the Middle Ages to the present. Interdisciplinary approach to literature, film, art, architecture, and theatre in the context of French cultural history. In English. (4H,3C)

#### 2724 (GER 2724): INTRODUCTION TO GERMAN CULTURE AND CIVILIZATION

German culture and civilization from the earliest period to the present. Interdisciplinary approach to literature, film, art, architecture, music, and theatre in the context of German cultural history. In English. (3H,3C)

#### 2734 (RUS 2734): INTRODUCTION TO RUSSIAN CULTURE AND CIVILIZATION

Russian culture and civilization from the Middle Ages to the present. Interdisciplinary approach to Russian literature, art, architecture, music, film, and theatre in the context of Russian cultural history. In English. (4H,3C)

#### 2744 (SPAN 2744): INTRODUCTION TO SPANISH CULTURE AND CIVILIZATION

Introduction to Spanish culture and civilization from the Middle Ages to the present. Interdisciplinary approach combining the study of literature, the arts, architecture, music, theatre, and film in the context of Spanish cultural history. In English. (4H,3C)

#### 2754 (SPAN 2754): INTRODUCTION TO SPANISH-AMERICAN CULTURE AND CIVILIZATION

Spanish-American culture and civilization from the discovery of the New World to the present. Interdisciplinary approach to literature, film, art, architecture, music, and theatre in the context of Spanish-American cultural history. (3H,3C)

#### 2964: FIELD STUDY

Pass/Fail only. Variable credit course.

#### 2974: INDEPENDENT STUDY

Variable credit course.

#### 2974H: INDEPENDENT STUDY

Variable credit course.

#### 2984: SPECIAL STUDY

Variable credit course.

#### 3014: HUMANITIES AND THE ARTS: RENAISSANCE AND EARLIER

Focuses on interdisciplinary topics involving interrelationships among various arts and/or artists (to the end of the Renaissance). (3H,3C)

#### 3024: HUMANITIES AND THE ARTS: POST RENAISSANCE

Focuses on interdisciplinary topics involving interrelationships among various arts and/or artists (from the end of the Renaissance). (3H,3C)

#### 3034 (COMM 3034): THEORIES OF POP CULTURE

Relationship of popular culture to communication; ways to classify, analyze, and evaluate popular culture; history of main themes with emphasis on the United States; cultural evolution of the electronic revolution. Junior standing required. I (3H,3C)

#### 3204 (COMM 3204): MULTICULTURAL COMMUNICATION

Exploration of communication in various cultural groups through the medium of performance. Emphasis on understanding cultural differences and similarities in styles of communication, aesthetics, worldviews, and values. (3H,3C)

#### 3464 (AHRM 3464) (APS 3464) (GEOG 3464) (HD 3464) (SOC 3464) (UAP 3464): APPALACHIAN COMMUNITIES

The concept of community in Appalachia using a multidisciplinary approach and experiential learning. Interrelationships among geographically, culturally, and socially constituted communities, public policy, and human development. Must have completed one 2000-level course in any cross-listing department. (2H,3L,3C)

**3504 (HIST 3504) (REL 3504): THE AGE OF THE CRUSADES**

The origins and development of religious violence examined from an interdisciplinary and cross-cultural perspective; that place of that phenomenon in medieval society. Christianity, Islam, Judaism and their interactions in the medieval world. Junior standing or permission of instructor required. (3H,3C)

**3684 (HIST 3684): CULTURAL HISTORY OF THE SOVIET UNION AND THE SUCCESSOR STATES**

History and main characteristics of cultural life and the arts in the former Soviet Union, with emphasis on film, music, literature, and the relationship between elite and popular culture. Taught alternate years. (3H,3C) II.

**3704 (JUD 3704) (REL 3704): CHRISTIANS, JEWS, AND THE IDEA OF JUDEO-CHRISTIANITY**

The relationship between Judaism and Christianity through time and the idea of Judeo-Christianity, all examined from an interdisciplinary academic perspective; the problems of the "separation" of Judaism and Christianity in antiquity and the Middle Ages and the religious and cultural implication of the relationship between Jews and Christians in the modern world. (3H,3C)

**3954: STUDY ABROAD**

Variable credit course.

**4004 (AINS 4004): TOPICS IN AMERICAN INDIAN STUDIES**

A variable topics course in which students will engage an interdisciplinary methodology to pursue a critical and in-depth examination of various topics concerning and pertinent to American indigenous peoples. This course is repeatable for up to 6 hours credit with different topics. Must meet prerequisite or have permission of the instructor. Pre: AINS 1104. (3H,3C)

**4034 (COMM 4034): FUNCTIONS OF POPULAR CULTURE**

Popular culture as a humanistic discipline; emphasis on archetypes, formulas, and genres; the function of ideas, images, and icons on the popular imagination. Senior standing required. (3H,3C)

**4044: TOPICS IN HUMANITIES AND FILM**

This course introduces students to critical issues in film from a humanistic but interdisciplinary perspective, examining its production, consumption, and effects on various societies. The specific thematic content is variable. Course may be repeated for up to 9 credits. Pre: 2504, 3034 or COMM 2054. (3H,3C)

**4104: EXPLORATIONS IN ADVANCED HUMANITIES TOPICS**

In-depth study of special interdisciplinary topics. Topics vary but involve a close and extensive study of the interrelationship between important cultural ideas and movements, and formative myths and values, and their expression in several of the following forms: literature, philosophy, religion, art, music, drama. May be taken only once for credit. (3H,3C)

**4324 (REL 4324): TOPICS IN RELIGION AND CULTURE**

Selected topics from the religions of the world such as time and the sacred, preliterate religions, women and religion, religion and science, mysticism. May be taken three times for credit with different topics. Pre: 3 REL credits. (3H,3C)

**4404 (APS 4404): APPALACHIAN FOLK CULTURE**

Examination of informal learning systems and traditional aesthetic expressions in Appalachia. Investigation of worldview and cultural premises as expressed in traditional artifacts. (3H,3C)

**4414 (APS 4414): CRITICAL ISSUES IN APPALACHIAN STUDIES**

Examination of dominant value conflicts in contemporary Appalachia, focusing on questions of exploitation of human and natural resources. Comparative study of Appalachia, other mountain cultures worldwide, and the Third World. Pre: 1704. (3H,3C)

**4554: SCIENCE CAPSTONE SEMINAR**

Seminar for advanced undergraduates majoring in the natural sciences. Students and faculty representing several natural science disciplines (including biochemistry, biology, chemistry, geology, physics) participate in the preparation, presentation, and discussion of topics representing a wide range of interdisciplinary scientific interests. Invitation of student's major department required. Pass/Fail only. (3H,3C)

**4964: FIELD STUDY**

Pass/Fail only. Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4974H: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

**4994H: UNDERGRADUATE RESEARCH**

Variable credit course.

## Undergraduate Course Descriptions (IDST)

### 1114: INTRODUCTION TO INTERDISCIPLINARY STUDIES

Introduces the concept of interdisciplinarity. Explores the ways of knowing particular to disciplinary and interdisciplinary fields of inquiry. Emphasizes the integration and application of disciplinary and interdisciplinary approaches to examine and resolve an issue or group of issues. (3H,3C)

### 1814 (AFST 1814): INTRO AFRICAN STUDIES

Introduces students to the study of sub-Saharan Africa-- history, politics, economics, arts, and cultures--and to Africa's place in the world. Required first course in the African (Area) Studies concentration. (3H,3C) I,II.

### 2974: INDEPENDENT STUDY

Variable credit course.

### 2974H: INDEPENDENT STUDY

Variable credit course.

### 2984: SPECIAL STUDY

Variable credit course.

### 3004: IDST INTERNSHIP

Placement in a work setting, on or off campus, for an internship that will serve as a practical experience for eligible students. May be repeated for elective credit up to a maximum of 12 credit hours (1 academic credit earned for every 45 hours worked per 15 week semester); cannot be used for core or minor requirements. Junior or Senior standing and instructor consent required. Variable credit course. X-grade allowed. I,II,III,IV.

### 3114: TOPICS IN INTERDISCIPLINARY STUDIES

Variable content, variable credit course that addresses a complex issue or problem through more than one discipline or intellectual domain. Places at the foreground the discussion of how several different methodological approaches inform our understanding of an issue or group of related issues. Often taught by teams of instructors in distinct, instructional modules or learning experiences. Three credit version is writing intensive. May be repeated with different content for a maximum of 6 credits. Variable credit course. Pre: 1114. I,II,III.

### 3114H: HONORS TOPICS IN INTERDISCIPLINARY STUDIES

Variable content course that addresses a complex issue through more than one discipline or intellectual domain. Places at the foreground the discussion of how several different methodological approaches inform our understanding of an issue or group of related issues. May be repeated with different content for a maximum of nine credit hours. (3H,3C)

### 3954: STUDY ABROAD

Variable credit course.

### 3984: SPECIAL STUDY

Variable credit course.

### 4114: SENIOR RESEARCH SEMINAR

Senior seminar designed to integrate assumptions, theories, and methods of more than one disciplinary perspective. Includes exploration of interdisciplinary research methods, such as case study and ethnography. Includes developing a proposal for an interdisciplinary senior project. Senior standing required. Pre: 3114 or 3114H. (3H,3C)

### 4224: SENIOR PROJECT

This seminar is designed to assist students to complete an interdisciplinary senior project. The project may be a thesis, undergraduate research, action-oriented project, or expressive project in the humanities or the arts such as a video, performance, or a photography or visual art exhibit. Pre: Senior standing and IDST 4114 or completion of a preliminary proposal through an approved independent study. (3H,3C)

### 4974: INDEPENDENT STUDY

Variable credit course.

### 4974H: INDEPENDENT STUDY

Variable credit course.

### 4984: SPECIAL STUDY

Repeatable with different course content. Variable credit course.

### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

### 4994H: UNDERGRADUATE RESEARCH

Variable credit course.

## Undergraduate Course Descriptions (JUD)

### 1104 (HEB 1104): INTRODUCTION TO HEBREW LANGUAGE, CIVILIZATION AND CULTURE

Fundamentals of Modern Hebrew language with emphasis on grammar, reading, composition, and conversation. For students with no prior knowledge of the language. (3H,3C)

**1114 (HEB 1114): ACCELERATED ELEMENTARY HEBREW LANGUAGE**

Complementary introduction to the fundamentals of Modern Hebrew language with continued emphasis on grammar, reading, composition, and conversation. This course is for students who have completed 1104 or with permission from instructor. 1114 is a four-credit course with a self-instruction component that demands student time outside of class. Pre: 1104. (3H,2L,4C)

**2134: JUDAISM: A SURVEY OF HISTORY, CULTURE AND HERITAGE**

A thematic and historical introduction to ancient, medieval, and modern Judaism, up to the founding of the State of Israel. Themes will include monotheism, exile, mysticism, Kabbala, Hasidism, anti-Semitism, the Holocaust, and Judaism in Israel and America. I (3H,3C)

**2414 (REL 2414): HEBREW BIBLE/OLD TESTAMENT**

Introduction to the academic study of the Hebrew Bible (Old Testament); a variety of scholarly approaches to the Bible, including historical-critical, literary, and gender studies. Emphasis on developing skills in critical thinking, reading, and writing about the Bible. Previously taught as 2405. I (3H,3C)

**2974: INDEPENDENT STUDY**

Variable credit course.

**2974H: INDEPENDENT STUDY**

Variable credit course.

**2984: SPECIAL STUDY**

Variable credit course.

**3404 (REL 3404): TORAH AND TRADITION**

Detailed study of the first five books of the Bible, known as the Torah or Pentateuch. Scholarly approaches will include historical-critical research; comparative mythology; form and canon criticism; gender and literary studies; and the reception of these books in the Hebrew Bible, the New Testament and beyond. Pre: REL 2414. (3H,3C)

**3424: TOPICS IN JEWISH CULTURE, HISTORY & THOUGHT**

Selected topics in Jewish culture, history and thought. The courses will focus on a variety of specific issues and will tend to be held as an in-depth seminar in affiliation with the Honor Student's Program. Possible topics include: Jewish thought and philosophy in one of the three periods- ancient, medieval or modern; the American Jewish experience; Jewish music and art (Judaica); Jewish mysticism, and various cultural movements and religious traditions. Taught alternate years. I (3H,3C)

**3494 (HIST 3494): THE HOLOCAUST**

This course provides a historical account, a psychological analysis and an occasion for philosophical contemplation on the Holocaust. We will examine the deliberate and systematic attempt to annihilate the Jewish people by the National Socialist German State during World War II. Although Jews were the primary victims, Gypsies, the handicapped, homosexuals, Jehovah's Witnesses and political dissidents were targeted, we will discuss their faith as well. The class will be organized around the examination of primary sources: written accounts, photographic and film, personal testimony. Taught alternate years. (3H,3C)

**3544 (PSCI 3544): THE STATE OF ISRAEL: A POLITICAL HISTORY**

This course provides a survey on the political history of the State of Israel and highlights major themes uniquely characterizing the specific events surrounding its establishment and its first 50 years of existence. Additionally, the course will add a comparative dimension by using the political history of Israel as a case study to discuss major themes in political science such as democracy, government, political economy, etc. Taught PSCI 1024 or JUD 2134. Alternate years. Pre: or 2134). (3H,3C) II.

**3704 (HUM 3704) (REL 3704): CHRISTIANS, JEWS, AND THE IDEA OF JUDEO-CHRISTIANITY**

The relationship between Judaism and Christianity through time and the idea of Judeo-Christianity, all examined from an interdisciplinary academic perspective; the problems of the "separation" of Judaism and Christianity in antiquity and the Middle Ages and the religious and cultural implication of the relationship between Jews and Christians in the modern world. (3H,3C)

**4424: ADVANCED TOPICS IN JEWISH CULTURE, HISTORY & THOUGHT**

Selected topics in Jewish culture, history and thought. The courses will focus on a variety of more advanced and more specific issues than those offered in JUD 3424. These courses will be held as an in-depth seminar in affiliation with the Honor Student's Program. Possible topics includes: the Philosophy of Maimonides, Spinoza or Buber, or a course dedicated to one of the following topics Kabbalah, Hasidism, The American Jewish experience in the first half of the 20th century, and Oriental Jewish art and folklore. Two JUD courses or senior standing required. Alternate years. (3H,3C) II.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4974H: INDEPENDENT STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

**4994H: UNDERGRADUATE RESEARCH**

Variable credit course.

## **Undergraduate Course Descriptions (REL)**

### **1004 (HUM 1004): INVESTIG IN RELIGION & CULTURE**

Introduction to the study of religion and culture through multiple academic approaches in the humanities and social science. Critical investigations of appropriate issues through scholarly collaboration, with emphasis on reading, discussion and undergraduate research skills. (3H,3C)

### **1014: ASIAN RELIGIONS**

The nature of "religion," approaches to understanding "religion," traditional and contemporary features of Asian "religions" (including Hinduism, Buddhism, Confucianism, Taoism, Shinto), including their manifestations in the USA and their involvement in critical issues in a global context. Previously taught as 1015. I (3H,3C)

### **1024: JUDAISM, CHRISTIANITY, ISLAM**

The nature of "religion," approaches to understanding "religion," traditional and contemporary features of Judaism, Christianity, and Islam, including their manifestations in the USA and their involvement in critical issues in a global context. Previously taught as 1016. (3H,3C) II.

### **1024H: HONORS JUDAISM, CHRISTIANITY, ISLAM (3H,3C)**

### **1034: RELIGION AND THE MODERN WORLD**

Modern challenges to traditional religion and responses to these challenges, including conservative, liberal, and radical responses; science and religion; issues of race and gender; church and state issues. Previously taught as 1025. (3H,3C) I,II.

### **1034H: HONORS RELIGION AND THE MODERN WORLD (3H,3C)**

### **1044: RELIGIOUS ETHICS**

Influential representative social and religious ethical perspectives from the mid-sixties to the present; ethical reasoning on current pressing and perennial social issues based on historical and ethical analysis of case studies; theoretical assumptions about morality as the relation between justice and the good. Previously taught as 1026. (3H,3C) I,II.

### **2004 (HUM 2004): CASE STUDIES IN RELIGION AND CULTURE**

Significant case studies in the study of religion and culture with an emphasis on influential and emerging research. Focused engagement with humanities and social sciences research grounded in analysis, comparison, and evaluation of relevant case studies. Pre: 1004 or HUM 1004. (3H,3C)

### **2104 (GR 2104): GREEK NEW TESTAMENT**

Readings from the New Testament in Greek, with attention to grammatical analysis, historical background and other clues to interpretation. Taught even years. May be repeated with different content for a maximum of 9 credits. Pre: GR 1106. (3H,3C)

### **2124: RELIGION IN AMERICAN LIFE**

The role of religion in American life in selected periods from the original settlements to the present; the influence of religious institutions and movements in American history and the impact of the "American experience" on religious life and expression. Alternate years. Pre: 1034. (3H,3C)

### **2144 (AFST 2144): AFRICAN RELIGIONS**

The role of religious (or belief) systems in African societies, especially the three predominant religious traditions in Africa: the so-called African Traditional Religions, Islam, and Christianity; the universe of religious systems and religious experiences and processes of Africa, in particular, Sub-Saharan Africa; critical examination of the mythic stature of Africa's "religions" within Western cultural (and scholarly) world views and institutions. (3H,3C)

### **2234 (WGS 2234): WOMEN, ETHICS, AND RELIGION**

Women's religious ethical formation; the roles and understanding of women in traditional and major modern religious traditions; authoritative writings and practices of various traditions as they focus on issues of sex and gender; gynocentric methods of study of women, ethics, and religion; feminist and womanist approaches to liberation and social change. (3H,3C)

### **2324: ISLAM**

The rise of Islam under the Prophet Muhammad in Arabia and its spread across Asia and Africa. The development if Islam in the Middle Ages and its resurgence in the 20th century. (3H,3C)

### **2414 (JUD 2414): HEBREW BIBLE/OLD TESTAMENT**

Introduction to the academic study of the Hebrew Bible (Old Testament); a variety of scholarly approaches to the Bible, including historical-critical, literary, and gender studies methods. Emphasis on developing skills in critical thinking, reading, and writing about the Bible. Previously taught as 2405. I (3H,3C)

### **2424: NEW TESTAMENT**

Introduction to the academic study of the New Testament; a variety of scholarly approaches to the New Testament, including historical-critical, redaction critical, and literary methods. Emphasis on developing skills in critical thinking, reading, and writing about the New Testament as a way of understanding the faith and history of early Christianity. Previously taught as 2406. (3H,3C) II.

### **2464 (AAEC 2464) (STS 2464): RELIGION AND SCIENCE**

Exploration of the relationships between religion and science in the western tradition. Topics include: basic frameworks for relationships between religion and science in historical and cultural context; types of human knowledge and truth; similarities and differences between science and religion; evolution; ecology; and contemporary issues. (3H,3C)

**2734 (AFST 2734) (WGS 2734): THE BLACK WOMAN IN THE U.S.**

The emerging womanist perspective of "interstructured oppression" (i.e., the simultaneous effects of racism, sexism, and classism) as relevant to the contributions of Black women in the United States of America; views of Black women from African backgrounds, the Atlantic slave trade, and the progressive rise of womanist/feminist liberation movements in Black culture; contributions of Black women in the U.S. and globally. (3H,3C)

**2744 (AFST 2744): THE BLACK CHURCH IN AMERICA**

Interdisciplinary approach to African American religious experiences, utilizing traditional theological disciplines to analyze the ethos, pathos, logos, and theos that members of the African American faith communities pass down from generation to generation; the cultural, philosophical, and spiritual values of African American peoples viewed through the lens of Black non-fiction and fiction narratives; impact of the contexts of slavery and racism on Black life and religious expression. (3H,3C)

**2954: ENGAGING MULTI-RELIGIOUS WORLD**

Intensive, two-week study abroad course that explores the interaction of religious traditions and groups in a non-US, non-European country and provides students with background readings; on-site visits, lectures, and discussions; and a service learning experience in that culture. (3H,3C)

**2964: FIELD STUDY**

Pass/Fail only. Variable credit course.

**2974: INDEPENDENT STUDY**

Variable credit course.

**2974H: INDEPENDENT STUDY**

Variable credit course.

**2984: SPECIAL STUDY**

Variable credit course.

**3014 (WGS 3014): WOMEN AND GENDER IN ISLAM**

An examination of women and gender in Islam from a variety of perspectives including Muslim women in Islamic history, normative constructions of the role of women in Islam, and women's role in contemporary Muslim societies. Understanding of women in classical Islam; feminist and reformist approaches; and Western constructions of the "rights of women in Islam." Pre: WS 2324. (3H,3C)

**3024: RELIGION AND LITERATURE**

Analysis of literary works and critical debates in such areas as: pilgrimage, myth, disaster, and transcendence. Students will make presentations, develop their own research projects, and design sessions--with short reading assignments--later in the semester. As a final project, students will assemble a portfolio charting their work in the course. Alternate years. (3H,3C) II.

**3214: RELIGION AND CULTURE IN INDIA**

Interaction of religion and culture from Indus Valley civilization to the present; Brahmanism and Hinduism, the Buddha and his teachings, Parsis, Jains, Sikhs, and their respective literatures and rituals; modern reforms and recent trends. Alternate years. I (3H,3C)

**3224: RELIGIONS OF CHINA AND JAPAN**

Religious movements in East Asia with reference to specific situations in China and Japan; Confucianism, Taoism, Mahayana Buddhism, Vajrayana, Shinto, Japanese Folk Religions, the "New Religions" of Japan; recent trends. Alternate years. (3H,3C)

**3404 (JUD 3404): TORAH AND TRADITION**

Detailed study of the first five books of the Bible, known as the Torah or Pentateuch. Scholarly approaches will include historical-critical research; comparative mythology; form and canon criticism; gender and literary studies; and the reception of these books in the Hebrew Bible, the New Testament, and beyond. Pre: 2414. (3H,3C)

**3414: JESUS AND THE GOSPELS**

Academic study of the four canonical gospels; Matthew, Mark, Luke, John; several scholarly methodologies; the problem of the historical Jesus; noncanonical gospels. Alternate years. I Pre: (2424). (3H,3C)

**3424: PAUL AND HIS INTERPRETERS**

Academic study of the New Testament letters by or attributed to Paul; historical, literary, and theological context of the letters; classic and contemporary interpreters. Alternate years. Pre: 2424. (3H,3C)

**3504 (HIST 3504) (HUM 3504): THE AGE OF THE CRUSADES**

The origins and development of religious violence examined from an interdisciplinary and cross-cultural perspective; that place of that phenomenon in medieval society. Christianity, Islam, Judaism and their interactions in the medieval world. Junior standing or permission of instructor required. (3H,3C)

**3704 (HUM 3704) (JUD 3704): CHRISTIANS, JEWS, AND THE IDEA OF JUDEO-CHRISTIANITY**

The relationship between Judaism and Christianity through time and the idea of Judeo-Christianity, all examined from an interdisciplinary academic perspective; the problems of the "separation" of Judaism and Christianity in antiquity and the Middle Ages and the religious and cultural implication of the relationship between Jews and Christians in the modern world. (3H,3C)

**4074 (HIST 4074): TOPICS IN RELIGIOUS AND INTELLECTUAL HISTORY**

Selected topics in the role of religion and intellectual systems in human history. May be repeated with different content. 3 other hours of history required. Junior standing or above required. (3H,3C)

**4324 (HUM 4324): TOPICS IN RELIGION AND CULTURE**

Selected topics from the religions of the world such as time and the sacred, preliterate religions, women and religion, religion and science, mysticism. May be taken three times for credit with different topics. Pre: 3 REL credits. (3H,3C)

**4414: TOPICS IN BIBLICAL STUDIES**

Selected topics concerning either the Hebrew Bible (Old Testament) or the New Testament or both; a specific subject, theme, or biblical book chosen for careful, detailed analysis. Alternate years. Pre: 2424 or 3414. (3H,3C)

**4414H: HONORS TOPICS IN BIBLICAL STUDIES**

Selected topics concerning either the Hebrew Bible (Old Testament) or the New Testament or both; a specific subject, theme, or biblical book chosen for careful, detailed analysis. Alternate years. Pre: 2414 or 2424 or 3414 or 3424. (3H,3C)

**4424: ISLAM AND THE MODERN WORLD**

The most significant issues facing the contemporary Islamic world, with a focus on the Islamic resurgence and the concept of Jihad. The variety of ways in which Muslims reformulate the Islamic tradition as a response to the pressures of modernity. Pre: 2324. (3H,3C)

**4964: FIELD STUDY**

Pass/Fail only. Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4974H: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

**4994H: UNDERGRADUATE RESEARCH**

Variable credit course.

### Overview

The School of Education provides professional education programs and degrees only at the graduate level for prospective and experienced teachers, counselors, researchers, and leaders at the elementary, middle, secondary, and post-secondary levels. These programs prepare education professionals for varied employment settings. Special emphasis is placed on science, math, technology, and leadership. Advanced programs are offered at the master's, education specialist, and doctoral levels.

To obtain specific information about these programs and their requirements, interested students should consult the Graduate Catalog or visit the School of Education's website (<http://www.soe.vt.edu/>).

### Entrance to the School of Education

Students enter education programs after completing a bachelor's degree with a major in a content field. Content fields vary depending on the teaching, counseling, or administrative license sought or other educational career goal of the student. There is a link to a listing of the appropriate undergraduate majors for teaching licensure in the Office of Academic Programs section of the School of Education website.

### Licensure and Employment Opportunities

Students completing professional preparation programs are qualified to receive licenses in Virginia, and these licenses are also accepted in most other states. All degree programs are fully accredited by the National Council for Accreditation of Teacher Education and the Virginia Department of Education.

Graduates of professional preparation programs are well prepared for their initial responsibilities and are actively recruited by school systems across the state. Advisors counsel students early in their programs with respect to post-graduation placement opportunities.

### Professional Preparation Programs Offered in the School of Education

The School of Education offers graduate professional preparation programs at both the initial and advanced levels. Please consult the

## **Undergraduate Courses (EDCI)**

### **2114: PERSPECTIVES IN ELEMENTARY AND MIDDLE SCHOOL EDUCATION**

Introduces preservice elementary/middle school teachers to the dynamics of teaching and learning. Focuses on the socioeconomic, political, and academic factors which influence decision making processes. Emphasis is given to future teachers' responsibilities and career opportunities. Clinical experience required. (1H,2L,2C)

### **2984: SPECIAL STUDY**

Repeatable with different course content. Variable credit course.

### **3024: SOCIAL FOUNDATIONS OF EDUCATION**

Exploration of a range of issues related to education in the United States, including purposes, multicultural implications, reform movements, and the teaching profession. Pre-requisite: Junior Standing required (3H,3C)

### **3144 (HD 3144): EDUCATION OF EXCEPTIONAL LEARNERS**

Emphasizes legal, ethical, and economic bases, assessment and eligibility requirements, characteristics and educational implications, and practices pertaining to various exceptionalities. (3H,3C)

### **3154 (PSYC 3154): PSYCHOLOGICAL FOUNDATIONS OF EDUCATION**

Emphasizes theories of human learning and the relationship of learning principles to educational practice in general. Within the context of cognitive, social, and behavioral models of learning, attention is given to instructional procedures, student motivation and discipline, and the assessment of educational progress. Junior level standing required. Pre: HD 1004 or PSYC 2004. (3H,3C)

### **3954: STUDY ABROAD**

Variable credit course.

### **4174 (PSYC 4174): STUDENTS WITH EMOTIONAL AND BEHAVIORAL DISORDERS**

This course examines the characteristics and needs of individuals with emotional and behavioral disorders. Topics include history, definitions and causes of emotional and behavioral disorders, major research findings, identification procedures, educational programming and current issues. (2H,2C)

### **4454 (ME 4454): ENGR. LEADERSHIP/MGMT**

Introduction to management and mentoring skills associated with the application of the engineering design process. Course covers skills necessary for leading diverse teams of people through a technical design project. Managing teams of local high school students through an authentic technical design experience associated with design competitions. Course addresses the practical applications of science, math and engineering, while building and managing teams of people to meet technical project goals. Pre-requisite: ME 4015 or similar team-based design experience, or by permission of instructor. (2H,3L,3C)

### **4984: SPECIAL STUDY**

Repeatable with different content. Variable credit course.

## **Undergraduate Courses (EDCT)**

### **3754: EARLY FIELD EXPERIENCE**

Participation and observation in a cooperating school district as a teacher aide, tutor, or member of an instructional team. Students will be judged on the basis of the extent to which they meet prescribed competencies. Students will write descriptive reports of activities undertaken and objectives accomplished. Variable credit course. Co: 2604.

### **4254: ADULT CAREER AND TECHNICAL EDUCATION PROGRAMS**

Introduction to the underlying theory and procedures involved in developing, delivering, managing, and evaluating adult education programs in Career and Technical Education. Co: 4244. (3H,3C)

### **4604: FUNDAMENTALS OF TRAINING AND DEVELOPMENT**

Overview of training and development in an organizational setting. Students learn the relationship of training and development to human resource development and selected skills necessary to successfully become a training specialist. Particular attention is given to the design and implementation of training and development programs. X-grade allowed. (3H,3C)

### **4614: INSTRUCTIONAL APPLICATIONS IN TRAINING AND DEVELOPMENT**

Develop the ability to plan, organize and apply a variety of group and individual instructional methods in an organizational setting. Emphasis is placed on methods and procedures used by successful training specialists. X-grade allowed. (3H,3C)

### **4754: INTERNSHIP IN EDUCATION**

Planned program of clinical practice in education under the direction and supervision of a university supervisor and a selected practitioner. Pre: Recommendation of program area and successful completion of Professional Studies requirement. Variable credit course. X-grade allowed.

4964: FIELD STUDY/PRACTICUM  
Variable credit course.

4984: SPECIAL STUDY  
Variable credit course. X-grade allowed.

### **Undergraduate Courses (EDEP)**

3154 (PSYC 3154): PSYCHOLOGICAL FOUNDATIONS OF EDUCATION  
Emphasizes theories of human learning and the relationship of learning principles to educational practice in general. Within the context of cognitive, social, and behavioral models of learning, attention is given to instructional procedures, student motivation and discipline, and the assessment of educational progress. Junior level standing required. (3H,3C)

### **Undergraduate Courses (EDHP)**

2984: SPECIAL STUDY  
Variable credit course.

4754: INTERNSHIP IN HEALTH EDUCATION  
Planned program of clinical practice in education under the direction and supervision of a university supervisor and a selected practitioner. Pre-requisite: Recommendation of program area and successful completion of Professional Studies requirement. Variable credit course.

4984: SPECIAL STUDY  
Variable credit course.

### **Undergraduate Courses (EDIT)**

4614: INSTRUCTIONAL TECHNOLOGY: AUDIO-VISUAL AND COMPUTER USES  
An introductory instructional technology course. Principles and production of audio-visual materials and methods in instruction. Application of microcomputers in instruction, emphasizing computer literacy, programming and evaluation of instructional software. Course in methods of teaching, field teaching experience, or teaching experience required. Pass/Fail only. (2H,3L,3C)

### **Undergraduate Courses (EDTE)**

2604: INTRO TO TECHNOLOGY EDUCATION  
Introduction to the Technology Education major. Includes introductory experiences in three general areas (production, communication, transportation) and the technological design and problem-solving process. Orientation to professional education, licensure, and issues related to technology education. Co: 3754. (3H,3C)

2964: FIELD STUDY/PRACTICUM  
Variable credit course.

2984: SPECIAL STUDY  
Variable credit course. X-grade allowed.

3754: EARLY FIELD EXPERIENCE  
Participation and observation in a cooperating school district as a teacher aide, tutor, or member of an instructional team. Students will be judged on the basis of the extent to which they meet prescribed competencies. Students will write descriptive reports of activities undertaken and objectives accomplished. (Max 3C) Variable credit course.

4424: CURRICULUM IN TECHNOLOGY EDUCATION  
Introduction to the history and development, aims and objectives, and contemporary nature of technology education; develops understanding of selection and organization of subject matter, preparation of resource units, curriculum guides, courses of study, and instructional materials. Senior standing in TED required. (3H,3C) II.

4434: TEACHING METHODS IN TECHNOLOGY EDUCATION  
Principles of teaching and learning, techniques and methods of instruction, preparation of teaching units, and practice in presenting technical and non-technical lessons. Senior standing in TED required. (3H,3C)

4754 (ALS 4754): INTERNSHIP IN EDUCATION  
Planned program of clinical practice in education under the direction and supervision of a university supervisor and a selected practitioner. Recommendation of program area and successful completion of Professional Studies required. Variable credit course. X-grade allowed.

4964: FIELD STUDY/PRACTICUM  
Variable credit course.

4974: INDEPENDENT STUDY  
Variable credit course. X-grade allowed.

## Overview

The Department of Science and Technology in Society (STS) offers interdisciplinary work at both the undergraduate and graduate levels that contributes to our understanding of the relations among science, technology, and society. At the undergraduate level, it offers one major and five minors or programs of study. Specific information about the major or minors can be found at [www.sts.vt.edu](http://www.sts.vt.edu).

## Humanities, Science, and Environment Major and Minor (HSE)

The degree program in Humanities, Science, and Environment (HSE) provides an interdisciplinary approach to environmental issues, integrating humanities, social sciences, and natural sciences to understand the relationship between people and the natural world. HSE also offers a 27 semester hour minor. For more information or a checksheet, please contact Prof. Eileen Crist.

### General Information:

Other departmental minors require 18-21 semester hours, 9 of which must be at the 3000 and 4000 levels.

The two main themes in STS courses are: (a) the human and social dimensions of science and technology; and (b) the historical, societal, and value issues pertaining to the biological sciences, physical sciences, engineering, and technology. Most STS courses qualify for credit in Area 2 of Liberal Education; a few are in Area 3 or Area 7. The 1000-level course examines how contemporary values influence developments in science and technology and, in turn, how science and technology help shape our values and influence the society in which we live. Courses at the 2000 level survey issues pertaining to a particular area of the sciences or engineering. Courses at the 3000 level focus on conceptual issues, examining formative ideas and cultural traditions, identifying the historical trajectories that brought these into existence, and enabling students to imagine and critically assess alternative futures. Finally, courses at the 4000 level explore the

value dimensions of a specific topic, such as environmental science, health care, science and pseudo-science, and computerization.

## **Humanities, Science, and Technology Minor (HST)**

This minor may be designed to emphasize combinations of moral, aesthetic, intellectual, political, historical, philosophical, and sociological dimensions of science, technology, and medicine, through case studies and in-depth analysis. Students work with the undergraduate coordinator in STS to design a coherent program.

## **Science and Technology Concentration (ST)**

This individualized concentration requires in-depth study and practice of theories and methods of science and technology. Students choose a concentration in one science or technology program; coupled with 9 credit hours of STS courses; the student's program of study must be approved by the STS undergraduate coordinator. In some fields, more than 18 credit hours may be required to complete the concentration.

## **Medicine and Society Minor (MSOC)**

The Medicine and Society minor focuses on the humanistic aspects of medical practice, pressing bioethical questions, and the subjective experience of illness and health. The MSOC minor provides an essential education for anyone curious about the role of medicine in past eras and contemporary culture, and it provides an excellent background for those considering a career in medicine or other health care professions. The minor requires 21 credit hours with at least 14 hours at the 3000 or 4000 level. Enrollment is handled through the Department of Science and Technology in Society; see Carol Sue Slusser in 121 Lane Hall to enroll.

Faculty advisors as well as other program information are available on the MSOC Scholar site. Log in to Scholar and go to MY WORKSPACE. Click on MEMBERSHIP, and then click on JOINABLE SITES. Scroll through until MEDICINE AND SOCIETY appears. Students have to join the site as a guest in order to see the pages. Once enrolled, students will be added as participants.

## **Gender, Science, and Technology Minor (GST)**

Co-developed by Women's Studies and STS, this minor offers the opportunity for students to cultivate an understanding of the complex ways in which gender is defined in relation to science and technology, and science and technology are defined in relation to gender. The minor coordinator is the Director of the Women's Studies Program.

## **Graduate Program**

STS jointly administers the Science and Technology Studies Graduate Program with the departments of History, Philosophy, Political Science, and Sociology. The program offers the M.S. and Ph.D. degrees at both the Blacksburg and National Capital Region campuses. (See the [Graduate Catalog](#) for further information.)

## **Undergraduate Courses Descriptions (STS)**

### **1504: INTRODUCTION TO HUMANITIES, SCIENCE, AND TECHNOLOGY**

An introduction to ways of considering interrelationships among three of the major dimensions of our culture: its science, its technology, and its humanistic orientation. (3H,3C)

### **2054 (HIST 2054): ENGINEERING CULTURES**

Development of engineering and its cultural roles in historical and cross-national perspectives. Explores roles of engineers and engineering in popular life, development of national styles, changing values in engineering problem solving, and effects of evolving forms of capitalism. (3H,3C)

### **2154: HUMANITIES, TECHNOLOGY, AND THE LIFE SCIENCES**

Examines the value-laden issues surrounding the professional dimensions of research in the biological and life sciences and provides humanistic perspectives on the role and function of science in society. (3H,3C)

### **2354: HUMANITIES, TECHNOLOGY, AND THE PHYSICAL SCIENCES**

Examines the value-laden issues surrounding the professional dimensions of research in the physical sciences and technology, and provides humanistic perspectives on the role and function of science in society. (3H,3C)

### **2464 (AAEC 2464) (REL 2464): RELIGION AND SCIENCE**

Exploration of the relationships between religion and science in the western tradition. Topics include: basic frameworks for relationships between religion and science in historical and cultural context; types of human knowledge and truth; similarities and differences between science and religion; evolution; ecology; and contemporary issues. (3H,3C)

### **2974: INDEPENDENT STUDY**

Variable credit course.

**2974H: INDEPENDENT STUDY**

Variable credit course.

**2984: SPECIAL STUDY**

Variable credit course.

**3105,3106: SCIENCE AND TECHNOLOGY IN MODERN SOCIETY**

Examination of science and technology as social and cultural activities in the modern world. 3105: institutions and values in science and technology; 3106: value conflicts and decision making in science and technology. (3H,3C)

**3314: MEDICAL DILEMMAS AND HUMAN EXPERIENCE**

This course will explore medical dilemmas from a humanistic perspective, including topics related to assisted reproduction, genetic testing and treatment, organ transplantation, clinical trials, end-of-life interventions, and decisions regarding allocation of health-care resources. (3H,3C)

**3324 (WGS 3324): PERSPECTIVES ON THE BIOLOGY OF WOMEN**

Examines historical, social, and cultural views of women's biology and how those views have impacted women's physical and mental health. Special attention is paid to the influence of cultural traditions and beliefs on scientific perspectives. Pre: WS 1824. (3H,3C)

**3705,3706 (HIST 3705, 3706): HISTORY OF SCIENCE**

Conceptual and institutional development of physical and biological sciences viewed within a cultural and societal context. 3705: Early Science; 3706: Modern Science (3H,3C)

**3715,3716 (HIST 3715, 3716): HISTORY OF TECHNOLOGY**

Description of the development of technology and engineering in their social contexts. 3715: from prehistory to the industrial revolution in Europe and the United States, mid-19 century; 3716: from mid-19th century to the present. (3H,3C)

**3734 (HIST 3734): HISTORY OF MODERN BIOLOGY**

This course explores the development of biology from the Enlightenment to the end of the twentieth century, with a particular emphasis on biology's impact on society. (3H,3C)

**3984: SPECIAL STUDY**

Variable credit course.

**4304: CONTEMPORARY ISSUES IN HUMANITIES, SCIENCE, AND TECHNOLOGY**

Contemporary humanistic issues, such as human freedom and the quality of life, emerging from scientific and technological research in the areas of genetic and reproductive interventions, biotechnology, and environmental studies. Junior standing is required. (3H,3C)

**4504: SCIENCE, THE SCIENTIST, AND SOCIETY**

The intellectual climate, social environment, and personal motivations that affected a noteworthy scientist during his or her research career, for example, Darwin, Curie, Freud, and Einstein. (3H,3C)

**4704 (WGS 4704): GENDER AND SCIENCE**

Investigates the gender dimensions of science in both historical and contemporary perspectives. Discusses feminist studies of science, exploring strengths and limitations. Assess implications of cultural assumptions about gender for practicing scientists. A 3000 level course in science or engineering may satisfy the prerequisite. Pre: 1504 or WS 2244. (3H,3C)

**4754: INTERNSHIP**

Variable credit course.

**4964: FIELD STUDY**

Pass/Fail only. Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4974H: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

**4994H: UNDERGRADUATE RESEARCH**

Variable credit course.

## Overview

The department offers programs leading to the B.S., M.S., and Ph.D. and provides courses open to students in all colleges of the university. Undergraduate majors are required to complete the Curriculum for Liberal Education and the core curriculum of the College of Liberal Arts and Human Sciences, 31 hours in sociology, plus STAT 3604, 6 hours from another social science department and 6 hours of approved additional transferable skills. Required courses are: SOC 1004, 3004, 3104, 3204 and 4194. In addition students must take a minimum of 15 hours of sociology electives, no more than six hours of which can be taken at the 1000-20000 level. Of the remaining nine hours in sociology, a minimum of six hours must be taken at the 4000 level.

Also offered for students graduating in 2014 and beyond are degree options in Africana studies, Women's and Gender Studies, crime and deviance, research methods, and social inequality. Each option has its own set of course requirements. Please request additional information and course lists from the departmental office.

For a minor in sociology, the undergraduate student is required to complete 18 hours in sociology including SOC 1004. No more than nine hours at the 1000-2000 level shall count toward the 18-hour requirement for a minor. A minimum GPA of 2.0 for courses in the minor is required.

The Cooperative Education Program is available to qualified undergraduates in the curriculum. Information on the program may be found elsewhere in this catalog or by contacting Career Services.

The department offers an internship program for eligible majors.

The department also cooperates with curricula offerings through the Appalachian Studies program, the Center for Gerontology, and the Center for the Study of Science in Society.

## Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the Curriculum for Liberal Education ([see "Academics"](#)), toward the Liberal Arts and Human Sciences Core, and toward the degree in sociology.

Satisfactory progress toward the B.S. in sociology requires that:

1. Upon having attempted 72 semester credits (including transfer, advanced placement, advanced standing, credit by examination, and W grade policy), students must have completed:

SOC 1004: Introduction to Sociology	3
SOC 3104: Social Theory	3
SOC 3204: Social Research Methods	4
Sociology electives	9
<b>Total Credits</b>	<b>(19)</b>

2. Upon having attempted 60 semester credits, students must have an in-major grade point average of 2.0 or above and an in-major GPA of 2.0 thereafter to be considered as making satisfactory progress toward the degree.
3. All courses with the SOC prefix are included in the calculation of the in-major GPA.

## Africana Studies Program

### Ellington Graves, Director

**Professors:** O. Agozino (Africana Studies); W. Reed (Africana Studies)

**Gloria Smith Endowed Professor:** Hayward "Woody" Farrar (History)

**Associate Professors:** K. Harrison (Africana Studies/Sociology); P. Polanah (Africana Studies)

**Assistant Professors:** R. Brunn (Africana Studies/Sociology); P. Rivera-Rideau; P. Seniors (Africana Studies)

**Affiliated Faculty:** N. Giovanni (English); R. Graham (Art); L. Roy (English); V. Fowler (English); H. Farrar (History); B. Bunch-Lyons (History); E. Graves (Sociology); M. Herndon (Distance Learning); B. Shadle (History); V. White (School of Visual Arts)

Africana Studies is an interdisciplinary field of study that uses concepts and methodologies of the Social Sciences and the Humanities, centering on the study of peoples of African descent. The program cooperates with faculty from across the university, whose teaching and research is concerned with Africa and the African diaspora. Africana Studies supports the university's objective to increase the numbers of students and faculty of color. It also engages with other programs and organizations in community awareness activities that celebrate the richness and diversity of African diasporic cultures and traditions. An Africana Studies minor is open to all students who are interested in learning about the issues covered in the AFST program.

The Africana Studies program presently offers two minors. One focuses on African Americans while the other focuses on continental Africa.

**African American Studies Minor.** The African American Studies minor requires successful completion of at least 18 semester hours from the following:

REQUIRED COURSES:	
AFST 1714	Introduction to African American Studies
AFST 4354	Issues in Africana Studies
Electives:	
Choose 12 credits from the list below of which at least 6 credits must be at the 3000 level or above.	
AFST 1814	Intro to African Studies
AFST/REL 2144	African Religions
AFST 2354	The Civil Rights Movement
AFST 2454	Race and Racism
AFST/REL 2734	The Black Woman in the USA
AFST/REL 2744	The Black Church in America
AFST 2754	Sports and The Afro-American Experience
AFST 2774	Black Aesthetics
AFST/HIST 3175	Afro-American History

AFST/HIST 3176	Afro-American History
AFST 3454	African American Leadership
AFST/ENGL 3634	African American Literature
<b>African Studies Minor.</b> The African Studies minor requires successful completion of at least 18 semester hours from the following:	
<b>Required Courses:</b>	
AFST 1814	Intro to African Studies
AFST 4354	Issues in Africana Studies
<b>Electives:</b> <b>Choose 12 credits from the list below of which at least 6 credits must be at the 3000 level or above.</b>	
HIST 2304	Africa in the Modern World
AFST/REL 2144	African Religions
AFST 2774	Black Aesthetics
AFST/HIST 3175	Afro-American History
AFST/HIST 3176	Afro-American History

## American Indian Studies: A Holistic Approach

**Samuel R. Cook, Director**

**Associate Professor:** S. Cook

**Instructor:** H. Dyer

A program in the Department of Sociology, we offer several courses and a minor in American Indian Studies.

We believe that any successful American Indian Studies program must do more than simply educate a general student body on American Indian cultures and issues in a sensitive way. We believe that our curricula must exist in conjunction with all university programs pertinent to American Indians, and must depend on the impetus of indigenous peoples working within and beyond the university.

In keeping with Virginia Tech's status and mission as a land grant institution, we strive to serve our indigenous constituency, both as educators and as partners. Accordingly, our program serves as a vital conduit for university-tribal relations, the recruitment and retention of American Indian students and faculty, and Service-Learning initiatives in indigenous communities. Although our program has a regional focus, we offer a wide spectrum of courses--ranging from American Indian Literatures, American Indian Spirituality, and American Indian Arts, to native Peoples of the Southeast, American Indians in Film, and Global indigenous Rights--reflecting the impressive and diverse expertise of our faculty.

In short, we embrace a holistic, collaborative approach to American Indian Studies in which university faculty and students develop and maintain meaningful partnerships. Accordingly, we maintain a tribal advisory board consisting of elders and leaders from all of Virginia's eight Indian Nations. We regard these representatives, and ultimately, all indigenous peoples as our colleagues.

## Women's and Gender Studies Program

**Katrina Powell, Director**

**Professors:** B. E. Smith

**Associate Professors:** L. Gillman; N. M. King; K. Powell

**Assistant Professors:** M. Kim; C. Labuski; S. Samanta (Sociology)

**Instructors:** L. Pendleton (Electrical and Computer Engineering)

**Visiting Assistant Professor:** M. Shama

### **Affiliated Faculty:**

**Professors:** O. Agozino (Africana Studies); K. Allen (Human Development); R. Blieszner (Human Development); C. Burch-Brown (Art); T. Calasanti (Sociology); E. Creamer (Educational Leadership and Policy Studies); K. DePauw (Graduate School, Sociology, Human Nutrition, Foods, and Exercise); G. Downey (Science and Technology in Society); E. Fine (Interdisciplinary Studies); V. Fowler (English); B. Hausman (English); A. Kilkelly (Theater Arts); Ilja Luciak (Political Science); P. Meszaros (Human Development); J. Rothschild (Government and International Affairs); L. Roy (English); S. Rowlands (CLAHS); K. Singh (Education); D. Stoudt (CLAHS); A. Zvonkovich (Human Development)

**Associate Professors:** K. Belanger (English); C. Dannenberg (English); W. Dunaway (Government and International Affairs); E. Ewing (History); S. Fowler (Graduate Education Development Initiative, English); S. Johnson (Foreign Languages and Literatures); K. Jones (History); S. Knapp (English); M. Mollin (History); K. Powell (English); R. Shingles (Political Science); D. Tatar (Computer Science); G. Tilley-Lubbs (ESL & Multicultural Education); J. Watson (Foreign Languages and Literatures)

**Assistant Professors:** E. Bauer (Foreign Language & Literatures); R. Brunn (Sociology); S. Carter-Tod (English); S. Halfon (Science and Technology in Society); P. Hoon (Political Science); C. Kaestle (Human Development); C. Lavin (ASPECT); E. Mazzolini (English);

S. Ovink (Sociology); S. Paterson (Art and Art History); E. Plummer (Office of Recovery and Support); E. Satterwhite (Religion & Culture); P. Seniors (Africana Studies); R. Scott (Religion & Culture); B. Shadle (History); A. Sharma (Industrial Design); V. Venhatesh (Foreign Language & Literatures); N. Zhange (Foreign Language and Literatures)

**Adjunct Faculty:** E. Chancey (Religion & Culture); M. E. Christie (Women in International Development); S. Elber (Science & Technology); J. Henderson (Religion & Culture); M. James-Deramo (Service Learning); K. Precoda (Theatre & Cinema)

The field of Women's and Gender Studies (WGS) transforms traditional disciplines through new methods and theories generated by feminist scholarship. The Women's and Gender Studies Program is housed in the Department of Sociology and includes teaching faculty and affiliates from across the entire campus. WGS affiliated faculty contribute to the program through their research, student advising, participation in governance, and teaching.

Women's and Gender Studies offers courses for all students in the university, including four in Area 2 of the Curriculum for Liberal Education (WS 1824, WS 2224, WS 2234, and WS 2254), one in Area 3 (WS 2264), and two in Area 7 (WS 2234 and WS 3214). Students interested in WGS may select from two minors, Women's and Gender Studies, and Gender, Science, and Technology. The degree option and minors are interdisciplinary, cross-cultural programs of study in which students cultivate an understanding of the complex ways that gender is defined and contested in social structures, history, culture, and technology. They offer students new ways of thinking about how gender, race/ethnicity, class, and sexuality shape social institutions and cultural beliefs as well as personal experiences and perceptions. Central to the mission of the Women's and Gender Studies Program is the empowerment of a diverse population of women within local, regional, national, and global contexts.

Students interested in learning more about the Women's & Gender Studies program should contact the program director, Katrina Powell at [kmpowell@wgs.vt.edu](mailto:kmpowell@wgs.vt.edu).

A graduate certificate in Women's and Gender Studies is also available. See the [Graduate Catalog](#).

## Center for Race & Social Policy

### Wornie Reed, Director

The Race and Social Policy (RSP) Research Center, presently a College Center, was formed in April 2001 as a University Center to fulfill two primary goals: (1) to conduct and disseminate original research in the area of public policy with a direct emphasis on race and ethnicity; and (2) to prepare promising graduate students to think and speak critically, plan quality research, and contribute to public-policy discussions related to race and ethnicity.

The Center promotes a broad and inclusive concept of race and ethnicity, which includes African Americans, American Indians, Asian Americans, European Americans, Latinos, and bi-racial and multi-racial identities. RSP research projects involve the development and evaluation of public policy across different racial and ethnic contexts and within myriad public policy venues, including welfare, employment, education, and health as well as community outreach.

## Center for Peace Studies and Violence Prevention

### James Hawdon, Director

The Center for Peace Studies and Violence Prevention is a student-center, multi-disciplinary undertaking to promote research, education and outreach in the area of peace studies and violence prevention. Since its inception in 2008, the Center has adopted three thematic areas:

- The prevention of violence
- Peace studies
- The development of new leaders for this century

The Center is a hub for research and pedagogy on peace studies and violence prevention. Our multidisciplinary approach allows students, faculty, and a variety of off-campus constituents to address peace building and violence prevention in a holistic manner.

[TOP](#)

## Undergraduate Course Descriptions (AFST)

### 1714: INTRODUCTION TO AFRICAN AMERICAN STUDIES

Introduction to the interdisciplinary field of Africana Studies. Organized around central themes and forces that have shaped and been shaped by the life experience of people of African descent. (3H,3C)

### 1814 (IDST 1814): INTRO TO AFRICAN STUDIES

Introduces students to the study of sub-Saharan Africa -- history, politics, economics, arts, and culture -- and to Africa's place in the world. Required first course in the African (Area) Studies concentration. (3H,3C)

#### 2144 (REL 2144): AFRICAN RELIGIONS

The role of religious (or belief) systems in African society, especially the three predominantly religious traditions in Africa: the so-called African traditional religions, Islam, & Christianity; the universe of religious systems and religious experiences and processes of Africa, in particular Sub-Saharan Africa; critical examination of the mythic stature of Africa's "religions" within Western cultural (and scholarly) world views and institutions. (3H,3C)

#### 2354: THE CIVIL RIGHTS MOVEMENT

Examines the Civil Rights Movement in the U.S. Both non-violent and violent resistance will be examined, as well as strategies used in organizing mass boycotts, sit-ins, and marches. Special attention will be paid to how the movement shaped civil rights legislation on the federal level. The course also examines how the Movement influenced student protest on college campuses. (3H,3C)

#### 2454: RACE AND RACISM Examines

Theories of race and racism specifically as they relate to African Americans. We will explain conservative, neo-conservative, liberal, and progressive ideologies concerning race in past and recent United States contexts and how such theories emerged and continue to emerge in recent times. Though the majority of the course focuses on race and racism within the U.S., comparative analyses will be made with Brazil and South Africa. (3H,3C)

#### 2734 (REL 2734) (WGS 2734): THE BLACK WOMAN IN THE U.S.

The emerging womanist perspective of "interstructured oppression," (i.e., the simultaneous effects of racism, sexism, and classism) as relevant to the contributions of Black women in the U.S.; views of Black women from African backgrounds, the Atlantic slave trade, and the progressive rise of womanist/feminist liberation movements in Black culture; contributions of Black women in the U.S. and globally. (3H,3C)

#### 2744 (REL 2744): THE BLACK CHURCH IN AMERICA

An inspection of the history and culture of the Black American Church. The course focuses upon the African origin and African-American development of religions and sects. The course will emphasize broad themes, historical patterns, and similarities as well as differences in the Afrocentric and Eurocentric methods of worshipping. (3H,3C)

#### 2754: SPORTS AND THE AFRO-AMERICAN EXPERIENCE

Sports as a paradigm of the African-American experience. The forms of racism and the periodic significant social advances of the African-American community in the U.S. will be examined from the vantage point of African-American sports. Attention will also be paid to the continuing impact of sports on African-American culture. Sports heroes, successful teams and annual sporting events will be noted and analyzed. (3H,3C)

#### 2774: BLACK AESTHETICS

A definition of those qualities of black American arts which distinguish it from traditional U.S. arts through an analysis of theme, form, and technique as they appear in a representative sample of works by black creative artists. (3H,3C)

#### 2974: INDEPENDENT STUDY

Variable credit course.

#### 2984: SPECIAL STUDY

Variable credit course.

#### 3174 (HIST 3174): AFRICAN AMERICAN MEN IN UNITED STATES HISTORY

Chronological and thematic examination of significant historical moments in black men's lives. Examination of the social, cultural, and political forces contributing to a uniquely African American male experience in the United States. Survey of events in America's collective past such as wars, depressions, and protest movements. (3H,3C)

#### 3175,3176 (HIST 3175, 3176): AFRO-AMERICAN HISTORY

The Afro-American experience in the United States from 1619 to the present. Emphasis upon slavery and the strategies of economic and social survival in the twentieth century. 3175: 1619-1877 3176: 1877-present (3H,3C)

#### 3454: AFRICAN AMERICAN LEADERSHIP FOR SOCIAL CHANGE

This course will utilize the three major paradigmatic assumptions in Black Studies (centeredness, critical analysis, and empowerment) to examine historical and contemporary African American leadership concepts and styles and their impact on social change. (3H,3C)

#### 3634 (ENGL 3634): AFRICAN AMERICAN LITERATURE

Afro-American writings from Phyllis Wheatley through the slave narratives of the nineteenth century to such modern figures as Wright, Hughes, Baldwin, and Morrison. (3H,3C) 3984: SPECIAL STUDY Variable credit course.

#### 4354: ISSUES IN AFRICANA STUDIES

A variable topics course in which students will use the Africana Studies paradigm to take a centered, critical, and empowering look at various topics regarding people of African descent. (3H,3C)

#### 4704: HISTORY OF AFRICAN-AMERICAN THEATRE

An in-depth study of Black Theatre in America. It will explore the history and development of Black Theatre - both commercial and non-commercial. The course will also stimulate critical thinking pertaining to racial issues, differences in aesthetics and cultures. Pre: 1715. (3H,3C)

#### 4754: INTERNSHIP

Variable credit course.

#### 4774: BLACKS IN THE PERFORMING ARTS

An examination of the performing arts as a paradigm of the African-American experience. Forms of U.S. racism and the periodic significant social advances of the U.S.'s African-American community will be examined in this course from the vantage points of blacks in theatre, film, dance, and music. Emphasis will be placed on the continuing impact of performing arts on African-American culture. Performers, heroes, historical works and performing arts events will be analyzed. Pre: 1714. (3H,3C)

**4974: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

## **Undergraduate Course Descriptions (AINS)**

**1104 (HUM 1104): INTRODUCTION TO AMERICAN INDIAN STUDIES**

Introduces students to the richness and complexity of American Indian societies past and present. The course begins by considering the critical question of what it means to be "American Indian" or "Native American," comparing externally produced stereotypes with a wide variety of indigenous discourses and narratives. Through a special focus on specific indigenous groups and regions, the course examines American Indian experiences with and reactions to colonial confrontations, government policies, and cultural interchanges with non-Indians. (3H,3C)

**2104 (COMM 2104) (HUM 2104): ORAL TRADITIONS AND CULTURE**

Examination of the world's great oral traditions, both ancient and contemporary. Emphasis on performance contexts, relationships among multicultural traditions, including American Indian oral traditions, and the relationships among orality, literacy, technology, media, and culture. I (3H,3C)

**2804 (ENGL 2804): CONTEMPORARY NATIVE AMERICAN LITERATURES**

This course offers a sampling of fiction, poetry, and non-fiction by the most influential American Indian writers since 1970, authors such as Momaday, Silko, Deloria, Welch, Harjo, and Alexie. Students will also learn about those aspects of cosmology and storytelling traditionally shared by all American Indian Nations, as well as about those aspects specific to the individual tribal traditions from which the authors and their characters come. Pre: ENGL 1106 or ENGL H1204 or COMM 1016. (3H,3C)

**2974: INDEPENDENT STUDY**

Variable credit course.

**3304 (ENGL 3304): THE LANGUAGES OF NATIVE AMERICA**

Study of the structures of the native languages of the Americas; their interrelationships; their use in individual speech communities; contact with other languages; the interrelationships of linguistic structure, culture, and thought; their future survival. Pre: ENGL 1106 or ENGL H1204 or COMM 1016. (3H,3C)

**3684 (PSCI 3684): INDIGENOUS PEOPLES AND WORLD POLITICS**

A survey of the historical and contemporary struggles of indigenous peoples throughout the world. Examines the dynamics of colonialism (internal and external), identity construction, gender, cultural integrity, and the ongoing global indigenous rights discourse. In addition to covering broad global processes/theoretical approaches, comparative case studies of particular indigenous groups, such as the Maasai (Kenya, Tanzania) and Mayans (Mexico, Guatemala, Belize), are used to highlight the global, regional, and intra-community diversity among contemporary indigenous peoples. (3H,3C)

**4004 (HUM 4004): TOPICS IN AMERICAN INDIAN STUDIES**

A variable topics course in which students will engage an interdisciplinary methodology to pursue a critical and in-depth examination of various topics concerning and pertinent to American indigenous peoples. This course is repeatable for up to 6 hours credit with different topics. Must meet prerequisite or have permission of the instructor. Pre: 1104. (3H,3C)

**4754: INTERNSHIP**

Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

[TOP](#)

## **Undergraduate Course Descriptions (PSVP)**

**4974: INDEPENDENT STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

**Undergraduate Course Descriptions (SOC)****1004: INTRODUCTORY SOCIOLOGY**

Social bases of human behavior, including an introduction to basic theories, research methods, social institutions, complex organizations, and human groups. Social and social psychological antecedents for politics, family, work, science, education, and religion. (3H,3C) I,II,III,IV.

**1014: INTRODUCTION TO SOCIAL ANTHROPOLOGY**

Introduction to basic concepts in social anthropology related to the study of the evolution, social organization, and major institutions of traditional societies with emphasis on non-western cultures. (3H,3C) II.

**2004: SOCIAL ORGANIZATION AND SOCIAL PROBLEMS**

Examines the nature, extent, and causes of social problems in the United States and around the globe from multiple perspectives. Emphasizes the role of conflicting economics, racial, ethnic, national, and gender interests in the creation and perpetuation of social problems. (3H,3C)

**2014: DATING, MARRIAGE AND DIVORCE**

Description and analysis of dating and marital relationships in contemporary society, with additional attention given to factors associated with divorce. (3H,3C) I,II.

**2024: MINORITY GROUP RELATIONS**

Reasons for existence of minority groups and consequences of being subordinate. Focus on racial, ethnic, gender, and age differences. Employment, family relations, health, and general quality of life. Includes cross-national comparisons. Core Curriculum approved for Area II only when taken only in combination with AFST 1714. (3H,3C) I,II.

**2034: DIVERSE AND COMMUNITY ENGAGEMENT**

Examines how understanding the patterns, meanings, and value of human diversity can improve social interactions within a diverse, global society. Focuses on issues of social justice, community, power, and privilege, using comparative, interdisciplinary, cross-cultural, and sociological perspectives. Explores social and cultural influences on people's identities and the implications for social relationships. With a collective responsibility to serve and improve the lives of others in a diverse society, students participate in community engagement projects. (3H,3C)

**2304: INDIVIDUAL IN SOCIETY**

Development of the self through social interaction. Factors affecting individual and collective perceptions, attitudes, and behavior in social contexts. (3H,3C) I,II.

**2404: DEVIANT BEHAVIOR**

Examines behaviors considered deviant in the United States. Explores major types of deviant behavior, such as corporate crimes, extremist groups, sexual deviance, violence, suicide, alcoholism and other drug addictions, and cyber deviance. Includes sociological theories that explain them. (3H,3C)

**2504: COMPARATIVE SOCIAL CHANGE**

Patterns and processes of social and cultural changes in developing areas of the world. Attention to ideologies of change and the transformation of major social structures within societies. (3H,3C) II.

**2514: APPALACHIAN SOCIAL ISSUES**

Survey of social issues of Appalachia including the emergence and perpetuation of stereotypical images, the impact of the coal industry on the social environment, and consideration of religious, political, and social policy aspects. (3H,3C) II.

**2964: FIELD STUDY**

Variable credit course.

**2974: INDEPENDENT STUDY**

Variable credit course.

**2974H: INDEPENDENT STUDY**

Variable credit course.

**2984: SPECIAL STUDY**

Variable credit course.

**3004: SOCIAL INEQUALITY**

Class, status, and power in society. Theories and empirical research findings on vertical and horizontal stratification in society. Class differences in behavior, values, and avenues and extent of social mobility. Cross cultural comparisons. Pre: 1004. (3H,3C) II.

**3014: GENDER RELATIONS**

Focus on the social construction of gender relations. Examines how gender relations vary crossculturally, historically, and for different categories of men and women. Explores the causes and consequences of inequality and privilege. Attention paid to the ways race, ethnicity, class, age, and

sexualities shape and are shaped by gender and the relationship of gender to social institutions. Pre: 1004. (3H,3C)

#### 3104: SOCIOLOGICAL THEORY

Focus on the development and contemporary state of sociological theory. Primary concern is with those theorists who have had significant impact on our thinking about the relationships among man, society, and nature. Pre: 1004. (3H,3C) I,II.

#### 3204: SOCIAL RESEARCH METHODS

Techniques of data collection and analysis employed in the social sciences with emphasis on survey research methods including questionnaire construction, sampling, and analysis of both self-collected and national data; logic behind application of these techniques. Pre: 1004. (4H,4C)

#### 3303: SOCIAL MOVEMENTS

Examines the definitions, emergence, operations, and impact of social movements. Focuses on key social movements such as the civil rights, women's, peace and human rights, labor, and global justice movements. Pre: 1004. (3H,3C)

#### 3304: COLLECTIVE ACTION

How people organize to influence institutional arrangements in society. Panic behavior, riots, protest movements, strikes, coalitions, and revolutions. Theories and issues related to collective action. I Pre: 1004. (3H,3C)

#### 3414: CRIMINOLOGY

Principles of criminology and contemporary theories of criminal behavior, focusing on the extent and distribution of crime in the United States. Pre: 1004. (3H,3C) I,II.

#### 3424: JUVENILE DELINQUENCY

Examination of juvenile delinquency in the United States including theories and explanations of delinquency, the juvenile justice system, and treatment and prevention of delinquency. Pre: 1004. (3H,3C) I,II.

#### 3464 (AHRM 3464) (EDHL 3464) (GEOG 3464) (HD 3464) (HUM 3464) (UAP 3464): APPALACHIAN COMMUNITIES

The concept of community in Appalachia using a multidisciplinary approach and experiential learning. Interrelationships among geographically, culturally, and socially constituted communities, public policy, and human development. (2H,3L,3C)

#### 3504: POPULATION TRENDS AND ISSUES

Contemporary American and global population trends in historical and comparative perspective. Discussion of the impact of population change on individual and society. Relevant public policy questions examined. Pre: 1004. (3H,3C) II.

#### 3604: WORK IN MODERN SOCIETY

Emphasis on the analysis of work, industrial work organizations, and trade unions. International comparisons on the nature of work and related developments in post industrial societies. I Pre: 1004. (3H,3C)

#### 3614: GENDER AND WORK IN THE U.S.

Examination of the role that gender plays in shaping the experience of work, focusing especially on the persistence of occupational segregation by sex, its causes and implications. Also, the interaction of work and family life, including the allocation of household work and control of resources. Social policies affecting gender relations in work organizations will be analyzed. Pre: 1004. (3H,3C) II.

#### 3714: SOCIOLOGY OF AGING

Emergence of old age as a social problem. Social aspects of aging in America, including the minority experience and with some cross-cultural comparisons. Social and demographic characteristics of the aged, location of aged in the social structure, and current and future social problems of old age. Pre: 1004. (3H,3C) II.

#### 3954: STUDY ABROAD

Variable credit course. X-grade allowed.

#### 4014: SOCIOLOGY OF THE FAMILY

The family as a basic social institution: similarities and variations in family systems, their interrelationships with other social institutions, and patterns of continuity and change. Taught alternate years. I Pre: 2014. (3H,3C)

#### 4024: SOCIOLOGY OF RELIGION

Religion as a social structure as well as an institution; with special attention to the functions of religion for individuals, groups and societies, social organization; and the interplay between religion and other social institutions including economics and polity. Taught alternate years. I Pre: 1004. (3H,3C)

#### 4034: SOCIOLOGY OF EDUCATION

Analysis of the structure, functions, and consequences of schooling in America, the social processes affecting academic achievement, and the implications of current knowledge for educational reform. Taught alternate years. I Pre: 1004. (3H,3C)

#### 4044: MILITARY SOCIOLOGY

The military institution and its relationship to society. Emphasis on the role of the military and its social organization; recruitment, socialization, career, combat, deviant behavior, changes in the military, and future trends. Taught alternate years. Junior standing. Pre: 1004. (3H,3C) II.

#### 4114: THE SOCIOLOGY OF POPULAR MUSIC

Examine the social context(s) of popular music, including the social, economic, and political factors that influence the development of different popular music forms; authenticity within popular music genres; popular music's impact on social activity and identity; the institutions that connect popular music producers with consumers. Pre: 1004, 1014 or AFST 1714. (3H,3C)

**4194: SENIOR SEMINAR**

Required seminar for majors. Integration and application of prior coursework, including reviews of theory and research methods. Application of sociological knowledge toward an actual needs assessment in a work setting, completion of a social policy analysis, and a written critique of a sociological publication. Course serves as a bridge to graduate study, prepares students for application of sociological knowledge, and provides overall career guidance. Senior standing and sociology majors only. Pre: 3104, 3204. (3H,3C)

**4304: SMALL GROUPS**

Attitudes and behavior of individuals in small groups and the organizational structure, dynamics, and performance of groups as units. Analysis of formal and informal groups in laboratory and natural settings. Taught alternate years. I Pre: 2304. (3H,3C)

**4404: SOCIOLOGY OF LAW**

The functions of law as a form of social control. The social forces in the creation, enforcement, and change of the law. The nature of law as a force in social change. Taught alternate years. Pre: 1004. (3H,3C) II.

**4414: DRUGS AND SOCIETY**

Examines the use of drugs, including legal and illegal drugs, from a sociological perspective. Cross-cultural and historical patterns of use are discussed and explained. Particular attention is given to drug use within the context of various social institutions. Junior standing. Pre: 1004. (3H,3C)

**4424: JUVENILE DELINQUENCY**

Examination of juvenile delinquency. Includes methods of data collection and the extent and distribution of delinquency. Detailed coverage of theories of delinquent behavior. Examines the juvenile justice system and treatment and prevention of delinquency. Utilizes current empirical research on delinquency in the U.S. and internationally. Pre: 3414. (3H,3C)

**4434: ADVANCED TOPICS IN CRIMINOLOGY**

A variable topics course that focuses on topics related to criminology. In-depth examination of topics such as the death penalty, racial profiling, terrorism, white collar crime, law enforcement, international gangs, political crime, the prison system, cyber crime, and rape. No limit on the number of times taken if different topics. Pre: 3414. (3H,3C)

**4704: MEDICAL SOCIOLOGY**

Social and cultural response to illness and infirmity. Emphasis on the sick role, patient role, practitioner role, organization and politics of health care delivery, stratification, professionalism, and socialization of health practitioners. Taught alternate years. Junior Standing. I Pre: 1004. (3H,3C)

**4714: SOCIOLOGY OF MENTAL ILLNESS**

Mental illness and social systems, historically and in contemporary society. Distribution of mental illness with special reference to stratification, role, and deviance theories. Mental health occupations and organization of treatment. Implications for social policy. Taught alternate years. Junior standing. Pre: 1004. (3H,3C) II.

**4724: SOCIOLOGY OF DEATH**

Social implications of death and its relationship to social behavior and institutions. Social contexts of suicide, terminal illness, execution, and accidents. Death-related processes of funeralization, bereavement, and inheritance. Death in cross-cultural perspective. I Pre: 1004. (3H,3C)

**4754: INTERNSHIP**

Placement and sociologically relevant work in one of a variety of human service settings, combined with relevant readings, discussion and written work coordinated jointly by a faculty member and the setting supervisor. Placement settings include human resource agencies, corrections facilities, extension offices, and law agencies. Sociology major or minor required. Junior or Senior standing required. Consent of internship coordinator required. Coursework relevant to placement setting. Variable credit course. I,II,IV.

**4764 (GEOG 4764) (UAP 4764): INTERNATIONAL DEVELOPMENT POLICY AND PLANNING**

Examination of major development theories and contemporary issues and characteristics of low-income societies (industrialization, urbanization, migration, rural poverty, hunger, foreign trade, and debt) that establish contexts for development planning and policy-making. Junior standing required. I (3H,3C)

**4804: SOCIOLOGY OF SCIENCE**

Focus on the institution of science and its systems: normative, reward, and stratification. Concentrates on the interaction between science and other basic social institutions: political, economic, and religious. Taught alternate years. Junior standing. Pre: 1004. (3H,3C) II.

**4964: FIELD STUDY**

Pass/Fail only. Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4974H: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course. X-grade allowed.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

4994H: UNDERGRADUATE RESEARCH  
Variable credit course.

## **Undergraduate Courses - Women's and Gender Studies (WGS)**

### **1824: INTRODUCTION TO WOMEN'S STUDIES**

This interdisciplinary introduction to Women's and Gender Studies examines interrelations between men and women as social groups in the contexts of race, class and other systems of inequality. It places special focus on the diverse experiences of women and feminist struggles for social change. (3H,3C)

### **2114: FEMINIST THEORY**

Examination of diverse theoretical perspectives on women and gender, including their historical origins and political implications. Special emphasis on integrative perspectives that also address race, class, and other dimensions of inequality. Pre: 1824. (3H,3C)

### **2224: WOMEN AND CREATIVITY**

A study of the philosophical, artistic, and biographical dimensions of women's creativity in a wide variety of fields. Pre: 1824. (3H,3C)

### **2234 (REL 2234): WOMEN, ETHICS, AND RELIGION**

Women's religious ethical formation; the roles and understandings of women in traditional and major modern religious traditions; authoritative writings and practices of various traditions as they focus on issues of sex and gender; gynocentric methods of study of women, ethics, and religion; feminist and womanist approaches to liberation and social change. (3H,3C)

### **2244: WOMEN AND SCIENCE**

Uses research from the disciplines of science, women's studies, history, sociology, and philosophy to examine women's roles in the fields of science, technology, engineering, and mathematics. Starting with historical figures, students will follow the progress women have made in entering and succeeding in science careers. Pre: 1824. (3H,3C)

### **2254: FEMINIST ACTIVISM**

Explores the history of individual and collective action geared toward gaining women's rights and improving women's positions in society. Course covers tensions and shifts in feminist movements, as well as the perspectives, agendas, and actions of specific subgroups of women whose perspectives sometimes conflict. Service-learning is a required component of the course. Pre: 1824. (3H,3C)

### **2264: RACE, CLASS, AND GENDER**

This course focuses on the interrelationships of race, class, and gender in the context of women's studies scholarship, and explores how these interrelationships have influenced the experiences of all people in the U.S. Students will learn to conceptualize these categories as interactive systems, not just as separate features of experience. Emphasis will be put on how race, class, and gender shape all social institutions and systems of meaning. Must have prerequisite or instructor's consent. Pre: 1824. (3H,3C) I,II.

### **2274: WOMEN IN THE MILITARY**

This course covers historical and global perspectives on the experiences women have had in and with the military. This course introduces students to issues concerning women fighters and military families, as well as to debates over women in combat positions, military policies, and globalization. (3H,3C)

### **2734 (AFST 2734) (REL 2734): THE BLACK WOMAN IN THE U.S.**

The emerging womanist perspective of "interstructured oppression" (i.e., the simultaneous effects of racism, sexism, and classism) as relevant to the contributions of Black women in the United States of America; views of Black women from African backgrounds, the Atlantic slave trade, and the progressive rise of womanist/feminist liberation movements in Black culture; contributions of Black women in the U.S. and globally. (3H,3C)

### **2974: INDEPENDENT STUDY**

Variable credit course.

### **2984: SPECIAL STUDY**

Variable credit course.

### **3004: TOPICS IN FEMINISM**

A variable topics course that addresses how the social construction of gender shapes social, cultural, political, economic, and institutional structures as well as individual experiences and perceptions. The course stresses interdisciplinary approaches to topics of emerging interest in feminist scholarship. Can be taken up to three times for credit with varying topic. In addition to WS 1824, must have taken a 2000-level Women's Studies course, or have instructor's consent. Pre: 1824. (3H,3C)

### **3014 (REL 3014): WOMEN AND GENDER IN ISLAM**

An examination of women and gender in Islam from a variety of perspectives including Muslim women in Islam's history, normative constructions of the role of women in Islam, and women's role in contemporary Muslim societies. Understanding of women in classical Islam; feminist and reformist approaches; and Western constructions of the "rights of women in Islam." Pre: 2324. (3H,3C)

### **3214: GLOBAL FEMINISMS**

An introduction to the gendered analysis of global women's issues with a special focus on women of color. Examines the multiple and diverse sites of feminist struggle within the third world, and between first and third worlds both in the U.S. and internationally. Studies the impact on women of political movements such as nationalism, colonialism, revolution, authoritarianism and democracy. Compares theories originating with women of color in the U.S. with those from international third worlds. Pre: 2264. (3H,3C)

#### 3324 (STS 3324): PERSPECTIVES ON THE BIOLOGY OF WOMEN

Examines historical, social, and cultural views of women's biology and how those views have impacted women's physical and mental health. Special attention is paid to the influence of cultural traditions and beliefs on scientific perspectives. Pre: 1824. (3H,3C)

#### 3984: SPECIAL STUDY

Variable credit course.

#### 4214 (GEOG 4214) (UAP 4214): WOMEN, ENVIRONMENT AND DEVELOPMENT IN A GLOBAL PERSPECTIVE

Explores intersecting roles of gender, culture, and socio-economic status in people's use of nature, management of environmental resources, and experiences of environmental change. Examines debates on environmental and development initiatives, environmental ethics, and environmental social movements from feminist perspectives. Pre: UAP 3344 or UAP 3354. (3H,3C) II.

#### 4224: WOMEN'S STUDIES SEMINAR

This multi-disciplinary, multi-cultural course examines a significant topic in Women's Studies, utilizing the perspectives of history, biology, psychology, political science, sociology, and the arts. Variable topics. Pre: 1824, (2224). (3H,3C)

#### 4704 (STS 4704): GENDER AND SCIENCE

Investigates the gender dimensions of science in both historical and contemporary perspectives. Discusses feminist studies of science, exploring strengths and limitations. Assesses implications of cultural assumptions about gender for practicing scientists. A 3000 level course in science or engineering may satisfy prerequisite. Pre: 2244 or HST 1504. (3H,3C)

#### 4754: INTERNSHIP

Qualified students will be placed with a community agency or on-campus office which addresses contemporary issues of gender, class, and/or race, and will meet periodically with an appropriate faculty member to discuss assigned readings that will provide a context for the work experience. Students will also be expected to keep a journal and to write up a final evaluation of the experience. Variable credit: may be taken for up to 6 elective credits in the Women's Studies concentration. Junior standing, screening interviews with Tech faculty and with the service agency and consent required. Variable credit course. Pre: 1824.

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

- [Undergraduate Courses:](#)  
[CINE](#), [FA](#), [TA](#)

Overview

The curriculum in Theatre and Cinema is designed to provide the student with the essential approaches necessary to develop an informed understanding of Theatre and Cinema literature and its practice. As such, the three basic aspects of the disciplines (the theoretical, the historical, and the practical) are emphasized.

A program in theatre arts leading to the B.A. is offered. In addition to fulfilling the core curriculum requirements of the College of Liberal Arts and Human Sciences and the Curriculum for Liberal Education, general majors must complete a minimum of 43 hours in theatre arts. Students who choose a degree option in Performance, Design, or Cinema, must complete a minimum of 52 hours.

A minor course of study in theatre arts may be chosen with the guidance of the student's advisor.

Limited scholarship support is available.

Satisfactory Progress

Satisfactory progress toward the B.A. in theatre arts requires that:

1. Upon having attempted 72 semester credits (including transfer, advanced placement, advanced standing, credit by examination, course withdrawal), students must have a minimum in-major GPA of 2.0 and must have completed:

TA 2034: Ways of Seeing or TA 2114: Script Analysis plus	3
TA 2104: Fundamentals of Theatre and Production	3
TA 2054: Intro to Cinema	3
TA 2134: Acting Lab	3
TA 2135: Design Lab	3
TA XXXX: Other TA requirement or elective	3
Credits	(18)

Undergraduate Courses (CINE)

2034: WAYS OF SEEING  
Introduction to the theory and practice of visual and time-based art and aesthetics, media, literacy and creativity. (4H,3C)

#### 2054: INTRODUCTION TO CINEMA

Introduction to cinema as a medium for artistic communication. (2H,3L,3C)

#### 3005,3006: DIGITAL CINEMA PRODUCTION

Basic production techniques, aesthetics, and technology of cinema production. Pre: (2034 or TA 2034), (CINE 2054 or COMM 2054 or TA 2054) for 3005; (2034 or TA 2034), (CINE 2054 or TA 2054 or COMM 2054) for 3006. (4H,3C)

#### 3184: CINEMA PRODUCTION TOPICS

Rotating topics in cinema production. Designed for majors in the Department of Theatre and Cinema who have foundational training in areas of cinema production. May be repeated for credit with different course content up to a maximum of nine credit hours. (Variable credit) Variable credit course. Pre: TA 3006 or CINE 3006.

#### 3514: AMERICAN CINEMA GENRES

Close visual and cultural study of classic film genres with emphasis on cinematic styles and narrative conventions which unify the genre and which are found in representative films; exploration of genre films as symbols of American culture and society. Specific thematic content is variable. Course may be repeated with different course content for up to 9 credits. Pre: TA 2054 or CINE 2054. (3H,3C)

#### 3524: THE CINEMA DIRECTOR

Close thematic and visual analysis of the films of prominent cinema directors; emphasis on cinematic structure and development and evolution of their work. Specific thematic content is variable. Course may be repeated with different course content for up to 9 credits. Pre: TA 2054 or CINE 2054. (3H,3C)

#### 3544 (ENGL 3544): LITERATURE AND CINEMA

Works of literature and the films into which they have been transformed; emphasis on differences between media. (3H,3C)

#### 4084 (COMM 4084): CINEMA HISTORY

Aesthetic, economic, social and technological history of world cinema; film theory as it relates to the history of cinema. Junior standing required. Variable credit course. Pre: TA 2054 or CINE 2054 or COMM 2054.

#### 4144: CINEMA STUDIES TOPICS

This course examines critical issues in the study of cinema, including issues of aesthetic and stylistic design, social and cultural context, historical development, and economic, industrial and technological factors in influencing the medium. Specific thematic content is variable. Course may be repeated with different course content for up to 9 credits. Pre: TA 2054 or CINE 2054. (3H,3C)

### Undergraduate Courses (FA)

#### 2004: CREATIVITY & AESTHETIC EXPERIENCE

Guided exposure to participation in various experiences in the visual and performing arts; interaction with both historians/critics and practitioners prior to and after such experiences; examination of the many processes through which the visual and performing arts are created and communicated and how these arts illuminate and help to explain human experience. May not be repeated for credit. Pass/Fail only. (1H,1C) I,II.

### Undergraduate Courses (TA)

#### 1004: THEATRE & CINEMA FIRST YR EX

Orientation course for theatre and cinema major to the department's philosophy and resources, including how to generate, receive, and respond to critique of academic and artistic work; cultivate a common intellectual, analytical, and creative conversation amongst first year students; enhance student participation in the creative and scholarly life of the department; foster a sense of community. (1H,1L,1C)

#### 2014: INTRODUCTION TO THEATRE

Appreciation and understanding of theatre through historical perspectives, comparison with other art forms, and primary acquaintance with practice and techniques of script interpretation, producing, directing, acting, and all aspects of design. (3H,3C) I,II,III,IV.

#### 2024: INTRODUCTION TO ACTING

The course is designed to lead the non major to an awareness and appreciation of acting, both as a participant (actor) and as an observer (audience). Emphasis is placed on improvisation, ensemble, and scene work. (3H,3C) I,II,III,IV.

#### 2034: WAYS OF SEEING

Introduction to the theory and practice of visual and time-based art and aesthetics, media, literacy and creativity. (4H,3C)

#### 2054: INTRODUCTION TO CINEMA

Introduction to cinema as a medium for artistic communication. (2H,3L,3C)

#### 2104: FUNDAMENTALS OF THEATRE AND PRODUCTION

Introduction to theatre vocabulary and understanding of the theatrical process, theatre aesthetics, theatrical modes of expression, basic script analysis, production analysis, theory and practice of collaboration, theatre organizations, history and operations of professional theatres. (T & C majors and minors only). (3H,3C)

#### 2114: SCRIPT ANALYSIS

Understanding of drama as an element of theatre with focus on the process of script analysis for theatrical production. (3H,3C) I,II.

**2134: ACTING LAB**

An introduction to the process of acting, through a variety of laboratory experiences, beginning with basic performance skills and culminating in the performance experience. Emphasis is on improvisation, terminology, physical action, script analysis, characterization, and rehearsal and performance techniques. Limited to Theatre & Cinema Majors. (6L,3C)

**2135,2136: THEATRE DESIGN LAB**

An introduction to the processes, technologies, and aesthetics of the visual design of theatrical productions. 2135: Scenography, costume, and stage lighting design are explored in history and contemporary theatre practice. 2136: A range of design problems will offer opportunity to learn various design approaches and provide practice with different media and means of design expression. (6L,3C) I,II.

**2144: FOUNDATIONS OF MOVEMENT AND VOICE**

An introduction to the process of acting, through a variety of laboratory experiences, beginning with basic performance skills and culminating in the performance experience. Emphasis is on various methods of performance style and analysis, theater movement and body conditioning, and vocal awareness and production. Limited to Theatre and Cinema Majors. Pre: 2134. (6L,3C)

**2204: CREATIVE DANCE**

Study of the expressive elements of movement and dance and practice designing learning experiences for K-12 students. (3H,3C)

**2224: INTERMEDIATE PERFORMANCE INTENSIVE**

This course provides the Theatre & Cinema major, who desires a rigorous exploration of acting, a forum for application of the techniques and skills learned. These skills will be strengthened and applied through observation of and participation in scene and monologue work. Focus will be placed on basic skills and concepts necessary to creative, truthful, and believable performance of selected scenes, including use of voice and body, imagination, relaxation, sense and emotion memory, and script analysis. Limited to Theatre & Cinema Majors. Pre: (2134 or 2024), 2144. (3H,3C)

**2414: STAGE AND LIGHTING TECHNOLOGY**

A practical study of the technologies and specialized equipment employed in the construction, rigging and running of theatrical production; the planning and organization involved in mounting these productions; the tools, materials and techniques used to realize theatrical design and build scenery; and the fundamentals of stage lighting. (3H,3C)

**2444: STAGE MAKEUP**

Basic application of stage makeup with emphasis on corrective, modeling, and three-dimensional techniques. Taught alternate years. I (1H,6L,3C)

**2604: INTRODUCTION TO ARTS MARKETING**

An introduction to the theories and practice of marketing and building community engagement as applied to arts activities and professional not-for-profit arts organizations, through a survey of standard marketing approaches, examination of current practices in the field, and direct hands-on experience. (3H,3C)

**2964: FIELD STUDY**

Variable credit course.

**2974: INDEPENDENT STUDY**

Variable credit course.

**2974H: INDEPENDENT STUDY**

Variable credit course.

**2984: SPECIAL STUDY**

Variable credit course.

**3005,3006: DIGITAL CINEMA PRODUCTION**

Basic production techniques, aesthetics, and technology of cinema production. Pre: 2034, (2054 or COMM 2054). (4H,3C)

**3014: THEATRE PRODUCTION LAB**

Production experiences in the areas of performance, design and theatre technology, management, and writing. May be repeated for a maximum of nine credits. Instructor consent required. Variable credit course. X-grade allowed. I,II,III,IV.

**3104: JAPANESE THEATRE**

Survey of the historical background and distinguishing characteristics of traditional Japanese theatre with special focus on production techniques of Noh, Kabuki, and the Doll Theatre. Taught alternate years. (3H,3C) II.

**3105,3106: HISTORY OF DRAMA AND THEATRE**

History of drama and theatre from primitive ritual to the present day and its relationship to the social, economic, and political forces from age to age. 3105: primitive, Greek, Roman, Medieval, Renaissance, and Asian. 3106: Restoration, eighteenth, nineteenth, and twentieth centuries. Junior standing required. Pre: 2114. (3H,3C) I,II.

**3114: SCENOGRAPHY TOPICS**

Rotating topics in scenography and related specific design applications. Designed for theatre arts majors who have foundational training in areas of theatre design. May be repeated for credit. (Variable credit) Variable credit course. Pre: 2136.

**3124: COSTUME DESIGN AND TECHNOLOGY TOPICS**

Rotating topics of costume design and costume technology. Designed for advanced theatre arts majors who have foundational training in all areas of theatre design. May be repeated for credit. (Variable credit) Variable credit course. Pre: 2136.

#### 3134: LIGHTING TOPICS

Rotating topics in lighting design and technology. Designed for advanced theatre arts majors who have foundational training in all areas of theatre arts. May be repeated for credit. (Variable credit) Variable credit course. Pre: 2136, 2414.

#### 3144: THEATRE DESIGN TOPICS

Rotating topics in design and theatre technology. Designed for advanced theatre arts majors who have foundational training in all areas of theatre technology and design. May be repeated for unlimited number of credit hours. (Variable credit) Variable credit course. Pre: 2414, 2136.

#### 3154: ACTING TOPICS

Rotating topics in performance skills and theories. Designed For advanced theatre arts majors who have foundational training in acting, voice and movement. May be repeated for credit. (Variable credit) Variable credit course. Pre: 2224, 2144.

#### 3164: VOICE AND SPEECH TOPICS

Rotating topics in voice and speech skills, and theories and practice in performance. Designed for advanced theatre arts majors who have foundational training in acting, voice and movement. May be repeated for credit. (Variable credit) Variable credit course. Pre: 2224, 2144.

#### 3174: MOVEMENT TOPICS

Rotating topics in theatre movement, dance for the theatre and theories of physical expression in the performing arts. Designed for advanced theatre arts majors who have foundational training in acting voice and movement. May be repeated for credit. (Variable credit) Variable credit course. Pre: 2144, 2444.

#### 3184: CINEMA PRODUCTION TOPICS

Rotating topics in cinema production. Designed for majors in the Department of Theatre and Cinema who have foundational training in areas of cinema production. May be repeated for credit with different course content up to a maximum of nine credit hours. (Variable credit) Variable credit course. Pre: 3006.

#### 3315-3316 (ENGL 3315-3316): PLAYWRITING

A workshop course in the craft and art of playwriting which emphasizes the development of craft and the nurturing of vision and art. 3315: primary focus is on the writing of original scripts with additional attention paid to the work of influential playwrights and critics. 3316: primary focus is on the creative process of developing a play with the collaborative influences of a director, actors, designers, and other theatre professionals. Consent of instructor required. Pre: ENGL 1106 or ENGL 1204H or COMM 1016 for 3315; 3315 for 3316. (3H,3C)

#### 3514: AMERICAN CINEMA GENRES

Close visual and cultural study of classic film genres with emphasis on cinematic styles and narrative conventions which unify the genre and which are found in representative films; exploration of genre films as symbols of American culture and society. Specific thematic content is variable. Course may be repeated with different course content for up to 9 credits. Pre: 2054. (3H,3C)

#### 3524: THE CINEMA DIRECTOR

Close thematic and visual analysis of the films of prominent cinema directors; emphasis on cinematic structure and development and evolution of their work. Specific thematic content is variable. Course may be repeated with different course content for up to 9 credits. Pre: 2054. (3H,3C)

#### 3544 (ENGL 3544): LITERATURE AND CINEMA

Works of literature and the films into which they have been transformed; emphasis on differences between media. (3H,3C)

#### 3604: ARTS MANAGEMENT

The development of the not-for-profit arts organization, structures and characteristics of boards of directors, artistic missions and goals, funding, volunteer support, and fiscal control. Junior standing required. Taught alternate years. (3H,3C) II.

#### 3624: STAGE MANAGEMENT

The systems, procedures, forms, and duties of the stage manager in the professional, academic, and community theatre are explored in relationship to the production process and other theatre artists. Taught alternate years. Pre: 2104. (3H,3C) II.

#### 3954: STUDY ABROAD

Variable credit course.

#### 4014: CONTEMPORARY THEATRE SEMINAR

Issues and concerns in contemporary theatre; production philosophies and approaches, employment opportunities, career options, and preparation of portfolio and resume materials. Junior standing required. (3H,3C) II.

#### 4084: CINEMA HISTORY

Aesthetic, economic, social and technological history of world cinema; film theory as it relates to the history of cinema. Junior standing required. Variable credit course. Pre: 2054 or COMM 2054.

#### 4144: CINEMA STUDIES TOPICS

This course examines critical issues in the study of cinema, including issues of aesthetic and stylistic design, social and cultural context, historical development, and economic, industrial and technological factors influencing the medium. Specific thematic content is variable. Course may be repeated with different course content for up to 9 credits. Pre: 2054. (3H,3C)

#### 4294 (COMM 4294): WRITE/DIRECT DIGITAL CINEMA

Advanced course in digital cinema production exploring the practice of writing, producing, and directing dramatic motion pictures. Variable credit course.

#### 4304: THEATRE OUTREACH

Participation in theatre projects or activities that focus on community and social issues. May be repeated for a maximum of six credits. Junior standing and instructor consent required. Variable credit course. I,II.

#### 4315-4316: DIRECTING

Script analysis, theories, techniques, and practical applications of theatrical direction. 4315: Theories and aesthetics of directing, functions of the director, script analysis, basic principles and techniques of staging. 4316: Rehearsal techniques, style determination realism, and non-realism. Senior standing required. (3H,3C) I,II.

#### 4704: PROFESSIONAL THEATRE INTERNSHIP

Internship of one semester in acting, directing, management, design, or technical theatre or cinema with a professional equity company for selected advanced students; classroom, workshop, and production experiences. Minimum 9 credits, maximum 15 credits. Audition and consent. Variable credit course. I,II,III,IV.

#### 4964: FIELD STUDY

Pass/Fail only. Variable credit course.

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4974H: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

#### 4994H: UNDERGRADUATE RESEARCH

Variable credit course.

## Overview

The College of Natural Resources and Environment, through offerings in the Departments of Fish and Wildlife Conservation, Forest Resources and Environmental Conservation, Geography, and Sustainable Biomaterials, provides an integrated education in renewable natural resource management, conservation, and utilization as well as a valuable perspective for understanding and solving critical contemporary environmental problems at local, regional, and global scales.

All undergraduate programs of the College of Natural Resources and Environment are designed to provide a professional education that starts with core courses emphasizing physical, biological, and social sciences, along with concepts of renewable natural resource management. More advanced courses teach the principles and practices of individual disciplines, along with advanced skills in communications and computer use. Students prepare for professional careers with public agencies responsible for managing forest, water, wildlife, fish, and recreation resources; with private firms concerned with producing, manufacturing, and marketing wood products; with planning agencies and private firms utilizing skills in environmental and land-use analysis and geospatial techniques; or for graduate studies.

Students develop a specialization. These majors with options are described below and are administered by departments:

### Department of Fish and Wildlife Conservation

- Fisheries Science
- Wildlife Science

### Department of Forest Resources and Environmental Conservation

- Environmental Resources Management
  - Environmental Resource Management option
  - Watershed Management option
- Forestry
  - Forest Resource Management option
  - Industrial Forestry Operations option
  - Urban Forestry option
- Natural Resources Conservation
  - Conservation and Recreation Management option
  - Environmental Education (K-6) option
  - Natural Resources Science Education (6-12) option

### Department of Geography

- Geography
  - Culture, Regions and International Development option
  - Geospatial and Environmental Analysis option
- Meteorology

### Department of Wood Science and Forest Products

- Wood Science and Forest Products
  - Forest Products Business option
  - Packaging Science option
  - Residential Wood Structures option
  - Wood Materials Science option

The college offers minors in Forestry, Urban Forestry, Natural Resource Recreation, Geography, Wood Science and Packaging Science. Contact the respective departments for more information on minors.

## Accreditation

The educational programs in Forest Resource Management, Forest Operations and Business, and Urban Forestry qualify graduates as professional foresters and are accredited by the Society of American Foresters, the recognized accrediting body. Graduates in fisheries and wildlife sciences meet certification requirements of the American Fisheries Society and The Wildlife Society, respectively. The Wood Materials Science, the Forest Products Business, Packaging Science and Residential Wood Structures programs are accredited by the Society of Wood Science and Technology, the recognized accrediting body.

## The Honors Program

The University Honors Program is available to students in the College of Natural Resources and Environment. The program provides enriched opportunities for highly qualified and motivated undergraduate students. Faculty advisors can provide additional information.

## Cooperative Education

The college encourages students to become involved in the Cooperative Education Program, in which students alternate on-campus academic terms with off-campus employment in their areas of interest. Additional information is provided in "[Academics](#)."

## Exchange Programs

The College of Natural Resources and Environment participates in reciprocal exchange programs with the University of Melbourne in Australia, the University of Canterbury in Christchurch, New Zealand, and the University of Stellenbosch, Republic of South Africa. Where appropriate, students can also participate in the International Student Exchange Program.

## Graduate Programs

The college offers educational programs leading to the M.S., M.F., and Ph.D. Complete information on these programs is in the Graduate Catalog.

## Undergraduate Course Descriptions (NR)

### 1114: INTRODUCTION TO RENEWABLE NATURAL RESOURCES

Introduction to careers in forestry, wildlife, fisheries, recreation, and forest products professional fields. Discussion of current global and regional problems affecting natural resource professionals. (1H,3L,2C) I.

### 1115,1116: SEEKING SUSTAINABILITY

Definition, conditions, and solutions to sustainability. History, current conditions, and trends of sustainability from ecological, economic and social perspectives. (2H,2C)

### 2974: INDEPENDENT STUDY

Variable credit course.

### 2984: SPECIAL STUDY

Variable credit course.

### 3954: STUDY ABROAD

Variable credit course.

3964: FIELD STUDY  
Variable credit course.

4014 (FOR 4014): NATURAL RESOURCES ECONOMICS

Examination of domestic and international natural resource use, exploitation, and degradation problems, with special focus on use of economics to understand why potential overuse of natural resources exists, and what policy options are available to correct these problems and ensure sustainable natural resource use over time. Water, forests, fisheries, land and exhaustible resources. Permission of instructor may be substituted for the pre-requisite. Pre: ECON 2005 or AAEC 1005. (3H,3C)

4105-4106: LEADERSHIP IN NATURAL RESOURCES

Preparation for leadership roles in the natural resource professions. Introduction to theories of leadership; characteristics of effective leaders; leading and working in interdisciplinary teams. Techniques of meeting facilitation; written and oral communication skills in a leadership context. Effects of preferred modes of interacting with others, perceiving information, making decisions, and approaching tasks on the ability to lead and work with others. Consent of instructor. Pre: FIW 2114 or FOR 2314 or GEOG 3104 or SBIO 2124 for 4105; 4105 for 4106. (3H,3C)

4404 (ALS 4404) (GEOG 4404) (UAP 4404): APPROACHES TO INTERNATIONAL DEVELOPMENT

An introduction to issues relating to international development. The course will focus on areas to help students better understand the interdependencies between countries and how institutions and organizations can foster effective working relationships on global projects of mutual interest between countries. (1H,1C) I.

4444: PRACTICING SUSTAINABILITY

Practicum in sustainability. Synthesize and integrate knowledge from undergraduate career and apply to real world problems of sustainability. Topics and projects selected from opportunities to examine specific local and regional sustainability issues on the VT campus, in the New River Valley and the Commonwealth at large. Pre-requisite: Senior Standing required. (3H,3C)

4614 (ALS 4614): WATERSHED ASSESSMENT, MANAGEMENT, AND POLICY

Multidisciplinary perspectives of assessment, management, and policy issues for protecting and improving watershed ecosystems. Topics include: monitoring and modeling approaches for assessment, risk-based watershed assessment, geographic information systems for watershed analysis, decision support systems and computerized decision tools for watershed management, policy alternatives for watershed protection, urban watersheds, and current issues in watershed management. Pre: Two 4000 level courses in environmental/natural resource science, management, engineering, and/or policy in BSE, CEE, FOR, GEOL, LAR, CSES, ENT, BIO, GEOG, AAEC, UAP or equivalent. (2H,2C)

4964: FIELD STUDY  
Variable credit course.

4974: INDEPENDENT STUDY  
Variable credit course.

4984: SPECIAL STUDY  
Variable credit course.

4994: UNDERGRADUATE RESEARCH  
Variable credit course.

### **Eric Hallerman, Head**

**Professors:** P. L. Angermeier; J. D. Fraser; C. A. Haas; E. M. Hallerman; B.R. Murphy; D. J. Orth; D. F. Stauffer; M.R. Vaughan

**Associate Professors:** K. A. Alexander; C. A. Dolloff; J. M. Ford; W. Hopkins; Y. Jiao; S. Karpanty; S. McMullin; J. A. Parkhurst; M. J. Kelly

**Assistant Professors:** E. Frimpong; J. W. Jones; A. L. Rypel

**Adjunct Professors:** B. Czech; P. Grobler; M. Joos Vandewalle; D. Hawley; T. J. Newcomb; E. Smith; M. Schwarz; J. Walters; Y. Palti

**Career Advisors:** *Fisheries Undergraduate*, B. R. Murphy (231-6959); *Wildlife Undergraduate*, C. Haas (231-9269) *Graduate*, S. McMullin (231-8847).

## Fisheries Science

The Fisheries Science program is for students interested in research and management of aquatic animals and ecosystems, including wild fish and shellfish, endangered species, and hatchery-raised fish. Most graduates work for state or federal fisheries agencies, environmental consulting firms, or public utilities. Because the more challenging and rewarding jobs require a master's degree, the program emphasizes preparation for graduate study.

## Wildlife Science

The Wildlife Science program is for students interested in research and management of terrestrial animals and ecosystems, including game birds and mammals, non-game animals, and endangered species. Most graduates work for state or federal wildlife agencies, environmental consulting firms, or private land management companies. Because the more challenging and rewarding jobs require a master's degree, the program emphasizes preparation for graduate study.

---

## Undergraduate Courses (FIW)

### 2114: PRINCIPLES OF FISHERIES AND WILDLIFE MANAGEMENT

Basic principles guiding the management of fish and terrestrial animals in wild habitats. Management of organisms, habitats, and human users examined in terms of biological, chemical/physical, ecological, and sociological theories and practices. Worldwide illustration from both recreational and commercial resources. I Pre: BIOL 1006 or BIOL 1106. (3H,3C)

### 2314: WILDLIFE BIOLOGY

Summary of biological characteristics of wild birds and mammals, especially relating to management by humans. Physiological, functional, structural, and behavioral adaptations of individuals to their environments and foods. Pre: (BIOL 2504 or BIOL 2704), FIW 2114. (3H,3C) II.

### 2324: WILDLIFE FIELD BIOLOGY

Systematics, identification, and natural history of common native vertebrates and plants. Exposure to habitats/ecosystems of western Virginia. Observation, collection, and reporting of field data. Self-scheduled field and media lab activities required. Pre: BIOL 1106. (1H,6L,3C) II.

### 2974: INDEPENDENT STUDY

Variable credit course.

**2984: SPECIAL STUDY**

Variable credit course.

**3414: DISEASE ECOLOGY & ECOSYSTEM MGT**

Principles of disease ecology with practical application of concepts using both human and wildlife disease examples. Importance of emerging infectious disease in conservation planning, public health and wildlife management. Pre: BIOL 1105, BIOL 1106. (3H,3C)

**3514: FISHERIES TECHNIQUES**

Application of field and laboratory methods in fisheries management and research. Experience with fisheries equipment and techniques. I Pre: 2114. (1H,6L,3C)

**3954: STUDY ABROAD**

Variable credit course.

**3964: INTERNSHIP THROUGH DIRECTED FIELD STUDY**

Variable credit course.

**4214: WILDLIFE FIELD TECHNIQUES**

Field research methods for wild vertebrates in terrestrial environments. Application of research methodology including animal capture and marking, determination of sex, age, and condition, radio telemetry and map/compass/GPS orienteering, non-invasive methods of capture, habitat selection, and supervised group research projects. Pre: 4414, STAT 3615. (2H,3L,3C) II.

**4314: CONSERVATION OF BIOLOGICAL DIVERSITY**

Principles and practices of conserving biological diversity. Causes, consequences and rates of extinction. Application of philosophical, biological, sociological and legal principles to the conservation of genes, plant and animal species and ecosystems. I Pre: 4414, 4434. (3H,3L,4C)

**4324 (FOR 4324): GENETICS OF NATURAL AND MANGAGED POPULATIONS**

Introductory genetics with an emphasis on evolutionary processes relevant to natural and managed populations of both plant and animal species. Traditional and modern genetics, including quantitative and population genetics, molecular evolution, genomics, and biotechnology. Pre: BIOL 1105, BIOL 1106, (STAT 3005 or STAT 3615 or FOR 3214). (3H,3C)

**4414: POPULATION DYNAMICS AND ESTIMATION**

Population growth, structure, and regulation of fish and wildlife populations including harvested populations, non-harvested populations, and small or declining populations. Methods of estimating demographic parameters such as population size, survival, and recruitment. Population viability analysis and genetic considerations in population dynamics. Pre: 2324. (3H,3C) II.

**4424: ICHTHYOLOGY**

Morphology and physiology, systematics, zoogeography, and identification of fishes. Pre: BIOL 2504 or BIOL 2704. (2H,6L,4C) II.

**4434: WILDLIFE HABITAT ECOLOGY AND MANAGEMENT**

Relationship of wildlife species to their habitats. Factors influencing distribution and abundance of wildlife populations. Vegetation succession and structure, habitat classification, modeling wildlife habitat relationships and management of habitats in forests, agricultural lands, rangelands, riparian/wetland and urban areas. Pre: 2114, FOR 3364. (3H,3C) II.

**4444: ROLE OF SCIENCE IN NATURAL RESOURCE MANAGEMENT**

Alternative views of the role of the individual scientist within resource management. Synthesis and application of previous fish and wildlife coursework applied to complexities associated with real world issues. Case studies from fisheries management, wildlife management, and conservation biology. Defining students' individual career goals. Pre: 4414. (3H,3C)

**4454: VERTEBRATE PEST MANAGEMENT**

Management of vertebrate pest species. Causes and prevention of damage by vertebrate pest species to: food and fiber plants, animal production, structures, human transportation systems, and health of humans and domestic animals. Senior standing required. (3H,3C) II.

**4464: HUMAN DIMENSIONS OF FISHERIES AND WILDLIFE**

Values, attitudes, and opinions of people toward fish and wildlife. Social, economic, legal, and political aspects of fisheries and wildlife management. Roles of professionals and the public in fish and wildlife policy processes. Contemporary fish and wildlife policy issues. Senior standing required. I Pre: 2114. (3H,3C)

**4474: WILDLIFE HABITAT EVALUATION**

Application of methods for habitat evaluation through a group project to develop a habitat management plan. Students apply methods used to quantify habitat quality and assess impacts of various management actions. Emphasis is on Habitat Suitability Index models and the Habitat Evaluation Procedures approach of the US Fish and Wildlife Service. Pre: 4214, FOR 3365, STAT 3005. Co: 4434. (3L,1C)

**4484 (BIOL 4484) (ENT 4484): FRESHWATER BIOMONITORING**

Concepts and practices of using macroinvertebrates and fish to monitor the environmental health of freshwater ecosystems. Effects of different types of pollution and environmental stress on assemblages of organisms and underlying ecological principles. Role of biological studies in environmental regulation. Study design, field and laboratory methods, data analysis and interpretation, verbal and written presentation of results. Pre: (BIOL 2804), (BIOL 4354 or BIOL 4004 or ENT 4354 or FIW 4424 or FIW 4614). (3H,3L,4C)

**4514: PRINCIPLES OF AQUACULTURE**

Requirements of aquatic organisms in captivity. Husbandry of fish and invertebrates, including nutrition, water quality, and disease control. Design of

fish rearing facilities. Two day-long field trips required. Pre: 2114. (2H,3L,3C) II.

#### 4524: GENETICS FOR AQUACULTURISTS

Genetics of sex determination, qualitative and quantitative traits in aquatic organisms. Selective breeding and biotechnology-based methods of genetic improvement. Case studies. Pre: BIOL 2004, FIW 4514. (3H,3C) I.

#### 4534: ECOLOGY AND MANAGEMENT OF WETLAND SYSTEMS

Introduction to the variety of wetland systems found in North America, though emphasis will focus on eastern and mid-Atlantic wetland systems. Origin and processes of formation of wetlands, functions and values of wetlands, wetland delineation, wetland classification, regulatory processes affecting wetlands. Objectives of and management techniques used to protect and/or manipulate wetland systems for wildlife and other human needs. Enrollment restricted to junior, seniors and graduate students. Pre: BIOL 3204. (2H,3L,3C)

#### 4614: FISH ECOLOGY

Interactions of fish with the physical and biological environment. Adaptations of organisms, populations, and communities. Impacts of human activities on major aquatic ecosystems and important fishes. Ecological principles for management of important sport, commercial, and prey fishes. Pre: BIOL 1006. (3H,3C) II.

#### 4624: MARINE ECOLOGY

Marine organism, biological, ecological, chemical and physical processes of marine ecosystems in open sea, coastal and benthic environments, research methods and models in marine ecosystem simulation; fisheries in a dynamic ecosystem: human interference and conservation. Pre: BIOL 2804 or BIOL 2804 or GEOS 3034 or GEOS 3034. (3H,3C)

#### 4714: FISHERIES MANAGEMENT

History, theory, and practice of fisheries management. Emphasis on basic strategies used in effective management and setting management objectives. Synthesis of fish population dynamics and manipulation, habitat improvement, and human management to achieve objectives. Case studies of major fisheries. Pre: 3514. (3H,3L,4C) II.

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

## Forest Resource Management

The Forest Resource Management option emphasizes the biology, policy, and management skills needed to ensure the sustainability of the many renewable forest resources on which society depends. Graduates manage the forested landscape to provide society a renewable supply of wood and paper products along with clean water, recreation opportunity, wildlife habitat, and environmental quality.

## Forest Operations and Business

Forest Operations and Business graduates are well prepared for careers in private industry emphasizing harvesting and reforestation operations. Forest Operations and Business specializes beyond the Forest Resource Management option by emphasizing the operations side of forestry along with landowner assistance and management skills for people and business.

## Environmental Resource Management

The Environmental Resource Management option develops professionals who tackle a variety of environmental issues in the forested landscape. The foundation of this area of study is sustainability with additional emphasis placed on water resources, forest soils, environmental policy, and wildlife management.

## Urban Forestry

The Urban Forestry option produces graduates who can deal with the ecological and biological characteristics of the forest in an urban environment, as well as the managerial and political context within which forest management takes place. Special education, training, and experience are necessary to address the many and complex biological, social, economic, and political issues that are part of the urban forest setting.

## Conservation and Recreation Management

Conservation and Recreation Management blends natural sciences, resource management, and social sciences disciplines and topics. Graduates provide high quality recreation experiences to ever increasing numbers of recreationists while protecting the natural environment on which these experiences depend. Emphasis is on the human dimensions of natural resource management.

## **Environmental Education (K-6) and Natural Resources Science Education (6-12)**

Environmental Education prepares students to teach in elementary schools, while Natural Resources Science Education prepares students to teach Earth Science, Life Science or Agricultural Education at middle and high schools. Both options are intended as feeders into the Masters in Education at Virginia Tech, which provides necessary licensure. With proper planning, the Masters degree can be completed in one year.

## **Watershed Management**

Watershed Management option will qualify students for hydrology positions with the USDA and the USGS.

---

## **Undergraduate Courses (FOR)**

### **2114: ECOLOGY OF APPALACHIAN FORESTS**

Introduction to the natural history, tree biology, tree identification, forest ecology, management and forest types of the Appalachian region. Contemporary issues related to forest functions will be discussed including carbon storage, global warming, invasive forest species, wildlife management, fire, biofuels, agroforestry, urban forests, ecosystem restoration, clean water, recreation, and use of renewable resources. (3H,3C)

### **2124: FOREST, SOCIETY & CLIMATE**

Role of forest ecosystems on the global carbon cycle, climate, biodiversity and economies. Anthropogenic impacts on forest ecosystems and their ecological function in the face of changing climate. Climate-related threats to global forests, including loss of biodiversity, deforestation, forest fires, and invasive species. Sustainable forest management for anticipated future scenarios. (3H,3C)

### **2134 (HORT 2134): PLANTS & GRNSP IN URB COMMUNIT**

Modern concepts of sustainability changing plant use in urban settings. Fundamentals of urban horticulture and urban ecosystems. Philosophy of sustainability, urban forestry, urban wildlife, sustainable and community-supported agriculture, and innovations merging plant and ecosystem functions with building and site engineering. Multi-disciplinary emphasis in individual, community, regional, and global scales. (3H,3C)

### **2214: INTRODUCTION TO LAND AND FIELD MEASUREMENTS**

Measurement of land and field attributes including geographic position, land distance, direction, area, slope, elevation and boundary attributes. Use and development of maps used in natural resource applications. Use of global positioning systems and geographic information systems in the acquisition and management of land and field measurements. Assessment of vegetation attributes with field plots. Use of computer software to manage and analyze data and present results. Pre: MATH 1016. Co: 2324. (2H,3L,3C)

### **2254: ARBORICULTURE FIELD SKILLS**

Field observation, discussion, and practice of skills employed in the management of urban landscape trees. Hands-on experience with tree pruning, removal, pest control, fertilization, cabling/bracing, lightning protection, and climbing. Emphasis on arborist safety, professional ethics, and best management practices. Guest instruction provided in part by professionals working in the tree care industry. Pass/Fail only. (3L,1C)

### **2314: FOREST BIOLOGY AND DENDROLOGY**

Introduction to the botany, physiology, genetics and silvics of important forest trees of North America. I Pre: BIOL 1006 or BIOL 1106. Co: 2324. (2H,2C)

### **2324: DENDROLOGY LABORATORY**

Field identification of trees of North America with particular emphasis on trees native to the Eastern United States. I (3L,1C)

### **2414: FIELD EXPERIENCE IN FOREST RESOURCES AND ENVIRONMENTAL CONSERVATION**

Field exercises to develop skills needed to sustainably manage forest and environmental resources including navigation and mapping, inventory of timber and non-timber resources, soil and water conservation, forest and recreation management, forest operations and timber harvesting. (6L,2C)

### **2514: WILDLAND FIRE: ECOLOGY AND MANAGEMENT**

Provide students with basic knowledge on how: fire has an impact on forest environments; the environment and weather influence fire behavior; wildland fires are suppressed; and fire is used as a land and vegetation management tool. The course will also provide students with the knowledge and training to qualify as a basic wildland firefighter (FFT2-Red Card). Extended laboratory sessions will provide practice in fire behavior prediction, prescribed burning techniques, and fire control methodology. Pre: BIOL 1105 or BIOL 1106, CHEM 1035. (2H,3L,3C)

### **2554 (LAR 2554): NATURE AND AMERICAN VALUES**

Introduces students to the evolving relationship between nature and American society; emphasizing the ethics and values which underlie forest, park, and wildlife management. Students are introduced to contemporary land use issues and learn to articulate, defend, and critique the ethical positions surrounding these issues (i.e., wilderness, sustainability, biodiversity, hunting, old growth, suburban sprawl, environmental activism). (3H,3C) I,II.

#### 2714: INTRODUCTION TO INDUSTRIAL FORESTRY OPERATIONS

The forest management operations carried out by the forest industry such as harvesting, site preparation, regeneration, silvicultural treatments, and stand maintenance. I (1H,1C)

#### 2784 (SBIO 2784): WORLD FORESTS AND FOREST PRODUCTS

A socio-economic approach to examining the management and use of the world's forests, enhance knowledge of global forest resources and products, and understand the roles and relationships of key stakeholders. Sophomore standing. (3H,3C)

#### 2974: INDEPENDENT STUDY

Variable credit course.

#### 2984: SPECIAL STUDY

Variable credit course.

#### 3214: FOREST BIOMETRICS

Statistical, mathematical and computer tools for collecting and analyzing data used to make inference or decisions in applications of forest ecosystem science and management. Principles and practices of forest inventory and probability-based sampling. Derivation of volume and weight equations for standing trees. Measures of stand density and site quality. Forest growth and yield modeling. Organization, summary and conveyance of information derived from the data-driven applications into visual, written, and spoken materials of presentation. Pre: 2214, MATH 2015. (3H,3C)

#### 3215-3216: FOREST MEASUREMENTS

Principles and practices of forest land and resource measurements. 3215: Measurement of distance and direction, size and content of felled and standing trees, elements of forest inventory, and sampling. 3216: Derivation of volume and weight equations for standing trees, equal and unequal probability sampling in timber inventory, site quality, stand density, forest growth, and yield modeling. Pre: 2214. (3H,3C) I,II.

#### 3224: FOREST MEASUREMENTS FIELD LABORATORY

Field practice and computer analysis for collecting and analyzing survey data for use in forest management. Forest inventory and probability-based sampling, stratified sampling, double sampling, regression, and census-based sampling applications. Computer and geospatial tools for analyzing field data. Field assessment of tree and log contents, stand density, and site index. Collection and analysis of growth and yield data. Pre: 2214, 2414. (3L,1C)

#### 3314: FOREST ECOLOGY AND SILVICS

Environmental factors affecting the establishment, growth, and development of forests; silvical characteristics of trees; forest community structure and function; forest ecosystem analysis. I Pre: 2314, (CSES 3114 or CSES 3134). (2H,4L,3C)

#### 3324: SILVICULTURE PRINCIPLES AND APPLICATIONS

Theory and practices involved in controlling forest establishment, composition, and growth are developed in a regional context. Formulation of silvicultural systems and the study of reproduction methods, site preparation, intermediate stand manipulations, and reforestation operations. Pre: 3314. (3H,4L,4C) II.

#### 3334: SILVICULTURE FIELD LAB

Practice and observation of various silvicultural procedures, including stand and site evaluation, intermediate cuttings, site preparation, vegetation control, harvesting, and regeneration. Co: 3324. (4L,1C) II.

3344: FOREST FIELD STUDIES Field observations and discussion of current forestry operations and practices. Junior standing required. A-F only. Pre: 2214. (3L,1C)

#### 3354 (HORT 3354): URBAN FORESTRY AND ARBORICULTURE

A study of the uses, biology, ecology and silviculture of trees and forested green space in urban and urban-rural interface environments. Planning, planting, establishment, growth and development of urban trees, site assessment, individual tree condition assessment, and tree maintenance; special emphasis on energy relationships, soil physical and chemical properties, soil stabilization, and insect and disease problems that are related to existing and planned trees and forested areas. Lab provided practical experience in arboriculture and tree care practices. Pre: (2314 or BIOL 2304 or HORT 2304), (FOR 2324 or HORT 3325 or HORT 3326). (2H,3L,3C)

#### 3364: FOREST ECOLOGY AND SUSTAINABILITY

Survey of the forest, its environment, and its management including forest community structure and function, properties and management of forest soils, and basic silviculture. Partially duplicates 3314. I Pre: 2324. (2H,4L,3C)

#### 3424: FOREST RESOURCE ECONOMICS

Application of economic principles to problems in forestry such as multiple use of forest lands, including wildlife, recreation, watershed, timber production and consumption. I Pre: ECON 2005 or AAEC 1005. (3H,3C)

#### 3434: FOREST MANAGEMENT FIELD LAB

Field instruction and practice in forest management techniques, including tract and boundary location; tract and timber valuation; delineation of forested wetlands; pre-harvest planning; and writing sustainable forest management plans using financial, biological, and operational considerations. Pre: 3216, 3324, 3424. (3L,1C)

#### 3524: ENVIRONMENTAL INTERPRETATION

Interpretation theory and techniques; program planning and evaluation; role of interpretation in enhancing visitor experiences and protecting park resources. Pre: 2554. (2H,3L,3C) II.

#### 3534: OUTDOOR RECREATION FIELD STUDIES

Field instruction and practice in measuring amount and type of recreational use, and resource impacts from recreational use. Field inspection and

review of federal, state, local, and private recreation areas and management in Virginia and elsewhere. Pre: 2554. Co: 3544. (1H,9L,4C) II.

#### 3544: OUTDOOR RECREATION MANAGEMENT

Outdoor recreation management objectives; land acquisition; use measurement; impact assessment; facility operation and maintenance; role of private sector. Pre: 2554. (3H,3C) II.

#### 3554 (FIW 3554): OUTDOOR RECREATION POLICY

Policy process for outdoor recreation, with emphasis on the federal level; major federal policies for outdoor recreation; role of the professional in the policy process; public involvement in planning and management; analysis of current policy issues. Pre: 2554. (3H,3C) II.

#### 3564: OUTDOOR RECREATION PLANNING

Techniques of planning for resource-based outdoor recreation, including: estimation of recreation demand; wildland recreation classification and resource inventory; methods of public involvement; social impact analysis; state comprehensive planning; site design; and values questions associated with these techniques. Pre: 2554. (3H,3C) II.

#### 3574: ENVIRONMENTAL EDUCATION SERVICE LEARNING

Introduction to key concepts in environmental education and teaching skills through lecture, discussion, service learning, and reflection. Training in internationally recognized environmental education curricula (e.g. Project Learning Tree, Project Wet), in class management and organization skills and in theory relevant to both teaching and learning. Students develop and conduct after school environmental education programs at local elementary schools (2H,3L,3C)

#### 3714: FOREST HARVESTING

Principles and application of forest harvesting. Terminology, phases, function, and the interrelationships of people, money, machines, and environment. I Pre: 2214. (2H,3L,3C)

#### 3724: FOREST BOUNDARIES AND ROADS

Application of basic land surveying and forest measurement techniques to the location, establishment, and maintenance of forest boundaries and roads. Consideration of stream crossings, best management practices, and costs. Pre: 2214. (2H,3L,3C)

#### 3734: TIMBER PROCUREMENT

Analysis of the U. S. forest industry raw material supply process with emphasis on the evolution and dynamics of timber procurement systems and strategies. Pre: 3215. (2H,2C) II.

#### 3954: STUDY ABROAD

Variable credit course.

#### 3964: INTERNSHIP THROUGH DIRECTED FIELD STUDY

Variable credit course.

#### 4014 (NR 4014): NATURAL RESOURCES ECONOMICS

Examination of domestic and international natural resource use, exploitation, and degradation problems, with special focus on use of economics to understand why potential overuse of natural resources exists, and what policy options are available to correct these problems and ensure sustainable natural resource use over time. Water, forests, fisheries, land and exhaustible resources. Permission of instructor may be substituted for the pre-requisite. Pre: ECON 2005 or AAEC 1005. (3H,3C)

#### 4114: INFORMATION TECHNOLOGIES FOR NATURAL RESOURCE MANAGEMENT

An introduction to computer information systems used in natural resources management. Course will introduce students to the theory and applications of database management systems (DBMS) and geographic information systems (GIS). Uses, challenges, and limitations of these technologies in natural resource management applications will be discussed. Students will receive extensive hand-on instruction in the use of current software packages for DBMS and GIS.

Pre: 2214 or GEOG 2314. (2H,3L,3C)

#### 4214: FOREST PHOTOGRAMMETRY AND SPATIAL DATA PROCESSING

Films, filters and camera photogeometry; scale; measurement estimation; image processing; flight planning and photo acquisition; geographic information systems; spatial data analysis techniques and applications. Senior standing required. I (2H,3L,3C)

#### 4324 (FIW 4324): GENETICS OF NATURAL AND MANAGED POPULATIONS

Introductory genetics with an emphasis on evolutionary processes relevant to natural and managed populations of both plant and animal species. Traditional and modern genetics, including quantitative and population genetics, molecular evolution, genomics, and biotechnology. Pre: BIOL 1105, BIOL 1106, (STAT 3005 or STAT 3615 or FOR 3214). (3H,3C)

#### 4334 (CSES 4334): PRINCIPLES AND PRACTICE OF AGROFORESTRY

Biological, social, economic, and technical aspects of agroforestry, training and technology transfer techniques, and application of forestry and agriculture principles. Roles of animals and fish, trees, and agricultural crops in agroforestry systems. Community involvement in planning and implementation of agroforestry projects. I (3H,3C)

#### 4354: FOREST SOILS AND HYDROLOGY

Principles of forest soils and hydrology and applications to forest management. Forest soil development, relationships of soil and hydrologic properties to tree growth, and the management of soil and soil water to enhance fiber production. I Pre: 3314. (2H,3L,3C)

#### 4364: ADVANCED SILVICULTURE AND FOREST VEGETATION MANAGEMENT

Advanced topics in silviculture with an emphasis on species silvical differences; forest vegetation management and control, herbicides used in

forestry, their chemistry, toxicology, application technology; environmental considerations; tree improvement, individual tree growth, and stand dynamics as affected by intermediate silvicultural operations; implications of atmospheric deposition. Pre: 3324. (3H,3C) II.

#### 4374: FORESTED WETLANDS

Classifications, jurisdictional delineation, and management options of forested wetlands. Relationship of hydrology, soils, and vegetation to ecosystem processes, societal values, and management with regard to environmental and legal considerations and best management practices. Emphasis is on forested wetlands in the southern U.S., but national and international wetlands are included. Pre: CSES 3114 or CSES 3134. (3H,3C) II.

#### 4424: FOREST RESOURCES ECON AND MGMT

Application of economics principles and tools to forest decision making from the individual tract to large private and public holdings. Private and public landowner financial incentives and decisions, forest amenities, non-timber forest products, risk, multiple use, management and ownership trends, and sustainability are examined. Pre: 3324 or 3364, or consent of instructor. Pre: 3324 or 3364. (3H,3C)

#### 4434: FOREST RESOURCE POLICY

Historical development of U.S. forest resource policy. Key issues in each of the major forest uses. Policy determination at the federal, state, and private levels. Policy conflict resolution. Senior standing required. Pre: 3424. (3H,3C) II.

#### 4444: INTEGRATED FOREST MANAGEMENT PRACTICUM

Student teams apply accumulated discipline-oriented knowledge and techniques to a real forest resource management problem. A practicum in forest resource management and planning, applying multiple use concepts to solve a forest management problem. Senior standing required. Must be Forestry major. (1H,8L,3C) II.

#### 4454: URBAN FOREST MANAGEMENT AND POLICY

Focuses on the planning, administration, financing and management of trees, forests and green space associated with urban areas and the urban/rural interface. It will include a study of the social needs and values of urban situations; urban tree/forest resource inventories; tree and vegetation ordinances; the development, financing, and management of tree maintenance programs; and community involvement, public relations, and urban forestry education programs. Senior standing. Pre: 3354. (2H,3L,3C) II.

#### 4474: THE CONSULTING FORESTRY BUSINESS

Objectives of private timberland owners and forest industry from the perspective of professional consultants. Organization of a successful consulting firm. Stresses service to landowners such as appraisal, marketing, taxation, economic analysis, and ethics. Co: 4424. (2H,3L,3C) II.

#### 4514: FOREST AND TREE PEST MANAGEMENT

Identification and ecology of biotic and abiotic influences on forest and landscape tree health. Developing a theoretical and practical understanding for diagnosing and managing pests and stresses of trees in both the forest and landscape setting. Insects and diseases that attack trees. Pre: 3324 or HORT 3325 or HORT 3326. (2H,3L,3C)

#### 4544: SEMINAR IN OUTDOOR RECREATION

Practitioner-oriented capstone laboratory exercise in outdoor recreation planning and management. Senior standing in Outdoor Recreation Option required. (1H,3L,2C) II.

#### 4614: ECONOMICS OF FOREST PRODUCTS MARKETING

Economics of marketing forest products. Pricing, marketing channels and institutions, marketing research, product policy and planning, forecasting. Pre: 3424. (3H,3C) II.

#### 4714: HARVESTING SYSTEMS EVALUATION

Principles and techniques for evaluating harvesting machines and systems design, application, productivity, and financial performance. Pre: 3216, 3424, 3714, 3734. (3H,3C) II.

#### 4964: FIELD STUDY

Variable credit course.

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

## Overview

Geography offers a unique perspective on many of today's most important issues--from globalization, international development, and culture change to environmental problems, population growth, and climate change. Its theories and methods provide analytical techniques applicable to a wide range of questions significant to a broad spectrum of occupations. The geography major provides a balance between an education focusing on contemporary social, political, economic, and environmental issues and training in advanced computer-based techniques.

The department offers courses in human geography, physical geography, and geospatial computer techniques. Human geography is concerned with the spatial dimensions of the economy, politics, and culture; the significance of where people and their activities are located; how the movement of people, resources, and ideas creates links between rural and urban areas and between different regions of the world; the relationships between peoples and their environments; patterns of resource use; how differences and inequalities revealed in spatial patterns affect the quality of life; and how the processes of globalization are transforming regions, countries, and localities. Physical geographers study patterns of climate, landforms, vegetation, soils, water, and natural hazards and especially the factors and processes that produce those patterns, including human-environment interactions. Geospatial computer techniques involve Geographic Information Systems (GIS), Global Positioning Systems (GPS), computer mapping, and remote sensing. These technologies have led to significant advances in the ways in which geographic information is collected, mapped, analyzed, and integrated in database and decision-making systems. The Department of Geography has excellent technical facilities, including a Geographic Information Systems lab, a remote sensing lab, and a biogeography lab.

Training in geography provides valuable, marketable skills that are in high demand in business, government, and education. Geography majors obtain employment in such diverse fields as geographic information systems, satellite imagery analysis, planning, transportation, marketing, health care, map making, land and water management, recreation, environmental conservation, and teaching. Employment opportunities are especially strong for students obtaining advanced training in geospatial computer techniques, which are used by both human and physical geographers. Undergraduates in the department have the opportunity to work with several local and county agencies while using their geospatial skills to enhance their education and employment prospects.

## Options

In addition to fulfilling the requirements of the Curriculum for Liberal Education and the core curricula of the College of Natural Resources and Environment, geography majors must also complete 39 hours in geography and related disciplines. Course requirements vary according to the option that a student selects, but all majors must take GEOG 1004, 1014, 1104, 2314 and STAT 3604. Geography offers two options, both of which lead to the B.A. degree.

Those in the **Culture, Regions, and International Development option** must complete 15 hours from human geography classes (GEOG 2034, 2054, 2064, 2134, 3104, 3204, 3214, 3224, 3234, 3364, 4054, 4074, 4204, 4244, 4764, and SPIA 2004), of which at least 9 credits must be at the 3000-4000 levels; 3 credits from classes in geospatial analysis and the environment (GEOG 3114, 3304, 3314, 3404, 4044, 4084, and 4354); and 6 credits from geography or specified cognate electives, of which at least 3 credits must be at the 3000-4000 levels.

Students in the **Geospatial and Environmental Analysis option** must complete at least 6 credits from GIS and mapping courses (GEOG 3314, 4084, 4314, 4324, 4384, and 4844), at least 6 credits from environmental analysis courses (GEOG 3114, 3304, 3404, 4044, and 4354), and an additional 3 credits from either category; 6 credits from human geography classes (GEOG 2034, 2054, 2064, 2134, 3104, 3204, 3214,

3224, 3234, 3464, 4054, 4074, 4204, 4244, and 4764), of which at least 3 credits must be at the 3000-4000 levels; and 3 credits from geography or specified cognate electives.

## Minor Requirements

To graduate with a minor in geography, a student must complete 21 hours of geography, including GEOG 1004, 1014, and 1104; 3 hours from GEOG 2314 or 3314; plus an additional 9 hours of geography classes, of which at least 6 hours must be at the 3000-4000 levels.

## Satisfactory Progress

To make satisfactory progress towards the geography degree, upon completion of 60 hours, students must have completed 15 hours in geography. Upon completing 90 hours, students must have an in-major GPA of 2.0 or more. Courses for in-major GPA computation include all GEOG courses and SPIA 2004.

## Undergraduate Courses (GEOG)

### 1004: INTRODUCTION TO HUMAN GEOGRAPHY

Introduction to geography as a social science. Development of a conceptual framework for studying and evaluating human-environment relationships. Examination of selected regional and global issues in terms of human and physical attributes of place. (3H,3C) I,II.

### 1014: WORLD REGIONS

Human and physical patterns of major regions of the world. Concepts and perspectives of geography as a social science; linkages and interdependence of nations and regions. (3H,3C) I,II.

### 1104: INTRODUCTION TO PHYSICAL GEOGRAPHY

Integrated study of major subsystems of the natural environment of humans: the nature, distribution, and interrelationships of climate, landforms, vegetation, hydrology, and soils. (3H,3C) I,II.

### 1504: SURVEY OF METEOROLOGY

An introductory look into the world of meteorology, including the role of forecasters, broadcast meteorologists, current research, and the prediction and response to significant storm events. (1H,1C)

### 2034: GEOGRAPHY OF GLOBAL CONFLICT

Discussion of geographical dimensions of global conflicts: territorial, environmental, locational, segregational and perceptual. Explains the background to conflicts, documents the current status of conflicts and discusses the different points of view in conflict. Analysis of the Holocaust in Europe, conflicts in Middle East, Northern Ireland, and Central Europe. Topics in the course will change as the geography of global conflict changes. (3H,3C) II.

### 2054 (IS 2054) (PSCI 2054): INTRODUCTION TO WORLD POLITICS

An introduction to the prevalent methods and theories in the study of world politics. Topics include: historical context of contemporary world politics, global actors and power relations, international conflict and conflict resolution, international systems, interdependence, trade and integration, international law and prospects for global governance. (3H,3C)

### 2064 (IS 2064) (PSCI 2064): THE GLOBAL ECONOMY AND WORLD POLITICS

An introduction to the interaction of politics and economics, power and wealth, within the world political economy. Topics include: the international financial system, the dynamics and principles of trade, and the role of transnational firms, as well as issues of environmental protection, sustainable development, and the distribution of wealth and power. (3H,3C)

### 2084: PRINCIPLES OF GIS

Principles and applications of Geographic Information Systems, Geographic coordinate systems, georeferencing, data sources, databases, mapping, and spatial applications of GIS for students who do not wish a technical knowledge of GIS. Requires regular use of Internet server-based automated systems for geographic data analysis. Partially duplicates GEOG 4084. Cannot be taken for credit after GEOG 4084, and precludes credit for GEOG 4084. (2H,2C)

### 2134: GEOGRAPHY OF THE GLOBAL ECONOMY

Geographical dimensions of the global economy since World War II. Globalization and the emergence of a new international division of labor. The relative decline of the United States and the growth of Japan, East Asia and the European Union. Changing geographies of foreign direct investment location. Places and regions in geo-economic discourse. Population and resources issues in the early twenty-first century. (3H,3C)

### 2214: GEOGRAPHY OF NORTH AMERICA

Regional study of Anglo-American with consideration of relationships between natural environments and social, political, and economic developments. International issues involving Mexico also considered. (3H,3C)

### 2314: MAPS AND MAPPING

Introduction to mapping and its role in society. Fundamentals of map reading, analysis, and interpretation, as they are required for the solution of spatial problems. Influences of maps on attitudes toward and images of the geographic environment. (3H,3C) II.

### 2505,2506: WEATHER ANALYSIS I

Introduction to the operational tools and processes in weather forecasting. Surface data and upper-air sounding analysis, forces producing and directing wind flow, jetstreams, weather chart analysis, and atmospheric moisture including clouds and precipitation. (3H,3C)

**2964: FIELD STUDY**

Pass/Fail only. Variable credit course.

**2974: INDEPENDENT STUDY**

Variable credit course.

**2984: SPECIAL STUDY**

Variable credit course.

**2994: UNDERGRADUATE RESEARCH**

Variable credit course.

**3104: ENVIRONMENTAL PROBLEMS, POPULATION, AND DEVELOPMENT**

Environmental problems considered in their social, spatial, and global contexts. Impacts of globalization, political economy, population, culture, and poverty on environmental crises. Examination of effects of relations between developed and developing countries on the environment. Focus on selected key environmental issues, such as population growth, pesticide misuse, the development process and the environment, the energy crisis, and environmental justice. (3H,3C)

**3114 (GEOS 3114): INTRODUCTION TO METEOROLOGY**

A nonmathematical introduction to meteorology including consideration of the structure of the atmosphere, energy balance in the atmosphere, clouds and precipitation, air masses and fronts, global circulation, storms, climatology, catastrophic weather, meteorological optics, and forecasting. (2H,3L,3C)

**3204: GEOGRAPHY OF MIDDLE AMERICA**

Assessment of human-environment interactions in the region from earliest human habitation to the present. Includes Pre-Columbian ecological adaptations; change introduced by European conquest and colonization; revolution and land reform; and contemporary geographic case studies. 3 hours of Geography required. (3H,3C) II.

**3214: GEOGRAPHY OF AFRICAN DEVELOPMENT**

Survey of African habitats, cultures, livelihood systems, and socioeconomic development mainly south of the Sahara. Human adjustments to changing environmental, demographic, economic, and political conditions during the colonial and post-colonial eras. 3 hrs in Geography required. (3H,3C)

**3224: GEOGRAPHY OF APPALACHIA**

Appalachia as a region: physical environment, development of internal settlement, cultural, economic, and political patterns. Human adaptations to environmental change and linkages to external regions. 3 hrs in Geography required. (3H,3C)

**3234: GEOGRAPHY OF VIRGINIA**

Virginia as a region: physical environment, development of settlement, cultural, economic, and political patterns. Human adaptation to environmental change, human modification of environments, and linkages to external regions. 3 hours in Geography required. (3H,3C)

**3244: THE U.S. CITY**

The economic, political, and social forces driving urbanization in the United States. The American city in historical context with particular emphasis on the rise of manufacturing, deindustrialization, and suburbanization. Case studies from the manufacturing and sunbelt regions to illuminate key constructs from urban and human geography. "Border" examples of comparative urbanization from the U.S. -Mexican border, the Caribbean, and Canada. Junior standing required. (3H,3C)

**3254: GEOGRAPHY OF EAST ASIA**

A geographical analysis of several modern states in East Asia, specifically China, Japan and the Koreans. Economic, political, and cultural change since the end of World War II. Globalization and the emergence of the China as a demographic and economic giant. (3H,3C)

**3304 (CSES 3304) (GEOS 3304): GEOMORPHOLOGY**

Examines the variety of landforms that exist at the earth's surface. Detailed investigation of major processes operating at the earth's surface including: tectonic, weathering, fluvial, coastal, eolian, and glacial processes. Field excursion. Pre: 1104 or GEOS 1004 or GEOS 2104. (3H,3C)

**3314: CARTOGRAPHY**

Science and art of cartography including the conceptual framework of the cartographic method. Development of the skills necessary to create maps to be used in the analysis of spatial phenomena for geographic research. Emphasis on thematic cartography. I (2H,3L,3C)

**3404: MOUNTAIN GEOGRAPHY**

Physical characteristics of mountains, such as steep slopes, climatic extremes, and sharp environmental gradients, and their influences on the ways in which people, animals, and plants interact. Physical processes that operate in high-relief environments, including consideration of climate, geomorphology and biogeography. Influence of physical processes in mountain environments on human culture and activities. Cultural significance of mountains. Mountains as a resource. Land use and human-land interactions in mountains. Course is intended for students with an interest in what makes mountains unique and inspiring landscape elements. Pre: 1104. (3H,3C)

**3464 (AHRM 3464) (EDHL 3464) (HD 3464) (HUM 3464) (SOC 3464) (UAP 3464): APPALACHIAN COMMUNITIES**

The concept of community in Appalachia using a multidisciplinary approach and experiential learning. Interrelationships among geographically, culturally, and socially constituted communities, public policy, and human development. 2000-level course in any cross-listing department required. (2H,3L,3C)

**3504: SEVERE WEATHER**

An introduction into mesoscale environments favoring the development of severe thunderstorms and tornadoes, the analysis of moisture, instability

and shear parameters associated with severe weather events. Thunderstorm life-cycles, analysis of thermodynamic diagrams, role of wind shear and associated convective mode, hail production and forecasting, tornadogenesis and research. Pre: 2505. (3H,3C)

#### 3515,3516: DYNAMIC METEOROLOGY

Examination of atmospheric thermodynamics and its role in the movement of air in the atmosphere. Covers the first and second laws of thermodynamics as they apply to the atmosphere. Topics covered include buoyancy calculations, hydrostatics, and the role of moisture in vertical movement of air in the atmosphere. Pre: 2506, MATH 2214, PHYS 2206, (PHYS 2216 or PHYS 2306) for 3515; 3515 for 3516. (3H,3C)

#### 3524: METEOROLOGY FIELD METHODS

A field methods course in meteorology. On-location observation and analysis of temperature, wind fields, pressure, and dewpoint. In-field experiences with radar and satellite data, numerical model output and portable weather stations. On-location sites and corresponding curriculum may include severe storm analysis in the Great Plains, mountain weather in the White Mountains (NH) or Rocky Mountains (CO), and coastal storms along the Atlantic of Gulf of Mexico coastlines. May be repeated for credit, with permission and different content, for a maximum of 9 hours. Pre: 2506, 3504. (3H,3C)

#### 3954: STUDY ABROAD Variable credit course.

4044 (BIOL 4044): BIOGEOGRAPHY A survey of the field of biogeography. A study of the factors influencing the distribution of plants and animals approached from ecological, historical, and cultural perspectives. Human influence on biotic patterns, such as crop domestication, habitat alteration, species introductions and extinctions, management issues, and environmental change, is a primary focus. Pre: 1104 or BIOL 2804. (3H,3C)

#### 4054: GEOGRAPHY OF WINE

Analysis of physical and cultural forces that shape the production, consumption, and great variety of wine in the world. Wine as a complex commodity is examined through its economic, social, political, and ideological impacts in different parts of the world throughout history. Particular emphasis will be focused on place as an agent in defining the product. (3H,3C)

#### 4074: MEDICAL GEOGRAPHY

Geographic patterns of disease and health care at various scales. Ecological, holistic approach to health problems emphasizes interrelationships of population-habitat-culture. Mapping of disease patterns and health services delivery and utilization. Field experience included. 3 hours of Geography required. I (3H,3C)

#### 4084 (GEOS 4084): INTRODUCTION TO GEOGRAPHIC INFORMATION SYSTEMS

Use of automated systems for geographic data collection, digitization, storage, display and analysis. Basic data in GIS applications. Overview of GIS applications. Group homework projects to develop proficiency in the use of current GIS software. Prior experience with personal computers recommended. (3H,3C)

#### 4204: GEOGRAPHY OF RESOURCES

Environmental problems of Industrialized and Third World. Human impact on the environment, population-resource relationships, the relationship between resources and economic development, food production and the problem of world hunger, and energy-related issues. (3H,3C)

#### 4214 (UAP 4214) (WGS 4214): WOMEN, ENVIRON & DEVELOPMENT

Explores intersecting roles of gender, culture, and socio-economic status in people's use of nature, management of environmental resources, and experiences of environmental change. Examines debates on environmental and development initiatives, environmental ethics, and environmental social movements from feminist perspectives. Pre: UAP 3344 or UAP 3354. (3H,3C)

#### 4244: GEOGRAPHY OF EUROPE

Overview of the physical geography, places, and peoples of Europe, past and present. Evolving cultural landscapes of Europe. Colonial linkages to other regions. Economic globalization and uneven development in the European Union. Comparative intracontinental regional case studies. One GEOG course at 2000 level or above, or consent. (3H,3C)

#### 4314: SPATIAL ANALYSIS IN GEOGRAPHIC INFORMATION SYSTEMS

Theory and application of Geographic Information Systems, with special emphasis on analytical operations, database design, cartographic modeling, and raster GIS. Spatial data handling and analysis to facilitate decision-making through the communication of geographically referenced data. Pre: 4084. (2H,3L,3C)

#### 4324: ALGORITHMS IN GEOGRAPHIC INFORMATION SYSTEMS

Computational methods in automated mapping and map analysis. Visual Basic programming and algorithm design for spatial display and analysis under both raster and vector data models. Requires regular use of the departmental microcomputer and UNIX workstation laboratory. Variable credit course. Pre: 4084, CS 1044.

#### 4354 (GEOS 4354): INTRODUCTION TO REMOTE SENSING

Theory and methods of remote sensing. Practical exercises in interpretation of aerial photography, satellite, radar, and thermal infrared imagery. Digital analysis, image classification, and evaluation. Applications in earth sciences, hydrology, plant sciences, and land use studies. (2H,3L,3C)

#### 4374: REMOTE SENSING AND PHENOLOGY

Analysis of spatial and temporal patterns of the vegetated land surface as observed by satellite images. Application of satellite image time series to derivation of land surface phenology, and analysis of the appearance and development of phenology in the USA and worldwide. Methods of monitoring of phenology with satellite imagery. Causes of spatio-temporal changes of phenological events. Effects of global climate change. Pre: 4354. (3H,3C)

#### 4384: THE ARC/INFO GEOGRAPHIC INFORMATION SYSTEM

Use of the Arc/Info software system for basic data tasks such as database development, digitization, storage, display and analysis under the UNIX operating system. Individual application projects will be developed throughout the semester in consultation with the instructor. Pre: 4314 or 4324.

(1H,6L,3C)

**4394: INTRO TO WEB MAPPING**

Application of web mapping technologies to geographic data collection, storage, analysis, and display. History and context, spatial data infrastructures, hardware and software architectures, open geospatial consortium standards, mapping APIs, virtual globes, user-centric design, web cartography. Group and individual projects. Pre: 2314 or 3314 or 4084. (3H,3C)

**4404 (ALS 4404) (NR 4404) (UAP 4404): APPROACHES TO INTERNATIONAL DEVELOPMENT**

An introduction to issues relating to international development. The course will focus on areas to help students better understand the interdependencies between countries and how institutions and organizations can foster effective working relationships on global projects of mutual interest between countries. (1H,1C) I.

**4504: SYNOPTIC METEOROLOGY**

Examination of large-scale (1000-5000km) weather systems using both analytical and operational analysis. Topics include thermal structure of atmosphere & resulting circulation, frontal analysis, lifting mechanisms, barotropic/baroclinic systems, and mid-latitude cyclones. Weather pattern influences of the jetstreams and oscillation of large pressure systems including El Nino/La Nina and the North Atlantic Oscillation. Pre: 3504. (3H,3C)

**4524: PHYSICAL METEOROLOGY**

A study of the physical processes in the atmosphere, including radiation, energy budgets, temperature and pressure variations, optics, electrical phenomena, cloud physics and precipitation formation. Pre: 3516. (3H,3C)

**4554: REMOTE SENSING OF ATMOSPHERE**

Remote sensing technologies used in monitoring weather. Evaluation of Doppler radar products, including base reflectivity, base velocity, storm-relative velocity, and vertically integrated liquid imagery. Could observation through infrared and visible satellite imagery; remote weather station design, set-up and data retrieval. Pre: 4354. (1H,1C)

**4764 (SOC 4764) (UAP 4764): INTERNATIONAL DEVELOPMENT POLICY AND PLANNING**

Examination of major development theories and contemporary issues and characteristics of low-income societies (industrialization, urbanization, migration, rural poverty, hunger, foreign trade, and debt) that establish contexts for development planning and policy-making. Junior standing required. I (3H,3C)

**4964: FIELD STUDY**

Pass/Fail only. Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

## Forest Product Business

This option provides students with an industry-specific background through its combination of business and wood science coursework. There are numerous career opportunities for this option in both the private and public sectors. Employment experiences can include management of wood products manufacturing operations, marketing and sales in the wood products sector, utilization of wood to create innovative products, as well as coordination of international trade to match forest products producers to export markets.

## Packaging Science

Significant opportunities exist to improve the efficiency and safety of the global unit load logistics system of product storage and distribution by understanding how critical components in the system interact during use. Graduates of this option will be unique in the industry with an understanding of transport packaging and unit load systems-based design technologies. Interdisciplinary education includes all components of the unit load logistics system.

## Residential Wood Structures

This option focuses on the study and development of better ways to use wood in buildings and design residential wood structures. The principles of engineering and physics are used to help designers and builders produce economical and durable buildings and structures. New possibilities for building construction will be explored and developed. The residential wood structure industry needs people who understand the unique engineering properties of wood and wood-based composites so that new products and designs can be produced, and existing products and structures are used in the proper way.

## Wood Materials Science

This option is rooted in chemistry and introductory polymer science. It prepares students for numerous career tracks, including the adhesives industry, the wood-based composites industry, and other disciplines in which the unique combination of chemistry, polymer science and wood science hold great value.

## Wood Science and Forest Products minor and Packaging Science minor

Minors are offered for students interested in obtaining knowledge and skills in the wood science field to supplement their primary major field of study.

## Course Descriptions (SBIO)

### 1234: INTRODUCTION TO WOOD, DESIGN AND CRAFTSMANSHIP

Wood as a material. Introduction to laboratory techniques, wood processing, machining and woodworking, moisture interactions, species characteristics, microscopic techniques, measuring material properties, characteristics of forest products industry, career opportunities. (2H,3L,3C)

**2104: PRINCIPLES OF PACKAGING**

Packaging systems, materials, and forms and their relationship with the requirements of global societies for the distribution and storage of industrial and consumer products; packaging laws and regulations. I (3H,3C)

**2114: PACKAGING LAW AND REGULATION**

Study of the legal and regulatory issues affecting primary, secondary, and tertiary packaging and packaging systems. Labeling, food and drug, intellectual property, shipping, structural, and environmental laws and regulations affecting packaging design and use. Pre: 2104. (3H,3C)

**2124: STRUCTURE AND PROPERTIES OF SUSTAINABLE BIOMATERIALS**

Macroscopic and microscopic structure and chemical composition of wood and other biomaterials such as grasses, bamboo, and bagasse. Relationships between anatomical structure and physical/mechanical behavior. Microscopic identification of commercially important biomaterials. Preparation and analysis of microscope slides and scanning electron micrographs. Pre: BIOL 1005, CHEM 1035. (2H,3L,3C)

**2384: BEHAVIOR OF SUSTAINABLE BIOMATERIALS**

Physical properties of sustainable biomaterials and composite based on structure. Polymer science topics related to sustainable biomaterial composition. Influence of structure on transport properties, response to heat, moisture, electricity, and light. Measurement techniques and reporting for steady-state transport. Pre: CHEM 1035, PHYS 2205. (2H,3L,3C)

**2614: INTRO FOREST PROD MARKETING**

Study of marketing systems and methods used by North American primary and secondary forest product industries. Emphasis on wood product industries. Marketing of hardwood lumber, softwood lumber, panels, composites, furniture, and paper products. Role of North American industries and markets in world trade of forest products. (3H,3C)

**2784 (FOR 2784): WORLD FORESTS AND FOREST PRODUCTS**

A socio-economic approach to examining the management and use of the world's forests, enhance knowledge of global forest resources and products, and understand the roles and relationships of key stakeholders. (3H,3C)

**2974: INDEPENDENT STUDY**

Variable credit course.

**2984: SPECIAL STUDY**

Variable credit course.

**3004: SUST NATURE-BASED ENTERPRISE**

Planning for green and sustainability values for profit and non-profit enterprises that produce and market nature-based products and services (e.g., wood products, wildlife, fish, ecotourism). Understanding current green business environments to foster natural resource-based enterprises. (3H,3C)

**3124: PAPER AND PAPERBOARD PACKAGING**

Paper and paperboard properties and types. Types and performance of flexible paper packaging, sacks, and wraps. Folding carton design, properties of corrugated fiberboard. Corrugated fiberboard container design and performance. Packaging regulations and hazards of the distribution environment. Printing, labeling and automatic identification methods. Pre: 2104, 2124. (2H,3L,3C)

**3214: FOOD AND HEALTH CARE PACKAGING**

The course covers both current and advanced food and health care packaging. The types of materials and their properties, fabrication, functions, distribution and packaging life cycle for food and health care packaging systems and design are addressed. Recent trends in food and health care packaging systems, sustainable food packaging, medical device packaging, aseptic packaging, package/product interactions, smart active packaging, handling of packages, and modified atmospheric packaging are reviewed. Global food and health care packaging standards and compliance, safety issues, and environmental considerations are also explored. Pre: 2104, 2384, 3284, 3124. (2H,2L,3C)

**3224: PACKAGING AND MATERIALS HANDLING**

Unit load and parcel supply chains. Principles of operation and design of warehouse distribution and fulfillment centers. Principles of operation and design of shipping and distribution systems. The relation between packaging design, pallet design, and unit load design and the operation of industrial consumer goods supply chain. Pre: 2104. (3H,3C)

**3234: WOOD IDENTIFICATION PROPERTIES LABORATORY**

Physical properties and characteristics of wood. Methods for determining its physical properties. Variation of the properties. Structure, properties, & processing of tropical woods. I (3L,1C)

**3284: PACKAGING PRODUCTS AND PRODUCTION**

Introduction to synthetic, natural and sustainable polymer science and engineering as applied to packaging systems. Morphology, rheology, physical and thermal properties, processing methods, and polymerization of traditional, natural and sustainable packaging polymers. Detailed study of relationships among materials, processing, and structural properties through hands-on experience. Both traditional and advanced industrial mass production technology, and global regulation and environmental impact of packaging articles. Pre: 2104, 2124, 2384. (2H,2L,3C)

**3314: WOOD MECHANICS**

Mechanical properties of wood including concepts of stress, strain, Poisson's ratio, orthotropic properties, tension, compression, bending and effects of moisture on mechanical properties. Current issues of wood mechanics in the wood product industry. Standard methods of evaluating important mechanical properties of solid wood, composites and fiber. Pre: 2554, MATH 1016. (3H,3L,4C)

**3324: GREEN BUILDING SYSTEMS**

Definition of green buildings with specific focus on wood frame single family housing and appropriate green building systems. Site specification, resource efficiency, water efficiency, indoor environmental quality, homeowner education and global impact. Certification in various green building

systems. (3H,3C)

#### 3334: SURVEY OF NON-TIMBER FOREST PRODUCTS

In depth study of non-timber forest products of NTFP throughout Appalachia with overseas example – their heritage, uses and markets, economic development opportunities, and sustainable management. Emphasis will be placed on utilization and management issues. Students will gain skills necessary to assess and plan for NTFP business opportunities. (3H,3C)

#### 3434: CHEMISTRY AND CONVERSION OF SUSTAINABLE BIOMATERIALS

Chemical composition of plant matter. Chemistry and biosynthesis of plant components. Cellulosic biofuel technology. Industrial conversion of woody biomass: pulping, bleaching, papermaking. Industrial conversion of cellulose by chemical processes. Pre: 2124, CHEM 1036. (3H,3C)

#### 3444: SUSTAINABLE BIOMATERIALS & BIOENERGY

Introduction to the structure and properties of natural composites, biobased polymers, and naturally-derived chemicals for materials and energy applications. Chemistry of biomass deconstruction. Industrial applications of biobased polymers, monomers, and chemicals. Pre: (CHEM 2514 or CHEM 2535), (CHEM 3615 or CHEM 4615). (3H,3C)

#### 3445-3446: ENTREPRENEURIAL WOOD DESIGN AND INNOVATION

Concept to market business project applied to design and innovation of wood products. Product design based on consumer need and sustainable use of natural resources. Writing a business plan including, product innovation, resource sustainability, marketing, strategic planning, production planning, technology utilized, packaging and distribution to final market. (2H,3L,3C)

#### 3454: SOCIETY, SUSTAINABILITY, BIOMATERIALS AND ENERGY

Sustainability, raw materials and energy needs of society. Use of sustainable biomaterials to meet society's needs and reduce impact on the environment. Methods to evaluate and certify the sustainability of materials and consumer goods. Carbon sequestration and the use biomass for energy. (3H,3C)

#### 3464: FOREST PRODUCTS BUSINESS SYS

Business processes of forest/wood product organizations. Business challenges and current business processes and management practices. Organizational methods to study business processes and then plan, execute, and evaluate business performance improvements. The application of techniques to strategic planning, strategy deployment, value stream management, and performance assessment. Business case studies of wood products and forest products related organizations. Pre-Requisite: Junior Standing required Pre: 2514. (2H,3L,3C)

#### 3534: LUMBER MANUFACTURING AND DRYING

The processing of logs into dry lumber. Principles of log and lumber grading. Design and operation of log sawing and lumber drying systems. Techniques for measuring lumber manufacturing and lumber drying efficiency. The relationship between log quality, sawing, and drying and the quality of the product produced. Pre: 3114. (2H,3L,3C)

#### 3544: SECONDARY WOOD PRODUCTS MANUFACTURING

Secondary wood products manufacturing, including raw materials, rough mill, finish mill, assembly, and finishing. Also covers machinery, wood machining, plant layout, production methods, modern industrial engineering concepts in secondary manufacturing, and wood treating. Visits to local secondary wood products manufacturing industry. Pre: 3114, 3534. (2H,3L,3C)

#### 3554: SUSTAINABLE BIOMATERIALS ENTERPRISES

Processes and techniques in manufacturing sustainable biomaterial-based products. Contemporary manufacturing, industrial engineering, and business practices in enterprises. Problem solving, operations management, and effective leadership in discrete products manufacturing and sustainable biomaterials production practices. Pre: 1234. (3H,3C)

#### 3634: WOOD PRODUCTS MANUFACTURING

The study of manufacturing processes used in the primary and secondary wood products industry including; lumber; wood moisture relations, drying, durability and the processing of lumber into secondary wood products such as flooring, furniture, and cabinets. Description, selection, and use of the manufacturing equipment used in wood processing. The selection and use of current industrial engineering and business practices applied in wood products manufacturing. How managers solve production and raw material issues. Pre: 2124. (2H,3L,3C)

#### 3954: STUDY ABROAD

Variable credit course.

#### 3964: FIELD STUDY

Variable credit course.

#### 4004: SENIOR SEMINAR IN FOREST PRODUCTS BUSINESS

Integrated application of principles of management, manufacturing, and marketing as applied to wood-based and related industries. Case analysis, business planning and strategic decision making. Senior standing required. Pre: 3634. (2H,2C)

#### 4024: PACKAGING DESIGN FOR GLOBAL DISTRIBUTION

Understanding, identification, and measurement of hazards in physical distribution including sea, air, and various land transportation, storage methods, and use of sanitation methods. Knowledge, analysis, and selection of sustainable protective packaging materials. Design and analysis of packaging protection against such hazards as shock, vibration compression, and climate. Laboratory testing of shock, vibration and compression, and performance testing of packaging and components. Packaging design in global context. Pre: 3224. (2H,3L,3C)

#### 4054: PACKAGING SYSTEMS DESIGN PRAC

Integrated application of principles of packaging design and manufacturing. Design briefs, package development process, structural requirements, manufacturing and distribution plans, target markets and positioning. Senior Standing required. Pre: 4024. (2H,3L,3C)

#### 4154: COMPUTER APPLICATION SYSTEMS IN FOREST PRODUCTS

Computer control systems with applications in the forest products industry. Survey of systems for gathering, inputting, conditioning, and managing information. Hardware and software systems for computer control applications. Use of information technologies to integrate control subject to raw material, quality, and market fluctuations. Forest products case studies in data acquisition, data analysis, database management production planning, process control, inventory control, and systems specification. Junior standing is required. (2H,3L,3C)

#### 4224: WOOD PALLET, CONTAINER, AND UNIT LOAD DESIGN

Wood pallet design and performance. The design of wood containers and crates. Design and performance of unit loads. Design and performance of unit load equipment, i.e., conveyors, racking systems, automatic guided vehicles, fork trucks. Principles of unit load design. Mechanical interactions between pallets, packaging, and unit load handling equipment. Unit load stabilization techniques, i.e., strapping, stretch wrapping. International phytosanitation regulations of solid wood packaging; principles of dunnage, blocking and bracing. Pre: 3534, 4124, 4315. (2H,3L,3C)

#### 4384: BIOREFINERY SCIENCE

Biomass utilization as an industrial resource. Biorefinery processes such as cultivation, harvesting, separation, and biomass processing into industrial products compared to the petroleum refinery. Routes to the production of bioenergy, biochemicals, and biofuels. Resource availability and energy consumption, environmental implications of a biorefinery system, public policy influence on development of biorefineries. Pre: 3434. (3H,3C)

#### 4444: SUSTAINABLE BIOMATERIAL COMPOSITES

Introductory polymer, adhesion, and materials science of composites made from plant materials including wood, bamboo, and straw. Composite manufacture and performance. Contemporary wood adhesives and binders. Pre: 2124, 2384, 3434. (3H,3L,4C)

#### 4514: WOOD PRODUCTS INDUSTRY STUDIES

Field studies of the processing systems and product manufacturing procedures of various wood products industries. I Pre: 3114. (3L,1C)

#### 4624: WOOD INDUSTRY PRODUCTION OPERATIONS MANAGEMENT

Study of the operation of wood products organizations. Problems facing these organizations and current management practices used to address these problems. Investigation of the design and implementation of wood industry management improvement efforts. How organizations and groups design, implement, and evaluate improvements efforts. The application of techniques to production planning, financial management, inventory management, quality, human resources management, technology, performance measures, and assessment. Includes case studies of wood products manufacturing companies. Pre: 3544. (2H,3L,3C)

#### 4634: FOREST PRODUCTS BUSINESS MANAGEMENT

This course will describe the allocation of resources within a forest products business. Students will determine how to allocate natural, human and financial resources to maximize profitability within the organization. How allocation decisions affect all stakeholders of the organization will be demonstrated and this allocation's impact upon strategic planning will be discussed. The course will also show the impact of the external business environment on management decisions. Pre: 1234, 2614, 3114. (3H,3C)

#### 4714: WOOD PERFORMANCE IN CONSTRUCTION

Interactions of building code requirements, wood materials and building construction with special emphasis on relative merit of wood and wood-based composites versus non-wood alternatives. Construction details that lead to long-term performance such as controlling moisture infiltration, preservatives, and proper selection of materials, preservation of historic wood buildings, effectiveness and efficiency of wood building systems. Pre: 4315. (3H,3C) II.

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

## Overview

Virginia's largest undergraduate business school, Pamplin College of Business is committed to outstanding teaching by full-time faculty who are nationally recognized in theoretical and applied research. The Pamplin College is further committed to being known for its graduate programs throughout the Commonwealth, and to serving business and society through the expertise of its faculty, alumni, and students. Dean Richard E. Sorensen has said, "The Pamplin College, as a center for excellence, is an academic generator of high quality applied and theoretical research that translates into teaching superiority and practitioner applications for all its audiences."

Our emphasis is on: Enhancing the high quality of our undergraduate programs; providing a high quality MBA program at locations throughout the Commonwealth; raising the research and scholarship reputation of the faculty; integrating the computer and technology into the academic curriculum; developing the leadership skills and ethical values of our students; preparing students for global business challenges, including providing opportunities for global experience before graduation; enhancing our commitment to diversity; heightening our level of service to the business community through the research and expertise of faculty, students, and graduates; and enhancing the quality of the Ph.D. program.

The college regards diversity as a source of strength and pride. Building upon this commitment, the college affirms the following principles:

- All students, regardless of their background (race, color, gender, sexual orientation, disability, age, veteran status, national origin, religion, or political affiliation), deserve and are promised equal opportunity to an education in the Pamplin College of Business.
- We support an environment for students, faculty, and staff that is free from hostility and intolerance.
- We pursue a supportive and diverse community that respects each individual, and allows ideas and opinions to be openly discussed.
- The Pamplin College is committed to the goal of developing its students, faculty, and staff in a manner that inspires them to successful participation and effective leadership in a pluralistic society, and considers these values essential to that goal.

The curriculum includes a broad liberal education foundation of two years, followed by a college core in the fundamentals of business theory and, finally, concentration in the major.

The college offers majors in:

- Accounting and Information Systems
- Business Information Technology
- Economics
- Finance
- Hospitality and Tourism Management
- Management
- Marketing

Academic advising in the college parallels the two layers of the curriculum. Through the sophomore year, all students are advised in Pamplin Undergraduate Programs, 1046 Pamplin Hall. Following students' clearance for upper-division course work and declarations of their majors, students are assigned faculty advisors from their majors.

Undergraduates are strongly encouraged to participate in the out-of-class activities of the college, particularly the annual career fairs in September and February; the placement seminars, and registration meetings held each semester; the ethics and leadership seminars; college international programs and study abroad; and the various events of the 27 different student clubs in the college. These programs provide critical insights into the careers for which students are preparing and valuable opportunities for leadership.

Undergraduates are required to purchase a personal computer, as well as a university and a Pamplin software bundle. The PC is used extensively in the curriculum. Purchase information and required configuration will be available each spring.

Administrative and faculty offices for the college are located in Pamplin and Wallace Halls. Our facilities also include study rooms, computer labs, conference rooms, a behavioral laboratory, an atrium, and a student organization office center.

The college is a member of The Association to Advance Collegiate Schools of Business, AACSB International. All programs are accredited by the AACSB.

## General Requirements for Graduation

A minimum of 125 semester hours is required for graduation in each curriculum.

The student must have an overall average GPA of 2.0 ("C") on all work attempted and in the courses in the major.

To ensure credit, a student desiring to take courses at another institution must secure approval of the associate dean for undergraduate programs of the Pamplin College before registering for the course at the other institution.

Acceptance of work completed at junior or community colleges is limited to those courses offered at the freshman-sophomore level at Tech. General university limitations on acceptability of transfer credit are shown elsewhere in this catalog.

## Program for First Two Years

All students in business generally take the same required courses for the first two years. A major within the college may be selected at any time during the first two years, but must be selected by the end of the semester in which the student attempts 72 semester hours. Because Economics is an unrestricted major within the College of Business, students in ECON who did not enter the university as BUS or ECON, must apply if they wish to change into ACIS, BIT, FIN, HTM, MGT, and MKTG.

Students must have a GPA of 2.0 or better in the combined series in accounting and information systems, business information technology, economics, and mathematics with no grade less than C- in the nine designated courses in these departments; have an overall GPA of 2.0 or better for all course work; and have earned at least 60 semester hours before enrolling in junior business courses.

### Requirements for the first two years

	Hours	
ACIS 1504 Introduction to Business Information Systems	3	First Year
ENGL 1105-1106 Freshman English or COMM 1015-1016 Communication Skills	6	First Year
MATH 1525-1526 Calculus with Matrices	6	First Year
Scientific Reasoning and Discovery <sup>1</sup>	8	First Year

Social Sciences <sup>2</sup> Must include PSYC 2004 Introductory Psychology or SOC 1004 Introductory Sociology	9	First or Second Year
Area 2 - Ideas, Cultural Traditions, and Values <sup>3</sup>	6	First or Second Year
ACIS 2115-2116 Principles of Accounting	6	Second Year
BIT 2405-2406 Quantitative Methods	6	Second Year
ECON 2005-2006 Principles of Economics <sup>4</sup>	6	Second Year
COMM 2004: Public Speaking or free elective <sup>5</sup> if COMM1015-1016 are taken in the first year	3	Second Year
Free Elective and/or Major Requirement <sup>5</sup>	6	Second Year
	65	

<sup>1</sup> Students select any science in Area 4 of the Curriculum for Liberal Education. Only students majoring in Economics are required to take a laboratory. All other students may take the laboratory or two hours of any free elective.

<sup>2</sup> For the other social science courses student select from any courses in Economics (beyond Principles), Geography, History (except HIST 1024, 1025, 1026, or 2054), International Studies, Political Science (except PSCI 3015-3016), Psychology, and Sociology; or any course approved for Area 3 of the Curriculum for Liberal Education. Some social science courses, such as GEOG 1014, HIST 1214, IS 2055, PSCI 1024, and SPIA 1004 will also satisfy Area 7.

<sup>3</sup> Any six semester hours in Area 2 of the Curriculum for Liberal Education.

<sup>4</sup> These two required courses will complete Area 3 of the Curriculum for Liberal Education.

<sup>5</sup> Free Electives during the sophomore, junior, and senior year must include at least one hour from the Curriculum for Liberal Education Area 6: Creativity and Aesthetic Experience. The Curriculum for Liberal Education Area 7: Critical Issues in A Global Context, may be used to meet another requirement or taken as a free elective.

## College Requirements for Second Two Years

Regardless of major selected, the following core courses are required of all business students:

BIT 3414: Production and Operations Management	(3)
FIN 3055: Legal Environment of Business	(3)
FIN 3104: Introduction to Finance	(3)
MGT 3304: Management Theory and Leadership Practice	(3)
MKTG 3104: Marketing Management	(3)
MGT 4394: Business Policy and Strategy	(3)

The remaining hours to complete the required 125 credit hours are made up of in-major requirements and free electives. At least 50 percent of the hours completed for the degree must be taken outside the college, except except for the ACIS major that requires 40% of classes to be taken outside of the college.

## Center for Leadership Studies and Leadership Minors

The Center for Leadership Studies coordinates leadership programs across campus including the Corps of Cadets Center for Leader Development, the Department of Management's Business Leadership Center, and other leadership activities organized by the Pamplin College of Business, Student Affairs, and Interdisciplinary Studies. Currently, the college administers two minors: the Virginia Tech Corps of Cadets minor in leadership studies and the Department of Management Business Leadership minor.

For more information on the 18-credit Corps of Cadets minor in leadership, see the material in the ROTC section of the catalog or contact the Center for Leader Development, 540/231-7136.

The 18-credit Business Leadership minor is open to students in all majors who have at least a 2.50 overall GPA at Virginia Tech. It includes required courses in management theory and leadership practice, ethical leadership and corporate social responsibility, and advanced skills in leadership; elective courses from business, communication, humanities, and sociology; and a required leadership experiential activity. For additional information, contact Ms. Lorraine Borny, Business Leadership Center, 540/231-2604.

## International Business Minor

Sophomores, juniors, and seniors in the Pamplin College who have at least a 2.0 overall GPA are eligible for the International Business minor

of 18 semester hours of course work and an international experience. The required course work includes: a) MGT 3314 International Business; b) three courses from ACIS 5034 Global Issues in Accounting and Information Systems; BIT 4474, Global Operations and Information Technology; HTM 4454 Hospitality Marketing Management; Finance; FIN 4144, International Financial Management; MGT 4314, International Management; and MKTG 4704, International Marketing; and c) six additional semester hours from a list of international courses in five colleges. Additionally, a student must have passed at least four years of a foreign language in high school. If a student does not meet the language requirement, a student may take additional language courses at the college level to satisfy the requirement. The required international experience may be met with study abroad, international internships, co-op assignments at multinational corporations, and living abroad. To facilitate the international experience requirement, Pamplin offers summer study abroad trips which generally involve six semester hours of credit toward the degree and minor, as well as winter-break and semester-long study abroad programs. Applications for this minor are available in 1046 Pamplin Hall.

## **Minor in Business**

Students with majors outside Pamplin may apply for a minor in business if they have competitive grades in required courses, a minimum 2.0 overall GPA on at least 24 semester hours at Virginia Tech, if they have completed Math 1525-1526 or its equivalent, and if they have at least a C- in any ACIS, BIT, ECON, FIN, MGT, or MKTG, course which they have taken. The minor consists of 27 semester hours of lower division course work which must be successfully completed before taking the 15 semester hours of upper division courses. Applications are available in 1046 Pamplin.

The lower division requirements are ACIS 1504, Introduction to Business Information Systems; ACIS 2115-16, Principles of Accounting; BIT 2405-06, Quantitative Methods; ECON 2005-2006, Principles of Economics; and MATH 1525-26, Calculus with Matrices, and the upper division courses are: BIT 3414, Production and Operations Management, or BIT 4414, Service Operations Management; FIN 3055, Legal Environment of Business; FIN 3104, Introduction to Finance; MGT 3304, Management Theory and Leadership Practice; and MKTG 3104, Marketing Management. In order to complete the minor in business, students must have a 2.0 GPA in the 15 semester hours of upper division courses.

## **Real Estate Minor**

Sophomores, juniors, and seniors in any major with at least a 2.0 overall GPA and with a 2.0 average in any real estate minor courses already taken may apply for a real estate minor. Coordinated in Pamplin, this minor of 19 semester hours includes courses from five different colleges and is administered by a steering committee of faculty from those colleges. The 13 semester hours of required courses include: AAEC 4754 and 4764, Real Estate Law and Real Estate Appraisal; FIN 4154, Real Estate Finance or MKTG 4734, Real Estate Marketing; and UAP 4744, Principles of Real Estate (4 sem. hours). The additional two courses may be taken from a list of nine designated electives in AAEC, AHRM, BC, FIN, MKTG, and UAP. Pamplin College of Business students in the minor must take both FIN 4154 and MKTG 4734, and select one additional course. Applications are available in 1046 Pamplin Hall.

## **Business Diversity Minor**

The 18 credit Business Diversity Minor is open to students in all majors across the campus. This minor will help students understand the organizations in which they will work and the world in which they will live. It includes required courses in Management and additional course choices from Marketing Management, Hospitality & Tourism Management, Finance, and electives from 12 different departments across campus. In order to develop diversity-related awareness, knowledge, and skills, students are required to participate in a diversity-related internship or field study. To apply, students may obtain an application from 1046 Pamplin or on-line at [www.diversity.pamplin.vt.edu](http://www.diversity.pamplin.vt.edu). For more information, please contact Dr. Anju Seth at [aseth@vt.edu](mailto:aseth@vt.edu) or 540-231-6353.

## **Applied Business Computing**

The 18-19 credit Applied Business Computing minor is open to students in all majors across the campus. This minor will help students gain better understanding of the web and systems design. It includes courses in Accounting and Information Systems, Business Information Technology, Computer Science, and Engineering. To apply students may obtain an application from the ACIS department. For more information, please contact the ACIS department at 540-231-6591.

## **Cooperative Education Programs in Business**

The college participates in the Cooperative Education Program in which qualified students may alternate semesters of study in the major with semesters of professional employment. Additional information pertaining to the program is included in the "[Academics](#)" section of this catalog.

## **Graduate Programs in Business**

Graduate instruction and opportunities for research are offered to students who have bachelor's degrees from accredited colleges. The college offers the Master's of Business Administration, and master's and Ph.D. degrees in all departments. All graduate students are required to attain a satisfactory score on the Graduate Management Admission Test (GMAT).

## **Preparation for Law**

The four-year course leading to the B.S. degree in any major in the college provides a sound preparation for law school, and pre-law advisors from the Pamplin faculty are provided.

## Economics

Economics is offered as a major through both the Pamplin College of Business and the College of Science. Both an honors degree and a minor in economics are also offered in the College of Science. Students in either college take the same economics courses, but the college core requirements differ.

For economics faculty and course descriptions, visit [Economics in the College of Science](#).

## Our Mission

The Department of Accounting and Information Systems in the Pamplin College of Business strives for excellence in fulfilling the three missions of a comprehensive land grant university by:

- Improving the accounting and information systems professions by conducting quality research and disseminating the results;
- Providing a world class accounting and information systems education to our students; and
- Delivering outreach services to accounting and information systems professionals and educators.

The department seeks to fulfill the teaching mission through programs which include:

**Undergraduate Programs**, where we seek to

- *Prepare students to enter the accounting and information systems professions with the skills and knowledge of business, information systems, and accounting concepts and practices.*

**Masters of Accounting and Information Systems**, where we seek to

- *Prepare students for professional careers with specializations in taxation, information systems, audit, and financial services.*

**Ph.D. Program in Business with a major in Accounting and Information Systems**, where we seek to

- *Prepare students for academic careers in research and teaching.*

The Department of Accounting and Information Systems prepares students to become professionals in their chosen area of accounting and information systems. Faculty members in the department have chosen to specialize in selected areas of accounting or information systems and they teach and conduct research in these areas. All faculty members at the professorial ranks have Ph.D.s in accounting or information systems appropriate to the courses they teach, and many have professional certification in their areas of specialization. This faculty is committed to the education of accounting and information systems professionals who will be active participants in this information age.

The department's undergraduate program offers three options: Accounting (ACCT), Information Systems Audit (ISA), and Information Systems (ISO). These options are designed to allow students to specialize in their area of interest. Completion of the selected option prepares the student for entry level positions as professional accountants or information systems professionals who work in professional service firms, industrial companies, governmental entities, or to continue their education in graduate school. The job titles vary greatly and include auditor,

information systems auditor, programmer analyst, management accountant, tax preparer, systems consultant, systems analyst, controller, and cost analyst. The demand for our graduates has been strong throughout the department's history, and that demand is continuing.

Many graduates of our department desire to gain certification in their selected area of specialization. The Certified Public Accountant (CPA) is the best known of these certifications. Students taking the CPA exam in Virginia have to meet a 120-hour baccalaureate or higher degree requirement in order to sit for the CPA exam, but must have 150 credit hours to be certified. The requirements for other states vary; however, most now or soon will require students to meet the 150-hour educational requirement to be licensed. Students should discuss with their advisor the several options Virginia Tech provides for meeting this requirement at both the undergraduate and graduate level. In addition to the CPA exam, graduates of our programs sit for the Certificate in Management Accounting (CMA) exam, the Certified Internal Auditor (CIA) exam, the Certified Information Systems Auditor (CISA) exam, and others. Students planning to take one of these exams are advised to talk to their advisor during their junior year so that they may select the electives appropriate for the selected exam.

The department encourages its students to gain "real world" **experience** prior to graduation through an internship or by participating in the Cooperative Education Program. More information about these programs is available either from the department's faculty or Career Services.

The department also encourages **interaction with accounting and information systems professionals** by sponsoring three student organizations: Accounting Society; National Association of Black Accountants; and Beta Alpha Psi, the national honorary and professional society dedicated to the advancement of the accounting profession. These organizations and other campus groups provide multiple opportunities for developing leadership skills and interacting with accounting and information systems professionals.

The department encourages students to gain a **global perspective** of business through modules on international issues in our courses, by participation in the college's International Business Minor and/or by participating in one or more of the college's study abroad programs. Our goal is to encourage our students to become well-rounded professionals who will become leaders in their chosen careers.

Lastly, the department's over 6,500 alumni have generously contributed to a variety of scholarships for accounting and information systems majors. Each year the department awards over \$160,000 in scholarships and awards to our students.

## Course Requirements

Students graduating from the Department of Accounting and Information Systems **must have a minimum** quality credit average (GPA) of 2.00 in upper-division (3000 and 4000 level) accounting and information systems courses (the *in-major GPA*) as well as an overall GPA of 2.00 for all courses taken at Virginia Tech.

During their sophomore year, students must select one of the three options in the department: Accounting (ACCT), Information Systems Audit (ISA), and Information Systems (ISO). These options are more fully described below.

### Accounting Option (ACCT)

The Accounting option provides basic education for careers in public accounting, internal auditing, large and small corporations (controller's staff), governments (federal, state, and local) and their agencies, and nonprofit organizations. Graduates from this option are prepared to become CMAs, CIA, CPAs, and all of the other common professional accounting designations. Many of the students who select this option will continue into the Master of Accounting and Information Systems program.

The **Accounting Option (ACCT)** requires the following ACIS courses:

ACIS 1504: Introduction to Business Information Systems	(3)
ACIS 2115, 2116: Principles of Accounting	(6)
ACIS 2504: Personal Computers in Business	(3)
ACIS 3115-3116: Intermediate Financial Accounting	(6)
ACIS 3314: Tax Impact on Decisions	(3)
ACIS 3414: Auditing, Governance and Professional Ethics	(3)
ACIS 3504: Accounting Systems and Controls	(3)
ACIS 4114: Advanced Financial Accounting	(3)
ACIS 4214: Cost Planning and Control	(3)
ACIS 4314: Principles of Taxation	(3)
ACIS 4414: Financial Statement Auditing	(3)
ACIS 4504: Accounting Application Development	(3)

### Information Systems Audit Option (ISA)

The IS Audit option is designed to prepare students for careers as information systems auditors and information systems professionals in the areas of enterprise risk assurance services, computer risk management services, and other systems assurance services. These positions are available in organizations from all sectors of business: industry, professional service firms, consulting firms, government, and nonprofit organizations. This track prepares graduates to sit for the CIA, CISA, or other professional designations. The ACIS courses required in the IS Audit option are:

ACIS 1504: Introduction to Business Information Systems	(3)
ACIS 2115-2116: Principles of Accounting	(6)
ACIS 2504: Personal Computers in Business	(3)
ACIS 3115-3116: Intermediate Financial Accounting	(6)
ACIS 3314: Tax Impact on Decisions	(3)
ACIS 3414: Auditing, Governance, and Professional Ethics	(3)
ACIS 3504: Accounting, Systems & Controls	(6)
ACIS 4024: Information Systems Audit and Control	(3)
ACIS 4214: Cost Planning and Control	(3)
ACIS 4314: Principles of Taxation	(3)
ACIS 4414: Financial Statement Auditing	(3)
ACIS 4504: Accounting Application Development	(3)
ACIS 4534: Accounting Information Systems Architecture	(3)
ACIS 4684: Information Systems Security and Assurance	(3)

## Information Systems Option (ISO)

The Information Systems option (ISO) is designed to be flexible, thus allowing the student to focus on different areas of information systems. The flexibility is provided through the 12 hours of ACIS electives required in the program. Depending upon the electives selected, the student is prepared for careers as systems analysts, programmer analyst, database administrators, systems developers, and other information systems professionals. These positions are available with organizations from all sectors of business: industry, professional service firms, consulting firms, government, and nonprofit organizations. This option does not prepare graduates to sit for the CPA, CMA, or other traditional accounting designations.

The ACIS courses required in the Information Systems option are:

ACIS 1504: Introduction to Business Information Systems	(3)
ACIS 2115-2116: Principles of Accounting	(6)
ACIS 3515-3516: Information Systems Development	(6)
ACIS 4534: Accounting Information Systems Architecture	(3)
ACIS 3564: Management Information Systems or ACIS 5514 Management of Information Systems	(3)
ACIS 4514: Database Management Systems	(3)
ACIS 4524: Applied Software Development Project	(3)
ACIS 4554: Networks and Telecommunications in Business	(3)
ACIS 4684: Information Systems Security and Assurance	(3)
ACIS Electives	(15)

**Note:** CS 1054 Introduction to Programming in JAVA is required and should be taken during the Sophomore year.

## Undergraduate Course Descriptions (ACIS)

### 1504: INTRODUCTION TO BUSINESS INFORMATION SYSTEMS

This course provides an overview of business information systems and the software, hardware and data resources used by business organizations. Included is the development, integration and application of information systems components to solving business problems. Information systems security is discussed with emphasis on the role of the end user in making a system secure. Several common end-user software applications are introduced. (3H,3C)

### 1614 (BIT 1614) (CS 1614): INTRODUCTION TO LIVING IN THE KNOWLEDGE SOCIETY (LIKES)

Introduces computing concepts needed by students to live in the emerging Knowledge Society. Prepares students to take courses in the Curriculum for Liberal education that are part of the pathway with theme Living in the KnowlEdge Society (LIKES)- i.e., the LIKES themed core. Surveys key

paradigms of computing, including problem solving, programming, modeling and simulation, and software engineering. Relates these to the Knowledge Society covering data, information, and knowledge, considering hypermedia, human-computer interactions, presentation, visualization, networking, and communication. Students are prepared to understand the (potential) application of computing to society in general and in their disciplines. (1H,1C)

#### 2004: SURVEY OF ACCOUNTING

The fundamental concepts of financial and managerial accounting. Offered to students not enrolled in the College of Business. (3H,3C) 2115-2116: PRINCIPLES OF ACCOUNTING Comprehensive presentation of basic principles of financial and managerial accounting including origin, purpose, and effect with emphasis on application. Sophomore standing required. (3H,3C)

#### 2504: PERSONAL COMPUTERS IN BUSINESS

Focuses on the design and implementation of spreadsheet projects that support advanced decision-making and problem-solving techniques for professionals and individual business users. An introduction to programming logic is included to allow students to augment and automate spreadsheets. Students enrolling in this course are expected to be familiar with basic spreadsheet skills including spreadsheet navigation, managing multiple worksheets, formatting, formulas, and cell references. Pre: 1504. (3H,3C)

#### 2954: BUSINESS STUDY ABROAD

This course provides students with an international business experience. The course examines the accounting and information systems issues that impact the multinational business. It is only offered as part of a program outside of the United States. Students will learn from the structured educational experience developed by the faculty leader. Content will vary between semesters. Pre: Instructor's consent and the completion of 24 semester hours with a minimum GPA of 3.0 or departmental consent. May be repeated for a maximum of 9 credit hours. Variable credit course.

#### 3115-3116: INTERMEDIATE FINANCIAL ACCOUNTING

In-depth analysis of basic concepts of external financial reporting. Includes transaction analysis and preparation of financial statements. Pre: 2115 for 3115; 3115 for 3116. Co: 2504 for 3115. (3H,3C) 3314: TAX IMPACT ON DECISIONS An analysis of the impact of taxation on business and investment decisions, and the importance of effective tax planning. The course develops a conceptual framework that integrates tax and non-tax factors into decision models. Topics to be covered include basic tax planning strategies, tax policy, an overview of basic tax concepts and terminology, implicit taxes and tax clientele theory, choosing the optimal organizational form, multilateral tax planning in contexts such as executive compensation, and multi-jurisdictional tax issues. Pre: 2116. (3H,3C)

#### 3414: AUDITING, GOVERNANCE, AND PROFESSIONAL ETHICS

The purpose of this course is to introduce the accounting student to the interrelationships between auditing and corporate governance with an emphasis on the societal role of auditing, internal control and professional ethics. Enrollment limited to ACIS majors or with permission of instructor. Pre: 3115, (3504 or 3515). (3H,3C)

#### 3504: ACCOUNTING SYSTEMS AND CONTROLS

Examines system design concepts and methods including an understanding of basic control structures. Covers specific accounting cycles and computerized transaction processing systems. Analyzes controls for manual and computerized systems including database systems. Pre: 2116. Co: 2504. (3H,3C)

#### 3515-3516: INFORMATION SYSTEMS DEVELOPMENT

Study of the strategies and techniques for dealing with the inherent complexity in the development of information systems. Includes coverage of business systems planning; fact-finding and requirements analysis techniques; information systems modeling; logical and physical design; input and output design; user interface design; software construction and testing; software configuration management; and software quality assurance. Upper division clearance required. Pre: 1504, (CS 1054 or CS 1114 or CS 1124 or CS 1705) for 3515; 3515 for 3516. (3H,3C)

#### 3524: APPLICATIONS PROGRAM DEVELOPMENT

Emphasis on structured methodology of program design, development, testing, implementation, and documentation of common business-oriented applications. Includes coverage of sequential, indexed sequential, and random access files, and processing techniques and development of programs and systems of programs for batch and interactive environments. Pre: CS 1054. (3H,3C)

#### 3534: ACCOUNTING INFORMATION SYSTEMS DEVELOPMENT

Development of menu-driven accounting application software using database software. Emphasis is placed on understanding and programming various accounting subsystems such as inventory and accounts receivable, as well as the interface of these subsystems with the general ledger process. Appropriate editing, validation, and security techniques are incorporated into the system design to ensure data integrity. Coverage is provided of various commercial software packages including general ledger. Pre: 2116, CS 1054. (3H,3C)

#### 3544 (BIT 3544): MANAGEMENT OF INFORMATION SYSTEMS AND TECHNOLOGIES

The course provides the necessary background to enable management information systems personnel to understand tradeoffs in information systems hardware, software, and architecture for effective use in the business environment. Topics covered include information technology planning and strategy, trends in computer hardware and systems software, telecommunications and network management, control and management of information resources, distributed and client-server technologies, and data representation and visualization. Partially duplicates CS 1104. Pre: BIT 3444 or CS 1054. (3H,3C)

#### 3564: MANAGEMENT INFORMATION SYSTEMS

An overview of management information systems. Topics include the organizational foundations of information systems; the technical foundations of information systems; the approaches to building information systems; and the management of contemporary information systems. Pre: 1504, 2115, 2116. (3H,3C)

#### 3954: STUDY ABROAD

Variable credit course.

#### 4024: INFORMATION SYSTEMS AUDIT AND CONTROL

An introduction to the fundamentals of information systems auditing. Emphasis on information systems controls, types of information systems audits, and concepts and techniques used in information systems audits. Exposure to risk assessment and professional standards in the field of information systems auditing. Pre: 3504 or 3515. (3H,3C)

#### 4114: ADVANCED FINANCIAL ACCOUNTING

A continuation of a detailed analysis of the concepts of external financial reporting begun in 3115 and 3116. Includes transaction analysis and preparation of financial statements. Pre: 3116. (3H,3C) 4124: GOVERNMENTAL AND NONPROFIT ACCOUNTING An analysis of the environment and characteristics of government and nonprofit organizations, and an in-depth study of basic concepts and standards of financial reporting for such entities. Pre: 3115. (3H,3C)

#### 4194: ANALYSIS OF FINANCIAL STATEMENTS

Provide theoretical background and tools necessary to analyze financial statements from the perspective of making valuation and investment decisions. The focus of the course is on the use of accounting information in making these decisions. Pre: 3116 or FIN 3134. (3H,3C)

#### 4214: COST PLANNING AND CONTROL

The purpose of this course is to help the student develop an understanding of the role of accounting in the management process, an understanding of cost accounting systems, an understanding of cost behavior, an understanding of alternative accounting systems, and the usefulness of costs involved in non-routine decision-making. Pre: 2116, 2504. (3H,3C)

#### 4314: PRINCIPLES OF TAXATION

Survey of basic concepts of federal income taxation that are common to all types of taxpayers (i.e. individuals, corporations, and flow-through entities). Topics to be covered include tax policy objectives, tax accounting methods that affect the timing of income and expense recognition, concepts of gross income and trade or business expenses, income character, and tax issues associated with various property transactions. Pre: 3314. (3H,3C)

#### 4344: TAX FOR FINANCIAL PLANNERS

Overviews income tax concepts relevant to financial planning for individuals who are investors, employees, and business owners. Topics include income tax fundamentals for individuals, taxation of the sale of property, taxation of business entities, taxation of trusts, and overview of the federal transfer tax on estates and gifts. Duplicates some material in ACIS 4314. Course credit will not be awarded for both ACIS 4314 and ACIS 4344. Pre: FIN 3104. (3H,3C)

#### 4414: FINANCIAL STATEMENT AUDITING

Study of external financial statement auditing, professional code of conduct, audit evidence considerations, internal control, fraud, and transaction cycles, and audit reporting. II, IV Pre: 3414. (3H,3C)

#### 4444: FORENSIC ACCOUNTING

This course provides students experience in forensic accounting, commonly used computer forensic software, forensic techniques, litigation support, fraud risk management, fraud investigation, and the related audit tools. Pre: 3414. (3H,3C)

#### 4504: ACCOUNTING APPLICATION DEVELOPMENT

Utilizes current software tools to design and develop segments of accounting systems using database management techniques. Provides an understanding of relational databases, query languages, and web-based business processing. Includes exposure to latest relevant technology and software. Provides development knowledge of controls in accounting information systems. Pre: 3504. (3H,3C)

#### 4514: DATABASE MANAGEMENT SYSTEMS

Introduction to database management systems and their use in business. Topics covered include data modeling, normalization, SQL, transaction management and concurrency control, security issues, physical data organization, query optimization, hierarchical queries, distributed database management systems, object-oriented databases, client/server databases, multidimensional databases, data mining, data warehousing, and database administration. Pre: 3515. (3H,3C)

#### 4524: APPLIED SOFTWARE DEVELOPMENT PROJECT

Application of computer programming and system development concepts, principles, and practices to a comprehensive system development project. A team approach is used to analyze, design, and document realistic methods, project complexity. Use of project management methods, project scheduling and control techniques, formal presentations, walk throughs, and group dynamics in the solution of information systems problems. Pre: 3515 or 4514 or 4515. (3H,3C)

#### 4534: ACCOUNTING INFORMATION SYSTEMS ARCHITECTURE

Provides accounting and information systems audit students with basic computer hardware, operating systems software, and networking knowledge. Topics covered include data representation, processor, data storage, and input/output technology, computer networks, operating systems, storage management, and distributed applications. Pre: 3504 or 3515 or BIT 3424. (3H,3C)

#### 4554 (BIT 4554): NETWORKS AND TELECOMMUNICATIONS IN BUSINESS

This course provides an in-depth introduction to computer networks and data communications in business. Topics include mechanisms for reliable data transfer, local and wide area network topologies and technologies, and a comprehensive treatment of internetworking. The benefits, costs, and security issues related to using computer networks are discussed, along with network design issues, and methodologies for network applications. One semester of college-level programming experience required. Pre: 3504 or 3515 or BIT 3424. (3H,3C)

#### 4564 (BIT 4564): OBJECT-ORIENTED SYSTEMS DEVELOPMENT FOR BUSINESS

The course first develops the foundations and principles of object-oriented programming, including encapsulation, inheritance, polymorphism, and abstraction. These concepts are acquired via comprehensive hands-on experience with a current OOP language (such as Java). The second portion

of the course applies concepts learned to a business-oriented application, such as a web-based, e-commerce scenario. Pre: CS 1054, (ACIS 3515 or BIT 3444). (3H,3C)

**4584 (BIT 4584): CLIENT/SERVER APPLICATIONS DEVELOPMENT FOR BUSINESS**

Study of software tools and techniques for designing and developing client/server applications for business. Topics include the architectures of contemporary client/server development tools, client/server development methodologies, and business applications using the client/server paradigm. Pre: 4554 or BIT 4554. (3H,3C)

**4594 (BIT 4594): ELECTRONIC COMMERCE SYSTEMS**

Study of the design of implementation of computer systems on the Internet and world-wide-web used for electronic commerce. Emphasis of the course will be on understanding the numerous issues involved in using the Internet and web as tools for the production and distribution of goods and services. Topics will include basics of electronic commerce, security issues in financial and sensitive data transfer, unique aspects of business-oriented commerce such as supply-chain management in relation to consumer commerce, legal and international issues in electronic commerce, building and maintaining an electronic commerce website, and future trends in electronic commerce. Pre: BIT 3414. (3H,3C) I.

**4684: INFORMATION SYSTEMS SECURITY AND ASSURANCE**

An examination of the concepts, technologies, and applications of security and assurance in information systems. Topics include the security threats against information systems; tools used by intruders; computing platforms and security; encryption; securing the transaction and the server; audit tools to detect intrusions; responses to attacks; legal, ethical and international issues; and the future of information systems security and assurance. Pre: 4554 or BIT 4554. (3H,3C)

**4974: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

## **Overview**

The Department of Business Information Technology offers an undergraduate major in business information technology with options in computer-based decision support systems and operations and supply chain management. The department also offers and staffs business courses, including: quantitative models and methods in business, operations and supply chain management, and computer modeling and simulation in business. Business information technology (BIT) courses are listed below.

The department participates in the Cooperative Education Program in which qualified students may alternate semesters of study with semesters of professional employment.

## **Business Information Technology**

The curriculum in business information technology is designed to provide the student with expertise in the quantitative and technological aspects of management, specifically including the extensive use of computers for solving business problems and making managerial decisions. The name business information technology implies the application of scientific principles and techniques, mathematics, and computing to the management function with the objective of increased efficiency and productivity. Thus, the student of business information technology not only learns various quantitative techniques and models to apply to managerial problems, but also a logical and scientific approach to managerial decision-making. The curriculum provides training both for individuals interested in pursuing careers in business management and for individuals interested in pursuing graduate or professional degrees. Students majoring in business information technology may choose one of two options reflecting their particular career objectives and interests.

### **Option I - Computer-Based Decision Support Systems**

- This option educates the student in the design, implementation, and use of computerized information systems, decision support systems, and expert systems which support contemporary business managers in the decision-making process. Special emphasis is placed on increased productivity through the use of models, quantitative data, and techniques in the computerized decision support system. Training in Option I will enable graduates of this program to pursue careers in business and industry in which computer-aided decision-making is an essential component of the managerial function.

### **Option II - Operations and Supply Chain Management**

- This option educates students in the management of activities directly related to the creation and distribution of goods and services. The curriculum of Option II is designed to provide the student with expertise in the planning and control of business processes within a firm and across its global supply chain. Emphasis is placed on applying IT and process analysis skills to improve the quality and productivity of business firms and their supply chain partners. Graduates of this program will be prepared to pursue careers as operations managers, business process analysts, quality assurance specialists, supply chain specialists, and quality control, logistics, inventory and procurement managers in business, industry, and government.

## Requirements

In addition to fulfilling the college of business requirements for the first two years and the core upper-division business requirements, the students electing this major will take a series of commonly required courses and then select between two options of concentration:

<b>Required Courses:</b>	
CS 1054: Intro to Programming in Java	(3)
MGT 4394: Business Policy and Strategy	(3)
BIT 3424: Computer Modeling and Decision Analysis	(3)
BIT 3434: Advanced Management Science	(3)
BIT 3444: Advanced Business Computing and Appl.	(3)
BIT 4434: Computer Simulation in Business (option II only)	(3)
<b>Option I - Computer-based Decision Support Systems</b>	
<b>Required BIT Courses:</b>	
BIT 4444: Web-Based Decision Support Systems	(3)
BIT 4454: Business Analysis Seminar in IT	(3)
BIT 4514: Database Technology for Business	(3)
BIT 4524: Systems Development	(3)
BIT 4554: Networks and Telecommunications in Business	(3)
<b>Electives:</b>	
BIT 3454, 3464, 4434, 4464, 4474, 4534, 4544, 4564, 4574, 4584, 4594, 4614	
<b>Option II - Operations and Supply Chain Management</b>	
<b>Required BIT Courses:</b>	
BIT 3454: Quality & Process Improvement Methods	(3)
BIT 3464: Enterprise Planning & Control Systems	(3)
BIT 4464: Advanced Supply Chain Management	(3)
BIT 4474: Global Operations & Information Technology	(3)
BIT 4484: Project Management	(3)

## Undergraduate Course Descriptions (BIT)

### 1614 (ACIS 1614) (CS 1614): INTRODUCTION TO LIVING IN THE KNOWLEDGE SOCIETY (LIKES)

Introduces computing concepts needed by students to live in the emerging Knowledge Society. Prepares students to take courses in the Curriculum for Liberal education that are part of the pathway with theme Living in the KnowlEdge Society (LIKES)- i.e., the LIKES themed core. Surveys key paradigms of computing, problem solving, programming, modeling and stimulation, and software engineering. Relates these to the Knowledge Society, covering data, information, and knowledge, considering hypermedia, human-computer interaction, presentation, visualization, networking and communication. Students are prepared to understand the (potential) application of computing to society in general and in their disciplines. (1H,1C)

### 2405,2406: QUANTITATIVE METHODS

Study of quantitative techniques used in managerial decision-making. BIT 2405: Data collection, descriptive statistics, probability theory, and statistical inferential procedures. BIT 2406: Linear regression and correlation analysis, forecasting, mathematical modeling, and network models. Pre: ACIS 1504, (MATH 1525, MATH 1526) or (MATH 1015, MATH 1016, MATH 2015) or (MATH 1205, MATH 1206, MATH 1114) or (MATH 1205, MATH 1526) or (MATH 1016, MATH 1526) for 2405; 2405, (MATH 1525, MATH 1526) or (MATH 1205, MATH 1206, MATH 1114) or (MATH 1205, MATH 1526) or (MATH 1016, MATH 1526) or (MATH 1015, MATH 1016, MATH 2015) for 2406. (3H,3C)

### 2954: BUSINESS STUDY ABROAD

This course provides students with an international business experience. It is only offered as part of a program outside of the United States. Students will learn from the structured educational experience developed by the faculty leader. This course is intended for students who want to develop information technology or operations management related free electives. Pre: Instructor's consent and the completion of 24 semester hours with a minimum GPA of 3.0 or departmental consent. Variable credit course.

### 3414: OPERATIONS AND SUPPLY CHAIN MANAGEMENT

Study of the process directly related to the creation and distribution of goods and services. Increasingly, these operations are taking place outside the boundaries of a traditional enterprise. This course teaches students how to analyze processes, ensure quality, create value, and manage the flow of information, products and services across a network of customers, enterprises and supply chain partners. Pre: 2406. (3H,3C)

### 3424: COMPUTER MODELING AND DECISION ANALYSIS

Computer solution of topics introduced in BIT 2406. Includes computer solution and analysis of management problems using such techniques as

linear programming, goal programming, inventory, simulation, and information systems. Spreadsheet and database software will be used to solve these problems. Pre: 2406 or CS 1054 or CS 1114 or CS 1124 or CS 1705. (3H,3C)

#### 3434: ADVANCED MANAGEMENT SCIENCE

Study of selected, advanced topics in decision modeling and analysis. Emphasis on model formulation, solution techniques, interpretation of results and comprehensive approaches to problem-solving. Topics include various methods for modeling and optimization such as integer, goal, and nonlinear programming as well as network analysis and Markov analysis. Includes case studies and use of Excel as the primary analytical tool. Pre: 2406, 3424. (3H,3C)

#### 3444: ADVANCED BUSINESS COMPUTING AND APPLICATIONS

Study of selected advanced topics in business computing. Construction of business applications using an advanced application development environment such as Visual Studio.net. Coverage of computer terminology, HTML, and internet applications. The course builds computer literacy and strong programming skills. Junior standing required. Pre: 2406, 3424, CS 1054. (3H,3C)

#### 3454: QUALITY AND PROCESS IMPROVEMENT METHODS

This course examines the technical aspects of quality management for production operations, service operations and software systems development. Various data and information analysis techniques are developed using a high level business programming language. Quality assurance techniques for software development and analytical techniques for process improvement are emphasized. Pre: 3414. (3H,3C)

#### 3464: ENTERPRISE PLANNING AND CONTROL SYSTEMS

The study of the design, analysis and implementation of enterprise-wide resource planning and control systems. The course examines decision support models for production planning, master scheduling, inventory control, shop floor control and related topics in planning and control. The course emphasizes the application of information technologies such as ERP, MRPII, CIM to operations planning and control. Pre: 3414. (3H,3C)

#### 3544 (ACIS 3544): MANAGEMENT OF INFORMATION SYSTEMS AND TECHNOLOGIES

The course provides the necessary background to enable management information systems personnel to understand tradeoffs in information systems hardware, software, and architecture for effective use in the business environment. Topics covered include information technology planning and strategy, trends in computer hardware and systems software, telecommunications and network management, control and management of information resources, distributed and client-server technologies, and data representation and visualization. Partially duplicates CS 1104. Pre: (CS 1054 or BIT 3444). (3H,3C)

#### 3954: STUDY ABROAD

Variable credit course.

#### 4414: SERVICE OPERATIONS MANAGEMENT

A comprehensive study of the management of service operations, with particular emphasis on B2B (business to business) services. Topics include the service economy, service system design and delivery, service strategy, and decisions in support of service strategy, such as service quality, service innovation, service technologies, and the optimization of service resources. Pre: 3414, FIN 3104, MKTG 3104, MGT 3304. (3H,3C)

#### 4434: COMPUTER SIMULATION IN BUSINESS

In-depth study of the application of computer simulation techniques to business decision-making and process improvement. The theory of computer simulation and statistical analysis of results are included. Attention is focused on using simulation software stressing application to specific problems. Pre: 2406. (3H,3C)

#### 4444: WEB-BASED DECISION SUPPORT SYSTEMS

Study of current technologies for designing and constructing interactive, Internet-based systems for supporting business decisions. Topics may include the operation of the Internet, server-side programming, client-side programming, server-side scripting, XML, XHTML, database integration, COM, CGI, and others. Design issues will be explored through a class project. Pre: 3444. (3H,3C)

#### 4454: BUSINESS ANALYSIS SEMINAR IN IT

Comprehensive treatment of Decision Support Systems (DSS) as managerial tools, particularly in an e-commerce environment. Emphasis is at the builder and user level. A primary emphasis is on problem solving through the integration of various quantitative techniques as well as on IT concepts. The course includes a comprehensive project using state-of-the-art software. Pre: 3434, 4444, 4514, 4524. (3H,3C)

#### 4464: ADVANCED SUPPLY CHAIN MANAGEMENT

Advanced study of efficient methods for streamlining the production and delivery of products and services across functions, enterprises and global boundaries. Topics include the facilities, functions, technologies, and activities involved in creating and delivering products and services, especially in a digital marketplace. Designing and managing a network of suppliers across enterprises is discussed, along with the information systems, risk management and planning issues involved. Pre: 3414. (3H,3C)

#### 4474: GLOBAL OPERATIONS AND INFORMATION TECHNOLOGY

This course includes concepts and issues critical in the globalization of business operations and information technology. Topics covered include the organization of global operations, cultural and national comparisons, planning global operations, facilities location, product development, technology transfer, global communication links, trans-border data flow, international information systems, and other emerging operations and information technology issues. Pre: 3414. (3H,3C)

#### 4484: PROJECT MANAGEMENT

Study of efficient methods for planning and controlling projects. Topics include project management and scheduling tools, project quality assurance, risk and cost control, resource constrained scheduling, definition and requirements analysis, task integration, and managing alliances. The application of information technology to project management and control is emphasized throughout the course. Pre: 3414. (3H,3C)

#### 4494: NETWORK SIMULATION MODELING AND ANALYSIS IN BUSINESS

Analysis of business systems that can be modeled as networks. A language and software package such as SLAM (mainframe version) or SLAM System (PC version) will be used. A graphical menu driven network modeling system for the personal computer will be the primary simulation methodology emphasized, providing both a networking language capability and a programming interface capability. Extensive use will be made of both the network modeling feature and the program interface to build and analyze business simulation models. Pre: 2405, 3444, 3424. (3H,3C)

#### 4514: DATABASE TECHNOLOGY FOR BUSINESS

Study of the design of databases and data structures for supporting business. Topics include basic database structure and design, structured query language, database management systems, integration of backend database servers, data warehousing and mining, on-line analytical processing, and database application, security, and management. Pre: 3424, 4524. (3H,3C)

#### 4524: SYSTEMS DEVELOPMENT

Study of the current technologies for designing and developing computer-based business systems. Topics will include process, logic, and conceptual data modeling methodologies such as Uniform Modeling Language (UML) and important design-related issues such as data flows and system capabilities. Design issues will be explored through class projects. Pre: 3424. (3H,3C)

#### 4534: VISUAL INTERFACE DESIGN FOR DECISION SUPPORT

Study of the design of visual user interfaces for computerized decision support systems in a business context. Primary emphasis is upon the Windows desktop development environment, but emerging trends in hardware and software affecting interface design are covered as well. Course includes several interface design projects implementing the concepts learned. Pre: 3444 or ACIS 2504. (3H,3C)

#### 4544: ARTIFICIAL INTELLIGENCE FOR DECISION SUPPORT

Study of key artificial-intelligence techniques and their role in decision making in the business context. Primary emphasis is upon knowledge-based systems and neural networks, but fuzzy logic concepts and genetic algorithms are covered as well. Course includes a major software project implementing concepts learned. Pre: 3444 or ACIS 2504. (3H,3C)

#### 4554 (ACIS 4554): NETWORKS AND TELECOMMUNICATIONS IN BUSINESS

This course provides an in-depth introduction to computer networks and data communications in business. Topics include mechanisms for reliable data transfer, local and wide area network topologies and technologies, and a comprehensive treatment of internetworking. The benefits, costs, and security issues related to using computer networks are discussed, along with network design issues, and methodologies for network applications. One semester of college-level programming experience required. Pre: 3424 or ACIS 3515 or ACIS 3504. (3H,3C)

#### 4564 (ACIS 4564): OBJECT-ORIENTED SYSTEMS DEVELOPMENT FOR BUSINESS

The course first develops the foundations and principles of object-oriented programming, including encapsulation, inheritance, polymorphism, and abstraction. These concepts are acquired via comprehensive hands-on experience with a current OOP language (such as Java). The second portion of the course applies concepts learned to a business-oriented application, such as a web-based, e-commerce scenario. Pre: CS 1054, (ACIS 3515 or BIT 3444). (3H,3C)

#### 4574: ADVANCED NETWORKING FOR BUSINESS

Study of advanced concepts and techniques for distributed computer networking and data communications in business. Topics may include new developments in both wired and wireless networking technologies, network planning and design, network security, and network management and disaster planning. Pre: 4554 or ACIS 4554. (3H,3C)

#### 4584 (ACIS 4584): CLIENT/SERVER APPLICATIONS DEVELOPMENT FOR BUSINESS

Study of software tools and techniques for designing and developing client/server applications for business. Topics include the architectures of contemporary client/server development tools, client/server development methodologies, and business applications using the client/server paradigm. Pre: 4554 or ACIS 4554. (3H,3C)

#### 4594 (ACIS 4594): ELECTRONIC COMMERCE SYSTEMS

Study of the design and implementation of computer systems on the Internet and world-wide-web used for electronic commerce. Emphasis of the course will be on understanding the numerous issues involved in using the Internet and web as tools for the production and distribution of goods and services. Topics will include basics of electronic commerce, security issues in financial and sensitive data transfer, unique aspects of business-oriented commerce such as supply-chain management in relation to consumer commerce, legal and international issues in electronic commerce, building and maintaining an electronic commerce website, and future trends in electronic commerce. Pre: 3414. (3H,3C) I.

#### 4614: INFORMATION SECURITY

Study of policies, procedures, and technologies for enhancing the security of information. Topics include physical security, communications security, emissions security, computer security, and network security. The core security goals of confidentiality, integrity, and availability are emphasized throughout the course. Pre: 4554 or ACIS 4554. (3H,3C)

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

## **Overview**

Finance is a specialty that works with the development, allocation and use of monetary resources within established legal and ethical frameworks, while understanding and mitigating the associated risks. Money is a critical component of the economic system and its flow is the sustaining force of the U.S. and global economy. Therefore, in working with how governments, corporations, intermediaries, and households utilize their financial assets finance professionals are an integral part of how the economy perpetuates the standard of living that we enjoy.

Traditionally there are three separate but related fields within finance: 1) corporate financial management or “business finance” which focuses on the internal decisions of companies to raise funds and invest in corporate assets; 2) investment management which focuses on the purchase and sale of stocks and bonds or their derivatives by individuals and institutions; and 3) financial services management, which focuses on the management and regulation of institutions and the role that financial institutions play in the economy.

The undergraduate program in Finance meets the requirements of students who desire specialized careers in financial management. Students gain expertise in both accounting and finance, essential for success as a financial professional. The case-oriented focus of coursework requires students to apply their knowledge and strengthen their oral and written communication skills. The department offers specializations in (i) Corporate Financial Management, (ii) Investment Management and the CFA® (Chartered Financial Analyst) program, based on the CFA® curriculum as recognized and approved by the CFA Institute, (iii) Financial Services Management, (iv) Financial Accounting, and (v) Certified Financial Planner (CFP®) program with approval of CFP Board of Standards. Students also have the opportunity to participate in student management funds focused on investments in bonds (BASIS) and in stocks (SEED).

The curriculum offers courses in finance, insurance, and business law, but a major only in finance.

## **Requirements**

Students electing this major will take a series of commonly required courses required by the college and the university.

In addition, Finance majors are required to take the following courses in their Junior and Senior years:

FIN 3134: Finance Concepts and Skills

FIN 3144: Investments: Debt, Equity and Derivatives

FIN 3154: Corporate Finance

ACIS 3115: Intermediate Financial Accounting or ACIS 4194: Financial Statement Analysis

ACIS 2504: Personal Computers in Business

Plus Finance electives depending on their specialization

Students are able to choose their electives from the following courses offered by Finance and ACIS. FIN 4244, FIN 4254, and FIN 4274 are approved Writing Intensive courses.

FIN 4224: Fixed Income Securities: Analysis and Management  
FIN 4234: Venture Capital and Investment Banking  
FIN 4244: Asset Valuation and Corporate Governance  
FIN 4254: Bank Management and Financial Services  
FIN 4264: Managing Risk with Derivatives  
FIN 4274: Equity Securities: Analysis and Management  
FIN 4144: International Financial Management  
FIN 4154: Real Estate Finance  
ACIS 3116: Intermediate Financial Accounting  
ACIS 3314: Tax Impact on Decisions  
ACIS 3215: Cost Accounting  
ACIS 4214: Cost Planning and Control  
FIN 3164: Careers in Finance (1 credit, P/F only)

Students select different combinations of elective courses to fulfill the requirements of one or more of the five tracks offered. The six tracks are: Investment Management and CFA®, Corporate Financial Management, Financial Services Management, Financial Accounting, CFP®track, and General Finance.

Requirements for different tracks:

<b>Investment Management and CFA® Track:</b>	Select FIN 4224, FIN 4264, FIN 4274, and FIN 4144.
<b>Corporate Financial Management Track:</b>	Select FIN 4234, FIN 4244, FIN 4264, and FIN 4144.
<b>Financial Services Management Track:</b>	Select FIN 4254, FIN 4264, and FIN 4144. Select either FIN 4224 or FIN 4234.
<b>Financial Accounting Track:</b>	Select ACIS 3116 and [ACIS 3314, ACIS 3215 or ACIS 4214] and two Finance courses from the elective courses with at least one being an in-major WI approved course.
<b>CFP® Certification Education Track:</b>	Select FIN 3204 (Risk and Insurance), FIN 4004 (Wills, Trusts, and Estates), ACIS 4344 (Tax for Financial Planners), AAEC 3104 (Financial Planning for Professionals), AAEC 4104 (Retirement Planning), AAEC 4124 (Client Relationship Management), and AAEC 4134 (Financial Planning Applications), and one of FIN 4254 and FIN 4274.
<b>General Finance Track:</b>	Select 12 Semester Hours from the Elective courses. At least 6 hours must be Finance courses with at least one being an in-major WI approved course.

## Undergraduate Course Descriptions (FIN)

### 2954: BUSINESS STUDY ABROAD

This course provides students with an international business experience. It is only offered as part of a program outside of the United States. Students will learn from the structured educational experience developed by the faculty leader. Pre: Instructor's consent and the completion of 30 SH with a minimum GPA of 3.0 or departmental consent. Variable credit course.

### 2974: INDEPENDENT STUDY

Variable credit course.

### 3055-3056: LEGAL ENVIRONMENT OF BUSINESS

Examines the legal environment in which businesses operate, specifically addressing both private law involving the relationships between individual businesses and public law involving the legal relationship between businesses and society. Junior standing

required. (3H,3C) I,II,III.

#### **3064: LEGAL ENVIRONMENT OF BUSINESS FOR ACCOUNTANTS**

Examines the legal environment in which businesses operate, specifically addressing both private law involving the relationships between individual businesses, and public law involving the legal relationship between businesses and society. The course is geared specifically for accounting students who will take the CPA exam. Junior standing required. Pre: 3055. (3H,3C) II.

#### **3104: INTRODUCTION TO FINANCE**

Overview of financial decision-making process focusing on the creation of wealth. Topics covered include the time value of money, how stocks and bonds are valued, financial decision-making within a firm, an overview of financial markets, and investment banking. The course is designed for finance and non-finance majors. Junior standing required. Pre: ACIS 2115 or ACIS 2004. (3H,3C) I,II,III,IV.

#### **3134: FINANCE CONCEPTS AND SKILLS**

Key concepts and computational skills in finance. Time value of money, risk and return, and the basics of capital investment, security valuation and interest rate determination. Junior standing required. Pre: ACIS 2115 or ACIS 2004. Co: ACIS 2504. (3H,3C)

#### **3144: INVESTMENTS: DEBT, EQUITY AND DERIVATIVES**

Risk, return and portfolio theory, knowledge of financial securities and markets. Introduction to mutual funds, financial securities and markets, portfolio analysis, market efficiency and performance evaluation, bond valuation, term structure of interest rates, interest rate risk, security analysis and stock valuation, options, Black-Scholes option pricing model, and futures. Must have a grade of C or better in prerequisite of FIN 3134, and Junior standing required. Pre: 3134. (3H,3C)

#### **3154: CORPORATE FINANCE**

Types of financial management decisions that firms make, the environment in which decisions are made, the available choices and decision criteria, and valuation consequences of these choices. Determination of a firm's optimal debt- equity ratio, estimation of cost of capital, evaluation of capital investments, dividend policy, and sources of financing. Must have a grade of C or better in prerequisite of FIN 3134, and Junior standing required. Pre: 3134. (3H,3C)

#### **3164: SURVEY OF FINANCE AND CAREER PLANNING**

Career opportunities and job search strategies in the finance field with ties to the finance courses that best help the student identify a career in his/her selected field. Junior standing required. (1H,1C)

#### **3204: RISK AND INSURANCE**

Surveys the concept of risk as it applies to the nuclear family and as a socio-economic force in society. Risk management techniques utilizing social and proprietary insurance to neutralize the effect of risks inherent in daily life: termination or suspension of earnings, liability exposures, and potential losses of real and personal property values. Junior standing required. (3H,3C) I,II,III.

#### **3304: SURVEY OF INVESTMENTS**

Examines the basic principles and concepts in investing with emphasis on investment decisions of the individual investor. Coverage of the financial environment, financial instruments, risk and return, portfolio management and performance evaluation. Not available for credit for business majors. Junior standing required. (3H,3C) I,II.

#### **3954: STUDY ABROAD**

Variable credit course.

#### **4004: WILLS, TRUSTS, AND ESTATES**

Examines the control of assets through the creation and use of trusts, and the control of property through estate planning. The course emphasizes financial planning through estate management both personally and as a part of a business plan. Pre: 3055. (3H,3C)

#### **4014: INTERNET, ELECTRONIC AND ONLINE LAW**

Study of the international legal environment and regulation of the electronic world, including electronic commerce, computer and media communication issues, and speech over the Internet. Webpage design, copyright, electronic payment, electronic contract, encryption, and privacy are some issues to be examined. Topics will be updated continually to reflect the newest developments of the law as applied to the electronic world of commerce. Pre: Junior/Senior standing or consent of instructor. (3H,3C)

#### **4024: LEGAL ASPECTS OF A DIVERSE WORKPLACE**

Examines the history and evolution of law of the workplace. Employee rights, equal employment, and affirmative action in the areas of age, sex, race, religion, national origin, and disability are viewed in the context of an increasingly diverse workplace. Case law and case studies are emphasized. Specific statutes covered include, among others, Title VII of the 1964 Civil Rights Act and the Americans with Disabilities Act. Pre: 3055. (3H,3C)

#### **4144: INTERNATIONAL FINANCIAL MANAGEMENT**

Explores the environmental challenges facing the financial manager of a multinational corporation and the tools and techniques developed to meet such challenges. Pre: 3104. (3H,3C) II.

#### **4154: REAL ESTATE FINANCE**

This course introduces the fundamentals of both real estate financing and investment. Conventional mortgages as well as more creative financing methods will be analyzed. The secondary market for mortgages and relevant institutional factors also will be examined. Investment analysis of real estate will be viewed in a capital budgeting framework; appropriate tax law will be discussed as it affects real estate cashflows. Pre: 3104. (3H,3C) II.

#### **4224: FIXED INCOME SECURITIES: ANALYSIS AND MANAGEMENT**

Analysis of fixed income securities, including corporate bonds, U.S. Treasury notes and bonds, municipal bonds, money market securities, and home mortgages. The analysis include interest rate risk, credit risk, bond valuation theory, and the valuation of embedded options in the bond contract. Theories of the term structure of interest rates are presented. Must have a grade of C or better in prerequisites of FIN 3144 and 3154. Pre: 3144, 3154. (3H,3C)

#### 4234: VENTURE CAPITAL AND INVESTMENT BANKING

Explores the venture capital cycles of fund-raising, investing in portfolio firms, and exiting the investment. Focuses on the role of investment banking in the exiting of investments by taking the portfolio firms public through initial public offerings. Includes a conceptual component and an applied component in which the case method is used. Must have a grade of C or better in prerequisites of FIN 3144 and 3154. Pre: 3144 or 3144, 3154 or 3154. (3H,3C)

#### 4244: ASSET VALUATION AND CORPORATE GOVERNANCE

The effect of corporate governance on asset-valuation. Case oriented course focusing on the valuation of non-financial assets such as projects, business units, private and public firms. Topics include method of comparables, discounted cash flow methods and the real options approach to valuation. Examines the external and internal governance mechanisms for preserving and enhancing the value of a firm. Must have a grade of C or better in prerequisites of FIN 3144 and 3154. Pre: 3144, 3154. (3H,3C)

#### 4254: BANK MANAGEMENT AND FINANCIAL SERVICES

The functions of financial service providers and the risks inherent in the provision of banking and other financial services. Regulatory background and issues. Case oriented course. Must have a grade of C or better in prerequisites of FIN 3144 and 3154. Pre: 3144, 3154. (3H,3C)

#### 4264: MANAGING RISK WITH DERIVATIVES

The types, payoff, and pricing of derivative securities and contracts and their application in managing financial risks faced by corporations. Topics include options, forwards, futures and swaps; managing foreign currency risk, interest rate risk, stock price risk, and commodity price risk; and risk management techniques. Must have a grade of C or better in prerequisites of FIN 3144 and 3154. Pre: 3144, 3154. (3H,3C)

#### 4274: EQUITY SECURITIES: ANALYSIS AND MANAGEMENT

Advanced valuation and analysis of equity securities with case applications. Critical analysis of advanced equity asset pricing models. Analysis of advanced equity portfolio management techniques, equity portfolio performance measurement, and equity portfolio performance attribution analysis. Identification and analysis of market anomalies and recent developments in equity analysis. Must have grade of C or better in prerequisites of FIN 3144 and 3154. Pre: 3144, 3154. (3H,3C)

#### 4284: FREE MARKETS, INDIVIDUAL FREEDOM, AND ECONOMIC WELFARE

Course exposes students to various viewpoints on the role free markets can and do play in promoting individual freedom. Allocation of scarce resources, and in enhancing welfare. Explores the strengths and weaknesses of capitalism by critically evaluating the relationship between the economic efficiency achieved by capitalism and the attainment of welfare objectives. Other topics include current items such as globalization, price controls, income equality, outsourcing, corporate pricing power though monopoly/oligopoly, and government regulation of the economy. Pre-requisite: Senior standing and permission of the instructor. (3H,3C)

#### 4614: ADVANCED TOPICS IN FINANCE

Study of advanced topics in finance. This course will consist of timely, in-depth analyses of advanced, contemporary topics of interest in corporate finance, investments, or capital markets. The course may be taken twice with different topics. Junior/senior standing and the consent of the instructor is required. Pre: 3104. (3H,3C)

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

#### 4994H: UNDERGRADUATE RESEARCH

Variable credit course.

## Overview

Choosing a career in the hospitality field means becoming involved in one of the nation's largest industries. The opportunities for employment are broad in scope, and graduates are actively recruited each year by numerous hospitality firms. Management positions are available with hotels, motels, restaurants, contract food service companies, convention bureaus, private clubs, travel and tourism organizations, resorts, theme parks, and corporations. The most important qualities necessary for success in this field are an interest in management, enjoyment in working with people, and the drive to meet the challenges of this dynamic industry.

This major is designed to prepare business students for successful careers in the Hospitality and Tourism Industries. The program core courses focus on hospitality operations and advanced applications of business principles and strategies to the unique challenges of hospitality and tourism management. Students can choose areas of emphasis in Hospitality Operations Management, Restaurant and Food Management, Meetings and Event Management, Global Tourism Management, and Club and Resort Management. The curriculum includes substantive work experience requirements through internships in the industry. Many students work with the Inn at Virginia Tech and Skelton Conference Center on campus or with other hospitality firms throughout Virginia, the USA, and, in some cases, in foreign countries. Study abroad and work experience opportunities exist in England, Australia, Switzerland, the Dominican Republic, and Mexico.

In addition to fulfilling the college of business requirements for the first two years and the core upper-division business requirements, each student must meet the following course requirements and a total of 125 semester hours to graduate:

HTM 3414 Purchasing, Production and Management	(4)
HTM 3444 Financial Mgt. & Cost Control for Hospitality Org.	(3)
FIN 3055 Legal Environment in Business	(3)
HTM 3524 Lodging Management	(3)
HTM 4414 Food and Beverage Management	(3)
HTM 4464 Human Resource Management in the Hospitality Industry	(3)
HTM 4964 Field Study	(3)
<b>Plus 6 hours of the following– 3 hours must be at the 3000 level or above:</b>	
HTM 2434 Hospitality Sales	(3)
HTM 2454 Travel & Tourism Management (satisfies Area 7)	(3)
HTM 2464 Introduction to Service (fulfills 2nd Social Science course)	(3)
HTM 2474 Intro to Meeting and Convention Management	(3)
HTM 2514 Catering Management	(3)
HTM 2954 Study Abroad	(3)
HTM 2964 Field Study	(3)

HTM 3044 Private Club Management	(3)
HTM 3114 Special Topics	(3)
HTM 3454 Tourism Analysis	(3)
HTM 3464 Hospitality & Tourism Research Methods I	(3)
HTM 3474 Hospitality Facilities Planning and Management	(3)
HTM 3484 Socio-Cultural Impacts of Tourism (satisfies Area 3)	(3)
HTM 3954 Study Abroad	(3)
HTM 4424 Events Management	(3)
HTM 4444 Winery Tourism	(3)
HTM 4454 Hospitality Management	(3)

A sequence of 2 foreign language courses is required for graduation unless 2 high school credits of the same foreign language or 6 transfer hours credit of foreign language have been earned. These credits do not count toward graduation.

## Satisfactory Progress

Prior to enrolling in junior business courses, students must have earned at least 60 semester hours; have a GPA of 2.0 or better in the combined series in MATH, ACIS, BIT, and ECON courses with no grade lower than a C- in any of these courses; and have a cumulative GPA of 2.0 or better for all coursework. To graduate, students must have an overall GPA of at least 2.0 and an in-major GPA of at least 2.0.

## Undergraduate Courses (HTM)

### 1414: INTRODUCTION TO HOTEL, RESTAURANT, AND INSTITUTIONAL MANAGEMENT

Management in the hospitality industry, its scope, forms of organization, and professional opportunities. (3H,3C) II.

### 2434: HOSPITALITY SALES

A comprehensive study of the management of the sales function and its role in the overall financial performance of hospitality operations. (3H,3C)

### 2454: TRAVEL & TOURISM MANAGEMENT

Survey of travel and tourism in the United States and abroad with a focus on terminology, demographics, economic, socio-cultural and environmental impacts of tourism and travel, and the industry's management issues in a global context. (3H,3C)

### 2464: INTRODUCTION TO SERVICE

An overview of the service industry, history, current status, and future trends. Emphasizes the unique characteristics and operations of service organizations. (3H,3C)

### 2474: INTRODUCTION TO MEETINGS & CONVENTION MANAGEMENT

A study of the meetings and convention industry. Focus on the components and processes involved in developing and conducting meetings and conventions. (3H,3C)

### 2514: CATERING MANAGEMENT

Introduces students to various venues in which catering services can be offered, and presents an overview of the functions, processes, and controls found in successful catering management and operations; emphasis is placed on the sales/marketing aspects of the business. (3H,3C)

### 2954: HOSPITALITY AND TOURISM STUDY ABROAD

This course provides students with an international hospitality and tourism management business experience. It is only offered as part of a program outside the United States. Students will learn from the structured educational experience developed by the faculty directing the study abroad program. This course can be taken twice for a maximum of six credit hours. Sophomore standing and a minimum GPA of 3.0 required. (3H,3C)

### 2964: FIELD STUDY

X-grade allowed. (3H,3C)

### 2974: INDEPENDENT STUDY

Variable credit course.

### 2984: SPECIAL STUDY

Variable credit course.

### 3114: SPECIAL TOPICS IN HOSPITALITY AND TOURISM STUDIES

Variable content that addresses timely and complex issues of the hospitality and tourism industry from a variety of disciplines or intellectual domains. This course provides HTM students with knowledge that is not formally part of the curriculum. Students will learn from the structured learning experience and knowledge domain developed by the faculty offering the course. May be repeated up to five times, for a maximum of 15 credit hours with different content. Pre: 1414 or 2454 or 2464. (3H,3C)

### 3414: PURCHASING, PRODUCTION, AND MANAGEMENT

Purchasing, preparation, service, and management of a large quantity food service operation. X-grade allowed. (2H,6L,4C)

#### 3444: FINANCIAL MANAGEMENT AND COST CONTROL FOR HOSPITALITY ORGANIZATIONS

The application of accounting, finance, and cost control principles to hospitality industry organizations. The focus of this course is to provide future food service and lodging organization managers with the ability to handle the unique problems regarding financial analysis and cost control in this industry. Co: FIN 3104. (3H,3C) I,II.

#### 3454: TOURISM ANALYSIS

Different aspects of tourism, including origin and destination flow models, tourism destinations and their attractiveness, impacts of tourism, tourist profiles and destination decisions, demand/supply interaction, and barriers to travel are explored and analyzed. (3H,3C)

#### 3464: HOSPITALITY AND TOURISM RESEARCH METHODS

I An introduction to the various research methods and techniques which would be most appropriate in the analysis of problems in the hospitality field. The basic concepts of the scientific process and the foundation of research, research design, data collection techniques, sampling issues, statistical techniques and the analysis and reporting of data will be studied. Pre: STAT 2004 or BIT 2405. (3H,3C)

#### 3474: HOSPITALITY FACILITIES PLANNING AND MANAGEMENT

Layout and design for efficient management of hospitality facilities. Organization and management of a facilities maintenance system and preventive maintenance and energy management programs. Junior Standing. Pre: 3414. (3H,3C) I,II.

#### 3484: SOCIO-CULTURAL IMPACTS OF TOURISM

A study of both historic and current socio-cultural impacts of tourism on family, community, culture, government, and the environment. The course examines the ways in which tourism has both affected and been affected by modern society worldwide. (3H,3C)

#### 3524: LODGING MANAGEMENT

Organization, function, and management of lodging operations. Current issues and management challenges in the lodging industry. Applications of revenue management to lodging systems. Pre-requisite: Junior standing in the Pamplin College of Business. (3H,3C)

#### 3534: LEGAL ASPECTS OF HOTEL, RESTAURANT, AND INSTITUTIONAL MANAGEMENT

Examination of laws and regulations which exert control on the food service and lodging industry. The focus of the course is preventive legal management with major emphasis placed upon recent litigation. (3H,3C) I,II.

#### 3954: HTM STUDY ABROAD

This course provides students with an international hospitality and tourism management business experience. Students will be required to apply their knowledge and skills from their Pamplin College of Business core courses within this course. Students will learn from the structured educational experience developed by the faculty directing the study abroad program. Pamplin College of Business majors must have been approved for upper division course- work. Variable credit course.

#### 4414: FOOD AND BEVERAGE MANAGEMENT

Organization, administration, and operation of food service operations. Opportunity is provided for administration of the departmental cafeteria. X-grade allowed. Pre: 3414. (3H,3C) I,II.

#### 4424: EVENTS MANAGEMENT

Management of special events in the hospitality and tourism industry. Students will explore organizational functions necessary for producing special events, as well as analyzing the factors that influence an event's success, such as organizational structure, risk management and the impact of tourism activity. Junior standing in HTM is required. (3H,3C)

#### 4444: WINERY TOURISM

The course focuses on the role of wine and wineries in tourism, wine marketing and management in the hospitality industry, and examines the components of a winery. Students must be 21 years of age due to the inclusion of wine tasting in the course. (3H,3C)

#### 4454: HOSPITALITY MARKETING MANAGEMENT

Application of marketing principles and practices for the specialized needs of the hospitality industry. Pre: MKTG 3104 or MKTG 3104H. (3H,3C) I,II.

#### 4464: HUMAN RESOURCES MANAGEMENT IN THE HOSPITALITY INDUSTRY

An overview of the concepts of human resources management as applied to the specific environments within the hospitality industry. Pre: MGT 3304. (3H,3C) I,II.

#### 4534: HOSPITALITY MANAGEMENT POLICY

Integrates business principles and practices related to hospitality management. Cases involving hospitality industry organizations are analyzed extensively. Senior standing required. Pre: 3444, 3524. Co: 4414, 4464, 4454. (3H,3C) I,II.

#### 4604: SEMINAR IN HOTEL, RESTAURANT AND INSTITUTIONAL MANAGEMENT (1H,1C)

#### 4964: FIELD STUDY IN HTM

X-grade allowed. Pre: (3414, 3524) or (3414, 3444) or (3254, 3444). (3H,3C)

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4984: SPECIAL STUDY

Variable credit course.

4994: UNDERGRADUATE RESEARCH

Variable credit course.

## **Overview**

The curriculum in Management is a solid foundation for a wide variety of future business careers. It is unique within the Pamplin College of Business because it fosters an integrated perspective of business enterprises. Course work in the traditional functional areas (accounting, operations, finance, marketing, information technology) is coupled with a choice of one of two Management nine-hour options: I) Entrepreneurship, Innovation and Technology Management, or II) Human Resource Management. Students in Management are also eligible to participate in the Department of Management's Leadership minor and Business Diversity minor.

Our curriculum emphasizes the development of versatile skills that are essential to achieve organizational goals: cross-functional thinking, analytical problem-solving, leadership, team work, communication skills, and ethical decision-making.

The capability to manage across functions is of paramount importance in the modern-day business enterprise. Our curriculum enables students to understand how the separate business functions can be integrated to achieve a single, coordinated effort, especially in complex, technologically-based enterprises.

Tomorrow's managers must be able to lead themselves, other individuals, and teams. Students are exposed to state-of-the-art ideas and practices regarding leadership, and are given multiple opportunities to develop their interpersonal skills while applying this knowledge in team projects. Because effective communication is an essential component of organizational leadership, strong emphasis is placed on development of written and oral communications skills.

Increasingly in the modern business world, organizational success depends upon actions taken in situations requiring complex ethical judgments. Therefore, a concern for ethics is infused in courses throughout the Management curriculum.

In addition to fulfilling the Pamplin College of Business requirements for the first two years and the college core course requirements, all Management majors must: 1) meet these specific Management major course requirements, and 2) choose one of two options of concentration.

### ***Required Courses:***

ACIS 2504: Personal Computers in Business

MGT 3324: Organization Behavior

MGT 3334: Introduction to Human Resource Management

MGT 4334: Ethical Leadership and Corporate Social Responsibility

MGT 4344: Productivity and Quality Leadership

**Option I: Entrepreneurship, Innovation & Technology Management**

*This option prepares students to take an entrepreneurial approach to managing in any organizational context, including large organizations as well as new startups. It is also suitable for students who intend to run their own businesses. Three additional courses are required for those students selecting this option:*

MGT 3604: E-Management: Concepts and Skills

MGT 4064: Innovation, Technology and Entrepreneurial Leadership

MGT 4074: Applied Small Business Consulting

**Option II: Human Resource Management**

*The purpose of the track is to provide general managers with the knowledge and skills necessary to systematically manage people and human resource processes to help to achieve group and organizational effectiveness. The coursework provides a foundation for students interested in pursuing either general management or human resource management careers. Three additional courses are required for those students selecting this option:*

MGT 3344: Labor-Management and Employee Relations

MGT 3424: Human Resource Staffing and Development

MGT 4414: Compensation and Performance Management

## **Leadership Minor**

The Leadership minor provides a multi-disciplinary, experiential background in the history, values, skills and theory of leadership. It provides the student with the opportunity to tailor his/her leadership education and experience to personal and career needs.

The curriculum consists of eighteen (18) credit hours of study, including six (6) hours of electives and three (3) hours of experiential activity.

**Required Courses**

MGT 3304: Management Theory and Leadership Practice

MGT 4334: Ethical Leadership and Corporate Social Responsibility

MGT 4354: Leadership: Advanced Skills and Concepts

**Elective Courses**

Students may select six (6) credit hours of electives from the following areas, according to their interests:

*Global/Multicultural Perspectives:*

SOC 2024: Minority Group Relations

SOC 3614: Gender and Work in the U.S.

MGT 4314: International Management

*Communication Skills:*

COMM 3124: Interpersonal Communication

HUM/COMM 3204: Multicultural Communication

**Experiential Activity**

An experiential activity may take the form of a formal three-credit course or an independent study which offers significant leadership and/or service experience consistent with the goals of the minor.

## **Business Diversity Minor**

The Business Diversity Minor provides students with an informed perspective of diversity issues prevalent in the workplace. Students will learn how to manage a diverse workforce with increased awareness, knowledge, and skills while also learning about the business case for diversity.

**Required Courses**

Must take both courses:

MGT 3434: Diversity in the Workplace: Issues for Individuals

MGT 3444: Diversity in the Workplace: Issues for Organizations

**Additional Courses**

Select one of the following:

HTM 3484: Socio-cultural Impacts of Tourism

MKTG 4644: Marketing, Society and the Public Interest

Select one of the following:

MGT 4234: Ethical Issues in Business Diversity

FIN 4024: Legal Aspects of a Diverse Workplace

**Elective Courses**

Select one of the following:

AFST 1714: Introduction to Africana Studies

AFST/REL 2144: African Religions  
 AFST 2354: The Civil Rights Movement  
 AFST 2454: Race and Racism  
 AFST/REL /WS 2734: The Black Woman in the U.S.  
 AFST/REL 2744: The Black Church in America  
 AFST/HIST 3176: Afro-American History  
 AFST 3454: African American Leadership  
 AINS/HUM 1104: Introduction to American Indian Studies  
 AINS/HUM 4004: Special Topic (as appropriate)  
 ECON 3014: Economics of Poverty  
 ENGL 2524: Introduction to Ethnic American Literatures  
 HUM 1704: Introduction to Appalachian Studies  
 HUM 1924: Exploration of Modern Asian Cultures  
 HUM/COMM 3204: Multicultural Communication  
 HUM 4104: Explorations in Advanced Humanities Topics  
 HUM 4404: Appalachian Folk Culture  
 PSCI 3255 or 3256: The Politics of Race, Ethnicity, and Gender  
 REL 1014: Asian Religions  
 REL 1024: Judaism/Christianity/Islam  
 REL 1034: Religion and the Modern World  
 REL 3214: Religion and Culture in India  
 REL 3224: Religions of China and Japan  
 SOC 2024: Minority Group Relations  
 SOC 2514: Appalachian Social Issues  
 SOC 3014: Gender Relations  
 SOC 3614: Gender and Work in the U.S.  
 SOC 3714: Sociology of Aging  
 SPAN/HUM 2754: Introduction to Spanish-American Culture and Civilization  
 WS 1824: Introduction to Women's Studies  
 WS 2224: Women and Creativity  
 WS 2264: Race, Class, and Gender

#### **Required Experiential Activity**

Select one of the following:

MGT 2964 or 3964 or 4964: Field Study

MGT 3464: Diversity-Related Internship and Professional Dev.

### **Undergraduate Course Descriptions (MGT)**

#### **1004: INTRODUCTION TO BUSINESS**

Introduction to the role of the free enterprise system in society and economy. Study of the various business functions such as economic trends, accounting, finance, management, marketing, and production and operations. Analysis of these functions for programs of study and for career opportunities. Restricted to freshmen and sophomores. (2H,2C)

#### **1945-1946: FUNDAMENTALS OF CADET LEADERSHIP**

Foundational course of the Virginia Tech Corps of Cadet Leader Development Program. Explores self-understanding, personality types, active and passive followership, leadership and ethical theories. A laboratory introduces freshmen cadets to academic success strategies. Membership in the Corps of Cadets is required. (1H,2L,2C)

#### **2944: MILITARY LEADERSHIP PRACTICUM**

Progressive leadership education, training and development through readings, lectures, exercises and leadership positions within the Corps of Cadets. Emphasis of this course is on the day-to-day implementation of leadership strategies and tactics in a military environment. Topics include leadership theory and practice, honor and ethics education, and professional integrity. Exercises include small group discussion, leadership scenarios, and role-playing. Each cadet will perform at least one leadership position to include team leader, cadre, squad leader, platoon leader, company commander, or primary/special staff positions. May be taken up to 8 times. Pass/Fail only. (1H,1C)

#### **2945-2946: SMALL UNIT LEADERSHIP FOR CADETS**

Prepares cadets for responsibilities as small unit leaders. Builds on the previous year's knowledge to focus on skills and knowledge necessary to lead small units. Introduces cadets to the importance of communication, includes basic counseling techniques, disciplinary actions, conflict resolution, cadet regulations and leadership case studies. Membership in the Corps of Cadets is required. (1H,1C)

#### **2954: BUSINESS STUDY ABROAD**

This course provides students with an international business experience. It is only offered as part of a program outside of the United States. Students will learn from the structured educational experience developed by the faculty leader. This course is intended for students who want to develop management-related free electives. Pre: Instructor's consent and the completion of 24 semester hours with a minimum GPA of 3.0 or departmental consent. Variable credit course.

#### **2964: FIELD STUDY**

Variable credit course.

#### 2984: SPECIAL STUDY

Variable credit course.

#### 3304: MANAGEMENT THEORY AND LEADERSHIP PRACTICE

This survey course introduces the student to a broad range of concepts, theories and practices important for a basic understanding of management. Topics also focus on the environment in which today's managers must effectively operate. Junior standing required. (3H,3C)

#### 3314: INTERNATIONAL BUSINESS

The course provides a framework to show how a firm's international business operations can be analyzed, understood, and undertaken, including discussion of cultural, social, political, and economic aspects of doing business abroad. The main learning experience in the course is oriented toward effective decision-making in the face of unique challenges faced by managers in the international business environment, with the goal of improving critical, analytical and creative thinking skills in international business operations. Junior Standing Required. (3H,3C)

#### 3324: ORGANIZATION BEHAVIOR

This course examines the determinants and consequences of human behavior in formal organizations. Specific focus is on the individual, interpersonal, and group processes which underlie all the human dynamics. Co: 3304. (3H,3C)

#### 3334: INTRODUCTION TO HUMAN RESOURCE MANAGEMENT

This course examines the strategies, policies, and practices associated with effective human resource management and employee/labor relations in public- and private-sector organizations in both union and nonunion settings. This course is designed for future managers and emphasizes the acquisition, development, reward, and retention of employees within a legal and social context of today's organizations. Junior standing is required. Co: 3304. (3H,3C)

#### 3344: LABOR-MANAGEMENT AND EMPLOYEE RELATIONS

An examination of labor and employee relations policies and practices from an economic, behavioral and legal viewpoint. Examines contemporary methods of employee organization, labor-management cooperation, representation and dispute resolution in private and public, and union and non-union work settings in the United States and selected other countries. Pre: 3304, 3334. (3H,3C)

#### 3424: HUMAN RESOURCE STAFFING AND DEVELOPMENT

Concentrates on the acquisition, deployment, and development of human resources within organizations. This course emphasizes the design and implementation of staffing, training, and development processes to achieve organizational objectives within social and economic constraints. Pre: 3304, 3334. (3H,3C)

#### 3434: DIVERSITY IN THE WORKPLACE: ISSUES FOR INDIVIDUALS

Examines the individual perspectives of diversity on the work experience, and is designed to prepare individuals to meet the challenge of all aspects of diversity in organizations. Attention is given to how gender, race, ethnicity, religion, age, disabilities, social class, sexual orientation, culture, tradition, education, economic structure, and organizational philosophy interact to create a set of rules for acceptable behaviors in complex organizations. (3H,3C)

#### 3444: DIVERSITY IN THE WORKPLACE: ISSUES FOR ORGANIZATIONS

Examines the impact of diversity on organizational performance. The ability to relate to people on every level is critical to business success. Accountability for diversity-related efforts and outcomes, diversity metrics, including ROI for diversity management, and making diversity a bottom-line necessity will be discussed. (3H,3C)

#### 3454 (AAEC 3454): SMALL BUSINESS MANAGEMENT AND ENTREPRENEURSHIP

Characteristics of small business and entrepreneurs, and their economic importance. Development and operation of a small business, including concepts and principles such as franchising, business plans, capital acquisition, venture capital, financial and administrative control, marketing, human resource and operations management. Taxation, legal, insurance and ethics in small business. Junior standing required. (Cross listed with AAEC 3454). (3H,3C)

#### 3464: DIVERSITY-RELATED INTERNSHIPS AND PROFESSIONAL DEVELOPMENT

Guided experience in a diverse work environment. Through a paid or unpaid internship, students will have the opportunity to experience diversity within an organization first hand while working on organizationally meaningful assignments in the classroom. Pass/Fail only. Pre: 3434. (1H,6L,3C)

#### 3604: E-MANAGEMENT: CONCEPTS AND SKILLS

This course provides cutting edge experiences, skills, and knowledge for management majors and other College of Business e-commerce students who are concerned with the digital transformation of business. Within a context that examines fundamental changes in management due to the Internet Revolution which are as dramatic as the Industrial Revolution, three themes will be pursued: (1) how these organizations are different from traditional organizations, (2) new implications for knowledge sharing, knowledge management, and communication, and (3) e-based techniques for leadership practices. Pre: 3304, ACIS 2504. (3H,3C)

#### 3754: MANAGEMENT INTERNSHIP AND CAREER DEVELOPMENT

Guided experience in work environments and job search. Through unpaid internships, students have the opportunity to view the inner workings of businesses first hand while working on organizationally meaningful assignments. Class activities prepare students for conducting effective job searches. Pass/Fail only. Pre: 3304. (1H,6L,3C)

#### 3945-3946: CADET ORGANIZATIONAL LEADERSHIP

Prepares junior class cadets for responsibilities as senior sergeants. Builds on the previous year's knowledge of small unit leadership. Introduces cadets to decision making, writing decision papers/executive summaries, project management, public speaking, and refinement of their personal leadership philosophy. Membership in the Corps of Cadets is required. (1H,1C)

#### 3954: STUDY ABROAD

Variable credit course.

#### 3964: FIELD STUDY

Variable credit course.

#### 4064: INNOVATION, TECHNOLOGY AND ENTREPRENEURIAL LEADERSHIP

This course examines the leader's role and required skills for new venture creation and fostering innovation and technology development. Senior standing in the Pamplin College of Business required. Pre: 3304. (3H,3C)

#### 4074 (MKTG 4074): APPLIED SMALL BUSINESS CONSULTING

Application of accounting, finance, marketing, management, information technology, and management science concepts to small business cases. On-site consultation with existing firms. Through the experiential studies, students will explore the role of 'pro bono' work in the management field. Pre: Pamplin College of Business senior or graduate standing. Permission of instructor is required for students outside the Pamplin College of Business. Pre: 3304. (3H,3C)

#### 4104 (FL 4104): GLOBAL CULTURE

This course will examine problems of cultural differences using an interdisciplinary approach combining business studies with cultural studies in the humanities and social sciences. It will address issues related to living and working with people from other countries or cultures, whether domestically or abroad. It will also explore the impact of globalization on various aspects of culture. Junior standing required. (3H,3C)

#### 4234: ETHICAL ISSUES IN BUSINESS DIVERSITY

This course examines underlying ethical issues involved with operating in a diverse business environment with respect to gender, race, religion, age, social class, sexual orientation, culture, tradition, and education. Ethical decision making frameworks including rights-based ethics, duty-based-ethics, utilitarianism, justice, and virtue ethics as well as the concepts of corporate social responsibility and corporate citizenship are introduced and applied to issues of diversity. Competence in the application of these frameworks to diversity issues is developed through analysis of cases and experiential activities. Pre: 3304, 3434. (3H,3C)

#### 4314: INTERNATIONAL MANAGEMENT

The course is designed to provide the student with familiarity concerning the unique problems, characteristics, and demands that face multinational managers and the international business community. Junior standing required. (3H,3C)

#### 4324 (PHIL 4324): BUSINESS AND PROFESSIONAL ETHICS

An inquiry into the fundamental norms of conduct in business and other professions and their justification in relation to the most important ethical theories. Special attention will be given to moral problems such as the ethics of hiring and firing, bribery, and professional responsibility to society. (3H,3C)

#### 4334: ETHICAL LEADERSHIP AND CORPORATE SOCIAL RESPONSIBILITY

The leadership role of managers in promoting ethics and corporate social responsibility in business today. Consideration of business-society issues such as environmental pollution, employee rights and responsibilities, discrimination/affirmative action, and the activities of multinational corporations. These issues will be examined through the conceptual frameworks of business ethics and corporate social responsibility. Pre: 3304. (3H,3C)

#### 4344: PRODUCTIVITY AND QUALITY LEADERSHIP

This course provides an introduction to leadership in the context of productivity and quality improvement. It focuses on understanding the concepts and skills associated with contemporary management strategies and systems. This course requires active student involvement and emphasizes participative leadership skills, data collection, qualitative problem solving, and communication processes. For Management majors only. Senior standing required. Pre: 3304, 3324, BIT 3414. (3H,3C)

#### 4354: LEADERSHIP: ADVANCES IN SKILLS AND CONCEPTS

This cornerstone course provides cutting-edge experiences, skills, and knowledge in leadership for students in the leadership minor. Within an historical context that balances military, political, and business perspectives, four types of leadership will be examined: self-leadership, dyadic leadership, team leadership, and enterprise leadership. Special emphasis will be placed on the specific skills, such as computer literacy and project management, required for leaders to succeed in modern, technologically oriented organizations. Pre: senior standing. Pre: 3304. (3H,3C)

#### 4394: BUSINESS POLICY AND STRATEGY

Integrates business principles and practices covered in basic courses. Cases used extensively. Senior standing required. Pre: 3304, (MKTG 3104 or MKTG 3104H), FIN 3104, BIT 3414. Co: FIN 3055. (3H,3C)

#### 4414: COMPENSATION AND PERFORMANCE MANAGEMENT

This course provides the knowledge and skills required by managers to design and implement comprehensive compensation and performance management systems in public and private organizations. Topics include development of compensation strategy, internal pay structure, determination of pay level through wage surveys, evaluating job performance, rewarding individuals and groups, and administering employee benefits. Pre: 3304, 3334. (3H,3C)

#### 4764: APPLIED HUMAN RESOURCE INFORMATION SYSTEMS

The study of how human resource information systems (HRIS) can and should be applied in organizations to support organization strategy, improve efficiency and flexibility, increase productivity, and improve the quality of work life for all employees. Pre: 3334. (3H,3C)

#### 4864: WI UNDERGRADUATE RESEARCH

Variable credit course.

#### 4874: WI INDEPENDENT STUDY

Variable credit course.

**4944: LEADING IN YOUR PROFESSION**

Examines the skills and knowledge necessary to succeed in a responsible role of leadership when beginning one's career. It is a capstone course that draws on the leadership training and experience cadets have accumulated during their first three years in the Corps of Cadets. Senior standing in the Corps of Cadets required. Course may be taken twice for credit. The pre-requisite requirement is such that a student must take the pre-requisite twice before enrolling in this course. Pre: 2944. (1H,1C)

**4945-4946: EXECUTIVE LEADERSHIP FOR CADETS**

Examines executive level leadership. It explores executive decision making, constraint theory and problem solving in both the military and civilian career fields. Senior standing in the Corps of Cadets is required. (1H,1C)

**4964: FIELD STUDY**

Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

**4994H: UNDERGRADUATE RESEARCH**

Honors section Variable credit course.

## Overview

Marketing grows out of the concept of exchange between buyers and sellers. Driven by the needs and wants of the consumer, marketing managers develop new products, assign effective price levels, create promotional strategies, and develop the best distribution plans to guarantee that products reach the final consumer. Marketing also plays a crucial role in managing the efficient flow of goods and services from businesses to businesses. And managing marketing is growing even more exciting as technology and the internet enable managers to stay in closer contact with their customers and better manage this relationship. Marketing by manufacturing firms is well-known. Service industries such as banking and health care, however, are increasingly relying on marketing to improve service quality and delivery. Non-profit organizations, such as Habitat for Humanity and the American Red Cross, also use marketing to deliver social goods and services. All of these organizations benefit when they are able to use marketing concepts and tools to better understand their clients and design unique offerings that can meet their clients' needs.

The undergraduate program in marketing management is designed to offer the student a broad business education with an emphasis on professional training for development of marketing strategies and managing marketing operations. Virginia Tech Marketing graduates pursue a range of careers. They take jobs in marketing management, sales, advertising, retailing, and consulting positions in companies small and large. The curriculum is designed to provide core skills in marketing and to support this broad range of potential career interests.

In addition to the undergraduate program, the faculty in marketing management offer a master's and a doctoral degree for those students interested in more technical positions, such as marketing research; more rapid promotion with certain employers; or positions in higher education.

In addition to the undergraduate program, the faculty in marketing management offer a master's and a doctoral degree for those students interested in more technical positions, such as marketing research; more rapid promotion with certain employers; or positions in higher education.

The department participates in the Cooperative Education Program in which qualified students may alternate semesters of study with semesters of professional employment.

## Requirements

In addition to fulfilling the college of business requirements for the first two years and the junior and senior core course requirements, each student must meet the following course requirements:

MKTG 4154: Marketing Research	(3)
MKTG 4204: Consumer Behavior	(3)
MKTG 4304: Marketing Communications	(3)

MKTG 4354: Marketing Channels and Logistics	(3)
MKTG 4554: Relationships Among Buyers and Sellers	(3)
MKTG 4644: Marketing, Society and the Public Interest	(3)
MKTG 4754: Strategic Marketing	(3)
<i>Plus any two of the following:</i>	
MKTG 3504: Advertising	(3)
MKTG 4074: Small Business Consulting	(3)
MKTG 4254: Product and Price Management	(3)
MKTG 4404: Field Practicum in Marketing	(3)
MKTG 4454: Sales Force Management	(3)
MKTG 4504: Marketing and the Internet	(3)
MKTG 4564: Marketing for High Technology Products	(3)
MKTG 4604: Retail Management	(3)
MKTG 4704: International Marketing	(3)
MKTG 4734: Real Estate Marketing	(3)
MKTG 4774: Advanced Professional Selling	(3)
MKTG 4974: Independent Study	(3)

## Undergraduate Course Descriptions (MKTG)

### 2954: BUSINESS STUDY ABROAD

This course provides students with an international business experience. It is only offered as part of a program outside of the United States. Students will learn from the structured educational experience developed by the faculty leader. This course is intended for students who want to develop marketing-related free electives. Pre: Instructor's consent and the completion of 24 semester hours with a minimum GPA of 3.0 or departmental consent. Variable credit course.

### 2964: FIELD STUDY

Variable credit course.

### 2964H: FIELD STUDY

Honors section.

Variable credit course.

### 2974: INDEPENDENT STUDY

Variable credit course.

### 3104: MARKETING MANAGEMENT

Study of the marketing process from a macro and management viewpoint. The macro viewpoint includes the role of marketing in society. The management viewpoint includes the product, distribution, promotional, and pricing decisions. Junior standing required. (3H,3C) I,II,III,IV.

### 3104H: MARKETING MANAGEMENT

(3H,3C)

### 3504: ADVERTISING

Survey of advertising principles and its applications. The course covers advertising history, the impact of advertising on society, and ethical and regulatory issues. The process of creating and placing advertising is explored including advertising objectives, budgeting, media planning and mix, creative objectives and strategy, copy execution and production, and copy testing. Junior standing required. Pre: 3104 or 3104H. (3H,3C)

### 3954: STUDY ABROAD

Variable credit course.

### 4074 (MGT 4074): APPLIED SMALL BUSINESS CONSULTING

Application of accounting, finance, marketing, management, information technology, and management science concepts to small business cases. On-site consultation with existing firms. Through the experiential studies, students will explore the role of 'pro bono' work in the management field. Pre: Pamplin College of Business senior or graduate standing. Permission of instructor is required for students outside the Pamplin College of Business. Pre: MGT 3304. (3H,3C)

### 4144 (CHE 4144): BUSINESS AND MARKETING STRATEGIES FOR THE PROCESS INDUSTRIES

Business strategies and industrial marketing concepts, and their application in the chemical, pharmaceutical and related process industries. The course is designed for engineers and other students planning a career in the process industries. Junior standing required. Pre: ECON 2005. (3H,3C)

### 4154: MARKETING RESEARCH

This course is a study of the scientific process of problem solving in a marketing context. It includes concepts of problem definition, hypotheses

generation, questionnaire development, research design, implementation, analysis, and interpretation of statistical findings. Junior standing required. Pre: BIT 2405, BIT 2406. Co: 3104H, 3104. (3H,3C)

#### 4204: CONSUMER BEHAVIOR

An integrated analysis of individual and environmental influences on consumer decision making, purchase, and consumption behaviors with strong emphasis on implications for developing, executing, and assessing marketing strategy. Junior standing required. Pre: 3104 or 3104H. (3H,3C)

#### 4204H: CONSUMER BEHAVIOR

An integrated analysis of individual and environmental influences on consumer decision making, purchase, and consumption behaviors with strong emphasis on implications for developing, executing, and assessing marketing strategy. Junior standing required. Honors section Pre: 3104 or 3104H. (3H,3C)

#### 4254: PRODUCT AND PRICE MANAGEMENT

Strategic product planning and new product development are discussed within the context of marketing management. Economic, financial, legal, and marketing principles are integrated to analyze pricing decisions. Behavioral implications of pricing also are considered. Relationships between product and price management address. Junior standing required. Pre: 3104 or 3104H. (3H,3C)

#### 4304: MARKETING COMMUNICATIONS

Theory and application of an organization's marketing communications function. Content will include developing a marketing plan, setting communication goals, developing message strategy, implementing the strategy using promotional mix variables, planning media, and determining the communication budget. Junior standing required. Pre: 3104 or 3104H. (3H,3C)

#### 4354: MARKETING CHANNELS AND LOGISTICS

Management of the firm's distribution function. Study of the structure, functions, interactions, and activities of marketing channels. Analysis and development of integrated physical distribution and logistics systems for the firm. Junior standing required. Pre: (3104 or 3104H), BIT 2405, BIT 2406. (3H,3C)

#### 4404: FIELD PRACTICUM IN MARKETING

Application of marketing concepts and theories to a specific business concept. On-site performance of marketing activities and a written analysis of the firm's marketing strategy and execution. Junior Standing Pre: 3104 or 3104H. (3H,3C)

#### 4454: SALES FORCE MANAGEMENT

Integration of behavioral research to provide an understanding of the role of the salesperson within the sales organization and in relation to the buyers. Personal selling examines the dyadic interaction between buyer and seller. Managing the sales force covers planning, organizing, directing, and controlling the activities of the sales personnel. Junior standing required. Pre: 4554, (3104 or 3104H). (3H,3C)

#### 4504: MARKETING AND THE INTERNET

Develop and implement theoretical and practical approaches to marketing strategy that leverage the information technologies of the Internet. Topics include the characteristics of the Internet as a marketing environment; perspectives of agents (e.g., consumers, marketers, technologists) within the Internet environment, and implications of the Internet for strategic marketing and marketing management. Pre: 3104 or 3104H. (3H,3C) II.

#### 4554: RELATIONSHIPS AMONG BUYERS AND SELLERS

Management of relationships between buyers and sellers among marketing organizations. Organizational buying, personal selling, and relationship marketing. The buying center and buying roles, the buying situation, the purchasing role, the sales process, personal selling approaches, negotiation, power and dependence, conflict resolution, and relational exchange. Pre: 3104 or 3104H. (3H,3C) I, II.

#### 4564: MARKETING FOR HIGH TECHNOLOGY PRODUCTS

This course covers the unique nature of marketing high technology. It applies the basic elements of marketing strategy -- market segmentation and targeting, marketing mix elements -- to the context of high technology goods and services. It also addresses the development of effective strategic, marketing plans for high technology products. Pre: 3104 or 3104H. (3H,3C) I.

#### 4604: RETAIL MANAGEMENT

Analysis of managerial problems in retailing establishments. Focus is on operational problems, retail store organization, location analysis, buying, selling, sales promotion, and merchandise handling. Junior standing required. Pre: 3104 or 3104H. (3H,3C)

#### 4644: MARKETING, SOCIETY AND THE PUBLIC INTEREST

The impact of marketing on society from a multi-disciplinary and multi-stakeholder perspective. Marketing's role in solving societal problems is explored. Topics include at-risk market segments, controversial products and practices, and issues of social justice. Pre: 3104 or 3104H. (3H,3C)

#### 4654: DEMAND ANALYSIS AND FORECASTING

Survey of techniques employed in forecasting sales and other marketing variables. Analysis of the performance of marketing on various criteria. Pre: BIT 2405, BIT 2406, (MKTG 3104 or MKTG 3104H). (3H,3C)

#### 4704: INTERNATIONAL MARKETING

Assessing international markets, comparing marketing systems; management of international marketing operations; focusing on distribution, promotional, and pricing problems faced by firms engaging in world trade. Junior standing required. Pre: 3104 or 3104H. (3H,3C)

#### 4734: REAL ESTATE MARKETING

This course extends the fundamental concepts of marketing into the study and practice of real estate. The course is concerned with the topics of demographic analysis, market information systems, market research, and marketing strategy of residential and commercial real estate, with particular emphasis on the important area of real estate personal selling. Junior standing required. Pre: 3104 or 3104H. (3H,3C)

**4754: STRATEGIC MARKETING**

An integrative course in marketing policy and strategy, employing comprehensive case problems in the formulation of marketing action programs and business policy. Senior standing required. Any one of the following Marketing prerequisites—4304, 4354, 4554—may be taken concurrently with 4754. Pre: (3104 or 3104H), 4154, (4204 or 4204H). (3H,3C)

**4774: ADVANCED PROFESSIONAL SELLING**

Advanced theory and practice of professional selling with primary focus on the professional sales process, analysis of associated strategic and ethical issues, and acquisition of critical skills required of successful salespeople. Builds on foundation created in Buyer/Seller Relationship (MKTG 4554) to expand knowledge and skills of students considering career in professional sales. Pre: 4554. (3H,3C)

**4964: FIELD STUDY**

Variable credit course.

**4964H: FIELD STUDY**

Honors section.

Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

**4994H: HONORS UNDERGRADUATE RESEARCH**

Variable credit course.

## Overview

The College of Science at Virginia Tech provides students with an interdisciplinary training in analytical skills and a comprehensive foundation in the scientific method. Outstanding faculty members conduct research and teach courses in nine disciplines leading to baccalaureate and advanced degrees. Coursework from the College of Science also provides a foundation of knowledge in a number of fundamental and advanced subjects for students in all Colleges across the campus. The College of Science also offers academic advising and appropriate preparatory coursework for students interested in pre-medicine, pre-dentistry, pre-veterinary medicine, and patent or intellectual property law.

Students may major in the following disciplines:

Biochemistry	Biological Sciences	Chemistry
Economics	Geosciences	Mathematics
Physics	Psychology	Statistics

In addition to traditional majors, the college offers programs in nanoscale science, computational science, systems biology, and neuroscience as well as intellectual property law, and supports research centers in areas such as biomedical and public health sciences, applied mathematics, macromolecular science, and many other critical technologies and applied sciences that encompass other Colleges at the University. Allied disciplines emphasize the study of behavioral science as well as economic and strategic decision making. The College is committed to providing research opportunities for interested students at all levels.

## Degree Programs

Specific degree programs include:

- Biochemistry (B.S.; option in Biotechnology)
- Biological Sciences (B.S.; option in Microbiology/Immunology)
- Chemistry (B.S. or B.A.)
- Economics (B.A.; specializations in Business Economics, Macroeconomics and Finance, Economic Theory, Econometrics and Empirical Economics and Public Policy)
- Geosciences (B.S.; options in Geology, Geochemistry, Geophysics and Earth Science Education)
- Mathematics (B.S.; options in Traditional Mathematics, Applied and Computational Mathematics, Applied Discrete Mathematics, and Mathematics Education)
- Physics (B.S. or B.A.)
- Psychology (B.S.)
- Statistics (B.S.)

The college offers minors in all of the majors listed above as well as minors in actuarial science and science, engineering, and law. A leadership minor is available to members of the Corps of Cadets.

## General Requirements for Graduation

A student in the College of Science must complete at least 120 hours for an undergraduate degree as well as satisfying the following requirements:

- achieve a minimum overall Grade Point Average (GPA) of 2.0 for all hours attempted
- achieve a minimum overall GPA of 2.0 for all hours attempted in all work applied to the major
- complete all other requirements established for their degree by the major department
- complete all college and Curriculum for Liberal Education requirements

No course required for the major/minor may be elected to be taken on a pass/fail (P/F) basis (i.e., pass/fail may be used for free electives only). This excludes courses that are offered P/F only.

## College Core Curriculum

A description of the Curriculum for Liberal Education may be found in the Academics chapter of this catalog or on the Curriculum for Liberal Education website (<http://www.cle.prov.vt.edu/>). College Specific Requirements related to the Curriculum for Liberal Education (CLE):

### Area 6: Creativity and Aesthetic Experience

- Satisfactorily complete a three-credit hour course approved for the university Curriculum for Liberal Education. (The one-credit courses for the CLE will not fulfill this requirement.)

Foreign Language-Must complete the third year (level III) of a single foreign language [including Sign Language (ESL)] in a secondary school. This requirement may also be fulfilled by successful completion of one of the following:

- Satisfactorily complete 1106 for any foreign language offered including any prerequisites
- Satisfactorily complete an accelerated course which combines 1105 and 1106 of a foreign language
- Students who have not completed two (2) units of a single foreign language in high school must satisfactorily complete 1106 or an accelerated course which combines 1105 and 1106 of a foreign language. These hours are in addition to the 120 hours required for graduation, so these hours will not count towards graduation.
- Credit by examination for a foreign or classical language. The credit by examination option is available only to students who have gained knowledge of a foreign language without the benefit of formal training. This privilege is intended to recognize informal, non-academic learning experience. This option is restricted and does not carry credit towards graduation. Requests must be made through the Foreign Language office. See <http://www.collegeboard.com/student/testing/clep/about.html> for available tests and procedures.
- Students whose native language is not English may be exempted from the foreign language requirement through demonstrating satisfactory knowledge of the foreign language as prescribed by the Department of Foreign Languages and Literatures. All requests for exemption should be addressed to and must be approved by the head of the Department of Foreign Languages and Literatures. This option does not carry credit towards graduation.

## Satisfactory Progress

In addition to the university and to the departmental criteria (see specific departments in this chapter), all students in the College of Science are evaluated for continued enrollment at Virginia Tech. The two College of Science criteria for satisfying progress toward degree state that:

- 1) Students who have attempted 72 semester hours must have completed their foreign language requirement by the close of the academic year (Spring Semester), and
- 2) Students must have completed all credits for the Curriculum of Liberal Education by the time 96 semester hours have been

attempted.

## The Honors Program

The University Honors Program is available to students in the College of Science. These programs provide an enriched environment for qualified students who are highly motivated and possess outstanding scholastic ability. Specific requirements for the three possible honors degrees are available from the honors program and participating departments.

## Dean's List

An undergraduate student who attempts at least 12 credit hours graded on the A-F option and who earns a 3.4 GPA for either spring or fall semester will be included on the online Dean's List for that term. Please note: Students will not appear on the online Dean's List if they are listed in the system as confidential or if they do not have an active permanent address. Questions about omissions from the online list should be directed to the Office of the University Registrar.

## Pre-Professional Advising in the College of Science

Pre-health advising (e.g., pre-dentistry, pre-medicine, and pre-veterinary) is coordinated through the Office of Health Professions located in Career Services. Advising for students interested in patent or intellectual property law careers is available in the college advising center.

## Phi Beta Kappa

Phi Beta Kappa is the oldest and most prestigious honor society dedicated to recognizing excellence in the liberal arts and sciences. Students in the College of Science who have exhibited outstanding academic ability in eligible coursework may be eligible for selection to Phi Beta Kappa.

## Scholarships

A number of scholarships are available for outstanding students enrolled in the College of Science. Descriptions and deadlines are available on the Scholarships and Financial Aid website.

## Undergraduate Research

Research opportunities and experiencing the excitement of discovery can play an important part in undergraduate training in science. College of Science departments offer diverse research opportunities in which students may choose to participate. Individuals interested in undergraduate research should contact a faculty member in the department where they wish to conduct research.

## Internships, Co-op Opportunities and Enrichment Programs

Students are encouraged to participate in internship and co-op opportunities to gain relevant work experience prior to graduation. Career advisors in the college advising center as well as departmental career advisors can help students identify opportunities. In some cases, students can receive credit for qualifying work experience. Enrichment studies include field station opportunities, study abroad and summer laboratory experiences outside of the university.

## Career Advising

Career advising is available from a number of sources. The university offers centralized career services and on-campus interviewing. The College of Science works with employers interested in hiring students with degrees from the college and organizes employer panels and information sessions. Every major has a departmental career advisor who specializes in guiding students from their field towards career success. Information about upcoming events is available at [www.science.vt.edu/career](http://www.science.vt.edu/career).

Career Services offers each student a FREE Hokies4Hire account. Undergraduate students who are seeking any type of career-related employment, including internships, co-ops, career-related summer employment, and permanent positions are eligible to use Hokies4Hire. You may upload your resume and apply for jobs listed in Hokies4Hire. These include jobs with on-campus interviews as well as job postings. Additional information may be found at <http://www.career.vt.edu/H4H-OCI/H4HIndex.html>

## Graduate Programs in Science

All College of Science departments offer graduate degrees at both the Master's and Ph.D. levels. Complete information on these programs including descriptions of graduate courses can be found in the [Graduate Catalog](#).

## Undergraduate Course Description (COS)

### 2304: FOUNDATIONS INTELLECTUAL PPTY

Study of process of civil litigation from commencement of lawsuit through final judgment under modern statutes and rules of court, special emphasis on intellectual property lawsuits; Introduction to US intellectual property law including copyrights, patents, trademarks & unfair competition and trade secrets; Commonalities and differences among different intellectual property rights and related state and federal doctrines; Introduction to legal research and writing. Pre: (ENGL 1105, ENGL 1106) or ENGL 1204. (3H,3C)

### 2964: FIELD STUDY

Pass/Fail only. Variable credit course.

### 2974: INDEPENDENT STUDY

Variable credit course.

### 2984: SPECIAL STUDY

Variable credit course.

### 4304: PATENT LAW

The protection and enforcement of patent law, U.S. case law that interpret Sections 35 of the US Statutory code; Analysis of the goals and costs of the patent law system; patentability requirements, infringement, remedies, patent prosecution issues, and patent transactions; Patent and intellectual property strategies. Pre: 2304. (2H,2C)

### 4314: CURRENT TOPICS IN SCIENCE, TECHNOLOGY, AND LAW

The seminar course covers current developments, problems and cases at the intersection of science, technology and law. Particular focus is placed on intellectual property law and on social, ethical and other legal issues prompted by new technologies and scientific advancements. Topics will include informative privacy, fair use and plagiarism, patenting of life forms, stem cell research, etc. Pre: 2304 or 4304 or 4324. (3H,3C)

### 4324: GLOBAL ASPECTS OF INTELLECTUAL PROPERTY LAW

Comparative study of international intellectual property systems; international treaty arrangements for copyrights, patents and trademarks; protection and enforcement of intellectual property rights in foreign markets; policy analysis of the globalised intellectual property system. (3H,3C)

### 4984: SPECIAL STUDY

Variable credit course.

---

**Overview**

The bachelor of science in biochemistry is designed to provide students with a thorough foundation in chemistry and biology and an appreciation of how these sciences are integrated to explore the molecular mechanisms underlying biological processes. The plan of study prepares students for careers in medicine, veterinary medicine, biomedical research, agriculture, industrial biochemistry, or biotechnology. In addition, it provides the background for post-graduate studies in the life sciences or professional studies in medicine, nursing, veterinary medicine, dentistry, pharmacy, and clinical chemistry.

The department offers the undergraduate biochemistry degree in two colleges, the College of Agriculture and Life Sciences and the College of Science. Biochemistry majors complete the Curriculum for Liberal Education requirements unique to the college in which they are enrolled.

The departmental requirements for majors in either college are: mathematics (9-12 credits); physics (8 credits); principles of biology (8 credits); genetics (3 credits); general microbiology (4 credits); general chemistry (8 credits); organic chemistry (8 credits); physical chemistry (6 credits); analytical chemistry (4 credits); introduction to biochemistry (1 credit); general biochemistry (7 credits); and laboratory problems in biochemistry and molecular biology (6 credits).

To qualify for a major in biochemistry, the department requires that students maintain a minimum 2.0 grade point average (GPA) for the hours passed in all required biochemistry, biology, and chemistry courses. In addition, the department requires that a student earn a C- or better in all required biochemistry, chemistry, and biology courses.

The plan of study allows time for qualified students to participate in undergraduate research (BCHM 4994). Qualified students are strongly encouraged to initiate research activity prior to their senior year. A minimum GPA of 2.5 is required for enrollment in BCHM 4994. Students participating in undergraduate research are encouraged to present a senior thesis.

Upper-division students who qualify for the Honors Program may participate in the "in honors" degree program in biochemistry. The Honors Program and undergraduate research program include study and research with individual faculty members.

Biochemistry majors may participate in the Cooperative Education Program that alternates academic study with employment experience. Additional information pertaining to the CO-OP program is included in the "General Information" section of this catalog. Summer internships with various businesses and governmental agencies are frequently available, particularly to rising seniors.

**Biotechnology Option**

Biotechnology is the application of fundamental biochemical and molecular biological approaches to problems in agriculture, medicine,

biotechnology, energy, and environmental sciences. The faculty in biochemistry and in several other science departments have developed an interdisciplinary option for undergraduates. To complete the option, Biochemistry majors must also take BCHM 4784 (Applications in Molecular Life Science) and will graduate with a degree in biochemistry with an option in biotechnology. The option will introduce information, concepts, and techniques that are shaping the future of science and our society.

## Bioinformatics/Genomics

The department supports students' interest in bioinformatics/genomics by providing instruction and laboratory experience in those areas. Students are advised of appropriate supporting courses in computer science that may be used toward a minor in Computer Science.

The department also offers a graduate program leading to the M.S. and Ph.D.

The minimum number of credits required for the B.S. in Biochemistry is 120.

## Suggested Schedule for Biochemistry Majors

<b>First Year</b>	
<i>First Semester</i>	<b>(16)</b>
BCHM 1014: Introduction to Biochemistry <sup>1</sup>	1
CHEM 1055: General Chemistry for Majors <sup>1,5</sup>	4
CHEM 1065: General Chemistry Lab for Majors <sup>1,5</sup>	1
ENGL 1105: Freshman English	3
BIOL 1105: Principles of Biology <sup>1</sup>	3
BIOL 1115: Principles of Biology Lab <sup>1</sup>	1
MATH 1016: Elementary Calculus <sup>2</sup>	3
<i>Second Semester</i>	<b>(15)</b>
CHEM 1056: General Chemistry for Majors <sup>1,5</sup>	4
CHEM 1066: General Chemistry Lab for Majors <sup>1,5</sup>	1
ENGL 1106: Freshman English	3
BIOL 1106: Principles of Biology <sup>1</sup>	3
BIOL 1116: Principles of Biology Lab <sup>1</sup>	1
MATH 2015: Elementary Calculus <sup>2</sup>	3
<b>Second Year</b>	
<i>First Semester</i>	<b>(15)</b>
CHEM 2565: Principles of Organic Chemistry <sup>1,5</sup>	3
CHEM 2545: Organic Chemistry Lab <sup>1</sup>	1
PHYS 2205: General Physics <sup>1</sup>	3
PHYS 2215: General Physics Lab <sup>1</sup>	1
STAT 3615: Biological Statistics <sup>2</sup>	3
BIOL 2604: General Microbiology <sup>1</sup>	3
BIOL 2614: General Microbiology Lab <sup>1</sup>	1
<i>Second Semester</i>	<b>(14)</b>
CHEM 2566: Principles of Organic Chemistry <sup>1,5</sup>	3
CHEM 2546: Organic Chemistry Lab <sup>1</sup>	1
PHYS 2206: General Physics <sup>1</sup>	3
PHYS 2216: General Physics Lab <sup>1</sup>	1
Electives <sup>3</sup>	6
<b>Third Year</b>	

<i>First Semester</i>	<b>(15)</b>
BIOL 2004: Introductory Genetics <sup>1</sup>	3
BCHM 4115: General Biochemistry <sup>1</sup>	4
CHEM 2114: Analytical Chemistry <sup>1</sup> and	3
CHEM 2124: Analytical Chemistry Lab <sup>1</sup>	1
Electives <sup>3</sup>	4
<i>Second Semester</i>	<b>(16)</b>
BCHM 4116: General Biochemistry <sup>1</sup>	3
BCHM 4124: Laboratory Problems in Biochemistry and Molecular Biology <sup>1, 4</sup>	6
Electives <sup>3</sup>	7
<b>Fourth Year</b>	
<i>First Semester</i>	<b>(15)</b>
CHEM 4615: Phys. Chem. for the Life Sciences <sup>1</sup>	3
Electives <sup>3</sup>	12
<i>Second Semester</i>	<b>(15)</b>
CHEM 4616: Phys. Chem. for the Life Sciences <sup>1</sup>	3
Electives <sup>3</sup>	12

<sup>1</sup> Required course in department major.

<sup>2</sup> The departmental mathematics requirement may be satisfied by taking Math 1015-1016 and 2015 (Elementary Calculus with Trigonometry I & II) and one of the following: Math 2016, or Stat 3615 (Biological Statistics); or Math 1205-1206 (Calculus) and either Math 2016 or Stat 3615.

<sup>3</sup> Electives must include college and Curriculum for Liberal Education requirements.

<sup>4</sup> Enrollment requires "C-" or better in BCHM 4115.

<sup>5</sup> Will also accept: CHEM 1035-1036, CHEM 1045-1046, and CHEM 2535-2536.

[TOP](#)

## Progress Toward Degree

The following required courses should be completed by the end of the spring semester of the junior year for satisfactory progress toward a bachelor's degree for biochemistry majors in both the College of Agriculture and Life Sciences and in the College of Science.

BIOL 1105, 1106: Principles of Biology; BIOL 1115, 1116: Principles of Biology Lab; BIOL 2604: General Microbiology; BIOL 2614: General Microbiology Lab; BIOL 2004: Introductory Genetics; CHEM 1035, 1036: General Chemistry or CHEM 1055, 1056: General Chemistry for Majors; CHEM 1045, 1046: General Chemistry Lab or CHEM 1065-1066: General Chemistry Lab for Majors; CHEM 2535, 2536: Organic Chemistry or CHEM 2565, 2566: Principles of Organic Chemistry; CHEM 2545, 2546: Organic Chemistry Lab; PHYS 2205, 2206: General Physics; PHYS 2215, 2216: General Physics Lab.

## Undergraduate Course Descriptions (BCHM)

### 1014: INTRODUCTION TO BIOCHEMISTRY

History and evolution of biochemistry; applications of biochemistry in agricultural and life science disciplines; topical research areas in biochemistry; educational requirements and career opportunities for biochemistry majors. I Pass/Fail only. (1H,1C)

### 2024: CONCEPTS OF BIOCHEMISTRY

Short course in fundamentals of the chemistry of living systems. Introduction to major categories of biochemical substances, metabolic pathways, and principles of biochemical information transfer. (No credit for majors). Pre: CHEM 2514 or CHEM 2535. (3H,3C) II.

### 2974: INDEPENDENT STUDY

Variable credit course.

### 2974H: INDEPENDENT STUDY

Honors section. Variable credit course.

### 2984: SPECIAL STUDY

Variable credit course.

**3114: BIOCHEMISTRY FOR BIOTECHNOLOGY AND THE LIFE SCIENCES**

Survey presentation of the basic principles of biochemistry as they apply to biotechnology. Topics covered include protein structure, enzymology, cellular organization, and biochemical regulation. Special emphasis will be given to gene structure, transcription, and translation, cellular organization, and cloning, sequencing, modification and expression of recombinant DNA. Examples will be given of agricultural/medical/industrial applications of cellular and molecular biochemical knowledge. Non-majors only. I Pre: CHEM 2536. (3H,3C)

**3124: BIOCHEMICAL TECHNIQUES FOR BIOTECHNOLOGY AND THE LIFE SCIENCES**

Survey of basic biochemical laboratory techniques for students interested in biotechnology, genetic engineering, and the modern life sciences. Topics include the use of buffers, spectroscopy, enzyme assays, chromatography, electrophoresis, and immunoassays in the analysis of biological macromolecules. (Non-majors only). I Co: 3114. (2H,3L,3C)

**4034 (BMVS 4034): ENVIRONMENTAL HEALTH TOXICOLOGY**

Health effects associated with the exposure to chemicals, identifying and managing problems of chemical exposure in work places and the environment, fundamental principles of biopharmaceutics and toxicokinetics, and risk assessment. Emphasis on conceptual understanding of chemical entry into the body, biotransformation, multiple chemical sensitivity, and chemically induced diseases. Identification of nutrient interactions with environmentally induced disorders and to understand the mechanisms of such interactions and their influence on human health and welfare. Pre: BIOL 2104 or BIOL 3124, ALS 2304, BIOL 2406 or BCHM 3114 or BCHM 4115, BCHM 4116. (3H,3C)

**4054 (APSC 4054): GENOMICS**

A contemporary analysis of the development, utility and application of high-resolution methods for the study and manipulation of the complete genomes of organisms. The use of new techniques for genomic, metabolic and protein engineering (functional genomics), including high-throughput methods and nanotechnology, will be emphasized. Pre: 3114 or 4116 or BIOL 3774. (3H,3C) II.

**4074: CAREER ORIENTATION**

Examination of various career opportunities for biochemists in industry, academia, medicine and related health sciences. Introduction to resources for locating career opportunities, resume preparation and interview skills. Restricted to biochemistry majors and minors. Junior standing required. I Pass/Fail only. Co: 4115. (1H,1C)

**4115-4116: GENERAL BIOCHEMISTRY**

Metabolism and chemistry of carbohydrates, proteins, lipids, and nucleic acids with emphasis on interactions and comparative aspects of microbial, plant, and animal forms. For students in the biochemistry curriculum and other students interested in a foundation course. (Students are required to have at least a C- in both Chem 2535 and 2536 to be admitted to BCHM 4115). Pre: (CHEM 2535 or CHEM 2565), (CHEM 2536 or CHEM 2566) for 4115; 4115 for 4116. 4115: (4H,4C) 4116: (3H,3C) I,II.

**4124: LABORATORY PROBLEMS IN BIOCHEMISTRY AND MOLECULAR BIOLOGY**

Presentation of major analytical techniques of importance to biochemistry and molecular biology, including spectrophotometry, electrophoresis, chromatography. Lab study of selected principles and methods used in biochemistry and molecular biology. Pre: 4115, (CHEM 2114, CHEM 2124) or (CHEM 3114, CHEM 3124). Co: 4116. (3H,9L,6C) I,II.

**4754: INTERNSHIP**

Variable credit course.

**4784 (BIOL 4784): APPLICATIONS IN MOLECULAR LIFE SCIENCE**

Synthesis and application of biochemistry, cell biologies, genetics, genomics, physiology, immunology concepts and techniques to address medical and agricultural problems. Gene characterization and manipulation, protein-based drugs, diagnostics, vaccines, transgenic plants/animals. Analysis, critique, application of research in molecular life science. Pre: (3114, 3124, BIOL 3774, BIOL 4774) or (BCHM 4116, BCHM 4124). (3H,3C)

**4974: INDEPENDENT STUDY**

Variable credit course.

**4974H: INDEPENDENT STUDY**

Honors section.

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

**4994H: UNDERGRADUATE RESEARCH**

Honors section.

Variable credit course.

## Overview

The biological sciences curriculum is designed to provide a broad education in the fundamentals of the discipline: ecology, evolutionary biology, genetics, and cell and molecular biology. It also allows selection of courses to prepare students for the health professions and for graduate training in ecology, environmental biology, microbiology, botany, zoology, cell biology, molecular biology, structural biology and related fields. In addition, students are provided the core background for employment opportunities in biotechnology, food science, bioinformatics, bio-business, and health-related industries.

## Preparation for Advanced Study

### Graduate Study

Students who satisfactorily complete the undergraduate curriculum in biological sciences or related fields may pursue advanced studies leading to the M.S. or Ph.D. in various branches of the biological sciences.

### Preparation for Medicine

The training afforded by the first three years (approximately 96 hours) meets the pre-medical training requirements of medical colleges that accept students with only three years of undergraduate work. It is strongly recommended, however, that all students complete the B.S. before entering medical school.

### Preparation for Dentistry

Dental colleges require a minimum of three years of college training for admission, but it is generally advisable for students to complete the B.S. before entering dental school.

### Preparation for Allied Health Professions

Schools of Allied Health Professions, such as nursing, pharmacy, medical technology, physical therapy, etc., require two or more years of

college work for admission. Specific requirements are available from Career Services or the Biological Sciences Department.

## Preparation for Veterinary Medicine

Veterinary schools require a minimum of three years of college training for admission. Few students who meet only the minimum entrance requirements are accepted by veterinary schools.

## Major Requirements

The requirements for the biological sciences major include, in addition to the university Curriculum for Liberal Education and college core curricula: Principles of Biology (6 hours); Biological Principles lab (2 hours); Genetics (3 hours); Cell and Molecular Biology (3 hours); Ecology (3 hours); Evolutionary Biology (3 hours); and General Microbiology and Lab (4 hours) or Plant Biology (3 hours) or General Zoology (3 hours); and biological science electives (19 hours including two 3000/4000-level lab courses). Cognate sciences required are: General Chemistry (8 hours); Organic Chemistry (8 hours); and General Physics (8 hours). Math requirements are: 6 hours of mathematical sciences including successful completion of Math 2015 plus 3 hours of Statistics (Stat 3615).

## Minor Requirements

Requirements for the minor in biology include General Biology or Principles of Biology (6 hours); Biological Principles lab (2 hours); General Chemistry (6 hours) Genetics (3 hours); Cell and Molecular Biology (3 hours); Ecology (3 hours); Evolutionary Biology (3 hours); and two biology electives from a specified list for a minimum of 32 hours.

## Option

### Option in Microbiology/Immunology

Students interested in the microbiology/immunology option must meet the usual requirements for the B.S. in Biological Sciences. In addition, option students must take 12 of the 19 hours of required Biological Sciences elective credits in microbiology and biochemistry.

## Satisfactory Progress

University policy requires that students make satisfactory progress toward a degree by meeting minimum criteria toward the Curriculum for Liberal Education (see "[Academics](#)" chapter), toward the College of Science Core (see first part of this chapter), and required courses in Biological Sciences.

Satisfactory progress toward the B.S. in Biological Sciences requires that a student:

- 1) Earn a C (2.0) grade or better in each of BIOL 1105, 1106, 1125, 1126, and CHEM 1035, 1036, or the equivalent.
- 2) Achieve an overall GPA of 2.0 and an in-major GPA of 2.2 upon having attempted 45 hours (including transfer, advanced placement and pass/fail).
- 3) Upon having attempted 72 semester credits, students must have completed the following courses:

Biol 1105, 1106: Principles of Biology	6
Biol 1125, 1126: Biological Principles Lab	2
<b>Three of the following:</b>	
Biol 2004: Genetics	3
Biol 2104: Cell and Molecular Biology	3
Biol 2704: Evolutionary Biology	3
Biol 2804: Ecology	3
<b>Biology electives</b>	3
CHEM 1035, 1036: General Chemistry	6
CHEM 1045, 1046: General Chemistry Lab	2
CHEM 2535: Organic Chemistry	3
CHEM 2545: Organic Chemistry Lab	1
MATH 1016, 2015: Elementary Calc. w/ Trig.	6
<b>Credits</b>	<b>(41)</b>

## Undergraduate Courses (BIOL)

### Courses (BIOL)

#### 1004: BIOLOGY ORIENTATION SEMINAR

An introduction to academic and career planning for majors in Biology and students who may be considering Biology as a major. (1H,1C)

#### 1005,1006: GENERAL BIOLOGY

Primarily for those not majoring in the life sciences. General principles of biology and their relevance to society. 1005: Cell function and physiology, nutrition, circulation and water balance in plants and animals, hormones, nerves. 1006: Muscles, behavior, genetics, development, populations, evolution, ecology and the life kingdoms. (Duplicates 1105, 1106). (3H,3C) I,II.

#### 1015,1016: GENERAL BIOLOGY LAB

Primarily for students not majoring in the life sciences. Laboratory experiments emphasizing observation and experimental procedures to investigate biological processes and phenomena. 1015: Cell biology and genetics. 1016: Plant, animal and environmental biology. (Duplicates 1115, 1116; 1125, 1126). (2L,1C) I,II.

#### 1044: LIFE SCIENCES IN THE 21ST CENTURY

Emphasizes development of an awareness and appreciation of biology as part of human history and how the biological sciences will provide for future environmental, technological, cultural, social and government needs. This information should assist students in selecting an area of career-oriented study in the Life Sciences. (1H,1C)

#### 1105,1106: PRINCIPLES OF BIOLOGY

For students majoring in the life sciences. 1105: biological molecules, cell structure, metabolism, and reproduction; Mendelian and molecular genetics. 1106: animal and plant anatomy and physiology, ecology, and animal behavior. (Duplicates 1005, 1006). Co: 1116, 1115 for 1105. (3H,3C) I,II.

#### 1115,1116: PRINCIPLES OF BIOLOGY LABORATORY

Emphasizes biological principles through investigative exercises and collaborative learning. 1115: cell chemistry, physiology and reproduction and genetics; 1116: plant and animal form and function, and ecology. Primarily for students majoring in the life sciences. (Duplicates 1015 1016, 1125, 1126) . I,II. X-grade allowed. Co: 1105 for 1115; 1106 for 1116. (3L,1C)

#### 1125,1126: BIOLOGICAL PRINCIPLES LAB

Emphasizes biological principles through experimental design and collaborative learning. 1125: cell chemistry, physiology and reproduction, genetics and evolution. 1126: plant and animal form and function, and ecology. This writing intensive course is part of the Writing Across the Major option; these two laboratory courses plus three additional designated Biology courses will fulfill the Area I Writing Intensive requirement for Biology majors. Primarily for students majoring in Biology. (Duplicates 1015, 1016, 1115, 1116). Co: 1106, 1105 for 1125. (3L,1C) I,II.

#### 1205H,1206H: HONORS BIOLOGY

Emphasizes biological principles through investigative exercises and collaborative learning. 1205H: cell chemistry and structure, energy transformations, genetics and microevolution. 1206H: macroevolution, plant and animal physiology, populations, ecology and behavior. This is a writing intensive course. Simultaneous enrollment in laboratory required. For students who qualify for the University Honors Program. (Duplicates 1005, 1006; 1105,1106). (3H,3L,4C) I,II.

#### 2004: GENETICS

Mendelian transmission, chromosome behavior and organization, gene and chromosome mutation, genetic properties of nucleic acids, gene expression and development, DNA technology. X-grade allowed. Pre: (1005 or 1105 or 1205H), (1006 or 1106 or 1206H), (CHEM 1036 or CHEM 1056 or CHEM 1036H or CHEM 1056H or CHEM 1016). (3H,3C) I,II.

#### 2104: CELL AND MOLECULAR BIOLOGY

Fundamental molecular mechanisms essential for the function of prokaryotic and eukaryotic cells. Topics will include: organization and maintenance of cellular structure, energy production, transcriptional regulation, protein synthesis, regulatory pathways, cell-cell interactions and reproduction. Pre: (1005 or 1105 or 1205H), (1106 or 1206H or 1006), (CHEM 1036 or CHEM 1056 or CHEM 1016 or CHEM 1036H or CHEM 1056H). (3H,3C) I,II.

#### 2204: PLANTS AND CIVILIZATION

The uses of plants as sources of food, medicine, drugs, spices, beverages, poisons, fiber, oils, and plant exudates. I Pre: (1005, 1006) or (1105, 1106) or (1205H, 1206H). (3H,3C)

#### 2304 (HORT 2304): PLANT BIOLOGY

Introductory botany. Form, growth, function, reproduction, and ecological adaptations of major groups of plants. Pre: (1005, 1006) or (1105, 1106) or (1205H, 1206H). (3H,3C) I,II.

#### 2404 (ALS 2404): BIOTECHNOLOGY IN A GLOBAL SOCIETY

Introduction to the world-wide impact of biotechnology and molecular biology, including applications to plants, animals, and microorganisms. Explores basic concepts of genetic engineering, scientific and ethical issues, and public concerns related to biotechnology. Topics include: environmental release of genetically engineering organisms, bioremediation, safety of genetically engineered food products, transgenic plants and animals, gene therapy, and genetic screening. Pre: (1005, 1006) or (1105, 1106) or (1205H, 1206H), CHEM 1015, CHEM 1016. (3H,3C) II.

#### 2504: GENERAL ZOOLOGY

Morphology, features, adaptations, and ecology of major animal groups, emphasizing major patterns of evolutionary change. Pre: (1005 or 1105 or 1205H), (1006 or 1106 or 1206H). (3H,3C) I,II.

#### 2604: GENERAL MICROBIOLOGY

Microbial structure, function, metabolism, genetics and ecology. The role of microorganisms in host/parasite relationships will be emphasized. Pre: (CHEM 1015, CHEM 1016) or (CHEM 1035, CHEM 1036) or (BIOL 1205H, BIOL 1206H), (BIOL 1005, BIOL 1006) or (BIOL 1105, BIOL 1106). (3H,3C) I,II.

#### 2604H: HONORS GENERAL MICROBIOLOGY

Microbial structure, function, metabolism, genetics and ecology. The role of microorganisms in host/parasite relationships will be emphasized. Additional written assignments, class discussions, and readings from the primary literature will be required. Pre: (1005, 1006) or (1105, 1106) or (1205H, 1206H), (CHEM 1015, CHEM 1016) or (CHEM 1035, CHEM 1036). (3H,3C)

#### 2614: GENERAL MICROBIOLOGY LABORATORY

Introduction to microbiological techniques and procedures. Pre: 2604. Co: 2604. (3L,1C) I,II.

#### 2704: EVOLUTIONARY BIOLOGY

Evolutionary mechanisms, systematic principles, and theories of the origin and evolution of life. Pre: (1005 or 1105 or 1205H), (1006 or 1106 or 1206H). (3H,3C) I,II.

#### 2804: ECOLOGY

Fundamental interaction of organisms with the biotic and abiotic components of ecosystems. Topics will include: physical environment and organismic interactions, concepts of population ecology and community ecology, ecosystems interactions, and environmental problems. Pre: (1005 or 1105 or 1205H), (1006 or 1106 or 1206H). (3H,3C) I,II.

#### 2974: INDEPENDENT STUDY

Variable credit course.

#### 2974H: INDEPENDENT STUDY

Honors section.

Variable credit course.

#### 2984: SPECIAL STUDY

Variable credit course.

#### 3014 (ENT 3014): INSECT BIOLOGY

Insect biology provides an introduction to the science of entomology. The course covers the diversity of insects, their biology and behavior, the importance of insects and insect control programs in agriculture, and the effects that insects have had on human history and culture. Laboratory (3024) is optional. I Pre: (1005, 1006) or (1105, 1106) or (1205H, 1206H). (2H,2C)

#### 3024 (ENT 3024): INSECT BIOLOGY LABORATORY

Taxonomy and ecology of insects commonly encountered. Identification of all orders and many common families. Ecological attributes of each taxon, including food, habitat, life cycle, and behavior. An insect collection is required. I Pre: (1005, 1006) or (1105, 1106) or (1205H, 1206H). Co: 3014. (1H,3L,2C)

#### 3114: FIELD AND LABORATORY ECOLOGY

Experimental and field studies of population growth, competition, stressed ecosystems, plant distribution, and other interactions of plants, animals and microbes with their environments. Several required weekend field trips. Pre: 2804. (3L,1C) II.

#### 3124: CELL PHYSIOLOGY

Cell structure and metabolism, including enzymes, energy production, photosynthesis, membranes, nerve conduction, muscle contraction, and regulation of cellular activity. Pre: 2104, CHEM 2536. (3H,3C) I,II.

#### 3134: HUMAN GENETICS

Principles of genetic analysis in humans with emphasis on genetic diseases of humans; methods of karyotyping human chromosomes; methods of pedigree and genetic analysis of humans; principles, techniques, and analysis of twin studies in humans; techniques used to identify and characterize normal and abnormal chromosomes; principles and methods of DNA fingerprint analysis of humans. Pre: 2004 or 2104. (3H,3C)

#### 3204: PLANT TAXONOMY

Systematic survey of vascular plants, emphasizing identification, terminology, classification, evolutionary relationships. X-grade allowed. Pre: 2304. (2H,3L,3C) II.

#### 3254 (ENT 3254): MEDICAL AND VETERINARY ENTOMOLOGY

An introduction to the roles of insects and other arthropods in the direct causation of disease in humans and animals, and as vectors in the transmission of disease organisms. The epidemiology and replication cycles of vector-borne pathogens with major medical and veterinary importance will be examined. Information will be provided on the biology and behavior of disease vectors and external parasites, and on the annoying and venomous pests of humans and animals. Mechanisms of control will be discussed Pre: (1005, 1006) or (1105, 1105) or (1205H, 1206H). (3H,3C) II.

#### 3264 (ENT 3264): MEDICAL AND VETERINARY ENTOMOLOGY LABORATORY

Taxonomy and anatomy of insects and arthropods of medical and veterinary importance. Examination of feeding behavior and ecology. Emphasis on the mechanism of injury or pathogen transmission by each group. II. Pre: (1105, 1106) or (1005, 1006) or (1205H, 1206H). Co: 3254. (3L,1C)

#### 3404: INTRODUCTORY ANIMAL PHYSIOLOGY

A comparative systems level approach to the physiology of animals, emphasizing vertebrates: metabolic, temperature, osmotic, and ionic regulation; function of respiratory, circulatory, digestive, muscle, nervous, and locomotory systems; endocrine regulation and biological rhythms. Must have prerequisites or instructor's permission. Pre: (1005, 1006) or (1105, 1106). (3H,3C) II.

#### 3444 (PPWS 3444): EXPLAINING MOLECULAR CELL BIOLOGY

This writing-intensive course will enable students to improve both their own scientific writing and their understanding of the writing of specialists, scientists in other fields and lay readers. Topics include bacterial, plant, biomedical examples of major advances in molecular cell biology and biotechnology. Includes a review of current methodologies, in-class writing workshops and problem-solving sessions, mock press conferences, individual and team presentations, and individual conferences with the instructor. Pre: 2104. (3H,3C) II.

#### 3454: INTRODUCTORY PARASITOLOGY

Ecology, taxonomy, morphology, life cycles, pathogenesis, and host-parasite relationships of parasitic eukaryotes. I Pre: (1005 or 1105 or 1205H), (1006 or 1106 or 1206H). (3H,3L,4C)

#### 3504: HEALTH PROFESSIONS PRECEPTORSHIP

Cooperative shadowing experience in conjunction with select regional hospitals and local health provider. Students observe various medical or dental specialties under the supervision of health professionals. Selection by Director, Office of Health Professionals Advising, and prehealth advisors. Approval by health faculty and mentor required. Pre: junior standing; minimum overall GPA of 3.3. Pass/Fail only. Pre: 1105, 1106, CHEM 1036. (6L,2C)

#### 3504H: HOSPITAL PRECEPTORSHIP

Cooperative course with Montgomery County Hospital. Students work and study in the various divisions of the hospital under supervision of physicians and other health professionals. Selection by Biology and University Premedical committees and approval by the hospital required. I (6L,2C)

#### 3774: MOLECULAR BIOLOGY

Advanced study of the molecular biology of prokaryotic and eukaryotic cells, including mechanisms of gene expression and regulation, relative merits of experimental model systems, and practical applications in agriculture and medicine. Pre: 2104 or ALS 3104. (3H,3C) II.

#### 3954: STUDY ABROAD

Variable credit course.

#### 4004: FRESHWATER ECOLOGY

Interactions of physical, chemical, and biological properties of freshwater ecosystems. Senior standing required. Pre: 2804. (3H,3L,4C) I,II.

#### 4014: ENVIRONMENTAL TOXICOLOGY

Discussion of ecotoxicological and philosophical issues in the development of standards for control of toxic chemicals in freshwater, including site-specific examples, application of current control methods, recovery of damaged ecosystems, and government regulations. Pre: 2804. (2H,2C)

#### 4044 (GEOG 4044): BIOGEOGRAPHY

A survey of the field of biogeography. A study of the factors influencing the distribution of plants and animals approached from ecological, historical, and cultural perspectives. Human influence on biotic patterns, such as crop domestication, habitat alteration, species introductions and extinctions, management issues, and environmental change, is a primary force. Pre: 2804 or GEOG 1104. (3H,3C)

#### 4075-4076: BIOINFORMATICS METHODS

Application of bioinformatics methods in biological research. Begins with theory and methods for analysis of proteins and protein families, and progresses to analysis of complex data sets including whole genome sequences and gene expression. Laboratory begins with basic techniques for information gathering and molecular sequence and structure analysis, and progresses to analysis of genome sequences and gene expression data sets. The laboratory component will provide experience in use of standard bioinformatics software and databases. Pre: 3774, BCHM 3114. (2H,3L,3C)

#### 4104: DEVELOPMENTAL BIOLOGY

Morphological, physiological, and molecular events in embryological and developmental systems, including regulation at the level of transcription, translation, and enzyme or hormone activation. Pre: 2004. (3H,3C)

#### 4114: GLOBAL CHANGE ECOLOGY

Effects of human alteration of climate, landscapes and biogeochemical cycling on ecological structure and functioning at the global scale. Influence of global changes on ecosystem processes and biodiversity with paleo- and contemporary examples. Current and future potential feedbacks between biological systems and the global environment. Pre: 2704, 2804. (3H,3C)

#### 4134: EVOLUTIONARY GENETICS

Genetic variation, Hardy-Weinberg equilibrium, agents of change in gene frequencies, molecular evolution, mechanisms of speciation. Comparison of theoretical models with natural and laboratory populations. Pre: 2004. (3H,3C) II.

#### 4164 (CEE 4164) (CSES 4164) (ENSC 4164): ENVIRONMENTAL MICROBIOLOGY

Ecology, physiology, and diversity of soil and aquatic microorganisms; incorporates the significance of these topics within the context of environmental applications such as bioremediation, wastewater treatment, control of plant-pathogens in agriculture, and pollution abatement in natural systems. The laboratory portion of the course will stress methodology development, isolation and characterization of microorganisms from natural and engineered systems, and examination of the roles of microorganisms in biogeochemical cycling. Pre: 2604. (2H,3L,3C)

II.

#### 4204: DVLPMNTL PLANT ANAT

Microscopic structure of cells, tissues, and tissue systems of vascular plants in relation to growth, development, and physiology. Writing intensive. Even years. I Pre: 2304. (2H,6L,4C)

#### 4244: MYCOLOGY

Morphology, ecology, classification and field and laboratory study of fungi: form and function, uses by man, plant and animal pathogens, and role in ecosystems. Writing intensive. I Pre: 2304. (2H,6L,4C)

#### 4314: PLANT ECOLOGY

Introduction to ecology of terrestrial plants including major plant functional types, ecophysiological aspects of functional types, molecular plant ecology, behavior of populations, responses of plant communities to disturbance, and vegetation analysis. Laboratory covers methods for measuring and analyzing natural vegetation, and setting up field and greenhouse experiments. Pre: (2304 or 2804 or FOR 3314) or HORT 2304. (3H,3L,4C)

#### 4324 (GEOS 4324): PLANT EVOLUTION

Geological history, comparative morphology, evolution and systematics of pre-vascular and vascular plants. Focus on evolution of communities, adaptive construction of tissues and organs, and ecology of reproduction. Pre: 2304. (2H,6L,4C)

#### 4334: CHEMICAL ECOLOGY

Chemical interactions between organisms with emphasis on the plant biosphere. Fundamental concepts, theories, and general methodology of chemical ecology: mechanisms of chemically-mediated interactions; and engineering of natural chemical defenses in sustainable agriculture. Pre: (2304 or 2804 or FOR 2314 or BCHM 4115), CHEM 1035. (3H,3C)

#### 4354 (ENT 4354): AQUATIC ENTOMOLOGY

Biology and taxonomy of insects and other macroinvertebrates most commonly encountered in freshwater environments. Selected aspects of biology, such as habitat, feeding, locomotion, and life history. Identification of individual taxa, mostly at family and genus level. Significance of these organisms in aquatic ecology, pollution monitoring, and natural resource management. Pre: (1005, 1006), (1015, 1016) or (1105, 1106, 1115, 1116). (3H,3L,4C)

#### 4404: ORNITHOLOGY

Biology of birds, including functional anatomy, systematics, evolutionary history, behavior, and ecology. Laboratory on systematics, anatomy, and field experience in the areas of behavior and ecology. Pre: 2804. (3H,3L,4C) II.

#### 4434: MAMMALOLOGY

Biology of mammals including evolution, systematics, anatomy, physiology, and ecology. Laboratory on systematics, morphology, zoogeography, and diversity of North American mammals. I Pre: 2804. (3H,3L,4C)

#### 4454: INVERTEBRATE ZOOLOGY

Identification, morphology, evolutionary relationships, and natural history of free-living invertebrates, excluding insects. I Pre: 2504. (3H,3L,4C)

#### 4474: ETHOLOGY

An evolutionary and ecological approach to animal behavior, drawing on behavioral genetics, endocrinology, neurophysiology, and behavioral ecology to explain how and why the behavior of an organism is adapted to its environment. I Pre: 2504. (3H,3C)

#### 4484 (ENT 4484) (FIW 4484): FRESHWATER BIOMONITORING

Concepts and practices of using macroinvertebrates and fish to monitor the environmental health of freshwater ecosystems. Effects of different types of pollution and environmental stress on assemblages of organisms and underlying ecological principles. Role of biological studies in environmental regulation. Study design, field and laboratory methods, data analysis and interpretation, verbal and written presentation of results. Pre: (2804), (4004 or 4354 or ENT 4354 or FIW 4424 or FIW 4614). (3H,3L,4C)

#### 4524: ENVIRONMENTAL ANIMAL PHYSIOLOGY

Physiological adaptations to environmental factors, emphasizing vertebrate organ systems. Evolutionary and acclimatory processes will be considered. Must have prerequisites or instructor's permission. Writing intensive. Odd years. II. Pre: 3404. (3H,3C)

#### 4534: COMP ENDOCRINOLOGY

Physiology of endocrine systems, emphasizing vertebrates but including invertebrates. Mechanisms of hormone action, physiologic roles of hormones, and overall integration. Must have prerequisites or instructor's permission. I Pre: 3404. (3H,3C)

#### 4554 (ALS 4554): NEUROCHEMICAL REGULATION

Neurochemical transmission within the vertebrate brain will be examined. Emphasis will be placed on the chemical coding underlying the control of various behaviors and how these systems can be modified by various drugs or diet. Pre: (ALS 2304 or BIOL 3404), (CHEM 2535). (3H,3C) II.

#### 4564: INFECTIOUS DISEASE ECOLOGY

Principles of infectious disease dynamics from ecological and evolutionary perspectives. Examines a variety of wildlife hosts and disease-causing agents (bacteria, viruses, and parasites) using the framework of agent-host-environment interactions. Selective coverage of specific host and pathogen models to illustrate underlying principles of wildlife disease emergence, maintenance, and spread, as well as connections between wildlife and human health. Pre: 2704, 2804. (3H,3C)

#### 4574 (ALS 4574): SOCIAL BEHAVIOR OF BIRDS AND MAMMALS

This course examines origins, influences and implications of social behavior in a variety of avian and mammalian species. Emphasis is placed on understanding group organization and dynamics in inter and intra species situations. Experimental data from several disciplines (e.g., genetics, physiology, biochemistry) are reviewed to demonstrate their associations with behavioral adaptive mechanisms. Avian and mammalian species

living in wild, zoo, agricultural companion and laboratory settings are discussed. Pre: 1106, ALS 3104 or BIOL 2004. (3H,3C)

#### 4604 (FST 4604): FOOD MICROBIOLOGY

Role of microorganisms in foodborne illness and food quality, spoilage, and preservation. Control and destruction of microorganisms in foods. Pre: 2614, 2604. (3H,3L,4C) II.

#### 4624: MICROBIAL GENETICS

Molecular genetics of bacteria and their associated plasmids and phages. I Pre: 2004, (2604 or 2604H). (3H,3C)

#### 4634: MICROBIAL PHYSIOLOGY

The study of the structure, function and metabolic activities of prokaryotic microorganisms. Topics covered included cell composition and growth, metabolic unity and diversity, patterns of regulation, transport mechanisms, environmental sensing and response and cellular differentiation processes. (BIOL 4624 is recommended, but not required.) Pre: (2604 or 2604H), (2104 or 2004). (3H,3C)

#### 4644: MICROBIAL MOLECULAR GENETICS AND PHYSIOLOGY LABORATORY

Introduction to classical and molecular methods used for the study of bacterial genetics and physiology. Laboratory exercises cover analysis of patterns of gene regulation; assay of enzymatic activities; mutagenesis followed by selection, screening, and physiological characterization of mutant strains; genome database utilization; and large scale fermentation. Pre: 4624. (1H,6L,3C)

#### 4664: VIROLOGY

Classification, structure, pathogenesis, host response, and replication strategies of viruses of bacteria, plants, and animals, stressing mechanisms elucidated by molecular biological techniques. I Pre: 2104, (2604 or 2604H), 2614. (3H,3C)

#### 4674: PATHOGENIC BACTERIOLOGY

Characteristics of bacteria that cause human disease, nature of infectious processes, virulence factors, epidemiology, resistance, immunization. Pre: 2004, 2104, (2604 or 2604H), 2614. (3H,3C)

#### 4704: IMMUNOLOGY

Immunochemistry of antigens and antibodies, serological reactions, chemistry of complement, control of immunity, immune response of an intact animal. Pre: CHEM 2536 or BIOL 2104. (3H,3C)

#### 4714: IMMUNOLOGY LABORATORY

Serological and immunobiological techniques used to interpret the consequences of an immune response. Pre: 4704. (3L,1C) I,II.

#### 4724: PATHOGENIC BACTERIOLOGY LAB

Microbiological techniques used in the laboratory to identify and characterize bacteria that cause infectious diseases. Pre: 2004, 2104, (2604 or 2604H), 2614. Co: 4674. (3L,1C)

#### 4734: INFLAMMATION BIOLOGY

Cellular and molecular pathways controlling human responses to inflammatory challenges. Regulation of immune cells during inflammation. Interaction of host cells and tissues with environmental risk factors that cause inflammation. Pathogenesis of inflammatory diseases including cardiovascular diseases, diabetes, multi-organ failure, aging, neurological diseases and sepsis. Therapeutic intervention of inflammatory diseases. Pre: 2104. (3H,3C)

#### 4764: CAPSTONE MICROBIOLOGY AND IMMUNOLOGY SEMINAR

Review and discussion of contemporary research topics in microbiology and immunology, methods of research data analysis, the research publication process, research presentation and interview skills, career paths for microbiology and immunology graduates, preparation for graduate school, preparation for entry into the job market. Pass/Fail only. Co: 4624. (2H,2C)

#### 4774: MOLECULAR BIOLOGY LAB

An introduction to recombinant DNA methods, including restriction endonuclease digestion, gel electrophoresis, cloning, Southern blotting, polymerase chain reaction, sequencing and analysis of reporter gene expression in transgenic organisms. BIOL 3774 may be taken as a corequisite with 4774. I,II. Pre: 3774. (1H,6L,3C)

#### 4784: BIOTECHNOLOGY APPLICATIONS

Covers medical, agricultural, environmental and industrial biotechnology and their ethical, legal and social implications. Includes the commercial exploitation of microbes, plants, and animals, plus safety of the food supply, conservation genetics, use in forensic science, patent laws, and the regulations governing biotechnology in the U.S. and overseas. Does not count as Biology elective for biology majors/minors. Pre: BCHM 3114, BCHM 3124, (BIOL 3774, BIOL 4774) or (BCHM 4116, BCHM 4124). (3H,3C) II.

#### 4804: PROKARYOTIC DIVERSITY

The study of the vast array of physiological, morphological, and behavioral properties of prokaryotes. Topics include: modern prokaryotic classification, prokaryotic diversity, relationship and importance to cell and molecular biology and biochemistry, application and use in industry and agriculture, and to the maintenance of the biosphere. Must have pre-requisites or consent of the instructor. Pre: (2604 or 2604H), 2614, (3124 or 4634 or BCHM 3114). (3H,3C)

#### 4844: PROTEOMICS AND BIOLOGICAL MASS SPECTROMETRY

Introduction to mass spectrometry (MS) instrumentation and advanced proteomic methods for systems biology applications. Peptide mass fingerprinting, tandem MS, quantitation, phospho/glyco proteomics, and bioinformatics tools for evaluation and interpretation of mass spectrometry data. Pre: 2104, CHEM 2536, PHYS 2205, PHYS 2206. (3H,3C)

#### 4854: CYTOGENETICS

Structure and function of eukaryotic chromosomes, with emphasis on (i) use of model systems to study specific chromosome substructures or functions; (ii) techniques used to identify and classify both normal and aberrant chromosomes; and (iii) diseases caused by defective chromosome structure and/or function. Pre: 2004, 2104. (3H,3C)

**4874: CANCER BIOLOGY**

The molecular and cellular basis of cancer, including viral and cellular oncogenes, tumor suppression mechanics, cellular immortality, genomic integrity, angiogenesis, metastasis, and traditional and developing theories. Pre: 2004, 2104. (3H,3C)

**4884: CELL BIOLOGY**

Advanced study of the inner workings of eukaryotic cells, including membrane structure and function, protein secretion, the cytoskeleton, cell cycle control and intercellular communication. Pre: 3774 or BCHM 4116. (3H,3C) II.

**4964: FIELD STUDY**

Pass/Fail only. Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4974H: INDEPENDENT STUDY**

Honors section. Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course. X-grade allowed.

**4994H: UNDERGRADUATE RESEARCH**

Honors section. Variable credit course.

## Overview

The Chemistry Department offers two undergraduate programs: the B.S. in Chemistry and the B.A. in Chemistry. The B.S. curriculum provides the breadth and depth to give graduates a wide choice of career options, including further graduate studies. The Chemistry Department is approved by the American Chemical Society's Committee on Professional Training and the B.S. degree meets the guidelines for an ACS-certified degree. The B.A. program has fewer required chemistry courses, allowing students to design a chemistry program with more electives to meet a wider set of career goals. The B.A. is often chosen by students who wish to pursue a double major or to take other courses to prepare for professional school, law, or business. Either the B.S. or the B.A. degree is suitable to prepare for high school teaching. The Chemistry Department supports and encourages all chemistry majors to pursue undergraduate research sometime during their degree program.

## Graduate Program

The Department offers M.S. and Ph.D. degrees with specializations in many areas of chemistry. (See the Graduate Catalog for further information.)

## Bachelor of Science

For students graduating in calendar year 2012.

First Year	
<i>First Semester</i>	
CHEM 1055: General Chemistry for Majors <sup>1</sup>	(4)
CHEM 1065: General Chemistry for Majors Lab	(1)
ENGL 1105: Freshman English	(3)

MATH 1114: Elementary Linear Algebra	(2)
MATH 1205: Calculus	(3)
Electives <sup>2</sup>	(3)
<b>Credits</b>	<b>(16)</b>
<i>Second Semester</i>	
CHEM 1056: General Chemistry for Majors <sup>1</sup>	(4)
CHEM 1066: General Chemistry for Majors Lab	(1)

<b>Credits</b>	<b>(14)</b>
<i>Second Semester</i>	
CHEM 4414: Inorganic Chemistry Laboratory	(2)
CHEM 4XXX CHEM/BCHM/BIOC/CHE elective, 4000-level or higher	(3)
Electives <sup>2</sup>	(9)
<b>Credits</b>	<b>(14)</b>
<sup>1</sup> Minimum grade requirements:	
<sup>2</sup> Electives must include Curriculum for Liberal Education requirements.	

## Bachelor of Arts

<b>First Year</b>	
<i>First Semester</i>	
CHEM 1055: General Chemistry for Majors <sup>1</sup>	(4)
CHEM 1065: General Chemistry for Majors Lab	(1)
ENGL 1105: Freshman English	(3)
MATH 1015: Elementary Calculus with Trigonometry I	(3)
Electives <sup>2</sup>	(3)
<b>Credits</b>	<b>(14)</b>
<i>Second Semester</i>	
CHEM 1056: General Chemistry <sup>1</sup>	(4)
CHEM 1066: General Chemistry Lab	(1)
ENGL 1106: Freshman English	(3)
MATH 1016: Elementary Calculus with Trigonometry I	(3)
Electives <sup>2</sup>	(4)
<b>Credits</b>	<b>(15)</b>
<b>Second Year</b>	
<i>First Semester</i>	
CHEM 2154: Analytical Chemistry for Majors	(4)
CHEM 2164: Analytical Chemistry Lab for Majors	(1)
CHEM 2565: Principles of Organic Chemistry <sup>1</sup>	(3)
CHEM 2545: Organic Chemistry Lab	(1)
MATH 2015: Elementary Calculus with Trigonometry II	(3)
PHYS 2205: General Physics	(3)
PHYS 2215: Physics Lab	(1)
<b>Credits</b>	<b>(16)</b>
<i>Second Semester</i>	
CHEM 2566: Principles of Organic Chemistry	(3)
CHEM 2546: Organic Chemistry Lab	(1)
CHEM 4014: Survey Chemical Literature	(1)
CHEM 2424: Descriptive Inorganic Chemistry	(3)
MATH 2016: Elementary Calculus with Trigonometry II	(3)
PHYS 2206: General Physics	(3)
PHYS 2216: Physics Lab	(1)
<b>Credits</b>	<b>(15)</b>
<b>Third Year</b>	
<i>First Semester</i>	

CHEM 4615: Physical Chemistry for Life Sciences	(3)
CS/STAT XXXX Computer Science or Statistics elective (Not CS 1004)	(3)
Electives <sup>2</sup>	(9)
<b>Credits</b>	<b>(15)</b>
<i>Second Semester</i>	
CHEM 4616: Physical Chemistry for Life Sciences	(3)
CHEM 3625: Physical Chemistry Lab	(1)
Electives <sup>2</sup>	(11)
<b>Credits</b>	<b>(15)</b>
<b>Fourth Year</b>	
Electives <sup>2</sup>	(30)
<sup>1</sup> Minimum grade requirements:	
<sup>2</sup> Electives must include 6 hours of chemistry, biochemistry, or chemical engineering at the 3000-level or higher, and College and Curriculum for Liberal Education requirements.	

### Minor in Chemistry- For students graduating in 2011

<b>A.</b>	
CHEM 1035 & 1045: General Chemistry + Lab	(4)
CHEM 1036 & 1046: General Chemistry + Lab, or CHEM 2114 & 2124: Analytical Chemistry + Lab (may be taken instead of CHEM 1036 & 1046)	(4)
<b>B.</b>	
2535: Organic Chemistry	(3)
2536: Organic Chemistry	(3)
2545, 2546: Organic Chemistry Lab	(1-2)
2114: Analytical Chemistry or 3114: Analytical Chemistry for Life Sciences*	(3)
2124: Analytical Chemistry Lab or 3124: Analytical Chemistry for Life Sciences Lab*	(1)
CHEM 2114 & 2124 may be substituted for CHEM 2536 and 2546 only if not used towards fulfilling requirement A.	
<b>C.</b> Two additional 3-credit chemistry courses at the 3000- level or higher and higher, excluding 4014 and 4024.	
<b>D.</b> Overall minor GPA for chemistry courses must be a 2.0 or higher.	

### Minor in Chemistry- For students graduating in 2012

<b>A.</b>	
CHEM 1035 & 1045: General Chemistry + Lab	(4)
CHEM 1036 & 1046: General Chemistry + Lab	(4)
CHEM 2535 & 2545: Organic Chemistry + Lab	(4)
CHEM 2536 & 2546: Organic Chemistry + Lab	(4)
CHEM 4615 Physical Chemistry for Life Sciences OR CHEM 3615 Physical Chemistry	(3)
<b>B.</b>	
One additional 3-credit chemistry lecture not to duplicate what has been taken already. (CHEM 2114, 2424, 3616, 4514, 4534, 4554, 4616, 4994)	
<b>C.</b> All courses used to fulfill the minor will count toward the minor GPA, and the student's overall GPA for these courses must be a 2.0 or higher.	

D. Acceptable substitutions: CHEM 1055-1056 (for CHEM 1035-1036); CHEM 1065-1066 (for CHEM 1045-1046); CHEM 2154 (for CHEM 2114); CHEM 2565-2566 (for CHEM 2535-2536); CHEM 3616 (for CHEM 4616)

## Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the Curriculum for Liberal Education (see "Academics" chapter in this catalog), toward the College of Science requirements (see first part of this chapter), and toward the degree in chemistry.

Satisfactory progress toward the degree in chemistry requires that:

1) Upon having attempted 72 semester credits (including transfer, advanced placement, advanced standing, credit-by-examination), students must have completed:

### ***B.S. in Chemistry***

CHEM 1055, 1056: General Chemistry for Majors	8
CHEM 1065, 1066: General Chemistry for Majors Lab	2
CHEM 2565, 2566: Principles of Organic Chemistry	6
CHEM 2555, 2556: Org. Syn. & Tech Lab	4
CHEM 2154: Analytical Chemistry for Majors	3
CHEM 2164: Analytical Chemistry Lab for Majors	1
CHEM 3615: Physical Chemistry	3
MATH 1114: Elementary Linear Algebra	2
MATH 1224: Vector Geometry	2
MATH 1205, 1206: Calculus	6
MATH 2224: Multivariable Calculus	3
PHYS 2305: Foundations of Physics	4
<b>Credits</b>	<b>(44)</b>

### ***B.A. in Chemistry***

CHEM 1055, 1056: General Chemistry for Majors	8
CHEM 1065, 1066: General Chemistry for Majors Lab	2
CHEM 2565, 2566: Principles of Organic Chemistry	6
CHEM 2545, 2546: Organic Chemistry Lab	2
CHEM 2154: Analytical Chemistry for Majors	3
CHEM 2164: Analytical Chem Lab for Majors	1
MATH 1015, 1016: Elem. Calc I w/ Trig.	6
MATH 2015, 2016: Elem. Calc. II w/ Trig	6
PHYS 2205, 2206: General Physics	6
PHYS 2215, 2216: Physics Lab	2
<b>Total Credits</b>	<b>(42)</b>

## Undergraduate Courses (CHEM)

### 1015-1016: INTRODUCTION TO CHEMISTRY

For students enrolled in curricula other than science or engineering. Chemical principles applied to material, environmental, and life sciences. (Duplicates 1035-1036.) (3H,3C)

### 1025-1026: INTRODUCTION TO CHEMISTRY LABORATORY

Accompanies 1015-1016, where lab work is required in a student's curriculum. Must be taken concurrently and in phase with lecture sequence, 1015-1016. In both semesters, experiments illustrate principles covered in lecture. (Duplicates 1045-1046.) Co: 1015 for 1025; 1016 for 1026. (3L,1C)

#### 1035-1036: GENERAL CHEMISTRY

Principles of the science, character of the elements and their more important compounds, solution of chemical problems, and important applications. (Duplicates 1015-1016.) (3H,3C)

#### 1035H,1036H: HONORS GENERAL CHEMISTRY

More in-depth treatment of the principles of the science, character of the elements and their more important compounds, solution of chemical problems, and important applications. (Duplicates 1015-1016) (3H,3C)

#### 1045-1046: GENERAL CHEMISTRY LAB

Accompanies 1035-1036. Selected experiments illustrate principles taught in lecture. (Duplicates 1025-1026). Co: 1035H, 1035 for 1045; 1036 for 1046. (3L,1C)

#### 1055-1056: GENERAL CHEMISTRY FOR CHEMISTRY MAJORS

In depth treatment of chemical bonding, thermodynamics, chemical equilibrium, reaction kinetics, descriptive chemistry of the elements, acid-base chemistry, chemistry of gases, liquids and solids, and other topics. This class is restricted to chemistry majors. Co: 1065 for 1055; 1066, 1066 for 1056. (4H,4C)

#### 1055H-1056H: HONORS GENERAL CHEM FOR MAJORS

Co: 1065 for 1055H; 1066, 1066 for 1056H. (4H,4C)

#### 1065-1066: GENERAL CHEMISTRY FOR CHEMISTRY MAJORS LAB

Accompanies 1055-1056. Selected experiments illustrate principles taught in lecture. This class is restricted to chemistry majors. Co: 1055 for 1065; 1056 for 1066. (3L,1C)

#### 2114: ANALYTICAL CHEMISTRY

A first course in analytical chemistry. Topics covered include volumetric and gravimetric analysis, and elementary spectroscopy. Pre: 1036 or 1056. Co: 2124. (3H,3C)

#### 2124: ANALYTICAL CHEMISTRY LABORATORY TECHNIQUES AND PRACTICE

Practical introduction to wet methods of quantitative chemical analysis based on fundamental chemical principles. Pre: (1046 or 1066), 2114. Co: 2114. (3L,1C)

#### 2154: ANALYTICAL CHEMISTRY FOR CHEMISTRY MAJORS

A one-semester course in analytical chemistry emphasizing the principles of equilibrium with examples from acid-base, complexation, solubility, and redox chemistry. The course also introduces the principles of spectroscopic, electrochemical, and chromatographic instrumentation. Pre: 1036 or 1036H or 1056 or 1056H. Co: 2164. (4H,4C)

#### 2164: ANALYTICAL CHEMISTRY FOR CHEMISTRY MAJORS LAB

A one-semester laboratory course in analytical chemistry that provides practical training in wet chemical methods, atomic and molecular spectroscopy, electrochemistry, and separations. Pre: 1046 or 1066. Co: 2154. (3L,1C)

#### 2424: DESCRIPTIVE INORGANIC CHEMISTRY

Application of fundamental principles in a systematic study of bonding and reactivity of the elements and their compounds. Pre: 1036 or 1056. (3H,3C)

#### 2514: SURVEY OF ORGANIC CHEMISTRY

Short course in fundamentals of organic chemistry with emphasis on nomenclature, isomerism, and properties of organic compounds. Compounds of importance to biology and biochemistry stressed. (Prior credit for 2535 precludes credit for this course.) One year of Chemistry required. (3H,3C)

#### 2535-2536: ORGANIC CHEMISTRY

Structure, stereochemistry, reactions, and synthesis of organic compounds. Pre: 1036 or 1056 or 1056H or 1036H for 2535; 2535 or (2565 or 2565H) for 2536. (3H,3C)

#### 2545-2546: ORGANIC CHEMISTRY LABORATORY

[The laboratory accompanies lectures in organic chemistry 2535 and 2536. Pre: 1046 or 1066 for 2545; 2545 for 2546. Co: 2565, 2535 for 2545; 2536 for 2546. (3L,1C)

#### 2555-2556: ORGANIC SYNTHESIS AND TECHNIQUES LAB

Synthesis and characterization of organic compounds using modern laboratory techniques. Pre: 2566 for 2555; 2555 for 2556. (6L,2C) 2555: II; 2556:

#### 2565-2566: PRINCIPLES OF ORGANIC CHEMISTRY

Organic chemistry for chemistry majors. Structure and reactions of organic compounds, with emphasis on fundamental principles, theories, synthesis, and reaction mechanisms. The subject matter partially duplicates that of 2535-2536; no credit will be given for the duplicated courses. Pre: 1036 or 1056 or 1036H or 1056H for 2565; 2565 for 2566. (3H,3C)

#### 2565H-2566H: PRINCIPLES ORG CHEM

More in-depth treatment of organic chemistry for chemistry majors. Structure and reactions of organic compounds, with emphasis on fundamental principles, theories, synthesis, and reaction mechanisms. The subject matter partially duplicates that of 2535-2536; no credit will be given for the duplicated courses. (3H,3C)

**2964: FIELD STUDY**

Pass/Fail only. Variable credit course.

**2974: INDEPENDENT STUDY**

Variable credit course.

**2974H: INDEPENDENT STUDY**

Honors section. Variable credit course.

**2984: SPECIAL STUDY**

Variable credit course.

**3615-3616: PHYSICAL CHEMISTRY**

Principles of thermodynamics, kinetics, and quantum mechanics applied to chemical equilibria, reactivity, and structure. Partly duplicates 4615, cannot receive credit for both 3615 and 4615. Pre: (1036 or 1056), PHYS 2306, MATH 2224 for 3615; (3615, 1036 or 3615H), MATH 2214, (PHYS 2306 or PHYS 2176) for 3616. (3H,3C) 3615: I,II,III; 3616:

**3615H-3616H: HONORS PHYSICAL CHEMISTRY**

Principles of thermodynamics, kinetics, and quantum mechanics applied to chemical equilibria, reactivity, and structure. Partially duplicates 4615, cannot receive credit for both 3615H and 4615. 3615H requires additional work; consult the instructor. Pre: 1036, (PHYS 2306 or PHYS 2176) for 3615H; (3615, 1036 or 3615H), MATH 2214, (PHY S 2306 or PHYS 2176) for 3616H. (3H,3C) I,II,III.

**3625-3626: PHYSICAL CHEMISTRY LABORATORY**

Laboratory study of selected physico-chemical principles and methods. Data acquisition, data analysis, and report writing are stressed. Pre: 3615 or 4615 or 3615H for 3625; (3616 or 4616), 3625, 4014 for 3626. (3L,1C) 3625: I,II; 3626:

**4014: SURVEY OF CHEMICAL LITERATURE**

Use of the chemical literature as an aid to professional activities. Pre: Junior Major Standing. (1H,1C) I,II.

**4074 (MSE 4544): LABORATORY IN POLYMER SCIENCE** Experimental techniques used in the synthesis of various linear polymers, copolymers, and crosslinked networks. Determination of polymer molecular weights and molecular weight distribution. Methods used in the thermal, mechanical, and morphological characterization of polymeric systems. Graduate students in chemistry, P/F only. Pre: 3616, 4534. (1H,3L,2C)

**4114: INSTRUMENTAL ANALYSIS**

Principles of instrumental methods including data analysis, phase equilibrium, spectroscopy, and electrochemistry. Applications of modern instrumentation to chemical analyses using chromatography, electrophoresis, atomic and molecular spectroscopy, potentiometry, and voltammetry. Note: Graduate students will not be expected to take the corequisite lab 4124. Pre: 3616. Co: 4124. (3H,3C)

**4114H: HONORS INSTRUMENTAL ANALYSIS**

Pre: 3616. Co: 4124. (3H,3C)

**4124: INSTRUMENTAL ANALYSIS LABORATORY**

Hands-on experience with modern instrumental methods of analysis. Experiments use spectroscopy, electrochemistry, and separations. Co: 4114. (3L,1C)

**4404: PHYSICAL INORGANIC CHEMISTRY**

A study of spectroscopic, bonding, and structural properties of inorganic compounds. I Pre: (3616 or 3616H), 2424. (3H,3C)

**4414: INORGANIC CHEMISTRY LAB**

Synthesis and characterization of inorganic compounds using modern laboratory techniques. Pre: 2424, (3616 or 3616H), 4404. Co: 4424, 3616. (6L,2C) II.

**4514: GREEN CHEMISTRY**

Green chemistry applies the principles of prevention of toxic and hazardous waste, and energy efficiency to real world chemical products and processes. Emphasis is on case studies, problem solving, and life cycle analysis. Pre: 2536 or 2566. (3H,3C)

**4524: IDENTIFICATION OF ORGANIC COMPOUNDS**

Structure determination of organic compounds by spectroscopic methods, with an emphasis on mass spectrometry and nuclear magnetic resonance. Course will emphasize problem-solving skills. I. Pre: (2536 or 2566), (3616 or 4616). (3H,3C)

**4534: ORGANIC CHEMISTRY OF POLYMERS**

Structure, synthesis, and basic characteristics of the major classes of polymerization reactions including step-growth (condensation) and chain growth (addition), free radical, and ionic mechanisms. Pre: 2536 or 2566. (3H,3C)

**4554: DRUG CHEMISTRY**

Structure, synthesis, and physiological effects of major classes of pharmaceutical agents including CNS depressants and stimulants, analgesics, anesthetics, cardiovascular agents, chemotherapeutic drugs, and oral contraceptives. Pre: 2536 or 2566. (3H,3C) II.

**4615-4616: PHYSICAL CHEMISTRY FOR THE LIFE SCIENCES**

Principles of thermodynamics, chemical kinetics, and chemical bonding for students in the life sciences. 4615: Laws and applications of thermodynamics. 4616: Chemical kinetics and chemical bonding including spectroscopy. Partly duplicates 3615, cannot receive credit for 3615 and

4615. Pre: One year of chemistry, physics, and calculus. Pre: (1036 or 1056 or 1056H), (MATH 1026 or MATH 2015), (PHYS 2206 or PHYS 2306) for 4615; (1036 or 1056 or 1056H), (MATH 2016 or MATH 2224 or MATH 2214), (PHYS 2206 or PHYS 2306) for 4616. (3H,3C) I,II.

**4634 (MSE 4534): POLYMER AND SURFACE CHEMISTRY**

Physical chemical fundamentals of polymers and surfaces including adhesives and sealants. Pre: 3615 or 4615. (3H,3C) II.

**4654: ADHESIVE AND SEALANT SCIENCE**

Introduction to the fundamental and practical aspects of adhesives and sealants. Emphasis on synthesis of polymeric adhesive and sealant molecules, determination of physical properties of adhesives and sealants, chemical and physical characteristics of adherend surfaces, and mechanical behavior and durability of bonded systems - including metals, composites, polymers, and wood. I Pre: (3615 or 4615). (3H,3C)

**4754 (CSES 4754) (ENSC 4754): INSTRUMENTAL ANALYSIS FOR AGRICULTURAL AND ENVIRONMENTAL SCIENCES**

Theory and principles of common analytical instruments and their applications to agriculture and environmental science research. Topics include atomic absorption and emission spectroscopy, spectrophotometric methods (UV, visible, luminescence, and automation), chromatography, ion-selective electrodes, and microwave digestion. Infrared spectroscopy, atomic ratio and molecular mass spectroscopy, nuclear magnetic resonance will also be included. Provides hands-on experience with modern analytical instruments. Prerequisites or graduate standing required. Pre: (3114, 3124) or (CSES 3114, CSES 3124). (3H,3L,4C) II.

**4964: FIELD STUDY**

Pass/Fail only. Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4974H: INDEPENDENT STUDY**

Honors section. Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course. X-grade allowed.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

**4994H: UNDERGRADUATE RESEARCH**

Honors section. Variable credit course.

## Overview

Specialization in economics prepares a person for a wide variety of careers that emphasize the methods and consequences of analytical decision making in business and government and a broad understanding of the operation of the economy.

Economists are employed in private business and federal, state, and local governments. Economic analysis is directed at a wide range of problems including inflation and recession, environmental problems, taxation decisions, regulatory and antitrust problems, forecasting, and managerial decision making. Undergraduate work in economics also provides an excellent background for further study in law, political science, urban planning, and business administration.

## Degree Options

Science majors can earn a specialization within the major. Specializations include Public Policy, Macroeconomics and Finance, and Business Economics, among others. Requirements for the specialization include choosing from a list of related courses and having a high level of performance in both these courses and the rest of the. Students who complete a specialization will be presented at graduation with a Certificate of Specialization. Letters of reference written by the faculty at the student's request can also reflect this achievement.

## Degree Requirements

Majors in the College of Science are required to complete the core requirements for the college. The specific requirements for the degree include ECON 2005, 2006; ECON 3104, 3204 and either 3254 or 4304; BIT 2405-2406 or STAT 3005 (the latter is recommended); MATH 1114-1205-1206 (recommended), or 1015-1016-2015 or 1525-1526; and 15 hours of economics electives at the 3000 or 4000 level. The specific requirements are ECON 3104, 3204, 3254 or 4304 and 15 hours of economics electives at the 3000 or 4000 level.

Detailed checklists along with more detailed information can be found on Economics web page: [www.econ.vt.edu](http://www.econ.vt.edu) and in the department undergraduate office.

## Minor Requirements

A minor in economics requires ECON 2005, 2006, 3104, 3204, and two additional 3000- or 4000-level economics courses.

## 5-Year B.A./M.A.

The department offers a 5-year combined bachelor's and master's degree for students with a GPA of at least 3.5. See the undergraduate director for details.

## Honors Degree

The department also offers an honors degree. See the undergraduate director for details.

## Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the Curriculum for Liberal Education (see "[Academics](#)"), toward the College of Science Core (see first part of this chapter), and toward the degree in economics.

Satisfactory progress toward the B.A. and B.S. in Economics requires that:

1. Upon having attempted 72 semester credits (including transfer, advanced placement, advanced standing, credit by examination), students must:

- a. Have completed:

Econ 2005: Principles of Economics (micro)	3
Econ 2006: Principles of Economics (macro)	3
Econ 3104: Microeconomic Theory	3
Econ 3204: Macroeconomic Theory	3
Stat 3005 or BIT 2406	3
<b>Total Credits</b>	<b>15</b>

- b. Be registered in at least two 3-credit ECON courses during each on-campus semester of the regular academic year unless they have completed all ECON courses required for graduation;
  - c. Achieve a GPA of 2.0 or better in the major no later than having **attempted** 72 hours toward the degree;
  - d. Not repeat any ECON course required in the major more than once;
  - e. Not repeat more than 3 ECON courses in the major.
2. Upon having attempted 96 semester credits, students must have an in-major grade point average of 2.0 or above.

## Course Descriptions (ECON)

### 2005-2006: PRINCIPLES OF ECONOMICS

2005: Microeconomics. Consumer behavior and demand, firm behavior and supply, price determination and market equilibrium under varying industry structure. Applications to labor and financial markets. 2006: Macroeconomics. Measuring aggregate economic activity, macroeconomic problems (such as unemployment and inflation), the monetary system, effects and limitations of monetary and fiscal policies. (3H,3c)

### 2025H,2026H: HONORS PRINCIPLES OF ECONOMICS

2025H: Microeconomics. Consumer behavior and demand, firm behavior and supply, price determination and market equilibrium under varying industry structure. Applications to labor and financial markets. 2026H: Macroeconomics. Measuring aggregate economic activity, macroeconomic problems (such as unemployment and inflation), the monetary system, effects and limitations of monetary and fiscal policies. (3H,3c)

### 2974H: INDEPENDENT STUDY

Honors section. Variable credit course.

3004: CONTEMPORARY ECONOMIC ISSUES The economic analysis of current issues and problems. This course may be repeated with different topic. Pre: 2006 or 2115 or 2125 or 2026H. (3H,3c)

### 3014: ECONOMICS OF POVERTY

Economic analysis of poverty in America. Income distribution, definition and incidence of poverty, particularly among ethnic minorities and female-headed households. Causes and consequences of poverty, including: changes in the structure of the economy, changes in family structure, discrimination, the "culture of poverty", rural poverty, and homelessness. Analysis of public policies designed to alleviate poverty, including welfare, social security, and affirmative action policies in employment and in education. I (3H,3c)

### 3024: ECONOMIC JUSTICE

This course explores how different assumptions regarding the basis of claims for access to economic resources lead to different outcomes. Students will explore a variety of theories and examine their own beliefs about economic justice.

Pre: (2005 or 2025H), (2006 or 2006H). (3H,3c)

### 3104: MICROECONOMIC THEORY

Theories of demand, production, perfectly and imperfectly competitive price determination, and general market equilibrium. Analytic applications. Pre: Must complete ECON 2005 (with a C or better) and obtain (1) a C- or better in MATH 1205, 1206, and 1114 or (2) a B- or better in MATH 1525 and 1526 or (3) a B- or better in MATH 1015, 1016 and 2015. Pre: 2005, (MATH 1205, MATH 1206, MATH 1114) or (MATH 1525, MATH 1526) or (MATH 1015, MATH 1016, MATH 2015) or (MATH 1205, MATH 1526) or (MATH 1016, MATH 1526) or (MATH 1 205, MATH 2015, MATH 1114) or (MATH 1205, MATH 1206, MATH 1114H) or (MATH 1205, MATH 2015, MATH 1114H). (3H,3c)

### 3114: APPLIED MICROECONOMICS

Application of microeconomic theory in the analysis of policy issues and problems. Topics may include: welfare programs, substance abuse regulation, federalism, technical change, information economics, market regulation. Pre: (3104 or 4104H), (3254 or 4304). (3H,3c)

#### 3204: MACROECONOMIC THEORY

Theories of the determination of the level of aggregate economy-wide activity. Employment, the price level, aggregate national income, and the interest rate. The roles of money and expectations. Pre: (2006 or 2115 or 2125 or 2026H), (3104 or 4104H), (MATH 1206 or MATH 1526 or MAT H 2015). (3H,3c)

#### 3214: MONEY AND BANKING

Money and credit. The U.S. monetary system. Monetary theory, monetary policy and economic stabilization. Pre: (2005 or 2025H), 2006. (3H,3c)

#### 3224: APPLIED MACROECONOMICS

An introduction to macroeconomic policy analysis. Coverage of both empirically based theoretical issues and microcomputer based simulation of policy alternatives. Pre: 3204, (3254 or 4304). (3H,3c)

#### 3254: ANALYSIS OF ECONOMIC DATA

Sources of economic data. Application of spreadsheet and/or statistical software to analysis of economic relationships using graphical and regression techniques. Emphasis is on economic applications rather than statistical theory. Pre: (BIT 2405 or MSCI 2405, BIT 2406 or MSCI 2406) or STAT 3005 or STAT 4604 or STAT 4705 or STAT 4714. (3H,3c)

#### 4014: ENVIRONMENTAL ECONOMICS

Economic dimensions and aspects of programs designed to impose quality controls upon the environment. Special emphasis on problems of controlling air and water pollution. Pre: 2005 or 2116 or 2126 or 2025H. (3H,3c)

#### 4024: HISTORY OF ECONOMIC THOUGHT

Review of the emergence of economics as a discipline and science in England. Surveys of major thinkers, doctrines and theories, with emphasis on the policy issues that motivated their work. Pre: 2006. (3H,3c)

#### 4034: COMPARATIVE ECONOMIC SYSTEMS

Analysis of national economies, emphasizing structure differences, and differences in efficiency and distributive outcome which result from primary reliance on decentralized (market) allocation or centrally directed(planned) allocation. Pre: 2006. (3H,3c)

#### 4044: PUBLIC ECONOMICS

Economic rationale of the public sector. Proper size and functions of government. Market failure, Cost-benefit analysis, public goods provision. Pricing of public enterprise services. Pre: 3104 or 2025H. (3H,3c)

#### 4054: PUBLIC FINANCE

The structure and incidence of taxation in the U.S. Effects of taxes on incentives and economic efficiency. Tax Policy. Pre: 3104 or 2025H. (3H,3c)

#### 4064: COLLECTIVE DECISIONS

Economic analysis of methods for group decision making, voting rules, voting strategies and outcomes; cost-sharing problems; efficiency and equity impacts of government action. Pre: 3104 or 2025H. (3H,3c)

#### 4074: LABOR ECONOMICS

Human capital theory, labor supply and demand, discrimination, effects of labor unions and collective bargaining, wage differentials, income distribution. Pre: (2005 or 2116 or 2126 or 2025H, 3254). (3H,3c)

#### 4084: INDUSTRY STRUCTURE

The structure and performance of American industry. Dimensions and measures of market structure. Factors affecting market structure. The relationship between structure and performance. Purpose and effects of antitrust policy, regulation, and other public policies toward industry. Pre: 3104 or 4924. (3H,3c)

#### 4094: PUBLIC UTILITY AND TRANSPORTATION ECONOMICS

Policy issues centering on natural monopolies, such as transportation and utility networks. Profit and rate regulation, marginal cost pricing, public ownership. Issues of equity and efficiency in regulation of industry. Pre: 3104. (3H,3c)

#### 4124: GROWTH AND DEVELOPMENT

Theories of economic growth. Policies to foster growth, and their consequences. Pre: 2006, (2025H or 3104). (3H,3c)

#### 4135,4136 (AAEC 4135): INTERNATIONAL ECONOMICS

4135 International Trade: Factor mobility and commercial policy (tariffs, quotas, export licensing). 4136 International Finance: Liquidity, exchange rates, comparative international living standards, foreign aid. Pre: 3104 or 2025H for 4135; 3204 or 4204H for 4136. (3H,3c)

#### 4144: ECONOMICS OF CHINA

Evolution of the Chinese economy since 1949. Exposition of alternative economic systems, the commune, incentive problems, and state owned enterprises. Analysis of recent reforms and their effects on economic efficiency; and key issues of economic transition related to Russia and other East European countries. Pre: (3104 or 2025H). (3H,3c)

#### 4214: ECONOMICS OF HEALTH CARE

Effects of medical care on health; cost and production of medical care; demand for medical care and its financing; structure of the health care industry; reorganization for efficiency. Pre: 2005 or 2025H. (3H,3c)

**4224: U. S. ECONOMIC HISTORY**

U.S. economic history from the colonial period to the present. Structure and performance of the U.S. economy, including growth and development, with attention to the interplay between economics and politics. Pre: 2005, 2006. (3H,3c)

**4304: INTRODUCTION TO ECONOMETRIC METHODS**

An introduction to econometric modeling techniques, including regression methods. Particular emphasis on the special problems posed by economic data. Pre: STAT 3005. Co: 3204, 3104. (3H,3c)

**4404: ECONOMICS OF ORGANIZATIONS**

Economic theories of organization, with specific attention to their internal structure, and to design of incentive systems. Application to mergers, to the relationship between stockholders and managers, etc. Students with one year of economics, calculus and major in some other social science, by permission of the instructor. Pre: 3104 or 4924 or 2025H. (3H,3c)

**4414: ECONOMIC FORECASTING**

An introduction to economic forecasting -- theory, methods, and applications. Pre: 2006. (3H,3c)

**4424: THE THEORY OF GAMES AND ECONOMIC BEHAVIOR**

Introduction to games and solution concepts, such as prisoner's dilemma, noncooperative equilibrium and Nash's bargaining solution. These concepts are applied in analyzing economic problems including bargaining problems, oligopoly and agency. Pre: 3104 or 4104H. (3H,3c)

**4434: EXPERIMENTAL ECONOMICS**

This is a course in the use of laboratory methods to study behavior in economics and the social sciences. Students will study state-of-the-art methodology in experimental economics, including experimental design, laboratory technique, financial incentives, and analysis of data. Students will participate in, design, and conduct experiments in bargaining, auctions, asset markets, public goods and commons situations, and risky decision-making. Pre: (3104 or 2025H), (BIT 2406 or MSCI 2406 or STAT 2004 or STAT 3005). (3H,3c)

**4704: URBAN ECONOMY**

The economics of urbanization. Land values, location decisions, problems of transportation congestion, housing markets, and land use regulation. Pre: 2005. (3H,3c)

**4754: INTERNSHIP**

Qualified students are placed in an industry or government position under the combined supervision of a faculty member and a responsible supervisor in the employing agency. Satisfactory evaluation from employer, detailed reports on the internship experience and a specific project will be required of each intern.

Pre: Junior standing, QCA of 2.50 or better and consent. Pass/Fail only. Variable credit course. X-grade allowed. Pre: 2005.

**4894: LAW AND ECONOMICS** Analysis of the economic effects of legal rules, with emphasis on the law of property, contract, liability, and land use. Pre: 2005. (3H,3c)

**4924: MANAGERIAL ECONOMICS**

Economics of managerial decision-making. Production theory and cost, theory of the firm, market structure and firm interactions. Pre: 2005, MATH 1526 or MATH 1206 or MATH 2015. (3H,3c)

**4964: FIELD STUDY**

Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4974H: INDEPENDENT STUDY**

Honors section. Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

**4994H: UNDERGRADUATE RESEARCH**

Honors section. Variable credit course.

## Overview

Geosciences offer exciting opportunities for students with an interest in applying a full range of science and mathematical skills to understand the earth's properties and dynamic processes. This is a highly interdisciplinary program that applies physics, chemistry, biology, and mathematics to understand and manage all aspects of Earth and the environment. Geoscientists work everywhere in the world under almost any condition as they search for earth resources, manage the environment and natural hazards, and supervise technical and business enterprises. For more information about exciting careers in Geosciences consult [earthinspace.org/careers/](http://earthinspace.org/careers/), [www.agiweb.org/careers.html](http://www.agiweb.org/careers.html), and [www.bls.gov/oco/ocos050.htm](http://www.bls.gov/oco/ocos050.htm). The extensive scientific and mathematical skills of geoscientists, along with their broad field experience, allow them to pursue careers in many related fields ranging from material science to technical management to scientific reporting.

The internationally recognized faculty in Geosciences has developed four challenging options, described below, that lead to a B.S. in Geosciences. Coursework emphasizes the acquisition and processing of field data beginning with a special course in field methods taken in the spring of the first year. The geology option requires, and the other options recommend, that the student participate in a six-week field camp. The B.S. in Geosciences provides pre-professional preparation that will allow students to continue their education in post graduate programs in science, law, and business.

Earth systems and processes are enormously complicated and require a full range of intellectual skills to decipher and manage. Geoscientists must possess good quantitative skills and a solid understanding of physics, chemistry, and biology. They must be able to read maps, identify rocks, minerals, and fossils as well as visualize earth structures in three dimensions. They must have strong communication skills, both written and verbal. Learning to use these skills in an integrated way is a challenging and rewarding experience.

## Geology Option

The Geology option offers a detailed coverage of the broad range of classic disciplines within the geosciences. This option emphasized the study of minerals, rocks and fossils, and teaches the student how to understand the processes and history of the earth based on the occurrences and relationships of these materials at or near the Earth's surface. The required curriculum for undergraduates pursuing the B.S. in Geosciences with a option in Geology are; BIOL 1105, 1106, 1115, 1116 (8C); CHEM 1035, 1036, 1045, 1046 (8C); GEOS 1004, 1005, 1014, 1104, 2444, 3104, 3204, 3404, 3504, 3604, 3704, 4024, 4494, 4000 level courses (50C); MATH 1114, 1205, 1206, 1224, 2224 (13C);

## Geochemistry Option

The Geochemistry option is designed for those students who have special interest in the chemical aspects of the Earth and its materials. The required curriculum for undergraduates pursuing the B.S. in Geosciences with an option in Geochemistry are: CHEM 1035, 1036, 1045, 1046, plus 10 additional credits selected from 2114, 2124, 2514, 2535, 2536, 2545, 2546, 3114, 3124, 3615, 3625, 4615, 4616, or 4424 (18C); GEOS 1004, 1005, 1014, 1024, 1104, 1124, 2444, 3104, 3204, 3404, 3504, 3604, 3704, 4024, 4634, 4974 (43C); MATH 1114, 1205, 1206, 1224, 2214, 2224 (16C); PHYS 2305, 2306 (8C); STAT 3005 (3C); 3-4000 level additional courses from the Departments of Biochemistry, Biological Sciences, Chemical Engineering, Chemistry, Civil and Environmental Engineering, Computer Science, Crop and Soil Environmental Sciences, Engineering Science and Mechanics, Geosciences, Materials Science and Engineering, Mathematics, Mining and Minerals Engineering, Physics, or Statistics (7C); free electives (4C).

## Geophysics Option

The Geophysics option offers the student the opportunity to specialize in the branch of the geosciences that investigates physical earth processes such as earthquakes and that images the interior of the earth through surface-based physical measurements. The required courses for the B.S. in Geosciences with an option in Geophysics are: CHEM 1035, 1036, 1045, 1046 (8C); CS 1044 (3C); GEOS 1004, 1005, 1014, 1104, 2444, 3104, 3204, 3404, 3504, 3604, 3704, 4024, 4124, 4154, 4164, 4174, (46C); MATH 1114, 1205, 1206, 1224, 2214, 2224 (16C); PHYS 2305, 2306 (8C); Science/Math courses (6C); STAT 3005 (3C); free electives (6C).

## Earth Science Education Option

The Earth Science education option provides students with a broad earth science curriculum that meets the content goals for secondary earth science teaching. Certification for Earth science teaching is not provided in the program. Information about teaching certification in Virginia can be obtained from the Department of Teaching and Learning. The courses required to complete a B.S. in Geosciences with an option in Earth Science Education are: BIOL 1105, 1106, 1115, 1116 (8C); CHEM 1035, 1036, 1045, 1046, 2514 (11C); GEOS 1004, 1005, 1014, 1024, 1104, 1124, 2444, 3034, 3104, 3114, 3204, 3404, 3504, 3604, 3704, 4024, 3-4000 courses (48C); MATH 1114, 1205, 1206, 1224 (10C); PHYS 1055, 1115, 2305, 2306 (12C); STAT 3005 (3C); free electives (7C).

## Minor in Geosciences

Requirements include GEOS 1004, 1014, 1104 (8C); plus 3-4000 level courses in geosciences (12C). GEOS 2104 duplicates GEOS 1004 for 3 credits only. GEOS 4974 and 4994 may not be used toward the minimum of 20 total credits

## Graduate Program

The department offers M.S. and Ph.D. degrees in geosciences with specializations in many sub-disciplines. (See the [Graduate Catalog](#) for further information.)

## Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the Curriculum for Liberal Education (see Academics chapter in this catalog), toward the College of Science Core (see first part of this chapter) and toward the degree in geosciences.

Satisfactory progress toward the B.S. in Geosciences, **Geology option**, requires that:

1. Upon having attempted 72 semester credits (including transfer, advanced placement, advanced standing, credit by examination, course withdrawal policy), students must have completed:

CHEM 1035, 1036: General Chemistry	6
CHEM 1045, 1046: General Chemistry Lab	2
ENGL 1105, 1106: Freshman English	6
GEOS 1004: Physical Geology	3
GEOS 1005: Geoscience Fundamentals	1
GEOS 1104: Physical Geology Lab	1
GEOS 1014: The Earth and Life Through Time	4
GEOS 3104: Elementary Geophysics	3
GEOS 3404: Structural Geology	3

GEOS 3504: Mineralogy	3
MATH 1114: Elementary Linear Algebra	2
MATH 1205, 1206: Calculus	6
MATH 1224: Vector Geometry	2
MATH 2224: Multivariable Calculus	3
PHYS 2305, 2306: Foundations of Physics	8
<b>Total Credits</b>	<b>53</b>

2. Upon having **96** semester credits, students must have an in-major grade point average of 2.0 or above.

- Satisfactory progress toward the B.S. in Geosciences, **Geochemistry** option, requires that:

1. Upon having attempted **72** semester credits (including transfer, advanced placement, advanced standing, and credit by examination, course withdrawal policy), students must have completed:

CHEM 1035, 1036: General Chemistry	6
CHEM 1045, 1046: General Chemistry Lab	2
Chemistry electives	7
ENGL 1105, 1106: Freshman English	6
GEOS 1004: Physical Geology	3
GEOS 1005: Geoscience Fundamentals	1
GEOS 1104: Physical Geology Lab	1
GEOS 1014: The Earth and Life Through Time	4
GEOS 3504: Mineralogy	3
MATH 1114: Elementary Linear Algebra	2
MATH 1205, 1206: Calculus	6
MATH 1224: Vector Geometry	2
MATH 2214: Differential Equations	3
MATH 2224: Multivariable Calculus	3
<b>Total Credits</b>	<b>49</b>

2. Upon having **96** semester credits, students must have an in-major grade point average of 2.0 or above.

- Satisfactory progress toward the B.S. in Geosciences, **Geophysics** option, requires that:

1. Upon having attempted 72 semester credits (including transfer, advanced placement, advanced standing, credit by examination, course withdrawal policy), students must have completed:

CHEM 1035, 1036: General Chemistry	6
CHEM 1045, 1046: General Chemistry Lab	2
ENGL 1105, 1106 : Freshman English	6
GEOS 1004: Physical Geology	3
GEOS 1005: Geosciences Fundamentals	1
GEOS 1104: Physical Geology Lab	1
GEOS 1014: The Earth and Life Through Time	4
GEOS 3104: Elementary Geophysics	3
GEOS 3404: Structural Geology	3
GEOS 3504: Mineralogy	3
MATH 1114: Elementary Linear Algebra	2
MATH 1205, 1206: Calculus	6
MATH 1224: Vector Geometry	2
MATH 2214: Differential Equations	3
MATH 2224: Multivariable Calculus	3
PHYS 2305, 2306: Foundations of Physics	8
<b>Total Credits</b>	<b>56</b>

2. Upon having 96 semester credits, students must have an in-major grade point average of 2.0 or above.

- Satisfactory progress toward the B.S. in Geosciences, **Earth Science Education** option, requires that:

1. Upon having attempted **72** semester credits (including transfer, advanced placement, advanced standing, and credit by examination, course withdrawal policy), students must have completed:

CHEM 1035, 1036: General Chemistry	6
CHEM 1045, 1046: General Chemistry Lab	2
ENGL 1105, 1106: Freshman English	6
GEOS 1004: Physical Geology	3
GEOS 1005: Geoscience Fundamentals	1
GEOS 1104: Physical Geology Lab	1
GEOS 1014: The Earth and Life Through Time	4
GEOS 2444: Geoscience Field Observations	2
GEOS 3104: Elementary Geophysics	3
GEOS 3404: Elements of Structural Geology	3
GEOS 3504: Mineralogy	3
MATH 1114: Elementary Linear Algebra	2
MATH 1224: Vector Geometry	2
MATH 1205, 1206: Calculus	6
PHYS 2205, 2206: General PhysicsPHYS 2305, 2306 Foundations of Physics	8
<b>Total Credits</b>	<b>50</b>

2. Upon having **96** semester credits, students must have an in-major grade point average of 2.0 or above.

## Undergraduate Courses (GEOS)

### 1004: PHYSICAL GEOLOGY

Minerals and rocks, internal and external processes especially the modification of landscape, global plate tectonics, and their interrelationships; introduction to the more direct aspects of human interactions with the natural physical environment. (3H,3C)

### 1005-1006: GEOSCIENCE FUNDAMENTALS

Introduction to professional expectations and career options for students pursuing a degree in Geosciences. 1005: Scientific methodology, empirical reasoning, and the specific application of these methods to the Geosciences. Introduction to accessing and using geoscientific resources, computer graphics and database applications in geoscience, and methods of oral and written technical communication. 1006: Career opportunities in geoscience, introduction to research, GIS applications in geoscience, case studies of applied geoscience. Co: 1004 for 1005; 1014 for 1006. (3L,1C)

### 1014: THE EARTH AND LIFE THROUGH TIME

Scientific examination of rocks, fossils, and the earth's interior as clues to global-scale geological and biological processes that have shaped our planet and its biosphere through time. Origin and physical evolution of the earth, oceans, and atmosphere; origin and evolution of life; plate tectonics and mountain-building events; global climate changes; major evolutionary innovations; mass extinction events. (3H,3L,4C)

### 1024: RESOURCES GEOLOGY AND THE ENVIRONMENT

The nature, origin, occurrence, distribution, use, and limitations of the earth's mineral resources including abundant and scarce metals, precious metals and gems, building materials, industrial minerals, fossil fuels, nuclear energy, water, soils, and other minerals. (3H,3C)

### 1034: EARTH'S NATURAL HAZARDS

Natural geological hazards, their impact on human civilizations and what they tell us about the workings of our dynamic planet. Topics include what constitutes hazards and risks, mitigation strategies; tectonic hazards; land surface hazards; atmospheric hazards; solar system hazards. (3H,3C)

### 1104: PHYSICAL GEOLOGY LABORATORY

Identification of minerals and rocks; topographic maps and air photographs and their use in understanding landscape and geologic influences on human activities; geologic maps. (3L,1C)

### 1124: RESOURCES GEOLOGY AND THE ENVIRONMENT LABORATORY

Laboratory exercises dealing with the nature of mineral resources, how they are exploited, and the practical concerns associated with their extraction. (3L,1C)

### 2014: MISSION TO THE PLANETS

The physical, chemical, and geological nature of the terrestrial planets and their atmospheres; similarities and differences between the Earth and other terrestrial planets; manned and unmanned space probes and how they have shaped our understanding of the planets. (3H,3C)

#### 2104: ELEMENTS OF GEOLOGY

Structure of the earth, properties of minerals and rocks, and geologic processes that act on the surface and in the interior of the earth, and integrated geologic systems of importance in engineering and regional planning. For students in engineering and physical sciences. Geology 2104 duplicates material in Geology 1004 and both may not be taken for credit. (2H,3L,3C)

#### 2444: GEOSCIENCE FIELD OBSERVATIONS

Study of geological phenomena in the field. Students make observations in the field, integrate them into coherent datasets, and construct interpretations. Rock type and structure identification in outcrop. Field techniques and applications in structural geology, sedimentology, stratigraphy, geomorphology, environmental geology, hydrogeology, geochemistry, and geophysics. 10 full days spent in the field (Mondays through Fridays during Summer I), plus additional classroom or laboratory meetings. Pre: 1004, 1014, 1104. (6L,2C)

#### 2964: FIELD STUDY

Pass/Fail only. Variable credit course. X-grade allowed.

#### 2974: INDEPENDENT STUDY

Variable credit course.

#### 2974H: INDEPENDENT STUDY

Honors section. Variable credit course.

#### 2984: SPECIAL STUDY

Variable credit course. X-grade allowed.

#### 3014: ENVIRONMENTAL GEOSCIENCES

The roles of geology and geophysics in defining and monitoring the natural environment, with special application to interactions between humans and the geologic environment. Both descriptive treatment and quantitative concepts related to environmental processes involving the solid earth and earth's surface, with emphasis on geologic hazards (e.g., earthquakes, volcanoes, landslides and slope failures, flooding, groundwater problems, mineral and rock dusts). Pre: 1004 or 1024 or 2104. (3H,3C)

#### 3024: FORTRAN FOR PHYSICAL SCIENCE

Computer programming using Fortran 95 with applications to physical science, including statistics, physics, geology, and hydrology. Applications used to expose students to the capabilities of the language will include arrays, I/O concepts, structured programming, data types, procedures and modules, and dynamic data structures. Pre: MATH 1114, MATH 1206 or MATH 2015. (3H,3C)

#### 3034: OCEANOGRAPHY

Descriptive and quantitative treatment of the geological, physical, chemical and biological processes that occur in, or are influenced by, the oceans. The history of oceanic exploration and discovery is addressed. Pre: MATH 1206 or MATH 2015. (3H,3C)

#### 3104: ELEMENTARY GEOPHYSICS

Acquisition and interpretation of exploration geophysical data. Seismic reflection and refraction methods, gravity and magnetic fields, geoelectrical methods, and geophysical well logging. Pre: MATH 1205. (2H,3L,3C)

#### 3114 (GEOG 3114): INTRODUCTION TO METEOROLOGY

A nonmathematical introduction to meteorology including consideration of the structure of the atmosphere, energy balance in the atmosphere, clouds and precipitation, air masses and fronts, global circulation, storms, climatology, catastrophic weather, meteorological optics, and forecasting. (2H,3L,3C)

#### 3204: SEDIMENTOLOGY-STRATIGRAPHY

Study of sedimentary basins in a plate-tectonic framework, mechanisms of basin formation, three-dimensional geometry of basin fill, and controls on basin fill. Siliciclastic and carbonate-evaporate rocks as examples of basin fill are discussed in lectures and studied in the lab and in the field. Applied aspects of the course include a discussion of geometries of sedimentary aquifers and reservoirs. Pre: 1004 or 1014. (2H,3L,3C)

#### 3304 (CSES 3304) (GEOG 3304): GEOMORPHOLOGY

Examines the variety of landforms that exist at the earth's surface. Detailed investigation of major processes operating at the earth's surface including: tectonic, weathering, fluvial, coastal, eolian, and glacial processes. Field excursion. Pre: GEOG 1104 or GEOS 1004 or GEOS 2104. (3H,3C)

#### 3404: ELEMENTS OF STRUCTURAL GEOLOGY

Introduction to basic geological structures, evolution of microfabrics, development of faults, folds and foliations, stereographic analysis of geological structures, thrust fault geometries, balancing of geological cross-sections, and introduction to the concepts of stress and strain. Pre: 1004. (2H,3L,3C)

#### 3504 (MSE 3104): MINERALOGY

Principles of modern mineralogy, crystal chemistry, and crystallography, with emphasis on mineral atomic structure and physical property relationships, mineralogy in the context of geology, geochemistry, environmental science and geophysics, phase equilibria, mineral associations, and mineral identification, and industrial applications of minerals. There are three required field trips during the semester. Pre: MATH 1205, CHEM 1036. (2H,3L,3C)

#### 3524 (MSE 3124): OPTICAL MINERALOGY

Principles of color and the behavior of light in crystalline materials; use of the petrographic microscope in the identification of minerals using optical techniques. Pre: 1004. Co: 3504. (3L,1C)

**3604: PALEONTOLOGY**

Paleontological principles and techniques and their application to the evolution of life, the ecological structure of ancient biological communities, the interpretation of ancient depositional environments, and the history of the earth. Pre: 1004, 1014. (2H,3L,3C)

**3614 (CSES 3114) (ENSC 3114): SOILS**

Characterization of soils as a natural resource emphasizing their physical, chemical, mineralogical, and biological properties in relation to nutrient availability, fertilization, plant growth, land-use management, waste application, soil and water quality, and food production. For CSES, ENSC, and related plant- and earth-science majors. Partially duplicates CSES/ENSC 3134. Pre: CHEM 1036. (3H,3C)

**3624 (CSES 3124) (ENSC 3124): SOILS LABORATORY**

Parent materials, morphology, physical, chemical, and biological properties of soils and related soil management and land use practices will be studied in field and lab. Partially duplicates CSES/ENSC 3134. Co: 3614. (3L,1C)

**3704: IGNEOUS AND METAMORPHIC ROCKS**

Study of characteristics and mechanisms of igneous intrusion at depth in the crust, volcanic phenomena on the surface, and textural and mineralogical modification of rocks at elevated temperatures and pressures of crustal metamorphism. Tectonic aspects of igneous and metamorphic rocks will be stressed. Pre: 1004, 1014. Co: 3504. (2H,3L,3C)

**4024: SENIOR SEMINAR**

Investigation and solution of significant geologic research problems by analysis and integration of information across a wide spectrum of Geosciences subdisciplines, and the presentation of results in oral and written form. Research projects will provide maximum student exposure to the full breadth of the Geosciences and the interrelated nature of subdisciplines. Pre: 3104, 3204, 3404, 3504, 3604, 3704. (3H,3C)

**4084 (GEOG 4084): INTRODUCTION TO GIS**

Use of automated systems for geographic data collection, digitization, storage, display and analysis. Basic data flow in GIS applications. Overview of GIS applications. Group homework projects to develop proficiency in the use of current GIS software. Prior experience with personal computers recommended. (3H,3C)

**4124: SEISMIC STRATIGRAPHY**

Overview of seismic data acquisition and processing methods, seismic wavelets, static and dynamic corrections, and seismic velocities; seismic reflection data interpretation; seismic reflection responses Seismic mapping; seismic stratigraphy and seismic lithology. Consent required. Pre: 3104. (2H,3L,3C)

**4154: EARTHQUAKE SEISMOLOGY**

Seismicity and its causes in the context of plate tectonics; determination of earthquake location, size and focal parameters; seismogram interpretation; seismometry; hazard potential; use of earthquakes in determining earth structure. Pre: MATH 2214, MATH 2224, PHYS 2305, GEOS 3104. (2H,3L,3C)

**4164: POTENTIAL FIELD METHODS IN EXPLORATION GEOPHYSICS**

Theory and application to engineering, environmental, and resource exploration. Gravity, magnetics, electrical resistivity, self potential, induced polarization, ground-penetrating radar, magnetotellurics, electromagnetic induction. Pre: 3104, MATH 2214, MATH 2224, PHYS 2306. (3H,3L,4C)

**4174: EXPLORATION SEISMOLOGY**

Theory and application of seismic methods to engineering, environmental and resource exploration: reflection seismics, refraction seismics, and tomography. Data acquisition, digital filtering, data corrections, imaging, interpretation, and forward modeling. Pre: 3104, MATH 2224, PHYS 2305, PHYS 2306. (3H,3L,4C)

**4324 (BIOL 4324): PLANT EVOLUTION**

Geological history, comparative morphology, evolution and systematics of pre-vascular and vascular plants. Focus on evolution of communities, adaptive construction of tissues and organs, and ecology of reproduction. Pre: BIOL 2304. (2H,6L,4C)

**4354 (GEOG 4354): INTRODUCTION TO REMOTE SENSING**

Theory and methods of remote sensing. Practical exercises in interpretation of aerial photography, satellite, radar and thermal infrared imagery. Digital analysis, image classification and evaluation. Applications in earth sciences, hydrology, plant sciences, and land use studies. (2H,3L,3C)

**4404: ADVANCED STRUCTURAL GEOLOGY**

Basic principles of rock behavior under applied, non-hydrostatic stress (experimental and tectonic) and analysis of the geometrical patterns produced. Alternate years. Pre: 3404. (2H,3L,3C)

**4414: ENGINEERING GEOLOGY**

The geological principles and techniques that are required in civil engineering projects and the influence of geology on design, location, construction, and stability of engineering structures. Pre: 1004 or 2104. (2H,2C)

**4494: GEOLOGY SUMMER FIELD COURSE**

Synthesis of course work through field mapping and studies of topical areas in soft- and hard-rock terrains. Geology of the southern Appalachian Blue Ridge and Valley and Ridge Provinces. Training in field methods and techniques. Consent required. Pre: 1004, 1014, 3404. (2H,48L,6C)

**4554: GEOLOGIC ASPECTS OF NUCLEAR AND TOXIC WASTE DISPOSAL**

Review of the geochemical characteristics of radionuclides and other toxic, inorganic materials and how these characteristics affect safe disposal of these materials in the natural environment. Examination of the effects of near-surface geologic processes such as groundwater movement and geologic hazards on long-term storage of nuclear wastes, with application to evaluation of current and proposed disposal sites. Pre: CHEM 1036. (2H,3L,3C)

**4624: MINERAL DEPOSITS**

Introduction to the range and variety of metallic and non-metallic economic mineral deposits. Classification of the petrologic and tectonic settings of mineral deposits. Source, transport and depositional mechanisms of mineral deposit formation. Laboratory emphasizes identification of ore minerals, gangue minerals, common host rocks, wall-rock alteration and mineral zoning. Pre: (1004 or 2104), (3104 or 3404). (2H,3L,3C)

**4634: ENVIRONMENTAL GEOCHEMISTRY**

Application of quantitative methods of thermodynamic and physicochemical analysis to the study of the distribution and movement of chemical elements in surface and near-surface geological environments. Emphasis on practical approaches to environmental geochemistry. Pre: MATH 1205, CHEM 1036. (2H,3L,3C)

**4644: ORGANIC GEOCHEMISTRY**

Composition, origin and distribution of organic matter in the geological environment; the carbon cycle; terminology and structure of organic molecules; metamorphism of organic materials; formation and composition of coal, oil, natural gas; organic geochemistry of the oceans; role of organics in ore formation; organic compounds in natural waters; abiogenic organic compounds in magmatic rocks and fluids. Pre: 1004 or 2104, 1014 or 1024, CHEM 1036. (3H,3C)

**4714: VOLCANOES AND VOLCANIC PROCESSES**

Study of characteristics and mechanisms of volcanic phenomena, including magma dynamics, origin and chemistry of lavas, physics of eruptions, and characteristics of volcanic products, particularly pyroclastic deposits. Includes focus on volcanism as a general planetary process, on terrestrial tectonic settings of volcanism and on volcanic hazards. Pre: 3704. (2H,3L,3C)

**4804: GROUNDWATER HYDROLOGY**

Physical principles of groundwater flow, including application of analytical solutions to real-world problems. Well hydraulics. Geologic controls on groundwater flow. Pre: (1014, PHYS 2205) or (PHYS 2305, MATH 1206). (2H,3L,3C)

**4964: FIELD STUDY**

Pass/Fail only. Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4974H: INDEPENDENT STUDY**

Honors section. Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

May be repeated for a maximum of 4 credits. Variable credit course.

**4994H: UNDERGRADUATE RESEARCH**

Honors section. Variable credit course.

## Mathematical Sciences (MASC)

The departments of computer science, mathematics, and statistics have joined together to offer the following introductory, interdisciplinary courses in mathematical sciences:

### 1024: MATHEMATICS, A LIBERAL ARTS APPROACH

This is the first course in a sequence that is intended to give those students who will not make extensive use of the Mathematical Sciences in their specialties some insight into Mathematics, Computer Science, and Statistics in an integrated setting. Topics include set theory, number theory, and modular arithmetic. MASC 1024 duplicates 1615. Prior credit for MASC 1025 or three or more hours of mathematics at the 2000 level or higher precludes credit for this sequence. I (3H,3C)

### 1034: STATISTICS, A LIBERAL ARTS APPROACH

Intended to provide those students who will not make extensive use of the mathematical sciences in their specialties some insight into the concepts of statistics. Topics include sampling and opinion polls, role of experimentation, descriptive statistics, tabular and graphical organization of data, relationships between variables, economic and social indicators, and the study of randomness. Prior credit for any of the following precludes credit for MASC 1034: MSCI 2405; 3 hours of 2000-level or higher statistics. Pre: 1024. (4H,3C) II.

### 1044: COMPUTER SCIENCE, A LIBERAL ARTS APPROACH

Intended to provide those students who will not make extensive use of the mathematical sciences in their specialties some insight into the concepts of computer science. Topics include introduction to computer architecture, operating systems, programming languages, and algorithms; history of computing; computer applications in the modern world. Prior credit for any of the following precludes credit for 1044: CS 1104, 1704, or any computer science course at the 2000 level or higher. (3H,3C) II.

## Overview

Mathematics is essential to a clear and complete understanding of virtually all phenomena. The study of mathematics provides the ability to

describe applied problems quantitatively and to analyze these problems in a precise and logical manner. This is a principal reason behind the strong demand for mathematicians in government and industry. Essentially all complex problems, whether physical, social, or economic, are solved by designing a mathematical model, analyzing the model, and determining computational algorithms for an efficient and accurate approximation of a solution. Each of these phases is mathematical in nature. For example, if a problem deviates from a standard form, a mathematician should be able to adjust appropriately the usual mathematical treatment for the problem to accommodate for the deviation. In this case mathematical training provides a practical preparation for a career in today's changing world. Moreover, it is especially valuable since it is an education that equips one to continue to adapt to new situations.

Mathematicians typically are employed as applied mathematicians in their specialty areas. Our recent mathematics graduates have been approximately equally divided among government and industry, graduate school, and teaching. There are four different paths or options that a student may follow towards a B.S. in Mathematics: 1) the Traditional Option; 2) the Applied and Computational Mathematics Option (ACM); 3) the Applied Discrete Mathematics Option (ADM); and 4) the Mathematics Education Option (MAED).

The Traditional Option, as its name implies, yields a broad and flexible background in mathematics. The other three options are more specialized. The ACM is designed for students who are confident that they want to have an applied mathematics career in an area closely associated with physics or some form of engineering. The ADM is designed for students who plan to have an applied mathematics career in an area closely associated with computer science, statistics, or actuarial science. The Mathematics Education Option is designed for students who want to be certified to teach secondary mathematics.

Often students will begin their studies in the Traditional Option and later change to one of the other three options when they become more sure of the path they wish to pursue. One, however, can acquire many aspects of the three specialized options within the Traditional Option, because it also requires some degree of specialization in an applications area and provides career development features. The three specialized options are each less general, but bring particular career paths into sharper focus. Each of the four options provides an excellent foundation for graduate study, either in mathematics or in an applications area. Handbooks for each of the options, as well as mathematics career information, are available upon request.

Approximately \$40,000 in Hatcher, Morris, Layman, Rollins, Steeneck, Caldwell, Wells, Oehring, Eckert, Persinger, Kimball and Roselle scholarships is awarded annually to mathematics majors at Virginia Tech: \$13,000 for incoming freshmen and \$27,000 for continuing undergraduates. Information on the scholarships is available from the scholarship chairman in mathematics.

The Cooperative Education Program is also available to qualified candidates, and students wishing to mix practical experience with their formal course studies are encouraged to investigate this option.

The mathematics department firmly believes that mathematics is not only useful and beautiful, but also fun. The department sponsors student chapters of MAA (Mathematical Association of America), SIAM (Society for Industrial and Applied Mathematics) and Pi Mu Epsilon (the national mathematics honorary society). As well as social activities, these groups sponsor speakers to talk on how mathematics is used in their work. Each fall, Virginia Tech also sponsors an Eastern U.S. Regional Mathematics competition. In addition, students (not all of whom are mathematics majors) annually receive organized preparation and compete in the nationwide William Lowell Putnam Competition and the International Mathematical Contest in Modeling. Individual undergraduate research projects are available to talented students, and a research prize is awarded. An overall outstanding senior, as well as an outstanding senior for each option, is recognized each year.

The Honors Program in Mathematics provides outstanding undergraduate majors the opportunity for an enriched academic environment. Through honors courses, an honors project, individual association with the faculty and honors advisors, and other perquisites, the honors student in mathematics enjoys a valuable advantage in the undergraduate experience. Moreover, in coordination with the head of Mathematics and the dean of Science, the honors student may design her/his own individual set of graduation requirements.

In addition to the four undergraduate-degree options, the department also offers the M.S. and Ph.D. Moreover, for qualified students, a combined program is available that leads to both a B.S. and an M.S. in mathematics. This program saves nearly a year from the usual time required for a B.S. and an M.S. done separately. Students in the Education Option obtain a B.S. in Math and an M.A. in Education by completing four years of undergraduate study and a fifth year in education for a full secondary certification.

The minor is designed to provide recognition for those students who take a program of study in mathematics above the normal requirements of their disciplines.

## Bachelor of Science in Mathematics

### *Requirements:*

The following is a sketch of the requirements for the four undergraduate options. For more details, obtain a handbook from the Department of Mathematics. All four options require 120 hours, satisfaction of the Curriculum for Liberal Education, and the following mathematics courses: 1114, 1205-1206, 1224, 2214, 2224, 3034, 3144 and 3224. Special requirements for each option are as follows:

- a. **Traditional:** 3124, 3214, 12 hours 4000-level electives; computer programming, 16 hours of approved application-area courses.
- b. **Education:** 3124, 4334, 4044, 4625, 4626, 4644, 4664, 3 hours 3/4000-level electives; STAT 4705; CS 1044, 1054, or

1705; EDCI 3724, 5114, 5264, and 5554.

c. **ACM:** 3214, 4414, 4425-4426, 4445-4446; CS 1044, 1054 or 1705; 12 hours approved applied-area courses.

d. **ADM:** 3124, 3134, 3214, 4134, 9 hours of approved 4000-level electives; CS 1114 or 1124, 2114, 2505, 3114, 4104; STAT 4714.

Those courses listed in the catalog under the subtitles "Basic Sequences for Students Not in Engineering and Science Curricula" and "Electives for All Students Except Mathematics Majors" may not be used for graduation in mathematics. Special exceptions to this exclusion must have the approval of the head of the department of mathematics.

In order to enroll in 3034, a mathematics student must either (a) obtain a C or better in the final attempt of each of 1114, 1205, 1206, 1224, and (2224 or 2214); or (b) have at least a 2.2 GPA in these five courses with at most one grade of C- and no D's in the last attempt in each. Similarly, a student wishing to transfer into mathematics from another discipline must meet the same standards in these courses (or as far in these courses as she/he has progressed).

Each student is required to participate in the department's Outcomes Assessment procedures as determined by each year's Undergraduate Program Committee and approved by the department head.

## Prospective Student Website

A great deal of further information on the Mathematics Program and on mathematical careers can be found on our website at [www.math.vt.edu/](http://www.math.vt.edu/)

## Minor in Mathematics

*Requirements:*

A total of 25 semester hours of mathematics courses as follows: Calculus (1205-1206, 1224, 2224); Linear Algebra & ODE's: (2214, 1114); and **one** course from either 3124, 3134, 3144, 3214, 3224, 4134, 4164, 4214, 4225, 4234, 4254, 4324, 4425, 4445, 4446). The remaining hours are 3000- and 4000-level elective courses (except 2534 is allowed and 4044 is prohibited), and any 5000-level Mathematics course may be substituted in the above list. Duplications are prohibited. The student must have a 2.00 average in courses used for the minor, none of which may be taken pass/fail.

## Advanced Placement

A student may obtain advanced-placement or advanced-standing credit from high school work for 1016, 2015, 1205 or 1206. The mathematics department strongly encourages calculus students to take the C.E.E.B. advanced-placement test in calculus.

## Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the Curriculum for Liberal Education (see [Academics chapter in this catalog](#)), toward the College of Science Core (see first part of this chapter), and toward the degree in mathematics.

Satisfactory progress toward the B.S. in mathematics requires that:

1. Within the previous two semesters, the student must pass at least one mathematics course which is used in the in-major GPA calculation.
2. Upon having attempted 72 semester credits (including transfer, advanced placement, advanced standing, credit by examination, course withdrawal), students must have completed:

MATH 1205-1206, 1224, 2224: Calculus	11
MATH 1114, 2214: Linear Algebra and ODE's	5
MATH 3034: Proofs and Algebraic Systems	3
<b>Total Credits</b>	<b>(19)</b>

3. Upon having attempted 96 semester credits, students must have an in-major grade-point average of 2.0 or above.

## Undergraduate Courses (MATH)

- [Basic Sequences for Students in Engineering, Building Construction, Chemistry, Computer Science, Geological Sciences, Mathematics, Physics, and Statistics](#)
- [Basic Sequences for Students in Agriculture, Architecture, Biology, Business, and Liberal Arts and Human Sciences](#)
- [Electives \(may not be taken by Mathematics Majors\)](#)

- Electives (including Mathematics Majors)

## **Basic Sequences for Students in Engineering, Building Construction, Chemistry, Computer Science, Geological Sciences, Mathematics, Physics, and Statistics**

### **1114: ELEMENTARY LINEAR ALGEBRA**

Euclidean vectors, complex numbers, and topics in linear algebra including linear systems, matrices, determinants, eigenvalues, and bases in Euclidean space. This course, along with 1205-1206 and 1224, constitutes the freshman science and engineering mathematics courses. 2 units of high school algebra, 1 unit of geometry, 1/2 unit each of trigonometry and pre-calculus required. (2H,2C)

### **1114H: ELEMENTARY LINEAR ALGEBRA (2H,2C)**

### **1205-1206: CALCULUS**

Unified calculus course including techniques and applications of differentiation and integration of functions of a single variable. Limits, continuity, differentiation, integration, and transcendental functions. This sequence, together with 1114 and 1224, constitutes the first-year science and engineering mathematics courses. 1205 partially duplicates 1016 and 1525. 1206 partially duplicates 2015. Pre 1205: 2 units of high school algebra, 1 unit of geometry, 1/2 unit each of trigonometry and precalculus and placement by Math Dept.; or a grade of B or better in one of 1015, 1016, or 1536; or a passing grade on the Calculus Readiness Exam; Pre 1206: 1205. I, II, III (3H,3C)

### **1205H-1206H: CALCULUS (3H,3C)**

### **1224: VECTOR GEOMETRY**

Topics in analytic geometry and conic sections, and the calculus of vector-valued functions. This course, along with 1114 and 1205-1206, constitutes the freshman science and engineering mathematics courses. Pre: 1205. Co: 1206, 1114. (2H,2C) I,II,III,IV.

### **1224H: VECTOR GEOMETRY (2H,2C)**

### **2214: INTRODUCTION TO DIFFERENTIAL EQUATIONS**

Unified course in ordinary differential equations. First-order equations, second- and higher-order linear equations, systems of first-order linear equations, and numerical methods. Partially duplicates 4544. Pre: (1114 or 1114H), (1206 or 1206H or 2015). (3H,3C) I,II,III,IV.

### **2214H: INTRO DIFF EQUATIONS Pre: (1114 or 1114H), (1206 or 1206H or 2015). (3H,3C)**

### **2224: MULTIVARIABLE CALCULUS**

Partial differentiation, multiple integration, and infinite series. Partially duplicates 2016. Pre: (1206 or 1206H or 2015), (1224 or 1224H). (3H,3C) I,II,III,IV.

### **2224H: MULTIVARIABLE CALCULUS Pre: (1206 or 1206H or 2015), (1224 or 1224H). (3H,3C)**

## **Basic Sequences for Students in Agriculture, Architecture, Biology, Business, and Liberal Arts and Human Sciences**

### **1015-1016: ELEMENTARY CALCULUS WITH TRIGONOMETRY I**

1015: Pre-calculus college algebra, basic functions (linear, polynomial and rational). Conic sections (parabolas, circles, ellipses, hyperbolas), algebraic, exponential, logarithmic, and trigonometric functions. Assumes 2 units of high school algebra and 1 of plane geometry. (3H,3C)

### **1525-1526: ELEMENTARY CALCULUS WITH MATRICES**

1525: Linear, quadratic, exponential and logarithmic functions. Differential calculus with graphical interpretation. Terminology and applications for business, including spreadsheet software. 1525 partially duplicates 1016 and 1205. Assumes 2 units of high school algebra and 1 unit of plane geometry. (3H,3C)

### **1535,1536: GEOMETRY AND MATHEMATICS OF DESIGN**

1535: Euclidean geometry, isometries, congruences, similarities. Circles and trigonometry, sequences and the golden ratio. Graph theory, tilings of the plane, polygons and polyhedra. Applications for 2- and 3-dimensional design, including geometric software. Assumes 2 units of high school algebra and 1 unit of high school geometry. (3H,3C)

### **2015-2016: ELEMENTARY CALCULUS WITH TRIGONOMETRY II**

2015: Continuation of 1015-1016. Integral calculus, numerical techniques, fundamental theorem of calculus, and applications. Use of spreadsheet software. Techniques of antidifferentiation and elementary differential equations. 2015 partially duplicates 1206. Pre: 1016 for 2015; 2015 for 2016. (3H,3C)

## **Electives (may not be taken by Mathematics Majors)**

#### 1614: NUMBER AND COMPUTING FOR TEACHERS

A study of the nature and structure of number, number theory, number systems, properties, operations and problem solving which are part of the foundation of the K-8 mathematics curriculum. Computer component includes an emphasis on using spreadsheets to construct mathematical models. I (4H,4C)

#### 1624: GEOMETRY AND COMPUTING FOR TEACHERS

A study of key geometry concepts from multiple perspectives including transformational, coordinate, Euclidean and analytical geometry. Geometric and spatial reasoning are part of the foundation of the mathematical curriculum for grades K-8. Computer component integrates the Geometer's Sketchpad, Logo programming language, and other geometry based software. (4H,4C) II.

#### 2534: INTRODUCTION TO DISCRETE MATHEMATICS

Emphasis on topics relevant to computer science. Topics include logic, propositional calculus, set theory, relations, functions, mathematical induction, elementary number theory and Boolean algebra. Does not carry credit for mathematics majors, but may be used as though it were a 3000-level elective course for the mathematics minor. Partially duplicates 3034. Two units of high school algebra, one unit of geometry, one-half unit each of trigonometry and precalculus mathematics required. (3H,3C)

#### 2624: ALGEBRA AND COMPUTING FOR TEACHERS

The beginning portions of the course are designed to provide, from an advanced standpoint, a comprehensive view of school algebra curricula. The remainder of the course is devoted to the investigation of algebraic relationships and algorithms through the use of the computer. Pre: 1624. (3H,3C)

#### 4525-4526: PRINCIPLES OF ADVANCED CALCULUS

4525: Elementary calculus review, real number system, continuity of single variable functions, integration, sequences and infinite series.

4526: Differential calculus of several variable functions, multiple integration, curves and surfaces, line and surface integrals. For non-mathematics majors: 4525 partially duplicates 3224, 4526 partially duplicates 3214. Pre: 2224 for 4525; 4525 for 4526. (3H,3C)

#### 4544: ORDINARY AND PARTIAL DIFFERENTIAL EQUATIONS

Ordinary differential equations: first order, second and higher order linear equations, power series and Laplace transform methods. Partial differential equations: Fourier series, separation of variables for heat, wave and potential equations. Sturm-Liouville theory. Bessel functions. Legendre polynomials. Partially duplicates 2214 and 4564. Pre: 1114, 1206. (5H,5C)

#### 4554: NUMERICAL METHODS FOR ENGINEERS

Root-finding, interpolation, linear algebraic systems, numerical integration, and numerical solution of ordinary and partial differential equations. Duplicates 3414 and 4404, and can not be taken by mathematics majors. Computer programming required. Pre: 2214. (3H,3C)

#### 4564: OPERATIONAL METHODS FOR ENGINEERS

Laplace transformations, Fourier series, partial differential equations and separation of variables, boundary value problems, and Sturm-Liouville theory. Duplicates 4544. Pre: 2214. (3H,3C) I,II,III,IV.

#### 4574: VECTOR AND COMPLEX ANALYSIS FOR ENGINEERS

Vector Analysis: Green's theorem, potential theory, divergence, and Stokes' theorem. Complex Analysis: Analyticity, complex integration, Taylor series, residues, conformal mapping, applications. Pre: 2224. (3H,3C) I,II,III.

#### 4584 (STAT 4584): ADVANCED CALCULUS FOR STATISTICS

Introduction to those topics in advanced calculus and linear algebra needed by statistics majors. Infinite sequences and series. Orthogonal matrices, projections, quadratic forms. Extrema of functions of several variables. Multiple integrals, including convolution and nonlinear coordinate changes. Pre: 1114, 1205, 1206, 2224. (3H,3C)

### Electives (including Mathematics Majors)

#### 1504: PRECALCULUS

College algebra, functions, exponential and logarithmic functions, trigonometry. This course is designed specifically to meet the needs of students who intend to be in a curriculum that requires 1205, but who are not yet ready to begin 1205. 1504 partially duplicates 1015 and 1525. 2 units of high school algebra and 1 unit of plane geometry required. (3H,3C) I,III.

#### 2004 (ME 2004): ENGINEERING ANALYSIS USING NUMERICAL METHODS

Numerical methods applied to engineering analysis. Linear systems. Root finding. Numerical integration. Ordinary differential equations. Programming using a software package such as Matlab. Pre: ENGE 1016, MATH 1206, MATH 1114. (2H,2C)

#### 2644: MATHEMATICS TUTORING

An introduction to mathematics tutoring. Course activities include the development of listening and questioning skills, assessment of a student's mathematical difficulties, and an exploration of teaching and learning processes. In a weekly journal, students will reflect on their tutoring experiences to develop and refine teaching goals and skills. A concurrent mathematics tutoring experience is required. Pre: 1206. (1H,1C)

#### 2964: FIELD STUDY

Pass/Fail only. Variable credit course.

#### 2974: INDEPENDENT STUDY

Variable credit course.

**2974H: INDEPENDENT STUDY**  
Honors section. Variable credit course.

**2984: SPECIAL STUDY**  
Variable credit course.

**2984H: SPECIAL STUDY**  
Variable credit course.

**2994: UNDERGRADUATE RESEARCH**  
Variable credit course.

**3034: INTRODUCTION TO PROOFS**  
Practice in writing mathematical proofs. Exercises from set theory, number theory, and functions. Specific topics include set operations, equivalence relations, mathematical induction, the division algorithm and images and pre-images of sets. Partially duplicates 2534. In order to enroll in Math 3034, student must obtain (1) a C or better in each of 1114, 1205, 1206, 1224 and (either 2214 or 2224), or (2) at most one C- and a GPA of at least 2.2 in the courses mentioned in (1). (3H,3C) I,II,III.

**3034H: HONORS INTRODUCTION TO PROOFS**  
(3H,3C)

**3054: PROGRAMMING FOR MATHEMATICAL PROBLEM SOLVING**  
An Introduction to computer programming designed for mathematics majors. Variable types, data structures, control flow and program structure. Procedural, functional and objective-oriented programming paradigms for solution of a variety of mathematical problems. Co: 2214. (3H,3C)

**3124: MODERN ALGEBRA**  
Introductory course in groups, rings and fields. Pre: 3034. (3H,3C)

**3134: APPLIED COMBINATORICS AND GRAPH THEORY**  
Emphasis on concepts related to computational theory and formal languages. Includes topics in graph theory such as paths, circuits, and trees. Topics from combinatorics such as permutations, generating functions, and recurrence relations. Pre: 1206, (2534 or 3034). (3H,3C) I,II,IV.

**3144: LINEAR ALGEBRA I**  
Introductory course in linear algebra. Abstract vector spaces, linear transformations, algorithms for solving systems of linear equations, matrix analysis. This course involves mathematical proofs; it is strongly recommended that students take 3034 first. Pre: 2214. (3H,3C)

**3214: CALCULUS OF SEVERAL VARIABLES**  
Fundamental calculus of functions of two or more variables. Implicit function theorem, Taylor expansion, line integrals, Green's theorem, surface integrals. Pre: 2224. (3H,3C) II,IV.

**3224: ADVANCED CALCULUS**  
Theory of limits, continuity, differentiation, integration, series. 3224 duplicates 4525. Pre: 2224, 3034. (3H,3C)

**3414 (CS 3414): NUMERICAL METHODS**  
Computational methods for numerical solution of non-linear equations, differential equations, approximations, iterations, methods of least squares, and other topics. Partially duplicates Math 4554 and 4404. A grade of C or better required in CS prerequisite 1044 or 1705. Pre: 2214, 2224, CS 1044 or CS 1705. (3H,3C) II.

**4024: AXIOMATIC SET THEORY**  
Peano postulates, cardinal arithmetic, axiom of choice, well orderings, ordinal arithmetic, continuum hypothesis. Pre: 2224, (3034 or 3134). (3H,3C)

**4044: HISTORY OF MATHEMATICS**  
Historical development of mathematics from antiquity to modern times. Senior standing in mathematics required. (3H,3C) I.

**4124: INTRODUCTION TO ABSTRACT ALGEBRA**  
An introduction to the theory of groups and rings. Topics include normal subgroups, permutation groups, Sylow's Theorem, Abelian groups, Integral Domains, Ideals, and Polynomial Rings. Pre: 3124. (3H,3C) I,II,III.

**4134: NUMBER THEORY**  
Divisibility, congruencies, multiplicative functions, primitive roots, quadratic reciprocity. Pre: 2534 or 3034 or 3134. (3H,3C) II.

**4144: LINEAR ALGEBRA II** Second course in linear algebra. Similarity invariants, Jordan canonical form, inner product spaces, self-adjoint operators, selected applications. Pre: 3144. (3H,3C)

**4164: ADVANCED DISCRETE MATHEMATICS**  
Advanced topics in discrete mathematics with applications. Includes counting techniques, generating functions, recurrence relations, combinatorial designs, semigroups, words and rewriting rules, matroids, and selected additional topics (e.g., Ramsey theory, Polya theory, Young tableaux). Knowledge of a programming language (e.g., C, fortran, Pascal) required. I Pre: 3034, 3134. (3H,3C)

**4175-4176: CRYPTOGRAPHY**  
4175: Elementary concepts in cryptography; classical cryptosystems; modern symmetric cryptography; public key cryptography; digital signatures, authentication schemes; modular arithmetic, primitive roots, primality testing. At least one mathematics course at or above the 3000 level and facility

with either a programming language or a computer algebra system is required. 4176: Discrete logs; pseudoprime tests; Pollard rho factoring; groups; quadratic residues; elliptic curve cryptosystems and factoring; coding theory; quantum cryptography. (3H,3C)

#### 4214: LINEAR ANALYSIS

Linear algebra of infinite dimensional spaces, inner product spaces, normed spaces, completeness, orthonormal bases, bounded and unbounded linear operators, adjoints, spectra, compact operators. Pre: 3214, 3224, (4425 or 4564). (3H,3C)

#### 4225-4226: ELEMENTARY REAL ANALYSIS

Real number system, point set theory, limits, continuity, differentiation, integration, infinite series, sequences and series of functions. Pre: 3224 for 4225; 4225 for 4226. (3H,3C) I,II.

#### 4234: ELEMENTARY COMPLEX ANALYSIS

Analytic functions, complex integration, series representation of analytic functions, residues, conformal mapping, applications Pre: 3224. (3H,3C) II.

#### 4245-4246: INTERMEDIATE DIFFERENTIAL EQUATIONS

Solution techniques, linear systems, the matrix exponential, existence theorems, stability, non-linear systems, eigenvalue problems. Pre: 3224 for 4245; 3224 or 4525 for 4246. (3H,3C)

#### 4254: CHAOS AND DYNAMICAL SYSTEMS

Survey of basic concepts in chaotic dynamical systems. Includes material on bifurcation theory, conjugacy, stability, and symbolic dynamics. Pre: 3224. (3H,3C)

#### 4324: ELEMENTARY TOPOLOGY

Basic concepts of topological spaces, continuous functions, connected spaces, compact spaces, and metric spaces. I Pre: 3124, 3224. (3H,3C)

#### 4334: COLLEGE GEOMETRY

Transformational approach to Euclidean geometry including an in-depth study of isometries and their application to symmetry, geometric constructions, congruence, coordinate geometry, and non-Euclidean geometries. Pre: 1114, 1206. (3H,3C) I,II.

#### 4344: TOPICS IN GEOMETRY

Selected topics in geometry for advanced undergraduates. Pre: 1114, 1206. (3H,3C)

#### 4404 (AOE 4404): APPLIED NUMERICAL METHODS

Interpolation and approximation, numerical integration, solution of equations, matrices and eigenvalues, systems of equations, approximate solution of ordinary and partial differential equations. Applications to physical problems. Partially duplicates 4554 and 3414. Mathematics majors or minors cannot take both 4404 and 3414. Pre: 4564, ESM 2074. (3H,3C)

#### 4414 (CS 4414): ISSUES IN SCIENTIFIC COMPUTING

Theory and techniques of modern computational mathematics, computing environments, computational linear algebra, optimization, approximation, parameter identification, finite difference and finite element methods and symbolic computation. Project-oriented course; modeling and analysis of physical systems using state-of-the-art software and packaged subroutines. Pre: 2214, 3214. (2H,3L,3C)

#### 4425-4426: FOURIER SERIES AND PARTIAL DIFFERENTIAL EQUATIONS

Separation of variables for heat, wave, and potential equations. Fourier expressions. Application to boundary value problems. Bessel functions. Integral transforms and problems on unbounded domains. 4425: I, II. 4426: II. Pre: 2214, 2224, 3224 for 4425; 2214, 2224, 3224, 4425 for 4426. (3H,3C)

#### 4445,4446: INTRODUCTION TO NUMERICAL ANALYSIS

4445: Vector spaces and review of linear algebra, direct and iterative solutions of linear systems of equations, numerical solutions to the algebraic eigenvalue problem, solutions of general non-linear equations and systems of equations.

4446: Interpolation and approximation, numerical integration and differentiation, numerical solutions of ordinary differential equations. Computer programming skills required. Pre: 2214, 2224. (3H,3C) 4445: I,III; 4446:

#### 4454: APPLIED MATHEMATICAL MODELING

Analysis of classical and modern applications of mathematics in the physical, biological and social sciences. Emphasis on problem formulating, modeling, solving, simulating, and analyzing results. Programming language required. (3H,3C)

#### 4625,4626: MATHEMATICS FOR SECONDARY TEACHERS

Course activities will emphasize the curricular themes of problem solving, reasoning and proof, communication, connections, and representation.

4625: Topics in discrete mathematics and algebra from a secondary teaching perspective. 4626: Topics in trigonometry, geometry, measurement, statistics, and probability from a secondary teaching perspective. Pre: 3034. (3H,3C)

#### 4644: SECONDARY SCHOOL MATHEMATICS WITH TECHNOLOGY

Use and impact of technology in secondary mathematics curriculum. Various technologies including graphing calculators, calculator based laboratory and probes (CBLs), computer algebra systems, spreadsheets, dynamic geometry software and the Internet will be used to explore secondary mathematical concepts from an advanced viewpoint. Pre: 3034. (3H,3C) I.

#### 4654: CAPSTONE THESIS AND SEMINAR

Students will review and discuss current research, state and national policies, and curriculum materials and trends in secondary mathematics education. Students will apply research findings and policy initiatives to the development of a major project in which they write and present unified plans for the teaching of a particular mathematical topic. Admission to the Graduate School and instructor approval required. Pre: 3034, EDCI 3724. (1H,1C)

**4664: SENIOR MATH EDUCATION SEMINAR**

A review of basic principles and problem-solving techniques in the eleven topics covered by the Praxis II (Mathematics Content Knowledge) examination. Passing the Praxis II examination prior to student teaching is a state requirement for all students seeking secondary licensure. Passing Praxis I required. Pre: 3124. (2H,2C)

**4754: INTERNSHIP**

May be repeated for a maximum of 12 credits. Pass/Fail only. Variable credit course.

**4964: FIELD STUDY**

Pass/Fail only. Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4974H: INDEPENDENT STUDY**

Honors section. Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

**4994H: UNDERGRADUATE RESEARCH**

Honors section. Variable credit course.

### Overview

The physics curriculum is designed to provide a broad foundation in the physical sciences, as well as specialized training in classical and modern physics, and it may lead to either a B.S. or a B.A. An honors student may also qualify for a five-year program leading to both the B.S. and M.S. Experimental opportunities are available in such fields as fundamental particle physics, nuclear physics, condensed matter physics, laser optics, astronomy, and multimedia teaching demonstrations. Superior students are encouraged to participate with faculty members in undergraduate research projects.

Liberal emphases in the physics curriculum permit students to give special attention to those aspects of the discipline they prefer and enable them either to pursue a traditional course of study as preparation for joining the technical staffs of industries or government laboratories, or for graduate studies in physics (B.S.); or to pursue an interdisciplinary course of study with a strong background in physics (B.A.).

A handbook that includes sample curricula for emphases in astrophysics, chemistry, computer science, education, electrical engineering, finance, geophysics, materials science, mathematics, pre-health, and pre-law is available from the department on request.

The requirements for the B.S. are, in addition to the college curriculum and the Curriculum for Liberal Education: Phys 2305, 2306, 2325, 2326, 3314, 3355, 3356, 3405, 3406, 3704; 2504 and 3324 (or 3455 and 3504); two of 4504, 4554, 4574, 4614, 4674, or 4714; and 4315, 4316, 4455, 4456; Math 1114, 1205, 1206, 1224, 2214, 2224, 3214, 4984 (Applied Complex Variable 1 cr.), 4564 (or 4425), and Chem 1035, 1036, 1045, 1046. Outstanding students may also elect to complete the requirements for a B.S. "in honors." A description of this honors program in physics is included in the handbook indicated above.

The requirements for the B.A. are, in addition to the college curriculum and the Curriculum for Liberal Education: Phys 2074, 2305, 2306, 2325, 2326, 2504, 3314, 3324, 3355, 3405, 3655 (or 3656), 3704, 4315; one of 4504, 4554, 4574, 4614, 4674, or 4714; Math 1114, 1205, 1206, 1224, 2214, 2224.

The requirements for the B.A. Education Option, are, in addition to the college curriculum and the Curriculum for Liberal Education: Phys 2074, 2305, 2306, 2325, 2326, 2504, 3314, 3324, 3355, 3405, 3655 (or 3656), 3704, 4315; one of 4504, 4554, 4574, 4614, 4674, or 4714; Math 1114, 1205, 1206, 1224, 2214, 2224; Hist 3705 (or STS 3705), 3706 (or STS 3706); 13-14 specific credits of Astronomy, or Biology, or Chemistry, or Geosciences.

The requirements for the B.A. Pre-Health Option, are, in addition to the college curriculum and the Curriculum for Liberal Education: Phys

2074, 2305, 2306, 2325, 2326, 2504, 3314, 3324, 3355, 3405, 3704, 4315, 4714; one of 3655, 3656, 4504, 4554, 4574, 4614; Math 1114, 1205, 1206, 1224, 2214, 2224; Engl 1105, 1106; Stat 4674; 8 specific credits of Biology; 16 specific credits of Chemistry.

The requirements for the B.A. Pre-Law Option, are, in addition to the college curriculum and the Curriculum for Liberal Education: Phys 2074, 2305, 2306, 2325, 2326, 2504, 3314, 3324, 3355, 3405, 3704, 4315; two of 3655, 3656, 4504, 4554, 4574, 4614, 4714; Math 1114, 1205, 1206, 1224, 2214, 2224; Engl 1105, 1106, 3764; COS 2304, 4304; Comm 2004.

The department also offers the M.S. and Ph.D. in physics (see the Graduate Catalog).

Transfer students should contact the department early, preferably one full semester prior to entrance. This procedure will allow a thorough evaluation of transfer credits and correct placement.

A student may obtain a minor in physics by registering with the department and successfully completing 2305, 2306, 3455 (or 3324), 3355 (or 3405), 3704, plus three more physics credits at or above the 3000 level.

A minor in astronomy is also available and may be obtained by registering with the department and successfully completing 1055, 1056, 1155, 1156, 3154, 3655, 3656, and one more course from an approved list (see J. H. Simonetti).

The department participates in the Cooperative Education Program in which a student may alternate through two successive years a semester of study with a semester of professional employment in his/her discipline; these two years normally replace the student's sophomore year. Additional information on the program is included in the "[Academics](#)" chapter in this catalog and in the handbook indicated above.

## Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the Curriculum for Liberal Education (see [Academics chapter in this catalog](#)), toward the College of Science Core (see first part of this chapter), and toward the degree in physics.

Satisfactory progress toward the degree in physics requires that:

1. Upon having attempted 72 semester credits (including transfer, advanced placement, advanced standing, credit by examination, freshman rule), students must have completed:

### ***B.S. in Physics***

Chem 1035, 1036: General Chemistry	6
Chem 1045, 1046: General Chemistry Lab	2
ENGL 1105, 1106: Freshman English	6
MATH 1114: Elementary Linear Algebra	2
MATH 1205, 1206: Calculus	6
MATH 1224: Vector Geometry	2
MATH 2214: Intro. to Differential Equations	3
MATH 2224: Multivariable Calculus	3
PHYS 2305, 2306: Foundations of Physics I	8
<b>Total Credits</b>	<b>38</b>

### ***B.A in Physics***

ENGL 1105, 1106: Freshman English	6
MATH 1114: Elementary Linear Algebra	2
MATH 1205, 1206: Calculus	6
MATH 1224: Vector Geometry	2
MATH 2214: Intro. to Differential Equations	3
MATH 2224: Multivariable Calculus	3
PHYS 2305, 2306: Foundations of Physics I	8

## Undergraduate Courses (PHYS)

### 1054: A BRIEF HISTORY OF THE UNIVERSE

Overview of the universe, evolutionary development of the universe beginning with the Big Bang through structure formation and galaxy formation, star formation and stellar life cycles, planet formation, the planetary system, and life in the universe. Prior credit for Phys 1056 or Phys 2054 precludes credit for 1054. (3H,3C) I,II.

### 1055,1056: INTRODUCTION TO ASTRONOMY

Apparent sky motions, telescopes, properties of the planets, structure and organization of the solar system, stars, star formation, stellar evolution, organization of the Milky Way Galaxy, galaxies, quasars, structure and evolution of the universe, and cosmological models. Prior credit for Phys 2044 precludes credit for 1055. Prior credit for Phys 1054 or Phys 2054 precludes credit for 1056. (3H,3C) I,II.

### 1155,1156: ASTRONOMY LABORATORY

Simulation of apparent sky motions; observations of planets, stars, and nebulae with quantitative analysis; long term observations of sky changes; analysis of images; laboratory experiments of astrophysical relevance. Co: 1055 for 1155; 1056 for 1156. (3L,1C) I,II.

### 2074: HIGHLIGHTS OF CONTEMPORARY PHYSICS

Conceptual overview of fundamental modern thinking in physics. Presents the key ideas and philosophical/ethical aspects of the most important developments in modern physics, such as quantum mechanics, relativity, particle physics, cosmology, etc., and discusses their impact on our understanding of the universe and our position in it. I (3H,3C)

### 2205-2206: GENERAL PHYSICS

For students in curricula other than physical sciences, mathematics, or engineering, who have not studied calculus. 2205: Mechanics, optics, acoustics. 2206: Electromagnetism, thermodynamics, relativity, and topics in modern physics. Pre: MATH 1016 or MATH 1016H or MATH 2015 or MATH 1205H or MATH 1525 or MATH 1535 for 2205; 2305 or 2205 for 2206. (3H,3C) I,II.

### 2215-2216: GENERAL PHYSICS LABORATORY

Lab experiments dealing with basic laws and techniques of physics; designed to illustrate covered in General Physics, 2205-2206. Should be taken concurrently and in phase with lecture sequence, 2205-2206. I Co: 2205 for 2215; 2206 for 2216. (3L,1C)

### 2305-2306: FOUNDATIONS OF PHYSICS I

First two semesters of the three-semester introductory sequence for students in physical sciences and mathematics. Includes classical mechanics, gravity, and waves (2305); heat, electricity, magnetism and optics (2306); laboratory work. 3304 is the concluding semester of the sequence. Pre: MATH 1205 or MATH 1205H or MATH 1206 or MATH 1206H for 2305; (MATH 1206 or MATH 1206H), PHYS 2305 for 2306. Co: MATH 1206, 2325 for 2305. (3H,3L,4C) I,II.

### 2325-2326: SEMINAR FOR PHYSICS MAJORS

Introduction to the field of physics and to the Physics Department. Overview of modern physics topics such as special relativity, quantum mechanics, condensed matter, nuclear, and particle physics. Presentation of research activities in the department. Also provides more in-depth discussion of and math preparation for topics in 2305-2306. For physics majors. Co: 2305 for 2325; 2306 for 2326. (1H,1C)

### 2504: MATH METHODS IN PHYSICS

Applications of mathematical methods to physics. Topics include spatial coordinate systems, linear algebra techniques in coupled motions, series approximations of solutions to physical systems, extremum problems in physics, differential equations in mechanics, integration in two and three spatial dimensions, probability theory in thermal physics. Pre: 2305. Co: MATH 2214, MATH 2224, 2306. (3H,3C)

### 2964: FIELD STUDY

Pass/Fail only. Variable credit course.

### 2974: INDEPENDENT STUDY

Variable credit course.

### 2974H: INDEPENDENT STUDY

Honors section. Variable credit course.

### 2984: SPECIAL STUDY

Variable credit course.

### 2994: UNDERGRADUATE RESEARCH

Variable credit course.

### 3154: OBSERVATIONAL ASTROPHYSICS

Telescopic observations of the moon, planets, stars, interstellar medium, and galaxies; astrophotography; digital imaging. Telescopes; virtual observing techniques and instruments; photographic and digital imaging systems. Astronomical data reduction and interpretation; digital image processing. Prior credit for Phys 2154 precludes credit for 3154. Pre: 1156. (1H,3L,2C) II.

### 3314: INTERMEDIATE LABORATORY

Characteristics of common instrumentation and basic circuits, methods of producing good practices in data gathering, recording, and analysis.

(2H,3L,3C) II.

#### 3324: MODERN PHYSICS

Photons and their interactions with matter, wave-particle duality, Heisenberg uncertainty principle, Schrodinger's equation of motion, hydrogenic and multi-electron atoms, Pauli exclusion principle, molecules, solids, nuclei, elementary particles. Includes lab work. MATH 4544 can be substituted for co-requisite MATH 2214. Pre: 2306. Co: MATH 2214, 2504. (3H,3L,4C)

#### 3355-3356: INTERMEDIATE MECHANICS

Formal aspects of classical mechanics and dynamics. Topics include Newtonian, Lagrangian and Hamiltonian theory applied to non-relativistic systems in one, two, and three dimensions, relativistic dynamics, linear algebra applied to coupled many-body motion, small oscillations, and rigid body motion. Pre: MATH 1224, MATH 2214, PHYS 2305, PHYS 2306, PHYS 2504 for 3355; 3355 for 3356. (3H,3C)

#### 3405-3406: INTERMEDIATE ELECTRICITY AND MAGNETISM

Electrostatics, multipoles, Laplace's equation, and dielectric media. Magnetostatics, magnetic media, and electromagnetic induction. Maxwell's equations, electromagnetic energy, waves, and radiation. Must meet pre-requisites and have a grade of C or better in each of 2305-2306 sequence. Pre: MATH 2214, PHYS 2305, PHYS 2306, PHYS 2504 for 3405; 3405 for 3406. (3H,3C) I,II.

#### 3655,3656: INTRO ASTROPHYSICS

Application of elementary physical laws to determine dimensions, masses, luminosities, structures, and evolution of astronomical objects and the universe as a whole. Emphasis is on quantitative derivation. Pre: 2306. (3H,3C) I,II.

#### 3704: THERMAL PHYSICS

Introduction to the concepts, formalism, and applications of classical and quantum statistical mechanics, including thermodynamics. Pre: 2306, 3324. Co: MATH 2214, 2504. (3H,3C) II.

#### 4315-4316: MODERN EXPERIMENTAL PHYSICS

Representative apparatus, techniques, and phenomena of contemporary research. Includes electrical measurements, computers, thermometry, vacuum deposition, machine shop, nuclear spectra, experimentation related to major developments of modern physics. Pre: 3314 for 4315; 3314, 4315 for 4316. (6L,2C) I,II.

#### 4455-4456: INTRODUCTION TO QUANTUM MECHANICS

Experimental bases; postulates; conservation theorems and symmetry; one-dimensional and two-dimensional problems; angular momentum and problems in three dimensions; matrix mechanics and spin; applications to atomic and molecular physics; perturbation theory; scattering. Pre: 3356 for 4455; 4455 for 4456. Co: 3406 for 4455. (3H,3C) I,II.

#### 4504: INTRODUCTION TO NUCLEAR AND PARTICLE PHYSICS

Structure and properties of atomic nuclei and elementary particles, theoretical interpretations based on elementary quantum mechanics. Symmetries; various nuclear models; interactions at small distances; classification of elementary particles. Consent required. Co: 4456. (3H,3C) II.

#### 4554: INTRODUCTION TO SOLID STATE PHYSICS

Basic concepts of solid state physics including crystal structure, lattice vibrations, electron states, energy bands, semiconductors, metals. Consent required. Co: 4456. (3H,3C) II.

#### 4574: NANOTECHNOLOGY

Introduction to methods of controlling matter on the nanometer length scale and the applications thereof. Nanolithography, self-assembly, and scanned probe microscopy; nanomaterials including fullerenes, carbon nanotubes, and quantum dots; nanoscale and molecular electronics; nanoelectromechanical systems; nanoscale optoelectronics; and nanobiotechnology. Pre: 2205, 2206 or 2305, 2306. (3H,3C)

#### 4614: OPTICS

Fundamentals of the ray, wave and quantum models of light, and topics in modern optics with contemporary applications. I Pre: 2306, MATH 2214, MATH 2224. (3H,3C)

#### 4624: OPTICS LABORATORY

Laboratory experiments dealing with ray and wave optical phenomena designed to illustrate and complement the principles covered in OPTICS Phys 4614. Physics majors are required to take 4624 concurrently with the lecture course 4614. I Co: 4614. (3L,1C)

#### 4674: INTRODUCTION TO GENERAL RELATIVITY

Introduction to methods and applications of Einstein's general theory of relativity. Space and time and gravity in Newtonian physics; special theory of relativity, gravity as geometry of curved space-time; black holes; cosmology; Einstein's gravitational field equations; gravitational waves and relativistic stars. Pre: MATH 2214 or MATH 2514, PHYS 3356. Co: 3406. (3H,3C)

#### 4714: INTRODUCTION TO BIOPHYSICS

Selected topics from the general area of biomechanics, bioelectricity, radiation biophysics, molecular biophysics, and thermodynamics and transport in biological systems. Emphasis on the physical aspects of biological phenomena and biophysical measurement techniques and instrumentation. I Pre: 2206 or 2306. (3H,3C)

#### 4964: FIELD STUDY

Pass/Fail only. Variable credit course.

#### 4974: INDEPENDENT STUDY

Variable credit course.

4974H: INDEPENDENT STUDY  
Honors section. Variable credit course.

4984: SPECIAL STUDY  
Variable credit course.

4994: UNDERGRADUATE RESEARCH  
Variable credit course.

4994H: UNDERGRADUATE RESEARCH  
Honors section. Variable credit course.

### Overview

The Department of Psychology offers an undergraduate program leading to the B.S. To graduate with a major in psychology, the undergraduate student must complete the core curriculum requirements of the College of Science and the following departmental requirements:

A minimum of 28 hours of psychology including Psyc 2004, 2094, and three 4000-level courses, at least one with laboratory (Psyc 4964, 4974, and 4994 are not counted as 4000-level courses for purposes of this requirement).

Successful completion of at least one three-credit course from the Statistics Department, except Stat 3104. Stat 2004, 3604, or 3615 are recommended. (NOTE: No credit will be given for Stat 2004 if taken with or after any other statistics course.)

In addition to courses used to fulfill the Scientific Reasoning and Discovery requirement (Area 4) of the College of Science Core Curriculum, two courses (6 semester hours) in one of the following areas: biology, chemistry, physics. These additional courses need not be in the same discipline as courses used to satisfy Area 4 of the College of Science Core.

Successful completion of two courses (6 semester hours) from the disciplines of computer science, philosophy, and/or statistics. These courses may either be in the same discipline or from any two of the three disciplines. Courses used to satisfy College of Science Core requirements or other Psychology department requirements may not also be used to satisfy this requirement.

To graduate with a minor in psychology, the undergraduate student must complete 18 hours of psychology including Psyc 2004, 2094, and one 4000-level course (Psyc 2964 and 4964 may not be used toward the psychology minor).

A program leading to the B.S. in psychology "in honors" is available for eligible students. Additionally, opportunities are provided for students to engage in a directed program of independent research. The department sponsors a chapter of Psi Chi, the national psychology honor society, and the Psychology Club. A Cooperative Education Program is available in which a student may alternate a semester of study with a semester of employment. Additional information on this program is provided in the "Academics" chapter of this catalog. Information about these and other activities is available at the Academic Advising Center Office (109 Williams Hall) which is located in the Department of Psychology.

## Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the Curriculum for Liberal Education (see [Academics chapter in this catalog](#)), toward the College of Science Core (see above), and toward the degree in psychology.

Satisfactory progress toward the B.S. in psychology requires that:

1. Upon having attempted **30 semester hours** (including transfer, advanced placement, advanced standing, credit by examination, freshman rule), students must have an overall GPA of 2.00 and must have completed 12 semester credits that apply to the CLE, and the following course

Psyc 2004: Introduction to Psychology

2. Upon having attempted **72 semester hours**, students must have an overall GPA of 2.0 and must have completed 24 semester credits that apply to the CLE, and the following courses:

Psyc 2094: Principles of Psychological Research  
An additional three credit psychology course  
A 3-hour course in statistics

3. Upon having attempted **96 semester hours**, students must retain an overall GPA of 2.00 or above and must have completed all Curriculum for Liberal Education Courses.

## Undergraduate Courses (PSYC)

### 2004: INTRODUCTORY PSYCHOLOGY

The scientific study of behavior, behavioral research methods and analysis, and theoretical interpretations. Survey of basic behavioral processes from sensory and physiological mechanisms to personality types and complex decision-making in humans. An Honors Section of this course may be offered. Requires enrollment in 1 hour (0 credit) recitation. (3H,3C)

### 2034: DEVELOPMENTAL PSYCHOLOGY

Basic principles of human psychological development from the prenatal period through old age are examined. Surveys recent literature within the areas of perceptual, cognitive, and social/emotional development. Pre: 2004. (3H,3C)

### 2044: PSYCHOLOGY OF LEARNING

Survey of fundamental concepts, phenomena, and principles of learning, such as reinforcement, Pavlovian conditioning and retention/forgetting. Issues addressed are traditional views of learning, biological and cognitive constraints, the role of animal models, and the utility of learning theory. Pre: 2004. (3H,3C)

### 2054: PSYCHOLOGY OF PERSONALITY

Study of human personality and psychological adjustment: theory and research. Behavioral, cognitive, humanistic, and environmental determinants of personality. Psychological adjustment and personality development. Pre: 2004. (3H,3C)

### 2064: NERVOUS SYSTEMS & BEHAVIOR

Introduction to the workings of the nervous system and the relation between those workings and behavior. Special emphasis on human nervous systems and behavior. Pre: 2004. (3H,3C)

### 2074: ANIMAL BEHAVIOR

Study of animal behavior: Comparative psychology and ethology, behavioral genetics, evolution of behavior, ecological aspects of behavior, predation, reproduction, and parental care. Some consideration is given to the relevance of animal behavior to human behavior. Pre: 2004. (3H,3C)

### 2084: SOCIAL PSYCHOLOGY

Introduction to the social behavior of the individual and the group: social perception, attribution theory, attitude formation and change, interpersonal attraction, aggression and conflict, group dynamics, applied social psychology. Pre: 2004. (3H,3C)

### 2094: PRINCIPLES OF PSYCHOLOGICAL RESEARCH

Research design and methodology. Analysis of a variety of approaches to developing, understanding, and interpreting psychological data. Pre: 2004. (3H,3C)

### 2964: FIELD STUDY

Pass/Fail only. Variable credit course. X-grade allowed.

### 2974: INDEPENDENT STUDY

Variable credit course.

### 2974H: INDEPENDENT STUDY

Honors section. Variable credit course.

**2984: SPECIAL STUDY**

Variable credit course.

**2994: UNDERGRADUATE RESEARCH**

Variable credit course.

**3014: ABNORMAL PSYCHOLOGY**

Survey of various types of psychological disorders and of contrasting theoretical views and representative research on the etiology and prognosis of these disorders. Emphasis on diagnosis and classification of disorders. Pre: 2004. (3H,3C)

**3024: ENVIRONMENTAL PSYCHOLOGY**

Survey of the effects of the environment on humans, and vice versa. Topics include crowding, noise, air, and water pollution and their effects on behavior. Research and theories about person-environment relations. Pre: 2004. (3H,3C)

**3034: PSYCHOLOGICAL DISORDERS OF CHILDREN**

An examination of theory, research, and practice as related to the assessment, treatment, and prevention of psychological disorders of children. Special emphasis on the understanding of child behavior disorders from a developmental, clinical-experimental point of view. Pre: 2004, 3014. (3H,3C)

**3044: BEHAVIOR MODIFICATION**

Major principles and techniques available to modify behavior, particularly pathological behavior. Emphasis placed on environmental manipulations which serve to modify behavior. Pre: 2004, 2044, 3014. (3H,3C)

**3054: HEALTH PSYCHOLOGY**

Major theories, strategies, and methods for understanding psychological contributions to health and disease; psychological approaches to the treatment and prevention of disease and unintentional injuries, and health and safety promotion. Pre: 2004. (3H,3C)

**3154 (EDCI 3154): PSYCHOLOGICAL FOUNDATIONS OF EDUCATION**

Emphasizes theories of human learning and the relationship of learning principles to educational practice. Within the context of both cognitive and behavioral models of learning, attention is given to instructional procedures, student motivation and discipline, and the assessment of educational progress. Pre: 2004. (3H,3C)

**4014: HISTORY AND SYSTEMS IN PSYCHOLOGY**

Overview of modern theories in psychology by consideration of current historical controversies. Traces roots of psychology in natural and social sciences. Considers the diversity of psychological study and the future of psychology. Senior standing in psychology required for undergraduate credit. Graduate standing required for graduate credit. (3H,3C)

**4024: INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY**

Overview of psychological theories, research findings, and methods relevant to studying the behavior of individuals in organizations. Topics covered may include prediction of job performance, personnel testing, training and development, and leadership. Pre: 2004, (STAT 2004 or BIT 2405 or STAT 3604). (3H,3C)

**4034: ADVANCED DEVELOPMENTAL PSYCHOLOGY**

Development of attention, cognition, social skills, language, personality, and intelligence throughout the life-span: an in-depth, critical evaluation of current research and theory. Pre: 2004, 2034. (3H,3C)

**4044: ADVANCED LEARNING**

Critical analysis of basic paradigms of Pavlovian and Instrumental Conditioning with emphasis on general theories of learning and issues involved in cognition, reinforcement, and memory. Pre: 2004, 2044, 2094. (3H,3C)

**4054: PERSONALITY RESEARCH**

Research techniques used in contemporary personality psychology: case histories, correlational methods, experimentation, archival studies, and psychobiography. Pre: 2004, 2054, (STAT 2004 or STAT 3604 or BIT 2405). (3H,3C)

**4064: PHYSIOLOGICAL PSYCHOLOGY**

Presentation of concepts important for the study of neuroscience and behavior with a special emphasis on the classic topics of physiological psychology: brain-behavior relations, sensory integration, physiological correlates of motivation and emotion. Pre: 2004, 2064, 2094. (3H,3C)

**4074: SENSATION AND PERCEPTION**

Overview of sensory and perceptual systems and their integration in influencing behavior. Emphasis on sensory receptor characteristics, neural structure, psychophysical data, perceptual phenomena and issues, theories about the human perceptual process. Pre: 2004, 2064, 2094. (3H,3C)

**4084: ADVANCED SOCIAL PSYCHOLOGY**

Examines social behavior from four major theoretical orientations: reinforcement, field theory, cognitive, and role theory. Topics may include social learning, social exchange theories, group processes, attitude, and person perception. Pre: 2004, 2084. (3H,3C)

**4094: THEORY OF PSYCHOLOGICAL MEASUREMENT**

Theory of psychological measurement and techniques used to develop and evaluate psychological measures. Coverage of standardization, measurement scales, reliability, validity, score transformations, composite scores, weighted scores, and test construction. Pre: 2004, 2094, (STAT 2004 or STAT 3604 or BIT 2405). (3H,3C)

#### 4104: MOTIVATION

Overview of concepts, phenomena, principles, and theories of motivation from biological, learning, social and cognitive viewpoints. Pre: 2004, 2044, 2094. (3H,3C)

#### 4114: COGNITIVE PSYCHOLOGY

An experimentally-oriented survey of human cognitive processes which include attention, memory, and decision making. Role of individual difference variables in each area. Pre: 2004, 2044, 2094. (3H,3C)

#### 4124 (EDCI 4124): PSYCHOLOGICAL FOUNDATIONS OF EDUCATION FOR PRESERVICE TEACHERS

Emphasizes applying human learning and developmental theories to the classroom setting with a focus on instructional processes and procedures, student motivation, classroom management, and assessment strategies. Participation in a 4-year or 5-year teacher education program. Junior level standing. Pre: 2004 or HD 1004. (3H,3C)

#### 4174 (EDCI 4174): STUDENTS WITH EMOTIONAL AND BEHAVIORAL DISORDERS

This course examines the characteristics and needs of individuals with emotional and behavioral disorders. Topics include history, definitions and causes of emotional and behavioral disorders, major research findings, identification procedures, educational programming and current issues. (2H,2C)

#### 4204: LABORATORY IN MOTIVATION

Experimental techniques for studying motivation in humans and animals including deprivation procedures, expectancy manipulations, verbal instructions, incentive variables, care and maintenance of animals, and techniques for measuring frequency, latency, and magnitudes of responding. Co: 4104. (3L,1C)

#### 4214: COGNITIVE PSYCHOLOGY LABORATORY

Design, operation, and analysis of experiments to study human cognitive processes (e.g., attention, memory, and decision-making). Co: 4114. (3L,1C)

#### 4234: LABORATORY IN DEVELOPMENTAL PSYCHOLOGY

Research design and implementation in the study of perceptual and motor development, language development, cognitive development, and social development. Pre: 2004, 2034. Co: 4034. (3L,1C)

#### 4244: LABORATORY IN ADVANCED LEARNING

Experimental techniques for studying the development, maintenance, and retention of behavior change in humans and animals. Laboratory exercises in Pavlovian and Instrumental Conditioning, verbal learning and memory. Co: 4044. (3L,1C)

#### 4254: PERSONALITY RESEARCH LABORATORY

Laboratory course in personality research techniques. Emphasis on experimental, archival, questionnaire, and psychobiographical approaches. Co: 4054. (3L,1C)

#### 4264: LABORATORY IN PHYSIOLOGICAL PSYCHOLOGY

Experimental techniques in the area of physiological psychology including: handling and care of laboratory animals, anesthetic and surgical techniques, and measurement of physiological variables. Co: 4064. (3L,1C)

#### 4274: LABORATORY IN SENSATION AND PERCEPTION

Overview of the major experimental techniques and phenomena of sensation and perception. Emphasis on psychophysical methods, signal detection, dark adaptation, perceptual illusions. Co: 4074. (3L,1C)

#### 4284: LABORATORY IN SOCIAL PSYCHOLOGY

Design, performance, and analysis of experiments in social psychology. Various methodologies used in social research (e.g., laboratory experimentation, field observations) will be studied through actual performance of experiments. Co: 4084. (3L,1C)

#### 4294: LABORATORY IN PSYCHOLOGICAL MEASUREMENT

Design and implementation of psychological assessment devices including issues of test construction, reliability, validity, standardizing, and detecting test bias. Pre: 2004, 2094, (STAT 2004 or STAT 3604 or STAT 2405). Co: 4094. (3L,1C)

#### 4354: SENIOR SEMINAR

For Psyc majors. Intended to provide in-depth coverage and discussion of a small set of topics selected by members of the seminar. Consent required. (3H,3C)

#### 4364: SENIOR SEMINAR

For Psyc majors. Intended to provide in-depth coverage and discussion of a small set of topics selected by members of the seminar. (3H,3C)

#### 4964: FIELD STUDY

Pass/Fail only. Variable credit course. X-grade allowed.

#### 4974: INDEPENDENT STUDY

Variable credit course.

#### 4974H: INDEPENDENT STUDY

Honors section. Variable credit course.

4984: SPECIAL STUDY  
Variable credit course.

4994: UNDERGRADUATE RESEARCH  
Variable credit course.

4994H: UNDERGRADUATE RESEARCH  
Honors section. Variable credit course.

## Overview

Statistics courses are offered at both the undergraduate and the graduate levels for students preparing for professions in statistics, for students who need statistical tools to engage in scientific research, and for students who want to acquire knowledge of the important concepts of probability and statistical inference.

Statistics courses for graduate students and programs leading to the M.S. and Ph.D. degrees in statistics are described in the [Graduate Catalog](#) and in a special bulletin available from the department.

## Bachelor of Science in Statistics

The Statistics major requires the completion of 38 credit hours in Statistics, 16 hours of Mathematics, 3 hours of Computer Science and 3 hours of Technical Writing. Specific requirements can be found on the department website.

All statistics majors are required to own specified personal computers and software. Consult the department for details.

A special brochure describing the department and the B.S. program, intended for prospective entering freshmen, is available from the department upon request.

Cooperative Education and Internship positions are available in industry and government, offering valuable practical experience. Students participating in such an experience can receive academic credit which will count towards graduation requirements.

## Minor in Statistics

Requirements: 18 hours

1. Completion of an introductory sequence: 3005-3006, 3615-3616 or 4705-4706; Note that 3604 may substitute for 3615 if taken before the minor was declared.
2. 4204 or 4214; Note that 4214 can only count for part (2) or (3), not both.
3. 6-9 credit hours from 3504, 4004, 4214, 4444, 4504, 4514, 4524, 4534, 4804, Math 4454, or ISE 4404; Note that Econ majors or minors may use Econ 4304 to substitute for Stat 4804.

4. 3 hours for part (3) may come from 2004, providing it is the first statistics course taken.

The department reserves the right to withhold credit if a student takes a course, the content of which is partially duplicated in a course already taken (see *Course Duplications* below).

## Laboratory for Interdisciplinary Statistical Analysis (LISA)

Associated with the statistics department, the Laboratory for Interdisciplinary Statistical Analysis (LISA) provides statistical assistance for research projects throughout the university community. Faculty members, staff, and students are available to aid in statistical design and analysis for any authorized research study here at the university and at other state agencies.

## Satisfactory Progress

University policy requires that students who are making satisfactory progress toward a degree meet minimum criteria toward the Curriculum for Liberal Education (see "[Academics](#)"), toward the College of Science Core (see first part of this chapter), and toward the degree in statistics. Satisfactory progress toward the B.S. in Statistics requires that:

Upon having attempted 70 semester credits (including transfer, advanced placement, advanced standing, credit by examination, freshman rule), students must have completed *with a course grade of C- or above*:

1. Upon having attempted 72 semester credits (including transfer, AP, advanced standing, credit by examination, course withdrawal) majors must have completed the following courses with grades of C- or better: STAT 3005, 3006; MATH 1205, 1206, 1114, 1224, 2224, and not have taken any MATH or STAT designated course for the degree more than twice, including attempts ending in course withdrawal.
2. Upon having attempted 90 semester credits, students must have an in-major grade point average of 2.0 or above.

## Course Duplications

No credit will be given for 2004 if taken with or after any other statistics course; MASC 1034, STAT 3604 if taken with or after any statistics course except 2004, 3104. BIT 2405 may not be used as a substitute for credit as a statistics course unless the student was officially registered as a Business major at the time BIT 2405 was taken.

## Computer Literacy

Many statistics courses involve the use of statistics software, primarily MINITAB, SAS, JMP or R. Experience with the software is not expected, but students should have familiarity with either the Windows or Macintosh operating system and have access to a computer.

## Course Projects

Many of the upper-division courses include a project, generally to be completed in small groups. These projects are designed to give students the kind of insight and experience in realistic statistical practice that cannot be obtained in classroom lectures or short-term homework assignments.

## Undergraduate Courses (STAT)

### 2004: INTRODUCTORY STATISTICS

Fundamental concepts and methods of statistics with emphasis on interpretation of statistical arguments. An introduction to design of experiments, data analysis, correlation and regression, concepts of probability theory, sampling errors, confidence intervals, and hypothesis tests. (See also *Course Duplications*). Pre: MATH 1015. (4H,3C)

### 2964: FIELD STUDY

Pass/Fail only. Variable credit course.

### 2974H: INDEPENDENT STUDY

Honors section. Variable credit course.

### 3005-3006: STATISTICAL METHODS

3005: Basic statistical methodology: exploratory data techniques, estimation, inference, comparative analysis by parametric, nonparametric, and robust procedures. Analysis of variance (one-way), multiple comparisons, and categorical data. 3006: Analysis of variance, simple and multiple, linear and nonlinear regression, analysis of covariance. Use of MINITAB. STAT 3005 duplicates STAT 3615 and STAT 4604, only one may be taken for credit. STAT 3006 duplicates STAT 3616, STAT 4604 and STAT 4706, only one may be taken for credit. Pre: MATH 1206 for 3005; 3005 for 3006. (3H,3C)

### 3094: SAS PROGRAMMING

Introduction to basic programming techniques: creating DATA and PROC statements, libraries, functions, programming syntax and formats. Other topics include loops, SAS Macros and PROC IML. Emphasis is placed on using these tools for statistical analyses. The pre-requisite may be substituted for an equivalent course. Pre: 3005. (3H,3C)

#### 3104: PROBABILITY AND DISTRIBUTIONS

Probability theory, including set theoretic and combinatorial concepts; in-depth treatment of discrete random variables and distributions, with some introduction to continuous random variables; introduction to estimation and hypothesis testing. Pre: (MATH 1206 or MATH 2015 or MATH 1526), (STAT 3005 or STAT 3615). (3H,3C)

#### 3504: NONPARAMETRIC STATISTICS

Statistical methodology based on ranks, empirical distributions, and runs. One and two sample tests, ANOVA, correlation, goodness of fit, and rank regression, R-estimates and confidence intervals. Comparisons with classical parametric methods. Emphasis on assumptions and interpretation. Pre: 3006, 4106, 4604, 4706. (3H,3C)

#### 3604: STATISTICS FOR THE SOCIAL SCIENCES

Statistical methods for nominal, ordinal, and interval levels of measurement. Topics include descriptive statistics, elements of probability, discrete and continuous distributions, one and two sample tests, measures of association. Emphasis on comparison of methods and interpretations at different measurement levels. (See also Course Duplications). Pre: MATH 1015. (3H,3C)

#### 3615-3616: BIOLOGICAL STATISTICS

Descriptive and inferential statistics in a biological context. 3615: Fundamental principles, one- and two-sample parametric inference, simple linear regression, frequency data. 3616: One- and two-way ANOVA, multiple regression, correlation, nonparametrics, using the MINITAB computer package. STAT 3615 partially duplicates STAT 3005 and STAT 4604, only one may be taken for credit. STAT 3616 partially duplicate STAT 3006, 4604 and 4706, only one may be taken for credit. (3H,3C)

#### 3704: STATISTICS FOR ENGINEERING APPLICATIONS

Introduction to statistical methodology with emphasis on engineering experimentation: probability distributions, estimation, hypothesis testing, regression, and analysis of variance. Only one of the courses 3704, 4604, 4705, and 4714 may be taken for credit. Pre: MATH 2224. (2H,2C)

#### 4004: METHODS OF STATISTICAL COMPUTING

Computationally intensive computer methods used in statistical analyses. Statistical univariate and multivariate graphics; resampling methods including bootstrap estimation and hypothesis testing and simulations; classification and regression trees; scatterplot smoothing and splines. Pre: (4105, 4214). (4H,3C)

#### 4024: COMMUNICATION IN STATISTICAL COLLABORATIONS

Theory and examples of effective communication in the context of statistical collaborations. Practice developing the communication skills necessary to be effective statisticians using peer feedback and self-reflection. Topics include helping scientists answer their research questions, writing about and presenting statistical concepts to a non-statistical audience, and managing an effective statistical collaboration meeting. Pre-requisite: Senior standing in the Department of Statistics Pre: 4105, 4204. Co: 4214. (3H,3C)

#### 4105-4106: THEORETICAL STATISTICS

4105: Probability theory, counting techniques, conditional probability; random variables, moments; moment generating functions; multivariate distributions; transformations of random variables; order statistics. 4106: Convergence of sequences of random variables; central limit theorem; methods of estimation; hypothesis testing; linear models; analysis of variance. STAT 4105 partially duplicates STAT 4705, STAT 4714, and STAT 4724, only one may be taken for credit. I Pre: MATH 2224 for 4105; MATH 2224, STAT 4105 for 4106. (3H,3C)

#### 4204: EXPERIMENTAL DESIGNS

Fundamental principles of designing and analyzing experiments with application to problems in various subject matter areas. Discussion of completely randomized, randomized complete block, and Latin square designs, analysis of covariance, split-plot designs, factorial and fractional designs, incomplete block designs. Pre: 3006 or 3616 or 4106 or 4706 or 5605 or 5615. (3H,3C)

#### 4214: METHODS OF REGRESSION ANALYSIS

Multiple regression including variable selection procedures; detection and effects of multicollinearity; identification and effects of influential observations; residual analysis; use of transformations. Non-linear regression, the use of indicator variables, and logistic regression. Use of SAS. Pre: 3006 or 3616 or 4106 or 4706 or 5606 or 5616. (3H,3C)

#### 4444: APPLIED BAYESIAN STATISTICS

Introduction to Bayesian methodology with emphasis on applied statistical problems: data displaying, prior distribution elicitation, posterior analysis, models for proportions, means and regression. Pre: MATH 2224, (STAT 3104 or STAT 4105 or STAT 4705), (STAT 3006 or STAT 3616 or STAT 4706). (3H,3C)

#### 4504: APPLIED MULTIVARIATE ANALYSIS

Non-mathematical study of multivariate analysis. Multivariate analogs of univariate test and estimation procedures. Simultaneous inference procedures. Multivariate analysis of variance, repeated measures, inference for dispersion and association parameters, principal components analysis, discriminate analysis, cluster analysis. Use of SAS. Pre: 3006 or 4706 or 5606 or 5616. (3H,3C)

#### 4514: CONTINGENCY TABLE ANALYSIS

Statistical techniques for frequency data. Goodness-of-fit. Tests and measures of association for two-way tables. Log-linear models for multidimensional tables. Parameter estimation, model selection, incomplete tables, ordinal categories, logistic regression. Use of SAS and SPSSx. Pre: 3006 or 3616 or 4106 or 4706 or 5606 or 5616. (3H,3C)

**4524: SAMPLE SURVEY METHODS**

Statistical methods for the design and analysis of survey sampling. Fundamental survey designs. Methods of randomization specific to various survey designs. Estimation of population means, proportions, totals, variances, and mean squared errors. Design of questionnaires and organization of a survey. Pre: 3006 or 3616 or 4106 or 4706 or 5606 or 5616. (3H,3C)

**4534: APPLIED STATISTICAL TIME SERIES ANALYSIS**

Applied course in time series analysis methods. Topics include regression analysis, detecting and address autocorrelation, modeling seasonal or cyclical trends, creating stationary time series, smoothing techniques, forecasting and forecast errors, and fitting autoregressive integrated moving average models. Pre: 3006 or 4104 or 4706 or 4714 or 3616. (3H,3C)

**4584 (MATH 4584): ADVANCED CALCULUS FOR STATISTICS**

Introduction to those topics in advanced calculus and linear algebra needed by statistics majors. Infinite sequences and series. Orthogonal matrices, projections, quadratic forms. Extrema of functions of several variables. Multiple integrals, including convolution and nonlinear coordinate changes. Pre: MATH 1114, MATH 1205, MATH 1206, MATH 2224. (3H,3C)

**4604: STATISTICAL METHODS FOR ENGINEERS**

Introduction to statistical methodology with emphasis on engineering applications: probability distributions, estimation, hypothesis testing, regression, analysis of variance, quality control. Only one of the courses 4604, 4705, and 4714 may be taken for credit. STAT 4604 partially duplicates STAT 3005, STAT 3615, STAT 3006, STAT 3616 and STAT 4706. Only one may be taken for credit. Pre: MATH 1206. (3H,3C)

**4705-4706: PROBABILITY AND STATISTICS FOR ENGINEERS**

Basic concepts of probability and statistics with emphasis on engineering applications. 4705: Probability, random variables, sampling distributions, estimation, hypothesis testing, simple linear regression correlation, one-way analysis of variance. 4706: Multiple regression, analysis of variance, factorial and fractional experiments. Only one of the courses 3704, 4604, 4705, 4714, and 4724 may be taken for credit. Pre: MATH 2224 for 4705; 4705 or 4105 for 4706. (3H,3C)

**4714: PROBABILITY AND STATISTICS FOR ELECTRICAL ENGINEERS**

Introduction to the concepts of probability, random variables, estimation, hypothesis testing, regression, and analysis of variance with emphasis on application in electrical engineering. Only one of the courses 3704, 4604, 4705, 4714 and 4724 may be taken for credit. Pre: MATH 2224. (3H,3C)

**4724: STATISTICAL THEORY FOR ECONOMISTS**

Probability, random variables, marginal and conditional distributions, mathematical expectations, sampling distributions, properties of estimators, maximum likelihood and least squares estimation, confidence intervals, hypothesis tests, linear regression. Emphasis on preparation for graduate study in econometrics. STAT 4724 partially duplicates STAT 4105, STAT 4705, and STAT 4714, only one may be taken for credit. Pre: 3006, MATH 2015. (3H,3C)

**4804 (AAEC 4804): ELEMENTARY ECONOMETRICS**

Economic applications of mathematical and statistical techniques: regression, estimators, hypothesis testing, lagged variables, discrete variables, violations of assumptions, simultaneous equations. Pre: (3005 or 3604), (AAEC 1006). (3H,3C) II.

**4954: PROFESSIONAL PORTFOLIO**

Preparation of a portfolio of professional quality statistical reports, using the student's term reports from three upper division applied statistics courses. Student will choose a faculty mentor to work with in preparation of the portfolio. Statistics major with Senior standing. Pass/Fail only. I, II, III, IV. Pass/Fail only. (1H,1C)

**4964: FIELD STUDY**

Pass/Fail only. Variable credit course.

**4974: INDEPENDENT STUDY**

Variable credit course.

**4974H: INDEPENDENT STUDY**

Honors section. Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

**4994H: UNDERGRADUATE RESEARCH**

Honors section. Variable credit course.

## Overview

Founded by the Virginia General Assembly in 1978, the Virginia-Maryland Regional College of Veterinary Medicine is a regional school for the professional training of veterinarians which has been built upon the strong foundations of two of the nation's leading land-grant universities: Virginia Tech in Blacksburg and the University of Maryland at College Park. The College operates three campuses, including the main campus facilities at Virginia Tech, the Avrum Gudelsky Veterinary Center at College Park, and the Marion duPont Scott Equine Medical Center in Leesburg.

## Graduate Programs

The graduate program leads to the M.S. and Ph.D. in biomedical and veterinary sciences. The goal of this program is to enhance the research capabilities of the graduates so that they can conduct independent research and associated societal endeavors aimed at solving biomedical problems related to veterinary medicine. These individuals will be expected to make scientific contributions in academia, research, and animal health administration.

For additional information, contact the Graduate School via e-mail [vmsgrad@vt.edu](mailto:vmsgrad@vt.edu).

## The Professional Program

Students desiring admission to the four-year instructional program leading to the D.V.M. degree must show evidence of intellectual ability and achievement, as well as personal preparation for the curriculum and the profession. Because the number of applicants greatly exceeds the number of spaces in entering classes, only those who demonstrate such qualifications to a high degree will be selected. Most entering students will have completed three or more years at an accredited university by the time of matriculation; however, applications will be accepted from students who have completed at least 60 semester hours or 90 quarter hours of university credit by the end of the spring term of the year for which application is being made, and who have a grade point average of at least 2.8 on a four-point scale. Exceptional students with the minimum university course work are encouraged to apply.

A number of college courses, with laboratory classes, are required for entry into the DVM program including biological sciences, organic chemistry, and physics. An 8-semester-hour or 12-quarter-hour sequence is required for each of these subjects. A one-semester course (3 s. h.) in biochemistry will meet the minimum requirement for entry.

Further courses required include 6 semester hours or 9 quarter hours of college-level courses in English, mathematics, and humanities/social sciences. In addition, many courses contributing to a well-rounded liberal education are of direct value and, although proficiency in the sciences is essential to the understanding of veterinary medicine, concentration on the sciences at the undergraduate level is not essential. Those students who elect to major in disciplines other than the biological sciences, chemistry, or physics may find less difficulty in coping with the basic sciences in veterinary medical school if they have, in addition to the above mentioned required courses, some work in either advanced biology or advanced chemistry. Suggested electives include: biostatistics; cell biology, comparative anatomy, genetics, microbiology, nutrition, physiology, or domestic animal production courses. Since veterinary medicine also is concerned with a variety of social, environmental, and community activities, a broad cultural background as well as a technical education is required. Basic computer skills are highly desirable.

Admissions inquiries should be directed to the individuals listed below:

## Professional Program Courses

**Professional program courses leading to the D.V.M. degree carry the veterinary medicine (VM) prefix.**

8004: Professional Foundations In Veterinary Medicine

8014 (BMVS 5434): Veterinary Anatomy I

8024: Descriptive Embryology

8034 (BMVS 5454): Veterinary Physiology I

8044: Medical Biochemistry

8054: Veterinary Histology

8064 (BMVS 5044): Veterinary Immunology

8074: Large Animal Husbandry

8084: Veterinary Epidemiology

8094: Clinical Perspectives

8104 (BMVS 5474): Veterinary Neurobiology

8114 (BMVS 5444): Veterinary Anatomy II

8124 (BMVS 5054): Veterinary Virology

8134 (BMVS 5464): Veterinary Physiology II

8144: Veterinary Ethology

8154: Food Animal Product Safety

8244: Morphology Of Wild Mammals

8234: Fundamentals Of Nutrition

8254 (BMVS 5814): Functional Morphology Birds, Reptiles

8264 (BMVS 5824): Small Animal Nutrition

8874: Ferret Medicine & Surgery

8984: Special Study

9004: Avian Medicine And Surgery

9014: Advanced Diagnostic Imaging

9034: Advanced Small Animal Surgery

9044: Food Animal Clinical Problem Solving

9064: Advanced Histopathology

9074: Goat And Sheep Medicine

9085-9086 (BMVS 5005-5006): Emerging Infectious Diseases

9094 (BMVS 6564): Advanced Veterinary Public Health

9095-9096 (BMVS 5305-5306): Veterinary Oncology

9104: Business Management

9114: Toxicology of Poisonous Plants Affecting Livestock

9124: Advanced Equine Theriogenology

9134: Advanced Small Animal Surgery Lab

9144: Problem Solving In Small Animal Medicine

9174: Equine Neonatology & Pediatrics

9184: Advanced Cardiovascular Medicine

9204 (BMVS 4084): Medical Toxicology

9214 (BMVS 6574): Animals and Public Policy

8274: Topics In Veterinary Pharmacology  
 8284: Veterinary Musculoskeletal System  
 8304: Veterinary Pathology I  
 8314 (BMVS 5244): Fundamentals Of Veterinary Pharmacology  
 8324 (BMVS 5744): Veterinary Parasitology  
 8334 (BMVS 5754): Veterinary Bacteriology & Mycology  
 8344: Veterinary Ophthalmology  
 8354: Veterinary Clinical Techniques  
 8374: Fundamentals of Theriogenology  
 8384 (BMVS 5834): Food Animal Nutrition  
 8394 (BMVS 5844): Equine Nutrition  
 8404: Veterinary Pathology II  
 8414 (BMVS 5734): Clinical Pathology  
 8424 (BMVS 5254): Veterinary Toxicology  
 8434: Veterinary PUBLIC HEALTH  
 8444: Veterinary Anesthesiology  
 8454: Veterinary Clinical Nutrition  
 8474 (BMVS 5124): Reproductive Pathology  
 8494 (BMVS 5764): Aquatic Medicine/Fish Health  
 8514 (BMVS 6514): Equine Theriogenology  
 8524: Equine Clinical Problem Solving  
 8534 (BMVS 5564): Introduction To Clinical Research  
 8544: Veterinary Radiology  
 8554: General Veterinary Medicine  
 8574: Food Animal Theriogenology  
 8585, 8586, 8587: Small Animal Medicine  
 8594: Wildlife Medicine  
 8614: Veterinary Gastroenterology  
 8615, 8616: Food Animal Medicine And Surgery  
 8624: Veterinary Surgical Principles and Practicals  
 8644: Urology  
 8654: Veterinary Neurology  
 8664: Path Animal Models Disease  
 8674: Veterinary Hemolymphatic System  
 8684 (BMVS 6554): Advanced Epidemiology  
 8686: Introduction To Clinics  
 8694: Advanced Small Animal Techniques  
 8695, 8696: Equine Medicine And Surgery  
 8704: Veterinary Cytopathology  
 8754 (BMVS 5864): Veterinary Cardiorespiratory System  
 8764: Veterinary Dermatology and Endocrinology  
 8784: Clinical Pharmacology  
 8804: Complementary Medicine  
 8854: Veterinary Career Development

9224: Clinical Applications In Exotic Animal Medicine  
 9234 (BMVS 6584): Veterinary Public Policy  
 9244 (BMVS 6594): International Veterinary Medicine  
 9254: Small Animal Theriogenology  
 9264: Small Animal Community Practice Clerkship  
 9404: Specialty Medicine Clerkship  
 9434: Small Animal Medicine Clerkship  
 9454: Veterinary Ophthalmology Elective Clerkship  
 9464: Radiology (Ultrasound) Elective Clerkship  
 9504: Large Animal Clinical Services Clerkship  
 9534: Production Management Medicine Clerkship  
 9544: Equine Medical Center Clerkship  
 9554: Lge Animal Clin. Services Elective Clerkship  
 9564: Food Animal Elective Clerkship  
 9574: Production Mgt Medicine Elective Clerkship  
 9584: Small Animal Theriogenology Clerkship  
 9604: Sm. Ruminant/Pseudoruminant Elec. Clerkship  
 9614: Small Animal Surgery Clerkship  
 9624: Anesthesiology Clerkship  
 9634: Radiology Clerkship  
 9644: Small Animal Private Practice Clerkship  
 9654: Small Animal Internal Med. Elective Clerkship  
 9664: Small Animal Surgery Elective Clerkship  
 9674: Small Animal Spec. Practice Elective Clerkship  
 9684: Small Animal Emergency Med. Elective Clerkship  
 9694: Anesthesiology Elective Clerkship  
 9704: Clinical Pathology Clerkship  
 9714: Govt & Corp. Veterinary Medicine Clerkship  
 9724: Laboratory Services Clerkship  
 9744: Morphologic Pathology Elective Clerkship  
 9764: Independent Study Elective Clerkship  
 9774: Self-Initiated Elective Clerkship  
 9784: Govt & Corp. Vet. Med. Elective Clerkship  
 9794: Ctr. For Govt. And Corp. Vet. Medicine Clerkship  
 9804: Food Animal Private Practice Clerkship  
 9814: Equine Private Practice Clerkship  
 9824: Mixed Species Private Practice Clerkship  
 9834: Equine Theriogenology Clerkship  
 9844: Food Animal Theriogenology Clerkship

[TOP](#)

## Undergraduate Courses (BMVS)

### 4014: ANIMAL DOMESTICATION AND GENETIC RESOURCES

Considers the process, history, sociology and geography of animal domestication. Includes behavioral, physiologic and morphological changes incurred by domesticated stocks. Examines genetic variability of domestic species, considers breed groups and uniquely adapted breeds. Considers reasons for erosion of genetic variability and mechanisms to counteract such erosion. International in scope. Pre: senior status or enrollment in veterinary professional curriculum. I (1H,1C)

### 4024: DISEASES OF POULTRY

Biology control and prevention of poultry diseases. Taught alternate years. I (2H,2C)

**4034 (BCHM 4034): ENVIRONMENTAL HEALTH TOXICOLOGY**

Health effects associated with the exposure to chemicals, identifying and managing problems of chemical exposure in the work places and the environment, fundamental principles of biopharmaceutics and toxicokinetics, and risk assessment. Emphasis on conceptual understanding of chemical entry into the body, biotransformation, or degradation multiple chemical sensitivity, and chemically induced diseases. Identification of nutrient interactions with environmentally induced disorders and to understand the mechanisms of such interactions and their influence on human health and welfare. Pre: BIOL 2104 or BIOL 3124, ALS 2304 or BIOL 2406 or BCHM 3114. (3H,3C)

**4054: LABORATORY ANIMAL MANAGEMENT**

This course involves a study of the principles of laboratory animal science, providing the student with a basic understanding of the laws and regulations governing the care and use of animals, husbandry and surgery of a variety of lab animal species, and variables which can adversely affect animal research. Through formal lectures, discussions, and laboratory sessions, the course is designed to complement graduate studies in biological, biomedical, and life sciences which involve the use of animals in research. (2H,3L,3C)

**4064 (BMES 4064): INTRODUCTION TO MEDICAL PHYSIOLOGY**

An introductory course to the principles of medical physiology, designed primarily for -- but not limited to -- undergraduate and graduate students majoring in biomedical engineering, and other related engineering and physical sciences majors with little or no formal background in biological sciences. The focus is on basic principles and concepts of physiology with a special emphasis on the interactions of human systems biology in their entirety rather than individual genes and pathways. Not intended for students expecting to major in biology or planning to enter health professional fields. Pre: Junior standing or permission of the instructor. (3H,3C)

**4074: PHARMACOLOGY**

A basic course in the science of pharmacology, intended to provide an understanding of the mechanisms of action and physiological systemic effects of major classes of drugs of biological, agricultural, social, and medical importance. Must have prerequisites or equivalent. Pre: CHEM 2514 or CHEM 2535 or ALS 2304 or BIOL 2406. (3H,3C)

**4084 (VM 9204): MEDICAL TOXICOLOGY**

Adverse health effects of exposure to drugs or substances of abuse. Covers principles of toxicodynamics, toxicokinetics, biotransformation, diagnosis and treatment. Emphasis will be placed on mechanism(s) of action of the various drug classes, body system(s) affected, clinical manifestations of problems and the resulting adverse effects on human health and society. Methods of treatment and client education will also be addressed. Laws controlling and governing the use of these drugs/substances and the agencies responsible for them will also be covered. Pre: third year standing in DVM curriculum. Pre: (CHEM 2514 or CHEM 2535), (BIOL 2406 or ALS 2304), (MATH 1015). (2H,2C)

**4094: VERTEBRATE DEVELOPMENT**

A comprehensive exposition of developmental events and anatomy in vertebrates, with emphasis on mammals. Clinical correlations with congenital illness and malformations are stressed. Intended to give students in the life sciences a background in the organization of anatomy and extensive understanding of the processes of ontogeny. Appropriate for majors in Biology, Animal Science, pre-medical, pre-veterinary, and other pre-professional programs. Spring alternate years. Pre: Permission of the instructors. (3H,3L,4C)

**4104: TOPICS IN PHARMACOLOGY**

Designed for senior undergraduates and graduate students desiring in-depth study of selected topics in pharmacology - tailored to individual students' careers, e.g: research, government service, academia. Essay/seminar format provides opportunity to develop oral and written communication skills. Pre: Pharmacology I: 4074 (3 credits) or equivalent. Pre: 4074. (3H,3C)

**4974: INDEPENDENT STUDY**

Variable credit course.

**4984: SPECIAL STUDY**

Variable credit course.

**4994: UNDERGRADUATE RESEARCH**

Variable credit course.

**4994H: UNDERGRADUATE RESEARCH**

Honors section Variable credit course.

## **Undergraduate Courses (BMSP)**

**4014: ANIMAL DOMESTICATION AND GENETIC RESOURCES**

Considers the process, history, sociology and geography of animal domestication. Includes behavioral, physiologic and morphological changes incurred by domesticated stocks. Examines genetic variability of domestic species, considers breed groups and uniquely adapted breeds. Considers reasons for erosion of genetic variability and mechanisms to counteract such erosion. International in scope. Pre: senior status or enrollment in veterinary professional curriculum. I (1H,1C)

**4024: DISEASES OF POULTRY**

Biology control and prevention of poultry diseases. Taught alternate years. I (2H,2C)

**4034 (BCHM 4034): ENVIRONMENTAL HEALTH TOXICOLOGY**

Health effects associated with the exposure to chemicals, identifying and managing problems of chemical exposure in the work places and the

environment, fundamental principles of biopharmaceutics and toxicokinetics, and risk assessment. Emphasis on conceptual understanding of chemical entry into the body, biotransformation, or degradation multiple chemical sensitivity, and chemically induced diseases. Identification of nutrient interactions with environmentally induced disorders and to understand the mechanisms of such interactions and their influence on human health and welfare. Pre: BIOL 2104 or BIOL 3124, ALS 2304 or BIOL 2406 or BCHM 3114. (3H,3C)

#### 4054: LABORATORY ANIMAL MANAGEMENT

This course involves a study of the principles of laboratory animal science, providing the student with a basic understanding of the laws and regulations governing the care and use of animals, husbandry and surgery of a variety of lab animal species, and variables which can adversely affect animal research. Through formal lectures, discussions, and laboratory sessions, the course is designed to complement graduate studies in biological, biomedical, and life sciences which involve the use of animals in research. (2H,3L,3C)

#### 4064 (BMES 4064): INTRODUCTION TO MEDICAL PHYSIOLOGY

An introductory course to the principles of medical physiology, designed primarily for -- but not limited to -- undergraduate and graduate students majoring in biomedical engineering, and other related engineering and physical sciences majors with little or no formal background in biological sciences. The focus is on basic principles and concepts of physiology with a special emphasis on the interactions of human systems biology in their entirety rather than individual genes and pathways. Not intended for students expecting to major in biology or planning to enter health professional fields. Pre: Junior standing or permission of the instructor. (3H,3C)

#### 4074: PHARMACOLOGY

A basic course in the science of pharmacology, intended to provide an understanding of the mechanisms of action and physiological systemic effects of major classes of drugs of biological, agricultural, social, and medical importance. Must have prerequisites or equivalent. Pre: CHEM 2514 or CHEM 2535 or ALS 2304 or BIOL 2406. (3H,3C)

#### 4084 (VM 9204): MEDICAL TOXICOLOGY

Adverse health effects of exposure to drugs or substances of abuse. Covers principles of toxicodynamics, toxicokinetics, biotransformation, diagnosis and treatment. Emphasis will be placed on mechanism(s) of action of the various drug classes, body system(s) affected, clinical manifestations of problems and the resulting adverse effects on human health and society. Methods of treatment and client education will also be addressed. Laws controlling and governing the use of these drugs/substances and the agencies responsible for them will also be covered. Pre: third year standing in DVM curriculum. Pre: (CHEM 2514 or CHEM 2535), (BIOL 2406 or ALS 2304), (MATH 1015). (2H,2C)

#### 4094: VERTEBRATE DEVELOPMENT

A comprehensive exposition of developmental events and anatomy in vertebrates, with emphasis on mammals. Clinical correlations with congenital illness and malformations are stressed. Intended to give students in the life sciences a background in the organization of anatomy and extensive understanding of the processes of ontogeny. Appropriate for majors in Biology, Animal Science, pre-medical, pre-veterinary, and other pre-professional programs. Spring alternate years. Pre: Permission of the instructors. (3H,3L,4C)

#### 4104: TOPICS IN PHARMACOLOGY

Designed for senior undergraduates and graduate students desiring in-depth study of selected topics in pharmacology - tailored to individual students' careers, e.g: research, government service, academia. Essay/seminar format provides opportunity to develop oral and written communication skills. Pre: Pharmacology I: 4074 (3 credits) or equivalent. Pre: 4074. (3H,3C)

Variable credit course.

#### 4994: UNDERGRADUATE RESEARCH

Variable credit course.

#### 4994H: UNDERGRADUATE RESEARCH

Honors section Variable credit course.

### Undergraduate Courses (PHS)

#### 1514: PERSONAL HEALTH

Fundamental health content and theory to provide students with constructive health information necessary to meet current and future personal health needs. Special emphasis on wellness and health promotion. (3H,3C)

#### 3464 (AHRM 3464) (GEOG 3464) (HD 3464) (HUM 3464) (SOC 3464): APPALACHIAN COMMUNITIES

The concept of community in Appalachia using a multidisciplinary approach and experiential learning. Interrelationships among geographically, culturally, and socially constituted communities, public policy, and human development. 2000-level course in any cross-listing department required. (2H,3L,3C)

#### 3534: DRUG EDUCATION

Interpretation of multidimensional (social, psychological and physiological) scientific data regarding drugs. The major drug categories will be covered with special emphasis on substance misuse and abuse. (3H,3C)

# University Course Series

- [Overview](#)
  - [Course Descriptions \(UNIV\)](#)
- 

## Overview

University Course Series are courses sponsored to enhance the undergraduate academic experience. The courses may not count toward degree credit. Check with your advisor or academic dean to verify degree applicability.

## Course Descriptions (UNIV)

### 1004: COLLEGE SUCCESS STRATEGIES

Study and application of strategies, skills, attitudes and behaviors leading to effective academic learning in a college setting. Credit not applicable to meeting degree requirements; may not be repeated. (3H,3C)

### 1704: FIRST YEAR SEMINAR COURSE

Introductory exploration of academic and social competencies contexts and responsible decision-making within a residential learning community environment. Pre: Consent required. May not count towards degree requirements; consult advisor. (3H,3C)

### 2004: EXPLORING CAREERS: MAKING DECISIONS AND PLANS

Integrates the role of careers in society, career development theories, decision making models and styles and self assessment interpretation. Analyzes career and major research, introduces job search strategies and defines professional behavior required in the workplace. Facilitates effective decisions in the choice of academic majors and career options. Pass/Fail only. (3H,3C)

### 2394: INTRODUCTION TO RESIDENTIAL COMMUNITIES AND LEADERSHIP

This course provides theories, basic principles, and skill development that serve as a knowledge base and framework for the peer helping, para-professional Resident Advisor position. This course is open only to students who are serving in their first semester as a Resident Advisor. (3H,3C)

### 2984: SPECIAL STUDY

Variable credit course.

### 3954: STUDY ABROAD

Variable credit course. X-grade allowed.

### 4984: SPECIAL STUDY

Variable credit course.

## ADMINISTRATIVE OFFICERS

**Charles W. Steger**  
President  
**Mark G. McNamee**  
Senior Vice President and Provost  
**Raymond D. Smoot**  
University Treasurer; Chief Operating Officer of the Virginia Tech Foundation  
**Earving L. Blythe**  
Vice President for Information Technology and Chief Information Officer  
**James R. Bohland**  
Vice President and Executive Director of National Capital Region Operations  
**John E. Dooley**  
Vice President for Outreach and International Affairs  
**Elizabeth A. Flanagan**  
Vice President for Development and University Relations  
**Daniel A. Wubah**  
Vice President and Dean for Undergraduate Education  
**Edward F. D. Spencer**  
Vice President for Student Affairs  
**William T. Lewis, Sr.**  
Vice President for Diversity and Inclusion  
**M. Dwight Shelton**  
Vice President for Finance and Chief Financial Officer  
**Thomas C. Tillar, Jr.**  
Vice President for Alumni Relations  
**Robert Walters**  
Vice President for Research  
**Sherwood Wilson**  
Vice President for Administrative Services

**Richard Benson**  
Dean, College of Engineering  
**Lay Nam Chang**  
Dean, College of Science  
**A. Jack Davis**  
Dean, College of Architecture and Urban Studies  
**Karen P. DePauw**  
Vice President and Dean for Graduate Education  
**Tyler Walters**  
Dean, University Libraries  
**Paul Winistorfer**  
Dean, College of Natural Resources  
**Alan Grant**  
Dean, College of Agriculture and Life Sciences  
**Sue Ott Rowlands**  
Dean, College of Liberal Arts and Human Sciences  
**Gerhardt G. Schurig**  
Dean, Virginia-Maryland Regional College of Veterinary Medicine  
**Richard E. Sorensen**  
Dean, Pamplin College of Business  
**T. Marshall Hahn, Jr.**  
President Emeritus  
**Paul E. Torgersen**  
President Emeritus

## FACULTY

### [A-B](#) | [C-D](#) | [E-G](#) | [H-K](#) | [L-R](#) | [S-Z](#) | [Emeriti](#)

- The university employs over 4,700 faculty and staff at the Blacksburg campus and many more in support of university programs throughout the Commonwealth of Virginia.
- Listings include (with very few exceptions) collegiate faculty members and administrators at the director level and above. *Please note that in an effort to focus on academics and on student interests and services, many staff essential to the operation of the university are not listed.*

### **Faculty Honors (2000 to present) (1957 to 1999)**

- [Academic Advising Awards](#)
- [Academy of Faculty Service](#)
- [Academy of Teaching Excellence Inductees](#)
- [Alumni Extension Award Winners](#)
- [Alumni International Programs Award Winners](#)
- [Alumni Research Award Winners](#)
- [Alumni Teaching Award Winners](#)
- [Commonwealth of Virginia Outstanding Faculty](#)
- [Diggs Teaching Scholar Awards](#)
- [Distinguished Professors, Alumni](#)
- [Distinguished Professors, University](#)
- [Sporn Award Winners](#)
- [University Exemplary Department Awards](#)
- [University Public Service Award Recipients](#)
- [Wine Award Winners](#)

## Faculty & Administrators: [A](#) [B](#)

### [A-B](#) | [C-D](#) | [E-G](#) | [H-K](#) | [L-R](#) | [S-Z](#) | [Emeriti](#) | [Honors](#)

#### Footnotes used:

<sup>1</sup> Award for Excellence in Undergraduate Advising

<sup>2</sup> Academy of Teaching Excellence inductee

<sup>3</sup> Wine Award recipient

<sup>4</sup> Sporn Award recipient

<sup>5</sup> Alumni Award for Extension Excellence

<sup>6</sup> Alumni Award for Research Excellence

<sup>7</sup> Alumni Award for Teaching Excellence

<sup>8</sup> Academy of Faculty Service

<sup>9</sup> Commonwealth of Virginia Outstanding Faculty Award

<sup>10</sup> Diggs Teaching Scholar Awards

- The numbers in parentheses indicate the year of joining the faculty. Job title, degrees earned, where obtained, and year obtained follow.
- Non-resident staff locations are noted for those persons not based at the Blacksburg campus.

---

## A

ABAID, Nicole T. (2012), Asst. Prof. of Engineering Science and Mechanics. B.S., North Carolina, 2003; M.A., Kansas, 2008; Ph.D. Polytechnic Institute of New York, 2012.

ABAYE, A. Ozzie (1992), Prof. of Crop and Soil Environmental Sciences. B.S., Wilson College (PA), 1984; M.S., Penn State, 1987; Ph.D., VPI&SU, 1992.

ABBAS, Montasir (2005), Assoc. Prof. of Civil and Environmental Engineering. B.S. Univ. of Khartoum (SUDAN), 1993; M.S. Univ. of Nebraska-Lincoln, 1997; Ph.D., Purdue Univ., 2001, P.E.

ABBATE, Janet (2004), Asst. Prof. of Science and Technology in Society. B.A., Harvard-Radcliffe College, 1985; M.A., Univ. of Pennsylvania, 1988; Ph.D., Univ. of Pennsylvania, 1994.

ABBOTT, A. Lynn (1990), Assoc. Prof. of Electrical and Computer Engineering. B.S., Rutgers, 1990; M.S., Stanford, 1981; Ph.D., Illinois, 1989.

ABBOTT, Jonathan A. (2000), Assoc. Prof. of Small Animal Clinical Sciences. D.V.M., Guelph (Canada), 1989; Diplomate, ACVIM (Cardiology).

ABEL, Troy (2010), Asst. Prof. of Art, B.A. Valparaiso Univ., 2004; B.S.F.A. Valparaiso Univ., 2005; M.F.A. Iowa State Univ., 2009; Ph.D. Iowa State Univ., 2010.

ABEYSEKARA, Ananda (1999), Assoc. Prof.; Department of Religion and Culture. B.A. Macalister College, 1992; M.A. UVa., 1994; Ph.D., Northwestern Univ., 1999.

ABRAHAMS, Alan S. (2007), Asst. Prof. of Business Information Technology. B.S., Cape Town, 1997; Ph.D., Cambridge, 2002.

ACHENIE, Luke E.K. (2007), Prof. of Chemical Engineering. B.S., Massachusetts Institute of Technology, 1981; M.S., Northwestern, 1982; M.A.M., Carnegie Mellon, 1984; Ph.D., Carnegie Mellon, 1988.

ADAMS, David R. (2009), Director, Learning Systems Integration and Support. B.S., Missouri State Univ., 1998.

ADAMS, John E. (2010), Budget Analyst. B.A., Coastal Carolina University, 2002; M.B.A., Mississippi State Univ., 2008; M.P.A., Virginia Tech, 2011.

ADAMS, M. Norris (2008), Clinical Asst. Prof. of Surgery and Lameness, Marion duPont Scott Equine Medical Center. B.S., Cornell Univ., 1988; D.V.M., Mississippi State Univ., 1992; Diplomate A.C.V.S., 1999.

ADEL, Gregory T. (1982), Prof. of Mining and Minerals Engineering. B.S., South Dakota School of Mines and Technology, 1978; M.S., South Dakota School of Mines and Technology, 1979; D.Eng., California, Berkeley, 1982.

ADELMAN, Zachary N. (2005), Asst. Prof. of Entomology, B.A., Ithaca College, 1996; Ph.D., Colorado State Univ., 2000.

ADJERID, Slimane (1998), Assoc. Prof. of Mathematics. B.S., Univ. of Algiers, 1979; M.S., Rensselaer Polytechnic Institute, 1982; Ph.D., Rensselaer Polytechnic Institute, 1985.

ADLER, John (2008), Asst. Prof. of Music. B.A., Univ. of Nevada-Reno, 2001; M.M., Univ. of Oregon, 2004.

AGAH, Masoud (2005), Assoc. Prof. of Electrical and Computer Engineering. B.S in EE, Sharif Univ. of Technology, Tehran, Iran, 1996; BS EE, Sharif Univ. of Technology, 1998; Ph.D., Univ. of Michigan, 2005.

AGNEW, Michael (2007), Asst. Prof. of Industrial and Systems Engineering. B.A., Wilfrid Laurier Univ., 2000; M.S., Univ. of Windsor, 2003; Ph.D., Queen's Univ., 2008.

AGOZINO, Onwubiko, (2009), Prof. of Sociology and Africana Studies. B.S., Univ. of Calabar-Nigeria, 1985; M.Phil., Univ. of Cambridge, UK, 1990; Ph.D., Univ. of Edinburgh, 1993.

AGUD, Diane B. (1993), Senior Instructor of Mathematics. B.A., Molloy College, 1985; M.A., St. John's Univ., 1990.<sup>4</sup>

AHMADIAN, Mehdi (1995), Prof. of Mechanical Engineering. B.S., SUNY, Buffalo, 1980; M.S., SUNY, Buffalo, 1982; Ph.D., SUNY, Buffalo, 1984.

AHMED, S. Ansar (1989), Department Head and Prof. of Biomedical Sciences and Pathobiology. B.Sc., Bangalore (India), 1972; B.V.Sc., UAS (India), 1977; Ph.D., Murdoch U. (Perth, Australia), 1985.

AKERS, R. Michael (1981), Horace E. and Elizabeth F. Alphin Prof. of Dairy Science. A.S., Wytheville CC, 1972; B.S., Virginia Tech, 1974; M.S., Virginia Tech, 1976; Ph.D., Michigan State, 1980.<sup>6</sup>

AL-HAIK, Marwan, S. (2010), Assoc. Prof. of Engineering Science and Mechanics. B.S., Univ. of Jordan, 1993; M.S., Florida State, 1997; Ph.D., Florida State, 2002.

ALAPLANTE, Rebekah C. (2008), Assoc. Director of Undergraduate Admissions. B.S., Radford Univ., 1999; M.S., Radford Univ., 2001.

ALAVALAPATI, Janaki (2008), Prof. and Department Head of Forest Resources and Environmental Conservation. M.S., S.V. Univ. (India), 1975; M. S., State Forest Service College (India), 1982; M.S., Univ. of Alberta (Canada), 1990; Ph.D., Univ. of Alberta, 1995.

ALBRIGHT, Kathryn C. (1994), Chair, Foundation Program in Architecture, Assoc. Prof. of Architecture. B.Arch., Virginia Tech, 1982; M.Design Studies, Harvard, 1994.

ALEXANDER, Kathleen A. (2007), Assoc. Prof. of Wildlife Science. B.S., Univ. of California-Davis, 1988; D.V.M., Univ. of California-Davis, 1992; Ph. D., Univ. of California-Davis, 1995.

ALEXANDER, Michael D. (1972), Prof. of Education. B.S., Western Ky., 1966; Ed.D., Indiana, 1969.

ALEXANDER, Michael J. (2010), Director, Strategic Initiatives and Business Analysis. B.S., Virginia Tech, 2006; M.S., Georgetown University, 2010.

ALLEN, Barbara (2000), Assoc. Prof. of Science and Technology in Society; Assoc. Director of Science and Technology Studies and Director of the Graduate Program in STS, National Capital Region. B.S., Univ. of Colorado, Boulder, 1976; M.S., Columbia, 1977; Ph.D., Rensselaer Polytechnic Institute, 1999.

ALLEN, Katherine R. (1989), Prof. of Human Development. B.S., Univ. of Connecticut, Storrs, 1976; M.A., Syracuse, 1980; Ph.D., Syracuse, 1984.

ALLINGHAM, Liesl A. (2008), Asst. Prof. of German. B.A., Tufts Univ., 1990; M.A., Indiana Univ., 1995; Ph.D., Indiana Univ., 2007.

ALLNUTT, Robin (2002), Advanced Instructor of English. B.A., Virginia Tech, 1987; M.F.A., George Mason Univ., 1997.

ALMOND, Lynn A. (2010), Instructor in Accounting and Information Systems. B.S., Virginia Tech, 1977; Master of Accountancy, Virginia Tech, 1988.

ALWANG, Jeffrey R. (1989), Prof. of Agricultural and Applied Economics. B.A., Penn State, 1978; M.S., Penn State, 1985; Ph.D., Cornell, 1987.

AMACHER, Gregory S. (1994), Julian N. Cheatham Prof. of Forest Economics. B.S., Penn State, 1984; M.A., Michigan, 1989; M.A., Michigan, 1990; M.S., Michigan, 1991; Ph.D., Michigan, 1993.

AMATEIS, Patricia G. (1996), Assoc. Prof. of Chemistry. B.S., Concord, 1979; P.h.D., Virginia Tech, 1984.<sup>2,3,4,7</sup>

AMBROSONE, John (2004), Assoc. Prof. of Theatre Arts. B.A., State Univ. of New York at Fredonia, 1983; M.F.A., Virginia Tech, 1986.

AMELINK, Catherine. (2005), Research Analyst and Assessment Coordinator, Engineering. B.A. James Madison Univ., 1997, M.Ed. James Madison Univ., 1998, Ph.D., Virginia Tech, 2005.

ANDERS, Charlotte (1981), Assoc. Director of Program Development, Continuing and Professional Education. ÊB.S., Virginia Tech, 1988; M.S., Virginia Tech, 1991.

ANDERSON, Glenn A., Specialist, Agricultural Education. B.S., Virginia Tech, 1968; M.S., Virginia Tech, 1972; Ed.D., Virginia Tech, 1985.

ANDERSON, James C. II (2012), Asst. Prof. of Agricultural and Extension Education. B.S., Univ. of Illinois, 2000; M.A., Univ. of Delaware, 2003; Ph. D., Univ. of Missouri, 2007.

ANDERSON, Linda (1987), Prof. of English. B.A., Univ. of Minnesota, 1973; Ph.D., Univ. of Minnesota, 1984.

ANDERSON, Susan G. (1982), Senior Instructor of Mathematics. B.S., Mary Washington, 1980; M.S., Virginia Tech, 1982.

ANDERSON, T. D. (2011), Asst. Prof. of Entomology, B.S., Wichita State Univ., 1999; MS, Wichita State Univ., 2001; Ph.D., Kansas State Univ., 2006.

ANDRANGO-WALKER, Catalina (2011), Asst. Prof. of Spanish, B.A. Univ. of Missouri-Columbia 2002; M.A. Washington Univ. 2004; PhD. Washington Univ. 2009.

ANGERMEIER, Paul L. (1988), Prof. of Fisheries and Asst. Leader, Coop. Fish and Wildlife Research Unit. B.S., Purdue, 1976; M.S., Illinois, 1979; Ph.D., Illinois, 1982.

ANGERT, Ron (1994), Assoc. Director of Administration for Emergency Preparedness, Division of Student Affairs. B.S., Bluefield College, 1997.

ANING, Alexander O. (1992), Assoc. Prof. of Materials Science and Engineering. B .S., Morgan State Univ., 1976; Ph.D., Univ. of Missouri-Rolla, 1982.

APODACA, Clair (2012), Assoc. Prof. of Political Science. B.A., San Diego State U, 1990; M.A., Purdue U, 1992; Ph.D., Purdue U, 1996.

APPLETON, Bonnie L. (1985), Prof. of Horticulture. B.S., Delaware, 1970; M.S., Delaware, 1975; Ph.D., Oklahoma State, 1983. (Hampton Roads Agricultural Research & Extension Center).

ARACHCHIGE, Shamindri M. (2010), Instructor of Chemistry. B.Sc., Open Univ. of Sri Lanka; Ph.D., Wayne State Univ., 2006.

ARAV, Nahum (2007), Prof. of Physics. B.S., Univ. of Tel Aviv, 1990; Ph.D., Univ. of Colorado, 1994.

ARDITTI, Joyce A. (1989), Assoc. Prof. of Human Development. B.S., Univ. of Georgia, 1980; M.A., Univ. of Connecticut, 1982; Ph.D., Univ. of North Carolina, Greensboro, 1988.

ARMSTRONG, Mark R. (1995), Senior Instructor of English. B.A., Davidson College, 1977; M.A., Univ. of North Carolina-Greensboro, 1985; Ph.D., Univ. of North Carolina-Greensboro, 1996.

ARNER, Alison E. (1999), Fitness Coordinator, Recreational Sports. B.S., Univ. of Southern Mississippi, 1999; M.S., Virginia Tech, 2001.

ARNOLD CHRISTIAN, Susan R. (2010), Asst. Director of the Center for the Enhancement of Engineering Diversity, Engineering. B.S. Kansas State Univ., 1996, M.S., Univ. of Nebraska, 2009.

ARNOLD, Linda (1982), Prof. of History. B.A., Cal State (Long Beach), 1971; M.A., Texas, 1975; Ph.D., Texas, 1982.

AROGO OGEJO, Jactone (2005), Assoc. Prof. of Biological Systems Engineering. B.S., Univ. of Nairobi, Kenya, 1983; M.S., Illinois, 1989; Ph.D., Illinois, 1997.

ARSENAULT, Rhonda K. (2001), Assoc. Vice President for Advancement Services. B.A., Univ. of Illinois at Urbana-Champaign, 1990; M.S., Univ. of Illinois at Urbana-Champaign, 1992.

ARTHUR, Jeffrey B. (2000), Assoc. Prof. of Management. B.S., Univ. of California (Santa Cruz), 1983; M.S., Cornell, 1987; Ph.D., Cornell, 1990.

ASCHMANN, Althea (1998), Asst. Prof.; Library. B.A., Kansas, 1975; M.L.S., Kent State, 1976.

ASHLEY, Richard A. (1981), Prof. of Economics. B.S., Cal Tech, 1971; M.S., California (San Diego), 1972; Ph.D., California (San Diego), 1982.

ASKEW, Shawn D. (2001), Assoc. Prof. of Weed Science. B.S. Mississippi State Univ., 1995; M.S., Mississippi State Univ., 1997; Ph.D. North Carolina State Univ., 2001.

ASRYAN, Levon V. (2004), Assoc. Prof. of Materials Science and Engineering. M.S., Yerevan State Univ., 1985; Ph.D., Ioffe Institute (St. Petersburg, Russia), 1988; Dr.Sci., Ioffe Institute of Physics and Technology (St. Petersburg, Russia), 2002.

ASSELIN, Susan B. (1982), Prof. of Education. B.S., FSU, 1972; M.S., FSU, 1974; Ph.D., Nebraska, 1982.

ATHANAS, Peter M. (1992), Prof. of Electrical and Computer Engineering. B.S., Toledo, 1983; M.S., Rensselaer, 1985; S. M., Brown, 1990; Ph.D., Brown, 1992.

AUST, W. Michael (1989), Prof. of Forestry. B.S., Mississippi State, 1982; M.S., Mississippi State, 1985; Ph.D., North Carolina State, 1989.

AVERY, Roger J. (1999), Senior Assoc. Dean for Research and Graduate Studies, Prof. of Biomedical Sciences and Pathobiology. B.S. (1st Class Honors) Leeds (UK), 1966; Ph.D., Newcastle-upon-Tyne (UK), 1969.

AXSOM, Danny K. (1987), Assoc. Prof. of Psychology. B.A., UVa., 1977; M.A., Princeton Univ., 1979; Ph.D., Princeton Univ., 1984.

AZANO, Amy P. (2012), Asst. Prof. of Education. B.A., Louisiana State Univ., 1994; M.S.Ed., Old Dominion Univ., 1997; Ph.D., Univ. of Virginia, 2009.

BARRETT, Christopher L. (2004), Prof. of Computer Science. M.S., California Institute of Technology, 1983; Ph.D., California Institute of Technology, 1985.

BARRETT, Jennifer G. (2007), Asst. Prof. of Equine Surgery, Marion duPont Scott Equine Medical Center. B.A., Dartmouth College, 1991; M.S., Yale Univ., 1994; M.Phil., Yale Univ., 1994, 1999; Ph.D., Yale Univ., 1999; D.V.M., Cornell Univ., 2002; Diplomate A.C.V.S., 2008.

BARRETT, John E. (2006), Assoc. Prof. of Zoology. B.S., Rutgers Univ., 1994; Ph.D., Colorado State Univ., 1999.

BARROW, Mark V., Jr. (1992), Prof. of History. B.A., Univ. of Florida, 1985; Ph.D., Harvard, 1992.<sup>2,7</sup>

BARTON, Jennifer (2012), Instructor. B.A., Virginia Tech, 1997; M.A., Virginia Tech, 2000; M.S., Rensselaer Polytechnic Institute, 2010.

BASSAGANYA-RIERA, Josep (2008), Adjunct Research Assoc. Prof. of Biomedical Sciences & Pathobiology; Assoc. Prof. of VBI; Director, Nutritional Immunology & Molecular Nutrition. D.V.M., C.V.M., Univ. of Barcelona, 1997; Ph.D., Iowa State Univ., 2000.

BASSETT, Jim (2008), Asst. Prof. of Architecture. B.E.D., North Carolina State Univ., 1991; M.Arch., Southern California Institute of Architecture, 1994.

BATRA, Romesh C. (1994), Clifton C. Garvin Prof. of Engineering Science and Mechanics. B.S., Punjabi Univ. (India), 1968; M.S., Univ. of Waterloo (Canada), 1969; Ph.D., Johns Hopkins Univ., 1972.

BATTAGLIA, Francine (2007), Prof. of Mechanical Engineering. B.S., Univ. of New York, Buffalo, 1991; M.S., Univ. of New York, Buffalo, 1992; Ph.D., Pennsylvania State Univ., 1997.

BAUDOIN, Antonius B.A.M. (1981), Assoc. Prof. of Plant Pathology. M.S., Wageningen Univ., 1975; Ph.D., Univ. of California, Riverside, 1980.

BAUER, Esther K. (2009), Asst. Prof. of German. M.A., Albert-Ludwigs-Universität, Freiburg 1994; PhD., Yale Univ. 2004.

BAUMANN, William T. (1985), Assoc. Prof. of Electrical and Computer Engineering. B.S., Lehigh, 1978; M.S., MIT, 1980; Ph.D., Johns Hopkins, 1985.<sup>2,3</sup>

BAUMGARTNER, Frederic J. (1976), Prof. of History. B.A., Mt. St. Paul, 1967; M.A., Wisconsin, 1969; Ph.D., Wisconsin, 1972.

BAYANDOR, Javid (2009), Assoc. Prof. of Mechanical Engineering. B.S., Sharif Univ., 1992; Ph.D., Royal Melbourne Inst. of Tech., 2000.

BEAGLE, David R. (1976), Asst. Prof.; Library. B.A., State Univ. of New York at Oswego, 1971; M.A., Iowa, 1975; M.L.S., Iowa, 1974.

BEAMISH, Julia (1990), Department Head, Prof. of Apparel, Housing, and Resource Management. B.S., East Carolina Univ., 1974; M.Ed., Univ. of North Carolina, Greensboro, 1976; Ph.D., Virginia Tech, 1983.

BEAN, Carl N. (1994), Instructor of English. B.A., Drury College, 1982; M.A., Univ. of Tulsa, 1984; M.A., Columbia Univ., 1988.

BEATTIE, Christopher A. (1983), Prof. of Mathematics. B.S.E., Duke, 1975; M.S., Duke, 1977; Ph.D., Johns Hopkins, 1982.

BECKER, Andrew S. (1988), Assoc. Prof. of Ancient Greek, Latin, and Classical Studies. B.A., Michigan, 1982; B.A., Cambridge, 1984; M.A., Cambridge, 1988; Ph.D., North Carolina (Chapel Hill), 1988.<sup>1, 2, 3, 10</sup>

BEDENBAUGH, Laura (2004), Asst. Director of Student Programming, UUSA. B.A., Winthrop Univ., 1999; M.Ed., Clemson Univ., 2002.

BEECHER, Greg A. (2000), Assoc. Director for Administrative Services, UUSA. B.S., Indiana Wesleyan Univ., 1993; M.A., Ball State Univ., 1995.

BEERS, Eric P. (1994), Assoc. Prof. of Horticulture. B.S., Delaware, 1981; M.S., Delaware, 1985; Ph.D., Wisconsin, 1990.

BEEH, Aloysius A. (1979), Prof. of Electrical and Computer Engineering. Ir., Technical Univ. Eindhoven (Netherlands), 1974; Ph.D., Colo. State, 1979.

BEHKAM, BAHAREH (2008), Asst. Prof. of Mechanical Engineering. B.S., Sharif Univ., 1999; M.S., Carnegie Mellon Univ., 2003; Ph.D., Carnegie Mellon Univ., 2008.

BEKKEN, Barbara M. (1992), Asst. Prof. of Geosciences. B.S., Univ. of Montana, 1977; M.S., Univ. of Washington, 1980; Ph.D., Stanford Univ., 1990.

BéLANGER, France (1997), Prof. of Accounting and Information Systems. B.C., McGill, 1985; Ph.D., South Florida, 1997.

BELANGER, Kelly (2005), Assoc. Prof. of English. B.A., Michigan State Univ., 1986; M.A., Ohio State Univ., 1988; Ph.D., Ohio State Univ., 1992.

BELCHER, William J. (2010), University Coordinator of Business Practices. B.B.A., Averett Univ., 1996; M.B.A., Averett Univ., 1998; C.P.A., 2009.

BELDEN, Lisa K. (2003), Assoc. Prof. of Zoology. B.A., Univ. of Montana, 1995; Ph.D., Oregon State Univ., 2001.

BELIVEAU, Yvan J. (1986), Georgia Anne Snyder-Falkinham Prof. of Building Construction. B.S., Univ. of Vermont, 1971; M.S., Univ. of Vermont, 1978; Ph.D., Purdue, 1984; P.E.

BELL, Martha Ann (1996), Assoc. Prof. of Psychology, B.S., Carson-Newman College, 1978; M.S., Univ. of Tennessee-Knoxville, 1983; Ph.D., Univ. of Maryland-College Park, 1992.

BELL, Thomas E. (1981), Asst. Chair for Res./Spec. Projects, Chemistry. B.A., DePauw Univ., 1973; M.S., Indiana State Univ., 1975; M.S., Frostburg State Univ., 1980.

BENFIELD, Ernest F. (1971), Assoc. Department Head; Prof. of Ecology. B.S., Appalachian State, 1964; M.A., Appalachian State, 1965; Ph.D., Virginia Tech, 1970.

BENHAM, Brian L. (2001), Assoc. Prof. of Biological Systems Engineering. B.S., Texas A&M, 1986; M.S., Texas A&M, 1990; Ph.D., Tennessee, 1995.

BENSON, Mark J. (1987), Assoc. Prof. of Human Development. B.A., Drew Univ., 1976; Ph.D., Univ. of Minnesota, 1984.

BENSON, Richard C. (2005), Paul and Dorothea Torgersen Dean's Chair and Prof. of Engineering Science and Mechanics and of Mechanical Engineering, and Dean of Engineering. B.S.E., Princeton, 1973; M.S., UVA, 1974; Ph.D., California, Berkeley, 1977; P.E.

BERG, Michael A. (2005), Instructor of Chemistry. B.S., Washington & Lee, (1986); Ph.D., Virginia Tech, 1992.

BERGH, J. Christopher (2000), Assoc. Prof. of Entomology. B.A., Univ. of New Brunswick, 1980; Ph.D., Univ. of New Brunswick, 1988. (Alson H. Smith, Jr. AREC)

BERKLEY-COATS, Gerald W. (2004), Asst. Director for International Support Services. B.A., Oklahoma City Univ., 1969; M.A., Univ. of Hawaii at Manoa, 1971; Ph.D., Univ. of Hong Kong, 1977; J.D., Univ. of Hawaii, 1991.

BERNHARD, Mark (2006), Director, Continuing and Professional Education. B.A., Bucknell Univ., 1989; M.A., Ohio State, 1991.

BERRY, Duane F. (1988), Assoc. Prof. of Crop and Soil Environmental Sciences. B.S., Eastern Michigan, 1976; M.S., Eastern Michigan, 1979; Ph.D., Michigan State, 1984.

BERTELSEN, Michael K. (1995), Assoc. Director, OIRED. B.S., Univ. of Wisconsin, Eau Claire, 1971; M.S., Univ. of Wisconsin, River Falls, 1975; Ph.D., Virginia Tech, 1978.

BEVAN, David R. (1980), Assoc. Prof. of Biochemistry. B.S., Marietta, 1970; M.S., Northwestern, 1975; Ph.D., Northwestern, 1978.

BHATTACHARJEE, Sudip (2001), Assoc. Prof. of Accounting and Information Systems. B.C., Bombay, 1988; M.B.A., Virginia Tech, 1990; Ph.D., Massachusetts, 1997 (Northern Virginia).

BIGLER, Dwight (2009), Asst. Prof. of Music. B.S., Brigham Young Univ., 1998; M.M., Brigham Young Univ., 2001; D.M.A., Univ. of Texas at Austin, 2006.

BILLETDEAUX, Jeremy S. (2005), Asst. Program Director, Education Abroad. B.A., Cornell Univ., 1993; M.A., Yale Univ., 1995; M.Phil, Yale Univ., 1998.

BILLINGSLEY, Bonnie (1987), Prof. of Education. B.S., Florida State Univ., 1978; M.A., Florida State Univ., 1978 Ed.D., Virginia Tech, 1987.

BILLINGSLEY, Randall S. (1981), Assoc. Prof. of Finance, B.A., Texas Tech, 1976; M.S., Texas A&M, 1978; Ph.D., Texas A&M, 1982; C.F.A.

BIRCH, Jeffrey B. (1977), Prof. of Statistics. B.S., Washington, 1968; M.S., Washington, 1970; Ph.D., Washington, 1976.<sup>2,3,7</sup>

BISH, Doug R. (2006), Asst. Prof. of Industrial and Systems Engineering. B.S., California Polytechnic State Univ., San Luis Obispo; M.S., Northwestern Univ., 1995, 1996; Ph.D., Virginia Tech, 2006.

BISH, Ebru K. (1999), Assoc. Prof. of Industrial and Systems Engineering. B.S., Bogazici Univ., 1990; M.S., Bogazici Univ., 1992; Ph.D., Northwestern Univ., 1999.

BIXLER, Jacqueline E. (1980), Alumni Distinguished Prof. of Spanish. B.A., Ohio, 1975; M.A., Kansas, 1976; Ph.D., Kansas, 1980.<sup>2, 7, 10</sup>

BLACKWELL, Michael J. Stacy (2001), Asst. Director of University Honors. B.A., Virginia Tech, 1990; M.A., Virginia Tech, 2007.

BLANCHARD, Sam (2012), Asst. Prof. of Art. B.F.A., Ohio Univ., 2002; M.F.A., Rhode Island School of Design, 2004.

BLANK, Steven C. (2012), Prof. of Agricultural and Applied Economics. B.A., California State Univ., Stanislaus, 1976; M.B.A., Univ. of Massachusetts, 1977; M.S., Univ. of Hawaii, 1979; Ph.D., Univ. of Hawaii, 1980.

BLIESZNER, Rosemary (1981), Assoc. Dean, Graduate School and Alumni Distinguished Prof. of Human Development. B.S., Mercyhurst, 1970; M.S., Ohio State, 1971; Ph.D., Penn State, 1982.<sup>2,7,8</sup>

BLISS, Michael (1991), Senior Instructor of English. B.A., Long Island Univ., 1970; Ph.D., Univ. of Minnesota, 1979.

BLODGETT, Dennis J. (1983), Assoc. Prof. of Biomedical Sciences and Pathobiology. B.S., Illinois, 1972; D.V.M., Illinois, 1974; Ph.D., Illinois, 1983; Diplomate, A.B.V.T.

BLOOMER, Elizabeth (1994), Senior Instructor of English. B.A., Virginia Tech, 1990; M.A., Virginia Tech, 1992; M.A., Hollins College, 1995.<sup>2,4,10</sup>

BLOOMQUIST, Jeffrey R. (1989), Prof. of Entomology. B.S., Indiana, 1978; M.S., Mississippi, 1981; Ph.D., Univ. California, Riverside, 1984.

BLYTHE, Earving L. (1977), Vice President for Information Technology. B.S., Virginia Tech, 1968; M.S., Virginia Tech, 1983.

BLYTHE, Erv L. (1977), Vice President for Information Technology and Chief Information Officer. B.S., Virginia Tech, 1968; M.S., Virginia Tech, 1983.

BOARDMAN, Gregory D. (1976), Prof. of Civil and Environmental Engineering. B.S., New Hampshire, 1972; M.S., New Hampshire, 1973; Ph.D., Maine, 1976; P.E.

BODENHORN, Nancy E. (2001), Assoc. Prof. of Education. B.S., Purdue Univ., 1977; M.Ed., Duke Univ., 1981; Ph.D., Michigan State Univ., 2001.

BODNAR, Robert J. (1985), University Distinguished Prof. and C.C. Garvin Prof. of Geochemistry. B.S., Pittsburgh, 1975; M.S., Univ. of Arizona, 1978; Ph.D., Pennsylvania State Univ., 1985.<sup>6,9</sup>

BOES, Katie M. (2011), Clinical Instructor of Biomedical Sciences and Pathobiology. B.S., Loyola Univ. Maryland, 2003; DVM, VMRCVM, 2008; M.S., Perdue Univ., 2011.

BØHN, Jan H. (1993), Assoc. Prof. of Mechanical Engineering. B.S., Rensselaer Polytechnic Institute, NY, 1988; M.S., Rensselaer Polytechnic Institute, NY, 1989; Ph.D., Rensselaer Polytechnic Institute, NY, 1993.

BOLDING, M. Chad (2008), Assoc. Prof. of Forest Operations. B.S., Auburn Univ., 2000; M.S., Auburn Univ., 2002; M.F., Oregon State, 2005; Ph.D., Oregon State, 2006.

BOND, Brian H. (2002), Assoc. Prof. of Sustainable Biomaterials and Extension Specialist. B.S., Clemson Univ., 1991; M.S., Virginia Tech, 1993; Ph.D., Virginia Tech, 1998.

BONHAM, Thirwall William (1969), Prof. of Management. A.B., Duke, 1964; M.B.A., S. Carolina, 1965; Ph.D., S. Carolina, 1969.<sup>2</sup>

BONNER, Cynthia P. (2004), Chief of Staff and Director of Administration for Student Affairs. B.A., Carnegie-Mellon Univ., 1971; M.Ed., West Georgia College (State Univ. of West Georgia), 1973; Ed.S., West Georgia College (State Univ. of West Georgia), 1976; Ph.D., Florida State Univ., 1979.

BONOMO, Vittorio A. (1968), Assoc. Prof. of Finance. B.S., Duquesne Univ., 1962; Ph.D., Brown, 1968.<sup>3</sup>

BOONE, Christi L. (2001), Director of Academic Support Services, Engineering. B.A., Radford Univ., 1990; M.A., Radford Univ., 1992.

BOOTH, Derley Aguilar (2005), Instructor of Communication. B.A., Virginia Tech, 1995.

BORGGGAARD, Jeffery (1998), Prof. of Mathematics. B.S., Worcester Polytechnic Institute, 1986; M.S., Worcester Polytechnic Institute, 1990; Ph.D., Virginia Tech, 1995.

BORK, Dean R. (1980), Assoc. Prof. of Landscape Architecture. B.S.L.A., Wisconsin, 1975; M.L.A., Louisiana State Univ., 1979.

BORNY, Lorraine C. (2005), Advanced Instructor of Management. B.S., Univ. of Delaware, 1982; M.S., Rowan Univ., 1989.

BOROYEVICH, Dusan (1991), American Electric Power Prof. of Electrical and Computer Engineering. B.S., Belgrade (Yugoslavia), 1976; M.S., Novi Sad (Yugoslavia), 1982; Ph.D., Virginia Tech, 1986.

BORREGO, Maura J. (2004), Assoc. Prof. of Engineering Education. B.S., Univ. of Wisconsin, Madison, 1999; M.S., Stanford Univ., 2000; Ph.D., Stanford Univ., 2003.

BOSCH, Darrell J. (1984), Prof. of Agricultural and Applied Economics. B.A., Central College, 1971; M.S., Tennessee, 1980; Ph.D., Minnesota, 1984.

BOUCOUVALAS, Marcie (1980), Prof. of Human Development. B.S., Boston St., 1968; Ed.M., Boston U, 1971; Ph.D., FSU, 1980. (National Capitol Region Campus)

BOURDON, Terri A. (1977), Senior Instructor of Mathematics. B.S., Bucknell, 1975; M.S., Bucknell, 1977.

BOWMAN, Doug A. (1999), Assoc. Prof. of Computer Science. B.S., Emory Univ., 1994; M.S., Georgia Institute of Technology, 1997; Ph.D., Georgia Institute of Technology, 1999.

BOWMAN, Steven A. (2012), IT Security Analyst. B.S. Virginia Tech, 2009.

BOWSER, Sherrie A. (2009), Lecturer; Library. B.A., Univ. of North Carolina at Asheville, 2001; M.S.L.S., Univ. of North Carolina at Chapel Hill, 2006.

BOYER, John D. (1998), Instructor of Geography. B.A., Virginia Tech, 1966; M.S., Virginia Tech, 1998.<sup>4</sup>

BOYER, Renee R. (2006), Assoc. Prof. of Food Science and Technology. B.S., Radford Univ., 1999; M.S., Virginia Tech, 2002; Ph.D., Virginia Tech, 2006.

BOYLE, Kevin J. (2005), Department Head and Prof. of Agricultural and Applied Economics. B.A., Maine, 1978; M.S., Oregon State, 1981; Ph.D., Wisconsin, 1985.

BOYLE, Stephen M. (1984), Prof. of Biomedical Sciences and Pathobiology. B.A., Rutgers, 1966; M.S., Rhode Island, 1969; Ph.D., Rhode Island, 1971.

BOYS, Kathryn (2011), Asst. Prof. of Agricultural and Applied Economics. B.A., Univ. of Guelph, Guelph, ON Canada, 2000; B.Sc., Univ. of Guelph, Guelph, ON Canada, 2000; M.Sc., Univ. of Guelph, ON Canada, 2003; M.S., Purdue Univ., 2005; Ph.D. Purdue Univ., 2008.

BRAND, Brenda R. (2001), Assoc. Prof. of Education. B.S., Delta State Univ., 1986; B.S., Delta State Univ., 1987; M.A., Virginia Tech, 1994; Ph.D., Virginia Tech, 1998.

BRANDON, Thomas L. (1985), Assoc. Prof. of Civil and Environmental Engineering. B.S., Clemson, 1981; M.S., Univ. of California, Berkeley, 1982; Ph.D., Univ. of California, Berkeley, 1985.

BRANSCOME, Patricia K. (2011), Asst. Director for Software Distribution. B.S., Virginia Tech, 1985; MAED, Virginia Tech, 1999.

BRAY, Bethany C. (2009), Asst. Prof. of Psychology. B.S., Univ. of Michigan, 2000; M.S., Pennsylvania State Univ., 2005; Ph.D., Pennsylvania State Univ., 2007.

BREITSCHMID, Markus (2004), Chair, Core Professional Program, Assoc. Prof. of Architecture. Dipl. Arch., Central Swiss Univ. of Applied Science, 1992; M.Arch; Virginia Tech, 1994; Ph.D., Technische Universität Berlin, 1999, S.I.A.

BRESLAU, Daniel (2001), Assoc. Prof. of Science and Technology in Society, B.A., Columbia Univ., 1983; M.A., Univ. of Chicago, 1988; Ph.D., Univ. of Chicago, 1993.

BREWER, Karen J. (1992), Prof. of Chemistry. B.S., Wofford, 1983; Ph.D., Clemson, 1987.

BREWSTER, Carlyle C. (1999), Assoc. Prof. of Entomology. B.Sc., Univ. of West Indies, 1986; M. of Agriculture, Univ. of Florida, 1990; Ph.D., Univ. of Florida, 1996.

BREWSTER, Jeffrey A. (2011), Application Analyst. B.S., Radford Univ., 2004; M.I.T., Virginia Tech, 2009.

BRIANS, Craig L. (1998), Assoc. Prof. of Political Science. B.A., Cal State U, Fresno, 1988; M.A., U of California, Irvine, 1993; Ph.D., U of California, Irvine, 1997.

BRILL, Jennifer. M. (2004), Assoc. Prof. of Education. B.S., Boston College, 1986; M.A.Ed., Penn State Univ., 1995; Ph.D., Univ. of Georgia, 2002.

BRINBERG, David (1993), Robert O. Goodykoontz Prof.. B.S., Rensselaer Polytechnic Institute, 1974; M.A., Univ. of Illinois, 1976; Ph.D., Univ. of Illinois, 1979.

BRITT, Brian M. (1996), Prof.; Department of Religion and Culture. B.A., Oberlin, 1986; M.A., Univ. of Chicago Divinity School, 1987; Ph.D., Univ. of Chicago Divinity School, 1992.

BROADWATER, Robert P. (1989), Prof. of Electrical and Computer Engineering. B.S., Virginia Tech, 1971; M.S., Virginia Tech, 1974; Ph.D., Virginia Tech, 1977.

BRODSKY, Marc D. (2008), Instructor; Library. B.A., Hampshire College, 1978; M.S.L.S., Univ. of North Carolina at Chapel Hill, 2007.

BRONIAK, Brian T. (2010), Director of Online Learning and Collaboration Services. B.S., Virginia Tech, 1995; MBA, Virginia Tech, 2009.

BROOKER-GROSS, Susan R. (1977), Director for Policy and Communications, Information Technology and Assoc. Prof. of Geography. B.A., Bowling Green, 1972; M.A., Bowling Green, 1973; Ph.D., Illinois, 1977.

BROTT, Pamela (2000), Assoc. Prof. of Education. B.S. Western Michigan, 1972, M.A., Western Michigan, 1979; Ph.D., Univ. of North Carolina, 1966. (National Capital Region)

BROWDER, John O. (1988), Assoc. Dean for Academic Affairs, Prof. of Urban Affairs and Planning. B.A., College of Wooster, Ohio, 1974; M.P.A., American Univ., 1977; M.A., Univ. of Penn., 1983; Ph.D., Univ. of Penn. 1986.

BROWN, Alan J. (1998) Prof. of Aerospace and Ocean Engineering. B.S., MIT, 1971; M.S, MIT, 1973; Ph.D., MIT, 1986.

BROWN, Ann (2005), Asst. Director, Continuing and Professional Education. B.S., Univ. of Maryland, 1981; M.A., Appalachian State Univ., 1990.

BROWN, Bryan L. (2011), Asst. Prof of Ecology. B.S., Univ. of North Carolina, 1995; M.S., Appalachian State, 1999; Ph.D., Dartmouth College, 2004.

BROWN, Eric J. (2008), Asst. Director, Network Architecture. B.S., Virginia Tech, 1993; M.S., Virginia Tech, 2005.

BROWN, Eugene F. (1969), Prof. of Mechanical Engineering. B.S., Wisconsin, 1963; M.S., Illinois, 1964; Ph.D., Illinois, 1968; P.E.

BROWN, Ezra A. (1969), Alumni Distinguished Prof. of Mathematics. B.A., Rice, 1965; M.S., LSU, 1967; Ph.D., LSU, 1969.<sup>2, 3</sup>

BROWN, Gary S. (1985), Bradley Distinguished Prof. of Electromagnetics in Electrical and Computer Engineering. B.S., Illinois, 1963; M.S., Illinois, 1964; Ph.D., Illinois, 1967.

BROWN, James A. (2010), Clinical Asst. Prof. of Equine Surgery, Marion DuPont Scott Equine Medical Center. B.V.Sc., Univ. of Melbourne, 1998; M.S., Univ. of New England in Armidale (NSW), 2010; Diplomate A.C.T., 2006.

BROWN, Kimberly S. (1999), Director of Undergraduate Advising; Director of Univ. Academic Advising Center. B.A., Univ. of Richmond, 1993; M.S., Radford Univ., 1996; PhD, Virginia Tech, 2009.

BROWN, Ladd (1997), Asst. Prof.; Library. B.S., Indiana State, 1979; M.S., Indiana State, 1982; M.L.S., Florida State, 1988.

BROWN, Robert M. (1977), R. B. Pamplin Prof. of Accounting and Information Systems. B.S., Georgia, 1963; M.S., Georgia, 1965; M.B.A., Georgia State, 1972; Ph.D., Georgia State, 1977.

BROWN, Tom (1978), Director, Student Life Office. B.S., Virginia Tech, 1975; M.S., Univ. of Virginia, 1983.

BROYDEN, Robert R. (2003), Asst. Vice President for Capital Assets and Financial Management. B.S., Virginia Tech, 1987; M.S., Virginia Tech, 1989.

BROYLES, Thomas W. (2004), Asst. Prof. of Agricultural and Extension Education. B.S., Virginia Tech, 1994; M.S., Virginia Tech, 2000; Ph.D., Virginia Tech, 2004.

BROZOVSKY, John A. (1989), Assoc. Prof. of Accounting and Information Systems. B.B.A., Texas, 1975; M.P.A., Texas, 1978. Ph.D., Colorado, 1990.

BRUNN, Rachelle (2010). Asst. Prof. of Sociology and Africana Studies. B.A., Univ. of Delaware, 2002; M.A. Univ. of Pennsylvania, 2004; Ph.D., Univ. of Pennsylvania, 2009.

BRUNNER, Amy (2005), Assoc. Prof. of Forest Genetics. B.S., College of Wooster, 1982; M.S., Vanderbilt, 1984; Ph.D., Oregon State Univ., 1998.

BRUNSMAN, David (2011). Prof. of Sociology. B.A., Goshen College, 1992; M.A., Univ. of Notre Dame, 1995; Ph.D., Univ. of Notre Dame, 1998.

BRUYAKA, Olga (2008), Asst. Prof. of Management. B.S., Kiev National Taras Shevchenko Univ. (Ukraine), 2002; M.S., Kiev National Taras Shevchenko Univ., 2004; M.S., Jean Moulin Univ. Lyon (France), 2004; Ph.D., Jean Moulin Univ. Lyon (France), 2008.

BRYANT, Yalana B. (2005), Academic Advisor and Recruiter, Pamplin College of Business. B.A., Hampton Univ., 1993; M.S.W., Michigan State Univ., 2002.

BRYCE, William A (2008), Instructor of Classics, B.A Virginia Tech; M.A. Univ. of Kentucky 2008.

BRYON, Hillary (2008), Asst. Prof. of Architecture; B.A., Univ. of Virginia; M.Arch., Virginia Tech; Ph.D., Univ. of Pennsylvania.

BUECHNER-MAXWELL, Virginia A. (1995), Prof. of Large Animal Clinical Sciences. B.A., Goucher, 1976; M.S., Univ. of Pennsylvania, 1987; D.V. M., Virginia Tech, 1986; M.S., Virginia Tech, 1991; Diplomate, A.C.V.I.M.

BUEHLER, Ralph (2008), Asst. Prof. of Urban Affairs and Planning. B.S., Univ. of Konstanz, Germany, 1999; M.C.R.S., Rutgers Univ., 2002; M.P.P. M., Univ. of Konstanz, Germany, 2003; Ph.D., Rutgers Univ., 2008.

BUEHLMANN, Urs (2007), Assoc. Prof. of Wood Manufacturing. B.S., Swiss Institute of Wood Technology, 1993; M.S., Virginia Tech, 1998; Ph.D., Virginia Tech, 1998.

BUEHRER, Michael (2001), Prof. of Electrical and Computer Engineering, B.S., Toledo, 1991; M.S., Toledo, 1993; Ph.D., Virginia Tech, 1996.

BUGH, Glenn R. (1979), Assoc. Prof. of History. B.S., Iowa State, 1970; M.A., Iowa State, 1972; Ph.D., Maryland, 1979.

BUIKEMA, Arthur L., Jr. (1971), Alumni Distinguished Prof. B.S., Elmhurst, 1962; M.A., Univ. of Kansas, 1965; Ph.D., Univ. of Kansas, 1970.<sup>2,4,7,10</sup>

BUKVIC, Ivica Ico (2006), Asst. Prof. of Music. B.A., 1998; M.M., 2001; D.M.A., Univ. of Cincinnati, College-Conservatory of Music, 2005.

BULBUL, Tanyel (2010), Asst. Prof. of Building Construction. B.Arch., METU, 1997; M.S. Arch., METU, 2000; Ph.D., Computational Design, Carnegie Mellon Univ., 2006.

BUMP, Maggie B. (2002), Advanced Instructor of Chemistry. Ph.D., Virginia Tech, 2001.

BUNCH-LYONS, Beverly (1995), Assoc. Prof. of History. B.A., East Carolina Univ., 1985; M.A., North Carolina Central Univ., 1990; Ph.D., Miami Univ. at Oxford, Ohio, 1995.<sup>10</sup>

BURBEY, Thomas J. (1996), Assoc. Prof. of Hydrogeosciences. B.S., Univ. of Wisconsin, 1981; M.S., Univ. of Nevada, 1984; Ph.D., Univ. of Nevada, 1994.

BURCH-BROWN, Carol (1979), Prof. of Art. B.A., Abilene Christian Univ., 1974; M.F.A., The Univ. of Chicago, 1977.

BURCHETT, Amy M. (2009), Accounts Payable Manager. M.S., Virginia Tech, 2001.

BURDISO, Ricardo A. (1992), Prof. of Mechanical Engineering and Asst. Dept. Head for Graduate Studies. B.S., Nat. Univ. of Cordoba, Argentina, 1981; M.S., Virginia Tech, 1984; Ph.D., Virginia Tech, 1986.

BURGE, Penny L. (1979), Prof. of Education. B.S., Indiana Univ. of Pennsylvania, 1969; M.Ed., Indiana Univ. of Pennsylvania, 1972; Ph.D., The Pennsylvania State Univ., 1979.

BURGOYNE, Christine B. (2004), Instructor of Materials Science and Engineering and of Engineering Science and Mechanics, Asst. Director of the MSE/ESM Communications Program. B.A., Univ. of the Philippines, 1995; M.A., Virginia Tech, 2001.

BURKHART, Harold E. (1969), Univ. Distinguished Prof., Thomas M. Brooks Prof. of Forest Biometrics. B.S., Oklahoma State, 1965; M.S., Georgia, 1967; Ph.D., Georgia, 1969.<sup>6,9</sup>

BURNHEIMER, Joshua N. (2009), Asst. Director, Alumni Relations. B.S., Virginia Tech, 2008.

BURNS, John A. (1974), Hatcher Prof. of Mathematics. B.S.Ed., Arkansas State, 1967; M.Ed., Arkansas State, 1968; M.A., Oklahoma, 1970; Ph.D., Oklahoma, 1973.

BURNS, C. Vernon (1978), Prof. of Music. B.M., Georgia Southern, 1968; M.M., Miami (Fla), 1976; Ph.D., Miami (Fla), 1978.

BURRELL, Steve, (2003), Asst. Director of Student Organizations, UUSA. B.A., Florida State Univ., 1991; M.S., Florida State Univ., 1994.

BURTON, John K. (1977), Prof. of Education. B.A., UNC, 1967; M.A., Illinois State Univ., 1972; Ph. D., Univ. of Nebraska, 1977.

BURTON, Patricia A. (2005), Director of Employee Relations. B.A., Univ. of Delaware, 1975; M.S.W., Univ. of Maryland at Baltimore, 1981.

BUSH, Kristen H. (1998), Director, Institutional Research & Effectiveness. B.S., Concord College, 1985; M.S., Virginia Tech, 1991; Ph.D., Oklahoma State Univ., 1997.

BUSH, Robert J. (1989), Prof. of Forest Products Marketing, College of Natural Resources. B.S., Minnesota, 1984; M.S., Virginia Tech, 1986; Ph.D., Virginia Tech, 1989.

BUTT, Ali (2007), Asst. Prof. of Computer Science. B.S., Univ. of Engineering and Technology, 2000; Ph.D., Purdue Univ., 2006.

BYERS, Ralph M. (1990), Executive Director of Government Relations. B.A., Emory University, 1967; M.A., Univ. of Virginia, 1971.

## C

CACECI, Thomas (1987), Assoc. Prof. of Biomedical Sciences and Pathobiology. A.B., Kenyon, 1969; Ph.D., Georgetown, 1980.

CADDICK, Mark J. (2012), Asst. Prof. of Geosciences. M.Sci., Univ. of Bristol, 2000; Ph.D. Univ. of Cambridge, 2004.

CALASANTI, Toni M. (1987), Prof. of Sociology. B.A., Loyola-Marymount, 1977; M.A., Kentucky, 1981; Ph.D., Kentucky, 1987.

CALHOUN, D. Brian (1992), Extension Specialist. B.S., The Univ. of Virginia's College at Wise, 1984; M.S., Virginia Tech, 1996; Ph.D., Virginia Tech, 2006.

CALVERA, Elizabeth C. (1980), Instructor of Spanish. B.A. Carnegie Mellon, 1963; M.A., Virginia Tech, 1978.

CAMDEN, Samuel (1999), Assoc. Director of Human Resources, Student Affairs, B.S., Virginia Tech, 1968.

CAMELIO, Jaime A. (2008), Asst. Dept. Head and Assoc. Prof. of Industrial and Systems Engineering. B.S., Universidad Catolica de Chile, 1994; M. S., Universidad Catolica de Chile, 1996; M.S., Univ. of Michigan, 2002; Ph.D., Univ. of Michigan, 2002.

CAMERON, Kirk W. (2005), Assoc. Prof. of Computer Science. B.S., Univ. of Florida, Gainesville, 1994; Ph.D., Louisiana State Univ., 2000.

CAMPBELL, Allen W. (2006), Coordinator of Univ. Budget & Financial Systems. B.S., Clemson Univ., 1986; M.S., Virginia Tech, 1991.

CAMPBELL, James B. (1976), Prof. of Geography. A.B., Dartmouth, 1966; M.A., Kansas, 1972; Ph.D., Kansas, 1976.

CAMPBELL, Walter G. (2011), Director, Professional Development and Innovative Initiatives. B.A., Wake Forest Univ., 1979; M.A., UVA, 1982; Ph. D., UVA, 1992.

CAMPBELL, W. Gardner. (2011). Assoc. Prof. of English. B.A., Wake Forest Univ., 1979; M.A., Univ. of Virginia, 1982; Ph.D., Univ. of Virginia, 1992.

CANFIELD, Robert A. (2008), Prof. of Aerospace and Ocean Engineering. B.S.E., Duke Univ., 1983; M.S., Stanford Univ., 1984; Ph.D., Virginia Tech, 1992.

CANNON, Douglas F. (2010), Asst. Prof. of Communication. B.A., Ohio State Univ., 1975; M.A., Ohio State Univ., 1976; Ph.D., Univ. of Texas at Austin, 2008.

CANTER, Robert H. (1994), Senior Instructor of English. B.A., State University of New York at Buffalo, 1984; M.A., Univ. of Virginia, 1986.

CANTU, Henry M. (2010), Assoc. Director of Undergraduate Admissions. B.A., Texas Tech Univ., 1987; M.A., Univ. of Texas at San Antonio, 2007.

CAO, Dianjun (2008), Research Asst. Prof. of Biomedical Sciences and Pathobiology. B.S., Heilongjiang Bayi Reclamation Agriculture Univ. (China), 1989; MS, North-East Agriculture Univ. (China), 1992; Ph.D., Graduate School of Chinese Academy of Agricultural Sciences (China), 1996.

CAO, Yang (2006), Asst. Prof. of Computer Science. B.S., Tsinghua Univ., 1993; M.S., Tsinghua Univ., 1998; Ph.D., Univ. of California at Santa Barbara, 2003.

CAO, Yong (2007), Asst. Prof. of Computer Science. B.S., Univ. of Science and Technology of China, 1997; M.S., Chinese Academy of Sciences, 2000; Ph.D., Univ. of California, 2001.

CAPALDO, Stephen F. (2007), Assoc. Univ. Legal Counsel. B.S., West Virginia Univ., 2002; J.D., West Virginia College of Law, 2005.

CAPELLUTO, Daniel (2005), Assoc. Prof. of Molecular and Cellular Biology. B.S., Univ. of Buenos Aires, 1989; M.S., Univ. of Valencia, 1994; Ph.D., Univ. of Buenos Aires, 1997.

CARLIER, Paul R. (2000), Prof. of Chemistry. B.A., Hamilton College, 1983; Ph.D., Massachusetts Institute of Technology, 1988.

CARLSON, Kevin D. (1997), Assoc. Prof. of Management. B.S., Iowa State, 1982; M.B.A., South Dakota, 1991; Ph.D., Iowa, 1997.

CARPENTER, Stephen M. (2009), Lead DBA & Application Administrator.

CARR, Curtis (1998), Lecturer and Director, Library Systems. B.A., Virginia Tech, 1989.

CARROLL, David F. (2008), Instructor of Geography. B.S., Virginia Tech, 1984; M.S., Mississippi State, 2001.

CARSTENSEN, Laurence W. (1983), Prof. and Department Head of Geography. B.A., UNC, 1976; M.A., UNC, 1978; Ph.D., UNC, 1981.

CARTER-TOD, Sheila L. (2000), Assoc. Prof. of English. B.A., Virginia Tech, 1989; M.A., Radford, 1991; Ph.D., Virginia Tech, 1995.

CASALI, John G. (1982), John Grado Prof. of Industrial and Systems Engineering. B.S., Virginia Tech, 1977; M.S., Virginia Tech, 1979; Ph.D., Virginia Tech, 1982.<sup>6</sup>

CASE, Scott W. (1998), Prof. and Assoc. Head of Engineering Science and Mechanics. B.S., Virginia Tech, 1992; M.S., Virginia Tech, 1993; Ph.D., Virginia Tech, 1996.

CASH, Carol S. (2007), Clinical Asst. Prof. of Education. B.A., Univ. of South Alabama; M.A., Univ. of South Alabama; Ed.S., George Washington Univ.; CAGS, Virginia Tech; Ed.D., Virginia Tech, 1993. (Hampton Roads Center)

CASSERA, Maria B. (2011), Asst. Prof. of Biochemistry. Licentiate, Nat'l. Univ. of Littoral, 2000; Ph.D., Univ. of Sao Paulo, 2005.

CASTLE, Steven C. (2009), Sr. Data Warehouse Architect. B.S., Virginia Tech, 1996.

CASTO, Marilyn, (2000), Assoc. Prof. of Interior Design and of Art History. B.S., WVU, 1974; M.S., Fla. St. Univ., 1975; Ph.D., UNC-Greensboro, 1982.

CATE, Anthony D. (2011), Asst. Prof. of Psychology. B.A., Yale Univ., 1995; Ph.D., Carnegie Mellon Univ., 2005.

CATLEY, Dennis B. (1987), Assoc. Director and Senior Programmer, Institutional Research & Effectiveness. B.A., Indiana Univ. of PA, 1977.

CAUDELL, David (2009), Asst. Prof., of Biomedical Sciences & Pathobiology. D.V.M., Virginia Tech, 2000; Ph.D., Univ. of Maryland, 2008.

CENNAME, Katherine (1996), Prof. of Education. B.A., Virginia Tech, 1976; M.Ed., Univ. of Arizona, 1981; Ph.D., Univ. of Texas at Austin, 1989.

CENTENO, Virgilio (2001), Assoc. Prof. of Electrical and Computer Engineering, A.D., Middle Georgia, 1983; B.S., Virginia Tech, 1985; M.S., Virginia Tech, 1988; Ph.D., Virginia Tech, 1995.

CHAMBERS, Catherine L. (2009), Manager, Printing Services. A.S., Motlow State Community College, 1984; B.A., Covenant College, 1987; M.Ed., Pennsylvania State Univ., 2004

CHANDLER, Gena (2004), Assoc. Prof. of English. B.A., Florida A & M Univ., 1996; M.A., Univ. of North Carolina, 1999; Ph.D., Univ. of North Carolina, 2004.<sup>10</sup>

CHANG, Lay Nam (1978), Prof. of Physics and Dean, College of Science. A.B., Columbia, 1964; Ph.D., California (Berkeley), 1967.

CHANG, Mido (2004), Assoc. Prof. of Education. B.A., Korea Univ., 1985; M.A., Korea Univ., 1987; M.A.Ed., Rutgers Univ., 2002; M.S., Teachers

College Columbia Univ., 2002; Ph.D., Teachers College Columbia Univ., 2004.

CHANG, Tsu Sheng (Roger) (2003), Instructor of Engineering Science and Mechanics. B.S., National Taiwan University, 1985; M.E., Virginia Tech, 1989; M.S., Virginia Tech, 1992; Ph.D., Virginia Tech, 2002. 4

CHAPMAN, Martin C. (1998), Research Assoc. Prof. in Geosciences. B.S., Virginia Tech, 1977; M.S., Virginia Tech, 1979; Ph.D., Virginia Tech, 1998.

CHARLES, Richard D. (2008), Director of Human Resources Services and Employee Records. B.S., Virginia Tech, 1994; M.B.A., University of Phoenix, 2002.

CHARNEY, Finley A. (2001), Assoc. Prof. of Civil and Environmental Engineering. B.S., Univ. of Texas, Austin, 1975; M.S., Univ. of Texas, Austin, 1976; Ph.D., Univ. of California, Berkley, 1986; P.E.

CHASE, David W. (2010), Prof. of Military Science. B.A., Grove City College, 1986; M.S., Troy State Univ., 1992; M.A., Naval Staff College, 2000; M. A., School of Advanced Military Studies, 2001

CHASE, Melissa W. (2011). Manager, Consumer Food Safety Program. B.S. Virginia Tech, 1987; M.S. Virginia Tech, 1999; Ph.D. Virginia Tech, 2004.

CHEN, Ing-Ray (1997), Prof. of Computer Science and Program Director, NVC Computer Science Program. B.S., National Taiwan Univ., 1978; M. S., Univ. of Houston, 1983; M.S., Univ. of Houston, 1985; Ph.D., Univ. of Houston, 1988. (Northern Virginia Center).

CHEN, Yong (2007), Asst. Prof. of Finance. M.A., Nankai Univ., 2001; Ph.D., Boston College, 2007.

CHEN, Yvonne Yi-Chun (2008), Asst. Prof. of Communication. B.A., Shih Hsin Univ., 2002; M.A., Washington State Univ., 2004; Ph.D., Washington State Univ., 2008.

CHEN-YU, Jessie H. (1996), Assoc. Prof. of Apparel, Housing, and Resource Management. B.S., Fu Jen Catholic Univ., Taiwan, 1982; M.S., Colorado State, 1987; Ph.D., Minnesota, 1995.

CHERMAK, John (2004), Assoc. Prof. of Practice. B.S. Bowling Green State Univ., 1984; M.S., Virginia Tech, 1986; Ph.D., Virginia Tech, 1989.

CHILDERS, Jeri (2004), Director, Outreach Program Development. B.S., Univ. of Hawaii, 1980; M.S., Univ. of Missouri, 1989; Ph.D., Univ. of Missouri, 1993.

CHIU, Pearl H. (2010), Ass. Prof. of Psychology. A.B., Harvard Univ., 1998; A.M., Harvard Univ., 2004; Ph.D., Harvard Univ., 2006.

CHOUDHURY, Salahuddin (1974), Prof. of Architecture, Co-director of Special Programs. B.Arch., EPUET, 1967; M.Arch., Minnesota, 1970.

CHRISTIE, Maria Elisa (2006), Program Director for Women in International Development. B.A., Univ. of Oregon, 1983; M.A., Univ. of Oregon, 1994; Ph.D., Univ. of Texas at Austin, 2003.

CHUNG, Julianne (2012), Asst. Prof. of Mathematics. B.A., Emory Univ., 2004; Ph.D., Emory Univ., 2009.

CHUNG, Matthias (2012), Asst. Prof. of Mathematics. M.S. Univ. of Hamburg, Germany, 2001; Ph.D., Univ. of Lubeck, Germany, 2006.

CHUNG, Myungsuk (2010), Instructor of Mathematics. B.S., Ewha Womans Univ., Seoul, South Korea 1983; M.A., Mathematics, Ewha Womans Univ., Seoul, South Korea 1985; Ph.D., Mathematics, Virginia Tech, 1995.

CIMINI, Daniela (2005), Assoc. Prof. of Molecular and Cellular Biology. B.S., Univ. of Rome La Sapienza, 1993; M.S., Univ. of Rome La Sapienza, 1997; Ph.D., Univ. of Rome La Sapienza, 2001.

CISSELL, J. Mike (2009), Clinical Asst. Instructor of Large Animal Clinical Sciences. B.S., Murray State Univ., 2001; D.V.M., Auburn Univ., 2005.

CIUPE, Stanca Mihaela (2011), Asst. Prof. of Mathematics. B.A., Babes-Bolyai Univ., 1997; M.S., Babes-Bolyai Univ., 1998; Ph.D., Univ. of Michigan, 2005.

CLANCY, Charles (2011), Assoc. Prof. of Electrical and Computer Engineering, B.S., Rose-Hulman Institute of Technology, 2001; M.S., Univ. of Illinois, Urbana-Champaign, 2002; Ph.D., Univ. of Maryland, 2006. Northern Virginia Campus

CLARK, David E. (2001), Prof. of Materials Science and Engineering. B.S., Univ. of Florida, 1969; M.S., Univ. of Florida, 1970; Ph.D., Univ. of

Florida, 1976.

CLARK, Laura (2003) Asst. Director for Student Support. B.S., Virginia Tech, 1993; M.S., Radford Univ., 2003.

CLARK, Richard L., Jr. (1997), Instructor of Materials Science and Engineering. B.S., Virginia Tech, 1991; M.S. Virginia Tech, 1994; Ph.D., Virginia Tech, 1996.

CLARK, Sherrie G. (2011), Assoc. Prof. of Large Animal Clinical Sciences. B.S., Virginia Polytechnic Institute and State University, 1992; DVM, VMRCVM, 1996; MS, University of Illinois, 1999; Ph.D., University of Illinois, 2003; Diplomate ACT.

CLARK, Susan F. (2005), Assoc. Prof. of Human Nutrition, Foods and Exercise. B.S., Virginia Tech, 1977; M.S., Univ. of Kentucky, 1978; Ph.D., Virginia Tech, 1990.

CLAUER, C. Robert (2007), Prof. of Electrical and Computer Engineering, B.S., Miami Univ., 1970; M.S., UCLA, 1974; Ph.D., UCLA, 1980. NIA, Hampton, VA.

CLEMENTS, Terry (1993), Assoc. Prof. of Landscape Architecture. B.L.A. S.U.N.Y. CESF, 1985; M.L.A. UC-Berkeley, 1993.

CLEMENZ, Candice E., (2005), Assoc. Dean for Undergraduate Programs, Pamplin College of Business; Asst. Prof. of Hospitality & Tourism Management. B.S., Florida State, 1975; M.S., Tennessee, 1993; Ph.D., Virginia Tech, 2001.

CLEMONS, Joshua (2010), Instructor of Mathematics. B.S., North Carolina State Univ., 2005; Ph.D., Univ. of North Carolina at Chapel Hill, 2010.

CLEVENGER, Jennifer L. (2007), Director of Advising, Pamplin College of Business. B.S., Virginia Tech, 1994; M.S., Virginia Tech, 1998; Ph.D., Virginia Tech, 2002.

CLOSE, David (2004), Lecturer. B.S., Kentucky, 1993; M.S., Southern Illinois, 1996.

CLOYD, C. Bryan (2005), John E. Peterson, Jr. Prof. of Accounting and Information Systems. B.S., Kentucky, 1983; Ph.D., Indiana, 1992.

CLUM, George A. (1975), Prof. of Psychology. B.S., Scranton Univ., 1963; M.S., St. John's Univ., 1965; Ph.D., St. John's Univ., 1968.

COBB, Anthony T. (1978), Assoc. Prof. of Management. B.A., Cal. State (Northridge), 1970; M.U.P., Wayne State, 1975; Ph.D., California (Irvine), 1977.

COBURN, Melissa A. (2009), Asst. Prof. of Italian, B.A. Indiana Univ. 1994; M.A. Purdue Univ. 1996; PhD. Purdue Univ. 2002.

COHEN, Alicia P. (1989), Manager, Business Affairs and Special Projects, Office of Multicultural Affairs. B.S., Michigan State Univ., 1987; M.A., Michigan State Univ., 1989.

COLAIANNE, Anthony J. (1977), Assoc. Department Chair and Assoc. Prof. of English. B.A., St. Vincent College, 1972; M.A., Duquesne Univ., 1974; Ph.D., Univ. of Cincinnati, 1977.2,7

COLE, Richard C. (1971), Assoc. Prof. of Music. B.S., Indiana State, 1958; M.A., Indiana State, 1959.

COLEMAN, Michael (2008), Assoc. Vice President for Administrative Services. B.A., Neumann College, 2003.

COLLÁKOVÁ, Eva (2009), Asst. Prof. of Plant Physiology. B.S., Univ. of Pavol Jozef Safarik, Kosice, 1995; Ph.D., Michigan State Univ., 2003.

COLLIER, James H. (2001), Assoc. Prof. of English. B.A., Virginia Tech, 1983; M.A., Virginia Tech, 1987; M.S., Virginia Tech, 1993; Ph.D., Virginia Tech, 1998.

COMBITHS, Z. Katherine (2004), Advanced Instructor of English. B.A., Roanoke College, 1997; M.S., Radford Univ., 2002.

CONCANNON, Kevin C (2011), Prof. of Art History. B.A., Univ. of Massachusetts, 1983; Ph.D., Virginia Commonwealth Univ., 2000.

CONLEY, Wesley A. (2012), Identity Management Developer. B.S. Virginia Tech, 2012.

CONNOR, Jeffrey B. (1999), Assoc. Prof. of Engineering Education. B.S., Univ. of Lowell, 1986; M.S., Virginia Tech, 1988; P.E.

COOK, Dana R. (2009), Clinical Asst. Prof. of Large Animal Clinical Sciences. B.S. Virginia Polytechnic Institute and State University, 1994; DVM,

VMRCVM, 1999.

COOK, Deborah F. (1993), Prof. of Business Information Technology. B.S., Virginia Tech, 1979; M.A., Virginia Tech, 1982; Ph.D., Texas A&M, 1990.

COOK, Samuel R. (1999), Assoc. Prof. of Humanities and Coordinator of the American Indian Studies Program. B.A., Radford, 1988; M.A., Univ. of Arizona, 1992; Ph.D., Univ. of Arizona, 1997.

COOPER, Lee D. (1998), Clinical Asst. Prof. of Psychology. B.S., Northeastern Univ., 1981; M.A., Univ. of North Carolina at Greensboro, 1984; Ph.D., Univ. of North Carolina at Greensboro, 1988.

COPENHEAVER, Carolyn A. (2000), Assoc. Prof. of Forest Ecology. B.S., Juniata College, 1993; M.S., Maine, 1996; Ph.D., Pennsylvania State, 2000.

COPENHAVER, Kristin F. (2009), Accounts Payable/TVB Manager. B.S., Virginia Tech, 1996; MBA, Virginia Tech, 2002.

CORCORAN, Sean G. (1998), Assoc. Prof. of Materials Science and Engineering. B.S., Johns Hopkins, 1990; M.S., Johns Hopkins, 1992; Ph.D., Johns Hopkins, 1994.

CORL, Benjamin A., (2005) Assoc. Prof. of Dairy Science. B.S., Virginia Tech, 1997; Ph.D., Cornell, 2003.

CORTES, Mario (1991), Assoc. Prof. of Architecture. B.A., Wash. Univ., St. Louis, 1979; M.Arch., Virginia Tech, 1986.

CORVIN, Timothy G. (1996), Assoc. Vice President for Development. B.S., Virginia Tech, 1975; M.S., Virginia Tech, 1980.

COTHREN, Marlene (1993), Instructor of Mathematics. B.S., Guilford College, 1971; M.A., Wake Forest Univ., 1972; M.S., Univ. of Illinois, 1975.

COTHREN, Richard D., (1985), Assoc. Prof. of Economics. B.S., Wake Forest, 1973; M.S., Illinois, 1975; Ph.D., UNC, 1981.

COUPEY, Eloise (1994), Assoc. Prof. of Marketing. B.A., Harvard Univ., 1983; Ph.D., Duke Univ., 1990.

COUSINS, Thomas E. (1996), Prof. of Civil and Environmental Engineering. B.S., Clemson Univ., 1978; M.S., Clemson Univ., 1982; Ph.D., North Carolina State, 1986; P.E.

COUTURE, Pierre (2001), Instructor of Hospitality and Tourism Management. Diploma, Limoilou College, 1972; B.S., Univ. of Trois-Rivieres, 1975; M.S., Virginia Tech, 2001.

COVEY, Lucas S. (2012), Technical Lead. B.S., Virginia Tech, 2000; M.A. Virginia Tech, 2006; Masters of Information Technology, Virginia Tech, 2011.

COWART, Maria J. W. (2009), Postdoctoral Assoc. B.A., Univ. of Virginia, 2001; M.S., Virginia Tech., 2006; Ph.D., Virginia Tech, 2009.

COWDEN, Tracy (2004), Asst. Prof. of Music. B.M., Western Michigan, 1993; M.M., Eastman School of Music, 1995; D.M.A., Eastman School of Music, 2000.

COWELL, Margaret M. (2010), Asst. Prof. of Urban Affairs and Planning, B.A., Brown Univ., 2002; M.U.P., SUNY, 2004; Ph.D., Cornell Univ., 2010.

COWELL-LUCERO, Jamie (2006), Asst. Director, Alumni Relations. B.S., Central Missouri State Univ., 1999; M.S., Kansas State, 2001.

COX, BRANT M. (2012), Director, Business Planning and Development. B.S., Virginia Tech, 1989; M.B.A., Old Dominion Univ., 1993.

COX, David F. (1986), Prof. of Chemical Engineering. B.S., Tennessee, 1979; M.S., Florida, 1980; Ph.D., Florida, 1984.

COX, Heather (2008), Instructor of Human Nutrition, Foods and Exercise. B.S., Virginia Tech, 1997; M.S., Virginia Tech, 2008.

CRAFTON, Jason (2011), Asst. Prof. of Music. B.M., Drake Univ., 2004; M.M., Univ. of Northern Colorado, 2007; D.M.A., Univ. of North Texas, 2010.

CRAIG, James R. (2006), Clinical Professor of Education. B.A., Drake Univ.; M.S., Iowa State Univ.; Ph.D., Iowa State Univ., 1969.

CRAMER, Mark S. (1978), Prof. of Engineering Science and Mechanics. B.S., Cornell Univ., 1972; M.E., Cornell Univ., 1974; Ph.D., Cornell Univ., 1976.

CRANE, David F. (1980), Prof. of Art. B.F.A., Northern Arizona Univ., 1976; M.F.A., Illinois State Univ. at Normal, 1978.

CRAWFORD, T. Daniel, (2000), Prof. of Chemistry. B.S., Duke Univ., 1992; Ph.D., Univ. of Georgia, 1996.

CRAYNON, John R. (2011), Project Director – ARIES, Virginia Center for Coal and Energy Research. B.S., Mining and Minerals Engineering, Virginia Tech, 1982; M.S., Mining and Minerals Engineering, Virginia Tech, 1985; Ph.D., Mining and Minerals Engineering, Virginia Tech, 2011;

CREAMER, Elizabeth. G. (1982), Prof. of Education. B.S., Northwestern Univ., 1970; M.Ed., Colorado State Univ., 1974; Ed.D., Virginia Tech, 1983.

CRIDLIN, Clyde Y., Jr. (1978), Asst. Registrar. B.A., Milligan College, 1966; M.A., Radford, 1973.

CRISMAN, Celeste C. (2005), Lecturer of Animal and Poultry Sciences. B.S., Clemson, 1984; M.S., Clemson, 1987.

CROASDALE, Hudnall R. (2000), Director, IT Strategic Partnerships. B.S., Virginia Commonwealth Univ., 1975; M.S., Univ. of Southern California, 1987.

CROCKETT, Randal R. (1974), Project Leader, Student & Financial Aid. B.S., Virginia Tech, 1972; M.S., Virginia Tech, 1974.

CRONE, Elizabeth L. (1998), Senior Instructor of Music. B.A., Univ. of Arizona, 1990; M.M., Univ. of Southern California, 1992.

CRONE, William J. (1994), Assoc. Prof. and Department Head in Music. B.A., California State Univ. at Fresno, 1987; M.M., Yale Univ., 1989; D.M. A., Univ. of Southern California, 1994.

CROSS, Travis (2008), Asst. Prof. of Music. B.M., St. Olaf College, 1999; M.M., Northwestern Univ., 2006.

CROWDER, Jeffrey M. (2005), Executive Director, Strategic Initiatives. B.A., Univ. of Virginia, 1984; M.S., Virginia Tech, 1996.

CROWDER, Richard T. (2008), Prof. of Agricultural and Applied Economics. B.S. Virginia Tech, 1960; M.S., Virginia Tech, 1962; Ph.D., Oklahoma State, 1966.

CRUMP, Dennis J. (2012), Asst. Prof. of Naval Science. LT, U.S. Navy. B.S., Virginia Military Institute, 2006.

CUEVAS, K. S. (2009), Postdoctoral Research Assoc. B.S., Randolph Macon Women's College, 2002; M.S., Rutgers, The State Univ. of New Jersey – New Brunswick, 2005; Ph.D., Rutgers, The State Univ. of New Jersey – New Brunswick, 2009.

CURRIN, John C. (1997), Clinical Assoc. Prof. of Large Animal Clinical Sciences. B.S., Virginia Tech, 1990; D.V.M., Virginia Tech, 1993; Diplomate, A.B.V.P

CUSIMANO, John J. (1988), Univ. Treasurer. B.S., Virginia Tech, 1983; M.B.A., Virginia Tech, 1994.

DAVIS, Richey M. (1988), Prof. of Chemical Engineering. B.S., Clemson, 1977; M.A./Ph.D., Princeton, 1983.

DAVIS, William A. (1978), Prof. of Electrical and Computer Engineering. B.S., Illinois, 1969; M.S., Illinois, 1970; Ph.D., Illinois, 1974.

DAVIS, William C. (2000), Prof. of History. A.B., Sonoma State, 1968; M.A., Sonoma State, 1969.

DAVY, Brenda M. (2003), Assoc. Prof. of Human Nutrition, Foods and Exercise. B.S., Virginia Tech, 1989; M.S., Virginia Tech, 1992; Ph.D., Colorado State Univ., 2001.

DAVY, Kevin P. (2003), Prof. of Human Nutrition, Foods and Exercise. B.S., Univ. of New York at Cortland, 1986; M.A., Adelphia Univ., 1988; Ph.D., Virginia Tech, 1992.

DAY, Deborah A. (1987), Assoc. Vice President, Alumni Relations. B.A., Virginia Tech, 1984; M.S., Virginia Tech, 1993.

DAY, Martin V. (1980), Prof. of Mathematics. B.S., Cal State (Hayward), 1973; M.A., Colorado, 1975; Ph.D., Colorado, 1978.

DAY, Susan D. (2008), Asst. Prof. of Urban Forestry and Asst. Prof. of Horticulture. B.A., Yale, 1985; M.S., Cornell Univ., 1993; Ph.D., Virginia Tech, 1999.

DE DATTA, Surajit K. (1991), Assoc. Vice President for International Affairs and Director of the Office of International Research, Education and Development; Prof. of Crop and Soil Environmental Sciences. B.S., Banaras Hindu Univ., 1956; M.S., Indian Agricultural Research Institute, 1958; Ph.D., Univ. of Hawaii, 1962.

De DATTA, Vijayalakshmi (1999), Director, Facilities Services Finance. B.S., Madras Univ. India, 1985; M.S., Univ. of the Philippines, 1990; M.S., Virginia Tech, 1994.

DE LA GARZA, Jesus M. (1988), Vecellio Prof. of Civil and Environmental Engineering. B.S., Tecnologico de Monterrey, Mexico, 1978; M.S., Univ. of Illinois, 1984; Ph.D, Univ. of Illinois, 1988; P.E.

DE LA REE LOPEZ, Jaime (1984), Assoc. Prof. and Asst. Department Head of Electrical and Computer Engineering. B.S., I.T.y de E.S. de Monterrey, 1980; M.S., Pittsburgh, 1981; Ph.D., Pittsburgh, 1984.<sup>2,3,4</sup>

DE STURLER, Eric (2006), Prof. of Mathematics. M.S., Technical Univ., Delft, 1990; Ph.D., Technical Univ., Delft, 1994.

DE VITA, Raffaella (2007), Asst. Prof. of Engineering Science and Mechanics. Laurea, Univ. of Naples II, 2000; M.S., Univ. of Pittsburgh, 2003; Ph. D., Univ. of Pittsburgh, 2005.

DEAN, Dennis R. (1985), Prof. of Biochemistry and Director, Fralin Center for Biotechnology. B.A., Wabash, 1973; Ph.D., Purdue, 1979.

DEAN, Wanda H. (1983), Asst. Vice President for Enrollment and Degree Management and Univ. Registrar. B.A., Virginia Tech, 1979; M.A., Virginia Tech, 1985.

DEANE, Jason C. (2006), Assoc. Prof. of Business Information Technology. B.S., Virginia Tech, 1995; M.B.A., Virginia Tech, 2000; Ph.D., Florida, 2006.

DEATER-DECKARD, Kirby (2005), Prof. of Psychology. B.A., Pennsylvania State Univ., 1988; M.A., Univ. of Virginia, 1992; Ph.D., Univ. of Virginia, 1994.

DEBONIS, Marcus T., (2011), Manager, Microsoft Secure Infrastructure Services. B.S. Virginia Tech, 1993; M.S., Virginia Tech, 2011.

DEBRIX, François (2011). Prof. of Political Science; Director of Alliance for Social, Political, Ethical and Cultural Thought. B.A., Univ. of Strasbourg, 1991; M.A., Purdue U, 1993; Ph.D., Purdue U, 1997.

DECK, Paul (1995), Assoc. Prof. of Chemistry. B.S., Hope College, 1987; Ph.D., Minnesota, 1993.

DECK, Margaret (2008), Instructor of Management. B.S., Virginia Tech, 1984; M.B.A., Virginia Tech, 1986.

DEE, Meaghan (2012), Asst. Prof. of Professional Practice, Director of Four Design, B.F.A. Univ. of Illinois- Champaign-Urbana, 2005; M.F.A. Virginia Commonwealth Univ. 2011.

DEISINGER, Eugene (Gene) R. D. (2009), Deputy Chief of Police and Director of Threat Management Services. B.S., Univ. of Wisconsin-Stevens Point, 1987; M.S., Iowa State Univ., 1990; Ph.D., Iowa State Univ., 1992.

DENBOW, Cynthia J. (1980), Research Scientist in Plant Physiology. B.S. NC State, Raleigh, 1977; M.S., N.C. State, Raleigh, 1980; Ph.D., Virginia Tech, 1997.

DENBOW, D. Michael (1979), Prof. of Animal and Poultry Sciences. B.S., Maryland, 1975; M.S., Maryland, 1977; Ph.D., NC State, 1980.<sup>1,2,3</sup>

DENG, Xinwei (2011). Asst. Prof. of Statistics. B.S. Nanjing Univ., China, 2003; Ph.D., Georgia Institute of Technology, 2009.

DENTON, Robert E., Jr. (1988), W. Thomas Rice Chair; Prof. of Communication. B.A., Wake Forest Univ., 1975; M.A., Wake Forest Univ., 1977; Ph. D., Purdue, 1980.

DePAUW, Karen P. (2002), Vice Provost for Graduate Studies and Dean of the Graduate School, Prof. of Sociology, Prof. of Human Nutrition, Foods and Exercise. A.B., Whittier College, 1970; M.S., California State Univ., Long Beach, 1974; Ph.D., Texas Woman's Univ., 1980.

DERR, Jeffrey F. (1984), Prof. of Weed Science. B.S., Penn State, 1979; M.S., N.C. State Univ., 1981; Ph.D., North Carolina State Univ., 1984 (Hampton Roads Agricultural Research and Extension Center).

DESROCHERS, Anne M. (2004), Clinical Asst. Prof. of Equine Internal Medicine, Marion duPont Scott Equine Medical Center. D.M.V., Univ. of Montreal, 1999; Diplomate, A.C.V.I.M., 2004.

DEVENPORT, William J. (1989), Prof. of Aerospace and Ocean Engineering. B.Sc., Exeter Univ., 1981; Ph.D., Univ. of Cambridge, 1985.

deWINDT, William S. (2010), Learning Systems Architect. B.S., Hampden-Sydney, 1996.

DIANA, Rachel A (2011), Asst. Professor of Psychology. B.S., Presbyterian College, 2001; M.S., Carnegie Mellon Univ., 2003; Ph.D., Carnegie Mellon Univ, 2006.

DIAZ-VERGARA, Sandra (2007), Asst. Prof. of Small Animal Clinical Sciences. B.S., Universiudad Santo Tomas, 1994; D.V.M., Universidad Santo Tomas, 1996; M.S., Univ. of Minnesota, 2006.

DICKERSON, Thomas A. (2008), Project Assoc., CGIT. B.S., Virginia Tech, 2005; M.S., Virginia Tech, 2007.

DICKERT, Robert M. (2009), Director, Computer-Integrated Learning Spaces. B.S., Virginia Tech, 1999.

DICKHANS, Jim (2010), Director of Information Technology, Pamplin College of Business. B.S., Virginia Tech, 2008; M.B.A., Virginia Tech, 2010.

DICKOW, Alexander R (2011), Asst. Prof. of French, B.A. Reed College 2002; M.A. Rutgers 2006; PhD. Rutgers 2011, Université de Paris 8 2011.

DIETRICH, Andrea M. (1988), Prof. of Civil and Environmental Engineering. B.S., Boston College, 1977; M.S., Drexel Univ., 1981; Ph.D., Univ. of North Carolina at Chapel Hill, 1987.

DIETZ, Kira A. (2009), Instructor; Library. B.A., Univ. of Delaware, 2003; M.A., Univ. of Tennessee, 2005; M.L.S., Univ. of Maryland, 2007.

DILLAHA, Theo A. III (1983), Program Director, SANREM CRSP, OIRED; Prof. of Biological Systems Engineering. B.S., Vanderbilt, 1974; M.S., Vanderbilt, 1976; Ph.D., Purdue, 1981; P.E.

DILLARD, David A. (1985), Adhesive and Sealant Science Prof. of Engineering Science and Mechanics. B.S., Missouri-Rolla, 1976; M.S., Missouri-Rolla, 1978; Ph.D., Virginia Tech, 1981.

DILLER, Thomas E. (1979), Prof. of Mechanical Engineering. B.S., Carnegie-Mellon, 1972; Sc.M., MIT, 1974; Sc.D., MIT, 1977.

DINGUS, Thomas A. (2001), Newport News Shipbuilding/Tenneco Prof. of Civil and Environmental Engineering and Director of Virginia Tech Transportation Institute. B.S., Wright State Univ., 1979; M.S., Virginia Tech, 1985; Ph.D., Virginia Tech, 1987.

DIPLAS, Panos (1988), Prof. of Civil and Environmental Engineering. B.S., National Technical Univ. of Athens, Greece, 1979; M.S., Univ. of Minnesota, 1983; Ph.D, Univ. of Minnesota, 1985.

DIXIT, Priya. (2010), Asst. Prof. of Political Science. B.A., James Cook Univ., 1998; M.A., Univ. of Sydney, 2000; Ph.D., American Univ., 2009.

DOAK, Samuel O. (2001), Instructor of Agricultural Technology. B.S., Old Dominion, 1979; M.S., Virginia Tech, 1996.

DOAN, Patrick (2008), Asst. Prof. of Architecture; B.S., Texas A&M Univ., College Station; M.Arch., Virginia Tech, 2007.

DOLBIN-MacNAB, Megan (2004), Asst. Prof. of Human Development. B.S., The Pennsylvania State Univ., 1997; M.S., Purdue Univ., 1999; Ph.D., Purdue Univ., 2004.

DOLLOFF, C. Andrew (1987), Assoc. Prof. of Fisheries and Wildlife, and Research Scientist, US Forest Service, Southeastern Experiment Station. B.S., Maine, 1975; M.S., North Carolina State, 1979; Ph.D., Montana State, 1983.

DOOLEY, John E. (1982), Vice President for Outreach and International Affairs. B.A., Alderson-Broadbush College, 1976; M.Ed., Virginia Tech, 1994; Ph.D., Virginia Tech, 1998

DOOLITTLE, Peter (1998), Prof. of Education and Director, Learning Sciences & Technology. B.A., Southern Methodist Univ., 1983; M.S., Baylor Univ., 1984; Ph.D., Catholic Univ. of America, 1993.

DORN, Harry C. (1974), Prof. of Chemistry. B.S., California (Santa Barbara), 1966; Ph.D., California (Davis), 1974.<sup>6</sup>

DORSA, Edward A. (1998), Chair of Industrial Design, Assoc. Prof. of Architecture and Industrial Design. M.A., Ohio State Univ., 1986; B.S., Ohio State Univ., 1984.

DORSHORST, Benjamin J. (2012), Asst. Prof. of Animal and Poultry Sciences. B.S., Univ. of Wisconsin, 2005; Ph.D., North Carolina State Univ., 2009.

DOUGHERTY, William C. (2008), Executive Director, Network Infrastructure and Services. B.A., Virginia Tech, 1981.

DOUGLAS, Ellen S. (1986), Asst. Director of Risk Management. B.A., Virginia Tech, 1984.

DOVE, Joseph E. (2000), Asst. Research Prof. of Civil and Environmental Engineering. B.S., Virginia Tech, 1980; M.S., Virginia Tech, 1986; Ph.D., Georgia Institute of Technology, 1996.

DOVE, Patricia M. (2000), Prof. of Geochemistry. B.S., Virginia Tech, 1980; M.S., Virginia Tech, 1984; Ph.D., Princeton Univ., 1991.

DOWLING, Norman E. (1983), Frank Maher Prof. of Engineering Science and Mechanics and Materials Science and Engineering. B.S., Clemson Univ., 1967; M.S., Univ. of Illinois, Urbana, 1968; Ph.D., Univ. of Illinois, Urbana, 1972.

DOWNEY, Gary L. (1983), Univ. Alumni Distinguished Professor; Prof. of Science and Technology in Society; Adjunct Prof., Dept. of Sociology. B. A., Lehigh, 1974; B.S., Lehigh, 1974; M.A Chicago, 1977; Ph.D., Chicago, 1981. <sup>3,10</sup>

DRUSCHITZ, Alan P. (2011), Assoc. Prof. of Materials Science and Engineering, B.S. Illinois Institute of Technology, 1978; Ph.D., Illinois Institute of Technology, 1982.

DU, Pang (2006), Asst. Prof. of Statistics. B.S., Univ. of Sci. & Tech. of China, 1996; M.S. Univ. of Sci. & Tech of China, 1999; M.A. and MS.E., Johns Hopkins Univ., 2002; M.S., Purdue Univ., 2003; Ph.D., Purdue Univ., 2006.

DUBINSKY, James (1998), Assoc. Prof. of English. B.A., Wake Forest Univ., 1977; M.A., Univ. of California at Berkeley, 1986; Ph.D., Miami Univ. of Ohio, 1998.<sup>10</sup>

DUBNJAKOVIC, Ana (2007), Instructor; Library. B.A., Univ. of New Orleans, 1999; M.M., Univ. of New Orleans, 2002; D.M.A., Univ. of Arizona, 2003; M.L.I.S, Louisiana State Univ., 2004.

DUCKER, William A. (1998), Prof. of Chemical Engineering. B.Sc., Australian National Univ., 1986; Ph.D., Australian National Univ., 1992.

DUDEK, Daniel M. (2009), Asst. Prof. of Engineering Science and Mechanics. B.A., Univ. of Chicago, 1998; Ph.D., Univ. of California, Berkeley, 2006.

DUDLEY, Larkin S. (1992), Department Chair and Assoc. Prof. of Public Administration and Policy. A.B., Univ. Georgia; M.A., Univ. Georgia; Ph.D., Virginia Tech, 1990.

DUGAS, David (1986), Assoc. Prof. of Architecture. B.Arch., Univ. of Southwestern Louisiana, 1982; M.Arch., Virginia Tech, 1985.

DUKE, Jr., John C. (1978), Prof. of Engineering Science and Mechanics. B.E.S., Johns Hopkins, 1973; M.S.E., Johns Hopkins, 1976; Ph.D., Johns Hopkins, 1978.

DUNAY, Donna W. (1975), Prof. of Architecture. B.Arch., Virginia Tech, 1971; M.Arch., Virginia Tech, 1974.

DUNAY, Robert J. (1976), T. A. Carter Endowed Prof. of Architecture; Director of the Center for Design Research. B.Arch., Virginia Tech, 1971; M. Arch., Virginia Tech, 1979.

DUNCAN, Susan E. (1990), Prof. of Food Science and Technology. B.S., Ohio State Univ., 1981; M.S. Indiana Univ. of Pennsylvania, 1987; Ph.D. The Univ. of Tennessee, 1989.

DUNKER, Mary B. (2004), Director of Secure Enterprise Technology Initiatives. B.S., Hollins Univ., 1974.

DUNN, Allison (2006), Asst. Director of CoCurricular Leadership Programs, UUSA. B.A., Brigham Young Univ., 1996; M.S., Texas A & M, 2001.

DUNNINGTON, E. Ann (1986), Prof. of Animal and Poultry Sciences. B.S., Virginia Tech, 1974; M.S., Virginia Tech, 1975; Ph.D., Virginia Tech, 1978.

DUNSMORE, Julie C. (2003), Asst. Prof. of Psychology. B.A., Emory Univ., 1990; M.A., Duke Univ., 1992; Ph.D., Duke Univ., 1994.

DUNSTON, Michael E. (1997), Senior Instructor of Music. B.A., Virginia Tech, 1993.

DURRANI, Hashim H. (2011), Application Analyst. B.S., Computer Science, Radford Univ., 2008.

DURRILL, Preston L. (2004), Instructor of Chemistry. B.S., M.S., Massachusetts Institute of Technology; Ph.D., Virginia Tech, 1966.

DYER, Harry (2000), Instructor of American Indian Studies and Humanities. B.A., Tennessee Wesleyan College, 1984; M.Div., Lutheran Theological Southern Seminary, 1994; M.F.A., Univ. of Montana, 1997.

DYMOND, Randel L. (1998), Assoc. Prof. of Civil and Environmental Engineering. B.S., Bucknell Univ., 1978; B.S., Penn State, 1979; M.S., Penn State, 1980; Ph.D., Penn State, 1987; P.E.<sup>7</sup>

### Footnotes used:

<sup>1</sup> Award for Excellence in Undergraduate Advising

<sup>2</sup> Academy of Teaching Excellence inductee

<sup>3</sup> Wine Award recipient

<sup>4</sup> Sporn Award recipient

<sup>5</sup> Alumni Award for Extension Excellence

<sup>6</sup> Alumni Award for Research Excellence

<sup>7</sup> Alumni Award for Teaching Excellence

<sup>8</sup> Academy of Faculty Service

<sup>9</sup> Commonwealth of Virginia Outstanding Faculty Award

<sup>10</sup> Diggs Teaching Scholar Awards

- The numbers in parentheses indicate the year of joining the faculty. Job title, degrees earned, where obtained, and year obtained follow.
- Non-resident staff locations are noted for those persons not based at the Blacksburg campus.

---

## E

EARLE, Gregory (2011), Prof. of Electrical and Computer Engineering. B.S.E.E., Purdue Univ., 1981; M.S.E., Purdue Univ., 1983; Ph.D., Cornell Univ., 1988.

EARLEY, Jeffrey L. (1996), Ass. Provost for Finance. B.S., Virginia Tech, 1995; M.S., Virginia Tech, 2007.

EASTER, Wallace E. (1981), Assoc. Prof. of Music. B.A., Oberlin, 1969; M.M., Catholic, 1973.

EASTERLING, W. Samuel (1987), Head, Civil and Environmental Engineering, and Montague-Betts Prof. of Structural Steel Design B.S., West Virginia Univ., 1981; M.S., West Virginia Univ., 1983; Ph.D., Iowa State, 1987; P.E.

EASTERWOOD, Cintia M. (1992), Instructor in Accounting and Information Systems. B.B.A., Texas-Austin, 1982; M.B.A., Texas-Austin, 1985; Ph.D., Houston, 1992.

EASTERWOOD, John C. (1992), Assoc. Prof. of Finance. B.S., Univ. of Alabama-Tuscaloosa, 1978; Ph.D., Univ. of Texas-Austin, 1985.

EASTON, Zachary (2011), Asst. Prof. of Biological Systems Engineering. B.S. North Carolina State, 1999; B.S., Univ. of Massachusetts Amherst, 2000; M.S., Cornell, 2004; Ph.D., Cornell, 2006. (Eastern Shore).

EATHERTON, Matthew R. (2010), Asst. Prof. of Civil and Environmental Engineering. B.S., Univ. of Missouri, 1997; M.S., Univ. of Missouri, 1999; Ph.D., Univ. of Illinois, Urbana, 2010.

EDDLETON, Jeannine E. (1991), Advanced Instructor of Chemistry. B.S., Virginia Tech, 1986; M.S., Virginia Tech, 1996.<sup>2,3</sup>

EDGAR, Kevin J. (2007), Prof. of Biomaterials and Bioprocessing. B.S., Bucknell Univ., 1975; Ph.D., Duke Univ., 1979.

EDGE, Kay (2001), Assoc. Prof. of Architecture. M.Ed., Yale, 2001; M.Arch., Virginia Tech.

EDWARDS, Erin (2003), Director of Development, Engineering. B.A., Univ. of North Florida, 1994.

EDWARDS, Marc E. (1997), Charles Lunsford Prof. of Civil and Environmental Engineering. B.S., SUNY Buffalo, 1986; M.S., Univ. of Washington (Seattle), 1988; Ph.D., Univ. of Washington (Seattle), 1991; E.I.T.<sup>6</sup>

EDWARDS, Stephen H. (1997), Assoc. Prof. of Computer Science. B.S., California Institute of Technology, 1988; M.S., The Ohio State Univ., 1992; Ph.D., The Ohio State Univ., 1995.

EFIRD, Robert O. (2008), Asst. Prof. of Russian. B.A., James Madison Univ., 1997; M.A., Indiana Univ., 1999; Ph.D., Univ. of Virginia, 2006.

EGYHAZY, Csaba J. (1981), Assoc. Prof. of Computer Science. B.S., Case Institute, 1972; M.S., Case Western, 1974; Ph.D., Case Western, 1976. (Northern Virginia Center).

EHRICH, Marion F. (1980), Prof. of Biomedical Sciences and Pathobiology. B.S., South Dakota, 1968; M.S., Chicago, 1970; Ph.D., Connecticut, 1975; Diplomate, A.B.T.

EICK, Matthew J. (1997), Prof. of Crop and Soil Environmental Sciences. B.S., Virginia Tech, 1987; M.S., Delaware, 1989; Ph.D., Delaware, 1995.

EIFERT, Joseph D. (1998), Assoc. Prof. of Food Science and Technology. B.S. Loyola Marymount Univ., 1980; M.S. Virginia Tech, 1991; Ph.D. Virginia Tech, 1994.

EIGEL, William N. (1979), Assoc. Prof. of Food Science and Technology. B.S., The Univ. of Kentucky, 1968; Ph.D. Texas A & M Univ., 1973.

EISENBACH, Jonathan D. (1985), Prof. of Plant Pathology. B.S. Bryan College, 1974; Ph.D., North Carolina State Univ., 1979.

EKIRCH, A. Roger (1977), Prof. of History. A.B., Dartmouth, 1972; M.A., Johns Hopkins, 1974; Ph.D., Johns Hopkins, 1978<sup>6</sup>.

EKKAD, Srinath (2007), Prof. of Mechanical Engineering. B.Tech, Jawaharlal Nehru Technological Univ., 1989; M.S., Arizona State Univ., 1991; Ph.D., Texas A & M Univ., 1995.

EL-KADI, Samer W. (2012), Asst. Prof. of Animal and Poultry Sciences. B.S., American Univ. of Beirut, 1998; M.S., American Univ. of Beirut, 2000; Ph.D., Univ. of Maryland, 2006.

ELGART, Alexander (2007), Asst. Prof. of Mathematics. B.S., Technion, Israel 1998; Ph.D., Technion, Israel, 2000.

ELGERT, Klaus D. (1974), Prof. of Immunology. B.S., Evangel, 1970; Ph.D., Univ. of Missouri, 1973.

ELLERBROCK, Michael J. (1992), Prof. of Agricultural and Applied Economics. B.S., Texas A&M, 1974; M.R.P.A., Clemson, 1975; Ph.D., Clemson, 1980.<sup>2,4</sup>

ELLINGSON, Steven (2003), Assoc. Prof. of Electrical and Computer Engineering. B.S., Clarkson, 1987; M.S., Ohio State, 1989; Ph.D., Ohio State, 2000.

ELLIS, Kimberly P. (1996), Assoc. Prof. of Industrial and Systems Engineering. B.S., Univ. of Tennessee, 1986; M.S., Univ. of Tennessee, 1990; Ph.D., Georgia Institute of Technology, 1996. <sup>4</sup>

ELLIS, Michael W. (1996), Assoc. Prof. of Mechanical Engineering. B.S., Univ. of Tennessee, 1985; M.S., Georgia Tech, 1993; Ph.D., Georgia Tech, 1996.

ELLISON, Ryan (2009), Lead DBA & Application Administrator. B.S. Bluefield State College, 1998.

ELVINGER, Francois (1997), Prof. of Large Animal Clinical Sciences. Vet., Hannover Veterinary School, Germany, 1981; Dr. Med. Vet., Hannover Veterinary School, 1983; Ph.D., Florida, 1990; Diplomate, A.C.V.P.M.

ELY, Alan D. (2012), B.S. Assoc. Prof. of Animal and Poultry Sciences. B.S., Pennsylvania State Univ., 1987; M.S. Michigan State Univ., 1990, Ph.D., Univ. of Florida, 1994.

EMMEL, JoAnn M. (1997), Assoc. Prof. of Apparel, Housing, and Resource Management. B.S., Iowa State Univ., 1970; M.S., Iowa State Univ., 1979; Ph.D., New Mexico State Univ., 1995.

EMMONS, Paul (1998), Assoc. Prof. of Architecture. M. Arch., Univ. of Minnesota, 1984; B.S., Univ. of Wisconsin-Eau Claire, 1979; Ph.D., Univ. of Pennsylvania, 2003.

ENG, Ludeman A. (1981), Assoc. Prof. of Biomedical Sciences and Pathobiology. B.A., Rutgers, 1970; M.A., Virginia, 1973; Ph.D., Virginia, 1978.<sup>8</sup>

ERIKSSON, Kenneth A. (1981), Prof. of Geosciences. B.S., Univ. of Witwatersrand, 1967; M.S., Univ. of Witwatersrand, 1972; Ph.D., Univ. of Witwatersrand, 1977.

ERMMAN, Michael (2001), Assoc. Prof. of Architecture. B.S., Tulane Univ., 1995; M.Arch., Univ. of Florida, 2000.

ERNST, Jeremy V. (2011), Asst. Prof. of Education. B.S., Clemson Univ., 2003; M.Ed., North Carolina State Univ., 2004; Ed.D., North Carolina State Univ., 2006.

ERVIN, Erik H. (2001), Prof. of Crop and Soil Environmental Sciences. B.S., Iowa State, 1989; M.A., Colorado, 1992; M.S., Colorado State, 1995; Ph.D., Colorado State, 1998.

ERVINE, Michelle D. (2009), Application Administrator. B.B.A., Radford Univ., 1991; MBA, Averett Univ., 1996.

ESKA, Charlene M. (2006), Asst. Prof. of English. A.L.B., Harvard Extension School, 1998; M.St., Oxford Univ., 1999; A.M., Harvard Univ., 2002; Ph.D., Harvard Univ., 2006.

ESKA, Joseph F. (1993), Prof. of English. B.A., Rutgers Univ., 1981; M.A., Univ. of Toronto, 1983; Ph.D., Univ. of Toronto, 1988.

ESKER, Alan R. (1999), Prof. of Chemistry. B.S., Univ. of Wisc.-Madison, 1991; Ph.D., Univ. of Wisc.-Madison, 1996.

ESPINOZA, Juan P. (2007), Asst. Director of Undergraduate Admissions. B.A., Virginia Tech, 2004; M.S., Radford Univ., 2010.

ESTABROOKS, Paul A. (2007), Prof. of Human Nutrition, Foods and Exercise. B.P.E., Univ. of Calgary, 1993; M.S., Univ. of Calgary, 1996; Ph.D., Univ. of Western Ontario, 1999.

ESTIENNE, Mark J. (1999), Prof. of Animal and Poultry Sciences. B.S., Virginia Tech, 1982; M.S., Virginia Tech, 1984; Ph.D., Univ. of Georgia, 1987.

ETZKORN, Felicia A. (2000), Prof. of Chemistry. B.S., Southwest Missouri State Univ., 1981; Ph.D., Univ. of California (Berkeley), 1991.

EVANS, Heather (2010), Director of Fraternity and Sorority Life, Student Affairs, B.B.A., College of William and Mary, 1998; M.B.A., Radford Univ., 2006.

EVANS, Jackson E. (2000), Advanced Instructor of Biology. B.S., Univ. of Nevada Reno, 1986; M.A., Virginia Tech, 1998; Ph.D., Virginia Tech, 2009.

EVANS, Michael (2005), Assoc. Prof. of Education. B.A., Univ. of West Florida, 1986; M.A., Univ. of West Florida, 1989; Ph.D., Indiana Univ., 2004.

EVANYLO, Gregory K. (1985), Prof. of Crop and Soil Environmental Sciences. B.A., Connecticut, 1974; M.S., Massachusetts, 1978; Ph.D., Georgia, 1982.

EVERSOLE, Dan E. (1984), Assoc. Prof. of Animal and Poultry Sciences. B.S., Ohio State, 1973; Ph.D., Michigan State, 1978.

EVIA, Carlos (2004), Assoc. Prof. of English. L.C.C., Instituto de Ciencias Sociales de Merida (Mexico), 1995; M.S.C., Universidad La Salle (Mexico), 1999; Ph.D., Texas Tech Univ., 2004.

EVRENOSOGU, C. Yaman (2011), Asst. Prof. of Electrical and Computer Engineering. B.S., Istanbul Technical Univ., 1998; M.S., Istanbul Technical Univ., 2001; Ph.D., Texas A&M Univ., 2006.

EWING, E. Thomas (1998), Assoc. Prof. of History and Assoc. Dean for Graduate Studies and Research, Liberal Arts and Human Sciencs., B.A. Williams College, 1987; M.A., Ph.D., Michigan, 1994.

EYESTONE, Jr., Williard H. (2000), Research Assoc. Prof. of Large Animal Clinical Sciences. Ph.D., Wisconsin, 1989; M.S., Wisconsin, 1981; B.S., Univ. of Missouri, 1976.

FALCO, Edward (1984), Prof. of English. B.A., State Univ. of New York at New Paltz, 1970; M.A., Syracuse Univ., 1979.

FALCONIER, Mariana (2008), Asst. Prof. of Human Development. Licenciante, Univ. of Buenos Aires, 1992; M.S., Univ. of Maryland, 2002; Ph.D., Univ. of Maryland, 2005.

FALKINHAM, III, Joseph O. (1974), Prof. of Microbiology. A.B., California, 1964; Ph.D., California, 1969.

FAN, Weiguo (2002), Prof. of Accounting and Information Systems. B.E., Xi'an Jiaotong, 1995; M.S., National Univ. of Singapore, 1998; Ph.D., Michigan, 2002.

FANSLER, Gregory T. (2007), Assoc. Director, Alumni Relations. B.S., Virginia Tech, 2002; M.B.A., Virginia Tech, 2010.

FARHOOD, Mazen (2008), Asst. Prof. of Aerospace and Ocean Engineering. B.Engr., American Univ. of Beirut, 1999; M.S., Univ. of Illinois at Urbana-Champaign, 2001; Ph.D., Univ. of Illinois at Urbana-Champaign, 2005.

FARKAS, Diana (1982), Prof. of Materials Science and Engineering. B.S., Physics Inst. at Bariloche (Argentina), 1975; Ph.D., Univ. of Delaware, 1980.

FARRAH, Duncan (2012), Asst. Prof. of Physics. M.S., Imperial College London, 1998; Ph.D., Imperial College London, 2002.

FARRAR, Hayward (1992), Assoc. Prof. of History. B.A., Maryland, 1970; M.A., Chicago, 1971; Ph.D., Chicago, 1983.

FAULKNER, Theodore (1998), Senior Assoc. Director of Dining Services, Student Affairs, A.S., Jamestown Community College, 1982; B.S. Virginia Tech, 1987.

FEIERTAG, Howard (1989), Lecturer of Hospitality and Tourism Management. B.S., Michigan State Univ., 1952.

FELL, Richard D. (1979), Prof. of Entomology. B.A., Pennsylvania, 1972; M.S., Cornell, 1977; Ph.D., Cornell, 1979.<sup>2,3,8</sup>

FENG, Wu-chun (2006), Assoc. Prof. of Computer Science. B.S., Penn. State, 1988; B.S., Penn. State, 1988; M.S., Penn. State, 1990; Ph. D., Univ. of Illinois, Urbana-Champaign, 1996.

FENSKE, Larry (2010), Prof. of Practice. M.F.A., Purdue Univ., 2010.

FERNÁNDEZ-VÁZQUEZ, Antonio A. (1979), Emeritus Assoc. Prof. of Spanish. B.A., St. Andrews, 1971; M.A., Kentucky, 1973; Ph.D., Kentucky, 1978.  
2, 3

FERREIRA, Gustavo (2010), Instructor of Agricultural and Applied Economics. B.S., Universidade Lusitana, Oporto, Portugal, 2000; Master of Business Administration, McNeese State Univ., 2003; Ph.D. Minor in Economics, Louisiana State Univ., 2007; Ph.D., Louisiana State Univ., 2009.

FERRIS, John B. (2005), Assoc. Prof. of Mechanical Engineering. B.S., Carnegie Mellon, 1990; M.S., Univ. of Michigan, 1992; Ph.D., Univ. of Michigan, 1996.

FEUERSTEIN, Marcia F. (1996), Assoc. Prof. of Architecture. B.S., Tufts Univ., 1975; M.Arch, State Univ. of New York at Buffalo, 1981; M.S. in Architecture, Univ. of Pennsylvania, 1996; Ph.D. in Architecture, Univ. of Pennsylvania, 1998.

FEW-DEMO, April L. (2000), Assoc. Prof. of Human Development. B.A., Univ. of Georgia, 1991; M.A., Monterey Institute of International Studies, 1993; Ph.D., Univ. of Georgia, 1999.

FIKE, John H. (2000), Assoc. Prof. of Crop and Soil Environmental Sciences. B.S., Wake Forest, 1988; M.S., Virginia Tech, 1995; Ph.D., Florida, 1999.

FILE, Haley B. (2011), Asst. Director of Undergraduate Admissions. B.A., Virginia Tech, 2007; M.Ed., Vanderbilt Univ., 2011.

FILZ, George M. (1992), Charles E. Via, Jr., Prof. of Civil and Environmental Engineering. B.S., Oregon State Univ., 1979; M.S., Oregon State Univ., 1981; Ph.D., Virginia Tech, 1992; P.E.<sup>3</sup>

FINE, Elizabeth C. (1979), Prof. of Communication and Humanities; Department of Religion and Culture. B.S., Univ. of Texas, 1971; M.A., Univ. of California-Berkeley, 1973; Ph.D., Univ. of Texas, 1978.

FINKELSTEIN, Carla (2005), Assoc. Prof. of Molecular and Cellular Biology. B.S., Univ. of Buenos Aires, 1992; Ph.D., Univ. of Buenos Aires, 1998.

FINN, Mary (2002), Asst. Prof.; Library. B.A., Univ. of Detroit Mercy, 1994; M.L.I.S., Wayne State Univ., 1999.

FINNEY, Jack W. (1987), Prof. of Psychology and Assoc. Provost for Faculty Affairs. B.A., West Virginia Univ., 1976; M.A., West Virginia Univ., 1978; M. A., Univ. of Kansas, 1981; Ph.D., Univ. of Kansas, 1983.

FISHER, Patti (2007), Asst. Prof. of Apparel, Housing, and Resource Management. B.S., Indiana Univ. of Pennsylvania, 2000; M.S., The Ohio State Univ., 2003; Ph.D., The Ohio State Univ., 2006.

FLANAGAN, Elizabeth A. (2000), Vice President for Development and Univ. Relations. B.A., Bethany College, 1974; M.S.W., West Virginia Univ., 1976; Ph.D., UVa., 1983.

FLINCHUM, Wendell R. (1985), Chief of Police and Director of Campus Security. B.S., Bluefield College, 2007.

FLINTSCH, Gerardo W. (1997), Prof. of Civil and Environmental Engineering, B.S., Universidad Mayor del Uruguay, 1986; M.S., Arizona State Univ., 1991; Ph.D., Arizona State Univ., 1996; P.E.

FLORA, Bethany H. (2007), Asst. Provost. B.A., Univ. of Virginia's College at Wise, 1996; M.A., Tusculum College, 1999; Ph.D., Virginia Tech, 2008.

FLOWERS, James A. (2004), Director, VT KnowledgeWorks; B.A., Wesleyan Univ. 1965; M.B.A. Univ. of Rochester, 1967.

FLOYD, John M. (1977), Assoc. Prof. of Music. B.M., East Carolina, 1973; M.M., VCU, 1974; D.M.A., Eastman, 1980.

FLOYD, William J. (1983), Prof. of Mathematics. B.A., UNC, 1974; M.A., Princeton, 1976; Ph.D., Princeton, 1978.

FOLKART, Jessica A. (1998), Assoc. Prof. of Spanish. B.A., William and Mary, 1991; M.A., Kansas, 1993; Ph.D., Kansas, 1998.

FONTAINE, Sherry (2010), Assoc. Dean, Graduate School in the National Capital Region and Director of the Northern Virginia Center. B.A., Lehigh Univ., 1972; M.R.P., Cornell Univ., 1980; Ph.D., Cornell Univ., 1985.

FORD, W. Mark (2010). Unit Leader, Virginia Cooperative Fish and Wildlife Research Unit. B.S., Univ. of Tennessee, 1987; M.S., Mississippi State Univ., 1989; Ph.D., Univ. of Georgia, 1994.

FORNEY, Daniel P. (2009), Prof. of Naval Science. CAPT, U.S. Navy. B.S., U.S. Naval Academy, 1983; M.S., Troy Univ., 1998.

FORSTEN WILLIAMS, Kimberly E. (1995), Affiliated Research Faculty in Chemical Engineering. B.S., Virginia Tech, 1988; M.S.E., Pennsylvania, 1990; Ph.D., Illinois/Urbana, 1993.

FOTI, Roseanne J. (1985), Assoc. Prof. of Psychology. B.A., Millersville State, 1976; M.A., Univ. of Akron, 1981; Ph.D., Univ. of Akron, 1983.<sup>2,7</sup>

FOUST, Kevin L. (2011), Deputy Chief of Police and Assistant Director of Security. B.A., Grove City College, 1982.

FOUTZ, Patricia B. (1976), Coordinator, Alumni Relations. B.S., Ohio St., 1969; M.S., Ohio St., 1972.

FOWLER, Shelli B. (2002), Assoc. Prof. of English. B.A., San Jose State Univ., 1984; M.A., Univ. of Texas at Austin, 1987; Ph.D., Univ. of Texas at Austin, 1992.

FOWLER, Virginia C. (1977), Prof. of English. B.A., Univ. of Kentucky, 1969; M.A., Univ. of Pittsburgh, 1971; Ph.D., Univ. of Pittsburgh, 1976.<sup>1</sup>

FOX, Edward A. (1983), Prof. of Computer Science. B.S., MIT, 1972; M.S., Cornell, 1981; Ph.D., Cornell, 1983.

FOX, Laurie (1996). Research Assoc., Horticulture. B.S., NC State, 1990; M.S., NC State, 1993.

FOX, Thomas R. (2000), Prof. of Silviculture. B.S., Maine, 1980; M.S., Virginia Tech, 1984; Ph.D., Florida, 1989.

FRAME, W. Hunter (2012), Asst. Prof. of Crop and Soil Environmental Sciences. B.S., Virginia Tech, 2007. M.S., Univ. of Tennessee, 2009. Ph.D., Virginia Tech, 2012.

FRANCIS, Nathan B. (2011), Online Learning & Col Svs Tech. B.A. Virginia Tech, 2003.

FRANCK, Christopher (2010), Asst. Director of LISA and Asst. Research Prof. B.S., Virginia Tech, 2005; M.S., North Carolina State Univ., 2007 ; Ph.D., North Carolina State Univ., 2010.

FRANK, Tim. (2011), Visiting Instructor, Architecture; B. Arch., Virginia Tech, 2000; M. Arch., Georgia Institute of Technology, 2004.

FRANKLIN, Lance (2008), Director for Environmental Health and Safety. B.A., 1986, M.S., 1988, M.S.C.E., 1996; Ph.D., Wayne State Univ., 2005.

FRANKLIN, Thenus T. (2007), Upward Bound Counselor. B.S., Virginia Tech, 2003; M.S., Virginia Tech, 2007.

FRANKLIN, Thomas J. (2012), Asst. Prof. of Naval Science. LT, U.S. Navy. B.A., San Diego State Univ., 2006.

FRASER, James D. (1981), Prof. of Wildlife Management. B.S., Idaho, 1974; M.S., Minnesota, 1978; Ph.D., Minnesota, 1981.

FRAZIER, Charles E. (1992), Thomas M. Brooks Prof. of Sustainable Biomaterials. B.S., Virginia Tech, 1985; M.S., Washington, 1987; Ph.D., Virginia Tech, 1992.

FREEMAN, Josh (2007). Asst. Prof., Horticulture. B. S., Clemson, 2002; Ph.D., Univ. of Florida, Gainesville, 2007.

FREEMAN, Larry E. (1978), Assoc. Prof. of Biomedical Sciences & Pathobiology. B.S., Wake Forest, 1970; D.V.M., Oklahoma State, 1974; M.S., Oklahoma State, 1977.

FRENCH, J. Lawrence (1987), Assoc. Prof. of Management. B.A., Wesleyan Univ., 1965; M.A., Maryland, 1967; M.S., MIT, 1971; Ph.D., Cornell, 1977. (Northern Virginia Center)

FRIEDEL, Curtis R. (2010), Asst. Prof. of Agricultural and Extension Education. B.S., Northwest Missouri State Univ., 1999; Ph.D., Univ. of Florida, 2006.

FRIEDLANDER, Michael J. (2010), Prof. of Biology and Director, Virginia Tech Carilion Research Institute. B.S., Florida State Univ., 1972; Ph.D., Univ. of Illinois, 1978; Postdoctoral Fellow, Univ. of Virginia, 1979.

FRIEDMAN, Bruce H. (1996), Assoc. Prof. of Psychology. B.A., Case Western Reserve Univ., 1985; M.S., Pennsylvania State Univ., 1989; Ph.D., Pennsylvania State Univ., 1992.

FRIMPONG, Emmanuel (2007), Asst. Prof. of Fisheries Science. B.S., Univ. of Science and Technology, Ghana, 1997; M.S., Univ. of Arkansas, 2001; Ph.D., Purdue Univ., 2005.

FRISARD, Madlyn I. (2006), Asst. Prof. of Human Nutrition, Foods and Exercise. B.S., Louisiana State Univ., 1997; M.S., Louisiana State Univ., 1999; Ph.D., Louisiana State Univ., 2005.

FRITZ, Alex (2012). Director of Development, Pamplin College of Business. B.S. Virginia Tech, 1994.

FRITZ, Matthew S. (2008), Asst. Prof. of Psychology. B.S., Oregon State Univ., 2002; M.S., Arizona State Univ., 2005; Ph.D., Arizona State Univ., 2007.

FROST, Serena (2004), Advanced Instructor of English. B.A., Radford Univ., 2001; M.A., Radford Univ., 2004.

FU, Victoria R. (1972), Prof. of Human Development. B.S., Univ. of North Carolina, Greensboro, 1965; M.S., Univ. of North Carolina, Greensboro, 1970; Ph.D., Univ. of North Carolina, Greensboro, 1974.

FUHRMAN, Ellsworth R. (1975), Prof. of Sociology and Science and Technology in Society. B.A., Millersville State, 1971; M.A., Penn State, 1973; Ph.D., Penn State, 1975.<sup>2,7,8</sup>

FUKAO, Takeshi. (2012), Asst. Prof. of Crop and Soil Environmental Sciences. B.S. Kyoto Prefectural Univ., Japan 1996; M.S. Kyoto Univ., Japan 1998; Ph.D. Texas A&M Univ., 2002.

FULLER, Christopher R. (1983), Samuel P. Langley Prof. of Mechanical Engineering. B.S., Adelaide, 1973; Ph.D., Adelaide, 1979.<sup>6</sup>

FULLER, Theodore D. (1978), Prof. of Sociology. B.S., Purdue, 1971; M.A., Michigan, 1972; Ph.D., Michigan, 1977.

FULTON, Deborah M. (2006), Assoc. VP for Enterprise Systems. B.S., Mississippi State Univ., 1978; M.C.S., Mississippi State Univ., 1984.

FURR, Martin O. (1989), Prof. and Adelaide C. Riggs Chair in Equine Medicine, Marion duPont Scott Equine Medical Center. D.V.M., Oklahoma State Univ., 1986; Diplomate, A.C.V.I.M., Ph.D., Univ. of Maryland, 2000.

FURUKAWA, Tomonani (2008), Prof. of Mechanical Engineering. B.S., Waseda Univ., 1990; M.S., Univ. of Sydney, 1991; Ph.D., Univ. of Sydney, 1993; Ph.D., Univ. of Tokyo, 1995.

GABLER, H. Clay (2005), Assoc. Prof. of Biomedical Engineering. B.S., UVA, 1976; M.E., UVA, 1980; M.A., Princeton Univ., 1994; Ph.D., Princeton Univ., 1998.

GABRIELE, Matthew (2006), Assoc. Prof.; Department of Religion and Culture. B.A., Univ. of Delaware, 1997; M.A., Univ. of California-Berkeley, 1998; Ph.D., Univ. of California-Berkeley, 2005.

GALBRAITH, John M. (1999), Assoc. Prof. of Crop and Soil Environmental Sciences. B.S., Texas Tech, 1978; M.S., Texas Tech, 1983; Ph.D., Cornell, 1997.

GALLAGHER, Daniel L. (1987), Assoc. Prof. of Civil and Environmental Engineering. B.S., Drexel Univ., 1979; M.S., Drexel Univ., 1981; Ph.D., Univ. of North Carolina at Chapel Hill, 1986; P.E.

GALLAGHER, Karen (2005), Asst. Director, Child Development Center and Instructor of Human Development. B.S., Virginia Tech, 1995; M.A.Ed., Virginia Tech, 2004.

GALLOWAY, William (1990), Director, School of Architecture + Design, Assoc. Prof. of Architecture. M.Arch., Virginia Tech, 1993; B.Des. in Arch., Univ. of Florida, 1981.

GALWAY, Alison (2000), Director, Adult Day Services, and Advanced Instructor in Human Development. B.A., Douglass College, 1969; M.S., Virginia Tech, 1994; Ph.D., Virginia Tech, 1998.

GANDOUR, Richard D. (1993), Prof. of Chemistry. B.S., Wheeling, 1967; Ph.D., Rice, 1972.

GANSHIRT, Christian, (2011), Asst. Prof. of Architecture; Architecture diploma, Karlsruhe Univ., 1990; Dr.-Ing.(Ph.D. engineering), Brandenburg Univ. of Technology, 2007.

GARDNER, Mark K. (2006), Network Research Manager, Telecommunications Auxiliary. B.S., Brigham Young Univ., 1986; M.S., Brigham Young Univ., 1993; Ph.D., Univ. of Illinois, Chicago, 1999.

GARDNER, Thomas M. (1982), Alumni Distinguished Prof. and Prof. of English. B.A., Bucknell Univ., 1974; M.A., Syracuse Univ., 1976; Ph.D., Univ. of Wisconsin, 1982.2, 3, 7, 9, 10

GARNER, H. R., Jr. (2009), Prof. of Biology. B.S., Univ. of Missouri – Rolla, 1976; M.S., Univ. of Wisconsin, 1978; Ph.D., Univ. of Wisconsin, 1982.

GARRISON, James W. (1985), Prof. of Education. B.A., Central Florida, 1973; B.S., FSU, 1981; M.A., FSU, 1979; M.A., FSU, 1980; Ph.D., FSU, 1981.

GARST, Barry A. (2001), Affiliate Asst. Prof. of Agricultural and Extension Education. B.S., Virginia Tech, 1993; M.S., Arizona State Univ., 1998; Ph.D., Virginia Tech, 2005.

GARST, Winfred J. Jr. (2009), ATS Manager/Chief Pilot. B.A., Old Dominion Univ., 1971; M.A. Naval Postgraduate School, 1980; Ph.D, Virginia Tech, 2009.

GARTNER, H. Scott (1989), Assoc. Prof. of Architecture. B.Arch., Univ. of Houston, 1983; M.Des.S., Harvard, 1988.

GARVIN, Michael J. (2005), Charles E. Via Jr. Asst. Prof. of Myers-Lawson School of Construction, B.S. United States Military Academy, 1989, M. S. Massachusetts Institute of Technology, 1995, Ph.D., Massachusetts Institute of Technology, 2001, P.E.

GASKILL, LuAnn R. (2000), Prof. of Apparel, Housing, and Resource Management. B.S., Bowling Green St., Univ., 1978; M.S., Ohio Univ., 1982; Ph.D., Ohio St. Univ., 1988.

GAUGHAN, Earl M. (2011), Clinical Professor of Large Animal Clinical Sciences. B.S., Virginia Tech, (1977); DVM, Univ. of Georgia (1981); Diplomate ACVS.

GAY, Keith W. (2006), Asst. Prof. of Aerospace Studies, Air Force ROTC. B.S., Virginia Tech, 1980; M.S., Radford Univ., 1981.

GAZEL, Estaban (2011), Asst. Prof. of Geosciences. B.S., Univ. of Costa Rica, 2004; Ph.D., Rutgers Univ., 2009.

GE, Suquin, (2006), Asst. Prof. of Economics. B.E., Southeast Univ., 1997; M.A., Fudan Univ., 2000; Ph.D., Univ. of Minnesota, 2006.

GEHRT, Karen R. (2006), Assoc. Director, Family and Consumer Science, Extension. B.S., Illinois State Univ., 1973; M.S., Univ. of Illinois, 1981; Ed.D., Univ. of Illinois, 1994.

GELLER, E. Scott (1969), Alumni Distinguished Professor of Psychology. B.A., Wooster, 1964; M.A., Southern Illinois Univ., 1967; Ph.D., Southern Illinois University, 1969.2,3,4,6,7,9

GEORGE, Diana (2005), Prof. of English. A.B., Univ. of Missouri, 1970; M.A., Univ. of Missouri, 1972; Ph.D., Univ. of Missouri, 1981.

GERMANA, Joseph (1965), Assoc. Prof. of Psychology. B.S. Fordham Univ., 1961; M.S., Rutgers Univ., 1964; Ph.D., Rutgers Univ., 1965.

GERRARD, David E. (2009), Prof. and Department Head of Animal and Poultry Sciences. B.S., Purdue Univ., 1983; M.S., Purdue Univ., 1985; Ph.D., Purdue Univ., 1992.

GESS, Mark A. (2010), Assoc. Univ. Legal Counsel. B.S., Radford Univ. 2001; J.D., Appalachian School of Law, 2005.

GEYER, L. Leon (1981), Prof. of Agricultural and Applied Economics. B.S., Purdue, 1969; Ph.D., Minnesota, 1981; J.D., Notre Dame, 1973.1,8

GHANDFOROUSH, Parviz (1981), Prof. of Business Information Technology, Director, M.B.A. Program, Northern Virginia Graduate Center, and Managing Director, Master of Information Technology, Pamplin College of Business. B.S.E.E., Texas, 1974; M.B.A., Texas, 1977; D.B.A., Texas Tech,

1980. (Northern Virginia Center)

GIBBS, Jared (2010). Instructor of English. B.A., Virginia Tech, 2004; M.A., Virginia Tech, 2010.

GIBSON, Harry W. (1986), Prof. of Chemistry. B.S., Clarkson, 1962; Ph.D., Clarkson, 1966.<sup>6</sup>

GILBERT, Bonnie L. (2006), Director of Alumni and Pamplin Relations, Pamplin College of Business. B.S., Bluefield College, 1996; M.S., Virginia Tech, 2000.

GILBERT, Elizabeth R. (2011), Asst. Prof. of Animal and Poultry Sciences. B.S., Virginia Tech, 2003; M.S., Virginia Tech, 2005; Ph.D., Virginia Tech, 2008.

GILE, Roxanne L. (2001), Assoc. Director and Senior Research Analyst, Institutional Research & Effectiveness. B.S., Old Dominion Univ., 1989; M.A., Univ. of Rochester, 1993.

GILL, Benjamin C. (2012) Asst. Prof. of Geosciences. B.S., University of Missouri, 2004; Ph.D., University of California at Riverside, 2009.

GILLASPY, Glenda E. (1998), Prof. of Biochemistry. B.S., Auburn, 1985; Ph.D., Case Western Reserve, 1991.

GILLES, Robert P. (1991), Prof. of Economics. Candidate, Tilburg, 1983; Ph.D., Tilburg, 1990.

GILLIAN, Theresea (2004), Instructor of Biomedical Sciences & Pathobiology. B.S., Northern Kentucky Univ., 1999; M.S., Univ. of North Carolina, 2004.

GILLMAN, Laura J. (1989), Assoc. Prof. of Women's Studies in the Department of Sociology. B.A. Univ. of California, San Diego (1976); M.A. New York Univ. (1979); Ph.D., Univ. of Wisconsin, 1988.

GINDLESBERGER, Hans (2012), Asst. Prof. of Art. B.F.A., Bowling Green State Univ., 2004; M.F.A. State Univ. of New York at Buffalo, 2006

GIOVANNI, Nikki (1987), Univ. Distinguished Prof. and Prof. of English. B.A., Fisk Univ., 1967.

GIRMES-GRIECO, Nicolin (2008), Instructor of Human Nutrition, Foods and Exercise. M.S., Virginia Tech, 2001.

GITTENS, Cheryl (2006), Director, McNair Scholars Program. B.A., Rutgers Univ., 1990; M.S.W., Rutgers Univ., 1991.

GLASS, Martha (2010), Assoc. Director of Administration for Assessment, Division of Student Affairs. B.S., Radford Univ., 1996; M.S., Virginia Tech, 1999; Ph.D., Virginia Tech, 2010.

GLASS, Valerie (2010). Visiting Asst. Prof. of Human Development. B.S., Univ. of North Carolina at Greensboro, 1994; M.S., East Carolina Univ. 2001; Ph.D., Virginia Tech, 2010.

GLASSON, George E. (1986), Prof. of Education. B.A., Duke Univ., 1973; M.A.T., Duke Univ., 1975; Ph.D., UNC, 1986.

GLATT-HOLTZ, Nathan (2013), Asst. Prof. of Mathematics. B.A., Univ. of California, Berkeley, 2003; Ph.D., Univ. of Southern California, 2008.

GLAZEBROOK, W. James (1975), Assoc. Prof. of Music. B.A., San Diego State Univ., 1963; M.A., Univ. of Iowa, 1971.

GLENN, William (2005), Assoc. Prof. of Education (National Capital Region). B.A., Univ. of California, San Diego, 1988; J.D., Univ. of California, Berkeley; M.A., California State Univ., Los Angeles, 2002; Ph.D., Univ. of Southern California, 2005.

GNYAWALI, Devi R. (1997), Prof. of Management. B.S., Tribhuvan (Nepal), 1979; MBA, Tribhuvan (Nepal), 1983; Ph.D., Pittsburgh, 1997.

GOATLEY, Jr., J. Michael (2004), Prof. of Crop and Soil Environmental Sciences. B.S., Kentucky, 1983; M.S. Kentucky, 1986; Ph.D., Virginia Tech, 1988.

GODREJ, Adil N. (1989), Assoc. Research Prof. of Civil and Environmental Engineering. B.E., Birla Institute of Technology and Science, 1980; M.S., Virginia Tech, 1982; Ph.D., Virginia Tech, 1989. (Nat. Capital Region campus)

GOFF, Richard M. (1996), Assoc. Prof. and Asst. Head of the Department of Engineering Education. , B.S., VPI, 1967; M.S., Virginia Tech, 1976; Ph.D., Virginia Tech, 1981.<sup>2,3,4,10</sup>

GOLDBECK, Kyrille (2005), Instructor; Library. B.S., Univ. of Wisconsin, 1998; M.L.S., Univ. of Maryland, 2004.

GOLDSTEIN, A. (1999), Assoc. Prof. of Chemical Engineering. B.S., Univ. of California, 1990; Ph.D., Carnegie Mellon Univ., 1997.

GOLPARVAR-FARD, Mani (2010), Asst. Prof. of Civil and Environmental Engineering. B.S., Iran Univ. of Sci. & Tech., 2002; M.S., Iran Univ. of Sci. & Tech., 2005; M.A.Sc., Univ. British Columbia, 2006; M.C.S., Univ. of Illinois, Urbana-Champaign, 2010; Ph.D., Univ. of Illinois, Urbana-Champaign, 2010.

GOOD, Deborah J. (2006), Assoc. Prof. of Human Nutrition, Foods and Exercise. B.S., State Univ. of New York, 1987; Ph.D., Northwestern Univ., 1992.

GOODELL, Barry (2011), Prof. and Department Head of Sustainable Biomaterials. B.S., Univ. of New Hampshire; M.S., Oregon State Univ., 1979; Ph.D., Oregon State Univ., 1983.

GOODEN, Susan (1997), Assoc. Prof. of Public Administration and Policy. B.A., Virginia Tech, 1990; M.A., Virginia Tech, 1992; M.A., Syracuse Univ., 1995; Ph.D., Syracuse Univ., 1996.

GOSS, Rosemary C. (1976), Prof. of Apparel, Housing, and Resource Management. B.S., Concord, 1974; M.S., Virginia Tech, 1976; Ph.D., FSU, 1982.

GOVE, Steven F. (2008), Asst. Prof. of Management. B.S., Keene State College, 1990; Ph.D., Arizona State, 2004.

GRABAU, Elizabeth A. (1990), Prof. and Department Head of Plant Pathology, Physiology and Weed Science. B.S., Purdue, 1974; Ph.D., Univ. of California, San Diego, 1981.

GRACANIN, Denis (1999), Assoc. Prof. of Computer Science. B.Sc., Univ. of Zagreb, 1985; B.Sc., Univ. of Zagreb, 1986; M.Sc., Univ. of Zagreb, 1988; M.Sc., Univ. of Southwestern Louisiana, 1992; Ph.D., Univ. of Southwestern Louisiana, 1994.

GRACE, Mary T. (2004), Asst. Director of Multicultural Programs & Services, UUSA. B.A., William & Mary, 1997; M.Ed., Virginia Tech, 2002.

GRAHAM, Kathryn V. (1987), Senior Instructor of English. B.A., Queens College, 1973; M.A., Virginia Tech, 1983.

GRAHAM, Peter W. (1978), Prof. of English. A.B., Davidson College, 1973; M.A., Duke Univ., 1974; Ph.D., Duke Univ., 1977.

GRANATA, Linda A. (2004). Undergraduate Advisor, Food Science and Technology. B.S. Purdue Univ., 1987; M.S. The Ohio State Univ., 1995.

GRANGE, Robert W. (1999), Assoc. Prof. of Human Nutrition, Foods and Exercise. B.Ed. British Columbia, 1979; M.S., Washington, 1984; Ph.D., Waterloo, 1993.

GRANT, Alan L. (2009), Dean, College of Agriculture and Life Sciences. B.S., Cornell Univ., 1984; M.S. Michigan State Univ., 1987; Ph.D., Michigan State Univ., 1990.

GRANT, David C. (2005), Assoc. Prof. of Small Animal Clinical Sciences. B.S, Virginia Tech; D.V.M., Univ. of Florida, 1999; M.S., Virginia Tech, 2003; Diplomate A.C.V.I.M (Internal Medicine).

GRANT, Jason H. (2007), Asst. Prof. of Agricultural and Applied Economics. B.A., Univ. of Lethbridge, Alberta, Canada, 2000; M.S., Univ. of Guelph, Ontario, Canada, 2003; Ph.D., Purdue Univ., 2007.

GRASLEY, Zachary C. (2012), Assoc. Prof. of Civil and Environmental Engineering. B.S., Michigan Tech Univ., 2001; M.S., Univ. of Illinois, Urbana-Champaign, 2003; Ph.D., Univ. of Illinois, Urbana-Champaign, 2006.

GRAVES, Ellington T. (2000), Advanced Instructor of Sociology. B.A., The Johns Hopkins Univ., 1990; M.S. Virginia Tech, 1992; ABD, UNC- Chapel Hill, 2001.

GREEN, Julie M. (2005), Research Asst. Prof. of Biomedical Sciences and Pathobiology. B.S., James Madison Univ., 1995; D.V.M., Virginia Tech, 1999; M.S., Virginia Tech, 2004.

GREEN, Russel A. (2008), Assoc. Prof. of Civil and Environmental Engineering. B.S., Rensselaer Polytechnic Institute, 1992; M.S., Univ. of Illinois, Urbana-Champaign, 1994; Ph.D., Virginia Tech, 2001; P.E.

GREEN, William R. (1992), Assoc. Prof. of Architecture and Industrial Design. B.S., Western Washington Univ.; M.Arch., Univ. of California at Berkeley, 1988.

GREGG, Michael H. (1992), Assoc. Prof. of Engineering Education. B.S., Bucknell Univ., 1969; M.S., Bucknell Univ., 1974.

GREINER, Scott P. (1998), Prof. of Animal and Poultry Sciences. B.S., Iowa State, 1989; M.S., Michigan State, 1993; Ph.D., Iowa State, 1998.<sup>5</sup>

GRENE, Ruth (1988), Prof. of Plant Physiology. B.S., Trinity College, 1965; M.A., Washington Univ., 1968; Ph.D., Univ. of California, Davis, 1972.

GRIFFEY, Carl A. (1989), W. G. Wysor Professor. Crop and Soil Environmental Sciences. B.S., Tennessee, 1981; M.S., Washington State, 1984; Ph. D., Nebraska, 1987.

GRIFFIN, Kelly L. (2009), Asst. Director, Alumni Relations. B.S., Virginia Tech, 2007.

GRIMES, Jessica (2006), Assoc. Director for Programming, CAEE. B.A., Virginia Tech, 1998; M.A.Ed., Virginia Tech, 2002.

GRIMES, Matthew (2005), Asst. Director of Residence Life, Student Affairs, B.S., Virginia Tech, 2000; M.A. Ed., Virginia Tech, 2002.

GRISSE, Robert D. (2001), Prof. of Biological Systems Engineering. B.S. Virginia Tech, 1978; M.S., Virginia Tech, 1980; Ph.D., Auburn Univ., 1985; P. E.

GRIZZARD, Thomas J. (1974), Prof. of Civil and Environmental Engineering. B.S., Virginia Tech, 1968; M.S., Virginia Tech, 1972; Ph.D., Virginia Tech, 1977; P.E. (Nat. Capital Region campus)

GROOVER, Gordon E. (1983), Assoc. Prof. of Agricultural and Applied Economics. B.S., Virginia Tech, 1979; M.S., Virginia Tech, 1988; Ph.D., Virginia Tech, 2001.

GROVE, Tijana Z. (2011), Asst. Prof. of Chemistry, Undergraduate training, Univ. of Serbia, 1999; Ph.D., Iowa State Univ., 2004.

GRUBER, Nancy (1992), Asst. Director, Finance and Human Resource Administration, Outreach Program Development. B.S., Virginia Tech, 1988.

GUDMESTAD, Aarnes (2008), Asst. Prof. of Spanish. B.A., Concordia College, 2002; M.A., Indiana Univ., 2004; Ph.D., Indiana Univ., 2008.

GUÉYE, Médoune (2000), Assoc. Prof. of French and Francophone Studies. Licence és Lettres, U. of Dakar, Senegal, 1985; M.A., Cincinnati, 1985; Ph. D., Cincinnati, 1994.

GUGERCIN, Serkan (2003), Assoc. Prof. of Mathematics. B.S., Middle East Technical Univ., Ankara, Turkey, 1997; M.S., Rice Univ., 1999; Ph.D., Rice Univ., 2002.

GUIDO, Louis J. (1999), Assoc. Prof. of Electrical and Computer Engineering and Materials Science and Engineering . B.S.E.E., Polytechnic Institute of New York, 1982; M.S.E.E., Univ. of Illinois, 1983; Ph.D., Univ. of Illinois, 1989.

GUILBAUD, Patrick (2007), Program Director, IT in International Education. B.S., B.A., Univ. of Florida, 1986; M.B.A., Univ. of Virginia, 1995; M.S., Univ. of Virginia, 2003; Ph.D., Univ. of Virginia, 2007.

GUILLIAMS, Stephanie L. (2009), Asst. Director, Alumni Relations. B.S., Virginia Tech, 1995; M.A., Univ. of Oklahoma, 2008

GUMBERT, Heather (2006), Asst. Prof. of History. B.A., Trent, 1995; M.A., Texas, 1998; Ph.D., Texas, 2006.

GUO, Feng (2007), Asst. Prof. of Statistics. B.S., Tongji Univ., 1995; M.S., Tongji Univ., 2000; Ph.D., Univ. of Connecticut, 2007.

GUO, Owen Shun (2007), Instructor of Chinese. B.A., Anhui Normal Univ., 1977; Ma., Nanjing Univ. 1982; MFA, Univ. of Utah, 1991.

GUTHRIE, Joseph W. (2007), Instructor of Agricultural Technology. B.S., Virginia Tech, 1989; M.S., Massey Univ., 1991.

GUYNN, Sierra R., (2012), Clinical Asst. Prof. of Large Animal Clinical Sciences. B.S., Long Island Univ., 1996; Ph. D., Creighton Univ., 2002; DVM, VMRCVM, 2006.

A.A.S., Del Mar College, 1977; B.S., Colorado State Univ., 1982; M.S., Vanderbilt Univ., 1991; Ph.D., Vanderbilt Univ., 1994; P.E. (Nat. Capital Region campus)

HAND, Jennifer L. (2009), Instructor of Art. B.F.A., Calvin College, 1992; M.F.A., Radford Univ., 1995.

HANKS, Lucy L. (1981), Instructor of Mathematics. B.S., Radford, 1970; M.S., Memphis State, 1971.

HANNAM, Benjamin (2006), Asst. Prof. of Art. B.F.A., Old Dominion Univ., 1996; M.F.A., Virginia Commonwealth Univ., 2002.

HANIGAN, Mark D. (2005), Prof. of Dairy Science. B.S., Iowa State, 1987; M.S., UC Davis, 1989; Ph.D., UC Davis, 1991.

HANSEN, Mary A. (1984), Instructor of Plant Pathology. B.S., Ohio State Univ., 1979; M.S., Univ. of Wisconsin, Madison, 1984.

HANSEN, Thomas B. (2011), Asst. Prof. of Accounting and Information Systems. B.A., Washington & Lee Univ., 1996; M.S., South Carolina, 2002; Ph. D., Emory Univ., 2007.

HANSON, Brian E. (1980), Prof. of Chemistry. B.A., M.A., Johns Hopkins, 1975; Ph.D., Texas A&M, 1978. HARMON, Jr., L. Kenneth (1991), Assoc. Prof. of Industrial and Systems Engineering. B.S., Georgia Institute of Technology, 1960; M.B.A., Wright State Univ., 1970. P.E. (Northern Virginia Center).

HARDY, Warren (2007), Assoc. Prof. of Mechanical Engineering. B.S., Univ. of Michigan, 1985; M.S., Wayne State Univ., 1988; Ph.D., Wayne State Univ., 2007.

HARPER, Allen F. (1992), Prof. of Animal and Poultry Sciences. B.S., Virginia Tech, 1979; M.S., Virginia Tech, 1982; Ph.D., Virginia Tech, 1992.

HARRILL, Paul, (2006), Assoc. Prof. of Cinema. B.A., Univ. of Tennessee, Knoxville, 1994; M.F.A., Temple Univ., 1999.

HARRINGTON, Gwen D. (2007), Asst. Director, Alumni Relations. B.S., Virginia Tech, 2007.

HARRINGTON-BECKER, Gertrude (1991), Senior Instructor; Department of Religion and Culture. B.A., College of the Holy Cross, 1983. M.A., Univ. of North Carolina at Chapel Hill, 1985. M.A., Virginia Tech, 1990; Ph.D., Florida, 2008.

HARRIS, Carl E. (2005), Chief Technology Architect. B.S., Virginia Tech, 1995.

HARRIS, James R. (1993), Prof. and Department Head of Horticulture. B.S., Michigan, 1975; M.S., Florida, 1990; Ph.D., Cornell, 1993.

HARRIS, Lauren (2008), Asst. Director of Fraternity and Sorority Life, Student Affairs, B.A., Radford Univ., 2006; M.S., Radford Univ., 2008.

HARRISON, David W. (1985), Assoc. Prof. of Psychology. B.S., Univ. of New Mexico, 1978; M.A., Univ. of Georgia, 1980; Ph.D., Univ. of Georgia, 1983.

HARRISON, Kwame (2004), Assoc. Prof. of Sociology. B.A., Univ. of Massachusetts, 1992; M.A. Syracuse Univ., 1999; Ph.D., Syracuse Univ., 2004. 10

HARRISON, Steve (2003), Assoc. Prof. of Practice of Computer Science. B.A., Univ. of California, 1973; M.A., Univ. of California, 1978.

HART, Brian R. (2009), Instructor of Finance. B.S., Appalachian State Univ, 1998; M.B.A., Appalachian State Univ, 2000.

HART, Heath (1998), Advanced Instructor of Mathematics. B.S., Guilford College, 1989; M.S., Virginia Tech, 1991.

HARVEY, Robert J. (1987), Assoc. Prof. of Psychology. B.A., Univ. of Missouri, 1977; M.A., Univ. of Missouri, 1979; Ph.D., Ohio State Univ., 1982.

HARVILL, JoAnn (1980), Senior Instructor of English. B.A., Lamar Univ., 1975; M.A., Virginia Tech, 1981.

HASKELL, Peter E. (1988), Prof. of Mathematics and Department Chair. A.B., Harvard, 1977; Ph.D., Brown, 1982.

HASSALL, James C. (2009), Applications Analyst, Enterprise Systems. B.S., Virginia Tech, 1977.

HATFIELD, Donald E. (1993), Assoc. Prof. of Management. B.S., Iowa State, 1981; M.B.A., Univ. of Iowa, 1985; Ph.D., UCLA, 1993.

HAUENSTEIN, Neil M. A. (1987), Assoc. Prof. of Psychology. B.A., Ohio Northern Univ., 1979; M.A., Univ. of Akron, 1983; Ph.D., Univ. of Akron, 1987.

HAUSMAN, Bernice (1995), Prof. of English. B.A., Yale Univ., 1985; M.A., Univ. of Iowa, 1990; Ph.D., Univ. of Iowa, 1992.

HAWDON, James (2004), Prof. of Sociology. B.A., Penn State, 1985; M.A., UVA, 1988; Ph.D., UVA, 1992.

HAWLEY, Dana (2006), Asst. Prof. of Zoology. B.S., William and Mary, 1999; Ph.D., Cornell Univ., 2005.

HE, Jia-Qiang (2012), Asst. Prof. of Biomedical Sciences and Pathobiology. Ph.D., China, 1996.

HEAD, Travis (2011), Asst. Prof. of Art. B.A., Univ. of Mary Washington, 2002; M.F.A, Univ. of Iowa, 2008.

HEATH, H. Bruce (2011), Budget Analyst. B.S. Old Dominion Univ., 2008; M.P.A, Virginia Tech, 2010

HEATH, Lenwood S. (1987), Prof. of Computer Science. B.S., UNC-CH, 1975; M.S., Univ. of Chicago, 1976; Ph.D., UNC-CH, 1985.

HEATON, Matthew (2008), Asst. Prof. of History. B.A., Texas, 2002; M.A., Texas, 2004; Ph.D., Texas, 2008.

HEATWOLE, Conrad D. (1986), Assoc. Prof. of Biological Systems Engineering. B.S., Virginia Tech, 1978; M.S., Virginia Tech, 1979; Ph.D., Florida, 1986; P.E.

HEFLIN, Ashley Shew (2011). Asst. Prof. of Science and Technology in Society. B.A., Univ. of South Carolina, 2005; M.S., Virginia Tech, 2007; M.A., Virginia Tech, 2008; Ph.D., Virginia Tech, 2011.

HEFLIN, James R. (1992), Prof. of Physics. B.S., William & Mary, 1984; Ph.D, Univ. of PA, 1990.

HEIDBREDER, Kay (1982), Univ. Legal Counsel. A.B., Univ. of Missouri, 1978; J.D., Washington U., 1981.

HEILKER, Paul V. (1994), Assoc. Prof. of English. B.A., State Univ. of New York at Stony Brook, 1985; M.A., Colorado State Univ., 1988; Ph.D., Texas Christian Univ., 1992.<sup>2,4</sup>

HEIN, Serge F. (2004), Assoc. Prof. of Education. Bachelor of Commerce, Univ. of Alberta, 1989; M.Ed., Univ. of Alberta, 1992; Ph.D., Univ. of Alberta, 1996.

HELM, Richard F. (1992), Assoc. Prof. of Biochemistry. B.S., SUNY, 1982; Ph.D., Wisconsin, 1987.

HENAO-GUERRERO, Piedad N. (2007), Asst. Prof. of Small Animal Clinical Sciences. Medicina Veterinaria, Univ. de la Salle, 2000; Diplomate, ACVA (Anesthesiologists), 2008.

HENDRICKS, Robert W. (1986), Prof. of Materials Science and Engineering. B. MetE., Cornell Univ., 1959; Ph.D., Cornell Univ., 1964; MBA, Univ. of Tennessee, 1985.

HENDRICKS, Scott L. (1979), Assoc. Prof. of Engineering Science and Mechanics. B.A., Utah, 1974; Ph.D., Virginia, 1979.

HERBERT, D. Ames (1988), Prof. of Entomology. B.S., Johnson State, 1971; M.S., Auburn, 1975; Ph.D., Auburn, 1985. (Tidewater)

HERDMAN, Terry L. (1974), Assoc. Vice President for Research Computing, Director of Interdisciplinary Center for Applied Math and Prof. of Mathematics. B.S., Fort Hays, 1967; M.A., Oklahoma, 1970; Ph.D., Oklahoma, 1974.

HEREMANS, Jean Joseph (2005), Prof. of Physics. Diploma, Univ. of Leuven, 1987; M.S., Princeton, 1989; Ph.D., Princeton, 1994.

HERNDON, Brandon P. (2012), Asst. Prof. of Aerospace Studies, Air Force ROTC. B.S. in Aerospace Engr., Virginia Tech.

HERNICK, Marcy (2007), Asst. Prof. of Biochemistry. B.S., Albany College of Pharmacy, 1998; Ph.D., Purdue Univ., 2002.

HERR, PAUL (2009), Prof. of Marketing and Virginia-Carolinas Prof. of Purchasing Management. A.B., Oberlin College, Ph.D., Indiana Univ. 1983.

HERRING, Ian P. (1999), Assoc. Prof. of Small Animal Clinical Sciences. D.V.M., Texas A & M, 1994; M.S., Virginia Tech, 1998; Diplomate, A.C.V.O.

HESP, Annie (2010), Instructor of Spanish. B.A., Boise State Univ. 1999; M.A., Portland State Univ. 2001; PhD., Univ. of Michigan 2010.

HESSION, W. Cully (2005), Assoc. Prof. of Biological Systems Engineering. B.S., Virginia Tech, 1984; M.S., Virginia Tech, 1988; Ph.D., Oklahoma State, 1995; P.E.

HESTER, Erich T. (2008), Asst. Prof. of Civil and Environmental Engineering. A.B., Dartmouth College, 1992; M.S., Stanford Univ., 1998; Ph.D., Univ. of North Carolina, Chapel Hill, 2008.

HICKS, David L. (1999), Assoc. Prof. of Education. B.A., Lancaster Univ., 1988; M.A., State Univ. of New York College at Cortland, 1994; Ph.D., Virginia

Tech, 1999.

HICKS, James O. (1976), Prof. of Accounting and Information Systems. B.B.A., Georgia State, 1966; M.B.A., Georgia State, 1968; Ph.D., Georgia State, 1976.

HICKS, Sam A. (1979), Assoc. Prof. of Accounting and Information Systems. B.S., Tennessee, 1967; M.B.A., Wisconsin, 1969; Ph.D., Wisconsin, 1976.

HICOK, Bob (2003), Assoc. Prof. of English. M.F.A., Vermont College, 2004.

HIDALGO, Dennis (2008), Asst. Prof. of History. B.A., Universidad Adventista de las Antillas, 1988; M.Div., Andrews, 1996; M.A., Western Illinois, 1998; Ph.D., Strathclyde and Central Michigan, 2003.

HILL, Jennie L. (2007), Asst. Prof. of Human Nutrition, Foods and Exercise. B.S., Univ. of Nebraska-Kearney, 1998; M.S., Kansas State Univ., 2000.

HILL, Karen M. (2009), Auxiliary Budget Manager. A.A.S., New River Community College, 1982; B.S., Radford Univ., 1996.

HILLER, Janine S. (1981), Prof. of Business Law. B.A., Virginia Tech, 1978; J.D., Univ. of Richmond, 1981.

HILLMAN, James S. (2009), Fiscal Budget Analyst. B.S., Virginia Tech, 2005.

HILU, Khidir W. (1981), Prof. of Botany. B.S., Baghdad, 1966; M.S., Baghdad, 1971; Ph.D., Illinois, 1976.

HIN, Celine (2011), Asst. Prof. of Materials Science and Engineering and Mechanical Engineering. B.S. Univ. of Mame La Vallee 2000; MS, Univ. of Mame La Vallee 2001; PhD Institut National Polytechnique de Grenoble 2005.

HINCKER, Larry G. (1988), Assoc. Vice President for Univ. Relations. B.A., Brooks Institute, 1977; M.B.A., Virginia Tech, 1994.

HINDMAN, Daniel P. (2003), Assoc. Prof. of Wood Sustainable Biomaterials. B.S., Pennsylvania State, 1997; M.S., Pennsylvania State, 1999; Ph.D., Pennsylvania State, 2003.

HINSON, William F., Jr. (2010), Univ. Building Official, B.S., Virginia Tech, 1978.

HIRSH, Richard F. (1980), Prof. of History. B.A., Middlebury, 1974; M.A., Wisconsin, 1976; Ph.D., Wisconsin, 1979; M.S., Wisconsin, 1980.

HIRT, Joan B. (1996), Prof. of Education. B.A., Bucknell Univ., 1972; M.A., Univ. of Maryland, 1979; Ph.D., Univ. of Arizona, 1992.

HIRT, Sonia (2004), Assoc. Prof. of Urban Affairs and Planning and Public Administration and Policy. Arch Dipl., Higher Institute of Arch and Civil Engineering, Bulgaria, 1991; MURP, Univ. of Michigan, 1995; Ph.D., Univ. of Michigan, 2003.

HITCHINGHAM, Eileen E. (1995), Prof.; Dean of Univ. Libraries, Library. B.S., Chestnut Hill College, PA, 1965; M.A., Western Michigan Univ., 1966; Ph.D., Wayne State, MI, 1979.

HOBEIKA, Antoine (1973), Prof. of Civil and Environmental Engineering. B.E., American Univ. of Beirut, 1967; M.E., American Univ. of Beirut, 1970; Ph.D., Purdue, 1973; P.E.

HOCELLA, Jr., Michael F. (1992), Univ. Distinguished Prof. and Prof. of Geosciences. B.S., Virginia Tech, 1975; M.S., Virginia Tech, 1977; Ph.D., Stanford Univ., 1981.<sup>9</sup>

HODGE, Timothy L. (1999), Univ. Budget Director. B.S., Virginia Tech, 1990; M.B.A., Virginia Tech, 1999.

HODGES, Steven C. (2002), Prof. of Crop and Soil Environmental Sciences. B.S., Florida, 1974; M.S., Florida, 1977; Ph.D., Virginia Tech, 1980.

HODGSON, David R. (2007), Head of Department and Prof. of Large Animal Clinical Sciences. B.V.Sc., Univ. of Sydney, 1979; Ph.D., Univ. of Sydney, 1984; Diplomate, A.C.V.I.M.

HODGSON, Jennifer L. (2007), Assoc. Dean, Professional Programs and Assoc. Prof. of Biomedical Sciences and Pathobiology. B.V.Sc., Univ. of Sydney, 1982; Ph.D., Washington State Univ., 1991; Diplomate, A.C.V.M.

HOESCHELE, Ina (2002), Prof. of Statistics. Diploma, Hohenheim Univ., 1983; Ph.D., Hohenheim Univ., 1986.

HOFER, Stefanie (2005), Asst. Prof. of German. M.A. (Magister) at Ruprecht-Karls-Universitat Heidelberg, (Germany), 2000; Ph.D., Univ. of North Carolina at Chapel Hill, 2005.

HOFFMAN, Kurt A. (2000), Instructor and Director of Undergraduate Studies. B.S., Bucknell Univ., 1992; M.S., Univ. of California-Davis, 1996; Ph.D., Univ. of California-Davis, 1998.<sup>2,7</sup>

HOLE, John A. (1996), Prof. of Geophysics. B.Sc., Carleton Univ., 1986; Ph.D., Univ. of British Columbia, 1993.

HOLLANDER, Henry (1988), WAAC, Coordinator for Outreach and Alumni Relations, Administrative and Professional Faculty; B.Arch., Virginia Tech, 1989; M.Arch., Virginia Tech, 1991.

HOLLIDAY, Jason A. (2010). Asst. Prof. of Forest Genetics and Genomics. B.Sc., Univ. of Victoria, British Columbia, 2001; Ph.D., Univ. of British Columbia, 2009.

HOLLIDAY, Kent A. (1974), Prof. of Music. B.A., Hamline, 1962; M.A., Minnesota, 1965; Ph.D., Minnesota, 1968.

HOLLOWAY, Rachel L. (1989), Assoc. Prof. of Communication. B.A., Morehead State Univ., 1983; M.A., Purdue Univ., 1985; Ph.D., Purdue Univ., 1990.

HOLSHOUSER, David L. (1996), Assoc. Prof. of Crop and Soil Environmental Sciences. B.S., NCSU, 1985; M.S., NCSU, 1987; Ph.D., Texas A&M, 1993. (Tidewater Agricultural Research and Extension Center).

HOLT, Jaan (1972), Prof. of Architecture, Director of the Washington-Alexandria Architecture Center. B.Arch., Virginia Tech, 1965; M.Arch., Univ. of Pennsylvania, 1966.

HOLT, Rengin T. (1979), Instructor, Architecture. B.Arch., Montana State, 1966; B.A., Virginia Tech, 1974; M.A., Virginia Tech, 1975.

HOLTZMAN, Golde I. (1980), Assoc. Prof. of Statistics. B.A., Univ. Cal, Los Angeles, 1972; M.A., Univ. of Arizona, 1975; Ph.D., NC State, 1980.

HONG, Chuanxue (1999), Prof. of Plant Pathology. B.S., Anhui Agric. College, 1982; M.S., Beijing Agric. Univ., 1987; Ph.D., Beijing Agric. Univ., 1990 (Hampton Roads Agricultural Research and Extension Center).

HONG, Dennis W. (2003), Assoc. Prof. of Mechanical Engineering. B.S., Univ. of Wisconsin-Madison, 1994; M.S., Purdue Univ., 1999; Ph.D., Purdue Univ. 2002.

HONG, Yili (2009), Asst. Prof. of Statistics. B.S., Univ. of Science and Technology of China, 2004; M.S., Iowa State Univ., 2005; Ph.D., Iowa State Univ., 2009.

HOON, Parakh (2007), Asst. Prof. of Political Science. B.A., St. Stephen's College, 1992; M.A., Jawaharlal Nehru Univ., 1994; M.A., Brigham Young Univ., 1996; Ph.D., Univ. of Florida, 2005.

HOOPES, Barbara J. (1994), Assoc. Prof. of Business Information Technology. B.S., Davidson College, 1982 Ph.D., Univ. of North Carolina - Chapel Hill; 1994 (Northern Virginia Center)

HOPKINS, W. Wat (1987), Prof. of Communication. B.A., Western Carolina Univ., 1972; M.A., Univ. of North Carolina at Chapel Hill, 1973; Ph.D., Univ. of North Carolina at Chapel Hill, 1987.

HOPKINS, William A. III (2005), Assoc. Prof. of Fisheries and Wildlife Sciences. B.S., Mercer Univ., 1992; M.S., Auburn Univ., 1997; Ph.D. Univ. of South Carolina, 2001.

HORVATH, Laszlo (2011). Asst. Prof. of Packaging Science. B.S., Univ. of West Hungary, 2005; M.S., Univ. of West Hungary, 2007; Ph.D., North Carolina State Univ., 2010.

HOU, Y. Thomas (2002), Prof. of Electrical and Computer Engineering. B.E., City College of New York, 1991; M.S., Columbia Univ., 1993; Ph.D., Polytechnic Univ., Brooklyn, NY, 1998.

HOUSE, Leanna (2008), Asst. Prof. of Statistics. B.S., Cornell Univ., 1998; M.A.T., Cornell Univ., 1999; M.S., Duke Univ., 2003; Ph.D., Duke Univ., 2006.

HOUSTON, Kristen (2007), Asst. Director for Multicultural Programs and Services, Student Affairs, B.S., Radford Univ., 1998; M.S., Radford Univ., 2001.

HOVER, Paul (2004), Asst. Prof.; Library. A.B., Princeton Univ., 1970; M.A., Univ. of Auckland, 1993; M.S., Univ. of Illinois at Urbana-Champaign, 2004.

HOWELL, Buddy W. (2009), Visiting Asst. Prof. of Communication. B.A., Baylor Univ., 1990; M.A., Baylor Univ., 1999; Ph.D., Texas A&M Univ., 2006.

HOWELL, John R. (1979), Assoc. Prof. of Music. B.A., Puget Sound, 1966; M.M., Indiana, 1974.

HSIAO, Michael S. (2001), Prof. of Electrical and Computer Engineering. B.S., Univ. of Illinois at Urbana-Champaign, 1992, M.S. Univ. of Illinois at Urbana-Champaign, 1993, Ph.D., Univ. of Illinois at Urbana-Champaign, 1997.

HUANG, Yaowei (2008), Research Asst. Prof. of Biomedical Sciences and Pathobiology. B.S., Nanjing Univ. (China), 1998; Ph.D., Zhejiang Univ. (China), 2003.

HUBER, Patrick (2008), Assoc. Prof. of Physics. Diploma, TU München, 2000; Ph.D., TU München, 2003.

HUCKESTEIN, Stephanie (2007), Education and Outreach Coordinator, Horticulture. B.S., Virginia Tech, 1998, M.S., Virginia Tech, 2007.

HUCKLE, William R. (1999), Assoc. Prof. of Biomedical Sciences and Pathobiology. B.A., Williams College, 1978; M.S., Virginia Tech, 1981; Ph.D., Iowa, 1988.

HUDAIT, Mantu (2009), Assoc. Prof. of Electrical and Computer Engineering. M.S., Indian Institute of Technology, 1992; Ph.D., Indian Institute of Science, 1999.

HUEBNER, Angela J. (1999), Assoc. Prof. of Human Development. B.A., Univ. of Nebraska, 1989; M.S., Univ. of Arizona, 1993; Ph.D., Univ. of Arizona, 1995. (National Capital Region Campus)

HUGHES, Michael D. (1979), Prof. of Sociology. B.A., Alabama, 1967; M.A., Alabama, 1971; Ph.D., Vanderbilt, 1979.

HUGHES, Sunnie E. (2010), Asst. Director of Undergraduate Admissions. B.A., Fontbonne Univ., 2001; M.Ed., Saint Louis Univ., 2005.

HULL, R. Bruce (1993), Prof. of Forestry. B.S., Virginia Tech, 1979; M.S., Virginia Tech, 1981; Ph.D., Virginia Tech, 1984.

HULT, Karen (1994), Prof. of Political Science and Public Administration and Policy. B.A., Creighton, 1978; Ph.D., U of Minnesota, 1984.

HULVER, Matthew W. (2006), Asst. Prof. of Human Nutrition, Foods and Exercise. B.S., Marietta College, 1992; M.S., Western Maryland College, 1998; Ph.D., Univ. of Kansas, 2001.

HUMPHREY, Elaine (2000), Assoc. Director for Research and Assessment.. B.A., College of William and Mary, 1974; M.A. Ed., Virginia Tech, 2000; Ph. D., Virginia Tech, 2008.

HUNDLEY, Jennifer (2010), Capital Program Budget Manager. B.S., Virginia Tech, 2002; M.P.A., Virginia Tech, 2003.

HUNDLEY, Travis W. (2009), Asst. Director of Budget Operations. B.S., Virginia Tech, 2001; M.P.A., Virginia Tech, 2003.

HUNG, (Daniel) Chang-Yu (2001), Research Analyst, Institutional Research & Effectiveness. B.S., Tamkang Univ., 1987; M.S., Bradley Univ., 1991; Ph. D., Virginia Tech, 2000.

HUNNINGS, Kay P. (2007), Assoc. Dean for Administration, Pamplin College of Business. B.S., Virginia Tech, 1979; M.B.A., Virginia Tech, 2007.

HUNTER, Monica (2006), Assoc. Director of Campus Programs, UUSA. B.S., Radford Univ., 1993; M.S., Radford Univ., 1995.

HUSSER, John S. (1979), Assoc. Prof. of Music. B.M., Indiana, 1969; B.M.E., Indiana, 1969; M.M., Ohio State, 1971.

HUTCHESON, John R. (1994), Director, Alumni Relations. B.S., Virginia Tech, 1975; M.S., Virginia Tech, 1978; M.B.A., William and Mary, 1980.

HUTSON, Susan M. (2008), Prof. of Human Nutrition, Foods and Exercise. B.A., Vanderbilt Univ., 1970; Ph.D., Univ. of Wisconsin-Madison, 1976.

HWANG, Eunju (2012), Asst. Prof. of Apparel, Housing, and Resource Management. B.S. Daegu Univ., 1992; B.A. Hanyang Univ., 1994; M.A. Hanyang Univ., 1996; Ph.D. Univ. of Minnesota, 2001.

HYRA, Derek S. (2009), Assoc. Prof. of Urban Affairs and Planning. B.A., Colgate Univ., 1996; M.A., Univ. of Kansas, 1999; M.A., Univ. of Chicago, 2000; Ph.D., Univ. of Chicago, 2005.

JACOBSEN, David C. (1988), Assoc. Prof. of Music. B.M., Wisconsin State, Oshkosh, 1971; M.M., Northwestern Western Illinois, 1972; D.M.A., Univ. of Illinois Urbana, 1982.

JACOBSON, Wendy (1991), Assoc. Prof. of Landscape Architecture. B.A., Dalhousie Univ., 1973; M.L.A. Univ. of Guelph, 1981.

JAHNCKE, Michael L. (1997). Prof., Food Science and Technology and Director, Hampton Seafood Research and Extension Center. B.S. U.W. at Stevens Point, 1975; M.S. Cornell Univ., 1980; Ph.D. Cornell Univ., 1985.

JAMES, Robert E. (1980), Prof. of Dairy Science. B.S., Delaware, 1971; M.S., Virginia Tech, 1975; Ph.D., Virginia Tech, 1978.

JAMES, Tabitha L. (2002), Assoc. Prof. of Business Information Technology. B.A., The Univ. of Mississippi, 1998; Ph.D., The Univ. of Mississippi, 2002.

JAMISON, Kathleen (2000), Extension Specialist, 4-H, Extension. B.S., Old Dominion Univ., 1972; M.S., Old Dominion Univ., 1982; Ph.D., Virginia Tech, 2004.

JANOSIK, Steve M. (1998), Assoc. Prof. of Education. B.S., Virginia Tech, 1973; M.Ed., Univ. of Georgia, 1975; Ed.D., Virginia Tech, 1987.

JANTZEN, Benjamin (2011), Asst. Prof. of Philosophy, B.S., Penn State, 1999; M.S., Cornell, 2003; M.A., Carnegie Mellon, 2006; Ph.D., Carnegie Mellon, 2010.

JARROTT, Shannon E. (1999), Assoc. Prof. of Human Development. B.S., Univ. of California, 1992; M.S., Penn State, 1995; Ph.D., Penn State 1999.

JELESKO, John G. (2000), Assoc. Prof. of Plant Physiology. B.S., Univ. of California, Davis, 1983; M.S., Univ. Washington, 1988; Ph.D., Univ. Washington, 1992.

JENKINS, Dale M. (1999), Advanced Instructor of Communication. B.A., Univ. of North Carolina, Chapel Hill, 1983; M.Div., Southern Baptist Theological Seminary, 1991.

JENKINS, J. Gregory (2005), Prof. of Accounting and Information Systems. B.S.B.A., Appalachian State, 1989; M.S., Appalachian State, 1990; Ph.D., Virginia Tech, 1998.

JENSEN, Roderick V. (2007), Prof. of Biology. B.A., Princeton, 1976; M.S., Princeton, 1978; Ph.D., Princeton, 1981.

JIANG, Honglin (2001), Prof. of Animal and Poultry Sciences. B.S., Nanjing Univ., 1987; M.S., Nanjing Agric. Univ., 1990; Ph.D. Purdue Univ., 1997.

JIAO, Yan (2005), Assoc. Prof. in Marine Resources Population Dynamics. B.S., Ocean Univ. of China, 1993; M.S., Ocean Univ. of China, 1997; Ph.D., Memorial Univ. of Newfoundland, 2004.

JIMENEZ, Nannette (2008), Student Conduct Coordinator, Student Affairs, B.S., Virginia Tech, 2003; M.A. Ed., Virginia Tech, 2006; M.S. Ed. Virginia Tech, 2011.

JIN, Ran (2011), Asst. Prof. of Industrial and Systems Engineering. B.Eng., Tsinghua Univ., 2005; M.S., Univ. of Michigan, 2007; M.A., Univ. of Michigan, 2009; Ph.D., Georgia Institute of Technology, 2011.

JOBST, Shelly, (2004), Asst. Director, Continuing and Professional Education. B.S., California Polytechnic State Univ., 1995; M.S., Virginia Tech, 1998.

JOHNSON, Charles S. (1985), Prof. of Plant Pathology. B.S., Univ. of North Carolina, Chapel Hill, 1979; M.S., North Carolina State Univ., 1982; Ph.D., North Carolina State Univ., 1985. (Southern Piedmont Agricultural Research and Continuing Education Center).

JOHNSON, David W. (1988), Assoc. Prof. of Theatre Arts. B.A., Valparaiso, 1968; M.F.A., Univ. of Hawaii, 1973.

JOHNSON, Debra M. (2011), Manager of Reporting and Analytics. B.S., Oregon State University, 1977; M.B.A. University of Phoenix, 1990.

JOHNSON, Jason (2010), Residential Learning Coordinator, Student Affairs, B.A., Univ. of Vermont, 2002; M.Ed., University of Vermont, 2010.

JOHNSON, Jr., Lonnie L. (1997), District Director, Southeast District, Extension. B.S., Virginia Tech, 1992; M.S. Auburn Univ., 1996.

JOHNSON, Michael R. (2005), Instructor of Chemistry. B.S., Middle Tennessee State Univ., 1972; M.S., Middle Tennessee State Univ., 1975.

JOHNSON, Mildred R. (1995), Director, Undergraduate Admissions. B.A., Averett College, 1975; M.S., Radford, 1981.

JOHNSON, Neil E. (2008), Instructor of Geosciences. B.S., Ohio State Univ., 1980; M.S., Virginia Tech, 1983; Ph.D., Virginia Tech, 1986.

JOHNSON, Sally E. (2012), Paul Mellon Distinguished Assoc. Prof. of Animal and Poultry Sciences. B.S. Michigan State, 1984; M.S., Michigan State, 1987; Ph.D., The Univ. of Arizona, 1993.

JOHNSON, Scott W. (1991), Assoc. Prof. of Human Development. B.A., Lincoln, 1973; M.A., Johns Hopkins, 1974; Ph.D., Virginia Tech, 1991.

JOHNSON, Sharon P. (1998), Assoc. Prof. of French and Francophone Studies. B.A., Kalamazoo, 1979; M.A., Wisconsin (Madison), 1989; Wisconsin (Madison), 1996.<sup>2, 3, 10</sup>

JOHRI, Aditya (2007), Asst. Prof. of Engineering Education. B.Eng., Delhi Univ., 1998; M.M.C., Univ. of Georgia, 2000; M.S., Georgia Inst. of Technology, 2002; Ph.D., Stanford Univ., 2007.

JONES, Adam M. (2011), Asst. Prof. of Naval Science. LT, U.S. Navy. B.A., The Univ. of Maine, 2006.

JONES, Brett D. (2006). Assoc. Prof. of Education. B.A.E., Pennsylvania State Univ., 1992; M.A., Univ. of North Carolina at Chapel Hill, 1997; Ph.D., Univ. of North Carolina at Chapel Hill, 1999.

JONES, Edwin (2011), Director, Virginia Cooperative Extension and Assoc. Dean, College of Agriculture and Life Sciences. B.S., Univ. of Washington, 1975; M.S., Virginia Tech, 1978; Ph.D., Virginia Tech, 1983.

JONES, Jess W. (2011), Asst. Prof. of Fisheries Science. B.S., Virginia Tech, 1996; M.S., Virginia Tech, 2004; Ph.D., Virginia Tech, 2009

JONES, Jim R. (1997), Prof. of Architecture. B.S., Univ. of Michigan, 1981; M.Arch., Univ. of Michigan, 1983; Ph.D., Univ. of Michigan, 1995.

JONES, Karen (2010), Exec. Director for Equity and Access. B.S., State Univ. of New York, College at Buffalo, 1984; M.S.Ed., State Univ. of New York, College at Brockport, 1987; Ph.D., State Univ. of New York, College at Buffalo, 2005.

JONES, Kathleen W. (1991), Assoc. Prof. of History. B.A., Delaware, 1969; M.A., Alberta, 1974; Ph.D., Rutgers, 1988.

JONES, Mark T. (1990), Prof. of Electrical and Computer Engineering. B.S., Clemson, Univ., 1986; Ph.D., Duke Univ., 1990.

JONES, Russell T. (1984), Prof. of Psychology. B.A., Western Michigan Univ., 1972; M.A., Pennsylvania State Univ., 1973; Ph.D., Pennsylvania State Univ., 1976.

JU, Young-Hwa (2004), Asst. Prof. of Human Nutrition, Foods and Exercise. B.A., Korea Univ. at Seoul, 1987; M.S., Univ. of Illinois at Urbana-Champaign, 1992; Ph.D., Univ. of Illinois at Urbana-Champaign, 1998.

JUNG, Sungwan (2009), Asst. Prof. of Engineering Science and Mechanics. B.S., Sogang Univ. (South Korea), 1999; M.S., POSTECH (South Korea); Ph.D., Univ. of Texas at Austin, 2005.

JUSTICE, Gregory W. (1983), Assoc. Prof. of Theatre Arts. B.F.A., Utah, 1979; M.F.A., Penn State, 1983.<sup>2,10</sup>

KNOX, Paul L. (1985), Univ. Distinguished Prof. of Urban Affairs and Planning and Senior Fellow for International Advancement. B.A., Sheffield (England), 1969; Ph.D., Sheffield (England), 1972.

KOBEZAK, Philip D. (2011), Senior IT Security Analyst. B.S., Virginia Tech, 2008.

KOCH, Bettina (2006), Assoc. Prof. of Political Science. M.A., Univ. of Münster, 1997; Ph.D., Univ. of Vechta, 2004.

KOCHERSBERGER, Kevin (2006), Asst. Prof. of Mechanical Engineering. B.S., Virginia Tech, 1983; M.S., Virginia Tech, 1984; Ph.D., Virginia Tech, 1994.

KOEBEL, C. Theodore (1990), Prof. of Urban Affairs and Planning and Director, Virginia Center for Housing Research. B.S., Xavier Univ., 1969; M.C.P., Univ. of Cincinnati, 1971; Ph.D., Rutgers Univ., 1979.

KOELLING, C. Patrick (1987), Assoc. Prof. of Industrial, and Systems Engineering. B.S., Univ. of Missouri, 1976; M.S., Univ. of Missouri, 1977; M.B.A., Univ. of Missouri, 1978; Ph.D., Arizona State, 1982.<sup>4</sup>

KOH, Kwang-Jin (2011), Asst. Prof. of Electrical and Computer Engineering. B.S, Chung-Ang Univ., Korea, 1999; M.S., Korea Advanced Institute of Science & Technology (KAIST), 2001; Ph.D., Univ. of California, San Diego, 2008.

KOHL, Rachel Duvall (2004), Instructor of Agricultural Technology. B.S., Virginia Tech, 2000; M.S., Virginia Tech, 2002.

KOHLER, Abigail (1988), Senior Instructor of Mathematics. A.B., College of Mt. St. Vincent, 1965; M.S.EDCI, Virginia Tech, 1988.<sup>7</sup>

KOHLER, Werner E. (1973), Prof. of Mathematics. B.E.E., Manhattan, 1961; M.S., Poly. Inst. of Brooklyn, 1963; Ph.D., Rensselaer Pol., 1972.

KOK, Loke T. (1972), Prof. of Entomology. B.S., Univ. of Malaysia, 1963; M.S., Univ. of Malaysia, 1965; Ph.D., Univ. of Wisconsin (Madison), 1971.<sup>6</sup>

KOK, Victoria T. (1972), Prof., Library and Adjunct Prof. of Biomedical Sciences and Pathobiology. B.Sc., Univ. of Malaya, 1963; B.Sc. Honors, Univ. of Malaya, 1964; M.L.S., Wisconsin (Madison), 1971.

KOLIVRAS, Korine N. (2004), Asst. Prof. of Geography. B.A., Shippensburg Univ., 1997; M.A., Univ. of Arizona, 2000; Ph.D., Univ. of Arizona, 2004.

KORNHAUSER, Alan A. (1989), Assoc. Prof. of Mechanical Engineering. B.S., Rensselaer Polytechnic Institute, 1973; M.S., Rensselaer Polytechnic Institute, 1973; Ph.D., MIT, 1989.

KOUTROMANOS, Ioannis A. (2012), Asst. Prof. of Civil and Environmental Engineering. B.S., National Technical University, Athens, Greece, 2005; M. Sc., Univ. of California, San Diego, 2009; Ph.D., Univ. of California, San Diego, 2011.

KOZOR, Laura (2010). Asst. Director for College Transition Programs, CAEE. B.A., DePaul Univ., 2007; M.S. Ed., Northern Illinois Univ. (2010).

KRAFT, Barbara (2005), Instructor in Horticulture. B.A., Virginia Tech, 1991; M.S., Virginia Tech, 1993.

KRAIGE, Luther G. (1975), Prof. of Engineering Science and Mechanics. B.S., UVa., 1970; M.S., UVa., 1971; Ph.D., UVa., 1975.<sup>2,3,4,9</sup>

KRALLMAN, John D. (1985), Director of Information Technology Business & Financial Affairs. B.A., Univ. of Pittsburgh, 1979; MBA, Univ. of Pittsburgh, 1980.

KRESGE, Daniel R. (2009), Asst. Prof. of Aerospace Studies, Air Force ROTC. B.A., Faulkner Christian Univ., 2001; M.B.A., Touro Univ. International, 2004.

KREYE, Betti C. (2007), Clinical Asst. Prof. of Education. B.S., Virginia Tech, 1970; M.A., Virginia Tech, 1972; Ed.D., Virginia Tech, 2009.

KRIZ, Ronald D. (1989), Assoc. Prof. of Engineering Science and Mechanics. B.S., California Polytechnic State, 1974; M.S., Virginia Tech, 1976; Ph.D., Virginia Tech, 1979.

KROLL, Gregory (2009), Assoc. Director of Information Technology Project Management & Planning. B.S., MSU, 1978; M.S., Virginia Tech, 1982.

KROMETIS, Justin A. (2011), Computational Science Specialist. B.S., Physics, Virginia Tech, 2004; B.S., Mathematics, Virginia Tech, 2004; M.S., Virginia Tech, 2004.

KROMETIS, Leigh-Anne H. (2011), Asst. Prof. of Biological Systems Engineering. B.S., Virginia Tech, 2002; M.S. Virginia Tech, 2004; Ph.D., Univ. of North Carolina, 2009.

KRONENBERG, Philip S. (1977), Prof. of Public Administration and Policy. B.S., Bradley, 1959; M.A., Syracuse, 1962; Ph.D., Pittsburgh, 1969. (Northern Virginia Center).

KRUPAR, Ellen (1997), Assoc. Prof.; Library and College Librarian for Pamplin College of Business. B.S., Central Florida, 1989; M.L.S., Florida State, 1990.

KUHAR, Thomas P. (2001), Assoc. Prof. of Entomology. B.S., Towson Univ., 1992; M.S., Virginia Tech, 1996; Ph.D., Virginia Tech, 2000. (Eastern Shore)

KUHN, David D. (2012). Asst. Prof., Food Science and Technology. B.S. St. Lawrence University, 2000; B.S. Clarkson Univ., 2001; M.S. Clarkson Univ., 2003; Ph.D., Virginia Tech, 2008.

KUHN, Jeffrey R. (2006), Asst. Prof. of Molecular and Cellular Biology. B.S., Univ. of Texas, 1991; Ph.D., Univ. of Texas, 2000.

KUHN, Meghan Weyrens (2007), Student Conduct Coordinator, Student Affairs, B.S., St. Lawrence Univ., 2002; M.Ed., Virginia Tech, 2007.

KUHNS, Carole L. (1995), Research Faculty. B.S.N., Wagner College, 1970; M.S. Univ. of Maryland, 1972; Ph.D., Univ. of Maryland, 1993.

KUMAR, Raman (1984), R. V. and A. F. Oliver Prof. in Investment Management. B.B.M., Banaras Hindu, 1974; M.B.A., Indian Inst. of Mgmt., 1977; Ph. D., Pittsburgh, 1985.

KUMAR, Sandeep (2009), Research Asst. Prof. of Biomedical Sciences and Pathobiology. B.S., Government Post Graduate College (India), 2000; M.S., Panjab Univ. (India), 2003; Ph.D., Univ. of Pune (India), 2008.

KUMAZAWA, Yasuko (2010), Instructor of Japanese. B.A., Doshisha Univ., 1978; M.A.L.S., Hollins Univ., 2000.

KURDILA, Andrew J. (2005), W. Martin Johnson Prof. of Mechanical Engineering. B.S., Univ. of Cincinnati, 1983; M.S., Univ. of Texas, Austin, 1984; Ph. D., Georgia Institute of Technology, 1988.

KUREK, Sharon M. (2008), Director of Internal Audit. B.B.A., Mercer Univ., 1998.

KUYPERS, Jim A. (2005), Assoc. Prof. of Communication, B.S., Florida State Univ., 1987; M.A., Florida State Univ., 1991; Ph.D., Louisiana State Univ., 1995.

## L

LA BERGE, Ann F. (1989), Assoc. Prof. of Science and Technology in Society. B.A., Middlebury, 1965; M.A.T., Vanderbilt, 1966; M.A., Vanderbilt, 1969; Ph.D., Tennessee, 1974.

LABUSKI, Christine (2012), Asst. Prof. of Sociology. B.S.N., Fitchburg State College, 1984; M.S.N., Univ. of Massachusetts Medical School, 1988; M.A., Univ. of Texas at Austin, 2002; Ph.D., Univ. of Texas at Austin, 2008.

LACLAIR, Leigh A. (2011), Deputy Chief Facilities Officer, B.S., Virginia Tech 1979; MPA, Virginia Commonwealth Univ., 2003.

LACOSTE, Jean M. (1997), Senior Instructor in Accounting and Information Systems. B.S., Salisbury State, 1989; M.S., Virginia Tech, 1995.

LAI, Jason S. (1996), James S. Tucker Prof. of Electrical and Computer Engineering. B.S., National Taiwan Normal Univ., 1975, M.S., Univ. of Tennessee at Knoxville, 1985; Ph.D., Univ. of Tennessee at Knoxville, 1989.

LAMBERT, Simone F. (2006), Asst. Prof. of Education. B.A., Univ. of New Orleans, 1995; M.S., Univ. of Southern Mississippi, 1997; Ph.D., Univ. of North Carolina at Greensboro, 2001. (National Capital Region)

LANDRETH, Joyce R. (2009), Asst. Director for Support, University Computing Support. B.S., Radford Univ., 1986; B.A., Radford Univ., 1986.

LANG, Robert (2004), Assoc. Prof. of Urban Affairs and Planning (Alexandria) and Director, Metropolitan Institute. B.A., Rutgers Univ., 1985; Ph.D., Rutgers Univ., 2001.

LANZ, Otto I. (1998), Assoc. Prof. of Small Animal Clinical Sciences. D.V.M., Auburn, 1992; Diplomate, A.C.V.S.

LAPLANTE, Rebekah C. (2008), Assoc. Director of Undergraduate Admissions. B.S., Radford Univ., 1999; M.S., Radford Univ., 2001

LARSON, Martha M. (1986), Prof. of Small Animal Clinical Sciences. D.V.M., Ohio State, 1981; M.S., Ohio State, 1987; Diplomate, A.C.V.R.

LARSON, Timothy J. (1986), Prof. of Biochemistry. B.S., Texas Lutheran, 1973; Ph.D., Texas, 1978.

LATIMER, Joyce G. (1999), Prof. of Horticulture. B.S., Virginia Tech, 1978; M.S., Purdue, 1981; Ph.D., Purdue, 1986.

LATTIMER, Brian (2007), Assoc. Prof. of Mechanical Engineering. B.S., Virginia Tech, 1992; M.S., Virginia Tech, 1993; Ph.D., Virginia Tech, 1996.

LATTIMER, Kara E. (2003), Academic Advisor and Recruiter, Pamplin College of Business. B.A., Idaho State Univ., 1994; M.A.Ed., Virginia Tech, 2002.

LAUBENBACHER, Reinhard (2001), Prof. of Mathematics. M.A., Indiana Univ., 1978; Ph.D., Northwestern Univ., 1985.

LAUTENSCHLAGER, Edward A. (2007), Instructor of English. B.A., Virginia Tech, 2004; M.A., Virginia Tech, 2006.

LAVENDER, Patricia S. (1984), Assoc. Prof. of Theatre Arts. B.A., Maryville, 1970; M.A., Maryland, 1977.

LAVIN, Chad (2008), Assoc. Prof. of Political Science. B.A., U of California, Irvine, 1979; M.A., Pennsylvania State U, 1999; Ph.D., Pennsylvania State U, 2003.

LAW, Richard D. (1987), Prof. of Geosciences. B.S., Kingston Univ., 1975; M.S., Univ. of London, 1977; Ph.D., Univ. of London, 1981.

LAWRENCE, Jennifer (2003), Senior Instructor of English. B.S., Virginia Commonwealth Univ., 1990; M.A., Radford Univ., 1994.

LAWRENCE, Christopher B. (2003), Assoc. Prof. of Biology. B.S., Auburn Univ., 1990; M.S., Auburn Univ., 1993; Ph.D., Auburn Univ., 1998.

LAWSON, Gerard (2002), Assoc. Prof. of Education. B.S, Virginia Tech, 1991; M.S., Longwood College, 1996; Ph.D., College of William and Mary, 2002.

LAYNE, Margaret E. (2003), Project Director, AdvanceVT. B.E., Vanderbilt Univ., 1980; M.S., Univ. of North Carolina, 1984.

LAZAR, Iuliana M. (2003), Assoc. Prof. of Biology. M.S., Polytechnical Institute Traian Vuia; Ph.D., Brigham Young Univ., 1997.

Le CORRE, Victoria (2003), Instructor of English. B.A., Virginia Tech, 1976; M.A., Virginia Tech, 2002.

LEE, Elizabeth D. (2000), Alumni Chapter Coordinator, Alumni Relations. B.A., Longwood College, 1962; M.S., Virginia Tech, 1974; Ed.D., Virginia Tech, 1983.

LEE, Fred C. (1977), Univ. Distinguished Prof. of Electrical and Computer Engineering. B.S.E.E., Cheng-Kung, 1968; M.S., Duke, 1972; Ph.D., Duke, 1974.

LEE, Yong Woo (2004), Assoc. Prof. of Biomedical Sciences & Pathobiology and School of Biomedical Engineering. B.S., Seoul National Univ., 1986; M.S. Yonsei Univ., 1988; Ph.D., Korea Advanced Institute of Science and Technology, 1997.

LEECH, Irene (1988), Assoc. Prof. of Apparel, Housing, and Resource Management. B.S., Virginia Tech, 1980; M.S., Virginia Tech, 1982; Ph.D., Virginia Tech, 1988.

LEIB, Michael S. (1983), Prof. of Small Animal Clinical Sciences. B.S., Emory, 1974; D.V.M., Georgia, 1979; M.S., Colorado State, 1983; Diplomate, A.C.V.I.M. <sup>2,3</sup>

LEMAN, Scotland (2007), Asst. Prof. of Statistics. B.S., Univ. of California, Davis, 2001; M.S., Stanford Univ., 2005; Ph.D., Duke Univ., 2007.

LEMLY, A. Dennis (1991), Asst. Prof. of Fisheries. B.S., Western Carolina, 1978; M.S., Wake Forest, 1980; Ph.D., Wake Forest, 1983.

LEMONS, Marlow (2006), Instructor of Statistics. B.A., Georgia Southern, 2001; M.S., Georgia, 2003.

LENER, Edward F. (1992), Assoc. Prof.; Asst. Director, Collection Management, Library. B.S., Virginia Tech, 1990; M.L.S. State Univ. of New York at Albany, 1991; M.S., Virginia Tech, 1997.

LEON, Roberto T. (2011), Burrows Prof. of Civil and Environmental Engineering. B.S., Univ. of Massachusetts, Amherst, 1978; M.S., Stanford Univ., 1979; Ph.D., Univ. of Texas, Austin, 1984; P.E.

LEONARD, Robert H. (1989), Prof. of Theatre Arts. B.A., Wesleyan Univ., 1965.

LEONESSA, Alexander (2007), Assoc. Prof. of Mechanical Engineering. B.S., Univ. of Rome, 1993; M.S., Georgia Tech, 1997; M.S., Georgia Tech, 1999; Ph.D., Georgia Tech, 1999.

LEPCZYK, Billie F. (1983), Prof. of Theatre Arts. B.A., Michigan, 1973; M.A., Columbia, 1974; Ed.D., Columbia 1981.

LeROITH, Tanya (2005), Asst. Prof. of Biomedical Sciences and Pathobiology; B.S., Univ. of Maryland, 1994; D.V.M., Virginia Tech, 1999; Ph.D. Washington State Univ., 2005.

LESKO, John J. (1995), Assoc. Dean for Research and Graduate Studies and Prof. of Engineering Science and Mechanics and Assoc. Dean for Research and Graduate Studies, Engineering. B.S., Univ. of Maryland, 1987; M.S., Virginia Tech, 1991; Ph.D., Virginia Tech, 1995.

LESLIE, Susan S. (1994), Lecturer, College of Natural Resources. B.A., Richmond, 1971; M.A., Virginia Tech, 1975; M.S., Virginia Tech, 1993.

LEUSCHNER, Ian (2008), Asst. Director for Visa Services. B.S., Radford Univ., 1995; J.D., Univ. of Pittsburgh, 2004.

LEWIS, Mary Ann (1977), Assoc. Prof. and Director, First Year Experiences. B.S., Georgia Southern Univ., 1966; M.E.D., Georgia Southern Univ., 1968; Ed.D., Virginia Tech, 1976.

LEWIS, Ronald M. (2001), Prof. of Animal and Poultry Sciences. B.S., Univ. of Cal-Davis, 1981; M.S., Texas A&M Univ., 1986; Ph.D., Virginia Tech, 1990.

LI, Guohua (2007), Research Asst. Prof. of Biomedical Sciences and Pathobiology. B.S., Jiangxi Medical College (China), 1991; M.S. Capital Institute of Pediatrics (China), 1996; Ph.D., Chinese Academy of Medical Sciences & Peking Union Medical College (China), 2001; Postdoctoral, Ohio State Univ., 2007.

LI, Jianyong (2005), Assoc. Prof. of Biochemistry. D.V.M., Beijing, 1982; M.S., Beijing, 1985; Ph.D., Wisconsin-Madison, 1990.

LI, Jie (2011), Asst. Research Prof. B.S., Univ. of Science and Technology of China, 2004; M.S., Univ. of Iowa, 2007; Ph.D., Univ. of Iowa, 2009

LI, Jie-Fang (2002), Research Assoc. Prof. of Materials Science and Engineering. B.S., Shanghai Univ., 1984; M.S., Univ. of Missouri, 1987; Ph.D. Pennsylvania State Univ., 1992.

LI, Liwu (2005), Prof. of Molecular Biology. B.S., Hebei Normal Univ., China, 1986; M.S., Institute of Botany, Chinese Academy of Science, 1987; Ph.D., Univ. of Michigan, 1996.

LI, Wen (2008), Research Asst. Prof. of Biomedical Sciences and Pathobiology. M.D., Binzhou Medical College (China), 1985; M.S. Iowa State Univ., 1995.

LIN, Tao (1989), Prof. of Mathematics. B.S., Sichuan Univ., 1982; M.S., Chinese Academy of Science, 1984; Ph.D., Univ. of Wyoming, 1989.

LINDNER, Douglas K. (1982), Assoc. Prof. of Electrical and Computer Engineering. B.S. (EE), Iowa State, 1977; B.S. (Math), Iowa State, 1977; M. S., Illinois, 1979; Ph.D., Illinois, 1982.

LINDSAY, David S. (1997), Prof. of Biomedical Sciences and Pathobiology. A.A., Albany Jr. College, 1976; B.S., Troy State, 1977; Ph.D., Auburn, 1984.

LINK, Jonathan M. (2006), Assoc. Prof. of Physics. B.S., Univ. of California, Davis, 1983; M.S., Univ. of California, Davis, 1985; Ph.D., Univ. of California, Davis, 2001.

LINNELL, Peter, A. (1983), Prof. of Mathematics. Ph.D., Cambridge, 1979.

LIPSCOMB, Mary V. (1993), Senior Instructor of Biology. B.A., Wake Forest, 1980; M.S. Virginia Tech, 1986; Ph.D., Virginia Tech, 1991.

LITCHFIELD, III, Charles A. (1976), Asst. Prof.; Library. B.A., Virginia Tech, 1972; M.A., Virginia Tech, 1974; M.S., Univ. of Illinois at Urbana-Champaign, 1976.

LITTLE, John C. (1993), Charles E. Via, Jr. Prof. of Civil and Environmental Engineering. B.S., Univ. of Cape Town, 1985; M.S., Univ. of Cape Town, 1984; M.S., Univ. of California, Berkeley, 1988; Ph.D., Univ. of California, Berkeley, 1990; P.E.

LITTLE, Michael A. (2010), Asst. Prof. of Naval Science. MAJ, U.S. Marine Corps. B.A., North Carolina State Univ., 1998.

LIU, Dongmin (2004), Assoc. Prof. of Human Nutrition, Foods and Exercise. B.S., Gansu Agricultural Univ., 1989; M.S., Gansu Agricultural Univ., 1992; Ph.D., Virginia Tech, 2000; Post-Doctoral, The Univ. of Iowa Medical College, 2003.

LIU, Y.A. (1982), Frank C. Vilbrandt Prof. of Chemical Engineering. B.S., Nat. Taiwan, 1967; M.S., Tufts, 1970; Ph.D., Princeton, 1974.<sup>2,3,4,9</sup>

LIU, Ying (2007), Research Analyst, Institutional Research & Effectiveness. B.A., Univ. of International Business and Economics, 2001; M.Ed., Univ. of South Florida, 2003; Ph.D., Vanderbilt Univ., 2007.

LO, Jenny L. (2003), Advanced Instructor of Engineering Education. B.S., Tulane Univ., 1994; Ph.D., Carnegie Mellon Univ., 1999.

LOCKEE, Barbara B. (1997), Prof. of Education. B.A., Appalachian State Univ., 1986; M.A., Appalachian State Univ., 1991; Ph.D., Virginia Tech, 1997.

LOCKHART, Thurmon E. (2000), Assoc. Prof. of Industrial and Systems Engineering. B.S., Texas Tech Univ., 1992, M.S., Texas Tech Univ., 1997, Ph.D., Texas Tech Univ., 2000.

LOEFFLER, Renee G., Research Scientist. B.A. Oberlin College; Ph.D., Cornell Univ.

LOEHR, Nicholas (2007), Assoc. Prof. of Mathematics. B.S., Virginia Tech, 1997; M.S., Virginia Tech, 1998; M.A., UC San Diego, 2001; Ph.D., UC San Diego, 2003.

LOFERSKI, Joseph R. (1985), Prof. of Wood Mechanics. B.S., Colorado State, 1977; M.S., Oregon State, 1980; Ph.D., Virginia Tech, 1985.

LOHANI, Vinod K. (1998), Prof. of Engineering Education. B.S., G.B.P. Univ. of Agriculture and Technology, 1980; M.Eng., Asian Institute of Technology, 1982; Ph.D., Virginia Tech, 1995.

LoMASCOLO, Alice M. (2000), Instructor of English. B.A., Virginia Tech, 1995; M.A., Virginia Tech, 1999.

LONG, Gary L. (1983), Assoc. Prof. of Chemistry. B.S., Wake Forest, 1978; Ph.D., N.C. State, 1982.<sup>2,3</sup>

LONG, Timothy E. (1998), Professor of Chemistry and Assoc. Dean for Strategic Initiatives, College of Science. B.S., Chemistry, St. Bonaventure Univ., 1983; Ph.D., Chemistry, Virginia Tech, 1988.

LONG, Vicki (1999), Instructor of Chemistry. B.S., Univ. of Vermont, 1984; M.S. Virginia Tech, 1987.

LOPEZ-ROMERO, Nancy (2005), Instructor of Spanish. B.S., Universidad Nacional Pedro Henríquez Ureña, 1990; M.A., Virginia Tech, 2004.

LOU, Wenjing (2011), Assoc. Prof. of Computer Science. B.E., Xi'an Jiaotong Univ., 1993; M.E., Xi'an Jiaotong Univ., 1996; M.A.Sc., Nanyang Tech. Univ., 1998; Ph.D., Univ. of Florida, 2003. (Northern Virginia Center).

LOUCHOUARN, Gwendolyn (2011), Associate Director of Real Estate Management, B.A., California State Univ., Northridge, 1994.

LOVELACE, A. Lee (2010), Asst. Director of Undergraduate Admissions. B.S., Virginia Tech, 2009.

LOWE, Kimberly (2005), Asst. Director, Parent Relations, Dean of Students Office. B.S., East Tennessee State Univ., 1991; MA.Ed., Virginia Tech, 1993.

LOWE, Todd (2010), Asst. Prof. of Aerospace and Ocean Engineering. B.S., Virginia Tech, 2001; M.S., Virginia Tech, 2004, Ph.D., Virginia Tech, 2006.

LOWELL, Robert P. (2007), Research Prof. of Geosciences. B.S., Loyola Univ., 1965; M.S., Oregon State Univ., 1967; Ph.D., Oregon State Univ., 1972.

Lu, C. (2009), Assoc. Prof. of Chemical Engineering. B.S., Peking Univ., 1998; M.S., Illinois, 2001; Ph.D., Illinois, 2002.

LU, Chang-Tien (2002), Assoc. Prof. of Computer Science. B.S., Tatung Institute of Technology, 1991; M.S., Georgia Tech, 1996; Ph.D., Univ of Minnesota, 2001. (Northern Virginia Center)

LU, Guo-Quan (1992), Prof. of Materials Science and Engineering and of Electrical and Computer Engineering. B.S., Carnegie-Mellon Univ. 1984; Ph.D., Harvard Univ. 1990.<sup>4</sup>

LU, Peizhen K. (2004), Assoc. Prof. of Materials Science and Engineering. B.S., Tianjin Univ., China, 1990; M.S., Ohio State Univ., 1999; Ph.D., Ohio State Univ., 2000.

LUCHT, Marc (2010), Visiting Asst. Prof. of Philosophy and Peace Studies. B.A., Bucknell, 1991; M.A., Emory, 1995; Ph.D., Emory, 1999.

LUCIAK, Ilja A. (1987), Prof. of Political Science. J.D., Univ. of Vienna, 1979; LL.M., Univ. of Vienna, 1980; M.A., U of Iowa, 1981; Ph.D., U of Iowa, 1987.

LUKE, Timothy W. (1981), Univ. Distinguished Prof. of Political Science; Department Chair of Political Science. B.A., U of Arizona, 1972; M.A., U of Arizona, 1975; M.A., Washington U, St. Louis, 1977; Ph.D., Washington U, St. Louis, 1981.<sup>2, 3, 7</sup>

LUO, Xin M., (2012), Asst. Prof. of Biomedical Sciences and Pathobiology. B.S., China, 1998; M.S., Pennsylvania State Univ., 2001; Ph.D., Pennsylvania State Univ., 2006

LUTTRELL, Gerald H. (1986), Massey Prof. of Mining and Minerals Engineering. B.S., Virginia Tech, 1980; M.S., Virginia Tech, 1982; Ph.D., Virginia Tech, 1986.

LUTZ, Nancy A. (1992), Assoc. Prof. of Economics. B.A., Northwestern Univ., 1982; M.A., Northwestern Univ., 1982; Ph.D., Stanford Univ., 1987.

LUXBACHER, Kramer D. (2008), Asst. Prof. of Mining and Minerals Engineering. B.S., Virginia Tech, 2002; M.S., Virginia Tech, 2005; Ph.D., Virginia Tech, 2008; P.E.

LYLE, Joseph M. (2001), Talent Search Counselor. B.G.S., Radford, 1995; M.A., Radford, 2000.

LYNN, Jeremiah (2007), Instructor of German. B.A., Bloomsburg Univ., 2005; M.A., Univ. Kentucky, 2007.

LYTTON, Ruth (1986), Prof. of of Agricultural and Applied Economics. B.S., Virginia Tech, 1976; M.S., Virginia Tech, 1978; Ph.D., Virginia Tech, 1986.

MA, Lin (2011), Assoc. Prof. of Aerospace and Ocean Engineering. B.S., Tsinghua Univ. (China); M.S., Stanford, 2001; Ph.D. Stanford, 2006.

MABRY, Curtis L. (2001), Director of Staffing and Recruitment. B.S., Virginia Tech, 1989.

MACEDO, Peter (2004), Director, Distance Learning and Summer Sessions. B.S., Physics, Virginia Tech, 1977; M.A., Virginia Tech, 1998.

MACHIN, Jane E. (2006), Asst. Prof. of Marketing. B.A., Swansea Univ., 1995; Ph.D. Wharton School, Univ. of Pennsylvania, 2006.

MACKAY, Jennifer Burleson (2008), Asst. Prof. of Communication. B.A., Univ. of North Carolina, 1998; M.A., Univ. of Alabama, 2004; Ph.D., Univ. of Alabama, 2008.

MACKENZIE, Allen B. (2003), Assoc. Prof. of Electrical and Computer Engineering. B.Eng., Vanderbilt Univ., 1999; Ph.D., Cornell Univ., 2003.

MACKEY, Zachary B. (2011), Asst. Prof. of Biochemistry. B.S., Nebraska-Lincoln, 1989; Ph.D., Texas Health Science Center at San Antonio, 2000.

MADIGAN, Michael L. (2001), Assoc. Prof. of Engineering Science and Mechanics. B.S., Texas A&M, 1994; M.S., Texas A&M, 1996; Ph.D., Virginia Commonwealth Univ., 2001.

MADSEN, Louis A., (2006) Asst. Prof. of Chemistry. B.A., Grinnell College, 1994; Ph.D., California Institute of Technology, 2002.

MAGEE, Robert G. (2006), Asst. Prof. of Communication. B.A., Belmont Univ., 1988; M.A., Vanderbilt Univ., 1991; M.A., Univ. of Miami, 2001; Ph. D., Univ. of North Carolina at Chapel Hill, 2006.

MAGLIARO, Susan G. (1988), Prof of Education, Assoc. Dean for Professional Education and Director of the School of Education, Liberal Arts and Human Sciences. B.S., East Stroudsburg Univ., 1977; M.S., Iowa State Univ., 1981; Ed.D., Virginia Tech, 1988.

MAGNINI, Vincent P. (2008), Asst. Prof. of Hospitality and Tourism Management. B.A., Virginia Tech, 1996; M.A., Wichita State Univ., 2001; Ph.D., Old Dominion Univ., 2004.

MAGUIRE, Rory O. (2006), Assoc. Prof. of Crop and Soil Environmental Sciences. B.S., Univ. of Glasgow, 1992; Ph.D., Univ. of Aberdeen, Scotland, 1996.

MAHAJAN, Roop L. (2006), Director of the Institute for Critical Technology and Applied Sciences and Profe.of Engineering Science and Mechanics. B.S., Punjab Engineering College, 1964; M.S. Punjab Engineering College, 1969; Ph.D., Cornell, 1977.

MAHER, John J. (1985), John F. Carroll, Jr. Prof. of Accounting and Information Systems. B.S., Scranton, 1976; M.B.A., Scranton, 1980; Ph.D., Pennsylvania State, 1985.

MAJOR, Raymond L. (1994), Assoc. Prof. of Business Information Technology. B.S.E.E., Univ. of Florida, 1978; M.B.A., Univ. of Florida, 1990; Ph.

D., Univ. of Florida, 1994. (Northern Virginia Center)

MALBON, Elizabeth S. (1980), Prof.; Department of Religion and Culture. B.A., Florida State Univ., 1969; M.A., Florida State Univ., 1970; Ph.D., Florida State Univ., 1980.

MALLIKARJUNAN, Parameswara Kumar (1999), Assoc. Prof. of Biological Systems Engineering. B.E., Tamilnadu Agricultural Univ., 1986; M.E., Asian Institute of Technology, 1988; Ph.D., Univ. of Guelph, 1993.

MANN, Jeffrey (1989), Assoc. Prof. of English. B.A., West Virginia Univ., 1981; M.A., West Virginia Univ., 1984.

MANN, Robert T. (2010), Capital Program Budget Manager. B.S., Virginia Tech, 2000; M.B.A., Virginia Tech, 2007.

MANSI, Sattar (2002), Assoc. Prof. of Finance. B.S., Univ. of Wisconsin-Milwaukee, 1983; M.B.A., George Washington, 1990; Ph.D., George Washington, 1999.

MANTEGHI, Majeid (2009), Asst. Prof. of Electrical and Computer Engineering. B.S., Univ. of Tehran, 1994; M.S., Univ. of Tehran, 1997; Ph.D., UCLA, 2005.

MARAND, Eva (1992), Prof. of Chemical Engineering. B.S.ChE, Illinois, 1981; M.S., Massachusetts, 1982; Ph.D., Massachusetts, 1987.

MARAND, Hervé (1989), Prof. of Chemistry. Diplome d'Ingenieur, Ecole Nat. Sup. de Chimie de Paris, 1982; M.S., Univ. of Massachusetts, 1983; Ph.D., Univ. of Massachusetts, 1987.

MARATHE, Achla (2004), Assoc. Prof. of Agricultural and Applied Economics. B.A., Univ. of Delhi, India, 1986; M.A., Maharashi Dayanand Univ., Rohtak, India, 1988; M.A., Univ. at Albany, SUNY, 1989; Ph.D., Univ. at Albany, SUNY, 1994.

MARATHE, Madhav (2005), Prof. of Computer Science. B. Tech., Indian Institute of Technology, 1989; Ph.D., Univ. at Albany, SUNY, 1994.

MARCHANT, Mary A. (2006), Prof. of Agricultural and Applied Economics. B.S., Univ. of California, Davis, 1979; M.A., Univ. of California, Davis, 1982; Ph.D., Univ. of California, Davis, 1989.

MARCHANY, Randolph C. (2009), Information Technology Security Officer. B.S., Virginia Tech, 1981; M.S., Virginia Tech, 1992.

MARCY, Joseph E. (1988). Prof. and Department Head of Food Science and Technology. B.S. Univ. of Tennessee, 1974; M.S. Univ. of Tennessee, 1976; Ph.D. North Carolina State, 1980.<sup>2</sup>

MARIANI, Camillo (2012), Asst. Prof. of Physics. M.S., Univ. of Rome, 2003; Ph.D., Univ. of Rome, 2008.

MARIGER, Stanley C. (2003), Instructor of Biological Systems Engineering. B.S., Saint Vincent College, 1991; B.S., Utah State Univ., 1996; M.S., Utah State Univ., 2000; Ph.D., Oklahoma State Univ., 2003.

MARKHAM, Steven E. (1978), Digges Prof. of Entrepreneurship. B.A., Claremont, 1974; Ph.D., SUNY (Buffalo), 1978.

MARR, Linsey C. (2003), Assoc. Prof. of Civil and Environmental Engineering. B.S., Harvard College, 1996; Ph.D., Univ. of California, Berkeley, 2002.

MARSHALL, Henrietta D. (1997), Talent Search Counselor. B.S., Virginia Tech, 1978; M.S., Anderson Univ. 1983.

MARSTON, Cynthia (2003), District Director, Northern District, Extension. B.S., Virginia, 1980; M.S., Virginia Tech, 1981.

MARTENS, Bradley P. (1995), Director of Finance and Budget, Engineering. B.S., Virginia Tech, 1988; B.S., Virginia Tech, 1996; M.S. Virginia Tech, 1991.

MARTIN, II, James R. (1990), Prof. of Civil and Environmental Engineering. B.S., The Citadel, 1985; M.S., Virginia Tech, 1987; Ph.D., Virginia Tech, 1990.<sup>9</sup>

MARTIN, Jennifer (2010), Residential Learning Coordinator, Student Affairs, B.A. Univ. of Virginia, 2004; M.Ed., Univ. of Georgia, 2008.

MASSEY JR., John D. (2009), Assistant Director of Professional Development. B.S., High Point Univ., 1993; M.A., Virginia Tech, 2011.

MARTIN, Michael J. (1998), District Director, Southwest District, Extension. B.B.A., Radford, 1990; M.B.A., Radford, 1994.

MARTIN, Shelley (1992), Assoc. Prof. of Architecture. B.Arch, Virginia Tech, 1984; M.Arch., Virginia Tech, 1987.

MARTIN, Stephanie (2003), Instructor of English. B.A., Virginia Tech, 1998; M.A., Virginia Tech, 2001.

MARTIN, Stephen M. (2006), Asst. Prof. of Chemical Engineering. B.S., Princeton, 1999; Ph.D., Minnesota, 2004.

MARTIN, Thomas L. (2001). Assoc. Prof. of Electrical and Computer Engineering. B.S., Cincinnati, 1992; M.S., Carnegie Mellon, 1994; Ph.D., Carnegie Mellon, 1999.<sup>10</sup>

MARTIN, Thomas P. (2005), Instructor of Agricultural Technology. B.S., Virginia Tech, 1992; B.A., Virginia Tech, 1993; M.S., Virginia Tech, 2001.

MASON, Steven W. (2010), Asst. Prof. of Naval Science. LT, U.S. Navy. B.S., U.S. Naval Academy, 2003; M.S., Johns Hopkins Univ., 2004.

MATEESCU, Gabriel (2012), Computational Scientist. M.S., Virginia Tech, 1997; Ph.D. Virginia Tech, 1998.

MATHER, William (2012), Asst. Prof. of Physics. B.S., Georgia Tech, 2003; Ph.D., Georgia Tech, 2007.

MATHESON, Lance A. (1989), Assoc. Prof. of Business Information Technology. B.S., Washington, 1974; M.B.A., Washington, 1984; Ph.D., Washington, 1989.

MATTAVELLI, Paolo (2010), Prof. of Electrical and Computer Engineering. M.S., Univ. of Padova, 1992; Ph.D., Univ. of Padova (Italy), 1996.

MATTHEWS, Cullen C. (2011), Asst Prof. of Naval Science. LT, U.S. Navy. B.S., Univ. of Central Arkansas, 2006.

MATUSOVICH, Holly M. (2008), Asst. Prof. of Engineering Education. B.S., Cornell Univ., 1994; M.S., Univ. of Connecticut, 1999; Ph.D., Purdue Univ., 2008.

MAULDON, Matthew (2001), Assoc. Prof. of Civil and Environmental Engineering, B.A, Geology, Univ. of California, Berkeley, 1985; M.S., Univ. of California, Berkeley, 1986; Ph.D., Univ. of California, Berkeley, 1992.

MAYCOCK, Michelle S. (2007), Instructor of English. B.A., Virginia Tech, 1983; M.A., Virginia Tech, 1985; M.A., Hollins Univ., 1987.

MAYNOR, Ashley (2008), Instructor of Cinema. B.A., Univ. of Tennessee, Knoxville, 2004; M.F.A., Temple Univ., 2008.

MAYO, Deborah G. (1978), Prof. of Philosophy. B.A., Clark, 1974; Ph.D., Pennsylvania, 1979.

MAZZOLINI, Elizabeth A. (2009), Visiting Asst. Prof. of English. B.A., Ohio State Univ., 1996; M.A., Pennsylvania State Univ., 2002; Ph.D., Pennsylvania State Univ., 2006.

McALISTER, J. Douglas (1974), Prof. Emeritus of Univ. Outreach, and Director of Development and Strategic Partnerships. B.S., East Tenn. State Univ., 1967; M.A., East Tenn. State Univ., 1968; Ed.D., Univ. of Georgia, 1973.

McBEE, Janice (2000), Research Analyst, Institutional Research & Effectiveness, B.A., West Virginia Univ., 1970; M.Ed., Virginia Tech, 1974.

McCANN, Julia S. (2007), Instructor of Animal and Poultry Sciences. B.S., N.C. State Univ., 1979; M.S., Virginia Tech, 1981; Ph.D., Texas Tech Univ., 1985.

McCANN, Mark A. (2001), Prof. of Animal and Poultry Sciences. B.S., N.C. State Univ., 1980; M.S., N.C. State Univ., 1983; Ph.D., Texas Tech Univ., 1986.

McGinnis, Sean P. (2005), Research Assoc. Prof. of Materials Science and Engineering. B.S., Stanford Univ., 1992; M.S., Stanford Univ., 1992; Ph.D., Stanford Univ. 1996.

McCLEARY, Ken W. (1989), Prof. of Hospitality and Tourism Management. B.A., Michigan State Univ., 1970; M.B.A., Michigan State Univ., 1971; Ph.D., Michigan State Univ., 1977.

McCLINTON, Leon (2007), Director of Residence Life, Student Affairs. B.S., Clemson Univ., 1992; M.A., Clemson Univ., 1994; Ph.D., Clemson Univ., 2006.

McCLURE, James E. (2012), Computational Scientist. B.S. Univ. of North Carolina at Chapel Hill, 2003; Ph.D., Univ. of North Carolina at Chapel Hill, 2011.

McCOLLUM, Eric E. (1992), Prof. of Human Development. B.A., Univ. of Iowa, 1974; M.S.W., Univ. of Iowa, 1975; Ph.D., Kansas State, 1986. (Northern Capital Region Campus)

McCOY, Andrew P. (2008), Asst. Prof. of Building Construction. B.A./B.S., Univ. of Virginia, 1997; M.S., Virginia Tech, 2007.

McCOY, Heidi M. (2006), Chief of Staff, Vice President for Administrative Services, B.S., Bluefield College, 2001; M.P.A., Virginia Tech, 2005.

McCOY, Virginia L. (2008), Associate Director of Mail and Records Management Services. B.A., Emory and Henry, 1984.

McCRICKARD, D. Scott (2000), Assoc. Prof. of Computer Science. B.S., Univ. of North Carolina at Chapel Hill, 1992; M.S., Georgia Institute of Technology, 1995; Ph.D., Georgia Institute of Technology, 2000.

McCUE, Leigh S. (2005), Assoc. Prof. of Aerospace and Ocean Engineering. B.S.E., Princeton Univ., 2000; M.S.E., Univ. of Michigan, 2001; M.S.E., Univ. of Michigan, 2002; Ph.D., Univ. of Michigan, 2004.

McDANIEL, Alan R. (1975), Assoc. Prof. of Horticulture. B.S., Iowa State, 1970; Ph.D., Tennessee, 1975.

McDONALD, Kevin (2005), Vice President for Multicultural Affairs & Equity. B.A., Andrews Univ., 1993; J.D., The Ohio State Univ., 1996.

McDONALD, Teresa L. (1997), Instructor of Animal and Poultry Sciences. B.S., Radford, 1980; M.S., Radford, 1985.

McDOWELL, John M. (2000), Assoc. Prof., Plant Physiology. B.A., Univ. of Tennessee, Knoxville, 1987; Ph.D., Univ. of Georgia, Athens, 1995.

McDUFFIE, Robert F. (1978), Assoc. Prof. of Horticulture. B.M.P., East Carolina, 1975; M.L.A., N. C. State, 1978.

McELROY, Audrey P. (1999), Prof. of Animal and Poultry Sciences. B.S., Texas A&M, 1993; M.S., Texas A&M, 1995; Ph.D. Texas A&M, 1998.

McELROY, Tracy L. (1999), Director, Information Technology Services. B.A., Virginia Tech, 1996.

McFERREN, Mary M. (2003), Research Assoc. of Human Nutrition, Foods and Exercise. B.S., Univ. of Southwestern Louisiana, 1970; M.S., Kansas State, 1987; Ph.D., Virginia Tech, 2008.

McGARRY, David E. (2006), Assoc. Controller for Financial Reporting and Cost Accounting. M.S., Univ. of Utah, 1978; C.P.A.

McGEE, Jesse S. (2007), Assoc. Director of Finance and Business Services, UUSA. B.A., Virginia Tech, 1976; B.S., Virginia Tech, 1984; M.B.A., Regis Univ., 2003.

McGEE, John (2003), Research Assoc. Prof., Natural Resource Management. B.A., Univ. of North Carolina, Chapel Hill, 1988; M.A., Univ. of North Carolina, Charlotte, 1992; Ph.D., Univ. of Massachusetts, Amherst, 1997.

McGEHEE, Nancy G. (2001), Assoc. Prof. of Hospitality and Tourism Management. B.A., Marshall Univ., 1985; M.S., North Carolina State Univ., 1991; M.S., Virginia Tech, 1994; Ph.D., Virginia Tech, 1999.

McGLOTHLIN, Joel W. (2012), Asst. Prof of Biology. B.A., Vanderbilt Univ., 2001; Ph.D., Indiana Univ., 2007.

McGRATH, James E. (1975), Univ. Distinguished Prof. of Chemistry, Ethyl Corporation Prof. B.S., Siena, 1956; M.S., Akron, 1964; Ph.D., Akron, 1967.<sup>6</sup>

McGRATH, Margarita (2001), Assoc. Prof. of Architecture. B.Arch., Rice Univ., 1990; M.Arch. Univ. of California, 1995.

McGRATH, Robert (2007), Asst. Prof. of Theatre Arts. B.F.A., Carnegie Mellon Univ., 1980.

McGUIRE, Kevin J. (2008), Asst. Prof. of Forest Hydrology. B.S., Susquehanna Univ., 1997; M.S., Penn State, 1999; Ph.D., Oregon State, 2004.

McGWIER, Robert W. (2011) Research Prof. & Director of Research, Hume Center. B.S., Auburn Univ., 1976; M.S., Auburn Univ., 1978; Ph.D., Brown Univ., 1984.

McINTYRE, Christina M. (1995), Assoc. Director, Univ. Honors. B.S., Virginia Tech, 1988; M.S., Virginia Tech, 1995.

McKEE, David M. (1987), Senior Instructor of Music. B.M.E., Shenandoah Conservatory of Music, 1976; M.A., Virginia Tech, 1986.

McKENZIE, Harold C., III (1995), Assoc. Prof. of Equine Internal Medicine, Marion duPont Scott Equine Medical Center. B.S., Davidson College, 1986; D.V.M., Univ. of Georgia, 1990; M.S., Virginia Tech, 1999; Diplomate A.C.V.I.M., 2000.

McKINNEY, Letecia N. (2012), Academic and Study Abroad Advisor, Pamplin College of Business. B.S., North Carolina A & T State University, 1995; M.S., Virginia Tech, 1998; Ph.D., Virginia Tech, 2000.

McMILLAN, Gail M. (1982), Prof.; Director, Digital Libraries and Archives, Library. B.A., California (Riverside), 1972; M.A., M.L.S., Maryland, 1981.

McMULLEN, Matt (2008), Program Director, Education Abroad. B.A., Univ. of Pittsburgh (1990); Ph.D., Univ. of Pittsburgh, 1996; J.D., Univ. of Pittsburgh, 2004.

McMULLIN, Steve L. (1989), Assoc. Prof. of Fisheries and Wildlife. B.S., Idaho, 1978; M.S., Idaho, 1979; Ph.D., Virginia Tech, 1993.

McNAIR, Elizabeth D. (2005), Asst. Prof. of Engineering Education. B.A., Univ. of Georgia, 1985; M.A., Univ. of Georgia, 1993; Ph.D., Univ. of Chicago, 2002.

McNAMEE, Mark G. (2001), Senior Vice President and Provost. B.S., Massachusetts Institute of Technology, 1968; Ph.D., Stanford Univ., 1973.

McNEILL, George R. (1991), Instructor of Music. Diploma, U.S. Army School of Music, Virginia, 1979.

MCPHERSON, David P. (2010), Asst. Director, ePortfolio Development. B.S., Virginia Tech, 1994; M.S., Radford Univ., 1996.

MCPHERSON, Tristram (2011), Asst. Prof. of Philosophy, B.A., Simon Fraser, 2003; Ph.D., Princeton, 2008.

McQUAIN, Margaret P. (1980), Advanced Instructor of Mathematics. B.A., UNC at Greensboro, 1968; M.S., Univ. of Miami, 1970.

McQUAIN, William D. (1995), Senior Instructor of Computer Science. B.A., Virginia Tech, 1976; M.S., Virginia Tech, 1978; M.S. Virginia Tech, 1992.

McSHERRY, Laurel (2006), Assoc. Prof. of Landscape Architecture and Director, National Capital Region Master's of Landscape Architecture Program. B.S.L.A., Rutgers Univ., 1983; M.L.A., Harvard Univ., 1989.

MEASE, Stuart (2000), Director of Undergraduate Career Services, Pamplin College of Business. B.S., Virginia Tech, 1997; M.B.A., Virginia Tech, 2000.

MEDINA VIDAL, D. Xavier (2012), Asst. Prof. of Political Science. B.A., U of New Mexico, 2001; M.A., U of New Mexico, 2004; Ph.D., U of California, Riverside, 2012.

MEEHAN, Kathleen A. (2002), Assoc. Prof. of Electrical and Computer Engineering. B.S.E.E., Manhattan College, 1980; M.S., Illinois, 1982; Ph.D., Illinois, 1985.

MEIER, Carolyn (2006), Asst. Prof.; Library. B.S., Ohio Dominican College, 1972; M.A., Univ. of Michigan, 1974.

MEITNER, Erika (2007), Assoc. Prof. of English. A.B., Dartmouth College, 1996; M.F.A., Univ. of Virginia, 2001.

MELDRUM, J. Blair (1980), Prof. of Biomedical Sciences and Pathobiology. D.V.M., Saskatchewan (Canada), 1971; Ph.D., Saskatchewan (Canada), 1978.

MELIN, Benjamin A. (2010), Asst. Prof. of Military Science. B. S., Liberty Univ., 2006.

MELLO, Marcelo (2002), Asst. Prof. of Economics. B.A. and M.A., Pontifical Catholic Univ. at Rio de Janeiro, 1992 and 1995; M.Sc., Univ. of Illinois at Urbana-Champaign, 2001; Ph.D., Univ. of Illinois at Urbana-Champaign, 2002.

MELVILLE, Stephen B. (2001), Assoc. Prof. of Microbiology. B.S., San Diego State, 1982; Ph.D., California, (Davis), 1987.

MENG, Xiang-Jin, (1999), Prof. of Biomedical Sciences and Pathobiology. M.D., Binshou Medical College (China) 1985; M.S., Hubei Medical College (China), 1988; Ph.D., Iowa State, 1995.

MENGERT, Julie (2003), Advanced Instructor of English. B.A., Virginia Tech, 2001; M.A., Virginia Tech, 2003.

MEREDITH, Joe W. (1993), President, Virginia Tech Corporate Research Center; B.S., Virginia Tech, 1969; M.S., Purdue Univ., 1970; Ph.D.,

Virginia Tech, 1997.

MEROLA, Joseph S. (1987), Prof. of Chemistry. B.S., Carnegie-Mellon, 1974; Ph.D., MIT, 1978.<sup>2,7</sup>

MERRILL, Margaret (1997), Asst. Prof.; Library. B.A., Converse College, 1966; M.A.L.S. Denver, 1968; M.S., Georgia, 1979.

MESMER, Heidi Anne E. (2007), Assoc. Prof. of Education. B.A., College of William and Mary, 1991; M.Ed., Univ. of Virginia, 1992; Ph.D., Univ. of South Florida, 1999.

MESZAROS, Peggy S. (1993), Director, Center for Information Technology Impacts on Children, Youth, & Families, and Prof. of Human Development. B.S., Austin Peay State, 1962; M.S., Univ. of Kentucky, 1972; Ph.D., Univ. of Maryland, 1977.

METZ, Nancy A. (1977), Prof. of English. B.A., Univ. of North Carolina, 1971; M.A., Univ. of Michigan, 1971; Ph.D., Univ. of Michigan, 1977.<sup>10</sup>

METZ, Paul D. (1979), Prof.; Director, Collection Management, Library. A.B., Univ. of North Carolina at Chapel Hill, 1970; M.L.S., Michigan, 1977; Ph.D., Michigan 1977.

MICHEL, Frederick M. (2012), Asst. Prof. of Geochemistry. B.A., Colgate Univ. 1998; Ph.D., Stony Brook Univ., 2007.

MIDKIFF, Scott F. (1986), Department Head and Prof. of Electrical and Computer Engineering. B.S.E., Duke, 1979; M.S.E.E., Stanford, 1980; Ph.D., Duke, 1985.

MIHALCEA, Constantin Leonardo (2011), Asst. Prof. of Mathematics. B.A., Babes-Bolyai Univ., 1997; M.S., Babes-Bolyai Univ., 1998; Ph.D., Univ. of Michigan, 2005.

MILI, Lamine M. (1988), Prof. of Electrical and Computer Engineering. Diploma (B.S.), Swiss Federal Institute of Technology, 1976; DEA, Tunis, 1981; Doctorat, Tunis, 1983; Ph.D., Leige, Belgium, 1988. Northern Virginia Campus.

MILLER, Carrie (1999), Assoc. Director, Univ. Scholarships and Financial Aid. B.A., Columbia International Univ., 1996.

MILLER, Dini M. (1999), Assoc. Prof. of Entomology. B.A., Univ. of California, Los Angeles, 1991; M.S., Univ. of Florida, 1994; Ph.D., Univ. of Florida, 1998.

MILLER, Emily I. (2011), Asst. Prof. of Small Animal Clinical Sciences. DVM, VMRCVM, 2006; Diplomate ACVS.

MILLER, Kenneth E. (2000), Univ. Controller. B.S., Virginia Tech, 1980; C.P.A.

MILLER, Patrick A. (1986), Assoc. Dean for Graduate Studies and Outreach, College of Architecture and Urban Studies; Prof. of Landscape Architecture. B.S.L.A., California State Polytechnic Univ., 1970; M.L.A., Univ. of California, Berkeley, 1973; Ph.D., Univ. of Michigan, 1984.

MILLETT, Joseph D. (2012), Asst. Prof. of Theatre Arts. B.A., Union College, 1978; M.F.A., Univ. of Southern California, 1982.

MILLS, Bradford F. (1997), Assoc. Prof. of Agricultural and Applied Economics. B.A., Hobart College, 1984; M.S., Univ. of Connecticut, 1986; Ph.D., California-Berkeley, 1993.

MILLS, Thomas H. (1993), Assoc. Prof. of Building Construction. B.Arch., Virginia Tech, 1978; M.S., Virginia Tech, 1993.

MILLY, Deborah J. (1991), Assoc. Prof. of Political Science and Government and International Affairs. B.A., Univ. of Michigan, 1974; M.A., Sophia U, Tokyo, 1982; M.Phil., Yale, 1986; Ph.D., Yale, 1990.

MILMAN-MILLER, Nyusya (2002), Assoc. Prof. of Russian. B.A. & M.A., Moscow State Pedagogical Univ., 1976; Ph.D., Univ. of Michigan, 1993.

MINKOVA, Yuliya (2011), Asst. Prof. of Russian. B.S., Yeshiva Univ., 1996; M.A., New York Univ., 1999; Ph.D., Univ. of Southern California, 2007.

MINIC, Djordje (2001), Assoc. Prof. of Physics. Diploma, Belgrade Univ., 1988; Ph.D., Univ. of Texas at Austin, 1993.

MITCHELL, Kimberly J. (2008), Asst. Prof. of Apparel, Housing, and Resource Management. B.S., Virginia Tech, 1993; CPM, Institute of Real Estate Management, 1997; Ph.D., Virginia Tech, 2008.

MIYAZAKI, Yasuo (2003), Assoc. Prof. of Education. B.S., Tokyo Metropolitan Univ., 1982; M.S., Tokyo Metropolitan Univ., 1984; M.S.Ed., Univ. of Pennsylvania, 1993; Ph.D., Michigan State Univ., 2000.

MOEHLER, Michael (2010), Asst. Prof. of Philosophy. B.Sc., Univ. of Bremen, 2002; M.Sc., London School of Economics, 2003; Ph.D., London School of Economics, 2007.

MOELTNER, Klaus (2010), Assoc. Prof. of Agricultural and Applied Economics. M.S., Univ. of Agriculture and Forestry, Vienna, Austria, 1990; M.A., Monterey Institute of International Studies, 1994; M.A., Univ. of Washington, 1998; Ph.D., Univ. of Washington, 2000.

MOEN, Cristopher D. (2008), Asst. Prof. of Civil and Environmental Engineering. B.S., UVA, 1995; M.S., UVA, 1997; Ph.D., The Johns Hopkins Univ., 2008.

MOGLEN, Glenn E. (2008), Prof. of Civil and Environmental Engineering. B.S., Univ. of Maryland, 1987; M.S., Colorado State Univ., 1989; Ph.D., MIT, 1995; (National Capital Region Campus).

MOLLIN, Marian B. (2000), Assoc. Prof. of History. B.S., Cornell, 1982; M.A., Massachusetts, Amherst, 1995; Ph.D., Massachusetts, Amherst, 2000.

MONDAY, Justin W. (2010), Asst. Prof. of Aerospace Studies, Air Force ROTC. B.S., Bellevue Univ., 2000; M.B.A., Troy Univ., 2009.

MONROE, W. Edward (1985), Prof. of Small Animal Clinical Sciences. B.S., Arizona, 1976; D.V.M., Colorado State, 1980; M.S., Iowa State, 1984; Diplomate, A.C.V.I.M

MONTAGUE, P. Read (2011), Prof. of Physics. B.S., Auburn Univ., 1983; Ph.D., Univ. of Alabama at Birmingham, 1988.

MONTGOMERY, John P., (2011), Prof. of Aerospace Studies, Air Force ROTC. 1986 BS Mathematics USAF Academy; 1996 Master Degree Aeronautical Science Tech Embry Riddle Univ; 2006 Masters Degree Nat'l Security Strategy Nat'l Defense Univ Nat'l War College, Ft McNair Washington DC (distinguished graduate)

MOONEY, Jennifer (1996), Senior Instructor of English. B.A., Clinch Valley College, 1983; M.A., Univ. of Kentucky, 1988; Ph.D., Univ. of Kentucky, 1999.<sup>1</sup>

MOONEY, Stephen D. (1996), Senior Instructor of English. B.A., Clinch Valley College, 1983; M.A., Univ. of Kentucky, 1988; Ph.D., Univ. of Kentucky, 1998.

MOORE, Anne H. (1995), Assoc. VP, Learning Technologies. B.A., William & Mary, 1970; M.A., William & Mary, 1977; Ed.D., William & Mary, 1984.

MOORE, David (1985), Assoc. Vice President for Research Compliance and Assoc. Prof. of Biomedical Sciences and Pathobiology. B.S., Louisiana Tech, 1974; M.S., Louisiana Tech, 1976; D.V.M., L.S.U., 1980; Diplomate, A.C.L.A.M.

MOORE, Ignacio T. (2003), Assoc. Prof. of Biology. B.S., Univ. of Arizona; Ph.D., Oregon State Univ., 1999.

MOORE, John F. (1971), Senior Director, Strategy and Planning, Learning Technologies, and Assoc. Prof. B.S.C., Ohio Univ., 1970; M.A., Ohio Univ., 1971; Ed.D., Virginia Tech 1982.

MOORE, Karisa A. (2006), Director of Equity Initiatives. B.A., Berea College, 1994; M.S., Virginia Tech, 2008.

MOORE, Keith M. (1994), Assoc. Program Director SANREM CRSP. B.A., Univ. of California-Santa Cruz, 1974; M.S.S., Institute of Social Studies, The Netherlands, 1978; Ph.D., Univ. of Wisconsin-Madison, 1984.

MOORE, Mary Denson (1984), Senior Instructor of English. B.A., Salem College (Winston-Salem, NC), 1976; M.A., Virginia Tech, 1984.

MOORE, Robert B. (2008), Prof. of Chemistry. B.S., Angelo State Univ., 1983; Ph.D., Texas A&M Univ., 1988.

MOORE, Timothy W. (2009), Data Warehouse Architect, Enterprise Systems. B.A., Grover City College, 1989; M.S., DeSales Univ., 2000.

MOORE, Wayne D. (1992), Assoc. Prof. of Political Science. B.A., UVa, 1980; J.D., UVa School of Law, 1983; M.A., Princeton, 1987; Ph.D., Princeton, 1992.

MOOREFIELD-LANG, Heather M. (2008), Asst. Prof., Library. B.A., Univ. of North Carolina at Greensboro, 1996; M.L.I.S., Univ. of North Carolina at Greensboro, 2000; Ed.D., Univ. of North Carolina at Chapel Hill, 2008.

MORGAN, George E. (1984), SunTrust Prof. of Finance. B.S., Georgetown, 1973; M.S., UNC, 1975; Ph.D., UNC, 1977.

MORGAN, John P. (2000), Prof. of Statistics. B.S., Roanoke College, 1979; M.S., UNC, 1982; Ph.D., UNC, 1983.

MORRIS, Amanda J. (2011), Asst. Prof. of Chemistry. B.S., Pennsylvania State Univ., 2005; Ph.D., Johns Hopkins Univ., 2009

MORRIS, Amy C. (2009), Accounts Payable Manager. M.S., Virginia Tech, 2001.

MORRIS, John R. (1999), Prof. of Chemistry. B.S., Aquinas College, 1991; Ph.D. Univ. of Notre Dame, 1996.

MORTIMER, Michael J. (2008), Director, Northern Virginia Natural Resources Programs. B.A., Washington & Jefferson College, 1988; J.D., Penn State Univ., 1991; Ph.D., Univ. of Montana, 2001.

MORTVEIT, Henning (2005). Assoc. Prof. of Mathematics. M.S., Norwegian Institute of Technology, 1995; Ph.D., Norwegian Institute of Technology, 2000.

MOSELEY-CHRISTIAN, Michelle (2007), Asst. Prof. of Art History. B.A., Univ. of North Alabama, 1996; B.A., Univ. of Alabama, 1997; M.A., Univ. of Alabama, 2000; Ph.D., Univ. of Kansas, 2007.

MOSSER, Daniel W. (1985), Prof. of English. B.S., Portland State Univ., 1974; M.A., Univ. of Texas, 1981; Ph.D., Univ. of Texas, 1985.

MOSTAGHIMI, Saied (1984), H.E. and Elizabeth F. Alpin Prof. of Biological Systems Engineering; Director of the Virginia Agricultural Experiment Station and Assoc. Dean for Research and Graduate Studies, College of Agriculture and Life Sciences. B.S., Pahlavi, 1976; M.S., Illinois, 1979; Ph. D., Illinois, 1982.

MOURAS, Steven L. (1995), Director of Transportation and Campus Services. B.A., The Citadel, 1977; M.A., Virginia Tech, 2005.

MOURAS, Victoria A. (2010), Asst. Prof. of Practice of Civil and Environmental Engineering. B.S., Virginia Tech, 1978; M.S., Virginia Tech, 1997; P.E.

MOY, Geoffrey D., (2011) Asst. Prof. of Aerospace Studies, Air Force ROTC. B.A. Mechanical Engr West Virginia Univ.

MOYO, Lesley Mutina (2006), Assoc. Prof.; Director, Research and Instructional Services, Library. B.A., Univ. of Zambia, 1981; M.L.I.S. Univ. of California, Berkeley, 1983.

MUELLER, Rolf (2008), Assoc. Prof. of Mechanical Engineering. B.S., Univ. of Tuebingen, 1992; M.S., Univ. of Tuebingen, 1995; Ph.D., Univ. of Tuebingen, 1998.

MUKHERJEE, Konark (2011), Asst. Prof. of Molecular and Cellular Biology. M.B.B.S., Indira Gandhi Medical College and Hospital, 1994; Ph.D., Jawaharlal Univ., 2000.

MULHARE, Michael J. (2008), Director of Emergency Management. B.A., St. Joseph's College, 1979; M.S., Univ. of Rhode Island, 1985.

MULLARKY, Isis (2006), Assoc. Prof. of Dairy Science. B.S., Univ. Vermont, 1996; M.S., Univ. Vermont, 1998; Ph.D., Penn State Univ., 2003.

MULLINS, Donald E. (1973), Prof. of Entomology. B.A., Colorado, 1966; M.S., Colorado State, 1968; Ph.D., Virginia Tech, 1971.

MULVANEY, Emma (2010), Instructor of Communication. B.S., Cork Institute of Technology, Ireland, 1998; M.S.T., Auburn Univ., 2008.

MULVANEY, Michael (2010), Asst. Program Director, SANREM CRSP. B.S., Univ. of Connecticut, 1995; Ph.D., Auburn Univ., 2010.

MUN, Seong Ki (2008), Prof. of Physics. B.S., Univ. of California at Riverside, 1969; Ph.D., State Univ. of New York at Albany, 1979.

MUNIAPPAN, Rangaswamy (2006), Program Director, IPM CRSP. B.S., Univ. of Madras, 1963; M.S., Univ. of Madras, 1965; Ph.D., Oklahoma State Univ., 1969.

MUNSELL, John F. (2007), Assoc. Prof. of Forest Management and Extension Specialist. B.A., Tulane Univ., 1995; M.S., SUNY, 2003; Ph.D., SUNY, 2007.

MURALI, T. M. (2003), Assoc. Prof. of Computer Science. B.Tech., Indian Institute of Technology, Madras, 1991; Sc.M., Brown Univ., 1993; Ph.D., Brown Univ., 1999.

MURAYAMA, Mitsu (2011), Assoc. Prof. of Materials Science and Engineering. B.S., Tohoku Univ., Japan, 1991; M.S., Tohoku Univ., 1993; Ph.D., Tohoku Univ., 1996.

MURPHY, Aileen (1994), Senior Instructor of English. B.A., Oklahoma State Univ., 1985; M.F.A., Colorado State Univ., 1989.

MURPHY, Brian R. (1994), Prof. of Fisheries. B.S., Detroit, 1975; M.S., Purdue, 1977; Ph.D., Virginia Tech, 1981.

MURRAY-TUIITE, Pamela M. (2005), Asst. Prof. of Civil and Environmental Engineering. B.S., Duke Univ., 1998; M.S., Univ. of Texas, Austin, 1999; Ph.D., Univ. of Texas, Austin, 2003. (Nat. Capital Region campus)

MURRMANN, Suzanne K. (1986), Prof. of Hospitality and Tourism Management. B.A., Indiana, 1971; M.L.I.R., Michigan State, 1977; Ph.D., Virginia Tech, 1985.

MURTY, Madhavi (2012), Asst. Prof.; Department of Religion and Culture. B.Sc., Univ. of Mumbai, 1998; M.A., Univ. of Mumbai, 2001; M.A., Univ. of Minnesota, 2005; Ph.D., Univ. of Washington, 2011.

MYKEREZI, Pavli (2006), Director of Agricultural Technology. B.S., Univ. of Tirana, 1977; M.S., Univ. of Tirana, 1988; M.S., Virginia Tech, 2000; Ph.D., Virginia Tech, 2003.

MYLES, Kevin M. (2005), Asst. Prof. of Entomology. B.S., Colorado State Univ.; Ph.D., Colorado State Univ., 2003.

PANNETON, Robin P. (1989), Assoc. Prof. of Psychology and Director, SACS Accreditation Office. B.A., Univ. of Wisconsin, 1978; M.A., Univ. of North Carolina-Greensboro, 1982; Ph.D., Univ. of North Carolina-Greensboro, 1985.

PAPILLION, Carol (1997), Senior Instructor of Human Nutrition, Foods and Exercise. B.S., Valparaiso, 1977; M.S., North Carolina-Chapel Hill, 1982.

PAPILLON, Terry L. (1992), Director, Univ. Honors Program; Prof. of Classics. B.A., St. Olaf College, 1980; Ph.D., Univ. of North Carolina-Chapel Hill, 1986.2,4,10

PARETTI, Marie C. (2003), Assoc. Prof. of Engineering Education. B.S., Virginia Tech, 1986; M.A., Virginia Tech, 1990; Ph.D., Univ. of Wisconsin, Madison, 1997.<sup>4</sup>

PARK, Jung-Min (2003), Assoc. Prof. of Electrical and Computer Engineering. B.S., Yonsei Univ., 1995; M.S., Yonsei Univ., 1997; Ph.D., Purdue Univ., 2003.

PARK, Kyungwha (2005), Assoc. Prof. of Physics, B.S., Korea Univ., 1991; M.S., Korea Univ., 1993; Ph.D., Princeton, 2000.

PARKES, Kelly A. (2006), Assoc. Prof. of Education. B.A., Australian National Univ., 1992; M.A., Australian National Univ., 1999; M.S., Florida International Univ., 2003; Ph.D., Univ. of Miami, 2006.

PARKHURST, James A. (1993), Assoc. Prof. of Wildlife, and Extension Specialist. B.S., Massachusetts, 1974; M.S., Rhode Island, 1977; Ph.D., Pennsylvania State, 1989.

PARROTT, Kathleen R. (1988), Prof. of Apparel, Housing, and Resource Management. B.S., Cornell Univ., 1972; M.A., Cornell Univ., 1979; Ph.D., Univ. of Nebraska-Lincoln, 1985.

PASUPATHY, Raghu (2005), Assoc. Prof. of Industrial and Systems Engineering. B.T., Indian Institute of Technology (India), 1995; M.S., Univ. of Connecticut, 1998; Ph.D., Purdue Univ., 2005.

PATERSON, Eric G., (2012), Prof. of Aerospace and Ocean Engineering. B.S. Univ. of Iowa, 1987; M.S. Univ. of Iowa, 1990; Ph.D. Univ. of Iowa, 1994.

PATERSON, Simone W. (2004), Assoc. Prof. of Art. B.F.A., The Univ. of Sydney, NSW, Australia, 1990; M.F.A., The Univ. of Sydney (SCA), NSW,

Australia, 1995; Ph.D., The Univ. of Newcastle, NSW, Australia, 2004.

PATIL, Mayuresh J. (2003), Assoc. Prof. of Aerospace and Ocean Engineering. B.T., Indian Institute of Technology, 1994; M.S., Georgia Institute of Technology, 1996; Ph. D., Georgia Institute of Technology, 1999.

PATRIZIO, Kami M. (2011), Asst. Prof. of Education. B.S., Cornell Univ., 1995; M.Ed., Bank Street College of Education, 2004; Ed.D., Univ. of Vermont, 2007.

PATTERSON, Cameron D. (2003), Assoc. Prof. of Electrical and Computer Engineering. B.S., Manitoba, 1980; M.S., Manitoba, 1983; Ph.D., Calgary, 1992.

PATTERSON, Douglas M. (1980), Prof. of Finance. B.S., Wisconsin, 1968; M.B.A., Wisconsin, 1972; Ph.D., Wisconsin, 1978.

PATTON, H. Randy (1992), Senior Instructor of English. B.A., Virginia Tech, 1990; M.A., Virginia Tech, 1992.

PATTON, Lydia (2007), Assoc. Prof. of Philosophy. B.A., Univ. of Kentucky, 1996; Ph.D., McGill, 2004.

PATZIG, Eileen Crist (1997). Assoc. Prof. of Science and Technology in Society. B.A., Haverford College, 1982; Ph.D., Boston Univ., 1994.

PAUL, JoAnn (2005), Assoc. Prof. of Electrical and Computer Engineering. B.S., Univ. of Pittsburgh, 1983; M.S., Carnegie-Mellon Univ., 1987; Ph. D., Univ. of Pittsburgh, 1994. Northern Virginia Campus.

PAULSON, Sally L. (1995), Assoc. Prof. of Entomology. B.A., Miami Univ., 1976; M.S., Miami Univ., 1981; Ph.D., Univ. Notre Dame, 1987.

PEARCE, Annie R. (2006), Asst. Prof. of Building Construction. B.S., Carnegie Mellon Univ., 1992; M.S., Georgia Institute of Technology, 1994; Ph. D., Georgia Institute of Technology, 1999.

PEASE, James W. (1988), Prof. of Agricultural and Applied Economics. B.S., Iowa State, 1971; M.A., Univ. of Wisconsin, Madison, 1980; Ph.D., Mich. State, 1986.

PEERY, Stephen S. (2008), Research Assoc., Senior GIS Architect. B.S., Radford Univ., 2003; MPA, Virginia Tech, 2005.

PEGUERO, Anthony (2011) Asst. Prof. of Sociology. B.A., Florida International Univ., 1997; B.A., Florida International Univ., 1998; M.A., Florida International Univ., 2001; M.S., Florida International Univ., 2002; Ph.D. Univ. of Miami, 2006.

PELZER, Kevin D. (1987), Prof. of Large Animal Clinical Sciences. B.S., Kentucky, 1979; D.V.M., Tuskegee, 1980; M.P.V.M., California (Davis), 1984; Diplomate, A.C.V.P.M.

PENCEK, Bruce (2001), Asst. Prof.; Library. B.A., Dickinson College, 1977; M.A., Cornell Univ., 1982; Ph.D., Cornell Univ., 1988; M.S., Univ. of Illinois at Urbana-Champaign, 1998.

PENDER, Kelly E. (2006), Assoc. Prof. of English. B.A., Univ. of North Carolina, 1997; M.A., North Carolina State Univ., 2000; Ph.D., Purdue Univ., 2005.

PENDLETON, Leslie (1999). Instructor and Director of Undergraduate Student Affairs, Electrical and Computer Engineering. B.S., Virginia Tech, 1980; M.A., Virginia Tech, 1988; Ph.D., Virginia Tech, 1997.<sup>1</sup>

PENLAND, Ernest D. (2009), Technical Lead, Finance. B.S., U.Va Wise, 2006; M.B.A, Virginia Tech, 2009.

PENVEN, James (1998), Assoc. Director of Residence Life, Student Affairs, B.A., Virginia Wesleyan College, 1994; M.A., Marshall Univ., 1996.

PERDUE, Richard R. (2005), Prof. of Hospitality and Tourism Management. B.S., Univ. of Wyoming, 1975; M.S., Univ. of Wyoming, 1977; Ph.D., Texas A&M Univ., 1981.

PEREIRA, Andy (2007), Affiliate Prof. of Crop and Soil Environmental Sciences. B.S., G.B. Pant Univ. (Pantnagar), 1979; M.S., Indian Agricultural Research Institute, 1981; Ph.D., Iowa State, 1986.

PEREZ-QUINONES, Manuel A. (2000), Assoc. Prof. of Computer Science. B.A., Ball State Univ., 1983; M.S., Ball State Univ., 1987; D.Sc., The George Washington Univ., 1996.

PERILLO, Patricia A. (2012), Vice President for Student Affairs, Division of Student Affairs, B.A., Univ. of Delaware, 1986; M.Ed., Univ. of Delaware, 1988; Ph.D., Univ. of Maryland, College Park, 2002.

PERSAUD, Naraine (1993), Assoc. Prof. of Crop and Soil Environmental Sciences. B.S., Agricultural Institute (Allahabad), 1968; M.S., Florida, 1976; Ph.D., Florida, 1978.

PETERS, Leroy A. (2001), Instructor of Mathematics. B.S. Univ. of Charleston, WV, 1970. M.A. in EDCI, Virginia Tech, 1995.

PETERSON, Everett B. (1989), Assoc. Prof. of Agricultural and Applied Economics. B.S., Iowa State, 1971, 1981; M.S., Iowa State, 1983; Ph.D., Purdue, 1989.

PETERSSON-WOLFE, Christina (2006), Asst. Prof. of Dairy Science. B.S., Penn State Univ., 2000; M.S., Univ. Guelph, 2003; Ph.D., Ohio State Univ., 2006.

PFEIFFER, Douglas G. (1981), Prof. of Entomology. B.S., Massachusetts, 1976; M.S., N.C. State, 1978; Ph.D., Washington State, 1981.

PHILEN, Michael K (2006), Asst. Prof. of Aerospace and Ocean Engineering. B.S., Texas A&M Univ., 1998; M.S., The Pennsylvania State Univ., 2005; Ph.D., The Pennsylvania State Univ., 2006.

PHILLIPS, Jeff. (2009), Associate Director of Web Technologies, Engineering. B.F.A., Virginia Tech 1997, M.A.Ed., Virginia Tech, 2004

PHILLIPS, John (2000), Prof. of Biology. B.A., Swarthmore College, 1976; Ph.D., Cornell, 1984.

PHILLIPS, Richard (2003), Instructor of Ancient Greek, Latin, and Classical Studies. B.A., Univ. of Illinois-Urbana, 1990; M.A., Univ. of Illinois-Urbana, 1993; Ph.D., Univ. of Illinois-Urbana, 2002.

PHILLIPS, T. Nichole (2008), Asst. Prof. of Management. B.S., Florida A&M, 2001; M.B.A., Florida A&M, 2001; Ph.D., Univ. of Central Florida, 2008.

PICKETT, J. Phillip (1988), Prof. of Small Animal Clinical Sciences. D.V.M., Louisiana State, 1980; Diplomate, A.C.V.O.

PICKRELL, Gary R. (2004), Assoc. Prof. of Materials Science and Engineering. B.S., Ohio State Univ., 1985; M.S., Ohio State Univ., 1987; Ph.D., Virginia Tech, 1994.

PIEDMONT-PALLADINO, Susan (1991), Prof. of Architecture. B.A., William & Mary, 1980; M.Arch., Virginia Tech, 1984.

PIERCE, Bess (2007), Assoc. Prof. of Small Animal Clinical Sciences. B.S., Tulane Univ., 1986; M.Z.S., Auburn Univ., 1990; D.V.M., Auburn Univ., 1992; Diplomate, A.C.V.I.M., 2002; A.B.V.P., 2000.

PIERCY, Fred P. (2000), Prof. of Human Development. B.A., Wake Forest, 1969; M.Ed., Univ. of South Carolina, 1970; Ph.D., Univ. of Florida, 1975.

PIERSOL, Richard M. (1996), Instructor of English. A.B., Ohio Univ., 1969; M.A., Ohio Univ., 1971; D.Phil., Univ. of York (United Kingdom), 1979.

PIERSON, F. William (1990), Hospital Director and Prof. of Large Animal Clinical Sciences. B.S., Delaware, 1978; M.S., Purdue, 1980; D.V.M., Virginia Tech, 1984; Ph.D., Virginia Tech, 1993; Diplomate, A.B.P.V.

PIERSON, Mark A. (2007), Assoc. Prof. of Mechanical Engineering. B.A., Univ. of California, 1978; M.S., Virginia Tech, 2000; Ph.D., Virginia Tech, 2005.4

PIILONEN, Leo E. (1987), Prof. of Physics. B.S., Univ. of Toronto, 1978; M.A., Princeton, 1980; Ph.D., Princeton, 1985.

PILOT, Guillaume (2009), Asst. Prof. of Plant Physiology. B.S., Univ. Lyon, France, 1995; M.S., Univ. Lyon, France, 1996; Ph.D., Univ. Montpellier, France, 1999.

PINKERTON, John M. (1977), SunTrust Prof. of Banking. B.S., Virginia Tech, 1971; M.B.A., Virginia Tech, 1972; Ph.D., Florida, 1979.

PITCHUMANI, RANGA (2008), John R. Jones III Prof. of Mechanical Engineering and Assoc. Dept. Head for Research. B.S., Indian Institute of Tech., 1986; M.E., Carnegie Mellon Univ. 1988; Ph.D., Carnegie Mellon Univ. 1992.

PITT, Joseph C. (1971), Prof. of Philosophy. A.B., William & Mary, 1966; M.A., Univ. of Western Ontario, 1970; Ph.D., Univ. of Western Ontario, 1972.<sup>2,7,8</sup>

PITT, Mark L. (1997). Prof. of Physics. B.S., Cal. Tech., 1985; M.A. Princeton, 1987; Ph.D., Princeton, 1992.

PITTMAN, V. Hunter (1993), Assoc. Prof. of Architecture. B.Arch., Virginia Tech, 1986; M.Arch., Virginia Tech, 1995.

PLASSMANN, Paul (2004), Prof. of Electrical and Computer Engineering and Asst. Department Head for Graduate Studies in Electrical and Computer Engineering. B.S., Reed College, 1979; M.S., UT Austin, 1980; M.S., Cornell, 1988; Ph.D., Cornell, 1990.

PLAZA, Raymond V. (1998), Director of Diversity Initiatives, Office of Multicultural Affairs. B.A., Univ. of Florida, 1994; M.A., Univ. of Florida, 1998.

PLEASANT, R. Scott (1991), Assoc. Prof. of Large Animal Clinical Sciences. B.S., Virginia Tech, 1980; D.V.M., Virginia Tech, 1984; M.S., Illinois, 1992; Diplomate, A.C.V.S.

PLEIMLING, Michel Jean François (2006). Assoc. Prof. of Physics. Diploma, Univ. des Saarlandes, 1991; Ph.D., Univ. des Saarlandes, 1996; Habilitation, Friedrich-Alexander-Univ., 2002.

PLUMMER, Ellen W. (2000), Asst. Provost. B.S., Univ. of Connecticut, 1982; M.S.W., Univ. of Connecticut, 1986; Ph.D., Virginia Tech, 2006.

PLYMALE, William O. (2005), Director, Tech Applications for Research and Collaboration, Learning Technologies. M.S., Virginia Tech, 1998.

POKORSKI, Dale M. (2001), Director of Information Technology, College of Engineering. B.A., Smith College 1985; M.B.A., Auburn Univ., 1988.

POLANAH, Paulo (2005), Assoc. Prof. of Sociology and Africana Studies. B.A., Univ. of Southern Utah, 1991; M.A., Univ. of Nevada, 1994; Ph.D., Univ. of California, Santa Barbara, 2004.10

POLYS, Nicholas F. (2006), Director, Visualization, Research and Cluster Computing. Ph.D., Virginia Tech, 2006.

PONDER, Monica A. (2007), Asst. Prof., Food Science and Technology. B.S., Miami Univ., 1999; Ph.D., Michigan State Univ., 2005.

POON, Ting-Chung (1983), Prof. of Electrical and Computer Engineering. B.S., Iowa, 1977; M.S., Iowa, 1979; Ph.D., Iowa, 1982.

POPHAM, David L. (1997), Prof. of Microbiology. B.S., Washington Univ., 1983; Ph.D., California (Davis), 1989.

POPOVA, Velina K. (2008), Asst. Prof. of Accounting and Information Systems. B.S., Varna Univ., Bulgaria, 1999; M.Acc., Oklahoma, 2003; Ph.D., Oklahoma, 2008.

PORR, Cheryl A. (2010), Asst. Prof. of Animal and Poultry Sciences. B.S., Texas A&M, 1990; M.S., Univ. of Florida, 1993; Ph.D., Virginia Tech, 1996.

POTTER, Bobbie (2004), Recruitment & Community College Liaison, College of Agriculture and Life Sciences. B.A., Univ. of Wyoming, 1969; M.Ed., Univ. of Wyoming, 1972.

POTTER, Ken (1997), Instructor. B.S., Univ. of Wyoming, 1968; M.S., Univ. of Wyoming, 1970; Ph.D., Univ. of Virginia, 1998.

POWELL, Katrina M. (2006), Director of Women's and Gender Studies and Assoc. Prof. of English. B.A., Mary Washington Univ., 1990; M.A., George Mason Univ., 1993; Ph.D. Univ. of Louisville, 2000.

PRATHER, Carl L. (1977), Prof. of Mathematics. B.S., Trinity, 1972; M.A., Northwestern, 1973; Ph.D., Northwestern, 1977.

PRATT, Paige J. (2011), Instructor of Animal and Poultry Sciences. B.S., Kansas State Univ., 2004; M.S. Kansas State Univ., 2007; Ph.D., Texas Tech Univ., 2010.

PRATT, Timothy (1981), Prof. of Electrical and Computer Engineering. B.Sc., Birmingham (England), 1965; Ph.D., Birmingham, 1968.<sup>2,3</sup>

PRESSING, Nancy L. (2009), Senior IT Contract Officer, Information Technology Acquisitions. B.S., Virginia Tech, 1997; M.B.A., Univ. of Phoenix, 2005.

PRESTON, Marlene M. (1993), Assoc. Prof. of Communication. B.S., Bowling Green State Univ., 1970; M.A., Bowling Green State Univ., 1971; Ph.D., Virginia Tech, 1997.

PRICE, Ted S. (2011), Asst. Prof. of Education. B.S.Ed., Northern Arizona Univ., 1969; M.S.Ed., California State Univ., 1975; Ph.D., Univ. of Southern California, 1985.

PRICE, William T., Jr. (1982), Assoc. Prof. of Education. A.A., Bluefield, 1972; B.S., Virginia Tech, 1974; M.S., Virginia Tech, 1979; Ph.D., Univ. of

Nebraska, 1981.

PRINCE, Stephen R. (1989), Prof. of Cinema. B.A., Univ. of Maryland, 1977; M.A., Univ. of Maryland, 1980; M.A., Univ. of Pennsylvania, 1985; Ph.D., Pennsylvania, 1987.

PRISLEY, Stephen P. (1999), Prof. of GIS and Forest Inventory. B.S., Virginia Tech; M.S., Virginia Tech; 1982; Ph.D., Virginia Tech, 1989.

PRIYA, Shashank (2007), Prof. of Mechanical Engineering and Materials Science and Engineering. B.S., Allahabad Univ., India, 1995; M.S., Indian Institute of Science, 2000; Ph.D., Pennsylvania State Univ., 2003.

PRUDEN, Amy (2008), Assoc. Prof. of Civil and Environmental Engineering. B.S., Univ. of Cincinnati, 1997; Ph.D., Univ. of Cincinnati, 2002.

PUCKETT, Anita M. (1993), Assoc. Prof.; Department of Religion and Culture. B.A., Univ. of Kentucky, 1971; M.A., Univ. of North Carolina-Chapel Hill, 1973; M.A., Univ. of Kentucky, 1980; Ph.D., Texas, 1993.

PURI, Ishwar K. (2004), N. Waldo Harrison Professor and Head of Engineering Science and Mechanics. B.Sc., Univ. of Delhi, 1982; M.S., Univ. of California, San Diego, 1984; Ph.D., Univ. of California, San Diego, 1987.

PURCELL, Aaron D. (2007), Assoc. Prof.; Director, Special Collections, Library. B.S.Ed., Cumberland College, 1994; M.A., Univ. of Louisville, 1996; M.L.S. Univ. of Maryland, 1999; Ph.D., Univ. of Tennessee, 2006.

PURSWELL, Beverly J. (1985), Prof. of Large Animal Clinical Sciences. D.V.M., Georgia, 1977; M.S., Georgia, 1981; Ph.D., Georgia, 1985; Diplomate, A.C.T., 1983.

REES, Loren P. (1980), Andersen Prof. of Business Information Technology. B.E.E., Ga. Tech, 1970; M.S.E.E., Poly. Inst. of Brooklyn, 1972; Ph.D., Ga. Tech, 1980.<sup>2,3</sup>

REEVES, Adam J. (2010), Asst. Prof. of Military Science. B.S., Eastern Kentucky Univ., 2001.

REEVES, Barbara (1993), Instructor; Department of Religion and Culture and the Department of History. A.B., Smith College, 1966; M.A.T., Harvard Graduate School of Education, 1967; A.M., Harvard Univ., 1969; Ph.D., Harvard Univ., 1980.

REICHARD, Georg (2004). Asst. Prof. of Building Construction. M.S., Graz Univ. of Technology, 1996; Ph.D., Graz Univ. of Technology, 2000.

REISINGER, Suzanne B. (1989), Assistant Department Chair and Senior Instructor of English. B.A., Georgetown College, 1968; M.A., Western Kentucky Univ., 1970.

REITER, Mark S. (2008), Asst. Prof. of Crop and Soil Environmental Sciences. B.S., Virginia Tech, 2001; M.S., Auburn., 2003; Ph.D., Arkansas, 2008. (Eastern Shore Agricultural Research and Extension Center).

RENARD, Helene (2008), Assoc. Prof. of Interior Design. B.Arch., The Cooper Union for the Advancement of Science and Art, 1991; M.Arch., Cranbrook Academy of Art, 1999.

RENARDY, Michael (1986), Virginia Tech Class of 1950 Prof. of Mathematics. Dipl. Math. Stuttgart, 1977; Dipl. Phys., Stuttgart, 1978; Dr. rer. nat., Stuttgart, 1980.<sup>6</sup>

RENARDY, Yuriko (1986), Virginia Tech Class of 1950 Prof. of Mathematics. B.S., Australian National, 1977; Ph.D., Western Australia, 1981.

RENNECKAR, Scott (2005), Assoc. Prof. of Wood Science. B.S., Virginia Tech, 1997; M.S., Univ. of California, Berkeley, 1999; Ph.D., Virginia Tech, 2004.

RESLER, Lynn M. (2004), Asst. Prof. of Geography. B.A., Univ. of Minnesota-Twin Cities, 1997; M.L.I.S., Univ. of Texas at Austin, 2000; Ph.D., Texas State Univ.-San Marcos, 2004.

REYNOLDS, Marion R., Jr. (1972), Prof. of Statistics and Forestry. B.S., Virginia Tech, 1968; M.S., Stanford, 1971; Ph.D., Stanford, 1972.

REYNOLDS, William T. (1988), Prof. of Materials Science and Engineering. B.S., Carnegie Mellon Univ., (1981); M.S., Carnegie Mellon Univ., (1982); Ph.D., Carnegie Mellon Univ., (1988).

RHOADS, Michelle L. (2011), Asst. Prof. of Animal and Poultry Sciences. B.S., Univ. of Missouri, 1998; M.S., Cornell Univ., 2001; Ph.D., Univ. of Missouri, 2004.

RHOADS, Robert P., Jr. (2011), Asst. Prof. of Animal and Poultry Sciences. B.S., Cornell Univ., 1996; M.S., Cornell Univ., 1999; Ph.D., Cornell Univ., 2004.

RIAD, Sedki M. (1979), Prof. of Electrical and Computer Engineering. B.S.E.E., Cairo, 1966; M.S.E.E., Cairo, 1972; Ph.D., Toledo, 1976.

RIBBENS, Calvin J. (1987), Assoc. Prof. of Computer Science. B.S., Calvin College, 1981; M.S., Purdue, 1984; Ph.D., Purdue, 1986.

RICCO, Carolina (2007), Asst. Prof. of Small Animal Clinical Sciences. D.V.M., Sao Paulo State Univ., 2001; M.S., Univ. of Minnesota, 2007.

RICH, Miriam S. (2000), Special Asst. to the Director of OIRED for Communications and Publications; Communications Coordinator for IPM CRSP. B.A., Goshen College, Indiana, 1980; M.A., Univ. of Chicago, 1983; M.B.A., The American Graduate School of International Management (Thunderbird), 1989.

RICHARDSON, Jesse J. (1998), Assoc. Prof. of Urban Affairs and Planning. B.S., Virginia Tech, 1984; M.S., Virginia Tech, 1996; J.D., Virginia, 1987.<sup>3</sup>

RICHEY, John A. (2011), Asst. Prof. of Psychology. B.A., Pennsylvania State Univ., 1999; M.S., Florida State Univ., 2004; Ph.D., Florida State Univ., 2009.

RIDENOUR, Minnis E. (1974), Senior Fellow for Resource Development. B.S., Tennessee, 1969; M.S., Tennessee, 1972.

RIDEOUT, Steven L. (2006), Assoc. Prof. of Plant Pathology. B.S. North Carolina State Univ., 1995; M.S., VPI&SU, 1998; Ph.D., Univ. of Georgia, 2002 (Eastern Shore Agricultural Research and Extension Center).

RIDGWELL, Diana (2003), Instructor of Liberal Arts and Human Sciences and Director of Student Development. B.S, Ferrum College, 1994; M.A., Liberal Studies, Hollins College, 1996; Ph.D., Virginia Tech, 2002.

RIFFLE, Judy S. (1988), Prof. of Chemistry. B.S., Virginia Tech, 1973; Ph.D., Virginia Tech, 1981.<sup>7</sup>

RILEY, Sam G. (1981), Prof. of Communication. B.A., Davidson College, 1961; M.B.A., Univ. of North Carolina at Chapel Hill, 1962; Ph.D., Univ. of North Carolina at Chapel Hill, 1970.

RIM, Peter (2010), Joseph H. Collie Distinguished Visiting Prof. of Chemical Engineering. B.S., The Pennsylvania State Univ., 1979; M.S., The Pennsylvania State Univ., 1981; Ph.D., The Pennsylvania State Univ., 1983; M.B.A., The Univ. of Richmond, 1992.

RIMSTIDT, J. Donald (1980), Prof. of Geochemistry. B.S., Purdue Univ., 1969; A.M., Indiana Univ., 1973; Ph.D., Pennsylvania State Univ., 1979.

RINEHART, Susanna C. (1999), Assoc. Prof. of Theatre Arts. B.A., UNC-Chapel Hill, 1986; M.F.A., UNC-Chapel Hill, 1989.

RIPEPI, Nino S. (2012), Asst. Prof. of Mining and Minerals Engineering. B.S., Virginia Tech, 1999 ; Ph.D., Virginia Tech, 2009.

RIVERA-RIDEAU, Petra (2012), Asst. Prof. of Sociology. B.A., Harvard Univ., 2003; M.A., Univ. of California, Berkley, 2006; PhD., Univ. of California, Berkley, 2010.

ROAN, Michael J. (2005), Assoc. Prof. of Mechanical Engineering. B.S., Penn State, 1990; M.S. Penn State, 1993; Ph.D., Penn State, 1999

ROBERTO, Karen (1996), Director, Center for Gerontology, and Prof. of Human Development. B.A., Indiana Univ. of Pennsylvania, 1977; M.S., Texas Tech, 1981; Ph.D., Texas Tech, 1984.

ROBERTS, C. Janene (1986), Senior Instructor; Department of Religion and Culture. B.A., Florida State Univ., 1973; M.A., Univ. of Texas, 1981; Ph. D., Univ. of Texas, 1986.

ROBERTS, Paul C. (2007), Assoc. Prof. of Virology; Biomedical Sciences and Pathology. B.Sc., Davidson College, 1984; M.Sc., Philipps-Universitat, 1988; Ph.D., Philipps-Universitat, 1992.

ROBERTSON, James I., Jr. (1967), Distinguished Prof. of History. A.B., Randolph-Macon, 1955; M.A., Emory, 1956; Ph.D., Emory, 1959.<sup>2, 3, 9</sup>

ROBERTSON, John L. (1989), Prof. of Biomedical Sciences and Pathobiology. B.S., SUNY, 1969; M.S., Pennsylvania, 1973; V.M.D., Pennsylvania, 1976; Ph.D., Pennsylvania, 1977.

ROBERTS-WOLLMANN, Carin L. (1999), Prof. of Civil and Environmental Engineering, B.S., Univ. of Nebraska, 1983; M.S., Univ. Texas, Austin, 1990; Ph.D., Univ. Texas, Austin, 1993.

ROBINSON, Dale B. (2007), Conflict Resolution Program Manager, Office for Equal Opportunity. B.A., Northeastern Univ., 1974.

ROBINSON, Hans D. (2005). Asst. Prof. of Physics. License, Ecole Normale Supérieure de Lyon, 1993; Maîtrise, Ecole Normale Supérieure de Lyon, 1994; Ph.D., Boston Univ., 2000.

ROBINSON, Kelly (2011), Instructor of Mathematics. B.S., Virginia Tech, (2001); M.E., Lynchburg College, (2006); M.S., Radford Univ., (2012).

ROBINSON, Syrenthia J. (2012), Advanced Instructor of Communication. B.S., Univ. of Southern Mississippi, 1995; M.S., Univ. of Southern Mississippi, 1998; Ph.D., The Univ. of Tennessee, 2006.

RODGERS, Patricia L. (2005), Director, Revenue Based Planning and Business Operations, Communications Network Services. B.S., Virginia Tech, 1976; M.B.A., Univ. of Pittsburgh, 1990.

RODRIGUEZ-CAMILLONI, Humberto L. (1983), Prof. of Architecture. B.A., Yale, 1967; M.Arch., Yale, 1971; M.Phil., Yale, 1973; Ph.D., Yale, 1981.

RODRIGUEZ-MAREK, Adrian (2010), Assoc. Prof. of Civil and Environmental Engineering. B.S., Washington State Univ., 1994; M.S., Washington State Univ., 1996; Ph.D., Univ. California, Berkley, 2000.

ROGERS, Robert C. (1988), Prof. of Mathematics. B.S., Washington and Lee Univ., 1979; M.A., Univ. of Maryland, 1982; Ph.D., Univ. of Maryland, 1984.

ROGIER, Francesca, (2005), Visiting Asst. Prof. of Architecture. B.Sc., Univ. of Michigan, 1981; M.Arch., Columbia Univ., 1985.

ROHR, John A. (1979), Prof. of Public Administration and Policy. A.B., Loyola, 1957; Ph.L., Loyola, 1959; M.A., Georgetown, 1964; S.T.L., Woodstock, 1966; Ph.D., Chicago, 1970.

ROJIANI, Kamal B. (1978), Assoc. Prof. of Civil and Environmental Engineering. B.S., Karachi, 1971; M.S., Illinois, 1973; Ph.D., Illinois, 1977; P.E.

ROMAN, Maren (2004), Assoc. Prof. of Sustainable Biomaterials. M.S., Clausthal Univ. of Technology (Germany), 1996; Ph.D., SUNY-ESF, 2002.

ROMANS, Brian W. (2011), Asst. Prof. of Geosciences. B.A., State Univ. of New York at Buffalo, 1997; M.S., Colorado School of Mines, 2003; Ph.D., Stanford Univ., 2008.

ROSE, Valija C. (2012), Asst. Prof. of Education. B.A., Rutgers, 1992; A.M., Univ. of Michigan, 1994; Ph.D., The College of William and Mary, 2009.

ROSENTHAL, Joy K. (2001), Instructor of Art. B.A., Saint Edward's Univ., 1993; M.F.A., Pratt Institute, 1995.

ROSENZWEIG, Michael S. (1996), Director, Museum of Natural History & Advanced Instructor of Biology. B.A., Clark Univ., 1985; M.S., Virginia Tech, 1990; Ph.D., Virginia Tech, 1994.

ROSS, Dianna (2010), Instructor in Accounting and Information Systems. B.A., Hollins, 1971; MPA, Texas, 1988; Ph.D., Virginia Tech, 1993.

ROSS, Nancy L. (2000), Department Head, Prof. of Geochemistry. B.S., Virginia Tech, 1979; M.S., Univ. of British Columbia, 1981; Ph.D., Arizona State Univ., 1985.

ROSS, Shane D. (2006), Asst. Prof. of Engineering Science and Mechanics, B.S., California Institute of Technology, 1998; Ph.D., California Institute of Technology, 2004.

ROSSI, John F. (1983), Prof. of Mathematics. B.A., Queens, 1972; M.A., Hawaii, 1978; Ph.D., Hawaii, 1980.

ROSSMEISL, John H. (2003), Assoc. Prof. of Small Animal Clinical Sciences. B.A., Univ. of New Hampshire, 1993; D.V.M., Auburn Univ., 1997; M.S., Virginia Tech, 2001; Diplomate, A.C.V.I.M.

ROTHSCHILD, Joyce (1991), Prof. of Government and International Affairs. B.A., Illinois, Champaign-Urbana, 1970; M.A., California, Santa Barbara, 1972; Ph.D., California, Santa Barbara, 1977.

ROTT, Hans C. (1977), Prof. of Architecture. B.Arch., Rice, 1968; M.Arch., Virginia Tech, 1978.

ROY, Christopher (2007), Assoc. Prof. of Aerospace and Ocean Engineering. B.S.E., Duke Univ., 1992; M.S., Texas A&M Univ., 1994; Ph.D., North Carolina State Univ., 1998.

ROY, Lucinda H. (1985), Alumni Distinguished Prof. of English. B.A., King's College (London Univ.), 1977; M.F.A., Univ. of Arkansas, 1985.<sup>2,7,9</sup>

RUCCOLO, Vanessa (2007), Instructor of English. B.A., Virginia Tech, 2003; M.A., Virginia Tech, 2007.

RUDD, John C. (2007), Chief Financial Officer; VBI. B.S., Virginia Tech, 1986; M.B.A, Virginia Tech, 1996.

RUDD, Rick D. (2006), Community Viability Chair of Excellence and Department Head of Agricultural and Extension Education. B.S., The Ohio State Univ., 1985; M.S., The Ohio State Univ., 1988; Ph.D., Virginia Tech, 1994.

RUDE, Carolyn D. (2003), Prof. of English. A.B., Grove City College, 1967; A.M., University of Illinois, 1969; Ph.D., University of Illinois, 1975.

RUOHONIEMI, John M. (2008), Assoc. Prof. of Electrical and Computer Engineering. B.A., B.Sc., Univ. of Dalhousie & The Univ. of Kings College, Nova Scotia, 1981; Ph.D., Univ. of Western Ontario, 1986.

RUSH, Jennifer W., (2011), Systems Analyst. A.A.S., New River Community College, 1997; B.S., Bluefield College, 2011.

RUSSELL, Roberta S. (1983), Prof. of Business Information Technology. B.S., Virginia Tech, 1975; M.B.A., ODU, 1977; Ph.D., Virginia Tech, 1983.

RUSSELL, David L. (1988), Prof. of Mathematics. B.A., Andrews Univ., 1964; Ph.D. Univ. of Minnesota, 1964.

RUTHERFORD, Cynthia A. (2010), Director of Wellness. B.S., Pacific Lutheran Univ., 2002; M.S., California Univ. of Pennsylvania, 2010.

RYAN, Anne (2011), Visiting Asst. Prof. of Statistics. B.S., Emory & Henry College, 2006; M.S., Virginia Tech, 2007; Ph.D, Virginia Tech, 2011.

RYAN, John (2001), Prof. of Sociology, B.A., West Virginia, 1971; M.A., West Virginia, 1978; Ph.D. Vanderbilt, 1982.

RYDER, Barbara G. (2008), J. Byron Maupin Prof. and Department Head of Computer Science. A.B., Brown Univ., 1969; M.S., Stanford Univ., 1971; Ph.D., Rutgers Univ., 1982.

RYLANDER, Chris G. (2007), Asst. Prof. of Mechanical Engineering and the School of Biomedical Engineering and Sciences. B.S., Univ. of Texas-Austin, 2000; M.S., Univ. of Texas-Austin, 2000; M.S., Univ. of Texas-Austin, 2002; Ph.D., Univ. of Texas-Austin, 2005.

RYLANDER, Nichole (2006), Assoc. Prof. of Mechanical Engineering and the School of Biomedical Engineering and Sciences. B.S., Univ. of Texas–Austin, 2000; M.S., Univ. of Texas-Austin, 2002; Ph.D., Univ. of Texas-Austin, 2005.

RYPEL, Andrew L. (2011). Asst. Prof. of Fisheries Science. B.S., Saint Louis Univ., 2001; M.S. Auburn Univ., 2004; Ph.D., Univ. of Alabama, 2008.

## S

SAFAAI-JAZI, Ahmad (1986), Prof. of Electrical and Computer Engineering. B.Sc., Tehran Univ. of Technology, 1971; M.A.Sc., Univ. of British Columbia, 1974; Ph.D., McGill, 1978.

SAFFLE, Geraldine S. (1992), Senior Instructor of English. B.A., Univ. of Utah, 1975; M.A., Virginia Tech, 1981.<sup>2, 4</sup>

SAFFLE, Michael B. (1978), Prof.; Department of Religion and Culture. B.M., B.A., Univ. of Utah, 1968; A.M., Boston Univ., 1970; M.T.S., Harvard Univ., 1971; Ph.D., Stanford Univ., 1977.

SAGHAI MAROOF, M.A. (1989), Prof. of Crop and Soil Environmental Sciences. B.S., Univ. of Azarabadeghan, 1974; Ph.D., UC-Davis, 1981.

SALBADOR, Debra A. (1994), Assoc. Prof. of Accounting and Information Systems. B.S., New Orleans, 1975; M.S., New Orleans, 1984; Ph.D., South Carolina, 1993.

SALAITA, Steven (2006), Assoc. Prof. of English. B.A., Radford Univ., 1997; M.A., Radford Univ., 1999; Ph.D., Univ. of Oklahoma, 2003.

SALEHI-ISFAHANI, Djavad (1984), Prof. of Economics. B.S., London, 1971; Ph.D., Harvard, 1977.

SALOM, Scott M. (1993), Prof. of Entomology. B.S., Iowa State Univ. 1982; M.S., Univ. of Arkansas, 1985; Ph.D., Univ. of British Columbia, 1989.

SAMPLE, David J. (2008), Asst. Prof. of Biological Systems Engineering. B.S., Florida, 1981; M.E., Florida, 1984; Ph.D., Colorado 2003; P.E. National Capital Region campus).

SAMPSON, David Arthur (2001). Research Scientist, Department of Forestry. B.S., Michigan Technological Univ., 1982; M.S., Northern Arizona Univ., 1988; Ph.D., Colorado State Univ., 1992.

SANCHEZ, Thomas W. (2002), Assoc. Prof. of Urban Affairs and Planning (Alexandria). B.A., Univ. of California, Santa Barbara, 1984; M.C.R.P., Cal. Poly, San Luis Obispo, 1986; Ph.D., Georgia Tech, 1996.

SANDERLIN, Nicole (2010), Director of International Programs, Engineering. B.A., James Madison Univ., 1998, M.P.I.A., Virginia Tech, 2006, Ph.D., Virginia Tech, 2012.

SANDERS, Janet (2009), Asst. Dean for Finance and Administration, College of Science. B.S., Bluefield College, 2005; M.B.A., Baker College, 2010.

SANDERS, Karen Eley (2001), Assoc. Vice President for Academic Support Services. B.S., Virginia State Univ., 1986; M.S., Virginia State Univ., 1992; Ed.D., Univ. of Arkansas, Fayetteville, 2000.

SANDERS, William H. (1986), Director, Information Technology Initiatives in the Arts. B.A., Univ. of Richmond, 1975; M.S., Univ. of Illinois 1976; Ph.D., Univ. of Illinois, 1980.

SANDU, Adrian (2003), Prof. of Computer Science. B.S., Polytechnic University Bucharest, 1990; M.S., Polytechnic Univ. Bucharest, 1990; M.S., University of Iowa, 1997; Ph.D., University of Iowa, 1997..

SANDU, Corina (2003), Assoc. Prof. of Mechanical Engineering. Engineering Diploma in M.E., Bucharest Polytechnic Institute, 1991; M.S., Iowa, 1995; Ph.D., Iowa, 2000.

SANTOS, Claire L., (2007), Instructor of Chemistry. B.S., Strathclyde Univ. (UK), 1999; M.S., Univ. of Virginia, 2003.

SANTOS, Webster L. (2006), Asst. Prof. of Chemistry. B.S., Univ. of Virginia, 1997; Ph.D., Univ. of Virginia, 2002.

SARIN, Subhash C. (1983), Paul T. Norton Prof. of Industrial and Systems Engineering. B.S., Delhi Univ. (India), 1970; M.S., Kansas State, 1973; Ph.D., North Carolina State, 1978.<sup>4</sup>

SARVER, Emily A. (2011), Asst. Prof. Of Mining and Minerals Engineering. B.S., Virginia Tech, 2004; M.S., Virginia Tech, 2005; Ph.D., Virginia Tech, 2010.

SATTERWHITE, Emily (2005), Assoc. Prof.; Department of Religion and Culture. B.A., Transylvania Univ., 1994; Ph.D., Emory Univ., 2005.

SAUFLEY, Christopher D. (2011), Assoc. Prof. of Naval Science. CDR, U.S. Navy. B.A., King College, 1992; M.A., The George Washington Univ., 2003.

SAUNDERS, Geoffrey K. (1982), Assoc. Prof. of Biomedical Sciences and Pathobiology. B.S., California (Davis), 1974; D.V.M., California (Davis), 1976; M.S., California (Davis), 1981; Diplomate, A.C.V.P.

SAVEL'EV, Evgeny (2009), Instructor of Mathematics. B.S., MSTU "Stankin" 2002; M.S., MSTU "Stankin" 2004; M.S., Virginia Tech, 2006; Ph.D., Virginia Tech, 2009.

SAVLA, T. (2007), Asst. Prof. of Human Development. B.S., Univ. of Bombay, India, 1996; M.S., (1998) Univ. of Bombay, India, 1998; Ph.D., Univ. of Georgia, 2004.

SAX, Benjamin (2008), Asst. Prof.; Department of Religion and Culture. B.A., Univ. of Massachusetts, 1997; M.A., The Hebrew Univ. of Jerusalem, 2002; Ph.D., Univ. of Chicago, 2008.

SCALES, Glenda R. (1995), Assoc. Dean for International Programs and Information Technology, Director of the Commonwealth Graduate Engineering Program, Engineering. B.S., Old Dominion Univ., 1985; M.S., Johns Hopkins, 1992; Ph.D, Virginia Tech, 1995.

SCALES, W. A. (1992), Prof. of Electrical and Computer Engineering. B.S., Virginia Tech, 1982; M.S., Virginia Tech, 1984; Ph.D., Cornell, 1988.

SCALLORNS, Joseph (2007), Instructor of English. B.A., Univ. of Missouri at Columbia, 1992; M.A., California State Univ., 2000; M.F.A., Louisiana State Univ., 2004.

SCARDINA, R. Paolo (2010), Asst. Prof. of Practice of Civil and Environmental Engineering. B.S. Mining and Mineral Eng., Virginia Tech, 1997; M.S. Environmental Eng., Virginia Tech, 2000; Ph.D. Virginia Tech, 2004.

SCAROLA, Vito W. (2009), Asst. Prof. of Physics. B.A., Boston Univ., 1997; Ph.D., Pennsylvania State Univ., 2002.

SCARPA, Angela (1997), Assoc. Prof. of Psychology. B.S., Saint Peters College, 1988; M.A., Univ. of Southern California, 1990; Ph.D., Univ. of Southern California, 1993.

SCARRATT, W. Kent (1982), Assoc. Prof. of Large Animal Clinical Sciences. B.S., Calgary (Canada), 1971; D.V.M., Saskatchewan (Canada), 1975; Diplomate, A.C.V.I.M.

SCHARF, Birgit (2008), Asst. Prof. of Microbiology. B.S., Ruhr Univ., 1989; M.S., Max Planck Institute for Mol. Phys, 1989; Ph.D., Max Planck Institute for Mol. Phys, 1992.

SCHAUMONT, Patrick (2005), Assoc. Prof. of Electrical and Computer Engineering. B.S., IHR-BME, Belgium, 1988; M.S. in CS, Ghent Univ., Belgium, 1990; Ph.D., UCLA, 2004.

SCHEFFLER, Jason M. (2008), Research Asst. Prof. of Animal and Poultry Sciences. B.S., Univ. of Wisconsin – River Falls, 2000; M.S., Michigan State Univ., 2002; Ph.D., Univ. of Nebraska, 2007.

SCHERER, Hannah (2011), Research Asst. Prof. B.A., Macalester College, 2000; Ph.D., Stanford Univ., 2006.

SCHETZ, Joseph A. (1969), Fred D. Durham Prof. of Aerospace and Ocean Engineering. B.S., Webb Institute of Naval Architecture, 1958; M.S.E., Princeton, 1960; M.A., Princeton, 1961; Ph.D., Princeton, 1962.

SCHMALE, David G. III (2006), Assoc. Prof. of Plant Pathology. B.S., Univ. of California, Davis, 2001; Ph.D., Cornell Univ., 2006.<sup>4</sup>

SCHMALE, Jessica M. (2006), Advanced Instructor of Mathematics. B.S., California State Univ., 2001; M.S., California State Univ., 2004.

SCHMELZ, Eva M. (2007), Assoc. Prof. of Human Nutrition, Foods and Exercise. M.S., Justus-Liebig Univ., 1983; Ph.D., Justus-Liebig Univ., 1992.

SCHMID, Sonja (2008), Asst. Prof. of Science and Technology in Society. M.A., Univ. of Vienna, Austria, 2002; Ph.D., Cornell Univ., 2005.

SCHMITTHENNER, Peter (1993), Chair of Department of Religion and Culture; Assoc. Prof. of History and Humanities. B.A., Clark Univ., 1978; M.A., Univ. of Wisconsin-Madison, 1986; Ph.D., Univ. of Wisconsin-Madison, 1991.

SCHMITTMANN, Beate (1991), Prof. of Physics. Diplom, Univ. of Aachen, 1981; Ph.D., Univ. of Edinburgh, 1984.

SCHNEIDER, Helen M. (2004), Asst. Prof. of History. B.A., Swarthmore, 1992; M.A., Washington, 1996; Ph.D., Washington, 2004.

SCHNEIDER, Mark E. (1996), Visiting Instructor, Architecture; B.A., Univ. of Wisconsin, 1966; M.Phil., Univ. of Wisconsin, 1972; Ph.D., Virginia Tech, 1978.

SCHNOEDT, Heinrich, (1991), Chair, Advanced Professional Program; Assoc. Prof. of Architecture; Coordinator; M. Arch, Virginia Tech, 1985.

SCHOENHOLTZ, Stephen (2006), Prof. of Water Resources. B.S., Penn State, 1979; M.S., Virginia Tech, 1983; Ph.D., Virginia Tech, 1990.

SCHRAMM, Hollie (2008), Clinical Instructor of Large Animal Clinical Sciences. B.S., Central Michigan Univ., 2002; D.V.M., St. George's Univ., 2007.

SCHREIBER, Madeline E. (1999), Assoc. Prof. of Geosciences. B.S., Yale Univ., 1991; M.S., Univ. of Wisconsin, 1995; Ph.D., Univ. of Wisconsin, 1999.

SCHUBERT, Robert P. (1976), Prof. of Architecture, Assoc. Dean for Research. B.Arch., Virginia Tech, 1974; M.Arch., Virginia Tech, 1976.

SCHUBOT, Florian D. (2005), Asst. Prof. of Structural Microbiology. B.S., Technische Universität, 1992; M.S., Univ. of Oklahoma, 1994; Ph.D., Univ. of Georgia, 2000.

SCHULTZ, Peter B. (1985), Prof. of Entomology. B.S., Univ. California, Davis, 1968; M.S., Midwestern State Univ., 1972; Ph.D., Virginia Tech, 1978. (Hampton Roads)

SCHURIG, Gerhardt G. (1978), Dean and Prof. of Biomedical Sciences & Pathobiology. D.V.M., Chile, 1970; M.S., Cornell, 1974; Ph.D., Cornell, 1977.

SCHWARTZ, Edward E. (1988), Director, Dev. Programs Administration and Collaboration, Learning Technologies. B.S., Univ. of Illinois 1981; M.S., Univ. of Illinois, 1982.

SCOGGINS, Holly L. (1999), Assoc. Prof. of Horticulture. B.S., Georgia, 1984; M.S., Georgia, 1995; Ph.D., North Carolina, 1999.

SCOTT, Durelle (2008), Asst. Prof. of Biological Systems Engineering. B.S., Colorado, 1996; M.S., Colorado, 1997; Ph.D., Colorado, 2001.

SCOTT, Rachel (2005), Assoc. Prof.; Department of Religion and Culture. B.A., Univ. of Oxford, 1998; M.Phil., Univ. of Oxford, 2001; Ph.D., The Univ. of London, at the School of African Studies (SOAS), 2004.

SCRIPA, Allison J. (2008), Instructor; Library. B.S., Univ. of Tennessee, 1998; M.S.I.S., Univ. of Tennessee, 2008.

SEAGO, W. Eugene (1970), R. B. Pamplin Prof. of Accounting and Information Systems. B.S., Southwest Louisiana, 1962; M.B.A., FSU, 1963; Ph. D., Georgia, 1970; J.D., Georgia, 1981.

SEIBEL, George (Andy) (2002), Project Assoc. Agricultural and Extension Education. B.S., Virginia Tech, 1985; M.S., Virginia Tech, 1986; Ed.S., Virginia Tech, 2005.

SEIDEL, Gary D. (2008), Asst. Prof. of Aerospace and Ocean Engineering. B.S., Texas A&M Univ., 1999; M.S., Texas A&M Univ., 2002; Ph.D., Texas A&M Univ., 2007.

SEILER, John R. (1985), Alumni Distinguished Prof. of Forestry. B.S., Pennsylvania State, 1979; M.S., Pennsylvania State, 1981; Ph.D., Virginia Tech, 1984.<sup>3</sup>

SELBY, James F. (2010), Campus Energy Manager. B.S., West Virginia Univ., 1979; MBA, Winthrop Univ., 2002.

SEMTNER, Paul J. (1974), Prof. of Entomology. B.S., Oklahoma State, 1967; M.S., Oklahoma State, 1970; Ph.D., Oklahoma State, 1972. (Southern Piedmont)

SENGER, Ryan S. (2009), Asst. Prof. of Biological Systems Engineering. B.S., Millikin Univ., 1999; M.S., Colorado State, 2002; Ph.D., Colorado State, 2005.

SENIORS, Paula Marie (2008), Asst. Prof. of Sociology and Africana Studies. B.F.A., City College of New York, 1985; M.A., New York Univ., 1996; M.A., Univ. of California, San Diego, 1999, Ph.D., Univ. of California, San Diego, 2003.

SEREF, Onur (2008), Asst. Prof. of Business Information Technology. B.S., Middle East Technical Univ., 1998; M.S., Middle East Technical Univ., 2001; Ph.D., Univ. of Florida, 2006.

SERRANO, Elena L. (2002), Assoc. Prof. of Human Nutrition, Foods and Exercise. B.A., California-Berkeley, 1989; M.S., Colorado State, 1997; Ph.D., Colorado State, 2001.

SETAREH, Mehdi (1997), Prof. of Architecture. B.S., Sharif Univ. of Technology, 1980; M.S., Univ. of Surrey, 1985; Ph.D., Univ. of Michigan, 1990; P.E.

SETH, Anju (2008), Pamplin Prof. and Department Head of Management. B.A (Honors)., Univ. of Delhi (India), 1976; M.B.A., Indian Institute of Management (Calcutta, India), 1978; Ph.D., Univ. of Michigan, 1988.

SETTLAGE, Julie M. (2009), Clinical Asst. Prof. of Large Animal Clinical Sciences. B.S., College of William and Mary, 1995; D.V.M., Virginia Tech, 2000; Diplomate A.C.V.S., 2005.

SETTLE, Rohsaan (2000), Assoc. Director of Student Conduct, Student Affairs, B.S. Longwood Univ., 1996; M.A. Ed., Virginia Tech, 2001.

SEXTON, James E. (1988), Instructor of Hospitality and Tourism Management. B.S., College of Saint Francis, 1983; M.S., Ohio Univ., 1985.

SEYLER, Richard (2003), Instructor of Biology. B.S., Virginia Tech, 1989; M.S., Virginia Tech, 1991; Ph.D., Emory Univ., 1997.

SHADLE, Brett L. (2005), Assoc. Prof. of History. B.A., Northern Illinois, 1993; Ph.D., Northwestern, 2000.

SHAFFER, Clifford A. (1987), Prof. of Computer Science. B.S., Maryland, 1980; M.S., Maryland, 1982; Ph.D., Maryland, 1986.

SHARAKHOV, Igor V. (2004), Asst. Prof. of Entomology. M.S., Tomsk State Univ., Tomsk, Russia, 1989; Ph.D., Institute of Cytology and Genetics, Novosibirsk, Russia, 1996.

SHARMA, Akshay (2003), Asst. Prof. of Industrial Design. B.Arch, New Delhi, 1996; M.Sc., Arizona State Univ., 2001.

SHARMA, Savita (2007), Interim Asst. to the Vice President for Finance. M.S., Texas A&M University, 1998; C.P.A., C.I.A.

SHARPE, Eric R. (2007), Assoc. Prof. of Physics. B.S., North Carolina State Univ., 1992; Ph. D., Princeton, 1998.

SHEEHAN, Thomas T. (2002), Director of VT-Master of Information Technology Program, National Capital Region, Pamplin College of Business. B.S., Colorado State, 1968; M.S. George Mason, 1993.

SHEETZ, Steven D. (1996), Assoc. Prof. of Accounting and Information Systems. B.S., Texas Tech, 1984; M.B.A., Northern Colorado, 1987; Ph.D., Colorado, 1996.

SHELTON, Jr., M. Dwight (1979), Vice President for Finance and Chief Financial Officer. B.S., Virginia Tech, 1971; M.B.A., Virginia Tech, 1983; C.P.A.

SHEPARD, Brennan E. (2009), Financial Planning Manager. B.A., Virginia Tech, 2002; M.B.A., Virginia Tech, 2008.

SHERALI, Hanif D. (1979), Univ. Distinguished Prof., W. Thomas Rice Chair, and Prof. of Engineering. B.S., Bombay Univ., 1975; M.S., Georgia Institute of Technology, 1977; Ph.D., Georgia Institute of Technology, 1979.<sup>2,6,7,9</sup>

SHERMAN, Christopher J. (2012), Systems Analyst. B.S., Virginia Tech, 2011.

SHEWCHUK, John P. (1995). Assoc. Prof. of Industrial and Systems Engineering. B.S., Univ. of Manitoba, 1984; M.S., Purdue, 1990; Ph.D., Purdue, 1995.

SHIDEMANTLE, Ronald (2007), Director of Fraternity and Sorority Life, Student Programs. B.S., Slippery Rock Univ., 1992; M.A., Slippery Rock Univ., 1994.

SHIMOZONO, Mark M. (1997), Prof. of Mathematics. B.S., Biola Univ., 1983; M.S. Stanford Univ., 1986; Ph.D., Univ. of California, 1991.

SHINAULT, Hannah (2010), Instructor of Communication. B.A., James Madison Univ., 2005; M.S., Radford Univ., 2008; Ph.D., The Univ. of Tennessee at Knoxville, (ABD).

SHINPAUGH, Patrick B. (2009), Computer Programmer, Research and Cluster Computing. B.S., Drexel Univ., 1998.

SHOEMAKER, Donald J. (1974), Prof. of Sociology. B.A., Millsaps, 1966; M.A., Georgia, 1968; Ph.D., Georgia, 1970.

SHOME, Dilip K. (1983), Prof. of Finance. B.S., Indian Institute of Technology, 1964; M. Tech., Indian Institute of Technology, 1966; M.B.A., Florida, 1977; Ph.D., Florida, 1983.

SHOOLTZ, Elizabeth (2010), Instructor of Spanish. B.A., College of William and Mary, 2004; M.A., Univ. of Michigan, 2008.

SHORT, Susan E. (2004), Director of Virginia Tech Roanoke Center. Bachelor of Music Education, 1981, Bachelor of Music Therapy, 1981, Shenadoah College and Conservatory of Music; M.S., Shippensburg Univ., 1984; Ph.D., Virginia Tech, 1997.

SHRADER, Russell B. (2004), Asst. Director of Univ. Honors. B.S, Concord University, 1997; M.S., Marshall Univ., 1999.

SHRYOCK, Richard L. (1987), Assoc. Prof. of French and Francophone Studies. B.A., Ohio State, 1980; M.A., Michigan, 1984; DEA, Université de Haute Bretagne, 1985; Ph.D., Michigan, 1987.<sup>1</sup>

SHUGART, Eileen T. (1991), Senior Instructor of Mathematics. B.A., Salve Reginal College, 1970, M.Ed. Mathematics, Converse College, 1983; M. S., Virginia Tech, 1991.<sup>2,3,7</sup>

SHUKLA, Sandeep K. (2002), Prof. of Electrical and Computer Engineering. B.E, Jadavpur Univ., India, 1991; M.S SUNY Albany, 1995,; Ph.D SUNY Albany, 1997.

SHUMSKY, Neil L. (1972), Assoc. Prof. of History. B.A., UCLA, 1966; Ph.D., California (Berkeley), 1972.

SHUSHOK, Frank (2009), Assoc. Vice President for Student Affairs; Asst. Professor of Higher Education, B.S., Baylor Univ., 1991; M.A., The Ohio State Univ., 1993; Ph.D., Univ. of Maryland, College Park, 2002.

SIBLE, Jill (1998), Prof. of Molecular and Cellular Biology; Assoc. Dean for Curriculum, Instruction and Advising, College of Science. B.S., Univ. of New Hampshire, 1990; Ph.D. Tufts Univ. School of Medicine, 1995. 2, 7, 10

SIEGLE, Robert (1977), Prof. of English. B.A., Emory & Henry College, 1970; Ph.D., Univ. of North Carolina, 1977.<sup>10</sup>

SIERRA, Sarah (2008), Asst. Prof. of Spanish. B.A., Univ. of Massachusetts, 1993; M.A., Univ. of Georgia, 1997; Ph.D., Boston Univ., 2006.

SIM, Deborah A. (2002), Curator, Armory Gallery and Instructor of Art. B.A., West Virginia Univ., 1978; M.F.A., Clemson Univ., 1986.

SIMMONS, Barry W. (1998), Director, Univ. Scholarships and Financial Aid. A.B., Elon College, 1973; M.Ed., Univ. of North Carolina at Greensboro, 1984; Ed.D., Univ. of North Carolina at Greensboro, 1987.

SIMMONS, George M. Jr. (1971), Alumni Distinguished Prof. Emeritus. B.S., Appalachian State, 1964; Ph.D., Virginia Tech, 1968.2, 4, 8

SIMONETTI, John H. (1989), Prof. of Physics. B.S., SUNY at Stony Brook, 1978; M.S., Cornell, 1982; Ph.D., Cornell, 1985.<sup>2,3</sup>

SIMPKINS, Melissa D. (2010), Business Operations Manager, College of Science. B.S, Bluefield College, 2007; M.B.A., Baker College, 2010.

SIMPSON, Marty (1985), Dir. of Finance and Administration. B.S., Radford Univ., 1994.

SIMS, Guy A. (2006), Asst. Vice President for Student Affairs, UUSA. B.S., Lincoln Univ., 1984; M.Ed., Beaver College, 1989; M.A., National Univ., 1994; Ed.D., Univ. of Northern Iowa, 2003.

SINGAL, Manisha (2008), Asst. Prof. of Hospitality and Tourism Management. B.A., St. Xavier's College, India; M.B.A., B.K. Institute of Management, India; M.A., Eastern Michigan Univ.; Ph.D., Virginia Tech, 2008.

SINGAL, Vijay (1992), J. Gray Ferguson Prof. of Finance. B. Tech., Indian Institute of Technology, 1975; M.B.A., Indian Institute of Management, 1977; Ph.D., Univ. of Michigan, 1992.

SINGH, Kusum (1992), Prof. of Education. M.A., Agra Univ., 1963; M.A., Agra Univ., 1965; Ph.D., Virginia Tech, 1988.

SINGH, Mahendra P. (1977), Preston Wade Prof. of Engineering Science and Mechanics. B.S., Agra, 1958; B.E., Roorkee, 1962; M.E., Roorkee (India), 1966; Ph.D., Illinois, 1972; P.E.

SINHA, SUNIL K. (2007), Assoc. Prof. of Civil and Environmental Engineering. B.E., Birla Institute of Technology (India), 1986; M.A.Sc., Univ. of Waterloo, Ontario, 1997; Ph.D., Univ. of Waterloo, Ontario, 2000.

SINK, Scott (2001), Instructor of Agricultural and Applied Economics. B.S., Virginia Tech, 1999; M.S., Virginia Tech, 2001.

SIRGY, M. Joseph (1979), Prof. of Marketing. B.A., UCLA, 1974; M.A., Cal State (Long Beach), 1977; Ph.D., Massachusetts, 1979.

SKAGGS, Gary E. (2001), Assoc. Prof. of Education. B.S., Virginia Tech, 1974; M.S., Radford College, 1975; Ph.D. Univ. of Maryland, 1984.

SKINNER, Linda C. (2003), Senior Instructor of English. B.A., Longwood College, 1975; M.A., Virginia Tech, 1989.

SKRIPAK, Stephen J. (2005), Assoc. Dean of Graduate Programs, Pamplin College of Business. B.S., Virginia Tech, 1979; M.B.A., Purdue University, 1987.

SLEBODNICK, Carla (1998), Instructor of Chemistry. B.S., Carnegie Mellon Univ., 1990; Ph.D., Northwestern Univ., 1995.

SMITH, Barbara (2005), Prof. of Women's Studies and Director of Women Studies Program. B.A., Antioch College, 1974; M.A., Brandeis University, 1978; Ph.D., Brandeis Univ., May 1981.

SMITH, Bonnie J. (1991), Assoc. Prof. of Biomedical Sciences and Pathobiology. B.S., Ohio State, 1976; M.S., Ohio State, 1979; D.V.M., Ohio State, 1985; Ph.D., Ohio State, 1986.<sup>2,7</sup>

SMITH, Cindy (2004), Asst. Prof. of Human Development. B.S., The Pennsylvania State Univ., 1993; M.A., Univ. of North Carolina, Greensboro, 1997; Ph.D., Univ. of North Carolina, Greensboro, 2001.

SMITH, DeAnna M. (2010), Asst. Prof. of Military Science. B.S., Mississippi State Univ., 2005.

SMITH, Deborah B. (1977), Advanced Instructor of Mathematics. B.A., Univ. of Richmond, 1971; M.A., Virginia Tech, 1977.

SMITH, Edward J. (2000), Prof. of Animal and Poultry Sciences. B.S., Univ. of Sierra Leone, 1984; M.S., Oregon State, 1989; Ph.D., Oregon State, 1991.

SMITH, Eric P. (1982), Prof. of Statistics. B.S., Univ. of Georgia, 1975; Ph.D., Univ. of Washington, 1982.

SMITH, Frank M. (2005), Director, Management & Professional Development and Interim Director of the EMBA Program, Pamplin College of Business. B.S., Fairfield Univ., 1968; M.B.A., Univ., of Maine, 1970.

SMITH, Hyrum (2009), Asst. Prof. of Agricultural and Applied Economics. B.S., Utah State Univ., 2002; M.B.A., Univ. of Utah, 2003; Ph.D., Texas Tech, 2009.

SMITH, Kenneth S. (1997), Assoc. Provost, Resource Management and Planning, Office of the Provost. B.A., Virginia Commonwealth Univ., 1991; M. P.A., Virginia Commonwealth Univ., 1993.

SMITH, Kimberly P. (2009), Systems Analyst. B.S., Virginia Tech, 1985; MBA, Virginia Tech, 2007

SMITH, Michael S. (1983), Senior Instructor of English. B.A., Juniata College, 1974; M.A., Univ. of Cincinnati, 1978; Ph.D., Univ. of Cincinnati, 1995.

SMITH, Patricia (2005). Asst. Director of Residence Life, Student Affairs; B.A., Clemson Univ., 1999; B.S., Texas A&M Univ., 2001; M.B.A., Virginia Tech, 2011.

SMITH, Robert L. (1994), Prof. of Forest Products Marketing and Assoc. Dean for Engagement. B.S., Michigan Tech, 1977; M.B.A., Wisconsin-Oshkosh, 1989; Ph.D., Virginia Tech, 1994.

SMITH, Roy R. (1998), Director for Operations, Communications Network Services. B.S., Virginia Tech, 1981.

SMITH, Stephen A. (1991), Prof. of Biomedical Sciences & Pathobiology. M.S., Ohio State, 1981; D.V.M., Ohio State, 1986; Ph.D., North Carolina State, 1990.

SMITH, Wanda J. (1995), Assoc. Prof. of Management. B.S., Fayetteville State, 1979; M.B.A., Chicago, 1982; Ph.D., North Carolina, 1991.

STEPHENSON, Kurt (1995), Prof. of Agricultural and Applied Economics. B.S., Radford, 1986; M.S., Virginia Tech, 1988; Ph.D., Nebraska (Lincoln), 1994.

STERN, Marc J. (2006). Assoc. Prof. of Forestry. B.S., Cornell Univ., 1998; M.S., Yale Univ., 2002; Ph.D., Yale Univ., 2005.

STEVENS, Ann M. (1997), Prof. of Microbiology. B.S., Iowa St., 1987; M.S., Univ. of Illinois, 1989; Ph.D., Univ. of Illinois, 1993. 2, 7

STEWART, Jeb E.B. (1997), Chief of Staff and Deputy Chief Information Officer. B.S., U.S. Naval Academy, 1974; MBA, Averett University, 1995.

STILLWELL, Daniel (2001), Prof. of Electrical and Computer Engineering. B.S., Univ. of Mass., 1991; M.S., Virginia Tech, 1993; Ph.D., John Hopkins Univ., 1999.

STIVACHTIS, Ioannis (2005), Assoc. Prof. of Political Science; Director of International Studies. B.A., Panteion Univ., 1988; M.A., Lancaster, 1989; Ph.D., Lancaster, 1996.

STONEKING, Dawn (2005), Asst. Director, Administration & Operations, Continuing and Professional Education. B.S., Radford Univ., 1995; M.S., Radford Univ., 2000.

STOUDT, Debra L. (2008), Prof. of German. B.A., West Chester Univ., 1979; M.A., Univ. of North Carolina at Chapel Hill, 1981; Ph.D., Univ. of North Carolina at Chapel Hill, 1986.

STOVALL, Connie (2006), Instructor; Library. B.S., Univ. of North Alabama, 1998; M.A., Univ. of Alabama, 2004; M.L.I.S., Univ. of Alabama, 2005.

STRAHM, Brian D. (2010). Asst. Prof. of Forest Soils and Ecology. B.S. Univ. of North Carolina at Chapel Hill, 1998; Ph.D. Univ. of Washington (2006).

STREMLER, Mark S. (2006), Assoc. Prof. of Engineering Science and Mechanics. B.S., Rose-Hulman, 1993; B.S., Rose-Hulman, 1993; M.S., Illinois, 1995; Ph.D., Illinois, 1998.

STRICKLAND, Michael S. (2012), Asst. Prof. of Ecology. B.A., William Jewell College, 2005; Ph.D., Univ. of Georgia, 2009.

STURGES, Robert H. (1997), Prof. of Industrial and Systems Engineering. B.S., M.I.T., 1969; M.S., MIT, 1969; Ph.D., Carnegie-Mellon, 1986.

STUTZMAN, Warren L. (1969), Thomas L. Phillips Prof. Emeritus of Electrical and Computer Engineering. A.B., B.S., Illinois, 1964; M.S., Ohio State, 1974; Ph.D., Ohio State, 1969.

SUBBIAH, Elankumaran (2006), Asst. Prof. of Biomedical Sciences and Pathobiology. B.V.Sc., Tamil Nadu Agricultural Univ., India, 1984; M.V.Sc., Tamil Nadu Veterinary and Animal Sciences Univ., India, 1989; Ph.D., Tamil Nadu Veterinary and Animal Sciences Univ., India, 1996; Diplomate, A.C.V.M.

SUCHICITAL, Carlos T.A. (1990), Research Assoc. Prof. of Materials Science and Engineering. B.S., National Univ. of El Salvador, 1969; B.A., Univ. of Michigan-Oakland, 1971; M.S., Univ. of Sao Paulo at Sao Carlos, 1979; Ph.D., Univ. of Illinois, Urbana, 1990.

SULLINS, Kenneth E. (1984), Prof. of Equine Surgery, Marion duPont Scott Equine Medical Center. B.S., Colorado State, 1974; D.V.M., Colorado State, 1976; M.S., Colorado State, 1984; Diplomate, A.C.V.S., 1986.

SULLIVAN, Ernest W. II (1994), Edward S. Diggs Prof. of English. B.A., Univ. of California at Los Angeles, 1966; Ph.D., Univ. of California at Los Angeles, 1973.

SULLIVAN, Jay (1988), Prof. of Forest Economics and Management. B.S., Colorado State, 1981; M.S., Colorado State, 1984; Ph.D., California-Berkeley, 1988.

SULTAN, Cornel (2007), Asst. Prof. of Aerospace and Ocean Engineering. B.S., Polytechnic Univ. Romania, 1999; M.S., Purdue Univ., 2002; Ph.D., Purdue Univ., 2006.

SUMMERS, Teggian M. (2008), Asst. Director, ePortfolio Pedagogy. Ph.D., Univ. of Georgia, 2008.

SUMNER, Susan S. (1996). Assoc. Dean and Director of Academic Programs, College of Agriculture and Life Sciences and Prof. of Food Science and Technology. B.S. North Carolina State Univ., 1982; M.S. Univ. of Wisconsin, 1984; Ph.D. Univ. of Wisconsin, 1987.<sup>5</sup>

SUN, Min (2011), Asst. Prof. of Education. B.A., Hebei Univ., 2003; M.A., Beijing Normal Univ., 2006; Ph.D., Michigan State Univ., 2011.

SUN, Shu-Ming (1992), Prof. of Mathematics. B.S., Fudan Univ., 1983; Ph.D., Univ. of Wisconsin, Madison, 1990.

SUTPHIN, Cathy M. (1986), Assoc. Director, 4-H Youth Development and Int. Dir. Ag & Nat. Res., Extension; Assoc. Prof. of Agricultural and Extension Education. B.S., Virginia Tech, 1984; M.S., Virginia Tech, 1992; Ph.D., Virginia Tech, 1999.

SWAN, Jane H. (1993), Director of Finance and Administration for Outreach and International Affairs. B.S. and B.A., Virginia Tech, 1997; M.B.A., Virginia Tech, 1980.

SWECKER, William S., Jr. (1990), Assoc. Department Head and Prof. of Large Animal Clinical Sciences. D.V.M., Virginia Tech, 1984; Ph.D., Virginia Tech, 1990; Diplomate, A.C.V.N.

SWEENEY, Dennis (2011), Prof. of Practice and Director of Instructional Laboratories, Electrical and Computer Engineering. B.S.E.E., Virginia Tech, 1971; M.A., Religious Studies, Catholic Univ. of America, 1976; M.S.E.E., Virginia Tech, 1986; Ph.D., Virginia Tech, 1992.

SWENSON, Karen (1988), Assoc. Prof. of English. B.A., Portland State Univ., 1976; M.A., Portland State Univ., 1980; M.A., Cornell Univ., 1985; Ph.D., Cornell Univ., 1987.

WAALKES, Ruth (2009), Executive Director, Center for the Arts. B.A., Univ. of Michigan, 1983.

WAGGENSPACK, Beth M. (1984), Associate Professor of Communication. B.A., Muskingum College, 1974; M.A., Texas Tech Univ., 1975; Ph.D., The Ohio State Univ., 1982. 2 7

WAGGONER, Charlotte M. (1992), Univ. Biosafety Officer and Responsible Official. B.S., Virginia Tech, 1988; M.S., Virginia Tech, 1990; B.S., Virginia Tech, 2007.

WAGNER, Matthew (2010), Visiting Asst. Prof. of Interior Design. B.F.A., VCU, 2004; M.Arch., Virginia Tech, 2007.

WAITE, Damian (2009), J-1 Research Scholar, Student Affairs, B.S., Northwestern College, 2003; M.S.W., Boston College, 2010.

WALKER, Jacques P. (2010), Training and Documentation Specialist. B.S. Virginia Tech, 2004; M.B.A., Virginia Tech, 2002.

WALKER, John L. (2011), Asst. Prof. of Music. B.M., Drake Univ., 1980; M.M., Temple Univ., 1982; D.M.A., Univ. of Nebraska-Lincoln, 1995.

WALKER, Latanya R. (1997), Upward Bound Asst. Director/Counselor. B.S., Virginia Tech, 1991; M.S., Radford, 1997.

WALKER, Richard A. (1994), Assoc. Department Head; Assoc. Prof. of Biology. B.S., William and Mary, 1985; Ph.D., Univ. of North Carolina, 1989.2,7

WALKER, Thomas D.L. (1988), Assoc. Prof. of Engineering Education. B.S.E.E., Purdue, 1973; M.S.M.E., Naval Postgraduate School, 1979; P.E.<sup>10</sup>

WALKER, W. Donald (2008), Residential Learning Coordinator, Student Affairs, B.S., Towson Univ., 2006; M.A., Univ. of Delaware, 2008.

WALLACE, Linda G. (2000), Assoc. Prof. of Accounting and Information Systems. B.B.A., Oglethorpe, 1992; B.S., Oglethorpe, 1992; Ph.D., Georgia State, 1999.

WALLENSTEIN, Peter (1983), Prof. of History. B.A., Columbia, 1966; Ph.D., Johns Hopkins, 1973.<sup>10</sup>

WALTERS, Jeffrey R. (1994), Harold H. Bailey Chair, Biology. B.A., West Virginia Univ., 1974; Ph.D., Univ. of Chicago, 1980.

WALTERS, Robert W. (1985), Vice President for Research; Prof. of Aerospace and Ocean Engineering. B.S., NC State, 1977; M.S., NC State, 1978; Ph.D., NC State, 1984.

WALTERS-STEELE, Julie (2006), Director of Univ. Unions, UUSA. B.A., Clemson Univ., 1985; M.A., Clemson Univ., 1993.

WALZ, John Y. (2005), Department Head and Prof. of Chemical Engineering. B.S., Tulane Univ., 1982; M.S., Tulane Univ., 1988; Ph.D., Carnegie

Mellon, 1992.

WAMSLEY, Gary L. (1977), Prof. of Public Administration and Policy. B.A., UCLA, 1958; M.A., UCLA, 1961; Ph.D., Pittsburgh, 1968.

WANG, Anbo (1993), Clayton Ayre Prof. of Electrical and Computer Engineering. B.S., Anshan College of Engineering, 1982; M.S., Dalian Univ. of Technology, 1986; Ph.D., Dalian Univ. of Technology, 1989.

WANG, Chao (2011) Assistant Prof. of Electrical and Computer Engineering. B.S.E.E., Peking Univ., 1996; M.S.E.E., Peking Univ., 1999; Ph.D., Univ. of Colorado at Boulder, 2004.

WANG, Gang (2006), Asst. Prof. of Business Information Technology. B.E., TianJin Univ., China, 1995; M.S., Louisiana State, 2001; Ph.D., Arizona, 2006.

WANG, Linbing (2005), Prof. of Civil and Environmental Engineering. B.S., Hohai Univ. (Nanjing, P.R. China), 1984; M.S., Tongji Univ. (Shanghai, P. R. China), 1991; Ph.D., Georgia Institute of Technology, 1998, P.E.

WANG, Yong (2009), Research Asst. Prof. of Biomedical Sciences and Pathobiology. B.S., Inner Mongolia Agricultural Univ. (China), 2000; D.V.M, Inner Mongolia Agricultural Univ. (China), 2000; M.S., Inner Mongolia Agricultural Univ. (China), 2004; Ph.D., Inner Mongolia Agricultural Univ. & National Laboratory of Veterinary Biotechnology, Harbin Veterinary Research Institute, CAAS, 2007.

WANG, Yu (2004), Asst. Prof. of Materials Science and Engineering. B.S., Univ. of Science and Technology of China, 1994; Ph.D., Rutgers Univ., 2001.

WANG, Yue Joseph (2002), Grant A. Dove Professor of Electrical and Computer Engineering. B.S., Shanghai Jiao Tong, 1984; M.S., Shanghai Jiao Tong, 1987; Ph.D., Maryland, 1995. Northern Virginia Campus.

WAPPEROM, Peter (2001), Assoc. Prof. of Mathematics. B.S., Delft Univ. of Technology, 1990; Ph.D., Delft Univ. of Technology, 1996.

WARD, Randolph W. (1972), Prof. of Theatre Arts. B.F.A., Houston, 1966; M.F.A., Hawaii, 1968.

WARNICK, Quinn (2012), Asst. Prof. of English. B.A., Brigham Young Univ., 1999; M.A., Iowa State Univ., 2006; Ph.D., Iowa State Univ., 2010.

WATFORD, Beville A. (1992), Prof. and Interim Head of the Department of Engineering Education; Director of the Center for Enhancement of Engineering Diversity. B.S., Virginia Tech, 1981; M.S., Virginia Tech 1983; Ph.D., Virginia Tech, 1985, P.E.

WATSON, Joan (2004), Advanced Instructor and Director of Pre-Education Advising Program, College of Liberal Arts and Human Sciences. B.A., Virginia Tech, 1993; M.A., Virginia Tech, 1996.

WATSON, Karen B. (1996), Instructor of Liberal Arts and Human Sciences and Director of Academic Support. B.S., WVU, 1981; M.S., Virginia Tech, 1989; Ph.D., Virginia Tech, 1999.

WATSON, Layne T. (1978), Prof. of Computer Science. B.A., Evansville, 1969; Ph.D., U of Michigan, 1974.<sup>6</sup>

WATSON, R. Janell (1999), Assoc. Prof. of French and Francophone Studies. B.A. Austin College, 1982; Ph.D. Duke, 1995.

WAWRO, Megan (2011), Asst. Prof. of Mathematics. B.A., Cedarville Univ., 2000; M.A., Miami Univ., 2005; Ph.D. Univ. of California San Diego & San Diego State Univ., 2011.

WAYMER, Damion M. (2007), Asst. Prof. of Communication. B.A., College of Charleston, 2000; M.A., Purdue Univ., 2003; Ph.D., Purdue Univ., 2006.

WEAVER, James C. (1997), Director of Athletics. B.S., Penn State, 1967; M.S., Penn State, 1968.

WEAVER, Kimberlee (2006), Asst. Prof. of Marketing. B.A., Univ. of Colorado, 1993; M.A., Princeton Univ., 1999; Ph.D., Princeton Univ. 2003.

WEAVER, Michael J. (1980), Prof. and Coordinator of Extension Pesticide Programs. B.S., Edinboro Univ. of Pennsylvania, 1974; M.S., West Virginia Univ., 1977; Ph.D., Virginia Tech, 1982.

WEAVER, Pamela A. (1989), Prof. of Hospitality and Tourism Management. B.A., State Univ. of New York at Albany, 1970; M.A., Univ. of South Florida, 1973; Ph.D., Michigan State Univ., 1978.

WEBSTER, Dane (2005), Assoc. Prof. of Art. B.S., Weber State Univ., 1998; M.F.A., Washington State Univ., 2002.

WEBSTER, Jackson R. (1975), Prof. of Ecology. B.A., Wabash, 1967; Ph.D., Georgia, 1975.<sup>2,3</sup>

WEHNER, Kirk R. (2005), Executive Director Total Compensation. B.A., Univ. of Vermont, 1985.

WEIMER, Scott (2005), Asst. Director, Continuing and Professional Education. B.A., Virginia Tech, 1995; M.A., Virginia Tech, 1997.

WEIMERSKIRCH, Barbara M. (2005), Asst. Director for Learning Assistance Programs. B.A., Univ. of Virginia, 1977; M.H.A., Medical College of Virginia, 1983; M.S., Radford Univ., 2004.

WEINER, Frank H. (1987), Prof. of Architecture. B.Arch., Tulane Univ., 1980; M.S., Columbia Univ., 1987.

WEINSTEIN, Alan S. (2003), Instructor of Music. B.M., New England Conservatory, 1983; M.M., Eastman School of Music, 1986.

WEINSTEIN, Nicole M. (2008), Asst. Prof. (Clinical Track) of Biomedical Sciences and Pathobiology, B.S., Univ. of Arizona, 1997; D.V.M., Colorado State Univ., 2001.

WEISBAND, Edward (1990), Edward Singleton Diggs Endowed Chair in the Social Sciences, Prof. of Political Science and Government and International Affairs. B.A., Princeton, 1961; M.A., Stanford U, 1965; Ph.D., Johns Hopkins, 1969.<sup>2,4</sup>

WEISS, Chester J. (2007), Assoc. Prof. of Geosciences. B.S., Univ. of Arizona, 1992; Ph.D., Texas A&M Univ., 1998.

WEISS, Robert. (2011), Asst. Prof. of Geosciences. B.S., Friedrich-Schiller Univ., 1999; M.S. Friedrich-Schiller Univ.; Ph.D., Westfälische-Wilhelms Univ., 2005.

WELBAUM, Gregory E. (1990), Prof. of Horticulture. B.S., Ohio State, 1978; M.S., California-Davis, 1979; Ph.D., California-Davis, 1988.

WELFARE, Laura E. (2007), Asst. Prof. of Education. B.A., Wake Forest Univ., 2000; M.A., Marymount Univ., 2002; Ph.D., Univ. of North Carolina at Greensboro, 2007.

WELLS, John (2005), Assoc. Prof. of Education. B.S., Florida State Univ., 1978; B.S., Florida State Univ., 1979; M.S., Virginia Tech, 1990; Ph.D., Virginia Tech, 1992.

WELLS, Kellie Trail (2004), Asst. Director, Alumni Relations. B.A., Lenoir-Rhyne College, 1999.

WEMHOENER, Jane A. (2002), Senior Instructor of English. B.A., St. Louis Univ., 1971; M.A., St. Louis Univ., 1973; A.B.D., Ohio State Univ., 1976.<sup>7</sup>

WERNSTEDT, Kris (2006), Assoc. Prof. of Urban Affairs and Planning. B.S., Western Michigan Univ., 1980; M.S., Univ. of Wisconsin, 1983; M.R.P., Cornell Univ., 1988; Ph.D., Cornell Univ., 1991.

WERNZ, Christian (2008), Asst. Prof. of Industrial and Systems Engineering. B.S., Univ. of Karlsruhe, 1999; M.S., Univ. of Karlsruhe, 2003; Ph.D., Univ. of Massachusetts Amherst, 2008.

WEST, Melinda J. (1996), University Bursar. B.B.A. Radford Univ., 1989; M.B.A., Averett Univ., 2004.

WEST, Robert L., Jr. (1989), Assoc. Prof. of Mechanical Engineering. B.S., U. of MO-Columbia, 1979; M.S.E.E., U. of MO-Columbia, 1984; M.S.M.E., U. of MO-Columbia, 1984; Ph.D., U. of MO-Columbia, 1988.

WESTERMAN, John G. (2009), Application Analyst. B.A., New York Univ., 1996; M.A., Univ. of Florida, 2005.

WESTFALL-RUDD, Donna M. (2008), Asst. Prof. of Agricultural and Extension Education. B.S., Cornell Univ., 1989; M.A.T., Cornell Univ., 1993; Ph.D., Cornell Univ., 2008.

WESTMAN, Erik C. (1999) Assoc. Prof. of Mining and Minerals Engineering. B.S., Colorado School of Mines, 1986; M.S., Univ. of Colorado, 1994; Ph.D., Virginia Tech, 1999, PE.

WESTWOOD, James H. (1999), Assoc. Prof. of Weed Science. B.A., Concordia College, 1982; M.S., Univ. of Minnesota, 1986; Ph.D., Purdue Univ., 1994.

WHEELER, Joseph H. (1996), Assoc. Prof. of Architecture. M.Arch., Virginia Tech, 1998; B.S., Florida A&M Univ., Tallahassee, 1992.

WHITE, Alex B. (1999), Instructor of Agricultural and Applied Economics. B.S., Virginia Tech, 1985; M.S., Ohio State Univ., 1987; Ph.D., Virginia

Tech, 1995.<sup>2,7</sup>

WHITE, Bradley A. (2008), Research Scientist. B.S., Michigan State University, 1991; M.S., Michigan State Univ., 1996; Ph.D. Florida State Univ., 2005.

WHITE, Christopher Jules (2010), Asst. Prof. of Electrical and Computer Engineering. B.A., Brown, 2001; M.S., Vanderbilt, 2006; Ph.D. Vanderbilt, 2008.

WHITE, D. Jon (2009), Asst. Prof. of Military Science. B.S., The George Washington Univ., 1985; M.A., Troy State Univ., 1993; M.A., United States Army Command and General Staff College, 2000; M.A., King's College, 2007; M.A., Univ. of Alabama, 2009

WHITE, Nathaniel A., II (1985), Jean Ellen Shehan Prof. and Director, Marion duPont Scott Equine Medical Center. B.S., Cornell Univ., 1969; D.V.M., Cornell Univ., 1971; M.S., Kansas State Univ., 1976; Diplomate, A.C.V.S., 1981.

WHITE, Penny (2012), Director of Parent and Alumni Relations, Division of Student Affairs. B.S., Radford Univ., 1985; M.B.A., Radford Univ., 1987.

WHITE, Robert H. (1979), Assoc. Prof. of Biochemistry. B.S., Indiana, 1968; Ph.D., Illinois, 1974.

WHITE, Susan W. (2008), Asst. Prof. of Psychology. B.S., Central Michigan Univ., 1995; M.S., San Diego State Univ., 2000; Ph.D., Florida State Univ., 2003.

WHITNEY, Brad (1998), Assoc. Prof. of Interior Design. B.S., Florida State Univ., 1994; M.F.A., Florida State Univ., 1998.

WHITTENBORN, Andrea (2007), Asst. Prof. of Human Development. B.S., South East State Univ., 2001; M.S., Univ. of Purdue, 2004; Ph.D., Univ. of Purdue, 2007.

WHITTIER, W. Dee (1980), Prof. of Large Animal Clinical Sciences and Director of Extension. B.S., Utah State, 1975; D.V.M., California (Davis), 1979; M.S., VPI&SU, 1984.

WHITTINGTON, Abby R. (2008), Asst. Prof. of Chemical Engineering and Material Science and Engineering. B.S., Auburn, 2000; Ph.D., Illinois, 2006.

WI, Sungsool (2004) Asst. Prof. of Chemistry. B.S., Dongguk Univ., Korea, 1986; M. S., Korea Advanced Institute of Science & Technology, Korea, 1988; Ph.D., Univ. of Illinois, Chicago, 2001.

WICKS, Alfred L. (1986), Assoc. Prof. of Mechanical Engineering. B.S.M.E., Clarkson, 1970; M.S.M.E., Rochester Inst. of Tech., 1972; Ph.D., Michigan Tech, 1986.

WIDDER, David R. (1973), Prof. of Music. B.M., Arkansas, 1970; M.M., North Texas State, 1972; D.M.A., North Texas State, 1983.

WIDDOWSON, Mark A. (1993), Prof. of Civil and Environmental Engineering. B.S., Univ. of Cincinnati, 1982; M.S., Univ. of Kansas, 1984; Ph.D., Auburn Univ., 1987; P.E.

WILCKE, Jeffrey R. (1982), Dorothy A. & Richard G. Metcalf Prof. of Veterinary Medical Informatics, Dept. of Biomedical Sciences and Pathobiology. D.V.M., Iowa State, 1978; M.Sc., Illinois, 1982; Diplomate, A.C.V.C.P.

WILDER, Joseph (2011), Residential Learning Coordinator, Student Affairs, B.A., Virginia Tech, 2008; M.A., Virginia Tech, 2010. WILKINS, Jesse (1998), Prof. of Education. B.S., Davidson College, 1987; M.S., Univ. of Illinois at Urbana-Champaign, 1992; Ph.D., Univ. of Illinois at Urbana-Champaign, 1997.

WILKES, Lisa J. (1997), Asst. Vice President for Business Services. B.M., Radford, 1987; M.S., Radford, 1988; Ph.D., Virginia Tech, 1997.

WILKINS, Jesse (Jay) (1998), Professor of Education. B.S., Davidson College, 1987; M.S., University of Illinois at Urbana-Champaign, 1992; Ph.D., University of Illinois at Urbana-Champaign, 1997.

WILKINSON, Carol A. (1988), Assoc. Prof. of Crop and Soil Environmental Sciences; Director, Southern Piedmont Agricultural Research and Extension Center. B.S., Maryland, 1981; M.S., Maryland, 1983; Ph.D., NC State, 1987.

WILLIAMS, Bonita E. (2008), Asst. Prof. and Extension Specialist, 4-H Youth Development, Extension. B.S., East Carolina Univ., 1986; M.S., North Carolina State Univ., 1995; Ph.D., Univ. of Missouri-Columbia, 2008.

WILLIAMS, Carlton R. (2006), Director of Multicultural Programs & Services, UUSA. B.S., Radford Univ., 1979; M.S., Radford Univ., 1983.

WILLIAMS, Christopher B. (2007), Asst. Prof. of Engineering Education and Mechanical Engineering. B.S., Univ. of Florida, 2000; M.S., Georgia Inst. of Technology, 2003; Ph.D., Georgia Inst. of Technology, 2007.

WILLIAMS, Holly McCall (2006), Asst. Director, Continuing and Professional Education. B.S., Roanoke College, 2003; M.S., Eastern Kentucky Univ., 2005.

WILLIAMS, Jane Ann (2005), Director of Multicultural Community Engagement and Outreach, Office of Multicultural Affairs. B.A., Virginia Tech, 1978, M.A., Univ. of Baltimore, 1990.

WILLIAMS, Jay H. (1988), Prof. of Human Nutrition, Foods and Exercise and Adjunct Prof. of Biomedical Sciences and Pathobiology. B.S., LSU, 1983; M.S., LSU, 1976; Ph.D., Texas A&M, 1988.

WILLIAMS, Leigh M. (2004), Advanced Instructor of Statistics. B.A., Virginia Wesleyan, 1997; M.S., Georgia, 2004; Ph.D., Virginia Tech, 2009.

WILLIAMS, Mekeisha P. (2007), Executive Director, Univ. Organizational and Professional Development. B.S., Univ. of North Carolina at Charlotte, 1998; MPA., North Carolina Central Univ., 2004.

WILLIAMS, Robert C. (2002), Assoc. Prof., Food Science and Technology. B.S. Tennessee Technological Univ., 1994; M.S. The Univ. of Tennessee 1998; Ph.D., The Univ. of Tennessee, 2001.

WILLIAMS, Thomas O. (2001), Assoc. Prof. of Education. A.A.S., Lord Fairfax Community College, 1986; B.S., James Madison Univ., 1989; M.Ed., James Madison Univ., 1993; Ph.D., Auburn Univ., 2000.

WILLIAMSON, Lindsey M. (2011), Instructor of Animal and Poultry Sciences. B.S., Virginia Tech, 2009.

WILLIS-WALTON, Susan (1998), Director, Center for Survey Research. B.S., Virginia Tech, 1995; M.S.W., Radford Univ., 1998; Ph.D., Virginia Tech, 2009.

WILSON, Debbie (2010), Director of Career Counseling and Special Programs, College of Science. B.S., Bluefield College, 1996; M.S., Radford Univ., 2010

WILSON, Henry P. (1982), Prof. of Weed Science. B.S., Univ. of Delaware, 1963; M.S., Univ. of Delaware, 1965; Ph.D., Rutgers Univ., 1967 (Eastern Shore Agricultural Research and Extension Center).

WILSON, Jan (2006), Asst. Director, Alumni Relations. B.A., Univ. of North Carolina, 1978.

WILSON, Jason (2010), Instructor of Mathematics. BS, Rose-Hulman Institute of Technology, 1993; M.S., Univ. of North Carolina Chapel Hill, 1996; Ph.D., Duke Univ., 2010.

WILSON, Joycelyn A. (2012), Asst. Prof. of Education. B.S., Univ. of Georgia, 1996; M.A., Pepperdine Univ., 1998; Ph.D., Univ. of Georgia, 2007.

WILSON, Katherine E. (2010), Clinical Asst. Instructor of Large Animal Clinical Sciences. B.S., Miami Univ., 1998; DVM, The Ohio State Univ., 2002; M.S. Virginia Tech, 2006; Diplomate, A.C.V.I.M., 2008.

WILSON, Sherwood G. (2007), Vice President for Administrative Services. B.S., Fairmont State College, 1988; M.S., Virginia Tech, 1993; Ph.D., Ohio Univ., 2003.

WILSON, Thomas G. (1983), Director, Upward Bound/Talent Search. B.S., Concord, 1979; M.S., Virginia Tech, 1982.

WIMBERLEY, Dale W. (1986), Assoc. Prof. of Sociology. B.A., Louisiana Tech, 1979; M.A., Ohio State, 1981; Ph.D., Ohio State, 1986.

WINCHESTER, III, Woodrow W. (2005), Asst. Prof. of Industrial and Systems Engineering. B.S., North Carolina A&T State Univ., 1992; M.S., North Carolina A&T State Univ., 1994; Ph.D., North Carolina A&T State Univ., 2005.

WINETT, Richard A. (1979), Heilig-Meyers Prof. of Psychology. B.A., Queens College, 1976; Ph.D., State Univ. of New York-Stony Brook, 1971.

WINFREY, Leigh. (2011), Asst. Prof. of Mechanical Engineering. B.S., The Univ. of North Carolina at Charlotte, 2003; B.A., The Univ. of North Carolina at Charlotte, 2004; M.S., North Carolina State Univ., 2007; Ph.D., North Carolina State Univ., 2010.

WINISTORFER, Paul M. (2001), Prof. of Sustainable Biomaterials and Dean. B.S., Iowa State, 1978; Ph.D., Iowa State, 1985.

WINKEL, Brenda S.J. (1992), Department Head; Prof. of Molecular Biology. B.S., Southern Illinois Univ., 1978; M.S., Southern Illinois Univ., 1981; Ph.

D., Univ. of Georgia, 1989.

WINSTON, David R. (1998), Lecturer, Youth. B.S., Virginia Tech, 1987; M.S., Virginia Tech, 1998.

WISEMAN, Philip E. (2005), Assoc. Prof. of Forestry. B.S., Virginia Tech, 1996; M.S., Virginia Tech, 2001; Ph.D. Clemson Univ., 2005.

WISNIOSKI, Matthew H. (2007), Asst. Prof. of Science and Technology in Society. B.S., The Johns Hopkins Univ., 2000; M.A., Princeton Univ., 2002; Ph.D., Princeton Univ., 2005.

WITONSKY, Sharon G. (2000), Assoc. Prof. of Large Animal Clinical Sciences. B.A., Earlham, 1988; D.V.M., Minnesota, 1993; Ph.D., Tennessee, 1997; Diplomate, A.C.V.I.M.

WOJDY\_SKI, Bartosz (Bart) (2011), Asst. Prof. of Communication. B.A., Univ. of North Carolina at Chapel Hill, 2001; M.A., Univ. of North Carolina at Chapel Hill, 2008; Ph.D., Univ. of North Carolina at Chapel Hill, 2011.

WOKUTCH, Richard E. (1977), Pamplin Prof. of Management. B.S., Pittsburgh, 1972; Ph.D., Pittsburgh, 1977.

WOLF, James F. (1978), Prof. of Public Administration and Policy. B.A., LaSalle, 1965; M.P.A., Cornell, 1969; D.P.A., So. California, 1977. (Northern Virginia Center).

WOLF, Tony K. (1986), Prof. of Horticulture and Director of AHS, Jr. Agric. Research & Extension Center. B.S., West Virginia Univ., 1979; M.S., Penn State, 1982; Ph.D., Cornell, 1986. (Alson H. Smith, Jr. Agricultural Research & Extension Center).

WOLFE, Mary Leigh (1992), Prof. and Department Head of Biological Systems Engineering. B.S., Virginia Tech, 1979; M.S., Virginia Tech, 1982; Ph.D., Minnesota, 1986.

WONG, Eric A. (1990), John W. Hancock, Jr. Prof. of Animal and Poultry Sciences. B.S., MIT - Cambridge, 1976; Ph.D., UC-San Diego, 1981.

WONG, Kenneth (2009). Research Asst. Prof. B.A., Brandeis Univ., 1991; Ph.D., Univ. of California at Berkeley, 2002.

WOOD, Cynthia M. (1986), Assoc. Prof. of Animal and Poultry Sciences. B.S., Florida, 1979; M.S., Mississippi State, 1982; Ph.D., Iowa State, 1986.

WOODALL, William H. (2000), Prof. of Statistics. M.S., Millsaps College, 1972; Ph.D., Virginia Tech, 1980.

WOOLSEY, Craig A. (2001), Assoc. Prof. of Aerospace and Ocean Engineering. B.M.E., Georgia Inst. of Tech., 1995; M.A., Princeton Univ., 1997; Ph.D., Princeton Univ., 2000.

WORLEY, Gary M. (1978). Director, Imaging and Repository Initiatives; Adjunct Prof., Department of Teaching and Learning. B.A., Virginia Tech, 1978; M.A., Virginia Tech, 1994; Ph.D., Virginia Tech, 1999.

WUBAH, Daniel A. (2009), Vice President and Dean for Undergraduate Education. B.Ed., Univ. of Cape Coast, Ghana, 1984; B.Sc. (Hons.), Univ. of Cape Coast, Ghana, 1984; M.S., Univ. of Akron, 1987; Ph.D., Univ. of Georgia, 1990.

WYATT, ARIANA (2011) Asst. Prof. of Music. B.M., Univ. of Southern California, 2001; M.M., Univ. of Southern California, 2003.

WYATT, Christopher L. (2002), Assoc. Prof. of Electrical and Computer Engineering. B.S., Univ. of North Carolina at Charlotte, 1997; Ph.D., Wake Forest Univ. School of Medicine, 2002.

WYNN, Teresa M. (2004), Assoc. Prof. of Biological Systems Engineering. B.S., Virginia Tech, 1992; M.S., North Carolina State Univ., 1995; Ph.D., Virginia Tech, 2004.

WYNNE, Randolph H. (1996), Assoc. Prof. of Forestry. B.S., North Carolina-Chapel Hill, 1986; M.S., Wisconsin-Madison, 1993; Ph.D., Wisconsin-Madison, 1995.

CLAUS, George William, Ph.D., *Associate Professor Emeritus of Microbiology*, (1973-2002).<sup>6</sup>

CLAUS, Richard O., Ph.D., *Lewis A. Hester Professor Emeritus of Materials Science and Engineering and Professor Emeritus of Electrical and Computer Engineering*, (1977-2008). <sup>4,6,9</sup>

CLAYTON, Edward R., Ph.D., *Lenz Professor Emeritus of Management Science*, (1968-2008).

CLIFF, Eugene M., Ph.D., *Professor Emeritus of Aerospace and Ocean Engineering*, (1971-2002).

CLIFFORD, Michael J., *Senior Extension Agent Emeritus*, (1971-2002).

CLINE, Marvin G., Ph.D., *Professor Emeritus of Educational Leadership and Policy Studies*, (1977-2002).

CLOUSE, James P., Ph.D., *Professor Emeritus of Education*, (1973-1987).

CLOWES, Darrel A., Ph.D., *Associate Professor Emeritus of Education*, (1977-1996).

COALE, Charles W., Jr., Ph.D., *Professor Emeritus of Agricultural and Applied Economics*, (1969-2002).

COARTNEY, James S., Ph.D., *Associate Professor Emeritus of Horticulture*, (1966-1992).

COCHRAN, Donald G., *Professor Emeritus of Entomology*, (1957-1995).

COLLIER, Patricia, *Senior Extension Agent Emerita*, (1980-2010).

COLLINS, Eldridge R., Ph.D., *Professor Emeritus of Biological Systems Engineering*, (1971-2000).

COLLINS, William H., M.S., *Associate Professor Emeritus of Biological Systems Engineering*, (1971-1999).

COMPARIN, Robert A., Ph.D., *Professor Emeritus of Mechanical Engineering*, (1973-1993).

CONFORTI, Frank D., Ph.D., *Associate Professor Emeritus of Human Nutrition, Foods and Exercise*, (1991-2006).

CONGER, William L., Ph.D., *Professor Emeritus of Chemical Engineering*, (1983-2002).<sup>4</sup>

CONNER, Charles W., *Senior Extension Agent Emeritus*, (1974-2002).

CONNER, Maynard Calvin, Ph.D., *Professor Emeritus of Agricultural Economics*, (1945-1958).

CONNERS, Richard W., Ph.D., *Associate Professor Emeritus of Electrical and Computer Engineering*, (1987-2003).

COOK, Virgil A., Ph.D., *Associate Professor Emeritus of English*, (1963-2002).

COOPER, Charles R., Ph.D., *Associate Professor Emeritus of Animal Science*, (1959-1989).

CORDES, Donald O., B.V.Sc., *Professor Emeritus of Veterinary Pathobiology*, (1981-1997).

CORUH, Cahit, Ph.D., *Professor Emeritus of Geophysics*, (1979-2004).

COSGRIFF, John C. Jr., M.S., *Associate Professor Emeritus of the University Libraries*, (1974-2005).

COSTAIN, John K., Ph.D., *Professor Emeritus of Geophysics*, (1967-1996).

COVEY, Thomas W. III, *Senior Extension Agent Emeritus*, (1978-2005).

COWLES, Joe R., Ph.D., *Professor Emeritus of Biological Sciences*, (1990-2008).

COX, Ruby H., Ph.D., *Professor Emerita of Human Nutrition, Foods and Exercise*, (1989-2006).<sup>5</sup>

COX, William E., Ph.D., *Professor Emeritus of Civil and Environmental Engineering*, (1972-2010).

CRAIG, James R., Ph.D., *Professor Emeritus of Geological Sciences*, (1970-2002).<sup>2,4,9</sup>

CRAIK, Susan E., *Senior Extension Agent Emerita*, (1975-2002).

CRANFORD, Jack A., Ph.D., *Associate Professor Emeritus of Biological Sciences*, (1977-2008).

CRAWFORD, Helen J., Ph.D., *Professor Emerita of Psychology*, (1987-2005).

CREAMER, Don G., Ed.D., *Professor Emeritus of Higher Education and Student Affairs*, (1977-2005).

CROFTS, George W., Ph.D., *Senior Associate Dean Emeritus in the College of Science*, (1970-2005).

CROSS, Gerald H., Ph.D., *Professor Emeritus of Fisheries and Wildlife Sciences*, (1973-2000).

CROSS, Landrum L., Ed.D., *Vice President Emeritus for Student Affairs*, (1983-2005).

CROSS, Lawrence H., Ph.D., *Professor Emeritus of Educational Leadership and Policy Studies*, (1974-2002).

CRUNKILTON, John R., Ph.D., *Professor Emeritus of Agricultural and Extension Education*, (1969-2003).<sup>2,7</sup>

CUMMINS, Cecil S., Sc.D., *Professor Emeritus of Microbiology*, (1967-1989).

CUNDIFF, John S., Ph.D., *Professor Emeritus of Biological Systems Engineering*, (1980-2010).

CURCIO, Claire Cole, Ph.D., *Professor Emerita of Educational Leadership and Policy Studies*, (1989-2001).

CURRY, Charles K., *Senior Extension Agent Emeritus*, (1976-2002).

CYRE, Walling R., Ph.D., *Associate Professor Emeritus of Electrical and Computer Engineering*, (1989-2005).

DANIEL, Ronald, M. Arch., *Associate Provost and Professor Emeritus of Architecture*, (1977-2009).

DANNER, David R., *Senior Extension Agent Emeritus*, (1969-2002).

DAWSON, Kenneth E., Ph.D., *Professor Emeritus, Cooperative Extension*, (1973-1991).

DAY, Savannah S., Ph.D., *Professor Emerita of Housing, Interior Design, and Resource Management*, (1980-1990).

de DATTA, S.K., Ph.D., *Professor Emeritus of Crop and Soil Environmental Sciences*, (1991 – 2011).

DEISENROTH, Michael P., Ph.D., *Professor Emeritus of Industrial and Systems Engineering*, (1984-2007).

DENNISON, Brian K., Ph.D., *Professor Emeritus of Physics*, (1977-2004).

DENSMORE, Barbara, Ph.D., *Professor Emerita of Clothing and Textiles*, (1978-1989).

DeOMS, Gary C., Ph.D., *Senior Extension Agent Emeritus*, (1971-2002).

DESSY, Raymond E., Ph.D., *Professor Emeritus of Chemistry*, (1966-92).

de WOLF, David A., Ph.D., *Professor Emeritus of Electrical and Computer Engineering*, (1982-2003).<sup>8</sup>

DICKEY, John W., Ph.D., *Professor Emeritus of Urban Affairs and Planning and Public Administration and Policy*, (1966-2003).

DILLARD, John G., Ph.D., *Professor Emeritus of Chemistry*, (1967-2008).

DISTLER, Paul A., Ph.D., *Alumni Distinguished Professor Emeritus of Theatre Arts*, (1967-2004).<sup>3</sup>

READ, J. Frederick, Ph.D., *Professor Emeritus of Geosciences*, (1973-2010).

REECE, Barry L., Ed.D., *Professor Emeritus of Marketing Education*, (1974-1993).

REED, Bruce E., Ph.D., *Associate Professor Emeritus of Mathematics*, (1967-2003).<sup>2,3</sup>

REIFSNIDER, Kenneth L., Ph.D., *Professor Emeritus of Engineering Science and Mechanics*, (1968-2002).

RELF, Paula Diane Relf, Ph.D., *Professor Emerita of Horticulture*, (1976-2002).

RENEAU, Raymond B., Jr., Ph.D., *Professor Emeritus of Crop and Soil Environmental Sciences*, (1971-2002).

REYNOLDS, Marion R., Jr., Ph.D., *Professor Emeritus of Statistics and Forest Resources and Environmental Conservation*, (1972-2010).

RIBBE, Paul H., Ph.D., *Professor Emeritus of Geological Sciences*, (1966-1996).

RICH, Charles C., Ph.D., *Professor Emeritus of Political Science*, (1976 – 2012).

RICH, Nolan Neel, M.S., *Associate Professor Emeritus, Extension Division*, (1959-1990).

RICHARDSON, Bonham C., Ph.D., *Professor Emeritus of Geography*, (1977-2002).

RICHARDSON, Frederick M., Ph.D., *Professor Emeritus of Accounting and Information Systems*, (1980-2007).

RIDENOUR, Minnis E., *Executive Vice President and Chief Operating Officer Emeritus*, (1974-2005).

RIESS, R. Dean, Ph.D., *Professor Emeritus of Mathematics*, (1967-2006).<sup>1</sup>

RIMSTIDT, J. Donald, Ph.D., *Professor Emeritus of Geosciences*, (1980-2010).

RITCHEY, Sanford J., Ph.D., *Professor and Dean Emeritus of the College of Human Resources*, (1963-1994)

RITENOUR, Lester A., *Senior Extension Agent Emeritus*, (1974-2002).

RITTER, Alfred L. “Jimmy,” Ph.D., *Associate Professor Emeritus of Physics*, (1976-2010).

ROANE, Curtis Woodard, Ph.D., *Professor Emeritus of Plant Pathology*, (1947-1986).

ROBBINS, William A., Ed.D., *Associate Professor Emeritus of Education*, (1979-1985).

ROBERTS, Kent C., Ph.D., *Associate Professor Emeritus of Veterinary Medicine* (1980-1995).

ROBERTSON, James I., Jr., Ph.D., *Alumni Distinguished Professor Emeritus of History*, (1967-2010).<sup>2, 3, 9</sup>

ROBESON, Andrew, Ph.D., *Professor Emeritus of Nuclear Engineering*, (1955-1981).

ROBINSON, Edwin S., Ph.D., *Professor Emeritus of Geophysics*, (1967-1997).

ROBINSON, Jerald F., Ph.D., *Professor Emeritus of Management*, (1970-2002).<sup>2, 8</sup>

ROBINSON, Linda M., *Senior Extension Agent Emerita*, (1971-2002).

ROGERS, Cosby Steele, Ph.D., *Professor Emerita of Human Development*, (1973-2003).<sup>2,4</sup>

ROGERS, William Bradley, M.A., *Professor Emeritus of Engineering Fundamentals*, (1971-1987).

ROGGENBUCK, Joseph W., Ph.D., *Professor Emeritus of Forestry*, (1977-2006).

ROHR, John A., Ph.D., *Professor Emeritus of Public Administration and Policy*, (1979-2008).

ROLLINS, Howard A., Jr., Ph.D., *Professor Emeritus of Horticulture*, (1969-1990).

RONY, Peter R., Ph.D., *Professor Emeritus of Chemical Engineering*, (1971-2002).

ROPER, Jeanne H., Ph.D., *Professor Emerita of Urban Affairs and Planning*, (1975-1998).<sup>3</sup>

ROPER, L. David, Ph.D., *Professor Emeritus of Physics*, (1967-1998).

ROSEN, Karen H., Ed.D., *Associate Professor Emerita of Human Development*, (1987-2006).

ROSS, B. Blakely, Ph.D., *Professor Emeritus of Biological Systems Engineering*, (1978-2002).

ROSS, Mary H., Ph.D., *Professor Emerita of Entomology*, (1959-1997).

RUIZ, Fernando, M.Arch., *Associate Professor Emeritus of Architecture*, (1972-2002).<sup>2, 3</sup>

RUSK, Richard Wells, M.S., *Associate Professor Emeritus of Physics*, (1949-1982).

RUSSELL, G. E. “Buddy,” Ph.D., *Vice President Emeritus of Alumni Relations*, (1956-1996).

RUSZLER, Paul, Ph.D., *Associate Professor Emeritus of Animal and Poultry Sciences*, (1976-2003).

RYSTROM, Kenneth F., Ph.D., *Professor Emeritus of Communication Studies*, (1984-1997).

RYSTROM, Kenneth F., Ph.D., *Professor Emeritus of Communication Studies*, (1984-1997).

SAACKE, Richard G., Ph.D., *Professor Emeritus of Dairy Science*, (1965-2001).<sup>2,3</sup>

SABAROFF, Bernard J., C.E., R.A., *Professor Emeritus of Architecture*, (1967-1982).

SABINE, Gordon Arthur, Ph.D., *Professor Emeritus of Journalism*, (1975-1983).

SALMON, Richard G., Ed.D., *Professor Emeritus of Educational Leadership and Policy Studies*, (1972-2010).

SANDERS, Mark E., Ph.D., *Professor Emeritus of Teaching and Learning*, (1980-2010).

SANDERSON, Ann G., M.S., *Assistant Professor Emerita, Cooperative Extension*, (1957-1991).

SANZONE, George, Ph.D., *Associate Professor Emeritus of Chemistry*, (1969-1998).

SAWYERS, Janet K., Ph.D., *Professor Emerita of Human Development*, (1979-2003).<sup>2,7,8</sup>

SCARPACI, Joseph L., Ph.D., *Professor Emeritus*, (1989-2009).

SCHECKLER, Stephen E., Ph.D., *Professor Emeritus of Biological Sciences*, (1977-2007).

SCHIFFERT, Charles Wilson, M.D., *Director Emeritus of Student Health Services*, (1968-1986).

SCHMIDT, B. June, Ed.D., *Professor Emerita of Human Resources and Education*, (1979-1998).

SCHMIDT, J. William, Jr., Ph.D., *Professor Emeritus of Industrial and Systems Engineering*, (1968-2000).

SCHMIDT, Richard E., Ph.D., *Professor Emeritus of Crop and Soil Environmental Sciences*, (1958-2000).

SCHNECK, Daniel J., Ph.D., *Professor Emeritus of Engineering Science and Mechanics*, (1973-2001).<sup>2,3</sup>

SCHNITZER, Martin, Ph.D., *Professor Emeritus of Management*, (1960-1990).

SCHUG, John C., Ph.D., *Professor Emeritus of Chemistry*, (1964-1999).

SCHULMAN, Robert S., Ph.D., *Associate Professor Emeritus of Statistics*, (1974-2007).<sup>2</sup>

SCHWERTZ, Courtney, Ph.D., Professor Emeritus of Virginia Cooperative Extension, (1974-1997).

SEMTNER, Paul J., Ph.D., Professor Emeritus of Entomology, (1974-2010).

SEN, Tarun K., Ph.D., Professor Emeritus of Accounting and Information Systems, (1985-2010).

SEWELL, Edward H., Jr., Ph.D., Associate Professor Emeritus of Communication, (1972-2007).<sup>8</sup>

SGRO, Joseph A., Ph.D., Professor Emeritus of Psychology, (1967-1999).

SHABMAN, Leonard A., Professor Emeritus of Agricultural and Applied Economics, (1972-2002).

SHAFFER, Robert M., Ph.D., Charles Nettleton Professor Emeritus of Forest Operations, (1982-2007).<sup>5</sup>

SHANHOLTZ, Vernon O., Ph.D., Associate Professor Emeritus of Biological Systems Engineering, (1963-1997).

SHAW, John K., Ph.D., Professor Emeritus of Mathematics, (1970-2005).

SHEPARD, Jon M., Ph.D., Professor Emeritus of Management, (1989-2003).

SHERMAN, Thomas M., Ed.D., Professor Emeritus of Teaching and Learning, (1971-2010).<sup>8</sup>

SHIFFLETT, Crandall A., Ph.D., Professor Emeritus of History, (1979-2010).

SHINGLES, Richard D., Ph.D., Associate Professor Emeritus of Political Science, (1971-2010).

SHOCKLEY, James E., Jr., Ph.D., Associate Professor Emeritus of Mathematics, (1966-2010).

SHRUM, Judith, Ph.D., Professor Emerita of Spanish and Second-Language Education, (1981 – 2012).

SIEGEL, Paul, Ph.D., University Distinguished Professor Emeritus of Animal and Poultry Sciences, (1957-1999).

SIMMONS, George, Jr., Ph.D., Alumni Distinguished Professor Emeritus of Biological Sciences, (1971-2003).<sup>2,4</sup>

SIMPSON, Roger L., Ph.D., Professor Emeritus of Aerospace and Ocean Engineering, (1983 – 2012).

SINHA, A. Krishna, Ph.D., Professor Emeritus of Geosciences, (1971-2008).

SLAWNY, Joseph, Ph.D., Professor Emeritus of Physics, (1979-2010).

SLAYTON, Aubrey R., Ph.D., Professor Emeritus of the Extension Division, (1952-1983).

SMEAL, Paul L., Ph.D., Professor Emeritus of Horticulture, (1960-1992).<sup>8</sup>

SMITH, Charles W., M.S., P.E., Alumni Distinguished Professor Emeritus of Engineering Science and Mechanics, (1948-1992).<sup>6</sup>

SMITH, David William, Ph.D., The Honorable and Mrs. Shelton H. Short, Jr., Professor Emeritus of Forestry, (1972-2000).<sup>3</sup>

SMITH, Easley S., M.S., Associate Professor Emeritus of Agricultural Engineering, (1956-1985).

SMITH, Frank E., B.A., Professor Emeritus of Public Administration and Policy, (1977-1980).

SMITH, James C., Ph.D., Associate Professor Emeritus of Mathematics, (1967-1997).

SMITH, Robert M., Ed.D., Professor and Dean Emeritus of the College of Education, (1978-1996).

SNIDER, Robert L., Ph.D., Professor Emeritus of Mathematics, (1974-2010).

SNIZEK, William E., Ph.D., Alumni Distinguished Professor Emeritus of Sociology, (1972-2010).<sup>2, 3, 4, 7, 9, 10</sup>

SNOKE, J. Arthur, Ph.D., Professor Emeritus of Geosciences, (1977-2007).

SNYDER, Harry L., Ph.D., R.H. Bogle Professor Emeritus of Industrial and Systems Engineering, (1970-1993).

SONIAT, Katherine T., M.S., Associate Professor Emerita of English, (1991-2007).

SPAHR, Janet E., M.S.L.S., Assistant Professor Emerita of the University Libraries, (1970-1997).

SPENCER, Chester W., Ph.D., Roanoke Electric Steel Professor Emeritus of Materials Science and Engineering, (1976-1993).

SPENCER, Elizabeth Ann, M.B.A., Associate Vice President Emerita of Personnel, (1979-1997).

SPENCER, Robert E., M.A., Associate Professor Emeritus of Mathematics, (1955-1992).

SPENGLER, Manfred L., Ph.D., Associate Professor Emeritus of Industrial and Systems Engineering, (1975-2000).

SPORAKOWSKI, Michael J., Ph.D., Professor Emeritus of Human Development, (1970-2000).

SQUIRES, Arthur M., Ph.D., Univ. Distinguished Professor Emeritus of Chemical Engineering, (1976-1986).

SQUIRES, Michael G., Ph.D., Professor Emeritus of English, (1969-2002).<sup>2</sup>

STALLINGS, Charles, Ph.D., Professor Emeritus of Dairy Science, (1981 – 2012).<sup>5</sup>

STARLING, Thomas M., Ph.D., W. G. Wysor Professor Emeritus of Agriculture, Agronomy, (1944-1989).

STEEVES, Harrison R., III, Ph.D., Associate Professor Emeritus of Biology, (1966-1997).<sup>4</sup>

STEPHENS, Carroll U., Ph.D., Associate Professor Emeritus of Management, (1993-2003).

STEPHENSON, F. William, Ph.D., Hugh P. and Ethel C. Kelly Professor of Electrical and Computer Engineering and Dean Emeritus of the College of Engineering, (1978-2002).

STEPHENSON, Robert E., M.S.L.S., Associate Professor Emeritus, Library, (1949-1988).

STETLER, David A., Ph.D., Associate Professor Emeritus of Biology, (1973-1998).<sup>4</sup>

STEWART, Jeffrey R., Ed.D., Professor Emeritus of Vocational and Technical Education, (1957-1992).

STEWART, Kent K., Ph.D., Professor Emeritus of Biochemistry, (1982-1998).

STIPES, R. Jay, Ph.D., Professor Emeritus of Plant Pathology, Physiology and Weed Science, (1967-2002).

STOECKEL, Jay E., M.Arch., Associate Professor Emeritus of Architecture, (1987-2004).

STORRIE, Brian, Ph.D., Professor Emeritus of Biochemistry, (1976-2003).

STOUT, Ernest R., Ph.D., Professor Emeritus of Biology, (1967-1997).

STRATTON, Richard K., Ph.D., Associate Professor Emeritus of Health Promotion, (1977-2009).

STROMBERG, Erik L., Ph.D., Professor Emeritus of Plant Pathology, Physiology, and Weed Science, (1981-2010).

STROTHER, Shirley C., Ed.D., Associate Professor Emerita of Family and Child Development, (1959-1989).<sup>1, 3</sup>

STUART, William B., Ph.D., Professor Emeritus of Forestry, (1974-1999).

STUBBLEFIELD, Harold, Th.D., Professor Emeritus of Adult Learning and Human Resource Development, (1973-1998).

STUBBS, John Caldwell, Ph.D., Professor Emeritus of English, (1989-2005).

STUTZMAN, Warren L., Ph.D., Professor Emeritus of Electrical and Computer Engineering, (1969-2001).

SULLIVAN, Joseph T., Ph.D., Joseph H. Collie Professor Emeritus of Chemical Engineering, (1997-2004).

SULLIVAN, William G., Ph.D., Professor Emeritus of Industrial and Systems Engineering, (1989-2001).

SULLOWAY, Alison G., Ph.D., Associate Professor Emerita of English, (1975-1985).

SUNDELIN, Ronald M., Ph.D., Commonwealth Professor Emeritus of Physics, (1987-2002).

SUNSHINE, Donald R., B. Arch., M. Arch., Professor Emeritus of Architecture, (1975-1999).

SWAIN, Evangeline C., M.S., Associate Professor Emerita, Cooperative Extension, (1958-1991).

SWANN, Charles W., Ph.D., Professor Emeritus of Crop and Soil Environmental Sciences, (1988-2003).<sup>5</sup>

SWIFT, George W., Ph.D., Associate Professor Emeritus of Engineering Science and Mechanics, (1959-1991).

SWIGER, L. Andy, Ph.D., *Dean Emeritus of the College of Agriculture and Life Sciences*, (1980-2003).

SWISHER, Jerry M., Jr., *Senior Extension Agent Emeritus*, (1972-2002).

SZELESS, Adorjan G., Ph.D., *Associate Professor Emeritus of Mechanical Engineering*, (1962-1992).

TALBUTT, Palmer C. Jr., Ph.D., *Associate Professor Emeritus of Philosophy*, (1959-1991).

TAYLOR, Larry T., Ph.D., *Professor Emeritus of Chemistry*, (1967-2007).<sup>2,4</sup>

TEATES, Thomas G., Ph.D., *Professor Emeritus of Education*, (1970-1995).

TELIONIS, Demetrios P., Ph.D., P.E., *Frank J. Maher Professor Emeritus of Engineering Science and Mechanics*, (1970-2008).

TEODOROVIC, Dusan, Ph.D., *Professor Emeritus of Civil and Environmental Engineering*, (1999-2005).

THOMAS, James R., Jr., Ph.D., *Professor Emeritus of Nuclear and Mechanical Engineering*, (1974-2003).

THOMAS, William C., Ph.D., *Professor Emeritus of Mechanical Engineering*, (1967-2002).

THOMSON, James E., Ph.D., *Professor Emeritus of Mathematics*, (1974-1999).

THORN, George W., *Professor Emeritus of Theatre Arts*, (1968-1998).

THORP, James, Ph.D., Hugh P. and Ethel C. Kelly *Professor Emeritus of Electrical and Computer Engineering*, (2004-2009).

THYE, Forrest W., Ph.D., *Associate Professor Emeritus of Human Nutrition, Foods, and Exercise*, (1969-2005).

TIELEMAN, Henry W., Ph.D., *Professor Emeritus of Engineering Science and Mechanics*, (1968-1997).

TLOU, Josiah S., Ed.D., *Professor Emeritus of Education*, (1978-2005).

TODD, Joseph H., III, *Senior Extension Agent Emeritus*, (1973-2002).

TOLIN, Sue A., Ph.D., *Professor Emerita of Plant Pathology*, (1966-2010).

TORGENSEN, Paul E., Ph.D., *President Emeritus*, (1966-1999).

TOTH, Thomas E., Ph.D., *Professor Emeritus of Virology*, (1983-2005).

TRANT, Doris, M.S., *Senior Extension Agent Emerita*, (1977-2005).

TRAUGER, David L., Ph.D., *Professor Emeritus of Natural Resources Management*, (2001-2008).

TURNER, Bruce J., Ph.D., *Associate Professor Emeritus of Biological Sciences*, (1978-2010).

TURNER, E. Craig, Jr., Ph.D., *Professor Emeritus of Entomology*, (1953-92).

TURNWALD, Grant H., *Diplomate, A.C.V.I.M.*, *Professor Emeritus of Small Animal Clinical Sciences*, (1998-2009).

TWIFORD, Travis W., Ph.D., *Associate Professor Emeritus of Educational Leadership and Policy Studies*, (1999 – 2011). **TYREE, Jack M., M.S.**, *Professor Emeritus, 4-H Extension*, (1950-1975).

TZE, Hsiung Chia, Ph.D., *Professor Emeritus of Physics*, (1985-2000).

ULLOA, Justo, Ph.D., *Professor Emeritus of Spanish*, (1972 – 2012).

UMBERGER, Steven H., Ph.D., *Extension Director Emeritus*, (1980-2005).

VAN KREY, Harry P., Ph.D., *Professor Emeritus of Poultry Science*, (1965-1991).

VANLANDINGHAM, Hugh F., Ph.D., *Professor Emeritus of Electrical and Computer Engineering*, (1966-2001).

VASEY, Richard B., Ph.D., *Professor Emeritus of Forestry*, (1970-1990).

VAUGHAN, David H., Ph.D., *Professor Emeritus of Biological Systems Engineering*, (1973-2010).<sup>4</sup>

VAUGHAN, Michael, Ph.D., *Professor Emeritus of Fisheries and Wildlife Science*, (1980-2009).

VENTRE, Francis T., *Professor Emeritus of Architecture and Planning*, (1986-1993).

VIERS, Jimmy W., Ph.D., *Associate Professor Emeritus of Chemistry*, (1971-2005).<sup>2, 4</sup>

VOGLER, Daniel E., M.S., *Associate Professor Emeritus in the College of Human Resources and Education*, (1976-1998).

WAHLBERG, Mark L., Ph.D., *Associate Professor Emeritus of Animal and Poultry Sciences*, (1982-2010).

VORSTER, Michael, Ph.D., *David H. Burrows Professor Emeritus of Construction Engineering*, (1986-2009).<sup>2,7,9</sup>

WALCOTT, Charles E., Ph.D., *Professor Emeritus of Political Science*, (1989 – 2011).

WALKER, Richard D., Ph.D., P.E., *Professor Emeritus of Civil Engineering*, (1961-1996).

WALL, Vera, J. Ph.D., *Associate Dean Emerita of the College of Human Resources and Education*, (1981-1998).

WALLACE, Bruce, Ph.D., *University Distinguished Professor Emeritus of Biology*, (1981-1994).

WAMSLEY, Gary L., Ph.D., *Professor Emeritus of Public Administration*, (1977-2005).

WANG, Joseph, Ph.D., *Professor Emeritus of Architecture*, (1965-2009).

WARD, Thomas C., Ph.D., *Adhesive and Sealant Council Endowed Professor Emeritus of Chemistry*, (1968-2006).<sup>2, 3</sup>

WARREN, Herman L., Ph.D., *Professor Emeritus of Plant Pathology, Physiology, and Weed Science*, (1989-2003).

WASHENBERGER, James K., Ph.D., *Associate Professor Emeritus of Mathematics*, (1966-2007).

WEAVER, William D., Ph.D., *Professor Emeritus of Poultry Science*, (1962-1991).

WEBB, Kenneth E., Jr., Ph.D., *Professor Emeritus of Animal and Poultry Sciences*, (1969-2010).

WEBB, Ryland E., Ph.D., *Professor Emeritus of Human Nutrition and Foods*, (1963-1996).

WELCH, Dennis, Ph.D., *Associate Professor Emeritus of English*, (1981 – 2012).

WELLS, Donna J., M.S., *District Director Emerita of Virginia Cooperative Extension*, (1969-2010).

WELLS, Helen, Ph.D., *Associate Professor Emerita of Housing, Interior Design and Resource Management*, (1973-1989).

WEST, David A., Ph.D., *Associate Professor Emeritus of Biology*, (1962-1998).

WEYERS, Richard E., Ph.D., Charles E. Via, Jr. *Professor Emeritus of Civil and Environmental Engineering*, (1985 – 2011).

WHEELER, Robert L., Ph.D., *Professor Emeritus of Mathematics*, (1979-2010).

WHITE, John M., Ph.D., *Professor of Dairy Science and Associate Dean Emeritus of the College of Agriculture and Life Sciences*, (1967-2002).<sup>2,3</sup>

WHITE, Marshall S., Ph.D., *Professor Emeritus of Wood Science and Forest Products*, (1975-2007).

WHITE, Orion F., Jr., Ph.D., *Professor Emeritus of Public Administration and Policy*, (1980-2003).

WHITE, William M., Ph.D., *Professor Emeritus of English*, (1953-1990).

WHITELAW, Robert L., M.S., P.E., *Professor Emeritus of Mechanical and Nuclear Engineering*, (1966-1987).

WIECZYNSKI, Joseph L., Ph.D., *Professor Emeritus of History*, (1968-1999).

WIERWILLE, Walter W., Ph.D., *Professor Emeritus of Industrial and Systems Engineering*, (1971-1998).

WIGGERT, James M., Ph.D., *Associate Professor Emeritus of Civil Engineering*, (1961-1991).<sup>8</sup>

WIGHTMAN, James P., Ph.D., *Professor Emeritus of Chemistry*, (1962-2000).<sup>3, 4, 9</sup>

WILDMAN, Terry M., Ph.D., *Professor Emeritus of Learning Sciences and Technologies*, (1976-2010).

WILKES, Garth L., Ph.D., *University Distinguished and Fred W. Bull Professor Emeritus of Chemical Engineering*, (1978-2003).<sup>6</sup>

WILKINS, Tracy D., Ph.D., *Professor Emeritus of Biochemistry*, (1972-2002).

**WILLIAMS, Clayton D., Ph.D.,** *Associate Professor Emeritus of Physics, (1961-1996).*  
**WILLIAMS, George R., M.S.,** *Professor Emeritus of Horticulture, (1957-1980).*  
**WILLIAMS, Jerry M., Ph.D.,** *Associate Professor Emeritus of Horticulture, (1982-2008).*  
**WILLIAMS, Michael, Ph.D.,** *Associate Professor Emeritus of Mathematics, (1976-2010).*  
**WILLIAMSON, Gustavus G., Ph.D.,** *Associate Professor Emeritus of History, (1966-1992).*  
**WILLIGES, Robert C., Ph.D.,** *Ralph H. Bogle Professor Emeritus of Industrial and Systems Engineering, (1976-2003).*  
**WILLS, George B., Ph.D.,** *Professor Emeritus of Chemical Engineering, (1964-1996).<sup>3</sup>*  
**WILLS, Wirt H., Ph.D.,** *Professor Emeritus of Plant Pathology, Physiology, and Weed Science, (1954-1990).*  
**WILSON, James H., Ph.D.,** *Professor Emeritus of Biological Systems Engineering, (1975-2002).*  
**WISDOM, Harold W., Ph.D.,** *Professor Emeritus of Forestry, (1976-2001).*  
**WOESTE, Frank E., Ph.D.,** *Professor Emeritus of Biological Systems Engineering, (1977-2003).*  
**WOLF, Dale Duane, Ph.D.,** *Professor Emeritus of Agronomy, (1967-1997).*  
**WOLF, James, Ph.D.,** *Professor Emeritus for the Center of Public Administration and Policy in the School of Public and International Affairs, (1978 – 2012).*  
**WOLFE, James F., Ph.D.,** *Professor Emeritus of Chemistry, (1964-1996).<sup>3</sup>*  
**WOLFORD, John H., Ph.D.,** *Professor Emeritus of Animal and Poultry Sciences, (1980-1995).*  
**WONG, Young-tsu, Ph.D.,** *Professor Emeritus of History, (1971-2002).<sup>6</sup>*  
**WOODARD, Janice E., Ph.D.,** *Associate Professor Emerita of Housing, Interior Design, and Resource Management, (1969-1992).*  
**WOODARD, Linda S., M.A., M.S.,** *Assistant Vice President Emerita for Administrative Services, (1980-2010).*  
**WORNER, Wayne M., Ed.D.,** *Professor and Dean Emeritus of the College of Education, (1971-1996).*  
**WRIGHT, Robert, Ph.D.,** *Professor Emeritus of Horticulture, (1973-2009).*  
**YARDLEY, Dianne W., Ph.D.,** *Associate Dean Emerita of the College of Human Resources and Education, (1982-2002).*  
**YEARWOOD, Richard M., Ph.D.,** *Associate Professor Emeritus of Urban Affairs and Planning, (1968-1998).*  
**YOUNGS, Robert L., Ph.D.,** *Professor Emeritus of Forestry and Forest Products, (1985-1994).*  
**YOUSTEN, Allan A., Ph.D.,** *Professor Emeritus of Biology, (1971-2001).*  
**ZALLEN, Richard H., Ph.D.,** *Professor Emeritus of Physics, (1983-2005).*  
**ZIA, Royce K. P., Ph.D.,** *Professor Emeritus of Physics, (1976-2009).*  
**ZOECKLEIN, Bruce W., Ph.D.,** *Professor Emeritus of Food Science and Technology, (1985-2010).<sup>5</sup>*  
**ZWEIFEL, Paul F., Ph.D.,** *University Distinguished Professor Emeritus of Physics, (1968-1995).*

## Faculty Honors: 2000 - present | 1957 - 1999

- [Academic Advising Awards](#)
- [Academy of Teaching Excellence](#)
- [Alumni Extension Award](#)
- [Alumni International Programs Award](#)
- [Alumni Research Award](#)
- [Alumni Teaching Award](#)
- [Commonwealth of Virginia Outstanding Faculty](#)
- [Diggs Teaching Scholar Awards](#)
- [Distinguished Professors, Alumni](#)
- [Distinguished Professors, University](#)
- [Sporn Award](#)
- [University Exemplary Department Awards](#)
- [Wine Award](#)

---

### Academic Advising Awards

**2011:** J. Evans  
**2010:** D.M. Denbow  
**2009:** W. Moore  
**2008:** C. Taylor  
**2007:** J. Campbell  
**2006:** J. Mooney  
**2004:** J. Cranford  
**2003:** D.W. Reaves  
**2002:** R. Holloway  
**2001:** S. Ball  
**2000:** D.B. Thorp

---

### Academy of Teaching Excellence

**2011:** M. Alexander, R. Billingsley, J. Folkart, S. Johnson, L. Piilonen, R. Walker  
**2010:** P.G. Amateis, B. Bekken, E. Coupey, P. Doolittle, M. Ellerbrock, D. Schmale  
**2009:** C.A. Bailey, J. De La Ree Lopez, A. Nelson, J.H. Simonetti, A. Stevens, M. Vollmer  
**2008:** E. Bloomer, J.E. Eddleton, O.H. Griffin, R.F. McDuffie, J.C. Sible, J.D. Stahl  
**2007:** W. Beal, G.H. Becker, G.M. Filz, K.A. Hoffman, M.B. Saffle, E.T. Shugart  
**2006:** M. Barrow, T.M. Gardner, P. Heilker, G.V. Loganathan, F.H. Oehlschlaeger, K. Pelzer  
**2005:** D. Agud, W.T. Baumann, R.J. Foti, A. Kohler, G. Long, P. Sorrentino  
**2004:** A. Colaianne, G. Downey, T. Pratt, C.F. Reinholtz, J.J. Richardson Jr., S. Saffle  
**2003:** A.L. Buikema Jr., D.M. Denbow, R.M. Goff, G. Lloyd, D.W. Reaves, W.E. Snizek  
**2002:** P.G. Amateis, W.M. Aust, R.E. Benoit, J.D. Boyer, R.D. Fell, C.P. Neck  
**2001:** A.O. Abaye, H. Bender, W.W. Brown, S. Magliaro, M. McAllister, M. Vorster  
**2000:** J.T. Arnold, A.S. Becker, J.L. Ozanne, T. Papillon, A.J. Stremmel, B.M. Waggenpack

---

### Alumni Extension Award

**2011:** B.J. Elmer, M. Goatley  
**2010:** S. Greiner, M. Parrish  
**2009:** D. Moore, T. Wolf  
**2008:** J. Orband, R. Youngman  
**2007:** K. Balderson, M. Weaver  
**2006:** J. Baney, A. Herbert  
**2005:** R. Cox, G.M. Snyder  
**2004:** G. Evanylo, J. Unroe  
**2003:** M.T. Lambur, S.M. Johnson  
**2002:** J.A. Myers, C.C. Stallings  
**2001:** H.W. Pettway, S.S. Sumner  
**2000:** J.A. Martin, R.M. Shaffer

---

### **Alumni International Programs Award**

**2011:** S. Riad, C. Taylor, R. Wokutch  
**2010:** J. Burton, T. Hammett, M. Marchant  
**2009:** M.D. Alexander, J.H. Bohn, S. Tolin  
**2008:** J. Browder, D. Gnyawali, G. Snyder  
**2007:** J. Littlefield, T. Ollendick  
**2006:** J. Alwang, G.R. Thompson  
**2005:** V. Fu, D. Kingston  
**2004:** J. Scarpaci  
**2003:** J. Marchman  
**2002:** J.S. Tlou  
**2001:** G.W. Norton  
**2000:** D.E. Egger

---

### **Alumni Research Award**

**2011:** N. Ramakrishnan, J. Riffle  
**2010:** T.E. Long, S. Xiao  
**2009:** A.R. Ekirch, B. Tyler  
**2008:** X.J. Meng, S.T. Oyama  
**2007:** T. Calasanti, D. Viehland  
**2006:** H. Dorn, M. Edwards, K. Roberto  
**2005:** M.F. Hochella, Jr., M.W. Hyer  
**2004:** R.C. Batra, H.W. Gibson  
**2003:** D. Farkas, D. Lindsay  
**2002:** John G. Casali, Malcolm Potts  
**2001:** E.S. Geller, D.J. Inman  
**2000:** R.M. Akers, L.T. Watson

---

### **Alumni Teaching Award**

**2011:** J. Folkart, R. Walker  
**2010:** B. Bekken, P. Doolittle  
**2009:** A. Nelson, A. Stevens  
**2008:** O.H. Griffin, J.C. Sible  
**2007:** T.H. Becker, K.A. Hoffman  
**2006:** M. Barrow, F.H. Oehlschlaeger  
**2005:** R.J. Foti, A. Kohler  
**2004:** A. Colaianne, C.F. Reinholtz  
**2003:** G. Lloyd, D.W. Reaves  
**2002:** W.M. Aust, P.G. Amateis  
**2001:** A.O. Abaye, M. Vorster  
**2000:** J.T. Arnold, B.M. Waggenspack

---

### **Commonwealth of Virginia Outstanding Faculty**

**2011:** G. Downey  
**2010:** R. Batra  
**2007:** M. A. Edwards, D.T. Zallen  
**2006:** T.M. Murray, P. Sorrentino  
**2005:** R.O. Claus, E.S. Geller, L. Roy  
**2003:** T. Gardner, M. Vorster  
**2002:** J. R. Craig, J.R. Seiler  
**2001:** J.P. Wightman  
**2000:** Y.A. Liu, W. Purcell

---

## Diggs Teaching Scholar

**2011:** K. Harrison, T. Martin  
**2010:** B.K. Bekken, M. Kasarda, R. Stephens  
**2009:** E. Graves, M. Vernon, T. Walker  
**2008:** P.S. Polanah, J. Terpenney, Y. White  
**2007:** N. Alexander-Floyd, G. Chandler, B. Murphy  
**2006:** J. Dubinsky, O. H. Griffin, J. Sible  
**2005:** C. Dannenberg, K. Precoda, P. Wallenstein  
**2004:** S. Ball, C. Eckel, S. Johnson, R. Siegle  
**2003:** A. Becker, E. Bloomer, T. Smith-Jackson  
**2002:** M.M. Boler, J.R. Seiler, W.E. Snizek  
**2001:** M.B. Boisen, S. Floyd-Thomas, R. Goff  
**2000:** K. Allen, B. Bunch-Lyons, J. Martin

---

## Alumni Distinguished Professors

J. Bixler, R. Blieszner, E.A. Brown, A.L. Buikema, Jr., G. Downey, T. Gardner, E.S. Geller, Y.A. Liu, L.H. Roy, J. Seiler

---

## University Distinguished Professors

R.J. Bodnar, H.E. Burkhart, D. Dean, G.J. Flick, Jr., N. Giovanni, M. Hochella, D. Kingston, P. Knox, F.C. Lee, T. Luke, J. McGrath, A.H. Nayfeh, T.H. Ollendick, H. Sherali, J.J. Tyson, R. H. Yoon

**Honorary Distinguished Professor:** M. Grene

---

## Sporn Award

**2011:** M. Alexander  
**2010:** J. Bolton, D. Schmale  
**2009:** T.S. Chang, M. Vollmer  
**2008:** E. Bloomer, M. Paretti  
**2007:** W.E. Beal, Y.A. Liu  
**2006:** P.L. Durrill, P. Heilker  
**2005:** D. Agud, K. Ellis  
**2004:** J. De La Ree Lopez, S. Saffle  
**2003:** W. E. Snizek, E. Scott  
**2002:** J.D. Boyer, J.S. Thweatt  
**2001:** M. McAllister, D.H. Vaughan  
**2000:** W.L. Conger, T. Papillon

---

## University Exemplary Department (recipients for the last five years)

### 2011

*Effectively linking assessment with instruction to improve student learning*

English

Dietetics program (Human Nutrition, Foods and Exercise)

Industrial and Systems Engineering

### 2010

*Developing and sustaining innovative and effective approaches that foster international awareness and education.*

Chemical Engineering

Entomology

Mechanical Engineering

### 2009

*Effectively linking research and scholarship with teaching, with particular concentration on innovative undergraduate programs.*

Earth Sustainability Program

Chemistry

### 2008

*Working collaboratively across departmental boundaries to fulfill common or complementary goals.*

Computer Science

Architecture+Design

History

Teaching & Learning

Undergraduate Research Institute

### 2007

*Developing and sustaining innovative and effective departmental approaches to advising at the undergraduate and/or graduate levels.*

### **Wine Award**

**2011:** R. Billingsley, S. Johnson, L. Piilonen  
**2010:** P.G. Amateis, E. Coupey, M. Ellerbrock  
**2009:** C.A. Bailey, J. De La Ree Lopez, J.H. Simonetti  
**2008:** J.E. Eddleton, R.F. McDuffie, J.D. Stahl  
**2007:** G.M. Filz, M.B. Saffle, E.T. Shugart  
**2006:** T.M. Gardner, G.V. Loganathan, K. Pelzer  
**2005:** W.T. Baumann, P. Sorrentino, G. Long  
**2004:** G. Downey, T. Pratt, J.J. Richardson, Jr.  
**2003:** A.L. Buikema, Jr., D.M. Denbow, R.M. Goff  
**2002:** R.E. Benoit, R.D. Fell, C.P. Neck  
**2001:** H. Bender, W.W. Brown, S. Magliaro  
**2000:** A.S. Becker, J.L. Ozanne, A.J. Stremmel

## Publication and Contractual Information

- **The provisions of this catalog do not constitute a contract, expressed or implied, between any applicant or student and Virginia Polytechnic Institute and State University. The university reserves the right to change any of the provisions, schedules, programs, courses, rules, regulations, or fees whenever university authorities deem it expedient to do so.**
- Virginia Tech does not discriminate against employees, students, or applicants on the basis of race, sex, disability, age, veteran status, national origin, religion, political affiliation, or sexual orientation. The university is subject to Titles VI and VII of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Sections 503 and 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, the Age Discrimination in Employment Act, the Vietnam Era Veterans' Readjustment Assistance Act of 1974, Federal Executive Order 11246, Virginia's State Executive Order Number Two, and all other rules and regulations that are applicable. Anyone having questions concerning any of those regulations should contact the Equal Opportunity and Affirmative Action Office, 336 Burruss Hall, Blacksburg, Virginia 24061-0216, 540/231-7500, TYY 540/231-9460.

## Policy Statement on Sexual Harassment

- Sexual harassment is considered to be a form of discrimination based on sex and falls within the statutory prohibitions against sex discrimination. The university is committed to maintaining a working and a study environment free of sexual harassment. Accordingly, in compliance with Section 703 of Title VII of the Civil Rights Act of 1964 and Title IX of the Education Amendments of 1972, it is the university's policy not to tolerate any verbal, nonverbal, or physical behavior which constitutes sexual harassment. Personnel with supervisory responsibilities are required to take immediate and appropriate action when incidents of alleged sexual harassment are brought to their attention. Violations of the policy prohibiting sexual harassment may lead to disciplinary actions, including reprimand, suspension, or termination of employment or academic status.
- Sexual harassment is defined as unwelcome sexual advances, request for sexual favors, and other verbal, nonverbal, or physical conduct of a sexual nature when:
  1. submission to such conduct is made either explicitly or implicitly a term or condition of an individual's employment or academic decisions, or
  2. submission to or rejection of such conduct by an individual is used as the basis for employment or academic decisions, or
  3. such conduct has the purpose or effect of unreasonably interfering with an individual's work or academic performance or creating an intimidating, hostile, or offensive working or academic environment.
- Faculty, staff, students, and applicants for employment or admission with complaints of sexual harassment should contact the University EO/AA Office on a confidential basis and request an informal investigation.
- Faculty, staff, and students may file formal complaints outside the university. Students may file formal complaints with the Office of Civil Rights of the Department of Education. Faculty may file formal complaints with the Equal Employment Opportunity Commission. Staff may contact the State EEO Office or the Equal Employment Opportunity Commission.
